This Quick Start Guide describes some of the features of your printer and how to use them. For more information, view the Pro9000 User’s Guide, Printer Driver Guide, Photo Application Guide, and Digital Photo Printing Guide installed on your computer, or use the online help within your printer driver interface:

**Windows**

While in the printer’s properties window, press the F1 key, or click in the upper right corner. Then click the feature you want to know more about, or click the Help button when displayed.

**Macintosh**

While in the Page Setup dialog box or Print dialog box, click in the lower left corner. Clicking provides detailed information about each setting. When the Help window appears, select your desired topic.

### Turning on the Printer

1. Press the POWER button.

   The POWER lamp flashes green while the printer warms up and changes to steady (non-flashing) when the printer is ready.

   ![Power button image]

   **Important** If the ALARM lamp begins flashing orange, refer to “Handling Error Messages” on page 73.
Turning off the Printer

1. To turn off the printer, press the POWER button. When the POWER lamp stops blinking, the printer is turned off.

- Important: **About the Power Plug**
  When removing the power plug after turning off the printer, be sure to check that the POWER lamp is not lit. If the power plug is removed from the wall outlet with the POWER lamp lit or blinking green, the printer cannot protect its print heads and may be unable to print.
Basic Printing

Loading Paper

This section describes how to load paper in the Auto Sheet Feeder and the Front Tray.

- **Using the Auto Sheet Feeder and the Front Tray**
  You can load paper in both the Auto Sheet Feeder and the Front Tray.
  Loading paper in the Auto Sheet Feeder is easy, and is convenient if you frequently switch to and print on various sizes or types of paper.
  Use the Front Tray to print on large size paper or to print on thick paper such as art paper.
  * There are some kinds of paper, depending on their size or type, that can only be used in either the Auto Sheet Feeder or the Front Tray.
  See “Using Specialty Media” on page 15.

- **Print Media to Avoid**
  Do not use the following types of paper. Using such paper will not only produce unsatisfactory results, but can also cause the printer to jam or malfunction.
  • Folded, curled or wrinkled paper
  • Damp paper
  • Excessively thin paper
    Auto Sheet Feeder: Less than 64 gsm / 17 lb
    Front Tray: Less than 0.1 mm / 4 mil
  • Excessively thick paper
    Auto Sheet Feeder: More than 105 gsm / 28 lb (plain paper except for supported Canon genuine media)
    Front Tray: More than 1.2 mm / 47 mil
  • Picture postcards
  • Postcards affixed with photos or stickers
  • Envelopes with double flaps
  • Envelopes with sticker flaps
  • Envelopes with an embossed or treated surface
  • Any type of paper with holes
  • Paper that is not rectangular
  • Paper bound with staples or glue etc.
  • Paper coated with adhesive
  • Paper decorated with glitter etc.
Loading Paper in the Auto Sheet Feeder

**Note** For detailed information on the Canon genuine media for use with its various printers, refer to “Using Specialty Media” on page 15, or “Printing Media” in the *User’s Guide.*

1 Flatten the four corners of the paper before loading it.

**Note** • When paper is curled, gently bend it in the opposite direction of the curl (without curling the reverse side) and then load the paper. For details on how to flatten paper curl, refer to “Media is curled” on page 68.

• To prevent paper from being curled, we recommend handling it in the following ways:
  - Put unused paper back into the package, and store them horizontally.
  - Remove only as many sheets from the package as you need right before printing.

2 Prepare to load paper.

(1) 1 Open the Paper Support.  
2 Open the Paper Support Extension to support the paper.

(2) 1 Gently press the ⬤ ⬤ ⬤ mark on the Front Tray.  
2 Pull out the Front Tray Extension completely.

(3) Ensure that the FRONT FEED button is not lit.  
If the FRONT FEED button is lit or flashing, set the Front Tray to its normal printing position.  
See “Returning the Front Tray to Its Normal Printing Position” on page 14.
3 Load the paper.

**Load Limit Mark**
Do not load beyond this Load Limit Mark.

1. Load the paper into the Auto Sheet Feeder with the print side facing UP.
2. Align the paper stack with the right edge of the Auto Sheet Feeder.
3. Pinch the Paper Guide and slide it against the left side of the paper stack.

**Important** Set the Paper Guide correctly when printing from the Auto Sheet Feeder. The paper may not feed correctly if the Paper Guide is not set correctly.

**Note**
- The following paper can be used in the Auto Sheet Feeder.
  **Paper Size**
  Standard paper: From 4" x 6" / 101.6 x 152.4 mm to A3+ (13" x 19") size (329.0 x 483.0 mm / 13 x 19 inches)
  Non-standard paper: From 89.0 x 120.0 mm / 3.50 x 4.72 inches to 329.0 x 584.2 mm / 12.95 x 23 inches
  **Weight**
  From 64 gsm / 17 lb to 105 gsm / 28 lb (plain paper except for supported Canon genuine media)
  *You can use art paper that is not produced by Canon that is up to 200 gsm / 53 lb.
  Do not use paper heavier than this (except for supported Canon genuine media), as it could jam in the printer.
- When printing on plain paper (64 gsm / 17 lb), load up to 150 sheets in the Auto Sheet Feeder.
  However, the paper may not feed correctly depending on the type of paper and the environment (high temperature / high humidity / low...
temperature / low humidity). If this happens, reduce the number of sheets of paper by about half (approximately 5 mm / 0.2 inches).

- When printing on art paper that is not produced by Canon that is up to 200 gsm / 53 lb, load one sheet at a time.
- When printing on plain paper, do not stack more than 50 sheets in the Front Tray.
- Do not touch the printed surfaces until the ink dries. For specific drying times, refer to the instructions packaged with your media.
Loading Envelopes in the Auto Sheet Feeder

Use either European DL or US Comm. Env. #10 size envelopes.

The address is rotated automatically to match the direction of the envelope when printing.

- Do not use envelopes with embossed or treated surfaces, a double flap, pressure seals or sticker flaps.
- Select either DL Env. (Windows) / DL Envelope (Macintosh) or Comm. Env. #10 (Windows) / #10 Envelope (Macintosh) in the printer driver according to the envelope size you are using. If you do not, the address will be printed in the wrong direction.

1. Load the envelope and align it with the right edge of the Auto Sheet Feeder with the front face UP, and the rear flaps DOWN on the left.
2. Pinch the Paper Guide and slide it against the left side of the envelope.
3. Ensure that the FRONT FEED button is not lit. If the FRONT FEED button is lit or flashing, set the Front Tray to its normal printing position. See “Returning the Front Tray to Its Normal Printing Position” on page 14.
4. Select Envelope in Media Type, and then select DL Env. (Windows) / DL Envelope (Macintosh) or Comm. Env. #10 (Windows) / #10 Envelope (Macintosh) in Page Size.

For a detailed description of the printer driver settings, refer to “Printing with Windows” on page 18, or “Printing with Macintosh” on page 21.

Note: When printing starts, the printer may not detect the envelope correctly depending on the type of envelope. If the ALARM lamp flashes orange eleven times, refer to “Error Regarding the Width of Paper” on page 78 to set the printer driver not to detect the width of the paper.
### Loading 4" x 6" or 5" x 7"-Sized Paper in the Auto Sheet Feeder

*Important* Cutting plain paper to 4" x 6" / 101.6 mm x 152.4 mm or 5" x 7" / 127.0 x 177.8 mm size for a trial printing can cause paper jams.

1. Load the paper and align it with the right edge of the Auto Sheet Feeder with the print side facing UP.
2. Pinch the Paper Guide and slide it against the left side of the paper stack.
3. Ensure that the FRONT FEED button is not lit. If the FRONT FEED button is lit or flashing, set the Front Tray to its normal printing position. See “Returning the Front Tray to Its Normal Printing Position” on page 14.
4. Select 4 x 6 in 101.6 x 152.4 mm or 5 x 7 in 127.0 x 177.8 mm from Page Size in the printer driver.

For a detailed description of the printer driver settings, refer to “Printing with Windows” on page 18, or “Printing with Macintosh” on page 21.

*Important* Always load paper in portrait orientation. Loading paper in landscape orientation can cause the paper to be jammed.

*Note* We recommend using Canon genuine photo media when printing photographs. See “Using Specialty Media” on page 15.
Loading Paper in the Front Tray

FRONT FEED Button
You can check the printer status by FRONT FEED button indication.

The FRONT FEED button flashes quickly (two flashes at a time) when preparations for loading the paper in the Front Tray are finished. Load the paper in the Front Tray correctly.
The FRONT FEED button flashes slowly (one long flash at a time) when preparations to start printing from the Front Tray are complete. Start printing from the Front Tray.
The FRONT FEED button is unlit when the Front Tray is in its normal printing position. The FRONT FEED button lights when the Front Tray is in the Front Paper Feeding Position.

Important When loading paper in the Front Tray, the paper sticks out from the back of the printer. Keep a space of 40 cm / 15.7 inches for this purpose behind the printer.

There are wheels on the back corners of the printer. Lift up the front of the printer to move it back and forth.

Note For detailed information on the Canon genuine media for use with its various printers, refer to “Using Specialty Media” on page 15, or “Printing Media” in the User’s Guide.

1 Open the Front Tray.

(1) Gently press the mark on the Front Tray.
2 Set the Front Tray.

To set the Front Tray in the Front Paper Feeding Position, follow the procedure below.

Side view of the printer

1. Tilt the Front Tray upward.

2. Lift the Front Tray.

3. Tilt the Front Tray forward to set it in the Front Paper Feeding Position. The FRONT FEED button lights.

4. Press the REAR SUPPORT button to open the Rear Support.
3 Prepare to load paper.

(1) Pull out the Front Tray Extension completely.

(2) Press the right corner of the Rear Support to open the Rear Support Extension.

(3) Press the FRONT FEED button. The printer starts making operating noises and then the POWER lamp flashes for about 20 seconds.

Important Do not load paper when the POWER lamp is flashing. Otherwise, the paper or the printer may be damaged.

4 Load the paper.

(1) Ensure that the POWER lamp is lit and the FRONT FEED button is flashing quickly. If the POWER lamp is flashing green, wait until it stops flashing.

(2) Load the paper straight into the Front Tray with the print side facing UP. Align the front edge of the paper with the mark on the Front Tray. When printing from the Front Tray, load one sheet in the Front Tray at a time.

Important If the printer is not used for 5 minutes or more while it is as described in (1) above, then the FRONT FEED button stops flashing and stays lit and you cannot set the paper. If this happens, return to (3) in step 3.
When paper is curled, gently bend it in the opposite direction of the curl (without curling the reverse side) and then load the paper. For details on how to flatten paper curl, refer to “Media is curled” on page 68.

To prevent paper from being curled, we recommend handling it in the following ways:
- Put unused paper back into the package, and store them horizontally.
- Remove only as many sheets from the package as you need right before printing.

For details on how to load the paper, refer to the appropriate section in “Printing Media” in the User’s Guide.

Prepare to start printing.

The following paper can be used in the Front Tray.

**Paper Size**
- Standard paper: From 4" x 6" / 101.6 x 152.4 mm to 14" x 17" / 355.6 x 431.8 mm
- Non-standard paper: From 100.0 x 148.0 mm / 3.94 x 5.83 inches to 355.6 x 584.2 mm / 14 x 23 inches

**Thickness**
- From 0.1 mm / 4 mil to 1.2 mm / 47 mil

Do not use paper thicker than this, as it could jam in the printer.

**To Print Continuously**
- To print from the Front Tray again, return to (3) in step 3 and load paper in the Front Tray. Then start printing.
Returning the Front Tray to Its Normal Printing Position

When using the Auto Sheet Feeder, set the Front Tray to its normal printing position.

- Be sure to follow the procedure below when returning the Front Tray to its normal printing position. Otherwise, the printer may be damaged.
- When the Front Tray is set to the Front Paper Feeding Position, printing by using the Auto Sheet Feeder is not possible. Be sure to set it to its normal printing position.

1. Hold the Front Tray and slowly tilt it like you are closing it.

2. Open the Front Tray.

(1) Open the Front Tray to return it to its normal printing position.

(2) Ensure that the FRONT FEED button is not lit.

*1 When loading a stack of paper, the printed side may be marked when it is fed in. If this happens, load paper one sheet at a time.

*2 You can specify the print setting easily by using the Easy-PhotoPrint provided with the Setup CD-ROM.

*3 Feeding from the Auto Sheet Feeder can damage the printer. Always load in the Front Tray.

*4 Canon genuine media is produced and stored to get optimum printing quality. We recommend using Canon genuine media.

*5 If you are using this paper, you cannot print in a 35 mm / 1.38 inches margin on the top and bottom edges. If you choose a paper size which says "Art XX [Margin 35 mm]" in the printer driver, a limit is set to prevent printing in a 35 mm / 1.38 inches margin on the top and bottom edges of the paper. We recommend checking the area being printed in the preview screen before printing. Refer to the Printer Driver Guide.

*6 Load one sheet at a time if the paper cannot be fed correctly.

### Note

- When using plain paper (64 gsm or 17 lb), up to 150 sheets (13 mm or 0.52 inches in height) can be loaded in the Auto Sheet Feeder. Select Plain Paper from Media Type in the printer driver.
- For a detailed description of printing media types, refer to the User’s Guide.
Printing with Windows

**Note**  • Menu and command names may differ between software applications, and more steps may be required. For details, refer to the documentation for each software application you use.

• The steps described in this section are for printing in Windows® XP Service Pack 2 (hereafter, called Windows XP SP2).

• You can use Easy-PhotoPrint or Easy-PhotoPrint Pro to easily do print operations when printing photographs. Easy-PhotoPrint and Easy-PhotoPrint Pro are provided on the Setup CD-ROM. For details on how to use Easy-PhotoPrint and Easy-PhotoPrint Pro, refer to the Photo Application Guide.

1  Turn on the printer.
   See “Turning on the Printer” on page 2.

2  Load the paper in the printer.
   See “Loading Paper in the Auto Sheet Feeder” on page 5 or “Loading Paper in the Front Tray” on page 10.

3  Create a document or open a file to print.

**Note**  When printing in grayscale, we recommend printing with the top and bottom margins of the paper set to more than 45 mm / 1.77 inches. Depending on an image, without these margins, the printing troubles may occur on the top and/or bottom edges of the paper such as uneven coloration or white streaks, and the print quality may be degraded. In this case, print the image using the Easy-PhotoPrint Pro provided on the Setup CD-ROM. Or, prepare paper whose longer side is at least 90 mm / 3.54 inches longer than the length of the image, then print it with the top and bottom margins of the paper set to 45 mm / 1.77 inches using your page layout software. For details on how to use the Easy-PhotoPrint Pro, refer to the Photo Application Guide.
4  Open the printer properties dialog box.

   (1) Select Print from the application software’s File menu. The Print dialog box opens.

   (2) Ensure that your printer is selected.

   (3) Click Preferences or Properties.

5  Specify the required settings.

   (1) Click Media Type to select the type of media loaded in the printer.

   (2) Ensure that Paper Source is set to the position in which you loaded the paper in step 2.

   (3) Click OK.
Basic Printing

**Note**

- From the **Page Setup** tab, select the correct document size to be printed. If the size is different from that set in the application, then you need to set it to the same size or use **Scaled Printing** or **Fit-to-Page Printing**. Refer to the **Printer Driver Guide**.

- To adjust the **Print Quality** settings, select **Custom** and click **Set** on the **Main** tab. You can control the print quality in the **Custom** dialog box.

- For details about other printer driver functions, click **Help** or **Instructions** to view the Help or **Printer Driver Guide**. **Instructions** is displayed on the **Main** and **Maintenance** tabs only. If the On-screen Manual is not installed, **Instructions** is not displayed.

- Selecting the **Preview before printing** check box displays a preview screen that allows you to confirm the selected printing effects and how your document will look when printed. Some applications do not have a preview function.

6 Print the document.

![Print dialog box](image)

(1) Click **Print** or **OK**. 
Do not open the Top Cover while printing.

**Note**  
You can cancel a print job in progress by simply pressing the **RESUME/CANCEL** button on the printer. See “Canceling Printing” on page 25.
Printing with Macintosh

**Note**  ● Menu and command names may differ between software applications, and more steps may be required. For details, refer to the documentation for each software application you use.

● The steps described in this section are for printing in Mac® OS X v.10.4.x (hereafter called Macintosh®).

● You can use Easy-PhotoPrint or Easy-PhotoPrint Pro to easily do print operations when printing photographs. Easy-PhotoPrint and Easy-PhotoPrint Pro are provided on the Setup CD-ROM. For details on how to use Easy-PhotoPrint and Easy-PhotoPrint Pro, refer to the Photo Application Guide.

1 Turn on the printer.

See “Turning on the Printer” on page 2.

2 Load the paper on the printer.

See “Loading Paper in the Auto Sheet Feeder” on page 5 or “Loading Paper in the Front Tray” on page 10.

3 Create a document or open a file to print.

**Note** When printing in grayscale, we recommend printing with the top and bottom margins of the paper set to more than 45 mm / 1.77 inches. Depending on an image, without these margins, the printing troubles may occur on the top and/or bottom edges of the paper such as uneven coloration or white streaks, and the print quality may be degraded. In this case, print the image using the Easy-PhotoPrint Pro provided on the Setup CD-ROM. Or, prepare paper whose longer side is at least 90 mm / 3.54 inches longer than the length of the image, then print it with the top and bottom margins of the paper set to 45 mm / 1.77 inches using your page layout software. For details on how to use the Easy-PhotoPrint Pro, refer to the Photo Application Guide.
4 Select Paper Size.

(1) Select Page Setup from the application software’s File menu. The Page Setup dialog box opens.

(2) Confirm that Pro9000 is selected in Format for.

(3) Select the desired paper size from Paper Size.

(4) Click OK.

5 Specify the required settings.

(1) Select Print from the application software’s File menu. The Print dialog box opens.

(2) Select Quality & Media from the pop-up menu.

(3) Select the desired media type from Media Type.

(4) Ensure that Paper Source is set to the position in which you loaded the paper in step 2.

(5) Select the print mode appropriate to your document from Print Mode.
When you select the print mode appropriate to your document from **Print Mode**, the document will be printed in color and at a print quality suited to the characteristics of the **Media Type** you have selected.

- **Printing a top-quality photo**: Select when printing documents consisting mainly of photographs and graphics featuring fine color gradation.
- **Printing tables and charts**: Select when printing documents consisting mainly of graphs and graphics (illustrations) with strong color definition.
- **Printing a composite document**: Select when printing documents consisting mainly of text.
- **Detailed Setting**: Select to fine-tune the **Print Quality** and **Halftoning** settings.

*Note*

For details about the printer driver, refer to the **Printer Driver Guide**.

To view the **Printer Driver Guide**, click on any Print dialog box that has a **Quality & Media**, **Color Options**, **Special Effects**, **Borderless Printing**, or **Margin** selected from the pop-up menu. If the On-screen Manual is not installed, the **Printer Driver Guide** is not displayed even if ? is clicked.

Clicking the **Preview** button displays a preview screen that allows you to confirm the selected printing effects and how your document will look when printed. Some applications do not have a preview function.
Print the document.

(1) Click Print.

Do not open the Top Cover while printing.

Note You can cancel a print job while printing.

See “Canceling Printing” on page 25.
Canceling Printing

Windows
You can cancel a print job while printing, with the RESUME/CANCEL button on the printer.

1. Press the RESUME/CANCEL button while printing.

   (1) Press the RESUME/CANCEL button.

   Printing is canceled and paper is fed out.

   **Note** You can also cancel a print job by clicking Cancel Printing on the Canon IJ Status Monitor. To display the Canon IJ Status Monitor, click Canon Pro9000 on the taskbar.

Macintosh

1. Click the printer’s icon in the Dock and display the list of print jobs in progress.
   
   If you are using Mac OS X v.10.2.8, click on the printer icon in the Dock to start up the Print Center and double-click on the name of your printer in the Printer List to open a list of print jobs in progress.

2. Select an undesired document and click the Delete icon.
   
   The print job is deleted.

   **Note** To temporarily stop a job in progress, click Hold. To cancel all the jobs in the list, click Stop Jobs.

Printing Photographs Directly from a PictBridge Compliant Device

Connecting a PictBridge compliant device such as a digital camera, camcorder or mobile phone to the printer allows you to print recorded images directly without using a computer.

Note

- PictBridge is an industry standard enabling a range of digital photo solutions, including the Direct Printing of photos from a digital camera, camcorder or mobile phone* without the need to use a computer.
- It is possible to specify which images to print and various print settings from the operation panel of your camera or mobile phone.

* Hereafter, the PictBridge compliant digital camera, digital camcorder, or camera-equipped mobile phone are collectively called a PictBridge compliant device.
Connecting to a PictBridge Compliant Device

To connect a PictBridge compliant device to this printer, use the USB cable supplied with the device.

⚠️ **Caution**  Do not connect any equipment other than PictBridge compliant devices to the Direct Print Port of the printer. If you do so, electric shock, fire, or damage to the device could result.

📝 **Note**  ● When printing photos with the digital device connected to the printer, it is advisable to use the AC adapter supplied with the device. If you use the device battery, be sure to charge it fully.

● The Print Head cannot be aligned using the controls of the digital device. The print head alignment can be performed simply by pressing the RESUME/CANCEL button on the printer, or by connecting the printer to the computer and then executing automatic print head alignment. Refer to “Aligning the Print Head” on page 58.

1. Set up the printer.

2. Turn on the printer.
   
   See “Turning on the Printer” on page 2.

3. Load the paper in the Auto Sheet Feeder.

   📘 **Note**  When printing on 14" x 17" / 355.6 x 431.8 mm paper, load paper in the Front Tray.

   See “Loading Paper in the Front Tray” on page 10.
4 Connect the PictBridge compliant device to the printer.

Note Depending on the model or brand of your PictBridge compliant device, you may have to select a print mode of producing photos before connecting the device. You may also have to turn on the device or select Play mode manually after connecting the device to the printer. Perform necessary operations according to the instruction manual supplied with your device.

(1) Make sure the device is turned off.

(2) Connect the device to the printer using the USB cable.

Note The PictBridge compliant devices turn on automatically, when connected to the printer. For a device not turns on automatically, turn it on manually.
(3) Set up the device for Direct Printing.
   When the connection between the device and printer has been established, the POWER lamp on the printer flashes twice.

  * The power-on sequence may differ depending on the model or brand of the device.

will appear on the LCD display of the device when the printer is correctly connected.

### Printing Photographs Directly from a PictBridge Compliant Device

When operating the device, be sure to follow the instructions given in the instruction manual supplied with the device. Let’s take a look at the paper size, paper type, layout, image optimization modes, and date/file number printing modes that can be set on a PictBridge compliant device connected to the printer.

### Checking or Changing PictBridge Print Settings From Your Camera

To change the PictBridge print settings, operate your device to select the PictBridge print setup mode and confirm or change the settings.

#### Additional settings

The settings explained below cannot be made depending on the brand or model of your device. If any setting cannot be made, the default setting explained below is used.

Names of settings that are displayed on Canon PictBridge compliant device are used in the description given below. Different names may be displayed on your device depending on the brand or model.

For details, refer to your device's instruction manual.

### About the Image Data Format for Printing

This printer accepts images* taken with a camera compatible with the Design rule for Camera File System.

*¹ This paper is exclusively used to print photo stickers. When printing on sticker paper, select 4” x 6” in *Paper size*.

*² This setting can be selected only for Canon PictBridge compliant devices (note that it cannot be selected for some models). If your device does not have this setting, select Photo or Default in *Paper type*.

*³ This size can be selected only for Canon PictBridge compliant devices (note that it cannot be selected for some models).

*⁴ This setting can be selected only for Canon PictBridge compliant devices (note that it cannot be selected for some models). When Fine Art is selected for *Paper type*, bordered printing will be performed even when Borderless is selected for *Layout*.

*⁵ When 8.5” x 11” (Letter) is selected in *Paper size*, you can select Plain Paper in *Paper type*. When Plain Paper is selected in *Paper type*, bordered printing will be performed even if you select Borderless in *Layout*.

*⁶ When 8.5” x 11” (Letter) is selected in *Paper size*, you can print in 4-up layout.
About “Layout” and “Trimming”

By default, Borderless is selected for Layout and Off (No trimming) is selected for Trimming for this printer.

**Note** When printing onto Photo Stickers (PS-101) (16-up), Select N-up for Layout, then select 16.

- Some PictBridge compliant devices display the Layout option; 2-up, 4-up, 9-up, and 16-up. In this case always select 16-up.
- If there are no options on the PictBridge compliant device that correspond to 16-up, printing on stickers is not possible.
- When printing onto Photo Stickers (PS-101) (16-up), do not select Borderless for Layout.

About “Image optimize”

By default, ExifPrint is selected for this printer.

If you use a Canon PictBridge-compatible device, you can select VIVID, NR, VIVID+NR, or Face. (Note that these options cannot be selected for some models.)

**Note**

- When VIVID is selected, green and blue portions of photos are printed vividly.
- When NR (Noise Reduction) is selected, noise in blue portions, such as the sky, and dark portions is removed.
- When VIVID+NR is selected, functions of both VIVID and NR are performed.
- When Face is selected, backlit images are corrected.

**For Flexible Color Adjustment**

With some types of Canon PictBridge compliant single-lens reflex cameras you can make finer color adjustments by selecting the color mode that is most suitable for what you want to achieve.

You can select from; Natural, Natural M, B/W, Cool tone or Warm tone. Refer to the Digital Photo Printing Guide (on-screen manual) or the instruction manual provided with your PictBridge compliant Canon device.

**Note**

- When Natural is selected, natural colors are realistically reproduced in the printed photo.
- When Natural M is selected, you can adjust the color (contrast etc.) more carefully specifically than Natural.
- When B/W is selected, the photo is printed like a black and white photo.
- When Cool tone is selected, the photo is printed in a cool black and white tone.
When **Warm tone** is selected, the photo is printed in a warm black and white tone.

If the printing troubles have occurred on the top and/or bottom edges of the paper such as uneven coloration or white streaks when printing with **B/W, Cool tone, or Warm tone** selected, we recommend printing it from the computer with the top and bottom margins set to more than 45 mm / 1.77 inches. For details on how to print in grayscale from the computer, refer to the *Printer Driver Guide* or *Photo Application Guide*.

**About “Date/File No. print”**

By default, **Off** is selected for this printer.

If you select an image which has had the shooting date embedded in it using a camera with the print mode, select **Off** for this function. If you select **Date, File No., or Both**, the date and/or file number will be printed over the embedded date.

**Other Settings**

If you use a Canon PictBridge-compliant device, you can use the following print settings. (Note that these print settings cannot be used for some models.) For details, refer to your device’s instruction manual.

- **Shooting Info (Exif Data)**
  
  You can print shooting info (Exif data) on photos in list format, or in the margins of specified photos.

  Select **Layout**, then select the item displayed with the [i] icon.

- **35 mm Film Style Layout (Contact Printing Layout)**
  
  You can print selected photos or index-specified photos as 35 mm film style layout (contact printing layout).

  Select **Layout** then select the item displayed with the film icon.

**Note**

- Never disconnect the USB cable during printing.
- When disconnecting the USB cable between the device and printer, follow the instructions given in the instruction manual of the device.
- Controls of the device cannot be used for the following functions:
  - Print quality setting
  - Printer maintenance
- For the device operation method and troubleshooting, refer to your device manual. For print error messages, see “Cannot Print Properly from the Digital Camera” on page 80.
Checking or Changing PictBridge Print Settings From the Printer
You can change the printer’s default PictBridge print settings, such as paper size and type. To do this, install the Canon Setup Utility from the included CD-ROM and connect the printer to a computer. For details, refer to “Canon Setup Utility Menu (Windows)” or “Canon Setup Utility Menu (Macintosh)” in the User’s Guide.

Accessing the Printer Driver (Windows)

The printer properties dialog box can be opened from either within an application, or directly from the Windows Start menu.

Note: This manual refers to Windows XP SP2 operation. The operations may vary depending on the version of your Windows operating system.

1. Opening the Printer Properties Dialog Box from Your Application Program

Note: Depending on your application program, the command and menu names may differ, and there may be more steps involved in opening the printer properties dialog box. For more details, see the user’s manual for your application.

1. In your application program, select the command to print a document.
   The Print dialog box can usually be opened by selecting Print from the File menu.

2. Ensure that the name of your printer is selected. Then click Preferences (or Properties).
   The printer properties dialog box opens.

2. Opening the Printer Properties Dialog Box Directly from the Start Menu

This method is used for printer maintenance and configuring shared print settings for all application programs.

1. Click Start and select Control Panel, Printers and Other Hardware, and then Printers and Faxes.
   For non-Windows XP, click Start, select Settings, and then Printers.

2. Select the icon of your printer.
3 Open the File menu and select **Printing Preferences** (or **Properties**).

The printer properties dialog box opens.

When opening the printer properties dialog box from **Properties**, the tabs related to the Windows function (e.g., the **Ports** tab, or the **Details** tab) are displayed. These tabs are not displayed, when the printer properties dialog box is opened from **Printing Preferences** or application programs. For details about these tabs, refer to the Windows documentation.

**Note** For details on how to set each function, refer to the Help or *Printer Driver Guide*. 
Using the Bundled Software

The *Setup CD-ROM* includes photo applications designed to edit the photographs taken by a digital camera and print them as photo-lab quality prints without standard white borders. Please use the application(s) suitable for your print purposes.

**Note**
- To install applications, refer to the *Easy Setup Instructions*.
- For details about using the photo applications, refer to the *Photo Application Guide*.

- **Easy-PhotoPrint (Windows/Macintosh)**
  You can make a Borderless Print easily and quickly, just by selecting a photograph taken with a digital camera and the paper type on which to print. Also it has tools to correct red eye caused by the camera’s flash or smooth and beautify the facial skin. It is compatible with ExifPrint*.

- **Easy-PhotoPrint Pro (Windows/Macintosh)**
  Use Easy-PhotoPrint Pro with Adobe® Photoshop® CS or Adobe Photoshop CS2 for professional level editing and printing. You can also maintain high image quality when printing by using it together with Digital Photo Professional, which is included with digital single-reflex cameras manufactured by Canon. These recommendations are for people who demand higher quality when printing photos.

  Easy-PhotoPrint Pro cannot be installed in Windows Me and Windows 98.

- **PhotoRecord (Windows)**
  You can create fun and unique photo albums with the decorative themes such as frame, background, and clip-art. You can also copy or move the decorated photos.

  It is compatible with ExifPrint*.

- **Easy-WebPrint (Windows)**
  You can easily print out homepages displayed on Internet Explorer in full size without its right-hand side being cropped. This application is automatically added to the Internet Explorer toolbar. Internet Explorer 6.0 is recommended.

  * ExifPrint is the worldwide standard. Under ExifPrint, the digital camera can record data tags for specific camera settings and functions such as whether the flash was on or off, if the camera was in portrait or night scene mode, etc. Canon PIXMA Printers support ExifPrint and use a suitable photo application to read the camera data precisely, producing optimal prints. This enables you to create prints that reproduce color more accurately.
Printing Maintenance

Replacing an Ink Tank

Replace ink tank(s) if they are out of ink. When replacing them, check the model numbers and their installation positions. With this printer, the following ink tanks are used.

- Green: CLI-8G
- Photo Cyan: CLI-8PC
- Red: CLI-8R
- Cyan: CLI-8C
- Photo Magenta: CLI-8PM
- Magenta: CLI-8M
- Black: CLI-8BK
- Yellow: CLI-8Y

Note

- Carefully check the labels on the ink tanks so you do not mistakenly insert them in the wrong positions. The installation positions of the ink tanks from the left are: green, red, photo magenta, black, photo cyan, cyan, magenta and yellow.
- Should missing characters or white streaks appear despite sufficient ink levels, refer to “When Printing Becomes Faint or Colors are Incorrect” on page 45.
Getting the Ink Level Information

Ink Level Indication on the Printer
You can confirm the ink level in each ink tank through the ink lamps. Open the Top Cover of the printer to see how the ink lamps light or flash.

Ink is low: The ink lamp flashes slowly (at about three second interval). You can continue printing, but we recommend preparing a new ink tank to replace the associated ink tank.

Ink is out: The ink lamp flashes quickly (at about one second interval), and the ALARM lamp on the printer flashes orange four times. Replace the ink tank with a new one.

* When the ALARM lamp on the printer flashes orange seven or thirteen times, an error has occurred and therefore the printer is unable to print. For details, refer to “Handling Error Messages” on page 73.

Ink Level Indication on the PC

Windows
Open the Canon IJ Status Monitor to check the ink level information.

1. Open the printer properties dialog box.
   See “Accessing the Printer Driver (Windows)” on page 33.

2. Click View Printer Status on the Maintenance tab.
   The following message will be displayed.

   * You can also display the Canon IJ Status Monitor by clicking the Canon IJ Status Monitor button which appears on the taskbar during printing.

   Confirm whether any symbols are displayed here.

Ink is low: The [!] symbol appears above an ink tank that is low. You can continue printing, but we recommend preparing a new ink tank to replace the associated ink tank.

Ink is out: The [x] symbol appears above an empty ink tank. Click Ink Details to show the ink tank information, then replace the ink tank with a new one.
Open the **Canon IJ Printer Utility** to check the ink level information.

1. Select **Applications** from the Go menu, and then double-click the **Utilities** folder.

2. Double-click the **Printer Setup Utility** icon.
   When using Mac OS X v.10.2.8, double-click the **Print Center** icon.

3. Select the name of your printer from the **Name** list and click **Utility**.
   When using Mac OS X v.10.2.8, select the name of your printer from the **Name** list and click **Configure**.

4. Select the name of your printer from the **Product** list and click **Maintenance**.
   The **Canon IJ Printer Utility** launches.

5. Select **Ink Level Information** from the pop-up menu.
   The following dialog box is displayed.

![Ink Level Information dialog box]

- **Ink is low:** The ![ symbol appears above an ink tank that is low. You can continue printing, but we recommend preparing a new ink tank to replace the associated ink tank.

- **Ink is out:** The [x] symbol appears above an empty ink tank. Click **About ink** to show the ink tank information, then replace the ink tank with a new one.
Knowing When to Replace Ink Tanks

The ALARM lamp on the printer flashes orange four times once any one of the ink tanks is out of ink. If ink is out during printing, a message will be displayed on your PC. Check to see which ink tank is out of ink, and replace it with a new one. Close the Top Cover after ink tank replacement to resume printing.

Windows

- If printing has not finished, you can continue printing for a while by pressing the RESUME/CANCEL button on the printer with the empty ink tank installed. However, you will need to replace it with a new one as soon as printing finishes. If you continue printing with an empty ink tank, it may damage the printer.
  * Printing does not resume if any of the ink tanks are removed. Be sure to press the RESUME/CANCEL button with the ink tanks installed.
  * Continuing to print in the out of ink state will cause the remaining ink level to be displayed incorrectly in the Canon IJ Status Monitor.
- Click Cancel Printing to cancel printing. Replace the ink tank with a new one.
If printing has not finished, you can continue printing for a while by pressing the RESUME/CANCEL button on the printer with the empty ink tank installed. However, you will need to replace it with a new one as soon as printing finishes. If you continue printing with an empty ink tank, it may damage the printer.

* Printing does not resume if any of the ink tanks are removed. Be sure to press the RESUME/CANCEL button with the ink tanks installed.

Click Delete Job to cancel the current printing job. Click Stop Job to stop the current printing job. Click Stop All Jobs to stop all printing jobs. Replace the ink tank with a new one.
Replacing Ink Tanks
When an ink tank runs out of ink, replace it using the following steps.

1. Ensure that the printer is on, and then open the Front Tray.
   Gently press the mark on the Front Tray.

2. Open the Top Cover.
   The Print Head Holder moves to the center.
   
   **Important**
   - If the Top Cover is left open for more than 10 minutes, the Print Head Holder moves to the right. Close and reopen the Top Cover to return the Print Head Holder to the center.
   - If you open the Top Cover while the printer is preparing to feed paper from the Front Tray (when the FRONT FEED button is flashing quickly), the Print Head Holder may not move to the center. If this happens, close the Top Cover, press the FRONT FEED button and wait until the FRONT FEED button stops flashing and stays lit.
   To continue printing from the Front Tray after replacing the ink tank, go to (3) in step 3 in “Loading Paper in the Front Tray” on page 12 and start printing again.

3. Remove the ink tank whose lamp is flashing fast.
   - Do not touch the lock lever; remove only the ink tank.
   - Push the tab and remove the ink tank.
   
   **Important**
   - Handle ink tanks carefully to avoid staining clothing or the surrounding area.
   - Discard empty ink tanks according to the local laws and regulations regarding disposal of consumables.

   **Note** Be sure to replace ink tanks one by one when replacing more than one ink tank.
4 Prepare a replacement tank.

(1) Unpack the new ink tank and completely pull off the orange tape. Then, remove the film completely.

(2) Remove the orange protective cap from the bottom of the ink tank and discard it.

- Be sure to remove the clear film from the ink tank in the exact order shown in (1) in step 4, as failure to follow this step may cause the ink to leak and stain your clothes and hands.
- Do not touch the electrical contacts on the ink tank. Doing so can cause the printer to malfunction or become unable to print.
- Do not squeeze the side of ink tanks as this may cause the ink to leak out and stain your clothes and hands.
- Do not re-attach the protective cap once you have removed it.
- Do not touch the open ink port once the protective cap is removed, as this may prevent the ink from being ejected properly.
- Ink on the removed protective cap may stain your clothes and hands.
- Ensure that all the orange tape has been peeled off along the perforation. If there remains a part of the orange tape, ink may not be ejected correctly.
5 Insert the ink tank.

(1) Insert the ink tank into the Print Head.
(2) Press on the mark on the ink tank until the ink tank snaps firmly into place.
(3) Ensure that the ink lamp lights red.

Ensure that all the ink tanks are installed in the order directed by the label. The printer cannot be used unless all the ink tanks are installed.
6 Close the Top Cover.

The ink tank installation process is now complete.

**Note**  
- The ALARM lamp still flashes orange after the Top Cover is closed if an ink tank is not installed properly. Open the Top Cover and make sure that all the ink tanks are installed in the correct order directed on the label.
- To maintain optimal print quality, use an ink tank within six months of its first use.
- Once an ink tank has been used, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out and the printer may not operate properly if it is reinstalled.
- Color ink consumption may occur even when black-and-white or grayscale printing is specified. Color ink is consumed in the head cleaning and deep cleaning, which are necessary to maintain the printer’s capabilities.
- When you start printing after replacing the ink tank, the printer executes **Print Head Cleaning** automatically. Do not perform any other operations until the **Print Head Cleaning** finishes. The **POWER** lamp flashes green during cleaning.
When Printing Becomes Faint or Colors are Incorrect

When printing becomes faint or colors are incorrect, even if ink remains in the ink tanks, the Print Head nozzles are probably clogged. Follow the procedures below to clean the nozzles.

If the ruled lines are shifted after running the print head maintenance, align the Print Head.

**Important**

Before printing the nozzle check pattern or cleaning the Print Head, check the following;

- Open the Top Cover and make sure that all the ink tanks click into place and then their ink lamps light red.

  If any one of the ink lamps is flashing slowly, the associated ink tank is running low. You can continue printing, but we recommend preparing a new ink tank to replace the associated ink tank.

  If any one of the ink lamps is flashing quickly, the associated ink tank is empty. Replace the ink tank. See “Replacing Ink Tanks” on page 41.

  If an ink lamp is flashing even though ink remains in that ink tank, it is inserted in the wrong position. Make sure that the correct ink tank color is inserted in each position referring to the color guide on the print head lock lever. See “Replacing an Ink Tank” on page 36.

  If any one of the ink lamps is unlit, press the mark on the ink tank to fully insert it. Make sure that all packaging material is peeled off the ink tank. See “Replacing Ink Tanks” on page 41.

- Increase the Print Quality setting in the printer driver settings. See “Print Results Not Satisfactory or Contains Errors” on page 65.

**Step 1**

See “Printing the Nozzle Check Pattern” on page 46

If white stripes appear

After print head cleaning, print the nozzle check pattern.

**Step 2**

See “Print Head Cleaning” on page 51

If the problem remains after performing print head cleaning twice

**Step 3**

See “Print Head Deep Cleaning” on page 55

**Note**

If Print Head Deep Cleaning does not resolve the problem, the Print Head may be defective. Contact the Customer Care Center.
Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the Print Head nozzles. Use this function when printed results are blurred or the color is incorrect.

**Note**
- Nozzle check pattern cannot be printed from the Front Tray. Always load paper in the Auto Sheet Feeder.
- Ensure that the Inner Cover is closed.

**Printing the Nozzle Check Pattern Without a Computer**
- Nozzle check pattern printing can also be executed from the printer itself.
  1. With the printer on, load a sheet of Letter-sized plain paper in the Auto Sheet Feeder.
  2. Hold down the RESUME/CANCEL button until the POWER lamp flashes green twice, and then release it immediately.
     The nozzle check pattern is printed. Do not open the Top Cover while printing.

## Printing the Nozzle Check Pattern

**Windows**

1. With the printer on, load a sheet of Letter-sized plain paper in the Auto Sheet Feeder.

   **Important** If other than Letter-sized paper is loaded, you cannot print the nozzle check pattern. Be sure to use Letter-sized plain paper.

2. Open the printer properties dialog box.
   See “Opening the Printer Properties Dialog Box Directly from the Start Menu” on page 33.
Print the Nozzle Check Pattern.

(1) Click the Maintenance tab.

(2) Click Nozzle Check.

(3) Read the message and click Print Check Pattern.

The nozzle check pattern will be printed. Do not open the Top Cover while printing.

Note Clicking Initial Check Items displays the items to be checked before printing the pattern.

Examine the pattern and take the appropriate action.

See “Examining the Nozzle Check Pattern” on page 49.

With the printer on, load a sheet of Letter-sized plain paper in the Auto Sheet Feeder.

Important If other than Letter-sized paper is loaded, you cannot print the nozzle check pattern. Be sure to use Letter-sized plain paper.
2. Open the Canon IJ Printer Utility dialog box.

   (1) Select Applications from the Go menu, and then double-click the Utilities folder.
   (2) Double-click the Printer Setup Utility icon.
      When using Mac OS X v.10.2.8, double-click the Print Center icon.
   (3) Select the name of your printer from the Name list and click Utility.
      When using Mac OS X v.10.2.8, select the name of your printer from the Name list and click Configure.
   (4) Select the name of your printer from the Product list and click Maintenance.

3. Print the Nozzle Check Pattern.

   (1) Select Test Print from the pop-up menu.
   (2) Click Nozzle Check.
   (3) Read the message and click Print Check Pattern.

   The nozzle check pattern will be printed. Do not open the Top Cover while printing.

   **Note**
   Clicking Initial Check Items displays the items to be checked before printing the pattern.

4. Examine the pattern and take the appropriate action.
   See “Examining the Nozzle Check Pattern” on page 49.
Examining the Nozzle Check Pattern

The nozzle check pattern should appear as follows when ink is discharged properly. Examine the nozzle check pattern output by the printer, and clean the Print Head when necessary.

Note: The nozzle check pattern will not be printed correctly if there is not enough ink. Replace the ink tank if the remaining amount of ink is insufficient. See “Replacing an Ink Tank” on page 36.

1. Confirm the printed nozzle check pattern.

   (1) If these patterns have white stripes, the Group1 print head nozzle needs cleaning.

   (2) If these patterns have white stripes, the Group2 print head nozzle needs cleaning.

   Example: When white stripes appear
2 When cleaning is necessary, click Cleaning on the Pattern Check dialog box.

If you want to continue to clean the Print Head from here, go to (3) in step 3 of the Windows or Macintosh Print Head Cleaning procedures as appropriate. See “Print Head Cleaning” on page 51.

If both of the group (1) and the group (2) patterns have no white stripes, click Exit or Quit.

Nozzle Check Pattern examination finishes.
Print Head Cleaning

Clean the Print Head if white stripes appear in the nozzle check pattern. Note that cleaning the Print Head causes ink used for cleaning to be absorbed in the ink absorber. Cleaning the Print Head consumes ink, so perform Print Head Cleaning only when necessary.

**Note**  ● Ensure that the Inner Cover is closed.

**Cleaning the Print Head Without a Computer**

● The Print Head can also be cleaned from the printer itself. With the printer on, hold down the RESUME/CANCEL button until the POWER lamp flashes green once, and then release it immediately.

**Windows**

**Note**  The Print Head Cleaning dialog box of (3) in step 3 is directly displayed when you click Cleaning on the Pattern Check dialog box. See “Examining the Nozzle Check Pattern” on page 49.

1  Ensure that the printer is on.

2  Open the printer properties dialog box.

   See “Opening the Printer Properties Dialog Box Directly from the Start Menu” on page 33.
3 Start Print Head Cleaning.

(1) Click the **Maintenance** tab.

(2) Click **Cleaning**.

(3) Select the ink group to clean.

(4) Click **Execute**.

**Print Head Cleaning** starts when the **POWER** lamp starts blinking green.

**Important** Do not perform any other operations until the **Print Head Cleaning** finishes. This takes about 90 seconds.

(5) Read the message and click **Print Check Pattern** to print the nozzle check pattern. The nozzle check pattern is printed.

**Important** Do not perform any other operations until the nozzle check pattern printing finishes.

**Note** The nozzle check pattern will not be printed correctly if there is not enough ink. Replace the ink tank if the remaining amount of ink is insufficient. See “Replacing an Ink Tank” on page 36.
4 Check the Print Head condition with the printed nozzle check pattern.
   See “Examining the Nozzle Check Pattern” on page 49.

Note If the problem remains after performing Print Head Cleaning twice, try
Print Head Deep Cleaning.
   See “Print Head Deep Cleaning” on page 55.

Macintosh

Note The Cleaning dialog box of (3) in step 3 is directly displayed when you click
Cleaning on the Pattern Check dialog box.
   See “Examining the Nozzle Check Pattern” on page 49.

1 Ensure that the printer is on.

2 Open the Canon IJ Printer Utility dialog box.
   (1) Select Applications from the Go menu, and then double-click the Utilities folder.
   (2) Double-click the Printer Setup Utility icon.
       When using Mac OS X v.10.2.8, double-click the Print Center icon.
   (3) Select the name of your printer from the Name list and click Utility.
       When using Mac OS X v.10.2.8, select the name of your printer from the Name
       list and click Configure.
   (4) Select the name of your printer from the Product list and click Maintenance.

3 Start Print Head Cleaning.

(1) Ensure that Cleaning is selected from the pop-up menu.
(2) Click Cleaning.
Print Head Cleaning starts when the POWER lamp starts blinking green.

Important Do not perform any other operations until the Print Head Cleaning finishes. This takes about 90 seconds.

(5) Read the message and click Print Check Pattern to print the nozzle check pattern. The nozzle check pattern is printed.

Important Do not perform any other operations until the nozzle check pattern printing finishes.

Note The nozzle check pattern will not be printed correctly if there is not enough ink. Replace the ink tank if the remaining amount of ink is insufficient. See “Replacing an Ink Tank” on page 36.

4 Check the Print Head condition with the printed nozzle check pattern. See “Examining the Nozzle Check Pattern” on page 49.

Note If the problem remains after performing Print Head Cleaning twice, try Print Head Deep Cleaning. See “Print Head Deep Cleaning” on page 55.
Print Head Deep Cleaning

If print quality does not improve by standard Print Head Cleaning, try Print Head Deep Cleaning, which is a more powerful process. Note that cleaning the Print Head causes ink used for cleaning to be absorbed in the ink absorber. Print Head Deep Cleaning consumes more ink than standard Print Head Cleaning, so perform this procedure only when necessary.

Note Ensure that the Inner Cover is closed.

Windows

1. Ensure that the printer is on.
2. Open the printer properties dialog box.
   See “Opening the Printer Properties Dialog Box Directly from the Start Menu” on page 33.
3. Start Print Head Deep Cleaning.

   (1) Click the Maintenance tab.
   (2) Click Deep Cleaning.
   (3) Select the ink group to clean.
   (4) Click Execute.

   Note Clicking Initial Check Items displays the items to be checked before cleaning.
(5) When the confirmation message is displayed, click **OK**. 
*Print Head Deep Cleaning* starts when the **POWER** lamp starts blinking green.

- **Important** Do not perform any other operation until the **Print Head Deep Cleaning** finishes. This takes about 120 seconds.

**4** Print the nozzle check pattern to check the Print Head condition.

See “Printing the Nozzle Check Pattern” on page 46.

If a particular color is not printed properly, replace the ink tank of that color. See “Replacing an Ink Tank” on page 36.

- **Note**
  - If the print head nozzles are still not clean, turn off the printer. Be sure to perform another **Print Head Deep Cleaning** 24 hours after turning off the printer.
  - If this does not solve the problem, the Print Head may be worn out. Contact the Customer Care Center.

**Macintosh**

1. **Ensure that the printer is on.**

2. **Open the Canon IJ Printer Utility dialog box.**
   
   (1) Select **Applications** from the **Go** menu, and then double-click the **Utilities** folder.

   (2) Double-click the **Printer Setup Utility** icon.
   
   When using Mac OS X v.10.2.8, double-click the **Print Center** icon.

   (3) Select the name of your printer from the **Name** list and click **Utility**.
   
   When using Mac OS X v.10.2.8, select the name of your printer from the **Name** list and click **Configure**.

   (4) Select the name of your printer from the **Product** list and click **Maintenance**.
Start Print Head Deep Cleaning.

3

Start Print Head Deep Cleaning.

(1) Ensure that Cleaning is selected from the pop-up menu.

(2) Click Deep Cleaning.

(3) Select the ink group to clean.

Note Clicking Initial Check Items displays the items to be checked before cleaning.

(4) Click OK.

Print Head Deep Cleaning starts when the POWER lamp starts blinking green.

Important Do not perform any other operation until the Print Head Deep Cleaning finishes. This takes about 120 seconds.

4

Print the nozzle check pattern to check the Print Head condition.

See “Printing the Nozzle Check Pattern” on page 46.

If a particular color is not printed properly, replace the ink tank of that color. See “Replacing an Ink Tank” on page 36.

Note • If the print head nozzles are still not clean, turn off the printer. Be sure to perform another Print Head Deep Cleaning 24 hours after turning off the printer.

• If this does not solve the problem, the Print Head may be worn out. Contact the Customer Care Center.
Aligning the Print Head

Aligning the Print Head positions allows you to print without shifts in the color registration. Print head alignment is performed either automatically or manually. This section deals with automatic Print Head alignment only.

- Automatic print head alignment cannot be performed from the Front Tray. Always load paper in the Auto Sheet Feeder.
- Ensure that the Inner Cover is closed.

**Aligning the Print Head Without a Computer**

- The Print Head can also be aligned from the printer itself. If the printer driver is not installed in the computer, align the print head in this way.
  1. With the printer on, load two sheets of Letter-sized plain paper in the Auto Sheet Feeder.
  2. Hold down the RESUME/CANCEL button until the POWER lamp flashes green four times, and then release it immediately.
     Two pattern sheets are printed. Do not open the Top Cover while printing.

**Windows**

1. With the printer on, load two sheets of Letter-sized plain paper in the Auto Sheet Feeder.
   - If other than Letter-sized paper is loaded, you cannot print the print head alignment patterns. Be sure to use Letter-sized plain paper.

2. Open the printer properties dialog box.
   See “Opening the Printer Properties Dialog Box Directly from the Start Menu” on page 33.
Print the pattern.

(1) Click the Maintenance tab.

(2) Click Print Head Alignment.

(3) Read the message and click Print Head Alignment.

Two pattern sheets are printed. It takes about four minutes to complete printing. Do not open the Top Cover while printing.

Print head alignment is automatically adjusted by printing the patterns. The printer is now ready to use.
Note: If the patterns are not printed successfully, refer to “Eleven flashes” in “Handling Error Messages” on page 73.

- If results of Automatic Print Head Alignment are not satisfactory, refer to “Routine Maintenance” of the User’s Guide and align the Print Head manually.
- Clicking Check Setting prints the current settings and finishes the print head alignment.
- Two different patterns other than the ones shown above may be printed if you align the Print Head automatically for the first time after installing the printer driver.

Macintosh

1. With the printer on, load two sheets of Letter-sized plain paper in the Auto Sheet Feeder.

   Important: If other than Letter-sized paper is loaded, you cannot print the print head alignment patterns. Be sure to use Letter-sized plain paper.

2. Open the Canon IJ Printer Utility dialog box.
   (1) Select Applications from the Go menu, and then double-click the Utilities folder.
   (2) Double-click the Printer Setup Utility icon.
       When using Mac OS X v.10.2.8, double-click the Print Center icon.
   (3) Select the name of your printer from the Name list and click Utility.
       When using Mac OS X v.10.2.8, select the name of your printer from the Name list and click Configure.
   (4) Select the name of your printer from the Product list and click Maintenance.

3. Print the pattern.
   (1) Select Test Print from the pop-up menu.
   (2) Click Print Head Alignment.
Two pattern sheets are printed. It takes about four minutes to complete printing. Do not open the Top Cover while printing.
Print head alignment is automatically adjusted by printing the patterns. The printer is now ready to use.

Note
- If the patterns are not printed successfully, refer to “Eleven flashes” in “Handling Error Messages” on page 73.

- Clicking Check Setting prints the current settings and finishes the print head alignment.
- Two different patterns other than the ones shown above may be printed if you align the Print Head automatically for the first time after installing the printer driver.
Troubleshooting

This section provides troubleshooting tips for the most common printing problems. Troubleshooting usually falls into one of the following categories.

- “Cannot Install the Printer Driver or an Application Program” on page 63
- “Cannot Connect to PC Properly” on page 64
- “Print Results Not Satisfactory or Contains Errors” on page 65
- “Troubleshooting Printer Hardware” on page 68
- “Paper Does Not Feed Properly” on page 71
- “Paper Jams” on page 72
- “Handling Error Messages” on page 73
- “An Error Message Appears on the Screen” on page 76
- “Cannot Print Properly from the Digital Camera” on page 80

Refer to the User's Guide for additional information on topics not covered in this section.

Windows

When an Error Occurs

When an error occurs in printing such as the printer is out of paper or paper jams, a troubleshooting message is displayed automatically. Take the appropriate action described in the message.

The message may vary depending on the version of your Windows operating system.

  9. Carefully follow the procedures described in the *Easy Setup Instructions* and reinstall the driver.

**Easy-PhotoPrint Pro does not start up or Easy-PhotoPrint Pro menu does not appear**

- If the Easy-PhotoPrint Pro menu does not appear on Adobe Photoshop although you have installed Easy-PhotoPrint Pro, make sure that Adobe Photoshop is not running and install Adobe Photoshop Plug-In as described below.

  **Windows**

  1. Click **Start**, and select **All Programs** (or **Programs**), **Canon Utilities**, **Easy-PhotoPrint Pro** and then **Photoshop Plug-In Installer**.
  2. Follow the on-screen instructions to install Adobe Photoshop Plug-In.

  **Macintosh**

  1. Select **Applications** from the **Go** menu, and double-click the **Canon Utilities** folder, the **Easy-PhotoPrint Pro** folder and then the **Plug-In Installer** icon.
  2. Follow the on-screen instructions to install Adobe Photoshop Plug-In.

  **Note** In Macintosh

If the paper tears and a piece remains inside the printer, open the Top Cover and remove it. After removing all paper, close the Top Cover, turn the printer off and turn it back on.

**Caution** Be careful not to touch the components inside the printer at this time.

2. Reload the paper into the printer, and press the **RESUME/CANCEL** button on the printer.
   - Set the Paper Guide correctly when printing from the Auto Sheet Feeder. The paper may not feed properly if the Paper Guide is not set correctly.
   - See step (3) in “Load the paper.” on page 6.
   - If you have turned off the printer in step 1, you will need to try printing again, because this operation cancels any print jobs in progress.

**Note** When reloading the paper into the printer, refer to “**Paper Does Not Feed Properly**” on page 71 to confirm that you are using the correct paper and are loading it into the printer correctly.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the Customer Care Center.
# Handling Error Messages

When a printer error occurs, the **ALARM** lamp flashes orange in the way as shown below. The number of flashes (orange) indicates the type of error that has occurred. Count the flashes and take the appropriate action to correct the error.

| Four flashes      | The ink tank installed may not be installed properly/The ink has run out | Possible causes are as follows:  
  - The ink tank may not be installed properly (The lamp on the ink tank is off). Install the appropriate ink tank.  
  - The ink has run out (The lamp on the ink tank flashes). Replace the ink tank, and close the Top Cover.  
  If printing is in progress and you want to continue printing, press the **RESUME/CANCEL** button with the ink tank installed. Then printing can continue under the ink out condition. Replace the empty ink tank immediately after the printing. The printer may be damaged if printing is continued under the ink out condition.  
  **Note** If multiple ink lamps are flashing, check how fast they flash. Fast flashing (at about one second interval) indicates the ink is empty. Slow flashing (at about three second interval) indicates ink is low. For details on different flashing speeds, see “Getting the Ink Level Information” on page 37. |

Eight flashes indicates that the ink absorber is nearly full. Press the **RESUME/CANCEL** button to cancel the error so you can continue printing. Before the ink absorber becomes completely full, contact the Customer Care Center. (You will need to replace a particular part of the printer.)

**Important** Canon recommends that you call for service as soon as this error occurs. Once the ink absorber becomes completely full, printing cannot be performed until the ink absorber is replaced. |
| Nine flashes      | A specified period of time has elapsed without receiving a response from the digital camera/The digital camera or digital video camcorder connected is not compatible with this printer | Disconnect the camera cable and reconnect it.  

**Note** Depending on the model or brand of your PictBridge compliant device, you may have to select a print mode before connecting the device. You may also have to turn on the device or select Play mode manually after connecting the device to the printer. Perform necessary operations according to the instruction manual supplied with your device. If the error is still unresolved, there is a possibility that you are using a digital camera or digital video camcorder that is not supported by this printer. PictBridge-compatible digital camera or digital video camcorder can be connected to your printer for Direct Printing. |

| Eleven flashes    | Automatic print head alignment failed/The Page Size setting does not match the size of the paper loaded in the printer |  When performing Automatic Print Head Alignment  
Possible causes are as follows:  
- Letter-sized paper is not loaded on the Auto Sheet Feeder.  
  Press the RESUME/CANCEL button on the printer to clear the error, then load two sheets of Letter-sized plain paper in the Auto Sheet Feeder.  
  Automatic print head alignment cannot be performed using paper from the Front Tray. For automatic print head alignment, always load paper in the Auto Sheet Feeder.  
- Print Head nozzles are clogged.  
  Press the RESUME/CANCEL button on the printer to clear the error, and then print out the nozzle check pattern to examine the print head condition.  
  See “Printing the Nozzle Check Pattern” on page 46 for information on how to print a nozzle check pattern.  
- The Paper Output Slot has been exposed to a strong light source preventing correct print head alignment.  
  Press the RESUME/CANCEL button to clear the error and move the printer to a darker location.  

After carrying out the above measures, if the problem continues after aligning the Print Head again, press the RESUME/CANCEL button to clear the error, and then perform manual print head alignment. For details on manual print head alignment, refer to “Aligning the Print Head” in the User’s Guide. |
| Twelve flashes    | The paper is not loaded correctly in the Front Tray | Press the RESUME/CANCEL button on the printer to clear the error, and then load the paper correctly in the Front Tray according to the procedure described in “Loading Paper in the Front Tray” on page 10 and try printing again. |
| Thirteen Flashes  | Ink level cannot be detected | The remaining ink level cannot be correctly detected.  
Replace the ink tank and close the Top Cover.  
Printing with an ink tank that was once empty may damage the printer.  
If you want to continue printing in this condition, you need to release the function for detecting the remaining ink level. Press and hold the RESUME/CANCEL button for at least 5 seconds, and then release it.  
* With this operation, releasing the function for detecting the remaining ink level is memorized. Please be advised that Canon shall not be liable for any printer malfunction or damage caused by refilled ink tanks. |
| Fourteen flashes  | The ink tank cannot be recognized | The ink tank may not be compatible with this printer (The lamp on the ink tank is off).  
Install the appropriate ink tank.  
See “Replacing an Ink Tank” on page 36. |

Troubleshooting

Note

- PictBridge-compatible digital cameras can be connected to your printer for Direct Printing.
- This section describes errors that are indicated on Canon-brand PictBridge-compatible cameras. The error messages and operations may vary depending on the camera you are using.
  For errors on non-Canon PictBridge-compatible cameras, check the status of ALARM lamp and take the appropriate action to clear the error. For details, see “Handling Error Messages” on page 73.
- Connecting a digital camera not compatible with PictBridge makes the ALARM lamp on your printer flash (in orange) nine times. In such a case, unplug the cable connecting the camera to the printer to clear the error.
- A communication time out occurs if printing takes a long time or if it takes too much time to send data. This may stop printing. In such a case, disconnect the cable between the printer and the camera, and reconnect it. Then, turn the camera on, if it does not automatically turn on. If the problem is still unresolved, select some other photo and check if it can be printed or not.
- Depending on the model or brand of your device, you may have to select a print mode compliant with PictBridge before connecting the device.
  You may also have to turn on the device or select Play mode manually after connecting the device to the printer.
  Perform necessary operations according to the instruction manual supplied with your device.
- The print head nozzles may be clogged if printing becomes faint or colors are incorrect. See “When Printing Becomes Faint or Colors are Incorrect” on page 45.
- If the paper is curled or its surface is scratched during printing, make sure that you are using the correct type of paper. If this error occurs even when you are using the correct type of paper, enable the Prevent paper abrasion setting. See “Print Results Not Satisfactory or Contains Errors” on page 65.
- For the errors indicated on the camera and their solution, also refer to the user’s manual of the camera. For other troubles on the digital camera, contact the manufacturer.

## Safety Precautions

Please read the safety warnings and cautions provided in this manual to ensure that you use your printer safely. Do not attempt to use printer in any way not described in this manual.

⚠️ **Warning**  You may cause an electric shock, fire or damage the printer if you ignore any of these safety precautions.

<table>
<thead>
<tr>
<th>Choosing a location</th>
<th>Do not place the printer close to flammable solvents such as alcohol or thinners.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power supply</td>
<td>Never attempt to plug in or unplug the printer from the power supply when your hands are wet.</td>
</tr>
<tr>
<td></td>
<td>Always push the plug all the way into the power outlet.</td>
</tr>
<tr>
<td></td>
<td>Never damage, modify, stretch or excessively bend or twist the power cord. Do not place heavy objects on the power cord.</td>
</tr>
<tr>
<td></td>
<td>Never plug the printer into a power socket that is shared with other equipment (extension lead/cord, 2- or 3-way adapter, etc.).</td>
</tr>
<tr>
<td></td>
<td>Never use the printer if the power cord is bundled or knotted.</td>
</tr>
<tr>
<td></td>
<td>If you detect smoke, unusual smells or strange noises around the printer, immediately unplug the printer at the power supply and call for service.</td>
</tr>
<tr>
<td></td>
<td>Periodically, unplug the printer and use a dry cloth to wipe off any dust or dirt collected on the plug and the power outlet. If the printer is placed at a location exposed to a lot of dust, smoke, or high humidity, the dust collected on the plug absorbs moisture and may cause insulation failure and fire.</td>
</tr>
<tr>
<td>Cleaning the printer</td>
<td>Use a damp cloth to clean the printer. Never use flammable solvents such as alcohol, benzene or thinners. If flammable solvents come in contact with electrical components inside the printer, it could cause a fire or electric shock.</td>
</tr>
<tr>
<td></td>
<td>Always unplug the printer from the power outlet before cleaning the printer. If you accidentally switch the printer on while cleaning it, you could injure yourself or damage the printer.</td>
</tr>
<tr>
<td>Maintaining the printer</td>
<td>Do not attempt to disassemble or modify the printer. There are no user serviceable parts inside the printer. The printer contains high-voltage components. Never attempt any maintenance procedure not described in this guide.</td>
</tr>
<tr>
<td>Working around the printer</td>
<td>Do not use flammable sprays near the printer. This could cause a fire or electric shock if the spray comes into contact with electrical components inside the printer.</td>
</tr>
</tbody>
</table>
You may cause injury or damage the printer if you ignore any of these safety precautions.

| Choosing a location | Do not install the printer in a location that is unstable or subject to excessive vibration.  
Do not install the printer in locations that are very humid or dusty, in direct sunlight, outdoors, or close to a heating source.  
To avoid the risk of fire or electric shocks, install the printer in a location with an ambient temperature range of 5°C to 35°C (41°F to 95°F) and humidity of 10% to 90% (condensation free).  
Do not place the printer on a thick rug or carpet.  
Do not place the printer with its back attached to the wall. |
| Power supply | Ensure that the area around the power outlet is kept clear at all times so you can easily unplug the power cord if necessary.  
Never remove the plug by pulling on the cord.  
Do not use an extension lead/ cord.  
Never use a power supply source other than the one rated for the printer in the country where you purchased the printer.  
AC 110-240 V, 50/60 Hz |
| Working around the printer | Never put your hands or fingers in the printer while it is printing.  
Do not place any object on the printer.  
Do not place metal objects (paper clips, staples, etc.) or containers of flammable solvents (alcohol, thinners, etc.) on top of the printer.  
If any foreign object (metal or liquid) fall into the printer, unplug the power cord and call for service.  
Do not transport or store the printer on a slant, vertically or upside-down, as the ink may leak and damage the printer. |
| Print heads and ink tanks | For safety reasons store Print Heads and ink tanks out of the reach of small children.  
If a child ingests any ink, consult a doctor immediately.  
Do not shake Print Heads or ink tanks.  
Ink may leak out and stain clothing or the surrounding area.  
Never touch the electrical contacts on a Print Head after printing.  
The metal parts may be very hot and could cause burns. |
Regulatory Information

FCC Notice (U.S.A. Only)

For 120V, 60Hz model
Model Number: K10271
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of a shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

This digital apparatus does not exceed Class B limits for radio noise emissions from a digital apparatus as set out in the interference-causing equipment standard entitled “Digital Apparatus”, ICES-003 of the Industry Canada.

Cet appareil numérique respecte les limites de bruits radioélectriques applicables aux appareils numériques de Classe B prescrites dans la norme sur le matériel brouilleur NMB-003 d’Industrie Canada intitulée «Appareils numériques».
Canon U.S.A., INC. LIMITED WARRANTY --- (USA Only)

The limited warranty set forth below is given by Canon U.S.A., Inc. ("Canon USA") with respect to the new or refurbished Canon brand product ("Product") packaged with this limited warranty, when purchased and used in the United States only. The Product is warranted against defects in materials and workmanship under normal use and service (a) for a period of one (1) year from the date of original purchase when delivered to you in new condition in its original container or (b) for 90 days from the date of original purchase for refurbished Products. Defective parts or a defective Product returned to a Canon USA repair facility or a Canon USA Authorized Service Facility ("ASF"), and proven to be defective upon inspection will be (a) repaired; (b) exchanged for new or comparable rebuilt, recovered, remanufactured, repaired and/or recycled parts; or (c) exchanged for a refurbished Product, as determined by the Canon USA repair facility or the ASF. Warranty repair or replacement shall not extend the original warranty period of the Product. A dated proof of purchase is required at the time of warranty service. A copy of your dated bill of sale will satisfy this requirement. This warranty does not cover any accessories, or any consumables, such as paper or ink cartridges, as to which there shall be no warranty or replacement.

This limited warranty shall only apply if the Product is used in conjunction with compatible computers, peripheral equipment and software. Canon USA shall have no responsibility for such items except for compatible Canon brand peripheral equipment covered by a separate warranty ("Separate Warranty"). Repairs of such Canon brand peripheral equipment shall be governed and software. Canon USA shall have no responsibility for such items except for compatible Canon brand peripheral equipment covered by a separate warranty ("Separate Warranty"). Repairs of such Canon brand peripheral equipment shall be governed by the terms of the Separate Warranty. Non-Canon brand equipment and software that may be distributed with the Product are sold "as is" and without warranty of any kind by Canon USA, including any implied warranty regarding merchantability or fitness for a particular purpose, and all such warranties are disclaimed. The sole warranty, if any, with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

This limited warranty covers all defects encountered in normal use of the Product and does not apply in the following cases:

(a) Loss of or damage to the Product due to abuse, neglect, mishandling, improper packaging by you, alteration, accident, electrical current fluctuations, improper use, failure to follow operating or maintenance instructions in, or environmental conditions prescribed in, Canon USA’s user’s manual or other documentation, or services performed by someone other than a Canon USA repair facility or ASF. Without limiting the foregoing, dropping the Product, scratches, and abrasions will be presumed to have resulted from misuse, abuse or failure to operate the Product as set forth in the user’s manual or other documentation for the Product.

(b) Use of parts, media, software or supplies (other than those sold by Canon USA), including non-Canon ink cartridges or refill ink cartridges, that cause damage to the Product or cause abnormally frequent service calls or service problems.

(c) If the Product has had its serial number or dating defaced, altered or removed.

ANY SYSTEM SOFTWARE (WHETHER FACTORY LOADED ON THE PRODUCT OR CONTAINED ON THE SOFTWARE DISKETTES OR CD-ROMS ENCLOSED WITH, OR ACCOMPANYING, THE PRODUCT), AND ANY UTILITY SOFTWARE, DISTRIBUTED WITH OR FOR THE PRODUCT, IS SOLD ”AS IS” AND WITHOUT WARRANTY BY CANON USA. THE SOLE WARRANTY WITH RESPECT TO SUCH SOFTWARE IS CONTAINED IN THE SOFTWARE MANUFACTURER’S LICENSE AGREEMENT DISTRIBUTED THEREWITH, INCLUDING ANY LIMITATIONS AND DISCLAIMERS THEREON. PLEASE CONTACT CANON USA IMMEDIATELY IF YOU HAVE NOT RECEIVED A COPY OF THE SOFTWARE MANUFACTURER’S LICENSE AGREEMENT.

NO IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE, AND NO OTHER EXPRESS WARRANTY OR GUARANTY, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT SHALL BIND CANON USA, OR ITS ASF. (SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.) CANON USA SHALL NOT BE LIABLE FOR LOSS OF REVENUES OR PROFITS, INCONVENIENCE, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OR CORRUPTION OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE, OR INABILITY TO USE THE PRODUCT REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF CANON USA OR ITS ASF HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CANON USA OR ITS ASF BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF THE POSSESSION, USE, MISUSE, OR INABILITY TO USE THE PRODUCT SOLD BY CANON USA NOT CAUSED SOLELY AND DIRECTLY BY THE NEGLIGENCE OF CANON USA, OR ITS ASF. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.) THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT, AND STATES YOUR EXCLUSIVE REMEDY.
Canon USA offers a range of customer technical support* options:

- Interactive troubleshooting, e-mail technical support, the latest driver downloads and answers to frequently asked questions (www.canontechsupport.com)
- Toll-free live technical support Monday—Saturday (excluding holidays) at 1-800-828-4040
- Telephone Device for the Deaf (TDD-1-866-251-3752)

** Repair or Exchange Service Options:**

In the event service is required for the Product during the limited warranty period, Canon USA offers two hardware support options:

**Authorized Service Facility Carry-In / Mail-In Service**

Canon USA’s Carry-In/Mail-In Service provides repair or exchange, at Canon USA’s option, through Canon USA’s Authorized Service Facility (ASF) network. The name and telephone number of the ASF(s) near you may be obtained from Canon USA’s Web site at www.canontechsupport.com or by calling the Canon USA Customer Care Center at 1-800-828-4040, or any time while speaking to a technical support person. A Product covered by this limited warranty will be repaired or exchanged, as determined by Canon USA, and returned without charge by the ASF.

**InstantExchange Service** **

A Canon Customer Care Center or ASF technician will attempt to diagnose the nature of the problem and, if possible, correct it over the telephone. If the problem cannot be corrected over the telephone, and you elect the InstantExchange option, a reference number will be issued to you. You will be asked for the Product serial number and other information pertaining to your defective Product and for a ship-to location for the replacement Product (must include street address). The Canon USA repair facility will ship out the replacement Product, via 2nd day Air freight service, prepaid by Canon USA. After receipt of the replacement Product (with instructions and a prepaid waybill), follow the enclosed instructions on how to ship the defective Product to the Canon USA repair facility. The defective Product must be returned in the shipping carton in which the replacement Product was packed and include the reference number, A COPY OF YOUR DATED PROOF OF PURCHASE (BILL OF SALE), and a complete explanation of the problem. DO NOT INCLUDE ANY OTHER ITEMS WITH THE DEFECTIVE PRODUCT IN THE RETURN SHIPPING CARTON, AND BE SURE TO RETAIN YOUR PRINthead AND INK CARTRIDGE(S) AND TANK(S).

InstantExchange Service expedites, usually by the second business day, the exchange of a defective Product with a replacement Product, which will normally be shipped the same day if your request for this service is by 3 p.m. E.T. Monday through Friday, except holidays (three (3) business day InstantExchange Service for Alaska and Hawaii). Canon USA does not guarantee expedited shipping service in the event of the occurrence of factors beyond its reasonable control. The replacement Product you receive may be a refurbished or reconditioned unit and will be covered for the balance of the period remaining on your original limited warranty. NOTE THAT BY USING THIS SERVICE YOU WILL KEEP THE REPLACEMENT PRODUCT THAT IS SENT TO YOU. CANON USA WILL RETAIN THE DEFECTIVE PRODUCT THAT YOU ORIGINALy PURCHASED, WHICH SHALL BECOME THE PROPERTY OF CANON USA. InstantExchange warranty program service is available only during the express limited-warranty period for your Product and only in the continental United States, Alaska and Hawaii during such period.

This limited warranty gives you specific legal rights, and you may also have other rights, which vary from state to state.

* Support program specifics are subject to change without notice.

** InstantExchange warranty service is subject to the availability of refurbished or new replacement units.
