1 Prepare the Machine

1. Lift the Scanning Unit (Printer Cover) until it locks into place, open the Paper Output Tray, then take out the Print Head, ink tanks and power cord from inside the machine.

2. Install the Print Head from its package.

3. Install the Ink Tanks.

4. Align the Print Head.
USB connection is explained here. For wired LAN connection, refer to the Network Setup Guide.

**Windows**

### 5 Software Installation

- **When the list of applications to install appears, confirm the contents, then click Install.**
- **Note**
  - Use the cursor over items to display explanations of each application.
- **Read the License Agreement carefully and click Yes.** The software installation screen may appear during the installation process. Read the contents on the screen and follow the on-screen instructions to install the software.
- **When the Setup Method screen appears, select Use the printer via USB.** Then, click Next.
- **When the Printer Connection screen appears, connect one end of the USB cable to the computer, the other to the machine, then TURN THE MACHINE ON.** The software will begin identifying the printer port being used.
- **Important**
  - If you cannot go to the next procedure after three minutes, refer to “Cannot Install the MP Drivers” in the Quick Start Guide.

#### Insert the Setup CD-ROM

If the setup program does not run automatically, refer to “Cannot Install the MP Drivers” in the Quick Start Guide.

#### When the Setup Complete screen appears, click Next.

- **When the User Registration screen appears, click Next.**
- **Note**
  - If you want to select particular items to install, click Custom Install and follow the on-screen instructions to proceed with the installation.

#### When the main menu appears, click Easy Install.

The MP Drivers, On-screen Manuals, and application software are installed automatically.

#### When the list of applications to install appears, confirm the contents, then click Install.

**Note**
- Use the cursor over items to display explanations of each application.
- **Read the License Agreement carefully and click Yes.** The software installation screen may appear during the installation process. Read the contents on the screen and follow the on-screen instructions to install the software.
- **When the Setup Method screen appears, select Use the printer via USB.** Then, click Next.

#### When the Printer Connection screen appears, connect one end of the USB cable to the computer, the other to the machine, then TURN THE MACHINE ON.** The software will begin identifying the printer port being used.

- **Important**
  - If you cannot go to the next procedure after three minutes, refer to “Cannot Install the MP Drivers” in the Quick Start Guide.

**Macintosh**

### 5 Software Installation

- **When the Registration screen appears, click Next.**
- **Note**
  - To register later, click Cancel and go to Step 5. After software installation is complete, double-click the Setup CD-ROM on the desktop.
  - If your network is connected to the Internet, the registration screen will appear. Follow the on-screen instructions to register your product. You will need your product serial number, which is located on the inside of the machine. See Step 1-6 on the front page.

#### When the Installation completed successfully screen appears, click Restart.

- **Note**
  - Keep the CD-ROM in a safe place in case you need to reinstall the software.

#### When using Mac OS X v.10.3.9:

- Restarting the computer while connected to the machine may cause the machine to not be detected. To resolve this, either unplug the USB cable then plug it back in again, or turn the machine off then back on again.

- **Note**
  - XXX FAX (where “XXX” is your machine’s name) is shown in the Printer Name list (Product list in Mac OS X v.10.3.9), but you cannot add XXX FAX. You cannot send faxes from your computer via the machine.

- **When the Canon IJ Network Tool screen appears, select USB connection, then click OK.**

Software installation is now complete.
