How to Use the Manual

This explains things that you need to know in order to use this manual.

▶ **Notations Used in the Manual(P. 4)**

Notations Used in the Manual

This explains symbols and settings used in this manual.

Symbols Used in This Manual

In this manual, explanations of items and operations that must be followed while using the driver are set forth the symbols that indicate the following.

IMPORTANT

- Indicates operational requirements and restrictions. Be sure to read these items carefully to operate the product correctly, and avoid damage to the product.

NOTE

- Indicates a clarification of an operation, or contains additional explanations for a procedure. Reading these notes is highly recommended.

About Settings

In this manual, setting names displayed on the computer screen are represented as shown in the following examples.

Example:

[Print]

[OK]

About This Driver

About This Driver 9

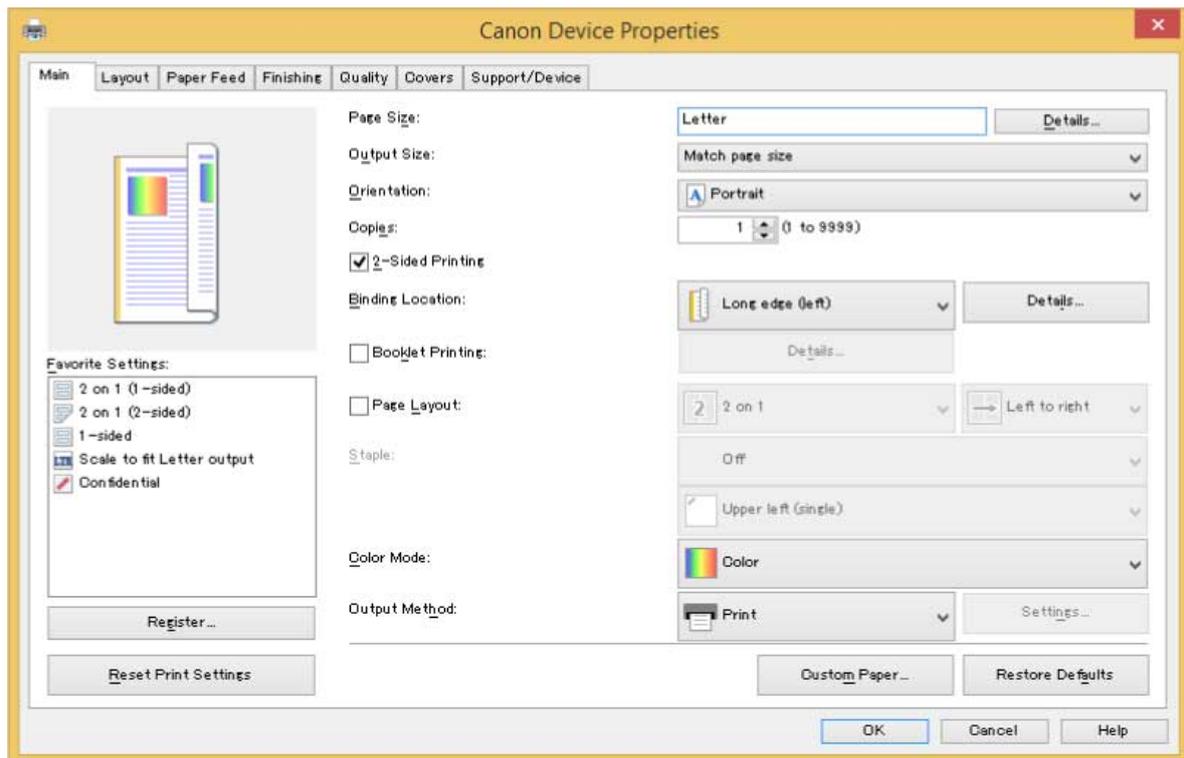

About This Driver

This driver enables you to display the print settings screen of drivers that support Windows Store apps and desktop apps, and use the print functions of Canon devices.

In this manual, Windows Store apps and Windows apps are referred to as store apps.

Printing from a Desktop App

The following print settings screen is displayed when you print from desktop apps.

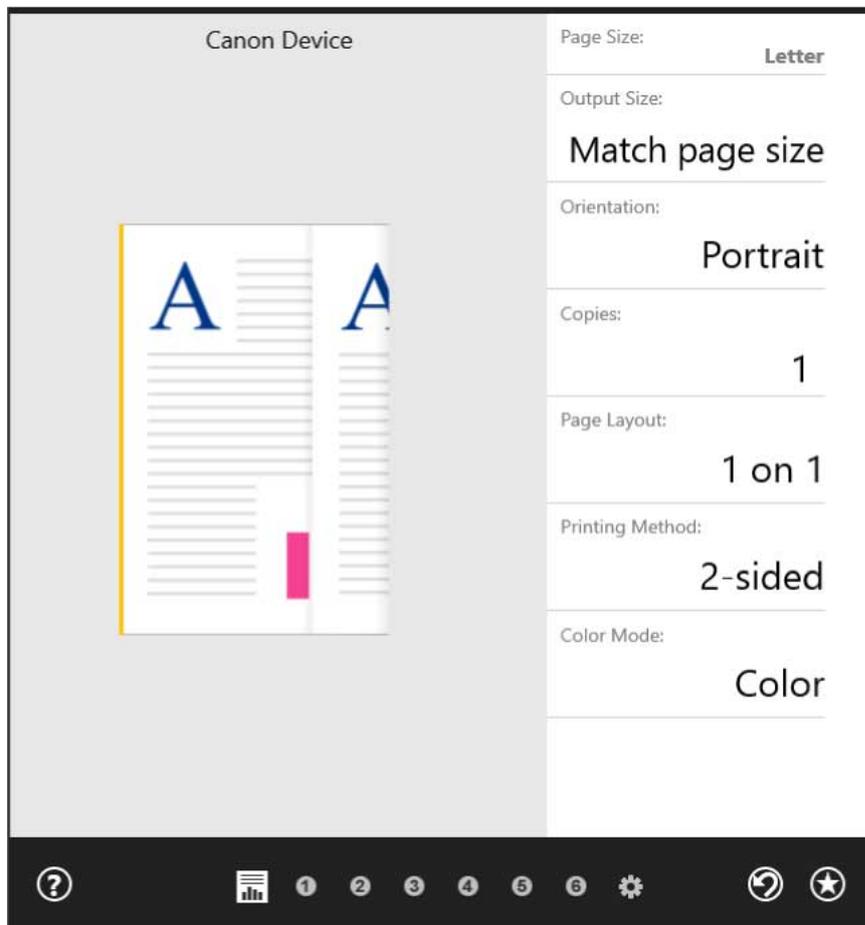

NOTE

- For details about print settings from desktop apps, refer to the user's guide for the V4 printer driver.

Printing from a Store App

The following print settings screen is displayed when you print from store apps.

**NOTE**

- The functions required to print from store apps are automatically installed from the Windows Store after the driver is installed. The print settings screen can be displayed by clicking [More settings] from the print screen of a store app.
- For details about the print settings from store apps, refer to "Canon Office Printer Utility Help."

Before Use

Before Use 12

Before Use

- The newest driver software is posted on the Canon web site. Please verify the operating environment etc. and download the appropriate software as required.
Canon Global Site: <http://www.canon.com/>
- The functions that you can use may vary according to the following conditions.
 - The device you are using and its settings
 - The firmware version of the device
 - The option structure
 - The driver version
 - The computer environment you are using
- The screen content, procedures, etc. displayed and described in the manual may differ from those actually displayed.
- In this manual, examples using Windows 8.1 (64-bit version) are explained.

Pre-installation Check

Pre-installation Check	14
System Requirements	15
Notes and Warnings Regarding Installation	16
About the Readme File	17

Pre-installation Check

This explains what to confirm beforehand in order to install the driver correctly.

- ▶ **System Requirements(P. 15)**
- ▶ **Notes and Warnings Regarding Installation(P. 16)**
- ▶ **About the Readme File(P. 17)**

System Requirements

This driver can be used with the following systems and environments.

Operating Systems

- Windows 10
- Windows 8.1
- Windows Server 2016
- Windows Server 2012 R2

NOTE

- Windows 10, running on desktop computers only.

Hardware

- Any computer that is guaranteed to run the above operating systems

Notes and Warnings Regarding Installation

Take care of the following items when installing.

- If a screen requiring you to allow changes to the computer is displayed, allow the changes.
- If a Windows Security screen indicating that the publisher of the driver cannot be verified is displayed, allow installation.
- If the icon of the device is not displayed in [Devices and Printers] when installation is complete, there could be a problem with the screen or installation state. Refer to Troubleshooting to have the icon of the device displayed.

About the Readme File

Restrictions and precautions when installing drivers or using drivers are written in the Readme file.

The Readme file is stored under the following name in the folder of the downloaded driver.

Readme_en.hta

Also, if you are installing using the installer, you can refer to the screen for checking the CANON SOFTWARE LICENSE AGREEMENT.

Installing the Driver

Installing the Driver	19
Installing by Discovering Devices on a Network	20
Installing by Specifying a Port or IP Address	25
Installing by USB Connection	30
Installing by Specifying an inf File	33

Installing the Driver

Select the installation method suitable to the connection method and environment of the device you are using.

- ▶ **Installing by Discovering Devices on a Network(P. 20)**
- ▶ **Installing by Specifying a Port or IP Address(P. 25)**
- ▶ **Installing by USB Connection(P. 30)**
- ▶ **Installing by Specifying an inf File(P. 33)**

Installing by Discovering Devices on a Network

You can automatically search for a device in a network environment and install the driver.

You can search for devices on TCP/IP networks and network environments that use WSD.

NOTE

- For network environments other than the above, refer to the procedure for installing by specifying a port or IP address.
- If you do not know the network environment you are using, check with your network administrator.

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- **System Requirements(P. 15)**
- Enabling settings for both [Use WSD] and [Multicast Discovery Settings] at the device (for network environments that use WSD)
- Setting the page description language selection (plug and play) function of the device
Set [PDL Selection (Plug and Play)] at the device to match the driver you are using. For details about the setting method, refer to the manual of the device.
 - For "UFR II/UFRII LT/LIPSLX/CARPS2 V4 Printer Driver": [*** (V4)] (or [*** (XPS)])
*** represents the page description language corresponding to the device.
 - For "PCL6 V4 Printer Driver": [PCL6 (V4)] (or [PCL6])
- The device is one that is on the same subnet as the computer you are using (for TCP/IP network environments)
- **Notes and Warnings Regarding Installation(P. 16)**
- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedure

1 Double-click [Setup.exe].

2 If you want to change the language displayed by the installer, select [Language] → click [Next].

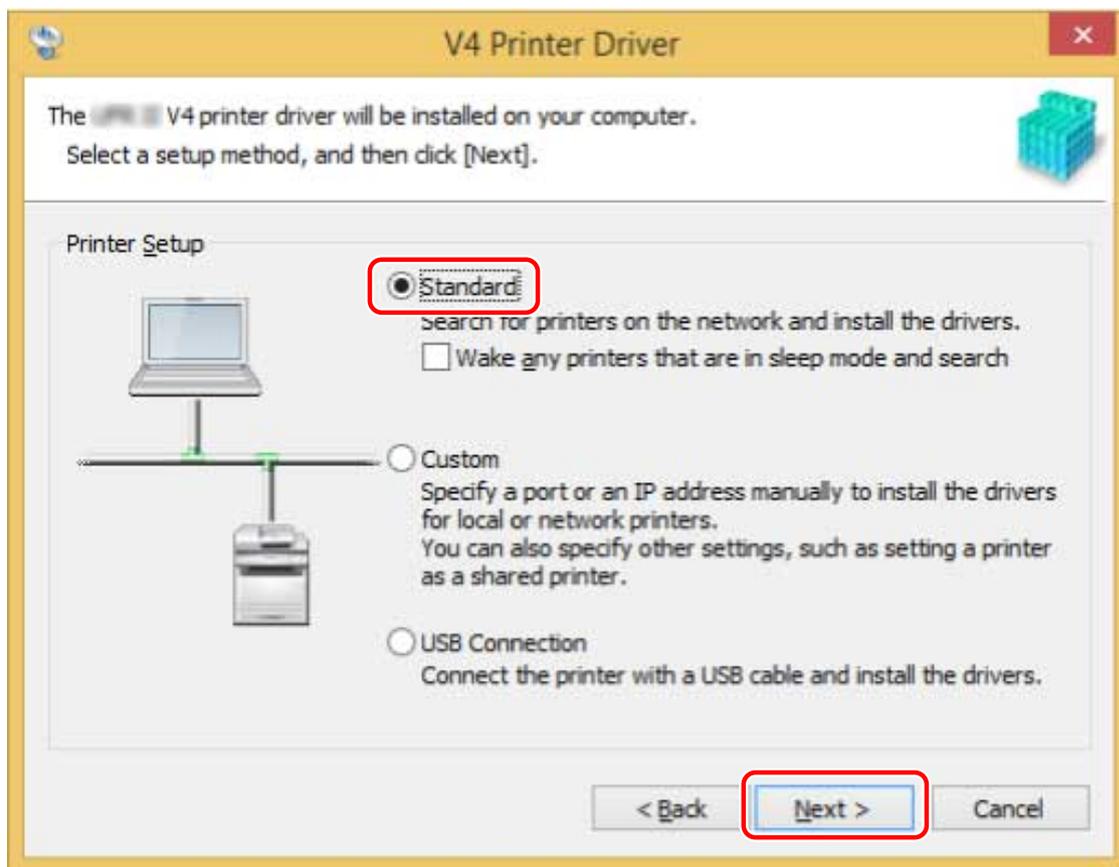

The driver will be installed according to the selected language.

3 Read the **CANON SOFTWARE LICENSE AGREEMENT** → click [Yes].

In the screen for checking the CANON SOFTWARE LICENSE AGREEMENT, if you click [Display Readme File], you can refer to the content of the Readme file.

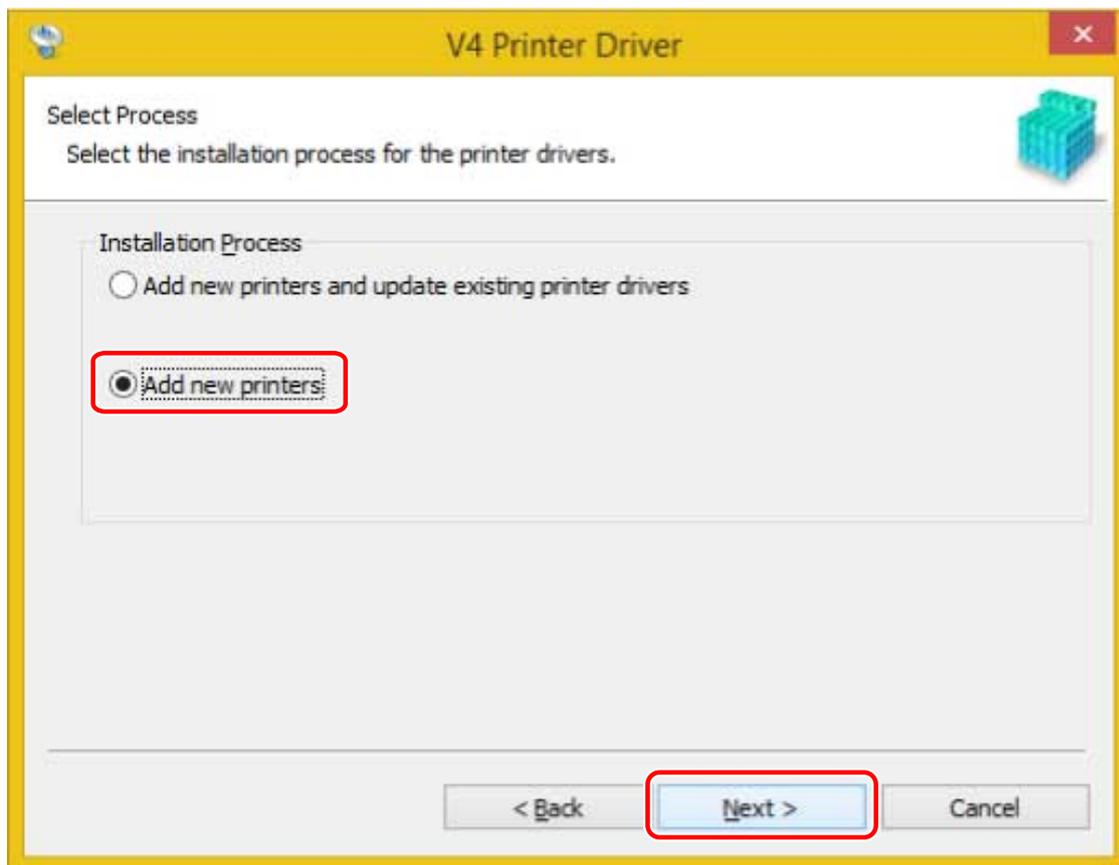

4 Select [Standard] → click [Next].

[Wake any printers that are in sleep mode and search]: Select this when you want to detect devices on the network that are in sleep mode.

5 If the following screen is displayed, select [Add new printers] → click [Next].

[Add new printers and update existing printer drivers]: Select this when you want to update already installed drivers at the same time that you add a new driver.

6 Select the device to install from [Printer List].

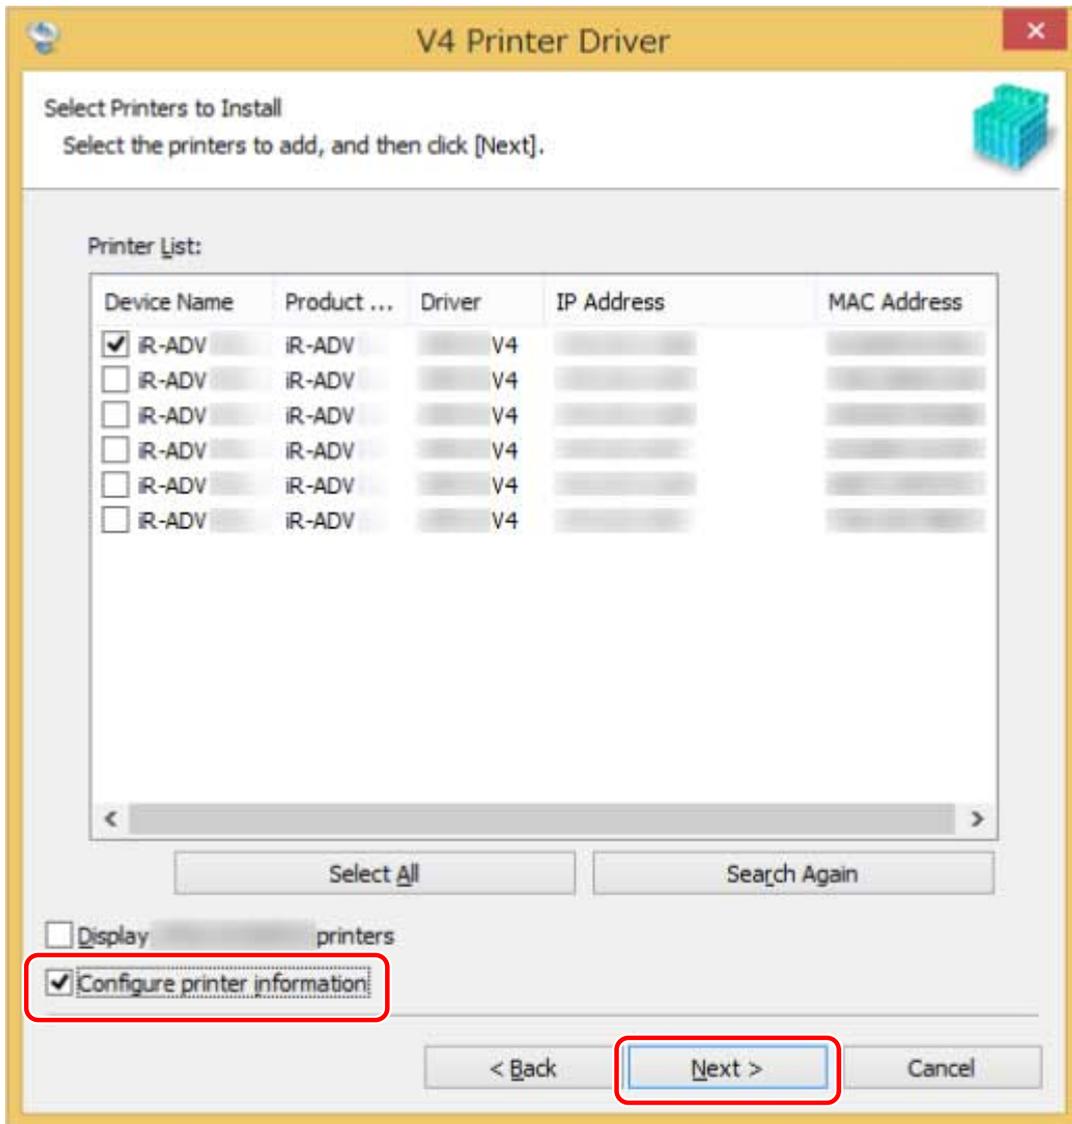

If the device is not displayed in [Printer List], click [Search Again]. If the device is still not displayed after re-searching, select [Custom] and install specifying a port or IP address.

NOTE

- If you cannot discover a device connected by a WSD port, there could be a problem with the operating system or device settings. Refer to Troubleshooting to enable the device to be displayed in the discovery results.

7 If you want to change the name of the device, or set it as the default device, select [Configure printer information] → click [Next].

If you do not want to change the name of the device or set it as the default device, click [Next] and proceed to step 9.(P. 24)

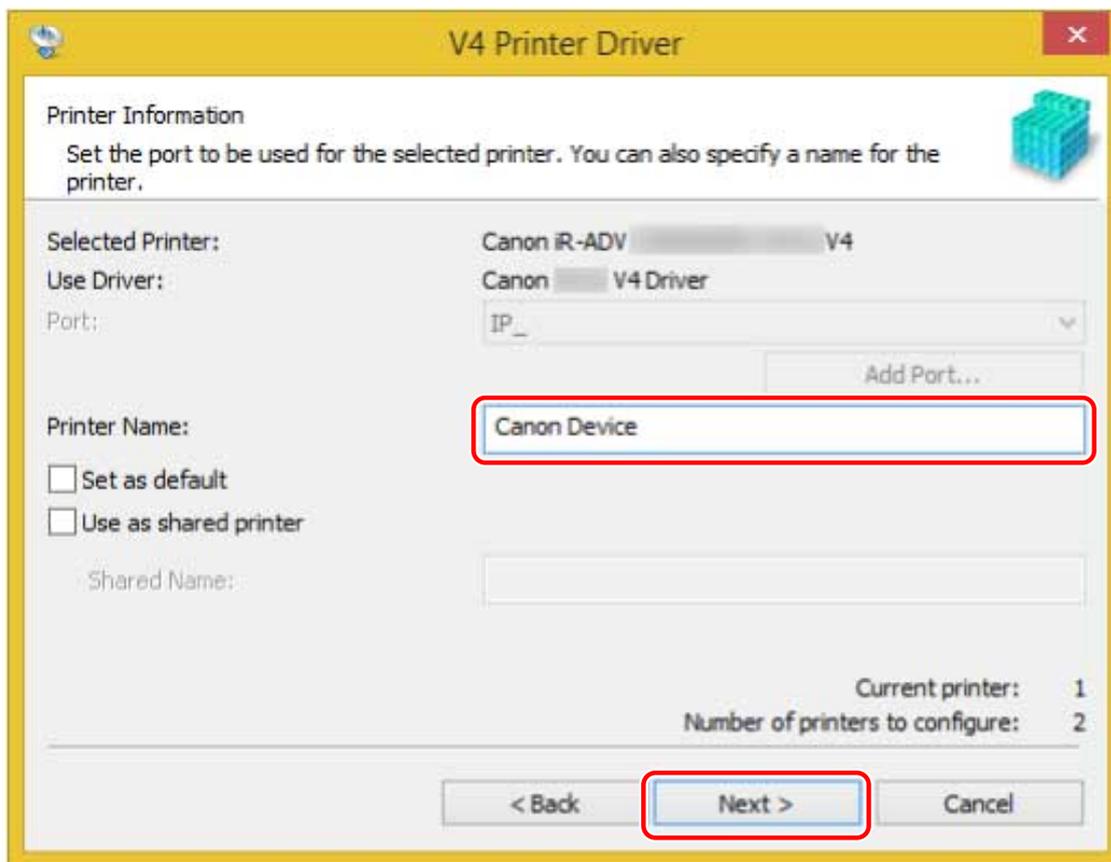

8 Change [Printer Name] → click [Next].

[Set as default]: Select this to set the device as the device that is normally used.

[Use as shared printer]: Select this if you want to share the device.

[Port]: Select the port you want to use if you can use multiple ports.

9 Check [List of Printers for Installation] → click [Start].

Proceed with the installation according to the instructions on the screen.

10 Click [Exit].

Related Topics

- ▶ Installing by Specifying a Port or IP Address(P. 25)
- ▶ Installing as a Print Server(P. 38)
- ▶ Cannot discover a device connected via a WSD port(P. 71)

Installing by Specifying a Port or IP Address

You can manually specify the port or IP address to use for network connected or locally connected devices and install the driver. Install according to this procedure when you cannot automatically discover a device on the network or when unique settings are required.

As well as using an existing port, you can add a port.

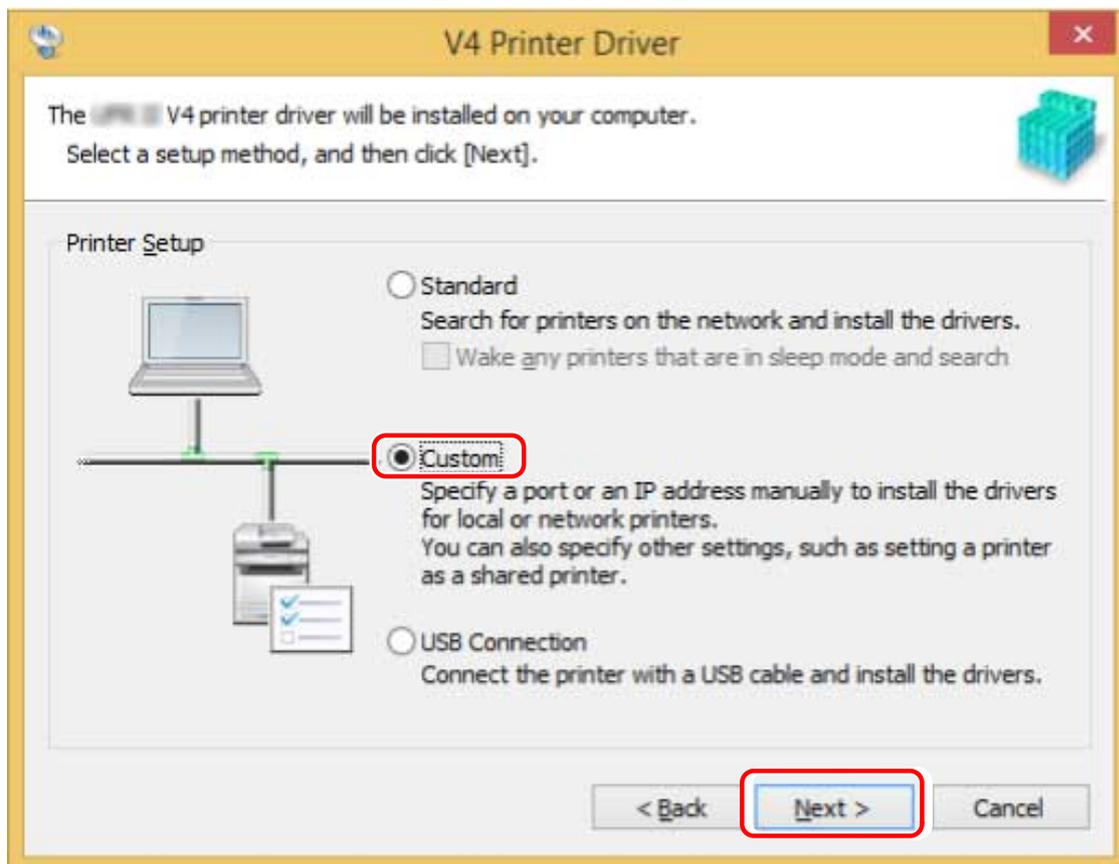

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- **System Requirements(P. 15)**
- **Notes and Warnings Regarding Installation(P. 16)**
- Confirm the port to be specified
Specify a WSD port, standard TCP/IP port, network printer port, or local port. You can specify an already registered port. You can select a temporary port ([LPT1] etc.) and set it after installation is complete.
- Confirm the host name, name, or IP address of the device (if adding a WSD port or a standard TCP/IP port).
If you are installing by adding a WSD port or a standard TCP/IP port, you need to enter the host name, name, or IP address of the device. For the host name or name of the device, use the name by which the device is known on the network. If you do not know the name or value to be specified, check with your network administrator.
- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedure

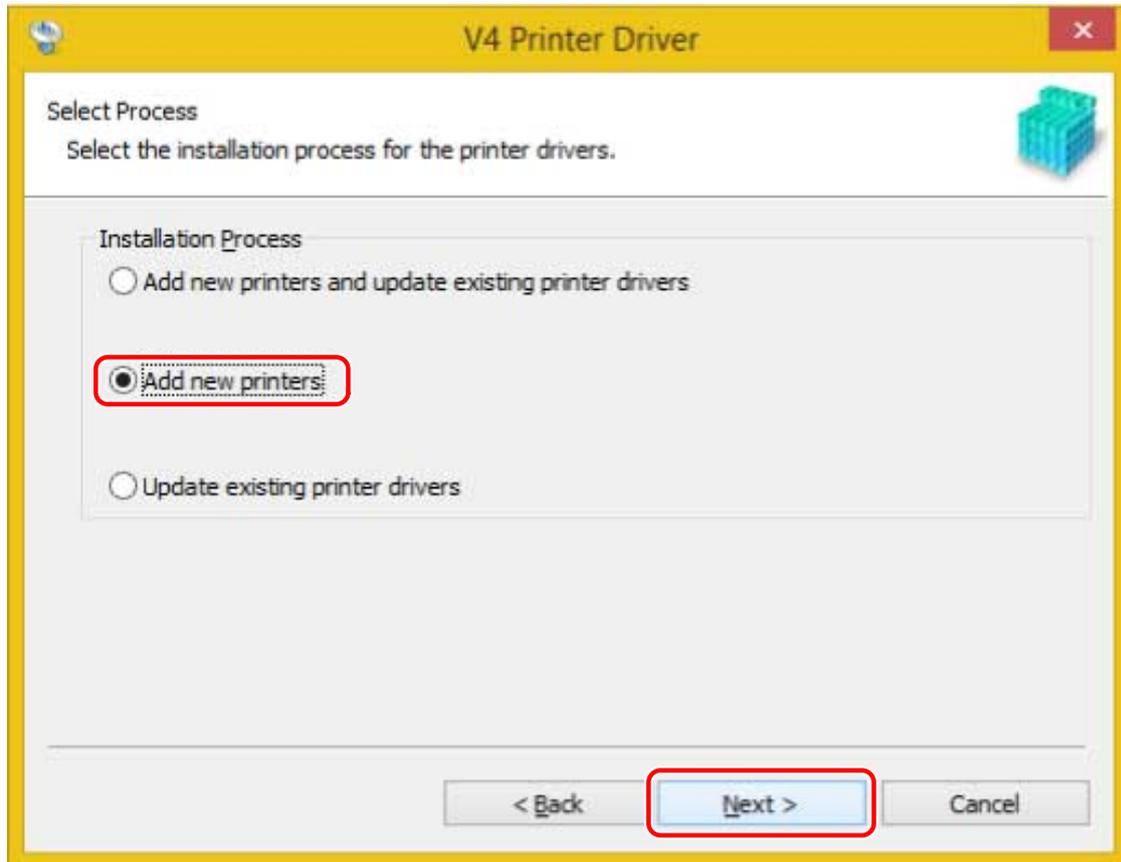

- 1 Double-click [Setup.exe].**
- 2 If you want to change the language displayed by the installer, select [Language] → click [Next].**
The driver will be installed according to the selected language.
- 3 Read the CANON SOFTWARE LICENSE AGREEMENT → click [Yes].**
- 4 Select [Custom] → click [Next].**

5 If the following screen is displayed, select [Add new printers] → click [Next].

[Add new printers and update existing printer drivers]: Select this when you want to update already installed drivers at the same time that you add a new driver.

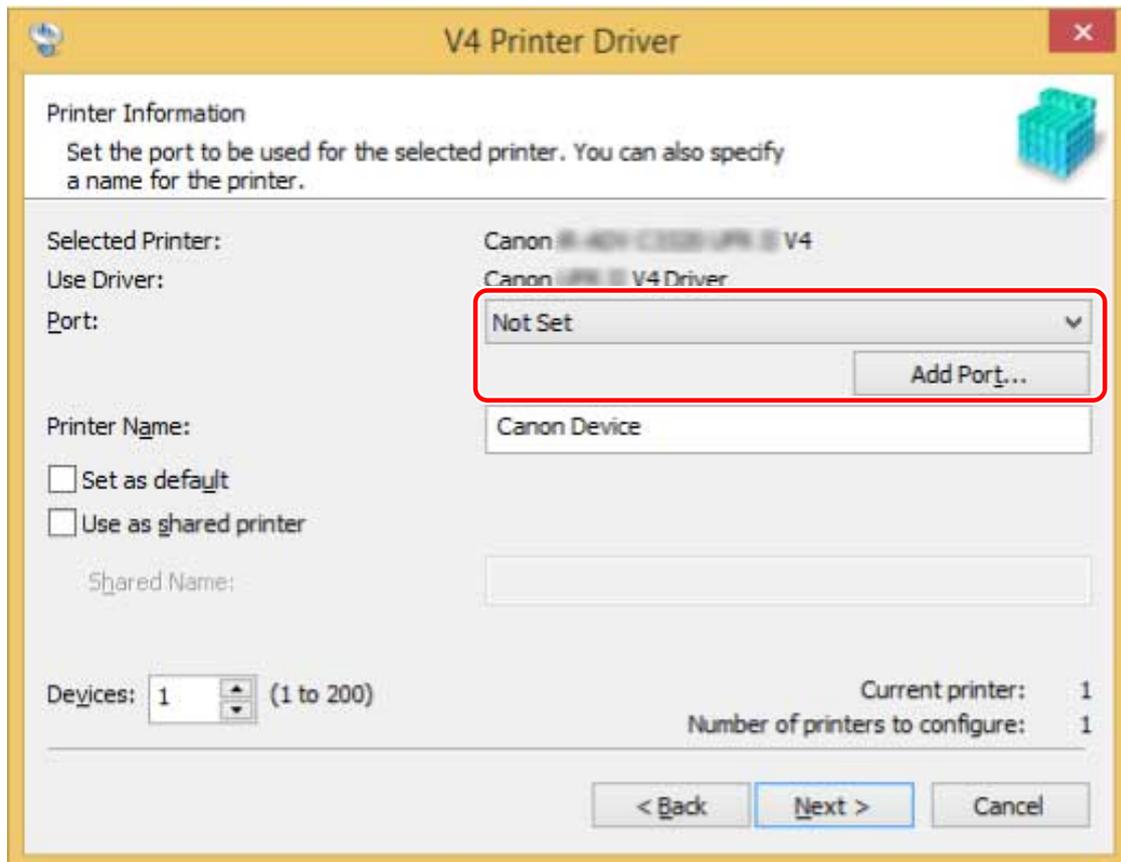

[Update existing printer drivers]: Select this if you want to update drivers only. For details, refer to the procedure for updating drivers.

6 Select the device to install from [Printer List] → click [Next].

7 Set the port.

If you selected multiple devices in step 6.(P. 27) , set a port in the following screen for each device.

When adding a WSD port

- (1) Click [Add Port] → select [WSD Port] from [Port to Add] → click [OK].
- (2) Enter the IP address or host name → click [OK].

When adding a standard TCP/IP port

- (1) Click [Add Port] → select [Standard TCP/IP Port] from [Port to Add] → click [OK].
- (2) Enter the device name or IP address according to the instructions of the wizard.

[Port Name] is automatically entered. Change the port name if required.

If the [Additional port information required] screen is displayed, click the subsequent "Open details" and perform the necessary operations.

Perform one of the following.

- Return to the previous screen in the wizard → re-enter the information for [Printer Name or IP Address] → click [Next].
- Select [Device Type] > [Standard] > [Canon Network Printing Device with P9100] → click [Next].

Depending on the device you are using, the name you select in [Device Type] > [Standard] may differ from [Canon Network Printing Device with P9100].

- (3) Click [Finish].

When adding a network printer port

- (1) Click [Add Port] → select [Network] from [Port to Add] → click [OK].
- (2) Select the network printer you are using → click [OK].

When adding a local port

- (1) Click [Add Port] → select [Local Port] from [Port to Add] → click [OK].
- (2) Enter the port name → click [OK].

When using an existing port

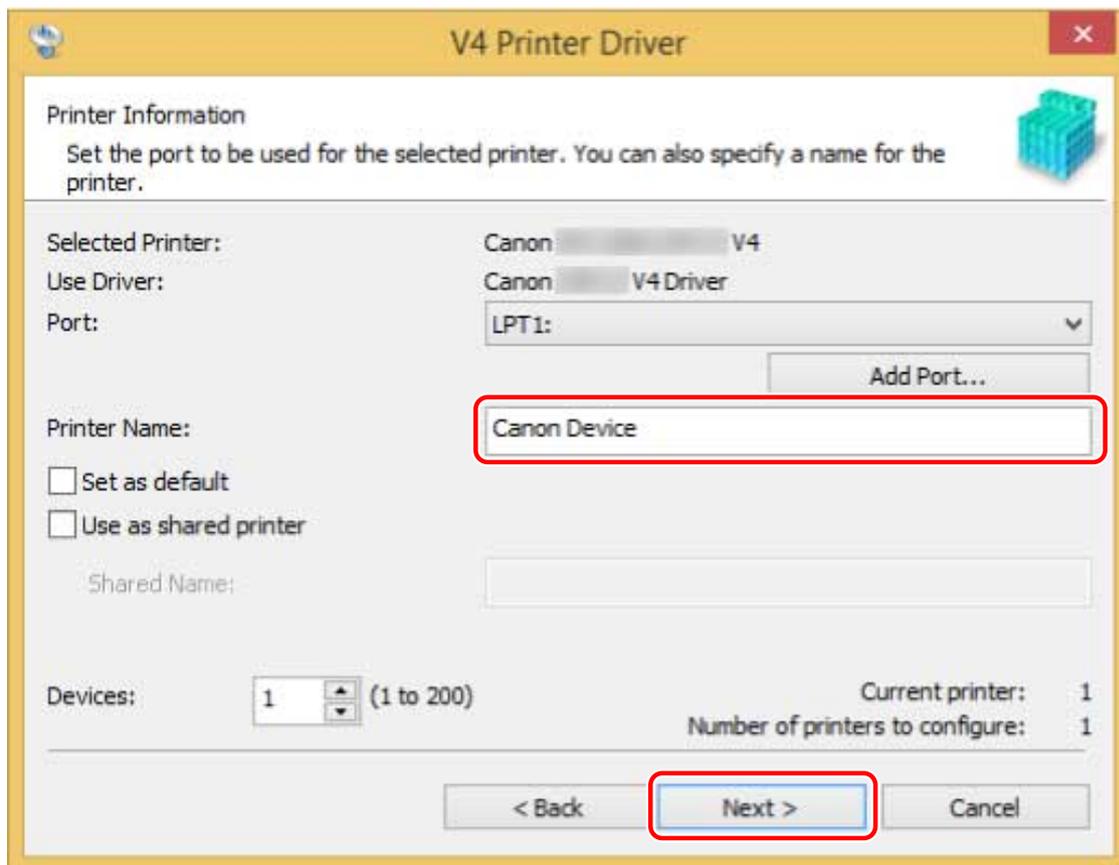

Select a port from [Port].

8 Select [Printer Name] if necessary → click [Next].

[Set as default]: Select this to set the device as the device that is normally used.

[Use as shared printer]: Select this if you want to share the device.

If you added or selected a network printer port, you cannot set [Printer Name] and [Use as shared printer].

9 Check [List of Printers for Installation] → click [Start].

Proceed with the installation according to the instructions on the screen.

10 Click [Exit].

Installing by USB Connection

You can connect the device and computer with a USB cable and install the driver.

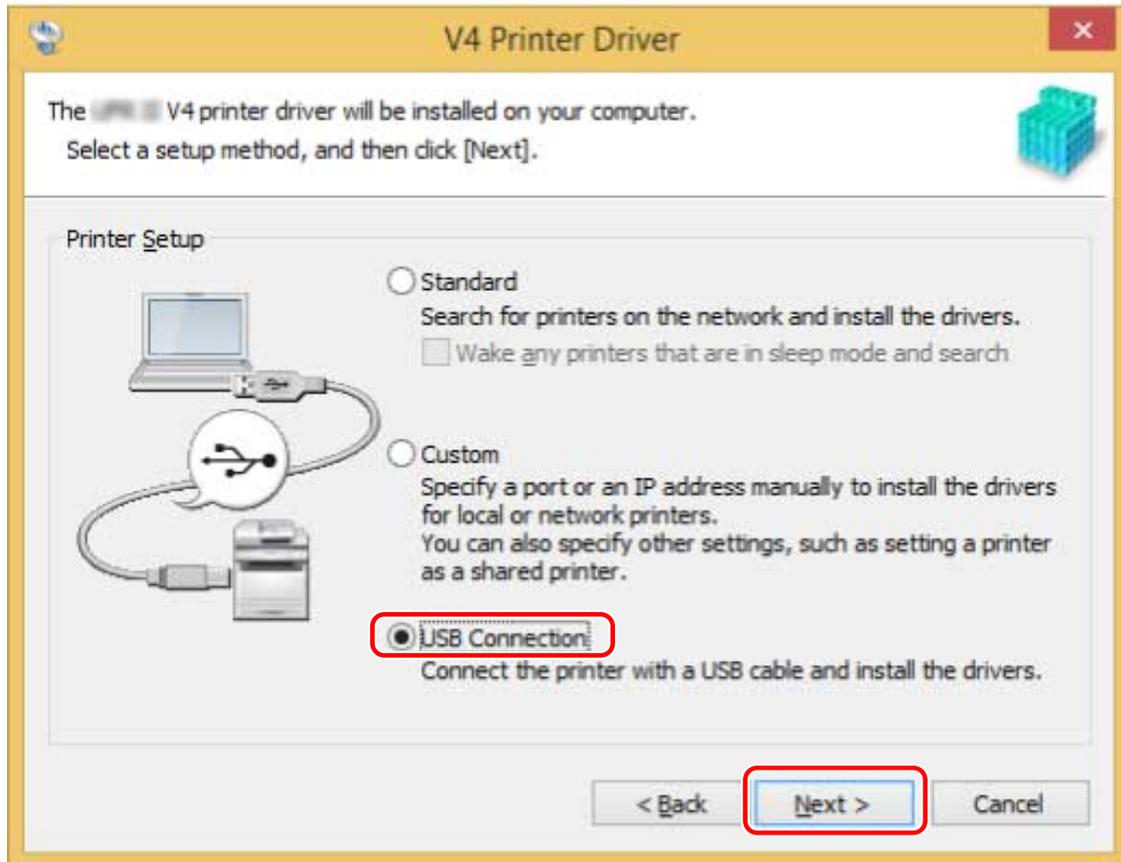

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- **System Requirements(P. 15)**
- Installation of the optional USB interface board (if required with the device you are using)
- Page description language selection (plug & play) function setting of the device (if required with the device you are using)
Set [PDL Selection (Plug and Play)] at the device to match the driver you are using. For details about the setting method, refer to the manual of the device.
 - For "UFR II/UFRII LT/LIPSLX/CARPS2 V4 Printer Driver": [*** (V4)] (or [*** (XPS)])
*** represents the page description language corresponding to the device.
 - For "PCL6 V4 Printer Driver": [PCL6 (V4)] (or [PCL6])
- **Notes and Warnings Regarding Installation(P. 16)**
- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

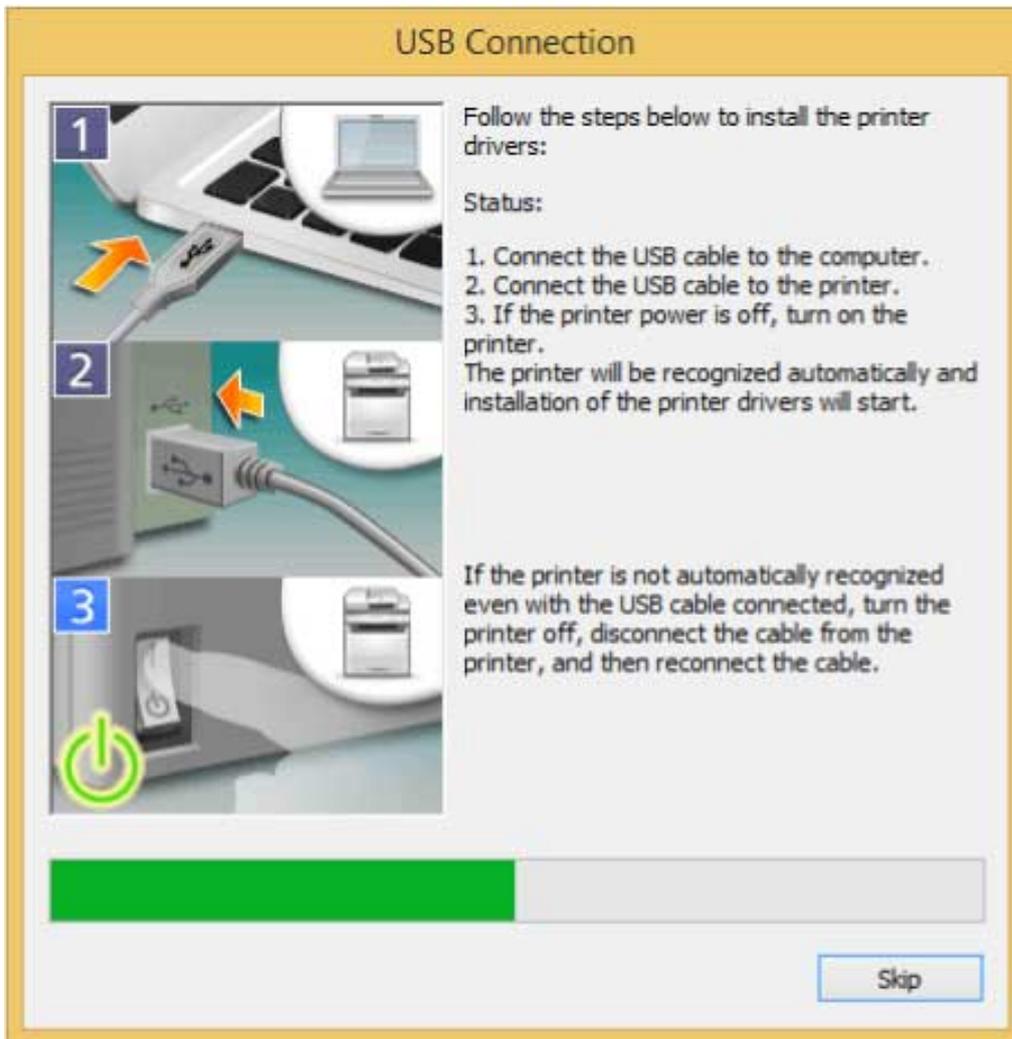

Procedure

- 1 Turn off the device.**
- 2 Double-click [Setup.exe].**
- 3 If you want to change the language displayed by the installer, select [Language] → click [Next].**
The driver will be installed according to the selected language.
- 4 Read the CANON SOFTWARE LICENSE AGREEMENT → click [Yes].**
- 5 Select [USB Connection] → click [Next].**

6 When the following screen appears, connect the device and computer with a USB cable
→ turn on the device.

[Skip]: If correctly connected by USB, in this screen you can finish the installation without waiting for automatic completion.

Proceed with the installation according to the instructions on the screen.

If installation fails in the above screen, click the subsequent "Open details" and perform the necessary operations.

Reinstall the driver after performing the following procedure.

(1) Connect the device and computer with a USB cable → turn on the device.

(2) Display [Device Manager].

In Windows 10/Server 2016

Right-click [] → click [Device Manager].

In Windows 8.1/Server 2012 R2

Display [Control Panel] > [Hardware and Sound] > [Device Manager].

(3) Right-click the device name of the target device from [Other devices] → click [Uninstall].

(4) Confirm the device name.

Canon + <model name being used>

7 Click [Exit].

Installing by Specifying an inf File

This explains the procedure for installing a driver by specifying an inf file with the add printer function of Windows. The explanation will be given with respect to installation with a standard TCP/IP port.

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- **System Requirements(P. 15)**
- Confirm the IP address of the device.
- **Notes and Warnings Regarding Installation(P. 16)**
- When starting the computer, log on as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedure

1 Start the Windows add printer wizard.

If starting from [Settings] (Windows 10/Server 2016 only)

- (1) Click [Devices] → click [Add a printer or scanner] from [Printers & scanners].
- (2) Click [The printer that I want isn't listed].

If starting from [Control Panel]

- (1) Display [Devices and Printers] → click [Add a printer].
- (2) When the screen for selecting a device is displayed, click [The printer that I want isn't listed].

2 Select local printer addition and proceed to the next screen.

3 Select [Create a new port] → select [Standard TCP/IP Port] from [Type of port] → click [Next].

4 Enter the IP address of the device in [Hostname or IP address] → proceed according to the instructions on the screen.

If the device cannot be found, it may be recognized as an unknown device. If so, click the subsequent "Open details."

- (1) Display [Device Manager] in Windows.

In Windows 10/Server 2016: Right-click [] → click [Device Manager].

In Windows 8.1/Server 2012 R2: Click [Control Panel] > [Device Manager].

- (2) Select [Other devices] > [Unknown device] → click the [Action] menu > [Update Driver Software].
- (3) In the driver software update wizard, click [Browse my computer for driver software] > [Let me pick from a list of device drivers on my computer].
- (4) Select [Printers] from [Common hardware types] → click [Next].

- 5** In the [Add Printer] screen, click [Have Disk].
- 6** Click [Browse] → select the inf file in the downloaded driver folder.
- 7** Select the device to use from [Printers] → click [Next].
- 8** Install the driver according to the instructions on the screen → click [Finish].

Installing as a Print Server

This explains how to configure the share settings of and install the driver in order to use a computer connected to the device as a print server.

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedure

1 Start the installer → proceed according to the instructions on the screen.

2 Select [Standard] or [Custom] for [Printer Setup] → click [Next].

If you have a network connection that does not use the TCP/IP protocol, select [Custom].

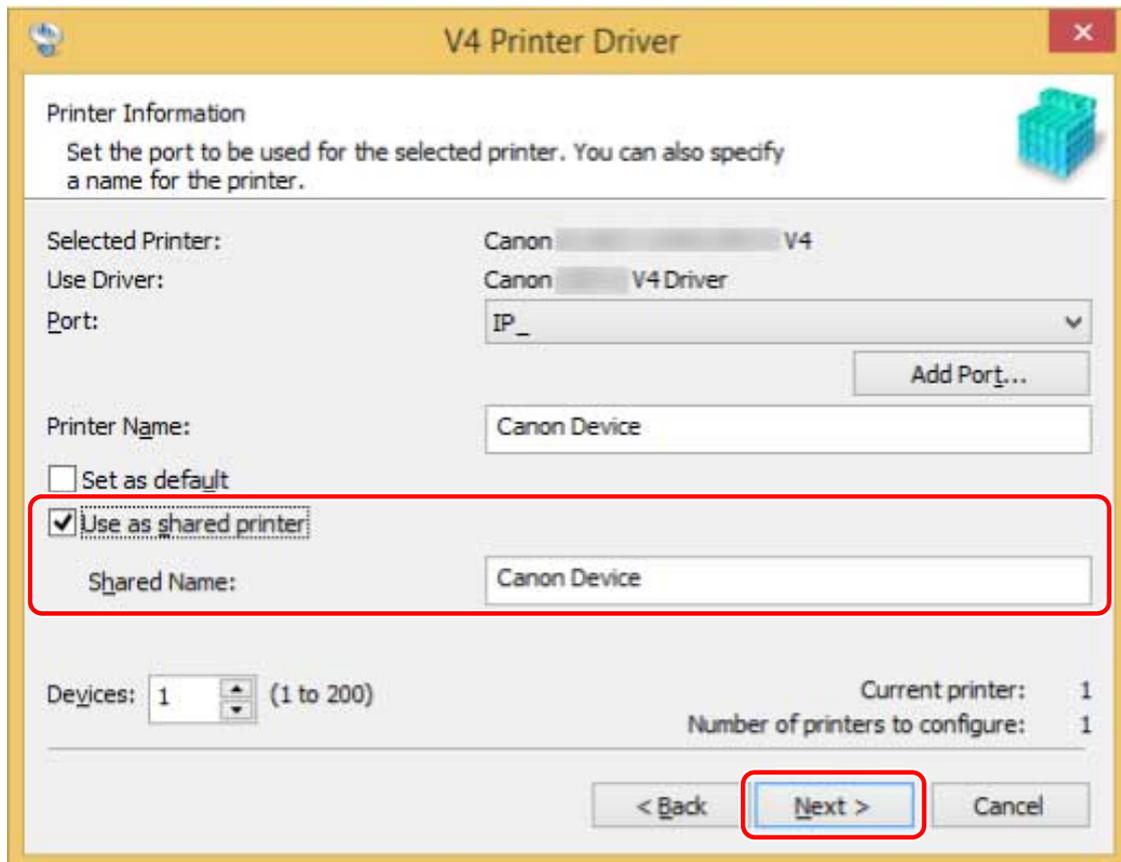

3 If the [Select Process] screen is displayed, select [Add new printers] → click [Next].

4 Select the device to install from [Printer List] → click [Next].

If you select [Standard] and configure shared settings, select [Configure printer information], then click [Next].

5 Select [Use as shared printer] → change [Shared Name] if necessary → click [Next].

If you select [Custom] and configure shared settings, set the port in [Port], then click [Next].

6 Follow the instructions on the screen → click [Exit].

Related Topics

- ▶ Installing by Discovering Devices on a Network(P. 20)
- ▶ Installing by Specifying a Port or IP Address(P. 25)
- ▶ Setting up Clients of a Shared Printer(P. 40)

Setting up Clients of a Shared Printer

This explains the procedure for enabling printing from a client computer (hereafter referred to as "a client") using a print server being shared on the same network.

In environments where Windows Update can be used, it is not necessary to use the installer in order for the newest driver to be installed when selecting a print server.

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- Configure the share settings of the print server driver
 - If the types of operating systems on the print server and clients differ, install the drivers for operating systems supported by the clients on the print server.
- When starting the computer, logon as a member of Administrators.

NOTE

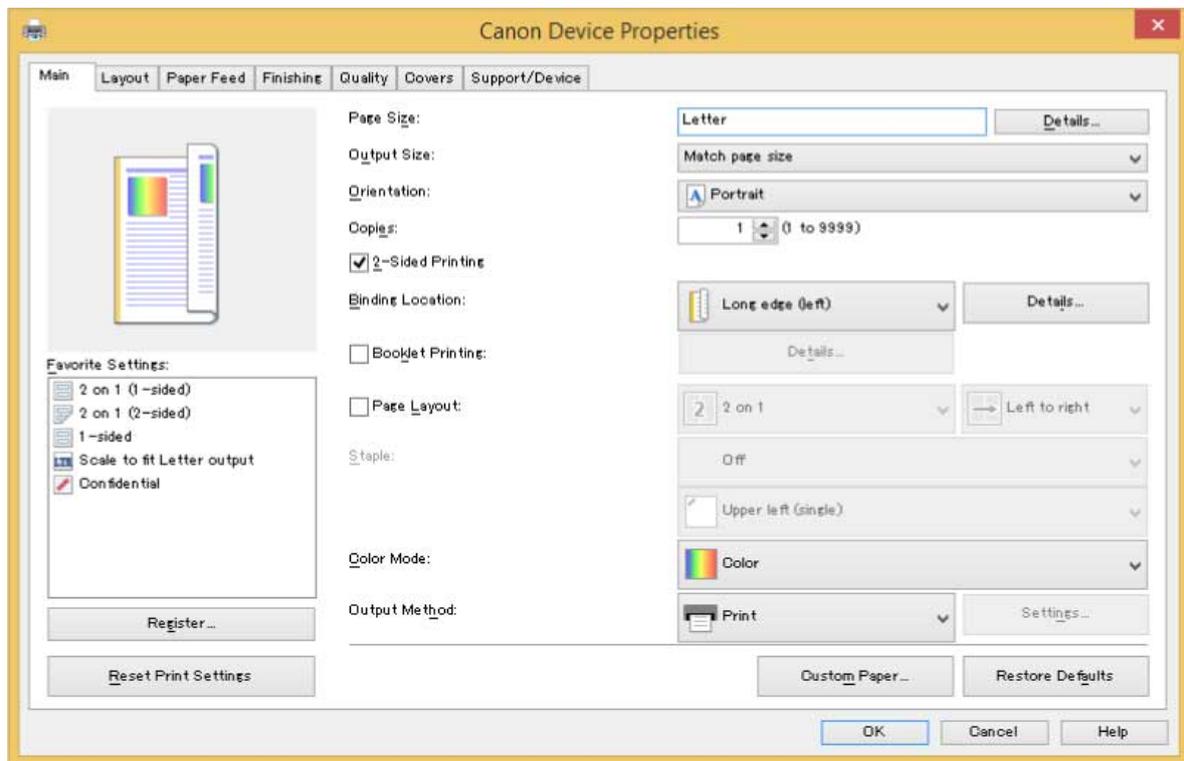

- If you are configuring the settings of a client in a workgroup environment, the user name and password for logging onto the client must match the user name and password registered in the server.

Procedure

- 1 Display [Network] in Windows Explorer.**
- 2 Double-click the computer (print server) you have set for print sharing.**
- 3 Double-click the icon of the device for installation.**
- 4 Check that the print settings screen of the driver is displayed at the client.**

You can display the print settings screen of the driver by the following procedure.

- (1) Display [Devices and Printers] in Windows.
- (2) Right-click the icon of the device you are going to set → select [Printing preferences].

If the above screen is displayed, the operation is finished.

If the standard Windows print settings screen is displayed, perform the following procedure.

- 5 Start the installer → proceed according to the instructions on the screen.**
- 6 Select [Custom] for [Printer Setup] → click [Next].**
- 7 In the [Select Process] screen, select [Update existing printer drivers] → click [Next].**
- 8 Check [List of Printers for Installation] → click [Start].**
- 9 Click [Exit].**
- 10 Restart the computer after installation is complete.**

 **NOTE**

- The driver settings of the server may not be reflected in the clients. If this happens, the driver version of the clients may be older than that of the print server. Make sure that the drivers in the clients are always the newest and match that of the print server.

Changing the Port

This explains the procedure for changing the port used by a device connected to a network.

If you temporarily set a port of the device when installing the driver, change it to a correct port by following this procedure.

Here, the method for creating a Raw or LPR port using "Standard TCP/IP Port" is explained.

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- Driver installation
- Confirm the name or IP address of the device (if adding a standard TCP/IP port).
To add a standard TCP/IP port, you need to enter the name or IP address of the device. For the name of the device, use the name by which the device is known on the network. If you do not know the device name or IP address, check with your network administrator.
- Determining to protocol to use
Raw: A protocol that can be used with Windows. It transmits data at a higher speed than LPR.
LPR: The protocol commonly used by TCP/IP.
- When starting the computer, logon as a member of Administrators.

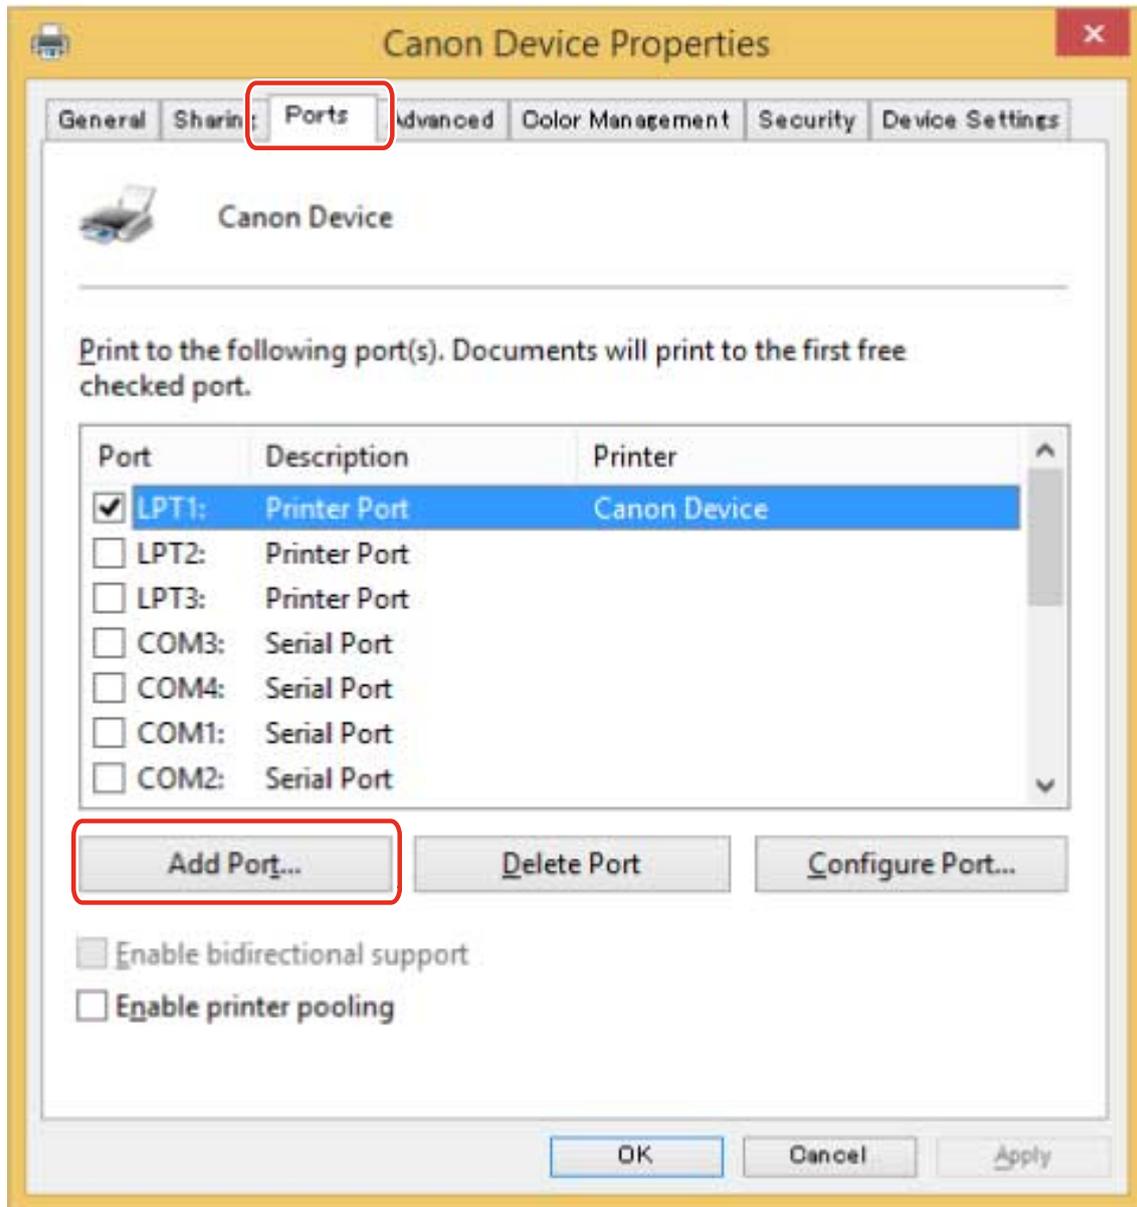

Procedure

1 Display [Devices and Printers] from the [Control Panel] of Windows.

2 Right-click the icon of the device you are going to set → select [Printer properties].

If you are using a touch panel, press and hold the icon of the device you want to set → tap [Printer properties] in the pop-up menu.

3 Display the [Ports] sheet → click [Add Port].

4 In the [Printer Ports] dialog box, select [Standard TCP/IP Port] from [Available port types] → click [New Port].

5 Proceed with the operation according to the instructions on the wizard, then enter the device name or IP address.

[Port Name] is automatically entered. Change the port name if required.

If the [Additional port information required] screen is displayed, click the subsequent "Open details" and perform the necessary operations.

Perform one of the following.

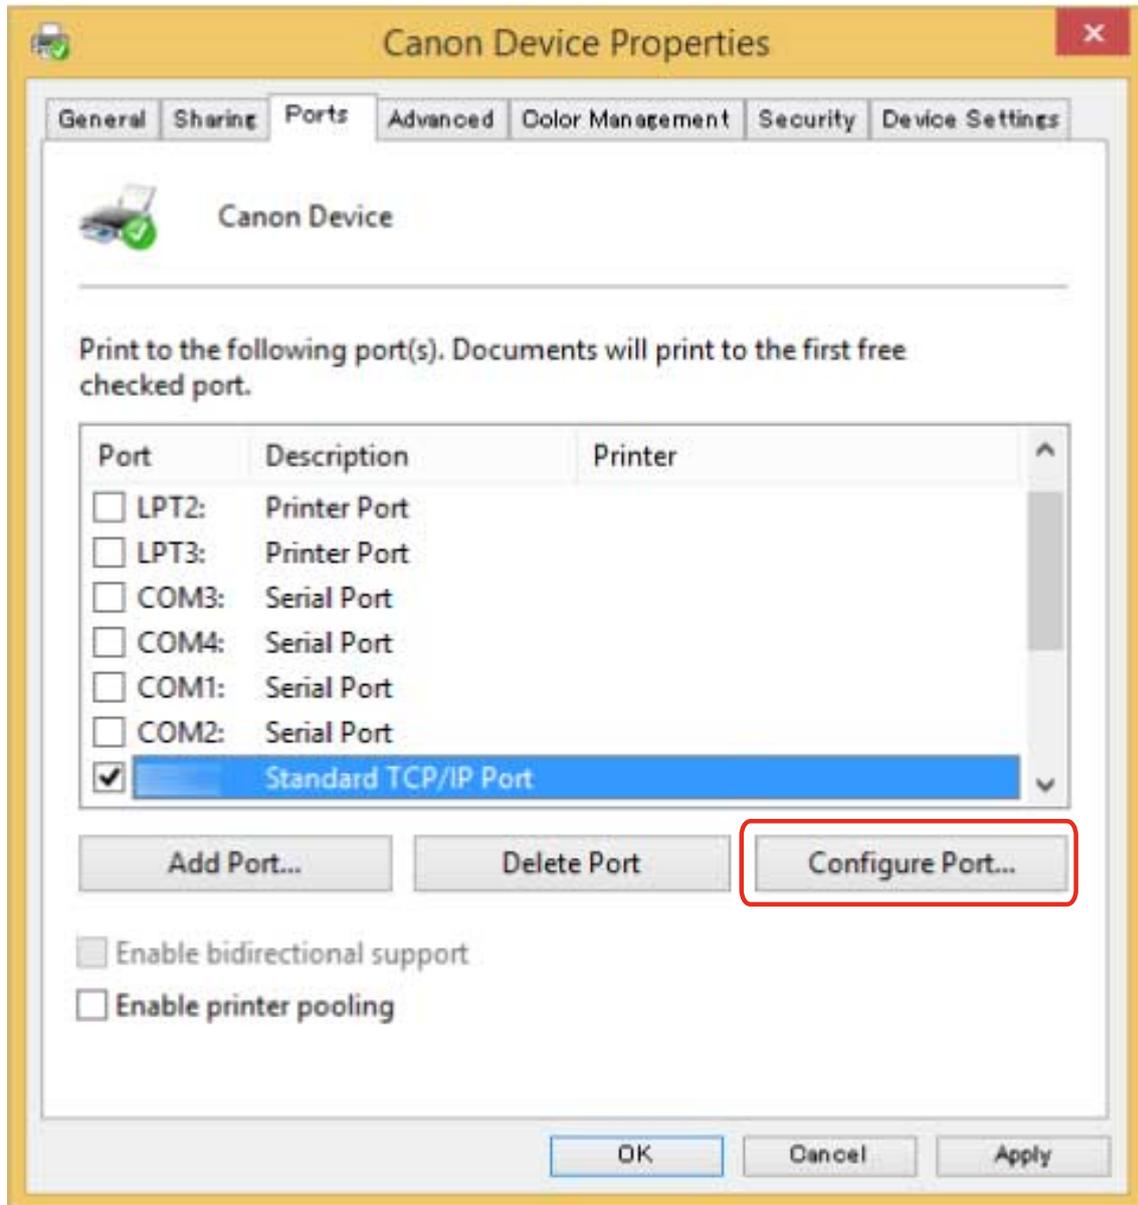

- Return to the previous screen in the wizard → re-enter the information for [Printer Name or IP Address] → click [Next].
- Select [Device Type] > [Standard] > [Canon Network Printing Device with P9100] → click [Next].

Depending on the device you are using, the name you select in [Device Type] > [Standard] may differ from [Canon Network Printing Device with P9100].

6 Click [Finish].

7 In the [Printer Ports] dialog box, click [Close].

8 Click [Configure Port].

9 Set the port.

When using Raw

Select [Protocol] > [Raw] → click [OK].

When using LPR

(1) Select [Protocol] > [LPR] → specify one of the following print queues for [LPR Settings] > [Queue Name].

LP: Outputs according to the spool setting of the device. This is the setting that is normally used.

SPOOL: Always outputs after spooling to the hard disk, regardless of the device settings.

DIRECT: Always outputs without spooling to the hard disk, regardless of the device settings.

(2) Click [OK].

Making the Device Functions Usable

When installing a driver with a network connection, normally, information about options installed in the device is retrieved and functions associated with the driver are set so that they can be used. When the functions of the device cannot be used, or when an option is added, the device information must be reacquired and the option structure manually set.

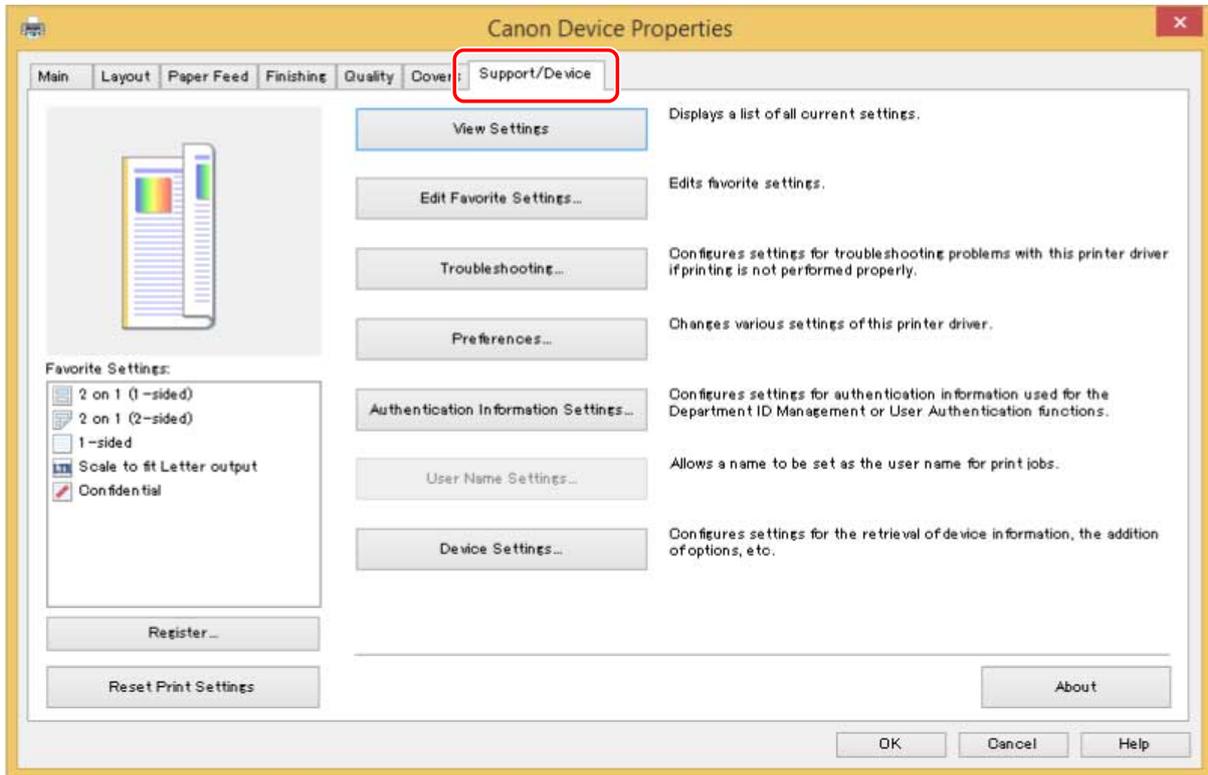

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- Settings at the device
Enable [Use WSD Browsing] at the device. If you are using a device that does not support this function, enable [Retrieve Printer Mngt. Information from Host].
For details, refer to the manual of the device.
- When starting the computer, log on as a member of Administrators.

Procedure

- 1 Display [Devices and Printers] from the [Control Panel] of Windows.**
- 2 Right-click the icon of the device you are going to set → select [Printing preferences].**
If you are using a touch panel, press and hold the icon of the device you want to set → tap [Printing preferences] in the pop-up menu.
- 3 Display the [Support/Device] sheet.**

 **NOTE**

- If the Windows standard print settings screen, which does not have a [Support/Device] sheet, is displayed, there could be a problem with the environment, settings, or installation state of the driver. Refer to Troubleshooting to enable the print settings screen of the driver to be displayed.

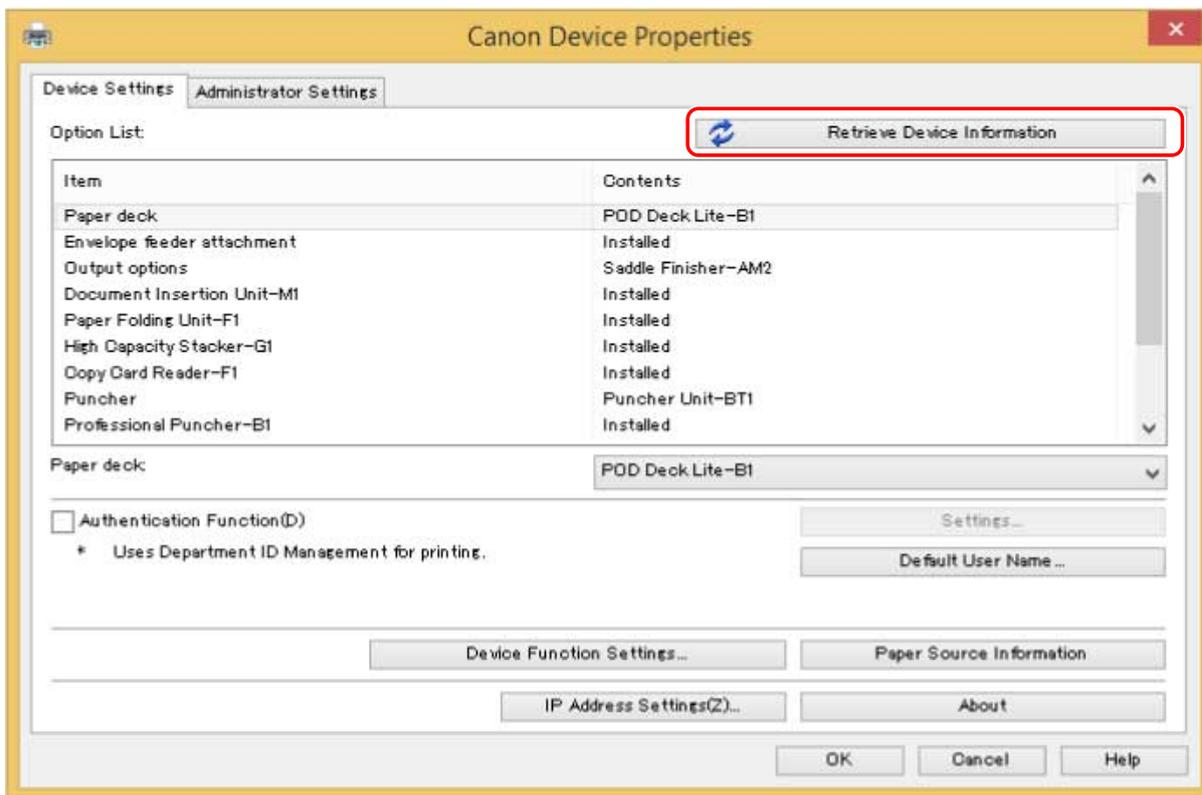

4 Click [Device Settings].

When you click [Device Settings], after a confirmation screen asking whether you want to save the settings is displayed, the print settings screen closes.

5 Display the [Device Settings] sheet.

6 If necessary, set whether the IP address of the device is to be automatically detected or manually specified in [IP Address Settings] at the bottom of the screen.

7 Click [Retrieve Device Information].

8 When the message "Do you want to retrieve the device information?" is displayed, click [Yes].

If the information is retrieved, the option structure is set automatically. Check the settings.

If the information is not retrieved, set the options manually. Select the options attached to the device.

9 Click [OK].

 **NOTE**

- In any of the following cases, there is a possibility that you may not be able to get some of the device information. If that happens, set the options manually.
 - When using a USB connection
 - When you have specified a standard TCP/IP port
 - When you are using a device or port that cannot get device information

Updating/Uninstalling the Driver

Updating/Uninstalling the Driver	50
Updating the Driver	51
Uninstalling the Driver	53

Updating/Uninstalling the Driver

The procedures for updating the driver and uninstalling the driver are described below.

- ▶ **Updating the Driver(P. 51)**
- ▶ **Uninstalling the Driver(P. 53)**

Updating the Driver

You can update installed drivers to their newer versions.

It is recommended that you download the latest drivers corresponding to new functions and/or operating systems, and update them.

You can update already installed drivers at the same time as installing a driver for a new device, but here the procedure for updating installed drivers only is explained.

In environments where Windows Update can be used, it is not necessary to perform this procedure since the driver is automatically updated.

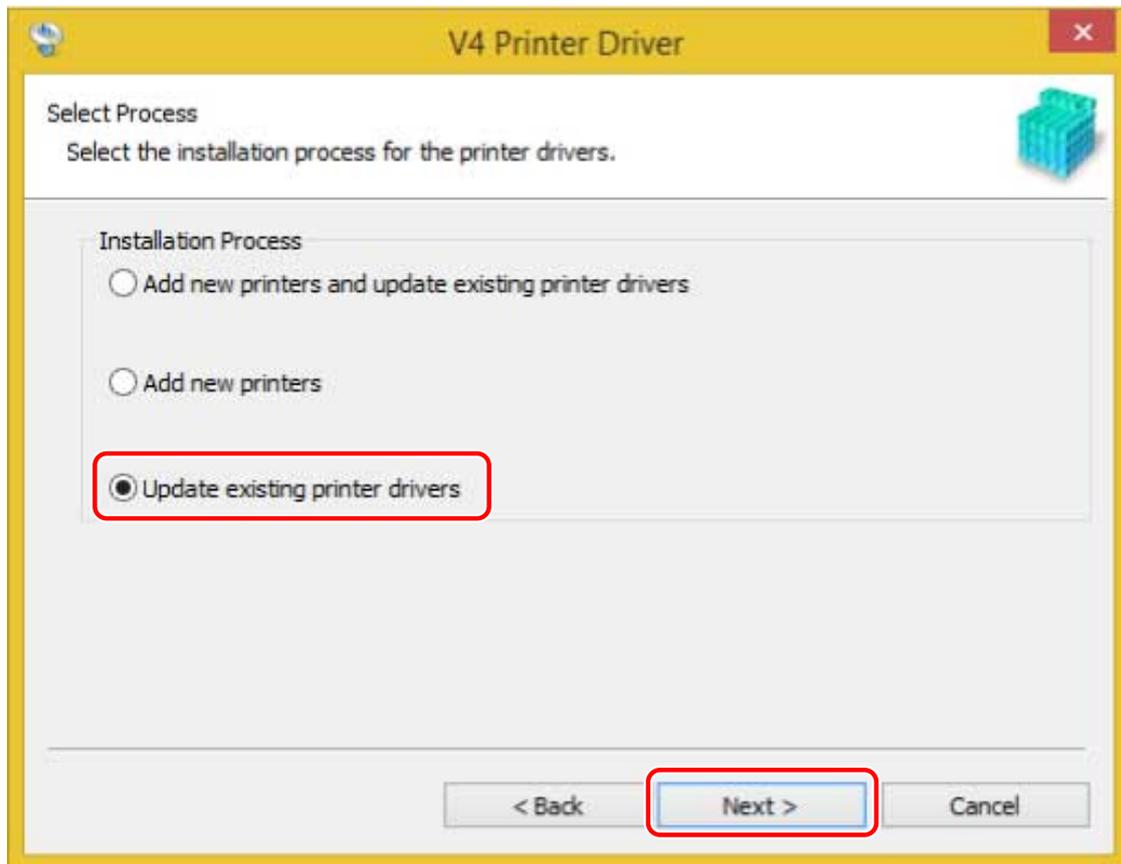

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- Acquire the installer
You can download the update installer from the Canon web site (<http://canon.com/>).
- Connect the device by USB cable and turn the power on (when updating a driver installed with a USB connection).
- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedure

- 1 Start the installer** → proceed according to the instructions on the screen.
- 2 Select [Custom] for [Printer Setup]** → click [Next].
- 3 Select [Update existing printer drivers]** → click [Next].

4 Check [List of Printers for Installation] → click [Start].

5 Click [Exit].

Restart your computer when a message is displayed prompting you to do so.

When updating a driver on a print server, update the drivers on clients as well, referring to the procedure for setting computers as shared printer clients.

Uninstalling the Driver

This explains the procedure for uninstalling a driver that is no longer needed.

The uninstallation method differs depending on whether the installer or an inf file was used when the driver was installed.

- ▶ **For drivers that were installed by an installer(P. 53)**
- ▶ **For drivers that were installed by specifying an inf file(P. 54)**

Prerequisites

Confirm that the following conditions are satisfied. Complete the preparation operations.

- When starting the computer, logon as a member of Administrators.
- [Desktop] screen display (when using Windows 8.1/Server 2012 R2)

Procedures

For drivers that were installed by an installer

1 Start the uninstaller of the driver.

When using Windows functions

In Windows 10/Server 2016

- (1) Display [Settings] > [System] > [Apps & features].
- (2) Select the driver to be uninstalled in [V4 Printer Driver Uninstaller] → click [Uninstall].

In operating systems other than the above

- (1) Display [Control Panel] > [Programs] > [Uninstall a program].
- (2) Select the driver to be uninstalled in [V4 Printer Driver Uninstaller] → click [Uninstall/Change].

When using the Windows uninstall function, the uninstaller is displayed in the language you selected in the installer.

When using the uninstall file provided with the driver

Double-click one of the following files.

When using a file in an installed driver folder

Use [UNINSTAL.exe] corresponding to the driver within the following folder.

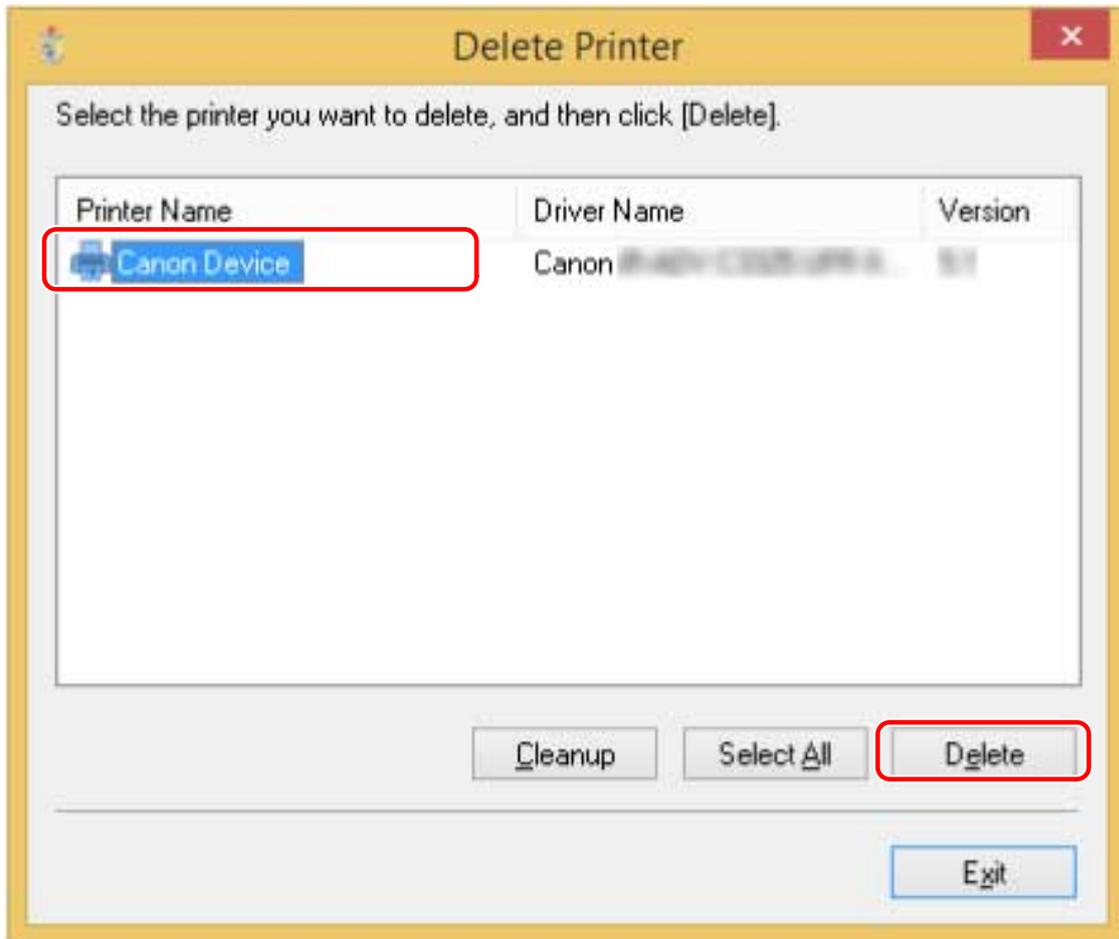

<install folder>\Canon\PrnUninstall

When using a file in a downloaded driver folder

Installer\UNINSTAL.exe

2 Select the name of the device you want to uninstall → click [Delete].

[Cleanup]: Click this to simultaneously delete all files and registry information relating to all of the drivers displayed in the list, not just the selected driver. Click [Delete] to perform a normal uninstallation of the driver.

3 In the screen for confirming whether to delete the printer, click [Yes].

A confirmation message asking whether you want to delete the package as well may be displayed.

4 In the [Delete Printer] screen, click [Exit].

NOTE

- When connected to a device by USB, the icon of the device cannot be deleted by the uninstaller. To delete them, perform the procedure for uninstalling drivers that were installed by specifying an inf file.

For drivers that were installed by specifying an inf file

1 Display [Devices and Printers] from the [Control Panel] of Windows.

2 Right-click the icon of the device you are going to remove → select [Remove device].

If you are using a touch panel, press and hold the icon of the device you want to delete → tap [Remove device] in the pop-up menu.

3 In the [Remove device] screen, click [Yes].

- 4** Select the icon of any device → click [Print server properties] from the menu.
- 5** Display the [Drivers] sheet.
- 6** Select the driver to be removed from [Installed printer drivers] → click [Remove].
- 7** Select [Remove driver and driver package] → click [OK].
- 8** Confirm the driver in the confirmation screen → click [Yes].

Printing

Printing	57
Printing from a Desktop App	58

How to Refer to the Help	67

Printing

This explains the procedures for basic printing operations. You can check the help for details on how to use the driver.

- ▶ **Printing from a Desktop App(P. 58)**
- ▶ **Printing from a Store App(P. 61)**
- ▶ **How to Refer to the Help(P. 67)**

Printing from a Desktop App

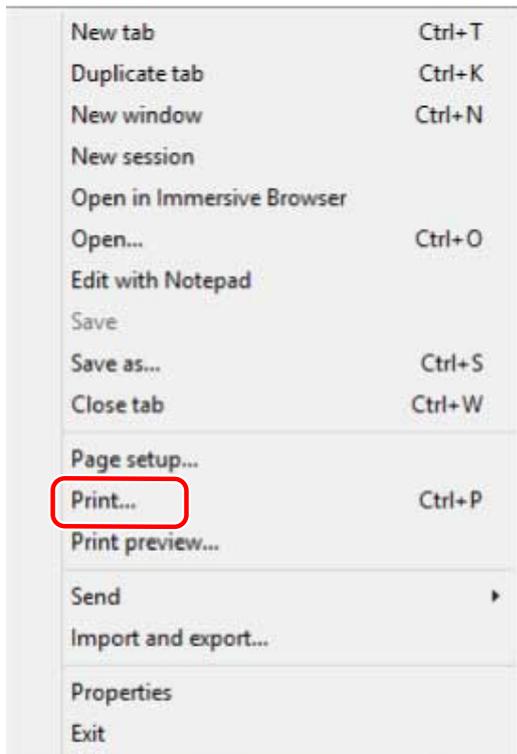

This explains the basic procedure for displaying the print settings screen of the driver and printing from a desktop app.

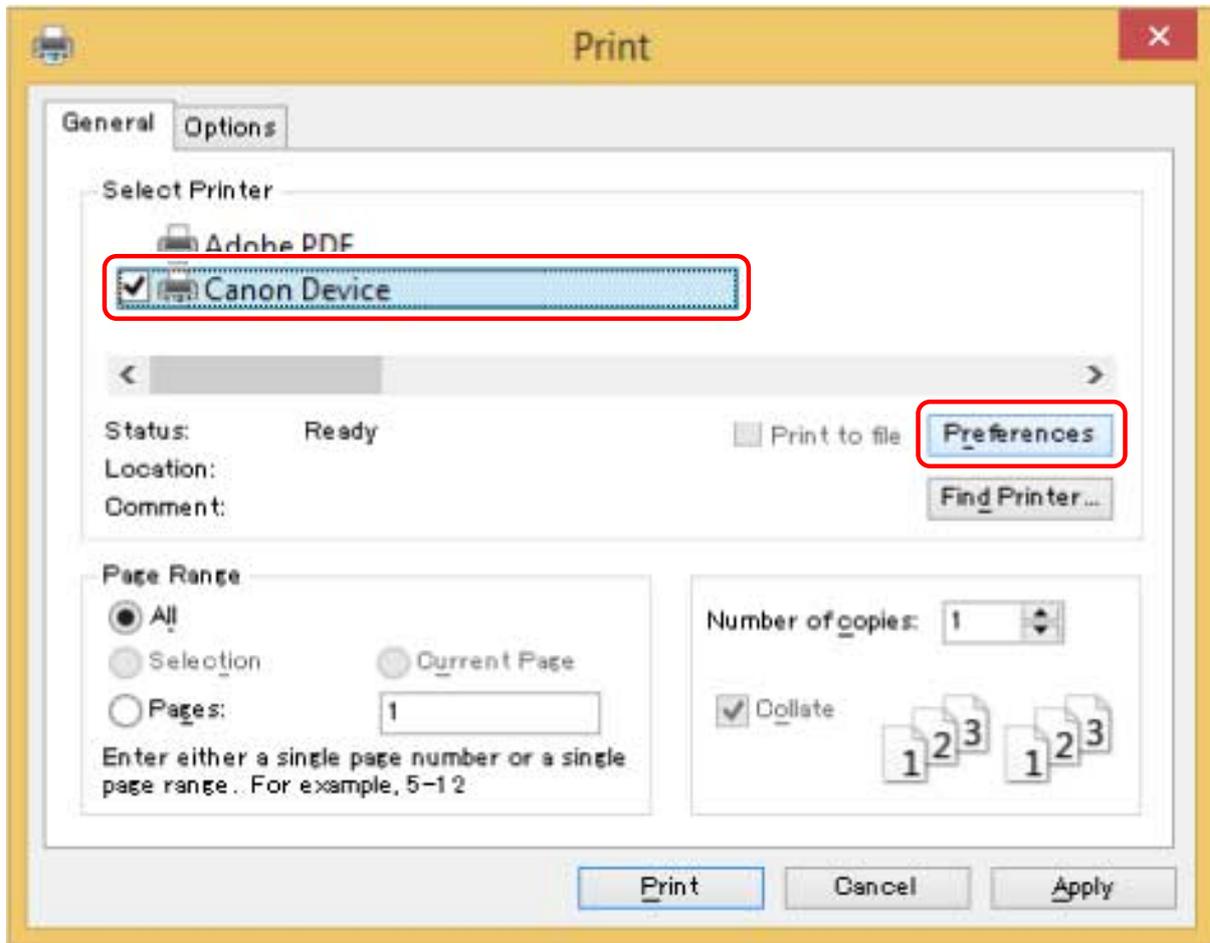

NOTE

- When using a device connected via a WSD port, enable [Use WSD] at the device.

1 Select [Print] from the menu of the app.

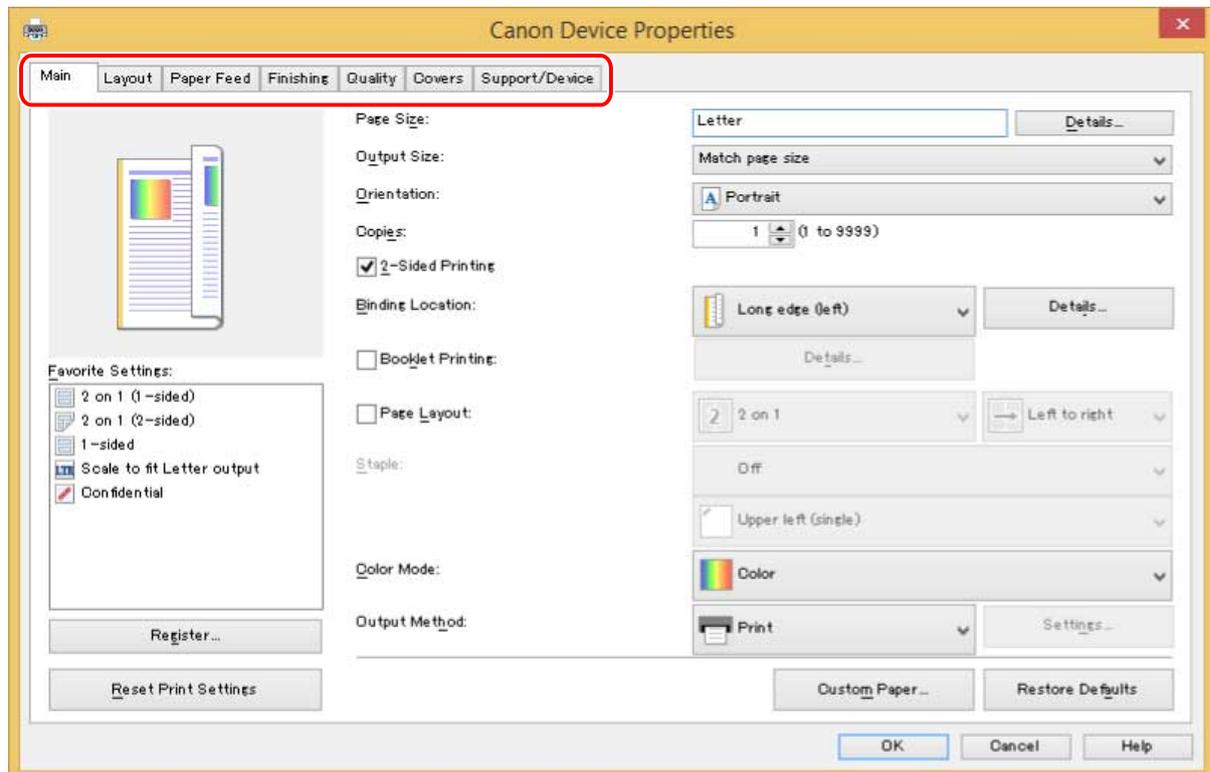

2 In the print screen, select the device you are using → click [Preferences], [Printer properties], or [Properties].

3 In the print settings screen of the driver, set the required items.

You can switch sheets if necessary.

**NOTE**

- If the Windows standard print setting screen, which differs from the screen above, is displayed, it may be due to an error in the environment, settings, or installation state of the driver. Refer to Troubleshooting to enable the print settings screen of the driver to be displayed.
- If the function you want to use is not displayed in the print settings screen, configure the print settings after enabling the functions of the device by retrieving the device information etc.

4 Click [OK].

5 In the print screen, click [Print] or [OK].

Printing from a Store App

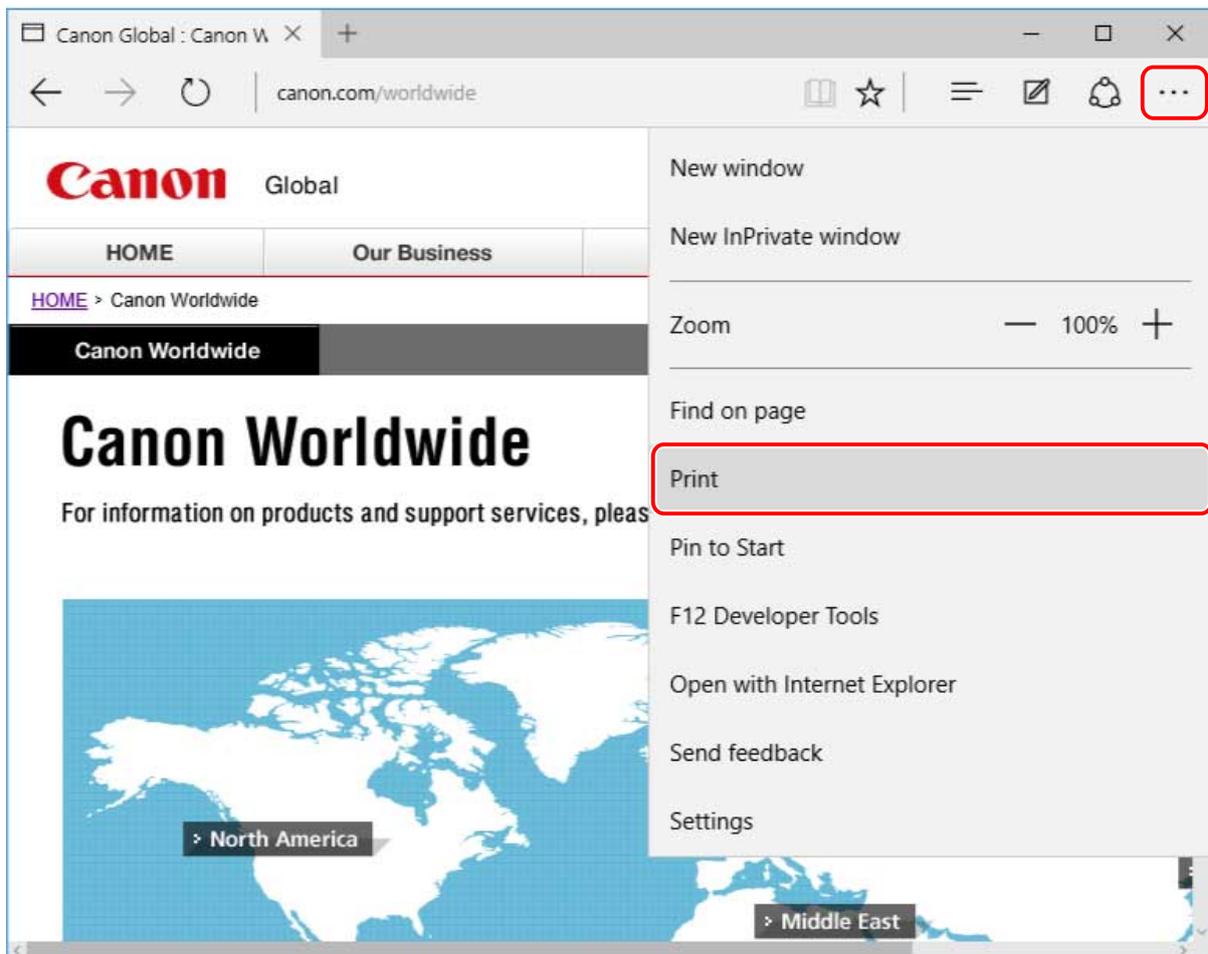

This explains the basic procedure for displaying the print settings screen of the driver and printing from a store app.

NOTE

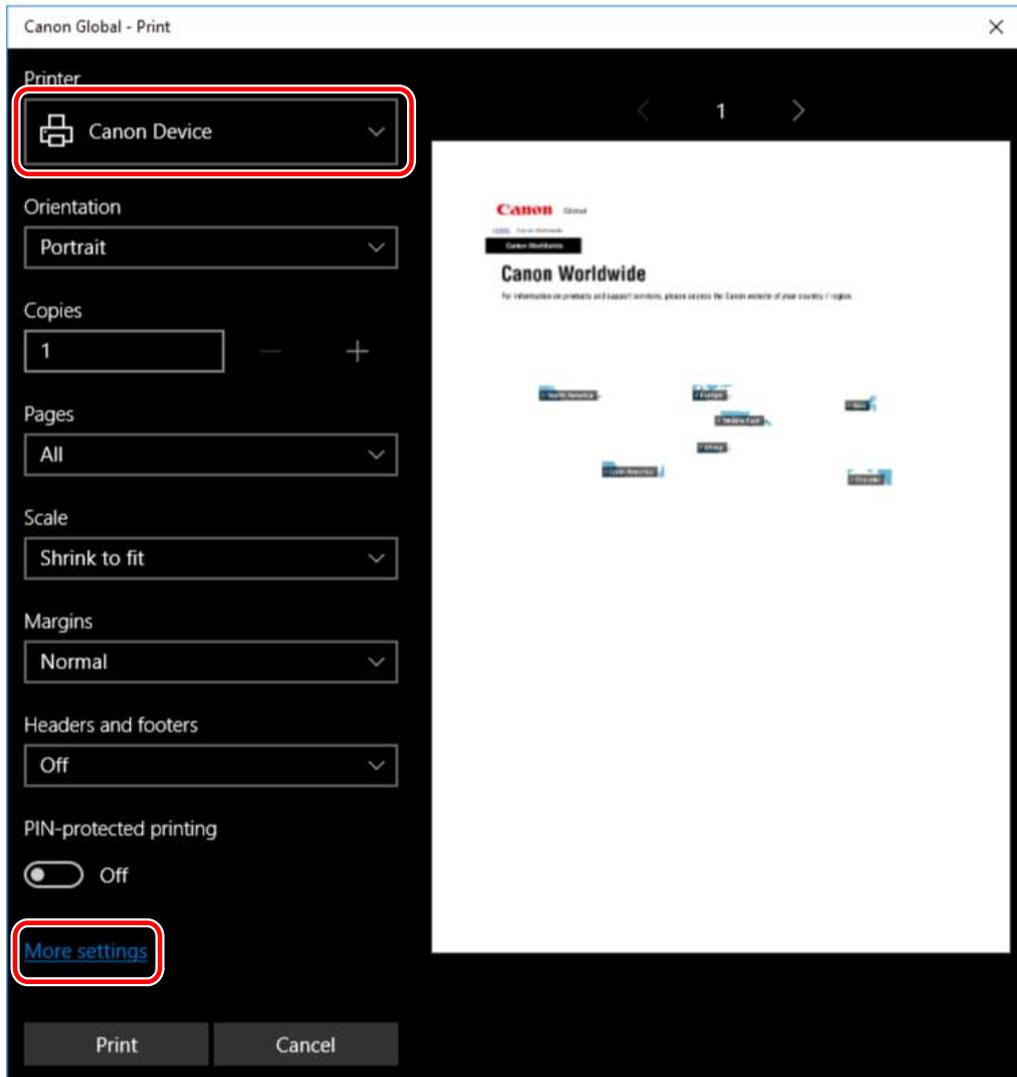

- When using a device connected via a WSD port, enable [Use WSD] at the device.
- If functions you want to use are not displayed in the print settings screen displayed from a store app, you may be able to use them by changing the default settings. You can configure the default settings by displaying the print settings screen from the icon of the device in [Devices and Printers].

To Print from a Store App in Windows 10/Server 2016

1 Select [Print] from the menu of the app.

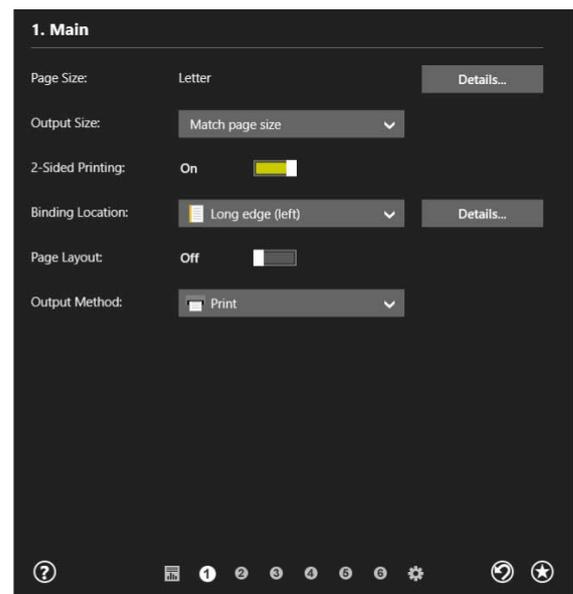

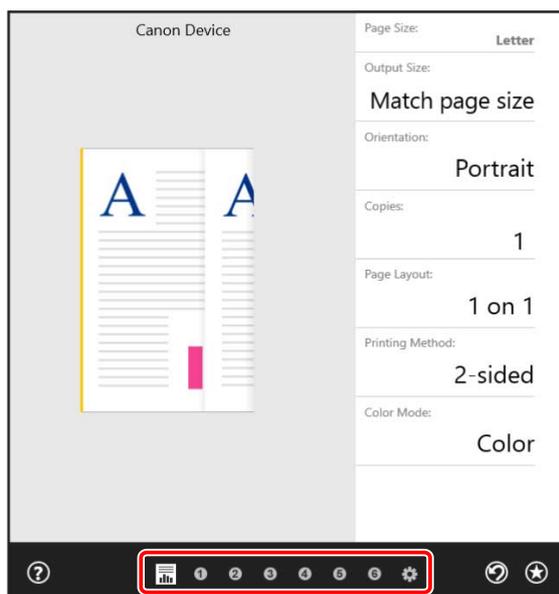

2 In the print screen, select the device you are using → click [More settings].

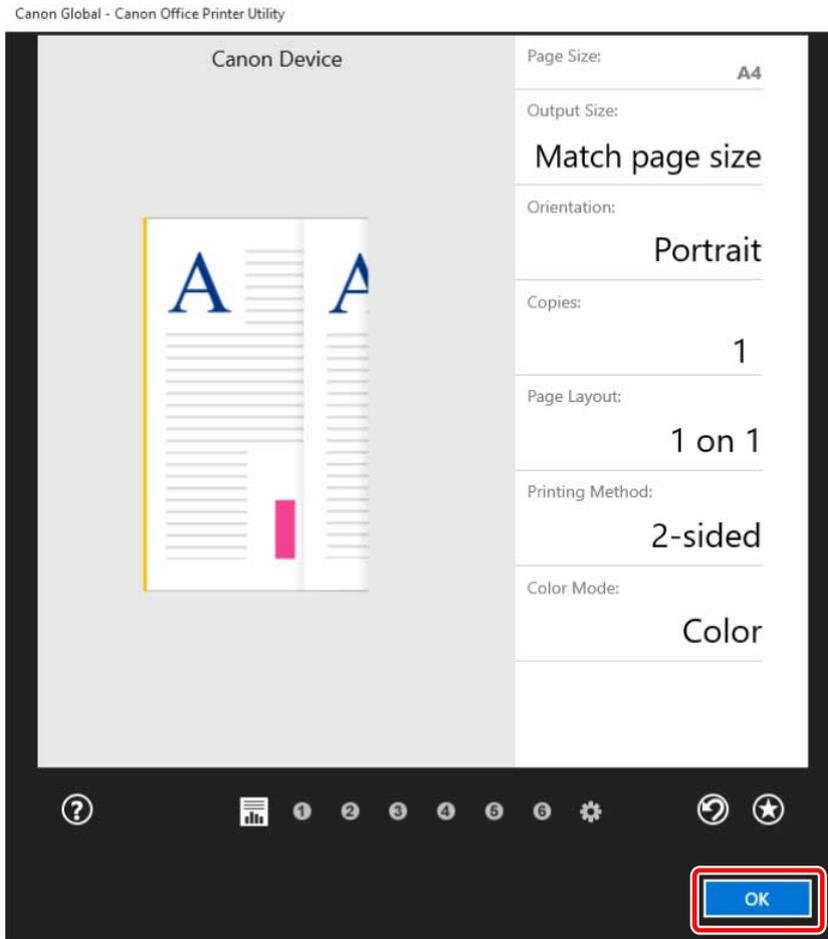

3 In the print settings screen of the driver, set the required items.

You can switch sheets if necessary.

- If the Windows standard print setting screen, which differs from the screen above, is displayed, it may be due to an error in the environment, settings, or installation state of the driver. Refer to Troubleshooting to enable the print settings screen of the driver to be displayed.
- If the function you want to use is not displayed in the print settings screen, configure the print settings after enabling the functions of the device by retrieving the device information etc.

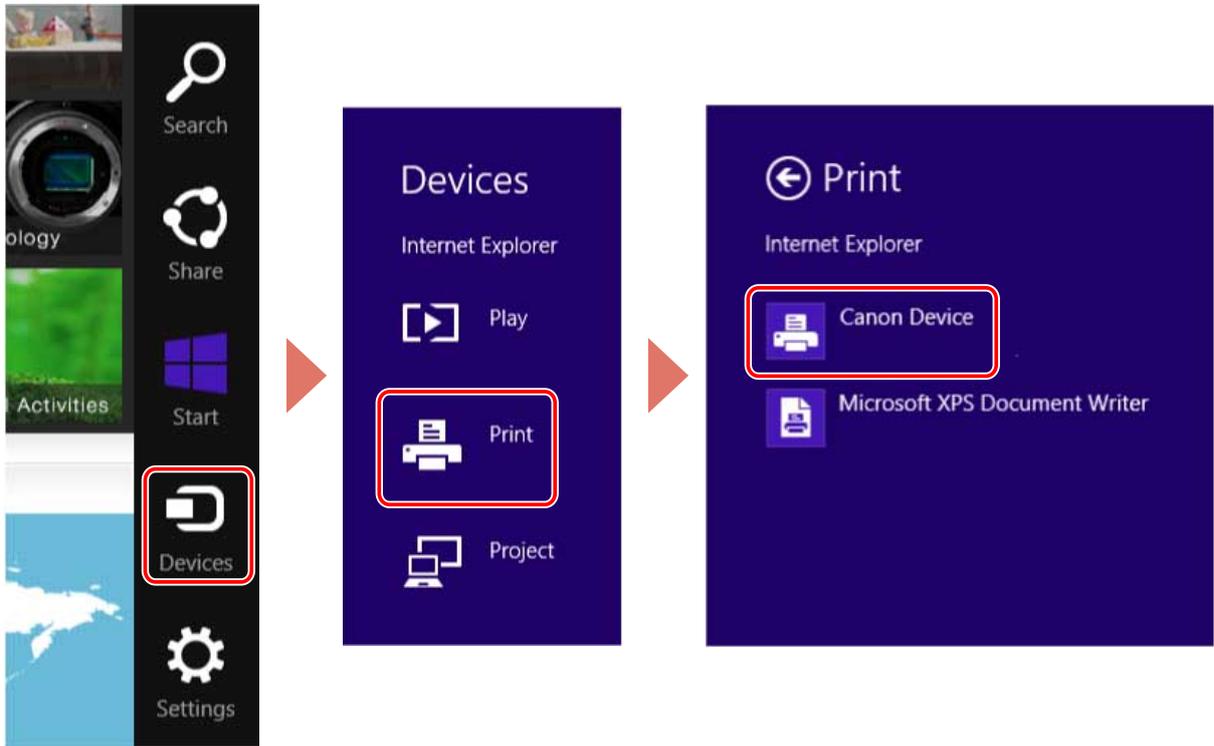

4 Click [OK].

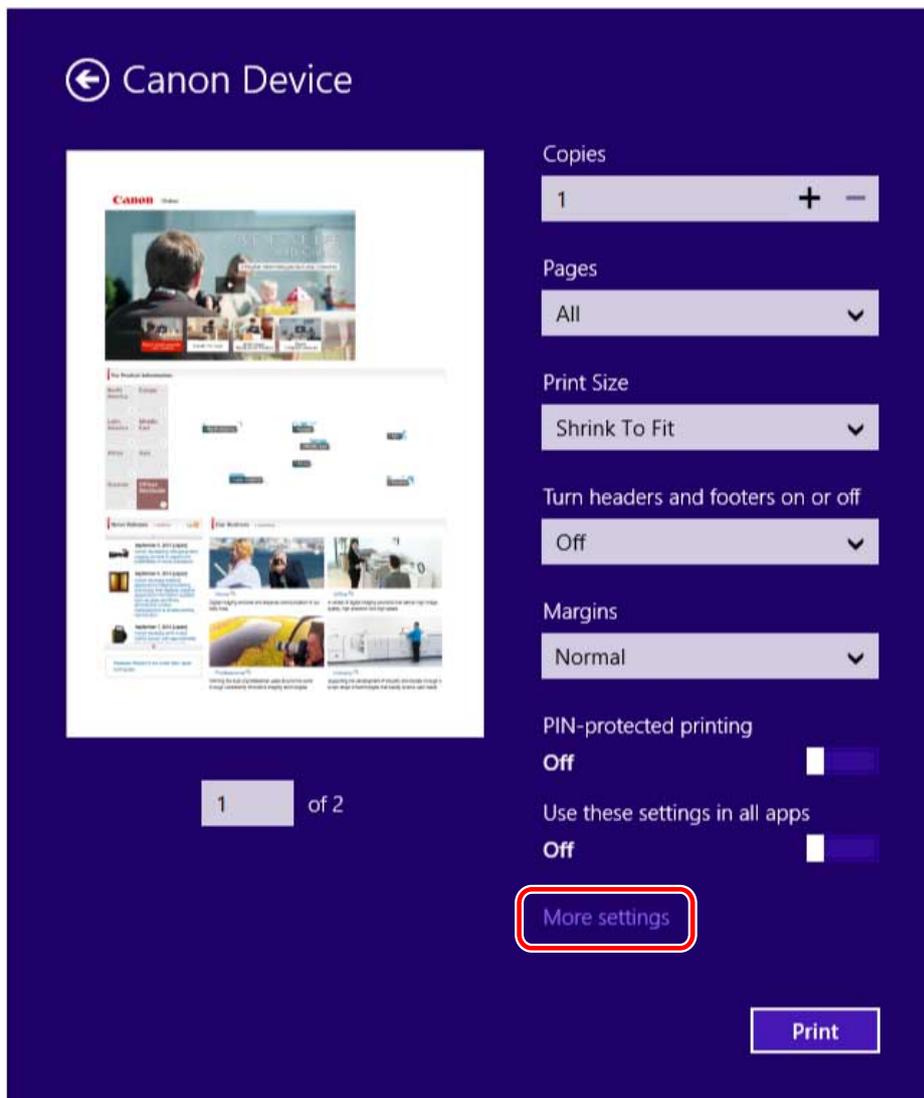

5 In the print screen, click [Print].

To Print from a Store App in Windows 8.1/Server 2012 R2

- 1 Display the data you want to print in the app.
- 2 Display the charm bar, then click [ Devices] → [ Print] → the device you are using.

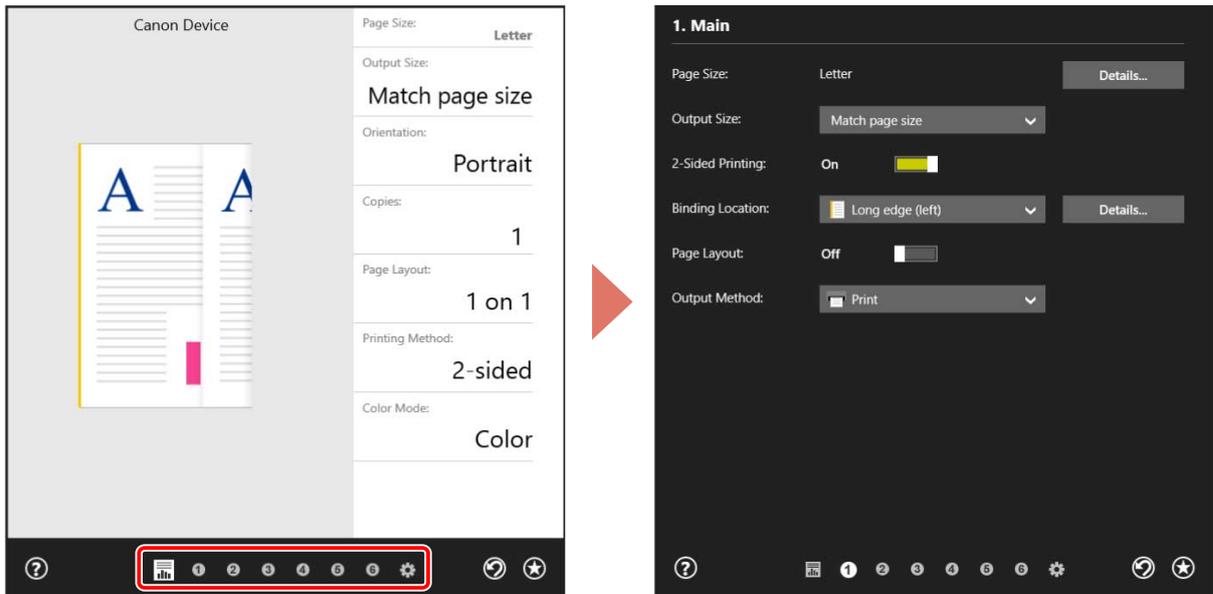

3 Click [More settings].

4 In the print settings screen of the driver, set the required items.

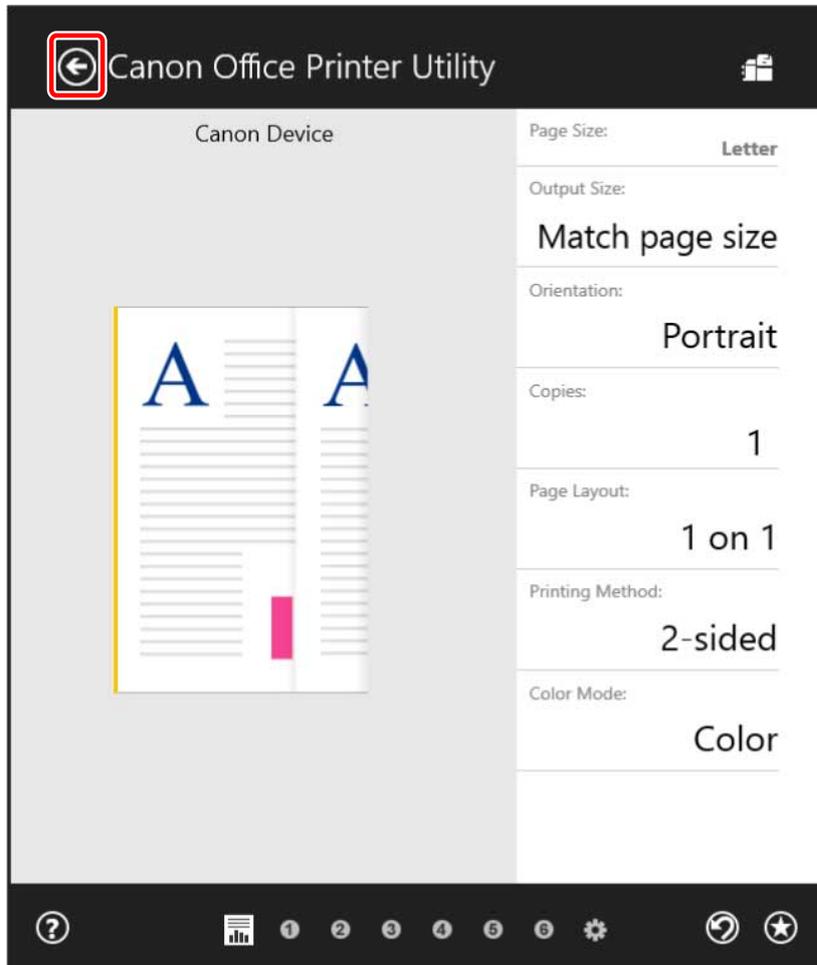

You can switch sheets if necessary.

NOTE

- If the Windows standard print setting screen, which differs from the screen above, is displayed, it may be due to an error in the environment, settings, or installation state of the driver. Refer to Troubleshooting to enable the print settings screen of the driver to be displayed.
- If the function you want to use is not displayed in the print settings screen, configure the print settings after enabling the functions of the device by retrieving the device information etc.

5 Click [] (Back).

6 In the print screen, click [Print].

Troubleshooting

Troubleshooting	70
Cannot discover a device connected via a WSD port	71
Icon of the device is not displayed after installation	73
The Windows standard print settings screen is displayed	74
Print settings return to their defaults after updating the driver	77

Troubleshooting

This explains solutions to common problems.

- ▶ **Cannot discover a device connected via a WSD port(P. 71)**
- ▶ **Icon of the device is not displayed after installation(P. 73)**
- ▶ **The Windows standard print settings screen is displayed(P. 74)**
- ▶ **Print settings return to their defaults after updating the driver(P. 77)**

Cannot discover a device connected via a WSD port

When installing with a network connection, the device may not be displayed in the [Printer List] of the installer even when connected and discovered via a WSD port.

If this happens, it could be due to a number of causes. Change settings as necessary by referring to each "Remedy."

Cause 1.

The device settings are incorrect.

Remedy

Check whether the following have been set at the device. If they have not been set, change the settings or install the appropriate driver.

- The settings for both [Use WSD] and [Multicast Discovery Settings] are enabled.
- [PDL Selection (Plug and Play)] and the page description language of the driver match.
 - For "UFR II/UFRII LT/LIPSLX/CARPS2 V4 Printer Driver": [*** (V4)] (or [*** (XPS)])
*** represents the page description language corresponding to the device.
 - For "PCL6 V4 Printer Driver": [PCL6 (V4)] (or [PCL6])

For details about the setting method for the page description language (plug and play) function of the device, refer to the manual of the device.

Cause 2.

The network settings of the operating system are incorrect.

Remedy

Check whether the necessary settings have been configured in the network settings of the operating system. If they have not been set, change the settings according to the following procedure.

(1) Display [Network and Sharing Center] → check the network profile you are using in [View your active networks].

You can display [Network and Sharing Center] as follows.

In Windows 10/Server 2016

Select [Settings] > [Network & Internet] > [Ethernet] → click [Network and Sharing Center].

In Windows 8.1/Server 2012 R2

Click [Control Panel] > [Network and Internet] > [Network and Sharing Center].

(2) Click [Change advanced sharing settings].

(3) If [Network Discovery] > [Turn off network discovery] is selected in the network profile checked in step (1) (P. 71), select [Turn on network discovery].

(4) Click [Save changes].

If the Administrator's password or confirmation is requested, enter the password or provide the confirmation information.

Cause 3.

The device is not displayed in the discovery results because the driver corresponding to the discovered device is already installed.

Remedy

If you want to install a driver by discovering a device, uninstall the driver first, then discover it again.

Related Topics

- ▶ [Installing by Discovering Devices on a Network\(P. 20\)](#)

Icon of the device is not displayed after installation

If the icon of the device is not displayed in [Devices and Printers] when installation is complete, this could be due to a number of causes. Refer to each "Remedy" to have the icon of the device displayed.

Cause 1.

The screen has not been updated.

Remedy

Click [] (Refresh) in the address bar to update the screen to the latest status.

Cause 2.

The driver is being installed or the installation has not been correctly completed.

Remedy

Wait until the installation has been completed. If the icon of the driver is not displayed after you have waited for some time, reinstall the driver.

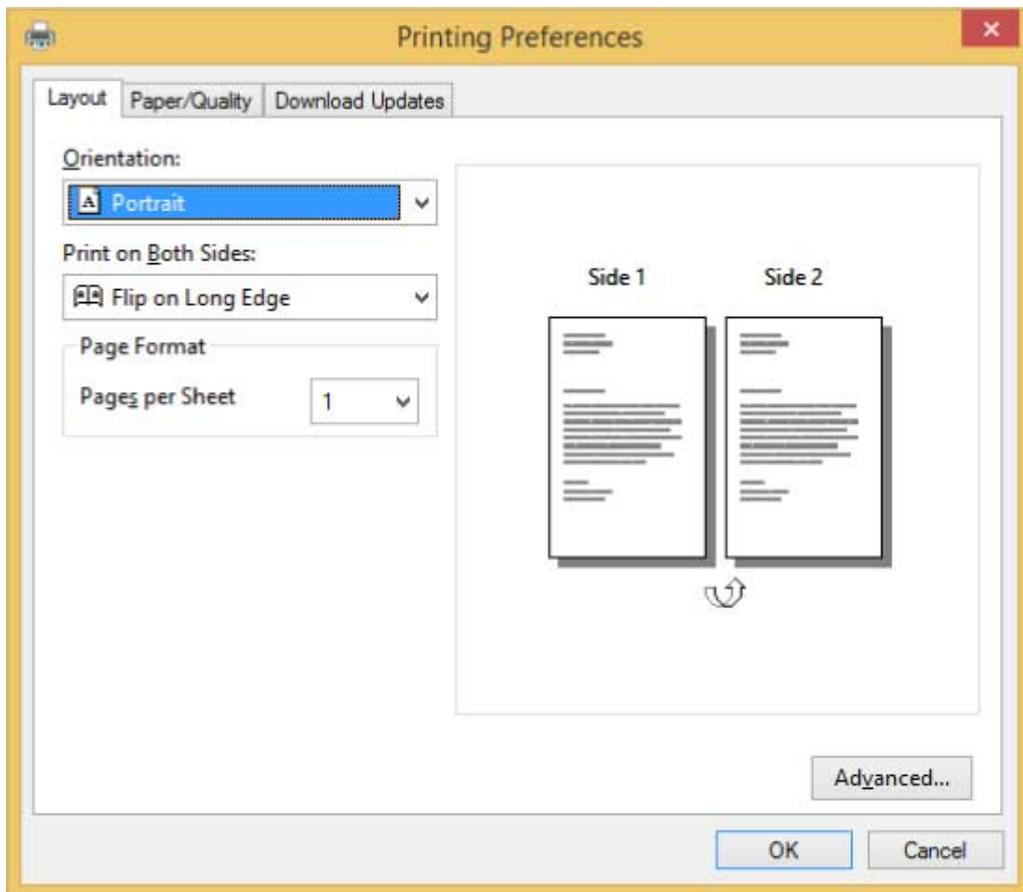

The Windows standard print settings screen is displayed

Even after you install the driver, the print settings screen of the driver may not be displayed and the Windows standard print settings screen displayed instead. If this happens, a number of causes are possible.

Display the print settings screen of the driver by referring to the "Cause" and "Remedy" that explains each Windows standard print settings screen displayed.

If displayed from the icon of the device in [Devices and Printers] or a desktop app

The following screen is displayed from the icon of the device in [Devices and Printers] or when printing with a desktop app.

Cause 1.

The driver has not been correctly installed in the client in a shared printer environment.

Remedy

Refer to the procedure for setting a computer as a shared printer client and install the driver.

Cause 2.

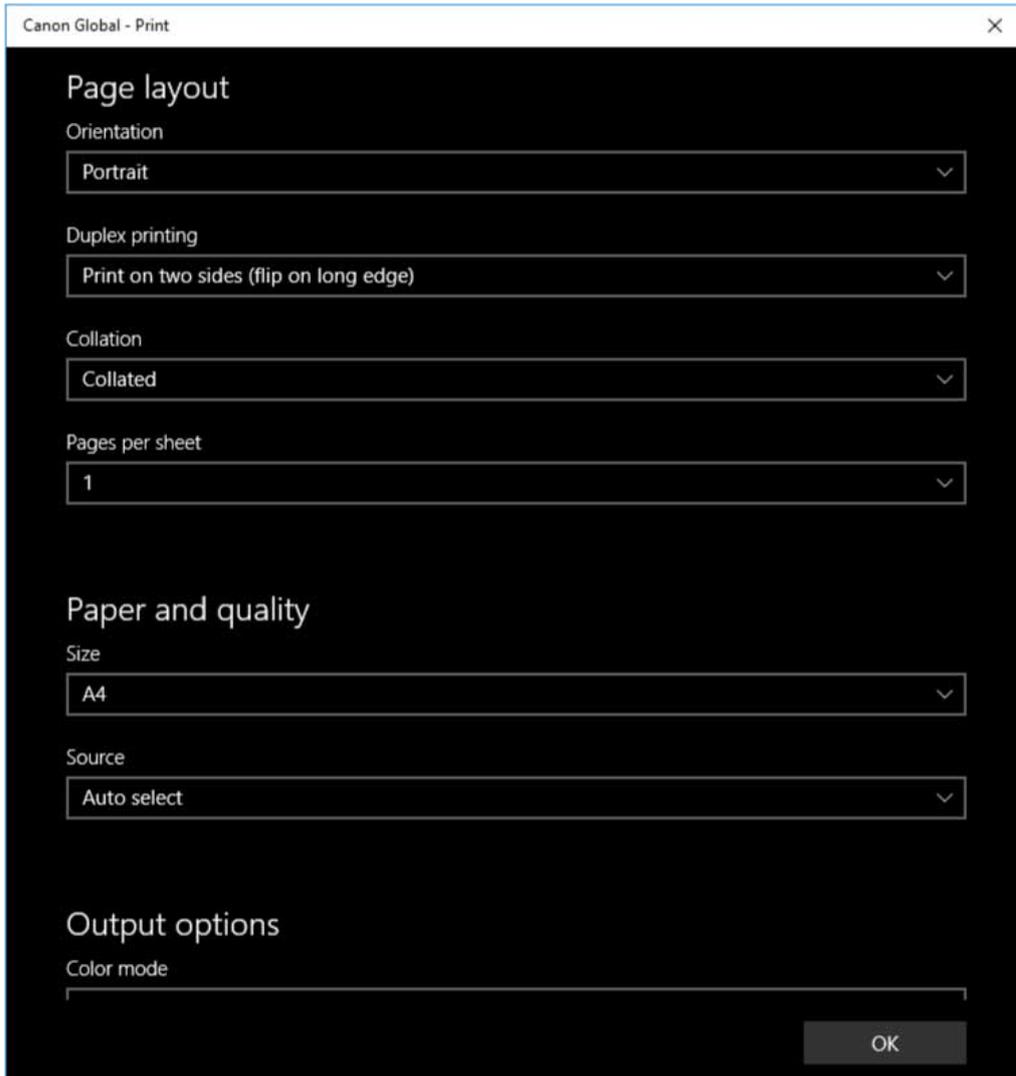

There is the possibility of some sort of problem occurring while installing the printer driver.

Remedy

Uninstall the printer driver, then re-install it by following the correct procedure.

If displayed from a store app

The following screen is displayed when printing from a store app.

Cause 1.

You cannot connect to the Internet from the computer you are using.

Remedy

The functions required for printing with a store app are installed from the Windows store via the Internet. Check that you can access the Windows store from the computer you are using, then reinstall the driver.

Cause 2.

The account you used to log onto Windows is not associated with a Microsoft account.

Remedy

Use a Microsoft account to install from the Windows store.

If the account you are using when logging onto Windows is an account other than a Microsoft account (a local account or domain account), you need to associate it with a Microsoft account following the procedure below, then install.

(1) Display the [Accounts] screen.

In Windows 10/Server 2016

Select [Settings] > [Accounts].

In Windows 8.1/Server 2012 R2

Display the charm bar in the [Desktop] screen → select [ Settings] > [Change PC settings] > [Accounts].

(2) Click [Your account] > [Connect to a Microsoft account].

When the settings for associating a Microsoft account according to the instructions on the screen is complete, the procedure returns to the [Your account] screen.

Check that the associated Microsoft account is displayed in the account information.

Cause 3.

The app is set so that the Windows standard print settings screen is displayed.

Remedy

If you are printing from a store app, set the app so that the print settings screen of the driver is displayed.

(1) Start the Canon Office Printer Utility.

In Windows 10/Server 2016

Select the Start menu > [Canon Office Printer Utility] from the list of apps.

In Windows 8.1/Server 2012 R2

Click [] at the bottom of the [Start] screen > [Canon Office Printer Utility] in the [Apps] screen.

(2) Display the [Options] screen of the Canon Office Printer Utility.

In Windows 10/Server 2016

Select the menu [] at the top of the app screen > [Settings] > [Options].

In Windows 8.1/Server 2012 R2

Display the charm bar in the [Desktop] screen → select [ Settings] > [Options].

(3) Disable [Settings for print settings screen] > [Always display in compatibility mode].

Print settings return to their defaults after updating the driver

After updating an installed driver, if none of the print settings are carried over, and all of the print settings return to their default settings, this may be due to the following cause. Address the problem according to the "Remedy" content.

Cause

Windows specifications or changes in the driver due to additions or changes to functions.

Remedy

After acquiring the device information, change the print settings.

To acquire the device information, perform the procedure for enabling usage of the functions of the device.

This Font Software is licensed under the SIL Open Font License, Version 1.1.

This license is copied below, and is also available with a FAQ at: <http://scripts.sil.org/OFL>

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.
- 4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.
- 5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.
