Important Usage Instructions

WARNING!  TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

WARNING!  TO REDUCE THE RISK OF ELECTRIC SHOCK AND TO REDUCE ANNOYING INTERFERENCE, USE THE RECOMMENDED ACCESSORIES ONLY.

COPYRIGHT WARNING: Unauthorized recording of copyrighted materials may infringe on the rights of copyright owners and be contrary to copyright laws.

DVD Camcorder, DC210 A systems
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

The cable with the ferrite core provided with the digital video camcorder must be used with this equipment in order to comply with Class B limits in Subpart B of Part 15 of the FCC rules.

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure, that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point, within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
In these safety instructions the word "product" refers to the Canon DVD Camcorder DC210 A and all its accessories.

1. Read Instructions — All the safety and operating instructions should be read before the product is operated.
2. Retain Instructions — The safety and operating instructions should be retained for future reference.
3. Heed Warnings — All warnings on the product and in the operating instructions should be adhered to.
4. Follow Instructions — All operating and maintenance instructions should be followed.
5. Cleaning — Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. The product should be cleaned only as recommended in this manual.
6. Accessories — Do not use accessories not recommended in this manual as they may be hazardous.
7. Avoid magnetic or electric fields — Do not use the camera close to TV transmitters, portable communication devices or other sources of electric or magnetic radiation. They may cause picture interference, or permanently damage the camera.
8. Water and Moisture — Hazard of electric shock — Do not use this product near water or in rainy/moist situations.
9. Placing or Moving — Do not place on an unstable cart, stand, tripod, bracket or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
10. Power Sources — The CA-570 Compact Power Adapter should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. Regarding other power sources such as battery power, refer to instructions in this manual.
11. Polarization — The CA-570 Compact Power Adapter is equipped with a polarized 2-prong plug (a plug having one blade wider than the other). The 2-prong polarized plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.
12. Power Cord Protection — Power cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to plugs and the point from which the cords exit the product.
13. Outdoor Antenna Grounding — If an outside antenna is connected to the product, be sure the antenna is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI / NFPA No. 70—1984, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See figure 1.
14 Lightning — For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, disconnect it from the wall outlet and disconnect the antenna. This will prevent damage to the product due to lightning and power-line surges.

15 Overloading — Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.

16 Objects and Liquid Entry — Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Be careful not to spill liquid of any kind onto the product.

17 Servicing — Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18 Damage Requiring Service — Disconnect this product from the wall outlet and all power sources including battery, and refer servicing to qualified service personnel under the following conditions:
   a. When the power-supply cord or plug is damaged.
   b. If any liquid has been spilled onto, or objects have fallen into, the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally even if you follow the operating instructions. Adjust only those controls that are covered by the operation instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
   e. If the product has been dropped or the cabinet has been damanged.
   f. When the product exhibits a distinct change in performance. This indicates a need for service.

19 Replacement Parts — When replacement parts are required, be sure the service technician has used replacement parts that are specified by Canon or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

20 Safety Check — Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in safe operating order.

When replacement of the power supply is required, please return it to the responsible nearest Canon Service Center and please replace it with the same type number CA-570.

The Adapter can be used with a power supply between 100 and 240 V AC. For areas where 120 V AC power is not used, you will need a special plug adapter. Contact your nearest Canon Service Center for further information.

This Class B digital apparatus complies with Canadian ICES-003.
How to select a DVD disc

There are many types of DVD discs but this camcorder uses only the following three types of 8 cm mini DVD discs: DVD-R, DVD-R DL and DVD-RW. Note that what you can do with a disc depends on the type of DVD used so select the disc that best fits your purpose.

**DVD-R**

Best for Compatibility

DVD-Rs can be recorded only once - you cannot edit or delete the recordings. On the other hand, these discs are comparatively cheaper and they can be played back in most common DVD players.

**DVD-R DL**

Best for Recording Time

Dual-layered discs allow writing up to 80% more data (2.6 GB) on a single recording side. However, DVD-R DLs can only be played back on DVD devices compatible with dual-layered discs. Also, you cannot edit or delete the recordings.

Dual-layered discs have two recording layers. The camcorder will record on Layer 1 and then continue to Layer 2. During the playback of a recording spanning both layers, you may notice a brief stop (about 1 second) at the point where the camcorder switches to the second layer.

**DVD-RW**

Best for Reusability

Recordings made on a DVD-RW disc can be edited or deleted. Also, the disc can be initialized allowing you to use the same disc numerous times.

**Disc specification on DVD-RWs**

DVD-RW discs can be recorded using either one of two disc specifications: VIDEO mode or VR mode. When you first insert a brand new DVD-RW disc, the camcorder will automatically display the initialization screen where you can select the disc specification for the disc.

**VIDEO mode:** Once finalized, discs recorded in VIDEO mode can be played back in most common DVD players offering the best compatibility. However, recordings cannot be edited (deleted, rearranged, etc.).

**VR mode:** You can easily edit the recordings. However, discs recorded in VR mode can only be played back with DVD players compatible with DVD-RWs in VR mode.

Note: DVD-R and DVD-R DL discs can only be recorded in VIDEO mode.
Great Advantages of DVDs

Why DVDs are better than tapes

No need to worry about recording over a tape.
When you use a DVD, the camcorder will automatically record on the empty space of the disc. So you don’t have to worry about mistakenly recording over a precious memory.

Just select a scene from the index screen.
You don’t need to bother running a tape forwards and backwards to find the scene you want to play back. Simply select a scene from the index screen and start the playback in a breeze.

Easy Playback on a DVD player
After you finalize the disc you recorded, all you have to do is just pop it into a DVD player and start the playback. If you record your disc in VIDEO mode, you will be able to play back your disc on most tabletop DVD players and DVD devices.

Recommended Discs
The camcorder’s performance was tested with single-layered discs using Hitachi-Maxell HG series DVD discs; and with dual-layered discs using Canon DVD-R DL54 discs and Verbatim DVD-R DL discs. For further details, contact directly the manufacturer’s customer support center. Note that attempting to record or play with this camcorder DVD discs that were recorded, initialized or finalized with other digital devices can result in permanently losing the recordings. For the highest compatibility with external DVD devices we recommend using the VIDEO mode.
Available features depend on the DVD disc used

<table>

</tr>
</tbody>
</table>

1 Disc initialization clears all the recordings on the disc and restores the free space on the disc to its initial value so you can use the same disc again. DVD-R and DVD-R DL discs cannot be initialized.

2 Disc finalization is the processing of the free space (the unrecorded area) on the disc in order to make it playable on external DVD devices (61). To finalize a DVD-R DL disc, the camcorder has to process both layers. Therefore, and depending on the amount of free space on the disc, this process may be lengthy.

3 Playback cannot be guaranteed with all external DVD devices.

4 You will need to unfinalize the disc first.

Thank you for purchasing the Canon DC210. Please read this manual carefully before you use the camcorder and retain it for future reference. Should your camcorder fail to operate correctly, refer to the Troubleshooting table (66).

Conventions Used in the Manual

- **IMPORTANT**: Precautions related to the camcorder’s operation.
- **NOTES**: Additional topics that complement the basic operating procedures.
- **POINTS TO CHECK**: Restrictions that apply if the function described is not available in all operating modes (the operating mode to which the camcorder should be set, the type of disc required, etc.).
- **( )**: Reference page number.
- **The following terms are used in the manual:**
  - “Screen” refers to the LCD and the viewfinder screen.
  - “Scene” refers to one movie unit from the point you press the start/stop button to start recording until you press again to pause the recording.
  - The terms “Photo” and “Still image” are used interchangeably with the same meaning.
- **The photos included in the manual are simulated pictures taken with a still camera.**

Bracketed [ ] and capital letters are used to refer to menu options as they are displayed on screen. Menu options in boldface indicate the default setting (for example [ON], [OFF]).

Menu item shown at its default position

Buttons and switches to be operated

Names of buttons and switches other than the joystick are indicated within a “button” frame (for example [FUNC]).

About the Joystick and the Joystick Guide

Push the joystick up, down, left or right ( ) to select an item or change settings.

Press the joystick itself ( ) to save the settings or confirm an action. On menu screens, this is indicated by the icon .

---

About this Manual

First Time Settings

Changing the Language

Default value

1 Press .
2 Select ( ) the  icon and press ( ) to open the setup menus.
3 Select ( ) [DISPLAY SETUP] and press ( ).
4 Select ( ) [LANGUAGE ] and press ( ).
5 Select ( , ) the desired option and press ( ).
6 Press  to close the menu.

**NOTES**

If you changed the language by mistake, follow the mark next to the menu item to change the setting.

The displays  and  that appear in some menu screens refer to the name of buttons on the camcorder and will not change, regardless of the language selected.

Changing the Time Zone

Default value

1 Press .
2 Select ( ) the  icon and press ( ) to open the setup menus.
3 Select ( ) [DATE/TIME SETUP] and press ( ).
4 Select ( ) [T.ZONE/DST] and press ( ).
5 Select ( ) your time zone and press ( ).
6 Press  to close the menu.

---

Time Zones

Once you have set the time zone, date and time, you do not need to reset the clock every time you travel to another time zone. Select the time zone referring to the date and time displayed on the screen.
The functions assigned to the joystick change according to the operation mode and the camcorder's settings. Press ( ) to display/hide the joystick guide.

About the Power Switch

In addition to turning the camcorder on and off, the power switch also toggles the camcorder's operating mode.

To turn on the camcorder: Hold the lock button pressed down and move the power switch down to ON.

To change the operating mode: From the ON position, slide down the power switch momentarily toward MODE and release it. This action will toggle the operating mode between recording (CAMERA - red indicator) and playback (PLAY - green indicator).

About the Operating Modes

The camcorder's operating mode is determined by the positions of the power switch and the / switch. In the manual, indicates that a function is available in the operating mode shown and indicates that the function is not available. When no operating mode icons are given, the function is available in all operating modes.

- Fast reverse playback,
- Slow playback,
- Slow reverse playback

Remaining recording time
When there is no more disc space available, "END" will be displayed and the recording will stop.

Recording reminder
The camcorder counts from 1 to 10 seconds when you start recording. This is helpful to avoid scenes that are too short.

Number of still images available on the disc
- Flashing in red: No disc
- In green: 6 or more images
- In yellow: 1 to 5 images
- In red: No more images can be recorded
  - When viewing the still images, the display will always be in green.
  - Depending on the recording conditions, the number of available still images displayed may not decrease even after a recording has been made, or may decrease by 2 still images at once.

Disc access display
"-" is displayed next to the number of images available while the camcorder is writing on the disc.

Remaining battery charge estimate
- When "-" starts flashing in red replace the battery pack with a fully charged one.
- When you attach an empty battery pack, the power may turn off without displaying "-".
- Depending on the conditions under which the camcorder and the battery pack are used, the actual battery charge may not be indicated accurately.

- White balance (47)
- Manual exposure (46)
- Image effect (48)
- Image size (49)
- File size
- Aperture value
- Shutter speed (44)
Charging the Battery Pack

The camcorder can be powered with a battery pack or directly using the compact power adapter. Charge the battery pack before use.

1. Turn off the camcorder.
2. Attach the battery pack to the camcorder.
   - Open the LCD panel.
   - Slide in the connector end of the battery in the direction of the arrow and press it gently until it clicks.
3. Connect the power cord to the compact power adapter.
4. Plug the power cord into a power outlet.
5. Connect the compact power adapter to the camcorder’s DC IN terminal.
   - The CHG (charge) indicator starts flashing. The indicator will stay on when the charging is completed.
   - You can also use the compact power adapter without attaching a battery pack.
   - When the compact power adapter is connected, even if a battery is attached its power will not be consumed.

Once the Battery is Fully Charged

1. Disconnect the compact power adapter from the camcorder.
2. Unplug the power cord from the power outlet and the compact power adapter.

To Remove the Battery Pack

Slide down \( \text{BATT.} \) to release the battery pack, and pull out the battery pack holding it from the ridge on its bottom part.

**IMPORTANT**

- Turn off the camcorder before connecting or disconnecting the compact power adapter. After you turn off the power switch to \( \text{OFF} \) important file allocation data is updated on the disc. Be sure to wait until the LCD display is completely off.
- You may hear some noise from the compact power adapter during use. This is not a malfunction.
- We recommend charging the battery pack in temperatures between 10 °C and 30 °C (50 °F and 86 °F). Outside the temperature range of 0 °C to 40 °C (32 °F to 104 °F), the charging will not start.
- Do not connect to the camcorder’s DC IN terminal or to the compact power adapter any electrical equipment that is not expressly recommended for use with this camcorder.
To prevent equipment breakdowns and excessive heating, do not connect the supplied compact power adapter to voltage converters for overseas travels or special power sources such as those on aircraft and ships, DC-AC inverters, etc.

**NOTES**

- The CHG (charge) indicator also serves as a rough estimate of the battery charge status.
  - Continuously on: Battery fully charged.
  - Flashes approx. twice per second: Battery over 50% charged.
  - Flashes approx. once per second: Battery less than 50% charged.

The charging time will vary depending on the surrounding temperature and the battery pack’s initial charge condition. In cold places, the effective usage time of the battery will decrease.

- We recommend that you prepare battery packs 2 to 3 times longer than you think you might need.

**U.S.A. and Canada only:** The lithium ion/polymer battery that powers this product is recyclable. Please call 1-800-8-BATTERY for information on how to recycle this battery.

---

* Approximate times for recording with repeated operations such as start/stop, zooming, power on/off.
**Inserting and Removing a Disc**

Use only 8 cm (3 in.) mini DVD discs marked with the DVD-R logo (including DVD-R DL) or the DVD-RW logo. Refer also to Recommended Discs (p. 6).

Before inserting the disc be sure to check that the recording surface is clean. If necessary, use a soft lens-cleaning cloth to remove any fingerprints, dirt buildup or smudges from the disc surface.

**Inserting the Disc**

1. Move the power switch to ON to set the camcorder in mode.
2. Slide fully in the direction of the arrow and gently open the disc cover completely until it stops.
3. Insert the disc and press its center firmly until it clicks in place.
   - Insert the disc with the recording side facing down (single sided discs – label side facing out).
   - Be careful not to touch the recording surface of the disc or the pick up lens.
4. Close the disc cover.
   - Do not force the cover closed if the disc is not correctly inserted and firmly set in place.

**WHEN USING DVD-R/DVD-R DL DISCS**

You can start recording movies once the record pause indication appears.

**WHEN USING A DVD-RW**

You need to initialize new discs before you can start recording. The disc initialization screen will appear when a new DVD-RW is first inserted if the switch is set to . The disc initialization screen will not appear when inserting a disc already initialized. In that case, you can start recording once the record pause indication appears.

Select ( ) the desired disc specification and press ( ). For a comparison between the [VIDEO] and [VR] specifications, see How to select a DVD disc (p. 6).

You will be asked to confirm the disc specification you selected. Select ( ) [YES] and press ( ) to continue, or select [NO] and press ( ) to return and select a different disc specification.

A confirmation message will appear on the screen. Select ( ) [YES] and press ( ) to start the disc initialization.
• The disc initialization will take approximately one minute. Avoid moving the camcorder while the operation is in progress.
• You can start recording movies once the record pause indication appears.

NOTES
The process of recognizing a disc may take a moment. The display will move while the disc is being read. Wait until the camcorder finishes recognizing the disc before you start recording.

Removing the Disc

1 Slide the disc cover fully in the direction of the arrow and gently open the disc cover completely until it stops.
• Do not subject the camcorder to strong impacts while the DISC access indicator is on or flashing.
• Retract the grip belt under the camcorder so it will not get in the way of the disc cover.
• It may take a moment after sliding the disc cover to open.

2 Grab the edge of the disc and gently pull it out.
Be careful not to touch the recording surface of the disc or the pickup lens.

3 Close the disc cover.

IMPORTANT
When you slide the cover after making a recording, important file allocation data is updated on the disc before the disc cover opens. While the DISC access indicator is on or flashing do not subject the camcorder to shocks such as forcefully laying it on a table.

Preparing the Camcorder

1 Turn on the camcorder.
2 Move the lens cover switch down to open the lens cover.
3 Adjust the viewfinder.
   Keep the LCD panel closed to use the viewfinder and adjust the diopter adjustment lever as necessary.
4 Fasten the grip belt.
   Adjust the grip belt so that you can reach the zoom lever with your index finger, and the start/stop button with your thumb.
Adjusting the LCD Screen

Rotating the LCD Panel

Open the LCD panel 90 degrees.
• You can rotate the panel 90 degrees downward.
• You can rotate the panel 180 degrees toward the lens (allowing the subject to monitor the LCD screen while you use the viewfinder). Rotating the panel 180 degrees is also useful if you wish to include yourself when recording with the self timer. This is the only case where you can use the viewfinder and the LCD screen simultaneously.

LCD Backlight

You can adjust the brightness of the LCD screen to one of two levels.

Keep \( \text{DISP} \) pressed down for more than 2 seconds. Repeat this action to toggle between the normal and bright settings.

NOTES

- This setting does not affect the brightness of the recording or the viewfinder screen.
- Using the bright setting will shorten the effective usage time of the battery.
Using the Menus

Many of the camcorder’s functions can be adjusted from the menus that open after pressing the FUNC. button (FUNC). For details about the available menu options and settings, refer to the Menu Options Lists (3 6).

Selecting a FUNC. Menu Option

1 Press (FUNC).
2 Select (▲▼) the icon of the function you want change from the left side column. Menu items not available will appear grayed out.
3 Select (◄►) the desired setting from the available options at the bottom bar.
   • The selected option will be highlighted in light blue. Menu items not available will appear grayed out.
   • With some settings, you will need to make further selections (▲▼) and/or press (◄►). Follow the additional operation guides that will appear on the screen (such as the SETUP icon, small arrows, etc.).
4 Press (FUNC) to save the settings and close the menu.
   You can press (FUNC) to close the menu at any time.

Selecting an Option from the Setup Menus

1 Press (FUNC).
   During the playback of a disc recorded in VIDEO mode, pressing (FUNC) will open directly the setup menus. Continue directly from step 3.
2 Select (▲▼) the icon and press (◄►) to open the setup menus.
   ▪ You can also hold (func) pressed down for more than 1 second to open directly the setup menus screen.
   ▪ Push the joystick (◄►) to return to the menu selection screen (step 3).
3 Select (▲▼) the desired menu from the left side column and press (◄►).
   The title of the selected menu appears on top of the screen and under it the list of settings.
4 Select (▲▼) the setting you want to change and press (◄►).
   The orange selection bar indicates the menu setting currently selected. Items not available appear in black.
5 Select (▲▼) the desired option and press (◄►) to save the setting.
6 Press (func). You can press (func) to close the menu at any time.
First Time Settings

Changing the Language

Options

[DEUTSCH] [ROMANA] [한국어]
[ENGLISH] [TÜRKÇE] [한국어]
[ESPANOL] [РУССКИЙ] [日本語]
[Français] [Українська] [한국어]
[ITALIANO] [العربية] [日本語]
[POLSKI] [فارسی]

* Default value

1 Press .
2 Select ( ) the icon and press ( ) to open the setup menus.
3 Select ( ) [DISPLAY SETUP] and press ( ).
4 Select ( ) [LANGUAGE ] and press ( ).
5 Select ( , ) the desired option and press ( ).
6 Press ( ) to close the menu.

NOTES

If you changed the language by mistake, follow the mark next to the menu item to change the setting.

The displays and that appear in some menu screens refer to the name of buttons on the camcorder and will not change, regardless of the language selected.

Changing the Time Zone

1 Press (FUNC.)
2 Select ( ) the icon and press ( ) to open the setup menus.
3 Select ( ) [DATE/TIME SETUP] and press ( ).
4 Select ( ) [T.ZONE/DST] and press ( ).
The time zone setting appears. The default setting is New York.
5 Select ( ) your time zone and press ( ). To adjust for daylight saving time, select the time zone with the mark next to the area.
6 Press ( ) to close the menu.

Time Zones

Once you have set the time zone, date and time, you do not need to reset the clock every time you travel to another time zone. Select the time zone referring to the date and time displayed on the screen.
Setting the Date and Time

1. Press (FUNC).  
2. Select (▲▼) the icon and press (▲▼) to open the setup menus.  
3. Select (▲▼) [DATE/TIME SETUP] and press (▲▼).  
4. Select (▲▼) [DATE/TIME] and press (▲▼).  
   The first field of the date will be displayed in orange and indicated with up/down arrows.  
5. Push the joystick (▲▼) to set the date and time and (▲▼) to move between the fields of the date and time.  
6. Press (▲▼) to start the clock.  
7. Press (FUNC) to close the menu.  

**IMPORTANT**  
- When you do not use the camcorder for about 3 months, the built-in rechargeable lithium battery may discharge completely and the date and time setting may be lost. In such case, recharge the built-in lithium battery (73) and set the time zone, date and time again.  
- You can also change the date format (42).
Recording

Shooting Video

Before You Begin Recording
Make a test recording first to check if the camcorder operates correctly. Since recordings made on a DVD-R or DVD-R DL disc cannot be deleted, we recommend you use a DVD-RW disc to make the test recordings.

1. Move the power switch to ON to set the camcorder in CAMERA mode. The red CAMERA indicator will turn on.
2. Move the lens cover switch down to open the lens cover.
3. Move the / switch to the (Movies) position.
4. Press Start/Stop to begin recording.
   - The recording starts: press Start/Stop again to pause the recording.
   - The DISC access indicator will flash while recording and will stay on briefly after pausing while the scene is recorded on the disc.

When you have finished recording
1. Make sure that the DISC access lamp is off.
2. Turn off the camcorder.
3. Close the lens cover and the LCD panel.
4. Remove the disc.

Important
Avoid the following actions while the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
- Do not subject the camcorder to vibrations or strong impacts.
- Do not open the disc cover and do not remove the disc.
- Do not disconnect the power source or turn off the camcorder.
- Do not change the operating mode.

Notes
- About the recording time: By changing the recording mode you can change the recording time available on the disc (36).
- When recording in bright places, it may be difficult to use the LCD screen. In such cases, use the viewfinder instead.
- When recording in very loud places (such as fireworks shows or concerts), sound may become distorted or it may not be recorded at the actual levels. This is not a malfunction.
- About the Power Save mode: To save power when the camcorder is powered by a battery pack, the camcorder will automatically shut off if left without any operations for 5 minutes (41). To restore the power, slide the power switch toward MODE and release it, or move the power switch to OFF and back to ON again.
- About the LCD and viewfinder screen: The screens are produced using extremely high-precision manufacturing techniques, with more than 99.99% of the pixels operating to specification. Less than 0.01% of the pixels may occasionally misfire or appear as black, red, blue or green dots. This has no effect on the recorded image and does not constitute a malfunction.

Before You Begin Recording
Make a test recording first to check if the camcorder operates correctly. Since recordings made on a DVD-R or DVD-R DL disc cannot be deleted, we recommend you use a DVD-RW disc to make the test recordings.

1. Move the power switch to ON to set the camcorder in CAMERA mode. The red CAMERA indicator will turn on.
2. Move the lens cover switch down to open the lens cover.
3. Move the / switch to the (Movies) position.
4. Press Start/Stop to begin recording.
   - The recording starts: press Start/Stop again to pause the recording.
   - The DISC access indicator will flash while recording and will stay on briefly after pausing while the scene is recorded on the disc.

When you have finished recording
1. Make sure that the DISC access lamp is off.
2. Turn off the camcorder.
3. Close the lens cover and the LCD panel.
4. Remove the disc.

Important
Avoid the following actions while the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
- Do not subject the camcorder to vibrations or strong impacts.
- Do not open the disc cover and do not remove the disc.
- Do not disconnect the power source or turn off the camcorder.
- Do not change the operating mode.

Notes
- About the recording time: By changing the recording mode you can change the recording time available on the disc (36).
- When recording in bright places, it may be difficult to use the LCD screen. In such cases, use the viewfinder instead.
- When recording in very loud places (such as fireworks shows or concerts), sound may become distorted or it may not be recorded at the actual levels. This is not a malfunction.
- About the Power Save mode: To save power when the camcorder is powered by a battery pack, the camcorder will automatically shut off if left without any operations for 5 minutes (41). To restore the power, slide the power switch toward MODE and release it, or move the power switch to OFF and back to ON again.
- About the LCD and viewfinder screen: The screens are produced using extremely high-precision manufacturing techniques, with more than 99.99% of the pixels operating to specification. Less than 0.01% of the pixels may occasionally misfire or appear as black, red, blue or green dots. This has no effect on the recorded image and does not constitute a malfunction.
When using a tripod: Do not leave the viewfinder exposed to direct sunlight as it may melt (due to concentration of the light by the lens). Do not use tripods with fastening screws longer than 5.5 mm (0.2 inch). Doing so may damage the camcorder.

When recording movies, try to get a calm, stable picture. Excessive camcorder movement while shooting and extensive use of fast zooms and panning can result in fidgety, jittery scenes. In extreme cases, the playback of such scenes may result in visually induced motion sickness. If you experience such a reaction, immediately stop the playback and take a rest break as necessary.

Reviewing the Last Scene Recorded

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick ( ) toward ( ).
   - If ( ) does not appear on the joystick guide, repeatedly push the joystick ( ) toward [NEXT] to display the joystick guide in the illustration above. When the mode switch is set to AUTO, only one joystick guide will appear.
   - The camcorder plays back the last scene (but without sound) and returns to record pause mode.
   - While reviewing the scene, select ( ) the icon and press ( ) to return to the recording mode.
   - If you are using a DVD-RW disc, you can also delete the scene immediately after recording it. Select ( ) the icon to delete the scene while reviewing it ( 55).

Selecting the Aspect Ratio of your Recordings (16:9 Widescreen or 4:3)

You can select the aspect ratio of your recording to match your TV. The camcorder uses the full width of the CCD providing high-resolution 16:9 recording.

POINTS TO CHECK

1. Press ( ).
2. Select ( ) the icon and press ( ) to open the setup menus.
3. Select ( ) [CAMERA SETUP] and press ( ).
4. Select ( ) [WIDESCREEN] and press ( ).
5. Select ( ) a setting option and press ( ).
6. Press ( ) to close the menu.

NOTES

- Since the displays on the camcorder have an aspect ratio of 16:9, recordings with a 4:3 aspect ratio will appear in the center of the screen with black sidebars.
- When recording in widescreen mode, with [IMG STAB] set to [OFF] ( 38), you can have a wider view angle.
- Playing back a widescreen recording: TV sets compatible with the Video ID-1 system will automatically switch to wide (16:9) mode. Otherwise, change the aspect ratio of the TV.
Recording manually. To play back on a TV with normal aspect ratio (4:3) change the [TV TYPE] setting accordingly (41).

**Taking Photos**

1. Move the power switch to ON to set the camcorder in CAMERA mode. The red CAMERA indicator will turn on.
2. Move the lens cover switch down to to open the lens cover.
3. Move the / switch to the (Still Images) position.
4. Press PHOTO halfway. Once the focus is automatically adjusted, will turn green and one or more AF frames will appear.
5. Press PHOTO fully. The DISC access indicator will flash as the still image is being recorded.

**IMPORTANT**

Avoid the following actions while the disc access display ( ) appears on screen, and when the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
- Do not subject the camcorder to vibrations or strong impacts.
- Do not open the disc cover and do not remove the disc.
- Do not disconnect the power source or turn off the camcorder.
- Do not change the position of the / switch or the operating mode.

**NOTES**

If the subject is not suitable for autofocus, turns yellow. Adjust the focus manually (46).
**Zooming**

**POINTS TO CHECK**

**CAMERA:** In addition to the optical zoom, the digital zoom is also available (12).

* **Optical zoom:** 35x
** Digital zoom:** 1,000x

* Only.

**35x Optical Zoom**

Move the zoom lever toward W to zoom out (wide-angle). Move it toward T to zoom in (telephoto).

You can also change the zoom speed (38). You can select one of three fixed zoom speeds or a variable speed that depends on how you operate the zoom lever. Press gently for a slow zoom; press harder for faster zooms.

**NOTES**

- When set to [VARIABLE], the zoom speed will be faster in the record pause mode.
- Keep at least 1 m (3.3 ft.) to the subject. At wide-angle, you can focus on a subject as close as 1 cm (0.39 in.).

**Quick Start Function**

Using the Quick Start function, you’ll never have to miss out on those great and fleeting opportunities to take a picture or record video. When you press [QUICK START] instead of turning off the camcorder, you can get it ready to start recording within approx. 1 second.

**POINTS TO CHECK**

**CAMERA:** You cannot enter the Quick-Start ready mode while recording.

   - The standby lamp goes on to signal that the camcorder is Quick-Start ready - “ready and waiting” to resume recording.
   - Sometimes the standby lamp will flash as the camcorder completes some preparations. The camcorder is Quick-Start ready when the lamp stops flashing and stays on.

2. When you wish to resume recording, press [QUICK START] again.
   - Within approx. 1 second, the camcorder is ready in record pause mode.
NOTES

When you wake up the camcorder from standby mode, the following settings will be changed automatically:
- Manual focus returns to automatic focus (AF).
- Manual exposure adjustment returns to automatic exposure.
- Zoom position returns to full wide angle W.
- In standby mode, the camcorder consumes only half the power used in record pause mode. Using this mode you can save energy when using a battery pack.
- The camcorder will shut off if left in the Quick-Start ready mode for 10 minutes, regardless of the [POWER SAVE] setting (41). You can select the length of time until shut-off with the [STANDBY OFF] setting (41).
- To restore the power if the camcorder shut off, slide the power switch toward MODE and release it, or move the power switch to [ ] and back to ON again.
- If you perform any of the following actions while in standby mode (while the standby lamp is on), the camcorder will return to record pause mode.
  - Open the disc compartment cover.
  - Slide the power switch toward MODE.
  - Change the position of the [ ] switch.

Playback

Playing Back the Video

1 Move the power switch to ON, then slide it down toward MODE and release it to set the camcorder in PLAY mode.

2 Move the [ ] switch to the [ ] (Movies) position.

3 Move ( ] the selection frame to the scene you want to play back.

4 Press [ ] or [ ] on the camcorder to move to the next/previous index page.

5 Press [ ] again to pause the playback.

6 Press [ ] to stop the playback and return to the scene index screen.

NOTES

- During the playback of a DVD-R DL (dual-layered) disc, you might notice a brief stop.
(approx. 1 second) at the point where the playback switches from Layer 1 to Layer 2.
• You can display the date and time of the recording and other camcorder data registered when the recording was made (51).

TO ADJUST THE VOLUME
The camcorder plays the sound with the built-in speaker. The sound will be muted when you close the LCD panel or connect the stereo video cable to the AV terminal.

During the playback of a scene:
1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick (△) toward ▼ or ▼ to adjust the volume.
   • To turn off the volume completely, keep pressing (▼) until the volume icon changes to ■.
   • You can press ( ) again to hide the joystick guide during playback.

SPECIAL PLAYBACK MODES
• Fast Playback
  During normal playback, press (►) or (◄) on the camcorder. Repeatedly press the button to increase the playback speed.
  Fast playback: 5x → 15x → 25x the normal speed.

• Slow Playback
  During playback pause, press (►) or (◄) on the camcorder. Repeatedly press the button to increase the playback speed.
  Slow playback: 1/16 → 1/8 → 1/4 the normal speed.

• Skipping Scenes
  During playback, push the joystick (►) to skip to the next scene. Push the joystick (◄) to skip to the beginning of the current scene. Push the joystick (◄) twice to skip to the previous scene.

Note that you do not have to display the joystick guide above to skip the scene.

NOTES
• There is no sound during special playback modes.
• During some special playback modes, you may notice some video problems (blocky video artifacts, banding, etc.) in the playback picture.
• Slow playback is not available with discs initialized in VIDEO mode.
• Depending on the recording, you might occasionally notice a brief stop of the picture or sound at the point where the scene changes.

Displaying the Photos

1. Move the power switch to ON, then slide it down toward MODE and release it to set the camcorder in PLAY mode.
   The green PLAY indicator will turn on.
2. Move the ( ) switch to the (Still images) position.
3. Use the joystick (►) to move between images.
IMPORTANT

- The following may not be displayed correctly.
  - Images not recorded with this camcorder.
  - Images edited on or uploaded from a computer.
  - Images whose file names have been changed.
- Avoid the following actions while the disc access display ( ) appears on screen, and when the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
  - Do not subject the camcorder to vibrations or strong impacts.
  - Do not open the disc cover and do not remove the disc.
  - Do not disconnect the power source or turn off the camcorder.
  - Do not change the position of the / switch or the operating mode.

Slideshow

1 Press .
2 Select ( ) [ SLIDESHOW] and press ( ).
3 Select ( ) [START] and press ( ) .
   - Images are played back one after another.
   - Press ( ) to stop the slideshow.

Index Screen

1 Move the zoom lever toward W.
   The still images index screen appears.
2 Select ( , ) an image.
   - Move the green selection frame to the image you want to view.
   - If you have a lot of still images, you may find it easier to browse entire index pages instead. Move the zoom lever toward W to extend the green selection frame to the whole page, and move ( or ) between index pages. Move the zoom lever toward T to return to moving between single images.
3 Move the zoom lever toward T.
   The index screen closes and the selected image is displayed.

Image Jump Function

You can also quickly locate a specific image without having to browse all of them one by one.

To run through the still images

Push the joystick ( ) or ( ) and hold it pressed down to run quickly through the still images.

To skip 10 or 100 still images

1 If the joystick guide does not appear on screen, press ( ) to display it.
2 Push the joystick ( ) toward .
3 Select ( ) [ JUMP 10 IMAGES] or [ JUMP 100 IMAGES].
4 Jump ( ) the number of images selected.
   Press ( ) to close the image jump screen and display the image. You can press ( ) again to hide the joystick guide.
Magnifying Photos during Playback

During playback, still images can be magnified up to 5 times.

1. Move the zoom lever toward T.
   - The image is magnified by 2 times and a frame appears indicating the position of the magnified area.
   - To further enlarge the image, move the zoom lever toward T. To reduce the magnification to less than 2 times, move the zoom lever toward W.
   - \( \Rightarrow \) will appear for images that cannot be enlarged.

2. Select the part of the image to be magnified with the joystick.
   - Move (\( \uparrow \cdot \downarrow \cdot \leftarrow \rightarrow \)) the frame to the part of the image you want to see enlarged.
   - To cancel the magnification, move the zoom lever toward W until the frame disappears.
Menu Options Lists

Menu items not available appear grayed out in the FUNC. menu or in black in the setup menus. For details about how to select an item, refer to Using the Menus (25).

**FUNC. Menu**

**Recording programs** (43)

- Mode switch: P
  - PROGRAM AE, SHUTTER-PRIO. AE
  - PORTRAIT, SPORTS, NIGHT, SNOW, BEACH, SUNSET, SPOTLIGHT

- Special scene recording programs:
  - [PORTRAIT], [SPORTS], [NIGHT] [SNOW], [BEACH], [SUNSET], [SPOTLIGHT]

**White balance** (47)

- Mode switch: P
  - AUTO, DAYLIGHT, TUNGSTEN, SET

**Image effect** (48)

- Mode switch: P
  - IMAGE EFFECT OFF, VIVID, NEUTRAL, SOFT SKIN DETAIL

**Digital effects** (52)

- Mode switch: P
  - D.EFFECT OFF, FADE-T, WIPE, BLK&WHT, SEPIA, ART, MOSAIC

**Recording mode**

<tr>
<td>DVD-R DL</td>
<td>60 min.</td>
</tr>
</tbody>
</table>

- Recording in LP mode gives you a longer recording time; however, depending on the condition of the disc (long usage, imperfections, etc.) the picture and sound recorded in LP mode may be distorted. We recommend using the XP or SP mode for important recordings.
- The camcorder uses a variable bit rate (VBR) when encoding the video data so the actual recording times will vary depending on the content of the scenes.
### Still image size/quality

**Size:**
- [L 1024x768], [S 640x480]

**Quality:**
- [SUPER FINE], [FINE], [NORMAL]

### ADD TO PLAYLIST

**Disc type:** VR mode
- [ALL SCENES], [ONE SCENE], [CANCEL]

Add a scene to the playlist. This option is available only from the original index screen.

### MOVE

**Disc type:** VR mode

Move a scene in the playlist. This option is available only from the playlist index screen.

### DIVIDE

**Disc type:** VR mode

Divide a scene.

### DELETE

**Disc type:** VR mode

Delete a scene.

### CONVERT TO SCENE

Convert a single still image into a 3-second Photomovie scene.

### SLIDESHOW

[CANCEL], [START]

### Setup Menus

#### CAMERA SETUP

- **CAMERA SETUP**

**Mode switch:**
- AUTO or P (only in the [PROGRAM AE] recording program)
- [ON], [OFF]

The camcorder automatically uses slow shutter speeds to obtain brighter recordings in places with insufficient lighting.
- The camcorder uses shutter speeds down to 1/30 (1/15 when recording still images).
- If a trailing afterimage appears, set the slow shutter to [OFF].
- If (camcorder shake warning) appears, we recommend stabilizing the camcorder, for example, by mounting it on a tripod.

### A.SL SHUTTER

#### A.SL SHUTTER
D.ZOOM

- [ON], [OFF], [105x], [1000x]

Determines the operation of the digital zoom.
- When activated, the camcorder will switch automatically to the digital zoom when you zoom in beyond the optical zoom range.
- With the digital zoom the image is digitally processed, so the image resolution will deteriorate the more you zoom in.
- About the color of the zoom indicator:

<table>
<thead>
<tr>
<th>Optical Zoom</th>
<th>Digital Zoom</th>
</tr>
</thead>
<tbody>
<tr>
<td>White</td>
<td>Light blue</td>
</tr>
<tr>
<td>35x</td>
<td>105x - 1050x</td>
</tr>
<tr>
<td>105x - 1000x</td>
<td></td>
</tr>
</tbody>
</table>

The digital zoom cannot be used with the [NIGHT] recording program.

ZOOM SPEED

- [VARIABLE], [SPEED 3], [SPEED 2], [SPEED 1]

- When set to [VARIABLE] the zoom speed depends on how you operate the zoom lever: Press lightly for a slow zoom; press harder for faster zooms.
- The fastest zoom speed can be achieved with [VARIABLE]. Among the fixed zoom speeds, [SPEED 3] is the fastest and [SPEED 1] the slowest.

IMG STAB

Mode switch: [ON], [OFF]

The image stabilizer compensates for camcorder shake even at full telephoto.
- The image stabilizer is designed to compensate for a normal degree of camcorder shake.
- The image stabilizer may not be effective when recording in dark places using the [NIGHT] recording program.
- The image stabilizer may not be effective when using a slow shutter speed with the [SHUTTER-PRIO. AE] recording program.
- The image stabilizer cannot be turned off when the mode switch is set to AUTO.
- We recommend setting the image stabilizer to [OFF] when using a tripod.

FOCUS PRI.

Mode switch: [ON: AIAF], [ON: CENTER], [OFF]

WIDESCREEN

Mode switch: [ON], [OFF]

SELF TIMER

Mode switch: [ON], [OFF]

WIND SCREEN

Mode switch: [AUTO], [OFF]

The camcorder automatically reduces the background sound of wind when recording outdoors.
The wind screen cannot be turned off when the mode switch is set to AUTO.

Some low-frequency sounds will be suppressed along with the sound of wind.

When recording in surroundings unaffected by wind or if you want to record low-frequency sounds, we recommend setting the wind screen to OFF.

**DISC OPERATIONS**

**DISC INFO**

Displays a screen where you can verify the details regarding the disc.

The disc information includes the disc title, the disc type (DVD-R, DVD-R DL or DVD-RW), the disc specification (VIDEO mode or VR mode), and icons that indicate if the disc is finalized (✓) or protected (◆).

**DISC INITIALIZE**

**DISPLAY SETUP**

**BRIGHTNESS**

Adjusts the brightness of the LCD screen.

- Use the joystick ( 
  ) to adjust the brightness to your preference.
- Changing the brightness of the LCD screen does not affect that of the viewfinder or the recordings.

**LCD MIRROR**

- [ **ON** ], [ **OFF** ]
  
  When the LCD panel is rotated 180 degrees to face the subject, most screen displays will disappear and the image displayed will be as if the subject was looking at a mirror.

**TV SCREEN**

- [ **ON** ], [ **OFF** ]
  
  When set to [ **ON** ], the camcorder’s on-screen displays will appear also on the screen of a connected TV or monitor.

**DATA CODE**

- [ DATE ], [ **TIME** ], [ DATE & TIME ],
- [ CAMERA DATA ]

**MARKERS**

- [ LEVEL(WHT)], [ LEVEL(GRY)], [ GRID(WHT)], [ GRID(GRY)]
  
  You can display a grid or a horizontal line at the center of the screen. The markers are available in white or gray. Use the markers as a reference to make sure your subject is framed correctly (vertically and/or horizontally).
- Using the markers will not affect the recordings on the disc or memory card.

**LANGUAGE**

- [ DEUTSCH ], [ ENGLISH ], [ ESPAÑOL ], [ FRANÇAIS ], [ ITALIANO ], [ POLSKI ], [ ROMÂNĂ ], [ TÜRKÇE ], [ РУССКИЙ ], [ UKRAINIAN ], [ ARABIC ], [ اَرْبَعِيَة ], [ فارسی ], [ پارسی ], [ 日本語 ]
**SYSTEM SETUP**

**VOLUME**

- [HIGH VOLUME]
- [LOW VOLUME]
- [OFF]

A beep will accompany some operations like turning on the camcorder, the self-timer countdown, etc. It also serves as a warning beep under unusual conditions.

**BEEP**

- [HIGH VOLUME]
- [LOW VOLUME]
- [OFF]

**POWER SAVE**

- [ON]
- [OFF]

In order to save power when the camcorder is powered by a battery pack, it will automatically shut off if left without any operation for 5 minutes.

- Approximately 30 seconds before the camcorder shuts off, the message "AUTO POWER OFF" will appear.
- In Quick-Start ready mode, the camcorder will shut off after the time selected for the [STANDBY OFF] setting.

**STANDBY OFF**

- [10 min]
- [20 min]
- [30 min]

Select the length of time after which the camcorder will end the Quick-Start ready mode and shut off automatically.

**FILE NOS.**

- [RESET]
- [CONTINUOUS]

Select the image numbering method to be used on a new disc.

Images are automatically assigned consecutive image numbers from 0101 to 9900, and stored in folders containing up to 100 images. Folders are numbered from 101 to 998.

- [RESET]: Image numbers will restart from 101-0101 every time you insert a new disc.
- [CONTINUOUS]: Image numbers will continue from the number following that of the last image recorded with the camcorder.

- If the disc you insert already contains an image with a larger number, a new image will be assigned a number one higher than that of the last image on the disc.

We recommend using the [CONTINUOUS] setting.

**TV TYPE**

- [NORMAL TV]
- [WIDE TV]

In order to display the picture in full and in the correct aspect ratio, select the setting according to the type of television to which you will connect the camcorder.

- [NORMAL TV]: TV sets with 4:3 aspect ratio.
- [WIDE TV]: TV sets with 16:9 aspect ratio.

When the TV type is set to [NORMAL TV], if you play back a recording made in widescreen (16:9) the picture displayed on the LCD screen will be smaller than the full display area.
You can verify the current version of the camcorder's firmware. This menu option is usually grayed out.

**FIRMWARE**

**DATE/TIME SETUP**

- **T.ZONE/DST** (Page 26)
- **DATE/TIME** (Page 27)

**DATE FORMAT**

- **Y.M.D** (2007.1.1 AM 12:00)
- **M.D.Y** (JAN. 1, 2007 12:00 AM)
- **D.M.Y** (1.JAN.2007 12:00 AM)

Changes the date format for on-screen displays.
**Using the Recording Programs**

**AUTO**
The camcorder adjusts the focus, exposure and other settings automatically, allowing you to just point and shoot.

<table>
<thead>
<tr>
<th>Flexible Recording Programs</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PROGRAM AE</strong> (44)</td>
</tr>
<tr>
<td><strong>SHUTTER-PRIO. AE</strong> (44)</td>
</tr>
</tbody>
</table>

**Special Scene Recording Programs:**

- **PORTRAIT**
The camcorder uses a large aperture, achieving a focus on the subject while blurring other distracting details.

- **SNOW**
Use this mode to record in bright ski resorts. It prevents the subject from being underexposed.

- **SPOTLIGHT**
Use this mode to record spotlit scenes.

- **SPORTS**
Use this mode to record sports scenes such as tennis or golf.

- **BEACH**
Use this mode to record on a sunny beach. It prevents the subject from being underexposed.

- **FIREWORKS**
Use this mode to record fireworks.

- **NIGHT**
Use this mode to record in dimly lit places.

- **SUNSET**
Use this mode to record sunsets in vibrant colors.
Flexible Recording: Changing the Aperture and Shutter Speed

Use the automatic exposure (AE) program or give priority to the exposure value or the shutter speed.

POINTS TO CHECK

Mode switch: P

Options

PROGRAM AE

The camcorder automatically adjusts the aperture and shutter speed to obtain the optimal exposure for the subject.

SHUTTER-PRIO.AE

Set the shutter speed value. The camcorder automatically sets the appropriate aperture value. Use a high shutter speed to record fast moving subjects or a slow shutter speed to add a certain motion blur, emphasizing the feel of movement.

TO SET THE SHUTTER SPEED OR APERTURE VALUE

When you select [SHUTTER-PRIO.AE], a numeric value will appear next to the recording program icon.

1 If the joystick guide appears on the screen, press ( ) to hide it.

When the numeric value can be adjusted, small arrows will appear next to the number.

2 Adjust ( ) the numeric value (shutter speed or aperture value).

The number displayed will flash if the shutter speed is not appropriate for the recording conditions. In such case, select a different value.

NOTES

- Do not change the position of the mode switch while recording, as the brightness of the image may change abruptly.
- [SHUTTER-PRIO.AE]
  - If you use a slow shutter speed in dark places, you can obtain a brighter image, but the image quality may be lower, and the autofocus may not work well.
  - The image may flicker when recording with high shutter speeds.
  - Recording movies under fluorescent lights: If the screen starts to flicker, select [SHUTTER-PRIO.AE] and set the shutter speed to 1/100.
Shutter speed guidelines

For recording subjects in dark places.

- 1/8, 1/15, 1/30
- 1/2, 1/4, 1/8, 1/15, 1/30

For general recordings.

- 1/60
- 1/100

For recording indoor sports scenes.

- 1/250, 1/500, 1/1000
- 1/250, 1/500

For recording from within a car or train, or for recording moving subjects such as roller coasters.

- 1/2000

For recording outdoor sports such as golf or tennis on sunny days.

- 1/60

Note that on screen only the denominator is displayed – “Tv 250” indicates a shutter speed of 1/250 second, etc.

Special Scene: Recording Programs to Match Special Conditions

Recording in a very bright ski resort or capturing the full colors of a sunset or a fireworks display becomes as easy as selecting a special scene recording program.

POINTS TO CHECK

Mode switch: P

FUNC. (12)

(1) NOTES

- Do not change the position of the mode switch while recording, as the brightness of the image may change abruptly.
- [PORTRAIT]/[SPORTS]/[BEACH]/[SNOW]
  - The picture may not appear smooth during playback.
- [PORTRAIT]
  - The blur effect of the background increases the more you zoom in (T).
- [SPORTS]
  - Moving subjects may leave a trailing afterimage.
  - Picture quality may not be as good as in other modes.
  - White points may appear on the screen.
  - Autofocus may not work as well as in other modes. In such case, adjust the focus manually.
- [BEACH]/[SNOW]
  - The subject may become overexposed on cloudy days or in shaded places. Check the image on the screen.
- [FIREWORKS]
  - To avoid camcorder shake, we recommend using a tripod. Make sure to use a tripod especially in [SNOW], as the shutter speed slows down.
**Adjusting the Picture: Exposure, Focus and Color**

### Manual Exposure Adjustment

At times, backlit subjects may appear too dark (underexposed) or subjects under very strong lights may appear too bright or glaring (overexposed). To correct this, you can manually adjust the exposure.

**POINTS TO CHECK**

- **Mode switch:** P (except for the [FIREWORKS] recording program).

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick ( ) toward [EXP].
   - If [EXP] does not appear on the joystick guide, repeatedly push the joystick ( ) toward [NEXT] to display the joystick guide in the illustration above.
   - The exposure adjustment indicator and the neutral value “±0” appear on the screen.
   - If you operate the zoom during exposure lock, the brightness of the image may change.
3. Adjust ( ) the brightness of the image as required.
   - The adjustment range and the length of the exposure adjustment indicator will vary depending on the brightness of the picture at the time you locked the exposure.
   - Pushing the joystick ( ) toward [EXP] again will cancel the exposure lock and return the camcorder to automatic exposure.

### Manual Focus Adjustment

Autofocus may not work well on the following subjects. In such case, focus manually.

- Reflective surfaces
- Subjects with low contrast or without vertical lines
- Fast Moving Subjects
- Through wet windows
- Night Scenes

**POINTS TO CHECK**

1. Adjust the zoom before you start the procedure.
2. If the joystick guide does not appear on screen, press ( ) to display it.
3. Push the joystick ( ) toward [FOCUS].
   - If [FOCUS] does not appear on the joystick guide, repeatedly push the joystick ( ) toward [NEXT] to display the joystick guide in the illustration above.
   - “MF” appears.
3 Adjust (►) the focus as required until the image appears focused.
   • Push the joystick (►) toward ◢ for a farther focal distance or push it (▼) toward ◤ for a closer focal distance.
   • Pushing the joystick (▲) toward [FOCUS] again will return the camcorder to autofocus.

NOTES
   • The camcorder will automatically return to autofocus when you set the mode switch to AUTO.
   • Readjust the focus when you have turned off the camcorder.

Infinity Focus
Use this function when you wish to focus on faraway subjects such as mountains or fireworks.

POINTS TO CHECK
Adjust the zoom before you start the procedure.
Mode switch: P

1 If the joystick guide does not appear on screen, press ( ◄) to display it.
2 Keep the joystick pushed (▲) toward [FOCUS] for more than 2 seconds.
   • ◢ appears.
   • Pushing the joystick (▲) toward [FOCUS] again will return the camcorder to autofocus.

NOTES
If you operate the zoom or the joystick ( ◄►) during infinity focus, ◢ changes to "MF" and the camcorder returns to manual focusing mode.

White Balance
The white balance function helps you accurately reproduce colors under different lighting conditions so that white objects will always look truly white in your recordings.

POINTS TO CHECK
Mode switch: P
Options
 Default value

[ AUTO]*
Settings are automatically set by the camcorder. Use this setting for outdoor scenes.

[D AY LI GHT]
For recording outdoors on a bright day.

[T UNGSTEN]
For recording under tungsten and tungsten type (3-wavelength) fluorescent lighting.

[SET]
Use the custom white balance setting to make white subjects appear white under colored lighting.

FUNC.
Icon of the currently selected White Balance

FUNC. Desired option*
* When you select [ SET], do not press ( FUNC) and continue instead with the procedure below.
To Set the Custom White Balance

1. Point the camcorder at a white object, zoom in until it fills the whole screen and press ( ). When the adjustment is completed, ( ) stops flashing and stays on. The camcorder retains the custom setting even if you turn off the camcorder.

2. Press [FUNC] to save the setting and close the menu.

NOTES

- When you have set the custom white balance:
  - Depending on the light source, ( ) may keep flashing. The result will still be better than with [AUTO].
  - Reset the white balance when the lighting condition changes.
  - Turn off the digital zoom.
- The camcorder retains the custom white balance setting even if you turn it off.
- Custom white balance may provide better results in the following cases:
  - Changing lighting conditions
  - Close-ups
  - Subjects in a single color (sky, sea or forest)
  - Under mercury lamps and certain types of fluorescent lights

Image Effects

You can use the image effects to change the color saturation and contrast to record images with special color effects.

Still Image Recording Options

Selecting the Size and Quality of Still Images

Still images are recorded on the disc using the JPEG (Joint Photographic Experts Group) compression. As a general rule, select a larger image size for higher quality.

Options

Image size options vary depending on the model. The following table summarizes the approximate numbers of still images that can be recorded on different media by image size/quality.

<table>
<thead>
<tr>
<th>Disc Type/Disc Specification</th>
<th>DVD-R or DVD-RW</th>
<th>DVD-R DL</th>
<th>DVD-RW VR mode</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image Quality/Size</td>
<td>DVD mode</td>
<td>DVD mode</td>
<td>VR mode</td>
</tr>
<tr>
<td>L 1024x768/FINE</td>
<td>2,690</td>
<td>4,890</td>
<td>2,735</td>
</tr>
<tr>
<td>S 640x480</td>
<td>6,625</td>
<td>9,999</td>
<td>9,999</td>
</tr>
</tbody>
</table>

The number displayed on the right corner indicates the approximate number of images that can be recorded with the current quality/size setting.

* The number displayed on the right corner indicates the approximate number of images that can be recorded with the current quality/size setting.

* This is the number of images that can be recorded on the disc. However, the maximum number of remaining still images displayed on the screen will be 9999.
Still Image Recording Options

When the focus priority is activated, the camcorder records a still image only after the focus has been adjusted automatically.

**POINTS TO CHECK**

Mode switch at AUTO:
The focus priority cannot be turned off.
Mode switch at P:
You can turn off the focus priority and you can also select the AF (autofocus) frame to be used.

**Options**

* Default value

- **ON:AIAF**
  (Mode switch: P*, AUTO)
  Depending on the shooting conditions, one or more AF frames out of the nine frames available are automatically selected and the focus is fixed on them.

- **ON: CENTER**
  (Mode switch: P*)
  The focus is automatically fixed to the center AF frame. This is convenient for making sure the focus is exactly where you want it. In this mode, a single focusing frame appears in the center of the screen.

- **OFF**
  Select this option if you wish to record a still image as soon as you press PHOTO.

* Except for the [FIREWORKS] recording program.

**NOTES**

In the [FIREWORKS] recording program the focus priority is automatically set to [OFF].
Other Functions

On-Screen Displays
The camcorder keeps a data code containing the date and time and other camera data (shutter speed, exposure, etc.) registered at the time of recording. You can select the data to be displayed.

Turning the On-Screen Displays On/Off

Repeatedly press DISP. to turn the on-screen displays on/off in the following sequence:
- All displays on
- All displays off
- All displays on
- Data code only
- All displays off
- All displays on (including the histogram)
- Regular displays only
- All displays off

However, the level marker, the disc type icon and the , , and icons will still appear on the screen.

Options

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DATE] or [TIME]</td>
<td>Displays the date or time when the scene or still image was recorded.</td>
</tr>
<tr>
<td>[DATE &amp; TIME]</td>
<td>Displays both the date and time of the recording.</td>
</tr>
<tr>
<td>[CAMERA DATA]</td>
<td>Displays the aperture (f-stop) and shutter speed used when recording the image.</td>
</tr>
</tbody>
</table>

Selecting the Data Code
You can select the data code to be displayed when playing back movies.

Reading the Histogram Display
When viewing still images you can display the histogram and the icons of all the functions used at the time of recording. Use the histogram as a reference to verify the correct exposure of the still image. The area to the right of the histogram represents highlights and the left side represents shadows. A still image whose
Other Functions

histogram skews to the right is relatively bright; while one whose histogram peaks to the left, is relatively dark.

NOTES
The histogram will appear also while reviewing a still image immediately after recording it.

Self Timer

POINTS TO CHECK

CAME RA: Set the camcorder in record pause mode.

FUNC.: 

Func. MENU

CAMERA SETUP

SELF TIMER

Func. ON

appears.

CAME RA: Press [Start/Stop].
The camcorder starts recording after a 10-second countdown. The countdown appears on the screen.

CAME RA: Press [PHOTO], first halfway to activate the autofocus and then fully to record the still image.
The camcorder will record the still image after a 10-second countdown. The countdown appears on the screen.

NOTES
Once the countdown has begun, you can press [Start/Stop] (when recording movies) or press [PHOTO] fully (when recording still images) to cancel the self timer. The self timer will also be canceled if you turn off the camcorder.

Digital Effects

POINTS TO CHECK

CAME RA: Mode switch: P

CAMERA: [BLK&WHT], [SEPIA] only.

Options

* Default value

[ D.EFFECT OFF]*
Select this setting when you do not intend to use the digital effects.

[ FADE-T] (fade trigger), [ W I P E] Select one of the faders to begin or end a scene with a fade from or to a black screen.
NOTES

- When you apply a fader, not only the picture but also the sound will fade in or out. When you apply an effect, the sound will be recorded normally.
- The camcorder retains the setting last used even if you turn off the digital effects or change the recording program.

Setting

 Applying

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick ( ) toward X.
   - If ( ) does not appear on the joystick guide, repeatedly push the joystick ( ) toward [NEXT] to display the joystick guide in the illustration above.
   - The icon of the selected effect turns green.
   - Push the joystick ( ) toward ( ) again to deactivate the fader/effect.

TO FADE IN
Push the joystick ( ) toward ( ) in record pause mode ( ), then press (Start/Stop) to start recording with a fade in.

TO FADE OUT
Push the joystick ( ) toward ( ) while recording ( ), then press (Start/Stop) to fade out and pause the recording.

TO ACTIVATE AN EFFECT
Camera ( ): Push the joystick ( ) toward ( ) while recording or in record pause mode.
Camera ( ): Push the joystick ( ) toward ( ) and then press (PHOTO) to record the still image.

[BLK&WHT]
Records images in black and white.

[SEPIA]
Records images in sepia tones for an “old” look.

[ART], [MOSAIC]
Select one of the other digital effects to add flavor to your recordings.

* You can preview the effect on the screen.
** The icon of the selected effect appears.

Managing Scenes

Creating a Playlist
Create a playlist to easily edit your movies. Include in your playlist only the scenes you prefer or change the order in which they will be played back, without affecting your original recordings. After you add scenes to the playlist you will have two types of index screens:

- Original index screen (original recordings)
- Playlist index screen

POINTS TO CHECK
- Disc type: DVD-RW • VR mode

Adding Scenes to the Playlist
Options
- [ALL SCENES]: Adds all scenes in the original index screen to the playlist.
- [ONE SCENE]: Adds only the selected scene to the playlist.
- [CANCEL]: Returns to the original index screen.

From the original index screen, select (△, □) the scene to add to the playlist. To add all scenes, there is no need to select any particular scene.

FUNC. (25)

When the operation is completed “ADDED TO PLAYLIST” will be displayed. Press [PLAYLIST] to check the scenes in the playlist index screen.
Managing Scenes

Editing Functions

Moving Scenes in the Playlist
From the original index screen, press the ( ) button. From the playlist index screen, select ( ) the scene to move.

FUNC. ( )

Move ( ) the orange marker to the new position of the scene and press ( ).

YES

Deleting Scenes
You can delete those scenes that you are not interested in keeping. Remember that when you delete scenes in the playlist, you do not affect your original recordings; however, when you delete an original recording, it will be deleted also from the playlist.

IMPORTANT

- Be careful when deleting original recordings. Once deleted, an original scene cannot be recovered.
- Do not change the position of the power switch or the ( ) switch while the scene is being deleted.

NOTES

- Scenes cannot be deleted when the disc is protected ( ).
- You may not be able to delete scenes shorter than 5 seconds.

Deleting a Single Scene

POINTS TO CHECK

Disc type: DVD-RW • VR mode

From the original index screen, select ( ) the scene to delete. To delete a scene only in the playlist, press ( ) first, and then select the scene.

FUNC. ( )

DELETE

YES

Deleting a Scene Just After Recording

POINTS TO CHECK

Disc type: DVD-RW • VIDEO or VR mode

Immediately after recording a scene:

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick ( ) toward ( ). If ( ) does not appear on the joystick guide, repeatedly push the joystick ( ) toward [NEXT] to display the joystick guide in the illustration above. When the mode switch is set to AUTO, only one joystick guide will appear.
3. While reviewing the scene, select ( ) and press ( ).
4 Select ( ) [YES] and press ( ).

NOTES
You will not be able to delete the last scene if after the scene was recorded you changed the operating mode, turned off the camcorder or removed the disc.

Deleting All Scenes

POINTS TO CHECK

Disc type: DVD-RW • VR mode

To delete all the scenes from the original index screen, follow the procedure below. This will delete also the whole playlist. If you only want to delete all the scenes from the playlist (without affecting the original recordings), press [PLAYLIST] first and then continue as follows.

FUNC. ( )

* When you are deleting the playlist, this menu option will be replaced by [PLAYLIST ALL DEL].

Dividing a Scene

You can divide your recordings in order to leave only the best parts and later cut out the rest. Remember that when you divide scenes in the playlist, you do not affect your original recordings.

NOTES
Photomovie scenes (60) and very short scenes (1 second or less) cannot be divided.

POINTS TO CHECK

Disc type: DVD-RW • VR mode

From the original index screen, select ( ) the scene to divide. To divide a scene only in the playlist, press [PLAYLIST] first, and then select the scene.

FUNC. ( )

* You can use the following icons and the special playback modes (33) to bring the scene to a precise point.

Skip to the beginning of the current/next scene.

One frame reverse/advance.
Managing the Disc

Protecting the Disc

You can protect the whole disc to prevent the accidental erasure of important recordings. Follow the same procedure to remove the protection of a protected disc.

**IMPORTANT**
Initializing the disc (57) will permanently erase all recordings, even if the disc is protected.

**POINTS TO CHECK**
Disc type: DVD-RW • VR mode

**FUNC.** (25)

initialize the disc

You need to initialize a DVD-RW disc when first inserting it into the camcorder and you may have to initialize a disc if you get the message "UNABLE TO RECOGNIZE THE RECORDING MODE OF THE DISC". You can also choose to initialize the disc if you wish to erase all the recordings on the disc or in order to change the disc specification.

**IMPORTANT**
- Initializing the disc will permanently erase all recordings, even if the disc is protected. The lost original recordings cannot be recovered.
- Initialize all DVD-RW discs before using them with this camcorder.

**POINTS TO CHECK**
Disc type: DVD-RW • VIDEO or VR mode

**Options**

**[VIDEO] mode**
Most DVD players will play the disc, but except for the disc title, the recordings cannot be edited with the camcorder.

**[VR] mode**
You will have the option to edit the recordings with the camcorder, but the disc can only be played in VR mode-compatible DVD players and computer DVD drives.

**FUNC.** (25)
Managing the Disc

Before you finalize your disc*, you can give it a title. The disc title will be displayed on the index screen when playing the finalized disc in most DVD players.

* You can change the title of DVD-RW discs recorded in VR mode also after having finalized them.

Only when using a DVD-RW recorded in VR mode. With discs recorded in VIDEO mode, pressing [FUNC.] will open the menu directly on the setup menus screen.

Select one character at a time and press ( ) to add it to the title. Select [BACKSPACE] and press ( ) to delete the character to the left of the cursor's position.

* Close the menu only after the screen display returns to the [DISC OPERATIONS] menu.
### Managing Photos

#### Erasing Photos

You can erase still images recorded on the disc (DVD-RW only).

| IMPORTANT | Be careful when erasing images. Erased images cannot be recovered. |

| NOTES | Images on a protected disc cannot be erased. |

#### Erasing a Single Image

**POINTS TO CHECK**

| Disc type: | DVD-RW • VR mode |

1. If the joystick guide does not appear on screen, press ( ) to display it.
2. Push the joystick ( ) toward ( ).
3. Select ( ) [ERASE] and press ( ).

#### Erasing a Single Image Just After Recording

You can erase a still image just recorded, while reviewing it immediately after recording it.

| OFFICE | ( ) |

| POINTS TO CHECK | |

**Disc type:** DVD-RW • VIDEO or VR mode

While reviewing the image immediately after recording:

1. Push the joystick ( ) toward ( ).
2. Select ( ) [ERASE] and press ( ).

#### Erasing All Images

The following procedure will erase all the still images from the disc.

**POINTS TO CHECK**

| Disc type: | DVD-RW • VR mode |

**FUNC.**

1. Push the joystick ( ) toward ( ).
2. Select ( ) [ERASE] and press ( ).
3. Select ( ) [YES].

---

| POINTS TO CHECK | |

**Disc type:** DVD-RW • VR mode

**FUNC.**

1. Push the joystick ( ) toward ( ).
2. Select ( ) [ERASE] and press ( ).
3. Select ( ) [YES].

---

| POINTS TO CHECK | |

**Disc type:** DVD-RW • VR mode

**FUNC.**

1. Push the joystick ( ) toward ( ).
2. Select ( ) [ERASE] and press ( ).
3. Select ( ) [YES].
Managing Photos

Converting Photos into Photomovie Scenes
Still images are recorded using JPEG compression, but a DVD player only recognizes the MPEG standard. Thus, to play back your still images with your DVD player, first you need to create a Photomovie scene – a slide show of all still images on the disc, where each image will be displayed for approx. 3 seconds.

POINTS TO CHECK
We recommend setting [TV TYPE] to [NORMAL TV] (41) before creating the Photomovie scene.

Converting a Single Image
Select ( ) the still image you want to convert to a Photomovie scene.

FUNCTIONS
(25)

CONVERT TO SCENE
EXECUTE

NOTES
• If the disc becomes full while creating a Photomovie scene, the operation will be canceled.
• This function does not affect the original still images.
Playing Back the Disc on an External Device

To play the disc you recorded on a DVD player, a computer's DVD drive or other digital device, you need to finalize it first. You do not need to finalize the disc to play back your recordings with the camcorder connected to the TV. To view your still images on a DVD player you will need to convert them to Photomovie scenes beforehand (60).

**IMPORTANT**

- Be sure to finalize the disc in normal room temperatures. If the procedure was not completed correctly due to high temperature, let the camcorder cool off before resuming operation.
- Place the camcorder on a table or other stable surface before starting the procedure. Subjecting the camcorder even to slight impacts (for example to place it on a table or to disconnect the AV cable) after the finalization process started may result in permanent data loss.
- Always power the camcorder using the compact power adapter. The operation cannot be started if the camcorder is powered only with the battery pack.
- Avoid the following actions while the operation is in progress. Failing to do so can interrupt the process and result in permanent data loss.
  - Do not move the camcorder.
  - Do not disconnect the compact power adapter.
- Depending on the type of disc and the disc specification, after finalizing the disc you may not be able to initialize the disc, edit your recordings or add new recordings to the disc.
- Do not finalize with this camcorder discs that were not recorded using it.

**NOTES**

The time required to complete the operation will vary depending on the recording conditions and the remaining free space on the disc.

---

**Finalizing the Disc**

To play the disc you recorded on a DVD player, a computer's DVD drive or other digital device, you need to finalize it first. You do not need to finalize the disc to play back your recordings with the camcorder connected to the TV. To view your still images on a DVD player you will need to convert them to Photomovie scenes beforehand (60).

**IMPORTANT**

- Be sure to finalize the disc in normal room temperatures. If the procedure was not completed correctly due to high temperature, let the camcorder cool off before resuming operation.
- Place the camcorder on a table or other stable surface before starting the procedure. Subjecting the camcorder even to slight impacts (for example to place it on a table or to disconnect the AV cable) after the finalization process started may result in permanent data loss.
- Always power the camcorder using the compact power adapter. The operation cannot be started if the camcorder is powered only with the battery pack.
- Avoid the following actions while the operation is in progress. Failing to do so can interrupt the process and result in permanent data loss.
  - Do not move the camcorder.
  - Do not disconnect the compact power adapter.
- Depending on the type of disc and the disc specification, after finalizing the disc you may not be able to initialize the disc, edit your recordings or add new recordings to the disc.
- Do not finalize with this camcorder discs that were not recorded using it.

**NOTES**

The time required to complete the operation will vary depending on the recording conditions and the remaining free space on the disc.

* You will need to unfinalize the disc first.
Finalizing the Disc

The length of the finalization process depends on the scenes recorded and the remaining free space on the disc.

**POINTS TO CHECK**

Power the camcorder using the compact power adapter.

**FUNC.**

MENU*  
DISC OPERATIONS  
FINALIZE  
**YES**

* Only when using a DVD-RW recorded in VR mode. With discs recorded in VIDEO mode, pressing [FUNC.] will open the menu directly on the setup menus screen.

**DURING THE DISC FINALIZATION A PROGRESS BAR IS DISPLAYED. CLOSE THE MENU ONLY AFTER THE SCREEN DISPLAY RETURNS TO THE [DISC OPERATIONS] MENU.

Playing Back your Disc on a DVD Player or a Computer's DVD Drive

After finalizing the disc, you can play it on DVD players compatible with the type of disc you used (DVD-R, DVD-R DL or DVD-RW). You cannot play back discs that have not yet been finalized on an external DVD device.

For details about disc compatibility refer to the instruction manual of the DVD player or DVD drive.

**ON A DVD PLAYER**
1. Turn on the TV and DVD player.
2. Insert a finalized disc in the DVD player.
3. Select the scene you want to play from the index screen.

**ON A COMPUTER'S DVD DRIVE**
1. Insert a finalized disc in the DVD drive.
2. Run the DVD playback software.

- Refer also to the instruction manual and help modules of your DVD playback software.
- To view still images recorded on the disc, close first any DVD playback software that may be running.

**NOTES**

- DVD-RW discs recorded in VR mode can only be played on VR mode-compatible DVD players.
- Depending on your DVD device you may not be able to play the disc.
- The resolution of Photomovie scenes will be lower than that of the original still images.
- In order to play the disc on a computer you need to have DVD playback software installed and running. Also, in order to play back a DVD-R DL you must have a DVD drive capable of reading dual-layered DVD discs.
Unfinalizing the Disc - Additional Recordings on a Finalized Disc

Unfinalize a disc to allow recording additional movies on the disc even after it was finalized.

**IMPORTANT**
- Be sure to unfinalize the disc in normal room temperatures. If the procedure was not completed correctly due to high temperature, let the camcorder cool off before resuming operation.
- Place the camcorder on a table or other stable surface before starting the procedure. Subjecting the camcorder even to slight impacts (for example to place it on a table or to disconnect the AV cable) after the unfinalization process started may result in permanent data loss.
- Always power the camcorder using the compact power adapter. The operation cannot be started if the camcorder is powered only with the battery pack.
- Avoid the following actions while the operation is in progress. Failing to do so can interrupt the process and result in permanent data loss.
  - Do not move the camcorder.
  - Do not disconnect the compact power adapter.
- Only discs that were finalized using this camcorder can be unfinalized with it.

### Discs that Can be Unfinalized

STV-250N Stereo Video Cable (Supplied)
Connecting to a TV or VCR

Playback on a TV Screen

**POINTS TO CHECK**

Before connecting the camcorder, select the [TV TYPE] setting according to the TV set to which you will connect the camcorder - [WIDE TV]: TV sets with 16:9 aspect ratio or [NORMAL TV]: TV sets with 4:3 aspect ratio (141).

**Connecting**

Connect the camcorder to the TV following the connection diagram shown in the previous section Connection Diagrams (64).

**Playback**

1. Turn on the camcorder and the connected TV or VCR.
   On a TV: Select as the video input the same terminal to which you connected the camcorder. On a VCR: Set the input selector to the external video input (usually labeled LINE IN).
2. Start the playback of the movies (32) or still images (33).

**NOTES**

- Turn off all the devices before starting the connections.
- Sound from the built-in speaker will be muted while the STV-250N Stereo Video Cable is connected to the camcorder.
- We recommend powering the camcorder using the compact power adapter.

Recording to a VCR or Digital Video Recorder

You can copy your recordings by connecting the camcorder to a VCR or a digital video device.

**Connecting**

Connect the camcorder to the VCR following the connection diagram shown in the previous section Connection Diagrams (64).

**Recording**

1. **Connected device**: Load a blank cassette or disc and set the device to record pause mode.
2. This camcorder: Locate the scene you wish to copy and pause playback shortly before the scene.
3. This camcorder: Resume the movie playback.
4. Connected device: Begin recording when the scene you wish to copy appears. Stop recording when copying is complete.
5. This camcorder: Stop playback.

**NOTES**

- We recommend powering the camcorder using the compact power adapter.
- By default, the on-screen displays will be embedded in the output video signal, but you can change the displays by repeatedly pressing (12).

DISP.
Troubleshooting

If you have a problem with your camcorder, refer to this checklist. Consult your dealer or a Canon Service Center if the problem persists.

Do's and Don'ts

**Camcorder**
- Do not subject the camcorder to vibrations or strong impacts while the DISC access indicator is on or flashing. The data may not be correctly recorded on the disc, and the recording may be permanently lost.
- Do not subject the camcorder to vibrations or strong impacts while the DISC access indicator is on or flashing. The data may not be correctly recorded on the disc, and the recording may be permanently lost.
- Do not touch the pick up lens.
- Do not carry the camcorder by the LCD panel or the disc cover. Be careful when closing the LCD panel.
- Do not leave the camcorder in places subject to high temperatures (like the inside of a car under direct sunlight), or high humidity.
- Do not use the camcorder near strong electric or magnetic fields such as above TVs, near plasma TVs or mobile phones.
- Do not point the lens or viewfinder at strong light sources. Do not leave the camcorder pointed at a bright subject.
- Do not use or store the camcorder in dusty or sandy places. The camcorder is not waterproof – avoid also water, mud or salt. If any of the above should get into the camcorder it may damage the camcorder and/or the lens. Be sure to close the disc compartment cover after use.
- Be careful of heat generated by lighting equipment.
- Do not disassemble the camcorder. If the camcorder does not function properly, consult qualified service personnel.
- Handle the camcorder with care. Do not subject the camcorder to shocks or vibration as this may cause damage.

**Battery Pack**

**DANGER!**
- Treat the battery pack with care.
  - Keep it away from fire (or it might explode).
  - Do not expose the battery pack to temperature higher than 60 °C (140 °F). Do not leave it near a heater or inside a car in hot weather.
  - Do not try to disassemble or modify it.
  - Do not drop or knock it.
  - Do not get it wet.

- Charged battery packs continue to discharge naturally. Therefore, charge them on the day of use, or the day before, to ensure a full charge.
- Contact of the battery terminals with metallic objects may cause a short circuit and damage the battery pack.
- Dirty terminals may cause a poor contact between the battery pack and the camcorder. Wipe the terminals with a soft cloth.
- Since storing a charged battery pack for a long time (about 1 year) can shorten its lifecycle or affect performance, we recommend to discharge the battery pack fully and to store it in a dry place at temperatures no higher than 30 °C (86 °F). If you do not use the battery pack for long periods, charge and discharge it fully at least once a year. If you have more than one battery pack, perform these precautions at the same time for all battery packs.
- Although the battery pack’s operating temperature range is from 0 °C to 40 °C (32 °F to 104 °F), the optimal range is from 10 °C to 30 °C (50 °F to 86 °F). At cold temperatures, performance will temporarily decline. Warm it in your pocket before use.
Do’s and Don’ts

Replace the battery pack if the usable time after full charge diminishes substantially at normal temperatures.

Mini DVD Disc
The recording surface of DVD discs is extremely delicate. If handled or stored in an incorrect manner, the camcorder may stop recognizing or may not be able to play back the disc. Be sure to observe the following precautions when storing/handling your discs.

- Always remove the disc from the camcorder after you finish recording.
- Do not store the camcorder with a disc left inside.
- Keep the disc clean of dust, dirt or smudges. Even very small smudges or particles of dust can lead to problems when recording or playing back the disc. Carefully inspect the recording surface of the disc before inserting it in the camcorder. If the disc gets dirty use a dry, soft lens-cleaning cloth to remove any fingerprints, dirt buildup or smudges from the disc surface. Clean the disc in a radial motion from its center outwards.
- Never use a chemically treated cloth or flammable solvents such as paint thinner to clean the disc.
- Do not bend, scratch or wet the disc and do not subject it to strong shocks.
- Do not attach any labels or stickers on the disc surfaces. The disc may not rotate in a stable manner and this may cause malfunctions.
- To protect the disc, return it to its case for storage.
- When writing on the label side of the disc, avoid hard tip pens. Use waterproof soft-tipped felt pens instead.
- Moving a disc rapidly between hot and cold temperatures may cause condensation to form on its surfaces. If condensation forms on the disc, put it aside until the water droplets have evaporated completely.
- Never expose the disc to direct sunlight and do not store it in places subject to high temperatures or high humidity.
- Always finalize a disc before inserting it into an external DVD device. Failing to do so can result in the loss of the recorded data.

Built-in Rechargeable Lithium Battery

The camcorder has a built-in rechargeable lithium battery to keep the date/time and other settings. The built-in lithium battery is recharged while you use the camcorder, however, it will become totally discharged if you do not use the camcorder for about 3 months.

To recharge the built-in lithium battery:
Connect the compact power adapter to the camcorder and leave it connected for 24 hours with the power switch set to "OFF".
Maintenance/Others

Storage

● If you do not intend to use the camcorder for a long time, store it in a place free of dust, in low humidity, and at temperatures not higher than 30 °C (86 °F).

Cleaning

Camcorder Body

● Use a soft, dry cloth to clean the camcorder body. Never use chemically treated cloth or volatile solvents such as paint thinner.

Pick Up Lens

● Remove any dust or dirt particles using a non-aerosol type blower brush. Never touch the pick up lens directly to clean it.

Lens and Viewfinder

● If the lens surface is dirty, the autofocus may not work properly.
● Remove any dust or dirt particles using a non-aerosol type blower brush.
● Use a clean, soft lens-cleaning cloth to gently wipe the lens or viewfinder. Never use tissue paper.

LCD Screen

● Clean the LCD screen using a clean, soft lens-cleaning cloth.
● Condensation may form on the surface of the screen when the temperature changes suddenly. Wipe it with a soft dry cloth.

Condensation

Moving the camcorder rapidly between hot and cold temperatures may cause condensation (water droplets) to form on its internal surfaces. Stop using the camcorder if condensation is detected. Continued use may damage the camcorder.

Condensation may form in the following cases:

When the camcorder is moved from an air-conditioned room to a warm, humid place

When the camcorder is moved from a cold place to a warm room

When the camcorder is left in a humid room

When a cold room is heated rapidly
To avoid condensation

- Do not expose the camcorder to sudden or extreme changes in temperature.
- Unload the disc, place the camcorder in an airtight plastic bag and let it adjust to temperature changes slowly before removing it from the bag.

When condensation is detected

- The camcorder automatically shuts off. If a disc is loaded, remove the disc immediately and leave the disc cover open. Leaving the disc in the camcorder may damage it.
- A disc cannot be loaded when condensation is detected.

Resuming use

- The precise time required for water droplets to evaporate will vary depending on the location and weather conditions. As a general rule, wait for 2 hours before resuming use of the camcorder.

Using the Camcorder Abroad

Power sources

You can use the compact power adapter to operate the camcorder and to charge battery packs in any country with power supply between 100 and 240 V AC, 50/60 Hz. Consult the Canon Service Center for information on plug adapters for overseas use.

Playback on a TV screen

You can only play back your recordings on TVs compatible with the NTSC system. The NTSC system is used in the following countries/areas:

- American Samoa, Antigua, Aruba, Bahamas, Barbados, Bermuda, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guam, Guatemala, Greenland, Haiti, Honduras, Jamaica, Japan, Korea, Mexico, Micronesia, Myanmar, Nicaragua, Panama, Peru, Philippines, Puerto Rico, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Taiwan, Trinidad and Tobago, USA, Venezuela, Virgin Islands.
System Diagram (Availability differs from area to area)
Optional Accessories

Call or visit your local retailer/dealer for genuine Canon video accessories. You can also obtain genuine accessories for your Canon camcorder by calling: 1-800-828-4040, Canon U.S.A. Information Center.

Use of genuine Canon accessories is recommended. This product is designed to achieve excellent performance when used with genuine Canon accessories. Canon shall not be liable for any damage to this product and/or accidents such as fire, etc., caused by the malfunction of non-genuine Canon accessories (e.g., a leakage and/or explosion of a battery pack). Please note that this warranty does not apply to repairs arising out of the malfunction of non-genuine Canon accessories, although you may request such repairs on a chargeable basis.

Battery Packs
When you need extra battery packs, select only the BP-208 battery pack.

CG-300 Battery Charger
Use the battery charger for charging the battery packs. It plugs directly into a power outlet without a cable.
Charging time: 105 min. The charging time varies according to the initial charging conditions.

Shoulder Strap
You can attach a shoulder strap for more security and portability. Pass the ends through the strap mount and adjust the length of the strap.
WS-20 Wrist Strap
Use this for extra additional protection for active shooting.

SC-2000 Soft Carrying Case
A handy camcorder bag with padded compartments and plenty of space for accessories.

This mark identifies genuine Canon video accessories. When you use Canon video equipment, we recommend Canon-brand accessories or products bearing the same mark.

## Specifications

### DC210

#### System
- **Disc Recording System**
  - Movies: DVD-VIDEO (VIDEO mode), DVD-VR (VR mode) only with 8 cm DVD-RW
  - Still Images: Exif 2.2 compliant with JPEG compression

- **Television System**
  - EIA standard (525 lines, 60 fields) NTSC color signal

- **Maximum Recording Time**
  - 1.4 GB single sided 8 cm mini DVD disc: XP: approx. 20 min., SP: approx. 30 min., LP: approx. 60 min.
  - 2.6 GB single sided dual-layered 8 cm mini DVD disc: XP: approx. 36 min., SP: approx. 54 min., LP: approx. 108 min.

- **Image Sensor**
  - 1/6-inch CCD, approx. 680,000 pixels
  - Effective pixels:
    - 16:9 Movies (Image stabilizer [ON]): approx. 360,000 pixels
    - 16:9 Movies (Image stabilizer [OFF]): approx. 450,000 pixels
    - 4:3 Movies: approx. 340,000 pixels
    - Still Images: approx. 450,000 pixels

- **LCD Screen**
  - 2.7 in., wide, TFT color, approx. 123,000 pixels

- **Microphone**
  - Stereo electret condenser microphone

- **Lens**
  - f=2.6-91 mm, F/2.0-5.0, 35x power zoom
  - 35 mm equivalent:
    - 16:9 Movies (Image stabilizer [ON]): 45.8 - 1,603 mm
    - 16:9 Movies (Image stabilizer [OFF]): 41.0 - 1,435 mm
    - 4:3 Movies: 49.8 - 1,743 mm
    - Still Images: 43.6 - 1,526 mm

- **AF system**
  - TTL autofocus, manual focusing possible

- **Minimum Focusing Distance**
  - 1 m (3.3 ft.); 1 cm (0.39 in.) on maximum wide angle

- **White Balance**
  - Auto white balance, custom white balance and preset white balance settings: DAYLIGHT, TUNGSTEN

- **Minimum Illumination**
  - 1.3 lx (PROGRAM) recording program, Shutter speed at 1/8
  - 5 lx (Auto mode, Auto slow shutter [ON], Shutter speed at 1/30)

- **Recommended Illumination**
  - More than 100 lx

- **Image Stabilization**
  - Electronic

- **Size of Still Images**
  - 1024 x 768, 640 x 480 pixels

- **Image Compression Method**
  - JPEG (compression: Super Fine, Fine, Normal)

#### Output Terminals
- **AV Terminal**
  - 1 Vp-p / 75 ohms unbalanced
  - Audio: –10 dBV (47 kohm load) / 3 kohms or less

U.S.A.

CANON CONSUMER DIGITAL VIDEO EQUIPMENT LIMITED WARRANTY
FOR THE UNITED STATES

The warranty set forth below is given by Canon U.S.A., Inc. with respect to equipment purchased in the United States. The limited warranty is only effective upon presentation of your Bill of Sale or other proof of purchase. Canon consumer digital video equipment is warranted under normal, non-commercial, personal use, against defective materials or workmanship as follows:

Parts: Defective parts will be exchanged for new parts or comparably rebuilt parts for a period of ONE YEAR from the date of original purchase, except for a defective Video Head, which will be exchanged for a period of three months from the date of purchase.
Labor: For a period of ONE YEAR from the date of original purchase, labor will be provided free of charge by our factory service centers or designated service facilities located in the United States.

When returning equipment under this warranty, you must pre-pay the shipping charges, and you must enclose the Bill of Sale or other proof of purchase with a complete explanation of the problem. During your ONE-YEAR warranty period, repairs will be made and the equipment return-shipped to you free of charge. After your warranty period is over, you will be given an estimate of the cost of repair and an opportunity to approve or disapprove of the repair expense before it is incurred. If you approve, repairs will be made and the equipment return-shipped to you. (shipping charges apply). If you disapprove, we will return-ship the equipment at no charge to you.

Non-Canon brand peripheral equipment and software which may be distributed with Canon DVD camcorders are sold “AS IS” without warranty of any kind by CUSA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

CUSA shall have no responsibility under this limited warranty for use of Canon DVD Camcorders in conjunction with incompatible peripheral equipment and incompatiable software.

This Limited Warranty covers all defects encountered in normal use of the equipment and does not apply in the following cases:
A) Loss or damage to the equipment due to abuse, mishandling, accident, improper maintenance, or failure to follow operating instructions;
B) If the equipment is defective as a result of leaking batteries, sand, dirt or water damage;
C) If defects or damages are caused by the use of unauthorized parts or by service other than our authorized agent;
D) If the equipment is used for commercial or industrial use.

This Limited Warranty does not cover cabinet (exterior finish), DVD discs, nor does it apply to equipment purchased outside the United States. This warranty does not cover units sold to rental firms, military outfits, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. These uses are covered only by a specific warranty as Canon may issue with such sales.

Non-Canon brand peripheral equipment and software which may be distributed with Canon DVD camcorders are sold “AS IS” without warranty of any kind by CUSA, including any implied warranty of merchantability or fitness for a particular purpose. The sole warranty with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

Please retain this warranty card and your Bill of Sale as a permanent record of your purchase. This card is most important in order to be sure you are contacted right away should there be a safety inspection, modification or product recall under applicable laws or regulations.

NO IMPLIED WARRANTY INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE APPLIES TO THE EQUIPMENT AFTER THE APPLICABLE PERIOD OF EXPRESS WARRANTY OR GUARANTY, EXCEPT AS MENTIONED ABOVE. GIVEN BY ANY PERSON, FIRM OR CORPORATION WITH RESPECT TO THIS EQUIPMENT SHALL BIND THE UNDERSIGNING. (SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS. SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU). CUSA SHALL NOT BE LIABLE FOR LOSS OF REVENUES OR PROFITS, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE OR INABILITY TO USE THE DVD CAMCORDER REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF CUSA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CUSA BE GREATER THAN THE PURCHASE PRICE OF THE DV CAMCORDER SOLD BY CUSA AND CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF USE, MISUSE OR INABILITY TO USE THE DV CAMCORDER NOT CAUSED DIRECTLY BY THE NEGLIGENCE OF CUSA. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU). THIS WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE DVD CAMCORDER OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

CANON U.S.A., INC.
CANON CONSUMER DIGITAL VIDEO EQUIPMENT LIMITED WARRANTY

The limited warranty set forth below is given by Canon Canada Inc. (“Canon Canada”) with respect to Canon DVD equipment purchased in Canada. This limited warranty is only effective upon presentation of a bill of sale or other proof of purchase for this Canon digital video equipment to a Canon Service Facility when repairs are required.

Canon consumer video digital equipment is warranted under normal, non-commercial, personal use, against defective materials or workmanship as follows:

Parts: Defective parts will be exchanged for new parts or, at Canon Canada’s option, comparable rebuilt parts for a period of one year from the date of original purchase, except Video Heads which will be exchanged for a period of 3 months from the date of purchase.

Labour: For a period of one year from the date of original purchase, labour will be provided free of charge by our Canon Service Facilities in Canada.

This limited warranty covers all defects except where:

(a) The loss or damage to the product results from:
   i) accident, natural disaster, mishandling, abuse, neglect, unauthorized product modification or failure to follow instructions contained in the instruction manual;
   ii) the use of accessories, attachments, products, supplies, parts or devices with this Canon product that do not conform to Canon specifications or that cause abnormally frequent service problems;
   iii) repairs or services performed by any party other than a Canon Service Facility;
   iv) defective batteries or any exposure to water, sand or dirt;
   v) shipping (claim must be presented to the shipper);
(b) Any serial number on the video equipment is altered or removed.
(c) The digital video equipment is used for commercial, professional or industrial purposes.

This limited warranty does not cover the cabinet (exterior finish) of the DVD equipment, DVD discs, nor does it apply to DVD equipment purchased outside Canada.

TO OBTAIN WARRANTY SERVICE

Ship your Canon digital video equipment in its original carton, box or equivalent, properly packed, fully insured with shipping charges prepaid, together with a copy of your bill of sale or other proof of purchase and a description of the problem to any of the Canon Service Facilities in Canada.

LIMITATIONS

Except as otherwise required by applicable legislation, this warranty is in lieu of all other warranties, conditions, guarantees or representations, express or implied, statutory or otherwise, relative to this Canon product, including implied warranties of merchantability or fitness for a particular purpose.

Canon Canada assumes no liability for special, consequential or incidental damages or loss that may arise, whether on account of negligence or otherwise, from the use, misuse or inability to use this Canon product (including loss of profit, revenue, discs or enjoyment of) or from failure to conform to any express or implied warranties, conditions, guarantees or representations. Any recovery under this limited warranty shall not exceed the purchase price of the product. Canon Canada does not assume or authorize any other person to assume for Canon Canada any other liability with respect to this Canon product.

This warranty does not extend to any person other than the original purchaser of this Canon product or the person for whom it was purchased as a gift and stands your exclusive remedy.

NOTICE TO CONSUMER

If you plan to take important videos or if the product has not been used for some time, please check all functions with the instruction book before using it.
