Basic Camera User Guide (This Guide)

Software Starter Guide

For information on included items and items sold separately

In this guide, the Basic Camera User Guide is called the Basic Guide, and the Advanced Camera User Guide is called the Advanced Guide. Also, "battery" refers to the battery pack.

You may not be able to achieve the full performance of this camera with the included memory card.
The Components Guide

Front View

1. Wrist Strap Mount
2. Microphone
4. AF-assist Beam (Advanced Guide p. 24)
5. Red-Eye Reduction Lamp (Advanced Guide p. 36)
6. Self-Timer Lamp (p. 16)
7. Flash (p. 14)
8. Lens

In order to avoid dropping the camera, wear the wrist strap when using the camera.
Back View

1. LCD Monitor (Advanced Guide pp. 12, 15)
2. Viewfinder (Advanced Guide p. 18)
4. Terminal Cover
5. DIGITAL Terminal (p. 27)
6. Tripod Socket
7. DC Coupler Terminal Cover (Advanced Guide p. 134)
8. Memory Card Slot/Battery Cover (p. 8)

The interface cable and AV cable cannot be connected simultaneously.

The LCD monitor may be covered with a thin plastic film for protection against scratches during shipment. If so, remove the film before using the camera.
Controls

1. Speaker
2. Indicators (p. 6)
3. Power Lamp
4. Power Button (p. 10)
5. Zoom Lever (p. 14, Advanced Guide p. 80)
   - Shooting: < Wide Angle> / < Telephoto>
   - Playback: < Index > / < Magnify >
6. Shutter Button (p. 10)
7. Mode Dial (p. 10, 11)
8. DISP. (Display) Button (Advanced Guide p. 12)
9. FUNC./SET (Function/Set) Button (p. 10, Advanced Guide p. 20)
10. MENU Button (p. 21, Advanced Guide p. 23)
11. (Macro) / (Infinity) / Button (p. 15)
12. ISO (ISO Speed) / (Jump) / Button (Advanced Guide pp. 69, 83)
13. (Flash) / Button (p. 14)
14. (Single Image Erase) / (Continuous) / (Self-timer)
   / Button (pp. 16, 19, Advanced Guide p. 37)
Using the Touch Control Dial

■ Touching the Dial
A magnified image of the touch control dial displays on the LCD monitor when you place your finger on the dial. Circling your finger on the dial allows you to configure the functions assigned to each button.

- Functions that cannot be configured are shown in gray.
- The dial display (Touch Icons) can be turned On/Off in the  (Set up) menu (Advanced Guide p. 26).
- When Touch Icons is set to [Off], the icon of the function being touched appears in green on the LCD monitor.

■ Circling Your Finger on the Dial
You can select categories or images by circling your finger on the dial. Circling counterclockwise works the same as the button and circling clockwise the same as the button. (It may also work as the buttons with some functions.)
The following functions can be operated using the touch control dial. Please note that some of the options for some functions cannot be operated with it.

Indicators

The camera indicators light or blink under the following circumstances.

Never do the following while an indicator is blinking green. These actions may corrupt image data.
- Shake or jolt the camera
- Shut off the power, or open the memory card slot/battery cover

Upper Indicator
- Green: Ready to shoot (camera beeps twice)
- Blinking Green: Time Lapse (movie) recording/Image recording/reading/erasing/transfering (when connected to a computer/printer)
- Orange: Ready to shoot (flash on)
- Blinking Orange: Ready to shoot (camera shake warning)

Lower Indicator
- Yellow: Macro mode/infinity mode/AF lock mode
- Blinking Yellow: Focusing difficulty (camera beeps once)

Preparations

1. Charging the Battery.
   Charge the battery before use under the following circumstances.
   - When using the battery for the first time.
   - When the "Change the battery pack." message displays.
   1. Insert the battery into the battery charger.
   2. Plug the battery charger (CB-2LX) into a power outlet, or attach the power cord to the battery charger (CB-2LXE) and plug it into a power outlet.
   - Battery charger model names and types vary by region.
The charge indicator will light orange while the battery is charging. It will change to green when the charge is complete. Charging takes approximately 2 hours 5 minutes.

2. Installing the Battery.
1. Slide the memory card slot/battery cover and open it (a, b).
2. Push the battery lock in the direction of the arrow (c) and insert the battery until it locks. To remove the battery, push the battery lock in the direction of the arrow (c) and hold it while pulling the battery out.

To protect the battery and prolong its life, do not charge it for longer than 24 hours continuously. See the Advanced Guide: Battery Handling (p. 130).
3. Inserting the Memory Card.
   1. Insert the memory card until it clicks into place.
   2. Close the memory card slot/battery cover (①, ②).

Ensure that the memory card is correctly oriented before inserting it in the camera. Inserting it backward may cause the camera to fail to recognize the memory card or to malfunction.

To Remove the Memory Card
Use a finger to push the memory card in until you hear a click, then release it.

You can use SD memory cards, SDHC memory cards and MultiMediaCards with this camera. These cards are collectively called memory cards in this guide.
**First Time Settings**

### Setting the Date/Time

1. Press the power button (a).
2. Use the or button to select an item and the or button to change its value (b).
   To set the daylight saving option, select the icon and use the or button to configure the setting.
3. Confirm that the correct time is displayed and press the FUNC./SET button (c).

The date and time can also be set in the Set up menu (p. 21).

- A rechargeable lithium battery is built into the camera to save such settings as the date/time. This battery charges when the main battery is in the camera. When you purchase the camera, place the main battery in it for approximately four hours or use AC Adapter Kit ACK-DC30 (sold separately) to charge the lithium battery. It will charge even if the camera is turned off.
- The date/time settings may be lost after approximately three weeks if you remove the main battery. Reset the date/time settings if this occurs.

### Setting the Display Language

1. Turn the mode dial to (playback).
2. Hold down the FUNC./SET button and press the MENU button.
3. Use the , , or button to select a language and press the FUNC./SET button.

The display language can also be set in the Set up menu (p. 21).

See the Advanced Guide: Setting the World Clock (p. 20).
1. **Press the power button.**
   - The start-up sound will play and the start-up image will display in the LCD monitor.
   - Pressing the power button again turns the power off.
   - To switch to the setting that mutes all sounds (except for the warning sound), press and hold the DISP. button while pressing the power button.

2. **Turn the mode dial to ** (Auto).

3. **Aim the camera at the subject.**

4. **Focus and shoot.**
   - **1. Press the shutter button halfway to focus.**
     - When the camera focuses, it beeps twice and the indicator lights green (orange when the flash fires). In addition, a green AF frame appears in the LCD monitor on the portion of the image used to set the focus.
2. Press the shutter button fully to shoot.
   The shutter sound will play and the image will record. The indicator will blink green while the image is recorded to the memory card.

Reviewing an Image Right After Shooting

After a shot is taken, the image appears in the LCD monitor for approximately 2 seconds. You can continue to display images regardless of the review duration setting with the following procedures.

- Keeping the shutter button pressed after a shot.
- Pressing the FUNC./SET or DISP. button while the image is displayed in the LCD monitor.

To stop displaying the image, press the shutter button halfway.

Selecting a Shooting Mode

1. Turn the mode dial to the desired mode (①).

   QM, SCN or M modes
   1. Press the FUNC./SET button (②)
   2. Select a shooting mode using the  or  button (③).
   3. Press the FUNC./SET button (④).

   You can also use the touch control dial to make a selection.
### Shooting Modes

**AUTO**
- **Auto**
The camera automatically selects settings.

**Manual**
- **Digital Macro**
  Allows you to shoot when the distance from the lens (at maximum wide angle) to the subject is within 2 – 50 cm (0.8 in. – 1.6 ft.). The subject can be shown larger than in standard macro mode because the camera trims the image edges and zooms in with the digital zoom.

**M Manual**
- **Color Accent**
  Use this option to have only the color specified in the LCD monitor remain and to transform all others to black and white.
- **Color Swap**
  Use this option to transform a color specified in the LCD monitor into another.
- **Stitch Assist**
  Allows you to shoot overlapping images that can later be merged (stitched) to create one panoramic image on a computer.

**SCN Special Scene**
- **Portrait**
  Produces a soft effect when photographing people.
- **Night Snapshot**
  Allows you to take snapshots of people against twilight or night backgrounds by reducing the effects of camera shake even without using a tripod.
- **Kids & Pets**
  Allows you to capture subjects that move around, such as children and pets, without missing photo opportunities.
- **Indoor**
  Prevents camera shake and maintains the subject’s true color when shooting under fluorescent or tungsten lighting.
- **Creative Light Effect**
  You can select specific shapes, such as \( \) or \( \), to produce fantastical images of people set against a nightscape or illuminated by a light source.

---

See the Advanced Guide (p. 35).

See the Advanced Guide (p. 64).

See the Advanced Guide (p. 66).

See the Advanced Guide (p. 47).
**SCN SPECIAL SCENE**

**Foliage**
Shoots trees and leaves—such as new growth, autumn leaves or blossoms—in vivid colors.

**Snow**
Shoots without a blue tinge and without making people appear dark against a snowy background.

**Beach**
 Shoots without making people appear dark near water or sand where reflected sunlight is strong.

**Fireworks**
Captures fireworks in the sky sharply and at optimal exposure.

**Aquarium**
Selects the optimal ISO speed, white balance and color balance to capture fish and other items in an indoor aquarium.

**Underwater**
Appropriate for shooting images with Waterproof Case WP-DC15 (sold separately). This mode uses an optimal white balance setting to reduce bluish tones and record images with a natural hue.

**Movie**
Shoots a movie when you press the shutter button. You can select from the following modes: [Standard], [Fast Frame Rate] suitable for sports or fast motion; [Compact] convenient for email attachments; [Color Accent] for recording all colors in black and white except for the selected color; [Color Swap] for recording a selected color as a different color; and [Time Lapse] for shooting one frame at a time at a set interval. See the Advanced Guide (p. 42).

- The shutter speed is slow in ** modes. Always use a tripod to avoid camera shake.
- In ** or ** mode, the ISO speed may increase and cause noise in the image depending on the scene being shot.
- In ** mode, shoot with the subject 1 m (3.3 ft.) or more from the end of the lens.

- To shoot underwater, install the camera in Waterproof Case WP-DC15 (sold separately).
- We recommend you use Waterproof Case WP-DC15 for shooting at ski resorts or beaches.
Using the Zoom

1. Press the zoom lever toward [W] or [T].
The zoom can be adjusted from 35 – 140 mm (focal length) in 35mm film equivalent terms.

Wide Angle: Zooms out from the subject.
Telephoto: Zooms in on the subject.

Using the Flash

1. Press the \\ button (1) and use the < or > button to switch between modes (2).
You can also use the touch control dial to make a selection.

You are recommended to shoot with the camera attached to a tripod or other device if the camera shake warning icon appears.

The [ ] option cannot be set in (Auto) mode.
Shooting Close-Ups/Infinity Shots

1. Press the \$/ button (①) and use the or button to switch between modes (②).
   • You can also use the touch control dial to make a selection.
   • To Cancel: press the \$/ button and use the or button to display (Normal).

   ![Camera with macro and infinity modes]

Macro
Use this mode to shoot close-ups of flowers or small items.
• Maximum wide angle setting: 30 × 22 mm (1.2 × 0.9 in.)
• Minimum focusing distance: 2 cm (0.8 in.)
• Maximum telephoto setting: 110 × 82 mm (4.3 × 3.2 in.)
• Minimum focusing distance: 40 cm (1.3 ft.)

Infinity
Use this mode to record subjects 3 m (9.8 ft.) or more from the end of the lens.
• Use the LCD monitor to compose close-ups in macro mode since images composed with the viewfinder may be off-center.
• When using the internal flash in macro mode, there is a possibility that images will not be of the optimum brightness.

The option cannot be set in (Auto) mode.

See the Advanced Guide: Functions Available in Each Shooting Mode (p. 160).
See Selecting a Shooting Mode (p. 11).
Using the Self-Timer

1. Press the button (a) and use the or button (b) to display , or .
   • You can also use the touch control dial to make a selection.
   • When the shutter button is pressed fully, the self-timer will activate and the self-timer lamp will blink (when using red-eye reduction, it will stay lit for the last 2 seconds).
   • You can change the delay time and number of shots with the option (p. 17).

To Cancel: press the button and use the or button to select .

*1 This may differ depending on your My Camera settings (Advanced Guide p. 113).
*2 Default setting.
*3 Default setting is 3 shots.

10 sec. Self-Timer: shoots 10 sec. after you press the shutter button.
• 2 sec. before the shutter releases, the self-timer lamp and sound speed up*1.

2 sec. Self-Timer: shoots 2 sec. after you press the shutter button.
• The self-timer sound beeps quickly*1 when you press the shutter button and the shutter releases 2 sec. later.

Custom Timer: you can change the delay time (0–10*, 15, 20, 30 sec.) and number of shots (1–10)*3.
• When [Delay] is set to 2 or more sec., the self-timer sound beeps quickly 2 sec. before the shutter releases. When [Shots] is set to more than 1, the self-timer sound only beeps before the first shot.

The self-timer cannot be used in some shooting modes.

See the Advanced Guide: Functions Available in Each Shooting Mode (p. 100).
See: Selecting a Shooting Mode (p. 11).
Changing the Delay Time and Number of Shots

1. In the (Rec) menu, select [Self-timer] and press the FUNC./SET button.

2. Use the ↑ or ↓ button to select [Delay] or [Shots] and the ← or → button to change the setting and press the FUNC./SET button.

3. Press the MENU button.

If the [Shots] option is set to 2 or more shots, the following occurs:
- The exposure and white balance are locked at the settings selected for the first shot.
- If the flash is used, the interval between shots lengthens because the flash must charge.
- The interval between shots lengthens when the built-in memory of the camera fills.
- Shooting will automatically cease if the memory card becomes full.
1. Turn the mode dial to  (playback) (①).
   The last recorded image will display. Or if you have played back images, the last image viewed will display (Resume Playback).
   If the memory card has been switched, or the images on the memory card have been edited with a computer, the newest image on the memory card appears.

2. Use the  or  button to display the image you wish to view (②).
   • Use the  button to move to the previous image and the  button to move to the next image. Holding the button down advances the images more rapidly, but shows them less clearly.
   • Circling your fingertip to the left or right on the touch control dial selects an image.

See the Advanced Guide for the various playback methods available.
See Using the Touch Control Dial (p. 4).
In the playback mode, use the ‹ or › button to select an image to erase (③) and press the ◊ button (④).
You can also use the touch control dial to make a selection.

Confirm that [Erase] is selected and press the FUNC./SET button (⑤).
To exit instead of erasing, select [Cancel].

Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image.

See the Advanced Guide: Erasing Images (p. 105).
Menus and Settings

Settings for the shooting or playback modes or such camera settings as the print settings, date/time and sounds are set using the FUNC. menu or the Rec., Play, Print, Set up or My Camera menu.

FUNC. Menu

This menu sets many of the common shooting functions.

1. Turn the mode dial to , , SCN or .
2. Press the FUNC./SET button.
3. Use the button to select a menu item.
   • Some items may not be selectable in some shooting modes.
4. Use the or button to select an option for the menu item.
   • You can also use the touch control dial to make a selection.
   • You can select further options with the MENU button for some options.
   • After selecting an option, you can press the shutter button to shoot immediately. After shooting, this menu will appear again, allowing you to adjust the settings easily.
5. Press the FUNC./SET button.

See the Advanced Guide: Menu List (p. 24).
Rec., Play, Print, Set up and My Camera Menus

Convenient settings for shooting, playback or printing can be set with these menus.

1. Press the MENU button.
2. Use the  or  button to switch between menus.
   - You can also use the zoom lever to switch between menus.
3. Use the  or  button to select a menu item.
   - You can also use the touch control dial to make a selection.
   - Some items may not be selectable in some shooting modes.
4. Use the  or  button to select an option.
   - Menu items followed by an ellipsis (…) can only be set after pressing the FUNC./SET button to display the next menu.
   - Press the FUNC./SET button again to confirm the setting.
5. Press the MENU button.

See the Advanced Guide: Menu List (p. 24).

(Rec.) Menu
(Play) Menu
(Set up) Menu
(My Camera) Menu

(Rec.) Menu
- This example shows the Rec. menu in (Auto) mode.
- In playback mode, the Play, Print, Set up and My Camera menus display.

(Play) Menu
- You can switch between menus with the  or  button when this part is selected.

See the Advanced Guide: Menu List (p. 24).
You can easily print by connecting the camera to a direct print compatible printer*1 with a cable and simply pressing the button on the camera.

1. Connect the camera to a direct print compatible printer and turn on the printer’s power.

*1 Since this camera uses a standard protocol (PictBridge), you can use it with other PictBridge-compliant printers in addition to Canon-brand printers.

*2 You can also use the CP-10/CP-100/CP-200/CP-300 card photo printers.
2. Set the camera to the playback mode, turn on the power and confirm that $\Delta$, $\nabla$ or $\square$ is displayed in the upper left of the LCD monitor (1).
   - The $\Delta$ button will light blue.
   - The displayed icon will vary according to the printer model.
   - $\square$ will display in the movie mode.

3. Use the $\downarrow$ or $\uparrow$ button to select an image to print (2) and press the $\times$ button (3).
   - You can also use the touch control dial to make a selection.
   - The $\Delta$ button will blink blue and printing will start.

See the Advanced Guide: Setting the DPOF Print Settings (p. 107).
See the Direct Print User Guide.
See the user guide for your printer.
The following methods can be used to download images recorded by the camera to a computer. Some methods, depending on the OS used, may not be available. Please read System Requirements (p. 25) in advance.

# System Requirements

Please install the software on a computer meeting the following minimum requirements.

## Windows

| OS                          | Windows 2000 Service Pack 4
|-----------------------------|-------------------------------
|                             | Windows XP (including Service Pack 1 and Service Pack 2) |
|                             | Windows Vista                 |
| Computer Model              | The above OS should be pre-installed on computers with built-in USB ports. |
| CPU                         | Windows 2000/Windows XP       |
|                             | Pentium 500 MHz or higher    |
|                             | Windows Vista                 |
|                             | Pentium 1.3 GHz or higher    |
| RAM                         | Windows 2000/Windows XP       |
|                             | 256 MB or more                |
|                             | Windows Vista                 |
|                             | 512 MB or more                |
| Interface                   | USB                           |
| Free Hard Disk Space        | • Canon Utilities          |

Preparing to Download Images

Ensure that you install the software first before connecting the camera to the computer.

- Items to Prepare
  - Camera and computer
  - Canon Digital Camera Solution Disk supplied with the camera
  - Interface cable supplied with the camera

1. Install the software.

   (Windows)
   1. Place the Canon Digital Camera Solution Disk in the computer's CD-ROM drive.
   2. Click [Easy Installation].
      Follow the onscreen messages to proceed with the installation.

   3. When the installation is finished, the [Restart] or [Finish] button appears.
      Click the one that appears.

   4. Remove the CD-ROM from the drive when your normal desktop screen appears.

   (Macintosh)
   Double-click the in the CD-ROM window. When the installer panel appears, click [Install]. Follow the onscreen instructions to proceed.
2. Connecting the camera to a computer.

1. Connect the supplied interface cable to the computer's USB port and to the camera's DIGITAL terminal.
Lift up the left edge of the camera's DIGITAL terminal cover with a fingernail and plug the interface cable in all the way.

2. Turn the camera's mode dial to (playback) and turn on the power.
The camera and computer will be able to communicate.

Always grasp the sides of the connector when disconnecting the interface cable from the camera's DIGITAL terminal.

If the Digital Signature Not Found window appears, click [Yes]. The USB driver will automatically finish installing onto the computer when you attach the camera and open a connection.
Downloading Images to a Computer

A window allowing you to set the preferences will appear when a connection is established between the camera and computer.

1. Select [Canon CameraWindow] and click [OK] (first time only).

   If the window to the right does not appear, click the [Start] menu and select [All Programs] or [Programs], followed by [Canon Utilities], [CameraWindow], [PowerShot - IXY - IXUS - DV 6] and [CameraWindow].

2. Download the images.
   • Download the images using the camera or the computer.
   • By default, the downloaded images are saved into the [Pictures] or [My Pictures] folder.

   Thumbnails (small versions) of the downloaded images will display in the ZoomBrowser EX Main Window. By default, the downloaded images are saved into subfolders according to their shooting dates.
Downloading Images to a Computer

The following window will appear when you establish a connection between the camera and computer. If it fails to appear, click the [Canon CameraWindow] icon on the Dock (the bar which appears at the bottom of the desktop).

1. Download the images.
   • Download the images using the camera or the computer.
   • By default, the downloaded images are saved into the [Pictures] folder.

   Thumbnails (small versions) of the downloaded images will display in the ImageBrowser Browser Window. By default, the downloaded images are saved into folders according to their shooting dates.

   Downloading Images Using the Camera (p. 30).
   Downloading Images Using a Computer.
   By default, all images that have yet to be downloaded will download.

   You can set the type of image to download and the destination folder.

   Thumbnails (small versions) of the downloaded images will display in the ImageBrowser Browser Window. By default, the downloaded images are saved into folders according to their shooting dates.
Downloading Images Using the Camera (Direct Transfer)

Use this method to download images using camera operations. Install the supplied software and adjust the computer settings before using this method for the first time (p. 26).

1. Confirm that the Direct Transfer menu is displayed on the camera’s LCD monitor.
   - The button will light blue.
   - Press the MENU button if the Direct Transfer menu fails to appear.

2. Select , , or and press the button.
   - The images will download. The button will blink blue while downloading is in progress. The display will return to the Direct Transfer menu when the download is complete.
   - To cancel the download, press the FUNC./SET button.

Select & Transfer/Wallpaper

2. Select [ or ] and press the \( \Rightarrow \) button (or the FUNC./SET button).

3. Select images to download and press the \( \Rightarrow \) button (or the FUNC./SET button).
   - The images will download. The \( \Rightarrow \) button will blink blue while downloading is in progress.
   - Images can also be selected during index playback (Advanced Guide p. 81).
   - Press the MENU button to return to the Direct Transfer menu.

Only JPEG images can be downloaded as wallpaper for a computer. On the Windows platform, the files are automatically created as BMP images.

The option selected with the \( \Rightarrow \) button is retained even when the camera's power is turned off. The previous setting will be in effect the next time the Direct Transfer menu is displayed. The image selection screen will appear directly when the [Select & Transfer] or the [Wallpaper] option was last selected.
Safety Precautions

Be sure to read, understand and follow the safety precautions below when using the camera, in order to prevent injury, burns or electrical shock to yourself and others.

Be sure to also read the safety precautions listed in the Advanced Camera User Guide.

⚠️ Warnings

• Do not trigger the flash in close proximity to human or animal eyes.
• Store this equipment out of the reach of children and infants.
• Avoid dropping or subjecting the camera to severe impacts. Do not touch the flash portion of the camera if it has been damaged.
• Stop operating the equipment immediately if it emits smoke or noxious fumes.
• Do not handle the power cord if your hands are wet.
• Use only recommended batteries and accessories.
• The battery charger and compact power adapter are designed for exclusive use with your camera. Do not use it with other products or batteries.

⚠️ Caution

• Do not sit with the camera in a back pocket as it may cause the camera to malfunction or damage the LCD monitor.
