### Safety Precautions

Be sure to read, understand and follow the safety precautions below when using the camera, in order to prevent injury, burns or electrical shock to yourself and others.

Be sure to also read the safety precautions listed in the Advanced Camera User Guide.

### Warnings

- Do not trigger the flash in close proximity to human or animal eyes.
- Store this equipment out of the reach of children and infants.
- Avoid dropping or subjecting the camera to severe impacts. Do not touch the flash portion of the camera if it has been damaged.
- Stop operating the equipment immediately if it emits smoke or noxious fumes.
- Do not handle the power cord if your hands are wet.
- Only use batteries recommended in this manual.
- The output terminal for the compact power adaptor is made specifically for this camera. Do not use it with any other device.
Flowchart and Reference Guides

This icon appears for functions and notes that apply only to the PowerShot A430.

This guide uses illustrations of the PowerShot A430.
Preparations

Installing the Battery and Memory Card

1 Open memory card slot/battery cover.

2 Insert the batteries, and insert the memory card until it clicks into place, then close the cover.

Ensure that the memory card is correctly oriented before inserting it in the camera. It may damage the camera if inserted incorrectly.

You can use SD* memory cards and MultiMediaCards with this camera. These cards are collectively called memory cards in this guide.

* SD stands for Secure Digital, a copyright protection system.

See the Advanced Guide: Battery Handling (p. 85)
See the Advanced Guide: Handling the Memory Card (p. 87)
See the Advanced Guide: Formatting Memory Cards (p. 29)
To Remove the Memory Card
Use your finger to push the memory card in until you hear a click, then release it.

First Time Settings

Setting the Date/Time

1 Press the power button.
   The upper indicator blinks green. To turn the power off, press the power button once more.

   Hold down the DISP. button, and press the power button to turn on the mute setting and turn off all operation sounds except the warnings.

   See the Advanced Guide: Using the LCD Monitor (p. 15)
   See the Advanced Guide: Power Saving Function (p. 20)
   See the Advanced Guide: Set up Menu (p. 25)
   See the Advanced Guide: My Camera Menu (p. 27)
2 Select the item you wish to set using the ◀ or ▶ button and set its value using the ▲ or ▼ button (①).

3 Confirm that the correct time is displayed and press the FUNC./SET button (②).
The date/time can also be set in the Set up menu (p. 11).

Setting the Display Language

1 Set the mode dial to (Playback) (①).

2 Hold down the FUNC./SET button (②) and press the MENU button (③).

3 Use the ▲, ▼, ◀ or ▶ button (④) to select a language and press the FUNC./SET button (⑤).
The language can also be set in the Set up menu (p. 11).
Shooting

1 Set the mode dial to 📷 (Auto).

2 Aim the camera at the subject.
   Be careful not to block the flash with your finger.

3 Press the shutter button lightly (halfway) to focus.
   The camera beeps twice and the upper indicator lights green when the camera focuses.

4 Press the shutter button fully (all the way) to shoot.
   The shutter sound will play (a beep sound for the PowerShot A420), and the image will record.
   The upper indicator will blink green while the image is recorded to the memory card.

- See Basic Shooting Functions (p. 5)
- See the Advanced Guide to verify the advanced shooting method.
- See the Advanced Guide: Movie Shooting (p. 37)
- See the Advanced Guide: Indicators (p. 19)
Reviewing an Image Right After Shooting

After a shot is taken, the image appears in the LCD monitor for approximately 2 seconds.
To override this time limit and continue displaying the image, use one of the following methods:
- Keep the shutter button fully depressed after taking the shot.
- Press the FUNC./SET or DISP. button while the image is displayed in the LCD monitor.*

Press the shutter button halfway again to stop displaying it.

* This operation is not available in the Stitch Assist mode (p. 6).

Basic Shooting Functions

Selecting a Shooting Mode

Use the mode dial and menu to select the Shooting modes.

Mode Dial

AUTO
The camera automatically selects settings.

MANUAL
6 modes are available with this camera. You can manually adjust the exposure, white balance, My Colors, shooting panorama composition images ( , ) and other settings before shooting.

MOVIE
Modes for shooting movies are available with this camera.

SCN
8 scene modes to shoot with the most appropriate settings for the scene are available with this camera.

See the Advanced Guide: Movie Shooting (p. 37)
Selecting a Shooting Mode

In the M, SCN, and modes, the same procedure is used for selecting shooting modes. The following explanation uses the M mode as an example.

1 Set the mode dial to M (1).

2 Press the FUNC./SET button (2).

3 Use the  or  button to select a shooting mode (3).

4 Press the FUNC./SET button (4).

**M Mode Items**

- **Manual**
  Allows you to select settings yourself, such as the exposure compensation, white balance or My Colors settings.

- **Super Macro**
  Allows you to take magnified shots of subjects closer than standard Macro mode (p. 9).
  Shooting is possible when the distance from the front of the lens to the subject is in the following range: 1 to 5 cm (0.4 to 2.0 in.) (maximum wide angle).

  ➤ See the Advanced Guide (p. 31)

- **Color Accent**
  Allows you to have only the color specified in the LCD monitor remain and to transform all others to black and white.

  ➤ See the Advanced Guide (p. 42)

- **Color Swap**
  Allows you to transform a color specified in the LCD monitor into another color.

  ➤ See the Advanced Guide (p. 43)

- **Stitch Assist**
  Use this mode when taking shots that you want to combine into a panorama.

  ➤ See the Advanced Guide (p. 40)
### Special Scene Mode Items
By selecting a shooting mode, you can capture scenes with optimal shooting.

| **Portrait** | Blurs the background and makes a person stand out. |
| **Night Snapshot** | Allows you to take snapshots of people against twilight or night backgrounds by reducing the effects of camera shake even without using a tripod. |
| **Kids&Pets** | Allows you to capture subjects that move around, such as children and pets, without missing photo opportunities. |
| **Indoor** | Prevents camera shake and maintains the subject's true color when shooting under fluorescent or tungsten lighting. |
| **Foliage** | Shoots trees and leaves - such as new growth, autumn leaves or blossoms - in vivid colors. |
| **Snow** | Shoots without a blue tinge and without making people appear dark against a snowy background. |
| **Beach** | Shoots without making people appear dark near water or sand where reflected sunlight is strong. |
| **Fireworks** | Captures fireworks in the sky sharply and at an optimal exposure. |

- The shutter speed is slow in (Fireworks) mode. Always use a tripod to avoid camera shake.
- In (Indoor), (Kids&Pets) or (Night Snapshot) mode, the ISO speed may increase and cause noise in the image depending on the scene being shot.
- In (Kids&Pets) mode, shoot with the subject at least 1 m (3.3 ft.) away.

### Movie Mode Items
Allows you to shoot a movie just by pressing the shutter button. The following movie modes are available: Standard, Compact (for sending movies as e-mail attachments), Color Accent (for shooting in black and white except for specified colors), and Color Swap (for changing a specified color into another).

> See the Advanced Guide: Movie Shooting (p. 37)
Using the Zoom

The zoom can be adjusted to the following in 35 mm film equivalent terms.
- PowerShot A430: 39 mm - 156 mm
- PowerShot A420: 39 mm - 125 mm

**Telephoto**
Zooms in on the subject.

**Wide Angle**
Zooms out from the subject.

Using the Flash

**button**
Press this button to cycle through flash settings.
(Flash settings cannot be used in some shooting modes.)

- **Auto**
- **Auto with red-eye reduction**
- **Flash on with red-eye reduction**
- **Flash on**
- **Flash off**
- **Slow Synchro**

* Red-Eye Reduction: This feature reduces the effect of light reflecting back from the eyes and making them appear red.

- Distance ranges for shooting with the flash are 47 cm to 3.0 m (1.5 to 10 ft.) (W) and 47 cm to 2.0 m (1.5 to 6.6 ft.) (T).
- If the LCD monitor is on when the flash begins charging, the upper indicator will blink orange, and the LCD monitor will turn off. When charging is complete, the upper indicator will turn off, and the LCD will turn on again. The charge time varies depending on conditions of use such as the remaining battery life.
Shooting Close-Ups/Infinity Shots

![Image of camera settings]

**button**
When you press this button, or appears on the LCD monitor. To cancel the macro/infinity mode: press the button to remove or from the display.

**Macro:** Use this mode to shoot close-ups of flowers or small items.
Image area at minimum shooting distance from end of lens to subject:
- Maximum wide angle setting: 52 × 39 mm (2.0 × 1.5 in.)
  (Minimum shooting distance: 5 cm (2.0 in.))
- Maximum telephoto setting (PowerShot A430): 64 × 48 mm (2.5 × 1.9 in.)
  (Minimum shooting distance: 25 cm (9.8 in.))
- Maximum telephoto setting (PowerShot A420): 75 × 56 mm (3.0 × 2.2 in.)
  (Minimum shooting distance: 25 cm (9.8 in.))

**Infinity:** Use this mode to record subjects 3 m (9.8 ft.) away or more. Also use this mode for compositions combining both near and distant objects.

- Use the LCD monitor to compose close-ups in macro mode since images composed with the viewfinder may be off-center.
- Exposure may not be optimal when the flash is used in Macro mode.

- You are recommended to shoot with the camera attached to a tripod or other device if the camera shake warning icon appears.
- blinks while recharging. You can shoot after lights without blinking.

See the Advanced Guide: Functions Available in Each Shooting Mode (p. 112)

See the Advanced Guide: Magnified Close-Up Shooting (p. 31)
See the Advanced Guide: Using the Digital Zoom (p. 32)
See the Advanced Guide: Functions Available in Each Shooting Mode (p. 112)
**Playback**

1. Set the mode dial to (Playback) (1).

2. Display the image you wish to view.
   - Use the \(<\) or \(>\) button to select the image (2).
   - Use the \(<\) button to move to the previous image and the \(>\) button to move the next image.

   ➤ See the Advanced Guide to verify the advanced playback function.
   ➤ See the Advanced Guide: Viewing Movies (p. 59)

**Erasing**

1. Set the mode dial to (Playback) (1).

2. Use the \(<\) or \(>\) button to select the image you wish to erase (2).

3. Press the \(\uparrow\) button (3).

4. Confirm that [Erase] is selected (4) and press the FUNC./SET button (5).
   - To exit instead of erasing, select [Cancel].

   ➤ See the Advanced Guide: Erasing All Images (p. 65)

Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image.
Menus and Settings

Settings for shooting, playback modes or printing, or such camera settings as the date/time and sounds are set using the FUNC., Rec., Play, Print, Set up, or My Camera menus.

FUNC. Menu

From this menu you can specify self-timer, recording pixels, and other settings for shooting.

When the camera is set to shooting mode, press the FUNC./SET button.

To select an item (①)
Press the ▲ or ▼ button.

To change the setting (②)
Press the ◀ or ▶ button.

When you finish making settings
Press the FUNC./SET button.

See the Advanced Guide: Menus and Settings (p. 23)
Rec./Play/Print/Set up/ My Camera Menus

You can specify settings related to camera functions from these menus: [Rec. Menu], [Play Menu], [Print Menu], [Set up Menu], and [My Camera Menu].

From shooting mode

Press the MENU button.

To switch between menus (①)
When the menu icon is selected, press the ⬅️ or ➢️ button.

To select an item (②)
Press the ▲ or ▼ button.

To change the setting (③)
Press the ⬅️ or ➢️ button. When "..." appears by an item, press the FUNC./SET button to display the set up screen, and then use the ▲, ▼, ⬅️ or ➢️ button to change the settings.

When you finish making settings
Press the MENU button.

See the Advanced Guide: Menus and Settings (p. 23)
Connect the camera to a direct print compatible printer*1 with a cable and simply press the \( \text{ } \) button.

1 Connect the camera to a Canon Direct Print compatible printer and turn on the printer’s power.

2 Power on the camera in Playback mode. Confirm that \( \text{ } \) or \( \text{ } \) is displayed in the upper left of the LCD monitor (1).
   - The \( \text{ } \) button lights blue.
   - The displayed icon will vary according to the printer model.

3 Select an image to print with the \( \text{ } \) or \( \text{ } \) button (2) and press the \( \text{ } \) button (3). The \( \text{ } \) button will blink blue and printing will start.

*1 Since this camera uses a standard protocol (PictBridge), you can use it with other PictBridge-compliant printers in addition to Canon-brand printers.
*2 You can also use card photo printers such as the CP-10/CP-100/CP-200/CP-300.

See the Advanced Guide: Setting the DPOF Print Settings (p. 66)
See the Direct Print User Guide
See the user guide for Your Printer
The following methods can be used to download images recorded by the camera to a computer. Some methods, depending on the OS used, may not be available. Please read System Requirements (p. 15) in advance.

Preparing to Download Images

Ensure that you install the software first before connecting the camera to the computer.

**Items to Prepare**

- Camera and computer
- Canon Digital Camera Solution Disk supplied with the camera
- Interface cable supplied with the camera (always use the supplied interface cable)

1. **Install the software.**
   1. Place the Canon Digital Camera Solution Disk in the computer's CD-ROM drive.

      **Macintosh**
      Double-click the [Canon Digital Camera Installer] icon in the CD-ROM window. When the installer panel appears, click [Install].

      Installer panel

      2. Click [Easy Installation].

         **Macintosh**
         Select [Easy Installation] as the setup type and click [Next].

         Proceed with the installation, confirming the contents as you proceed.

      Installer panel

      3. When the installation is finished, the [Finish] or [Restart] button appears. Click the one that appears.

         **Macintosh**
         When the installation is finished, click [OK].

      4. When the screen returns to the desktop display, remove the Canon Digital Camera Solution Disk from the CD-ROM drive.
Connecting the camera to a computer.

1. Use the supplied interface cable to connect the computer's USB port to the camera's DIGITAL terminal.
   With your fingernail on the left edge of the camera's DIGITAL terminal cover, gently pull it open and plug the interface cable in all the way.

2. Set the mode dial to (Playback) and turn on the power.
   The camera and computer will be able to communicate.

Always grasp the connector's sides to remove the interface cable from the camera's DIGITAL terminal.

Windows
If the "Digital Signature Not Found" window appears, click [Yes]. The USB driver will automatically finish installing onto the computer when you attach the camera and open a connection.
Downloading Images to a Computer

A window allowing you to set the preferences will appear when a connection is established between the camera and computer.

1 Select [Canon CameraWindow] and click [OK] (first time only).

2 Download the images.
   • Download the images using the camera or the computer.
   • By default, the downloaded images are saved into the [My Pictures] folder.

   Thumbnails (small versions) of the downloaded images will display in the ZoomBrowser EX Main Window. By default, the downloaded images are saved into subfolders according to their shooting dates.
1 Download the images

- Download the images using the camera or the computer.
- By default, all the images that have yet to be downloaded will download to the [Pictures] folder.

Thumbnails (small versions) of the downloaded images will display in the ImageBrowser Browser Window. By default, the downloaded images are saved into folders according to their shooting dates.
Use this method to download images using camera operations. Install the supplied software and adjust the computer settings before using this method for the first time (p. 16).

When communication between the camera and computer is enabled, the button will light blue and the Direct Transfer menu is displayed on the camera's LCD monitor.

At this point, images can be transferred using camera operations.

If the Direct Transfer menu is not displayed, press the MENU button.

You can select the following methods in the Direct Transfer.

<table>
<thead>
<tr>
<th>Method</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Images</td>
<td>Transfers and saves all images to the computer.</td>
</tr>
<tr>
<td>New Images</td>
<td>Transfers and saves to the computer only the images that have not been previously transferred.</td>
</tr>
<tr>
<td>DPOF Trans. Images</td>
<td>Transfers and saves to the computer only the images with DPOF Transfer Order settings (Advanced Guide: Setting the DPOF Print Settings p. 69).</td>
</tr>
<tr>
<td>Select &amp; Transfer</td>
<td>Transfers and saves single images to the computer as you view and select them.</td>
</tr>
<tr>
<td>Wallpaper</td>
<td>Transfers and saves single images to the computer as you view and select them. The transferred images display on the computer desktop.</td>
</tr>
</tbody>
</table>
All Images/New Images/DPOF Trans. Images

Select , or (1) with the ▲ or ▼ button and press the ▲ button (2).

The images will download.

- The images will download. The ▲ button will blink blue while downloading is in progress.
- The display will return to the Direct Transfer menu when the download is complete.
- To cancel the download, press the FUNC./SET button (6).

Select & Transfer/Wallpaper

1 Select or with the ▲ or ▼ button (1) and press the ▲ button (2) (or the FUNC./SET button).

2 Select images to download with the ◄ or ► button (3) and press the ▲ button (4) (or the FUNC./SET button).

- The images will download.
- The ▲ button will blink blue while downloading is in progress.
- Images can also be selected during index playback.

3 Press the MENU button (5).

The display will return to the Direct Transfer menu.

Only JPEG images can be downloaded as wallpaper for a computer. On the Windows platform, the files are automatically created as BMP images.

The option selected with the ▲ button is retained even when the camera's power is turned off.

The previous setting will be in effect the next time the Direct Transfer menu is displayed. If the [Select & Transfer] or [Wallpaper] option was selected last, the image selection screen will appear immediately.
