Quick Start Guide

1 Insert the battery.

2 Insert a card.

3 Attach the lens.
Align the lens's white or red mount index with the camera's mount index of the same color.

4 Set the lens focus mode switch to <AF>.

5 Set the power switch to <ON>, then set the Mode Dial to <A⁺> (Scene Intelligent Auto).

**6** Flip out the LCD monitor.

7 Focus on the subject.
Aim the viewfinder center over the subject and press the shutter button halfway to autofocus.

8 Take the picture.
Press the shutter button completely to take the picture.

9 Review the picture.
The captured image will be displayed for 2 sec. on the LCD monitor.

● The ☆ on the right of the function indicates that the function is available only in Creative Zone modes.
● **Number of Possible Shots (Viewfinder Shooting)**

Temperature	No Flash	50% Flash Use
At 23°C / 73°F	Approx. 550 shots	Approx. 440 shots

## ⚡ Using the Built-in Flash

Basic Zone Modes

If necessary, the built-in flash will be automatically raised and fired in low-light or backlit conditions (with certain shooting modes).

Creative Zone Modes

- Press the <⚡> button to raise the built-in flash, then shoot.
Creative Zone Modes

You can change the camera settings as desired to shoot in various ways.

* Set the <LOCK▶> switch (Multi function lock released) to the left.

P: Program AE

- Set the Mode Dial to <P>.
- The camera automatically sets the shutter speed and aperture in the same way as the <A⁺> mode.

### Tv: Shutter-priority AE

- Set the Mode Dial to <Tv>.
- Turn the <✨> dial to set the desired shutter speed, then focus on the subject.
- The aperture will be set automatically.
- If the aperture display blinks, turn the <✨> dial until it stops blinking.

### Av: Aperture-priority AE
- Set the Mode Dial to <Av>.
- Turn the <✨> dial to set the desired aperture, then focus on the subject.
- The shutter speed will be set automatically.
- If the shutter speed display blinks, turn the <✨> dial until it stops blinking.

## ISO: ISO Speed ☆
- Press the <ISO> button, turn the <✨> or <○> dial.
- When "A" is selected, the ISO speed is set automatically. When you press the shutter button halfway, the ISO speed setting is displayed.
🖳 Drive Mode

- Press the <◀ ⚙ ◷ 🖳> button, press the <◀> <▶> keys to select the drive mode, then press <SET>.

- □ : **Single shooting**
- 🖳 : **Continuous shooting**
- □ˢ : **Silent single shooting**
- 🖳ˢ : **Silent continuous shooting**
- ⚙◷ : **10-sec. self-timer/remote control**
- ◷₂ : **Self-timer: 2 sec.**
- ◷c : **Self-timer: Continuous**
AF: AF Operation ☆

- Set the lens focus mode switch to <AF>.
- Press the <▶ AF> button, press the <◀> <▶> keys to select the AF operation, then press <SET>.

ONE SHOT (One-Shot AF): For still subjects
AI FOCUS (AI Focus AF): Switches the AF operation automatically
AI SERVO (AI Servo AF): For moving subjects

## ⊞ AF Point Selection ☆

- Press the <⊞> or <⊞> button.

- You can shift the AF point horizontally by turning the <✨> dial, and vertically by turning the <○> dial. If you press <SET> straight down, the center AF point (or center zone) will be selected.
⊞ AF Area Selection Mode ☆

- Press the <⊞> or <⊞> button.
- Look through the viewfinder and press the <⊞> button.
- Each time you press the <⊞> button, the AF area selection mode changes.

▣ Live View Shooting

- Press the <▶> button to display the Live View image.

- Press the shutter button halfway to focus, then press it completely to take the picture.

Number of Possible Shots (Live View Shooting)

| Temperature	No Flash	50% Flash Use
At 23°C / 73°F	Approx. 200 shots	Approx. 180 shots

🎥 Movie Shooting (Autoexposure)

- Set the power switch to <🎥>.
- Set the Mode Dial to any shooting mode except <M>.

- Press the <🎥> button to start shooting a movie.
- To stop movie shooting, press the <🎥> button again.

Recording movie

Built-in microphones

- When the shooting mode is <M>, you can shoot movies with manual exposure.
- You can set movie shooting settings with the menu options under the [🎥 1] or [🎥 2] tab.
