Things You Can Do

Specify a recipient with a single key

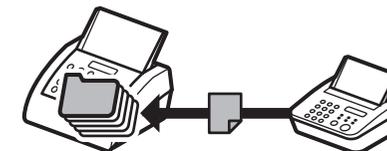

One-Touch Speed Dialing Keys
→ p. 3-14

Look up a particular recipient

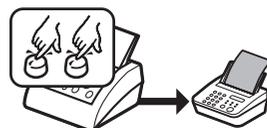

Address Book Search
→ p. 3-15

Receive faxes in memory without printing out

Memory Lock Reception
→ p. 3-25

Specify a recipient with a two-digit code

Coded Speed Dialing Codes
→ p. 3-14

Redial when the line is busy

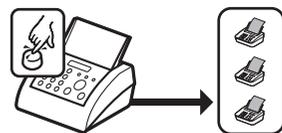

Redialing
→ p. 3-19

Reject faxes without their numbers

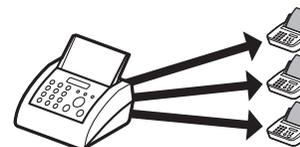

RX Restriction
→ p. 3-28

Specify multiple recipients as a group

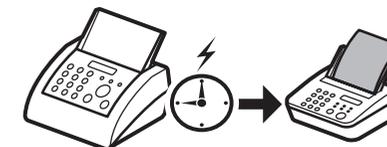

Group Dialing
→ p. 3-15

Send documents to multiple recipients

Broadcasting
→ p. 3-30

Send a fax at a specified time

Delayed Sending
→ p. 3-30

The following symbols are used throughout the manuals for the machine and indicate the warnings, cautions and notes you should keep in mind when using the machine.

WARNING

Indicates a warning that may lead to death or serious injury if not observed.

CAUTION

Explains how to avoid actions that could injure you or damage your machine.

NOTE

Explains operating restrictions and how to avoid minor difficulties.

In addition, this guide uses distinctive notations to identify keys and information in the LCD:

- The keys you press appear in square brackets: [Stop/Reset].
- Information in the LCD appears in angle brackets: <LOAD PAPER>.
- The items appear on the PC (Menus, Menu commands, buttons etc.) in square brackets: [Save].

Handset

The handset is used to use the machine as a telephone and a fax machine, and to receive faxes manually.

Use a sharp object (i.e., pen) to select the ring volume of the handset.

NOTE

For how to install the handset, see "Before FAX Setting," in the Starter Guide.

■ Maintaining the Handset

- Do not leave the handset exposed to direct sunlight.
- Do not install the handset in hot or humid conditions.
- Do not spray aerosol polish on the handset as it may cause damage.
- Use a damp cloth to wipe clean the handset.

Toner Cartridge

The lifetime of the Canon genuine starter toner cartridge which comes with the machine is approximately 1,000 pages, the Canon genuine replacement toner cartridge is approximately 2,000 pages. The page counts are based on 5% coverage* when printing A4 size paper with the default print density setting. The level of toner consumption varies depending on the type of documents printed. If your average document contains a lot of graphics, tables, or charts, the life of the toner cartridge will be shorter as they consume more toner. When you are replacing a toner cartridge, be sure to use a toner cartridge designed for this product. To purchase the Canon genuine replacement toner cartridge, contact your local Canon dealer or Canon Customer Care Center (U.S.A.:1-800-828-4040, Canada:1-800-652-2666).

* The term "5% coverage" denotes a document on which the area covered with toner is 5% of the total area of a sheet.

Toner Cartridge name:
Canon Cartridge 104

Model Name	Type	Supported Canon Genuine Cartridge	Print Yield
L90	Bundled	Canon Cartridge 104 Starter	Approx. 1,000 pages
	Replacement	Canon Cartridge 104	Approx. 2,000 pages

Maintaining the Toner Cartridge

- Keep the toner cartridge away from computer screens, disk drives, and floppy disks. The magnet inside the toner cartridge may harm these items.
- Avoid locations subject to high temperature, high humidity, or rapid changes in temperature.
- Do not expose the toner cartridge to direct sunlight or bright light for more than five minutes.
- Store the toner cartridge in its protective bag. Do not open the bag until you are ready to install the toner cartridge in the machine.
- Save the toner cartridge's protective bag in case you need to repack and transport the toner cartridge at a later date.
- Do not store the toner cartridge in a salty atmosphere or where there are corrosive gases such as from aerosol sprays.
- Do not remove the toner cartridge from the machine unnecessarily.
- Do not open the drum protective shutter on the toner cartridge. Print quality may deteriorate if the drum surface is exposed to light or is damaged.

- Always hold the toner cartridge by its handle to avoid touching the drum protective shutter.
- Do not stand the toner cartridge on end, and do not turn it upside down. If toner becomes caked in the toner cartridge, it may become impossible to free it even by shaking the toner cartridge.
- If there is a toner powder leakage, make sure not to inhale or touch the toner powder. If it comes in contact with your skin, rinse with cold water using soap. If you feel an irritation on your skin or inhale the powder, consult a doctor immediately.
- When removing the toner cartridge from the machine, make sure to remove it carefully. If not removed with care, the toner powder may scatter and come in contact with your eyes and mouth. If this happens, rinse with water and consult a doctor immediately.
- Keep the toner cartridge away from small children. If they ingest the toner powder, consult a doctor immediately.
- Do not disassemble the toner cartridge. The toner powder may scatter and come in contact with your eyes and mouth. If this happens, rinse with water and consult a doctor immediately.

CAUTION

Do not place the toner cartridge in fire. Toner powder is flammable.

Telephone Line Setting

■ Setting the Telephone Line Type

The default setting is <TOUCH TONE>.

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <USER SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <TEL LINE TYPE>, then press [OK].

5. Press [◀] or [▶] to select the telephone line type, then press [OK].

<TOUCH TONE>: Tone dialing

<ROTARY PULSE>: Pulse dialing

If you do not know the type of telephone line you use, contact your local telephone company.

6. Press [Stop/Reset] to return to the standby mode.

Timer Settings

■ Setting the Sleep Mode

When the machine remains idle for a certain period of time, it automatically enters the Sleep mode.

The default settings are <ON> and <5MIN.>.

1. Press [Menu].
2. Press [◀] or [▶] to select <TIMER SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <AUTO SLEEP>, then press [OK].
4. Press [◀] or [▶] to select <ON>, then press [OK].
5. Press [◀] or [▶] to select the desired interval, then press [OK].

You can set the interval from 3 to 30 minutes (in one-minute increments).

You can also enter values using numeric keys.

NOTE

The default setting is 5 minutes.

6. Press [Stop/Reset] to return to the standby mode.

NOTE

- [Energy Saver] lights green when the machine enters the Sleep mode.
- To resume the normal mode from the Sleep mode, press [Energy Saver] on the operation panel.
- To enter the Sleep mode manually, press [Energy Saver] on the operation panel.
- The machine will not enter the Sleep mode when:
 - the machine is in operation
 - the Processing/Data indicator lights or flashes
 - a message appears on the display
 - a paper jam occurs in the machine
 - the handset or the handset of the external telephone is off the hook
- The machine will leave the Sleep mode when:
 - you press [Energy Saver] on the operation panel
 - a fax is received
 - the handset or the handset of the external telephone is off the hook
 - a print job is sent from a computer, and the print is started

■ Setting Daylight Saving Time

In some countries or areas, time is advanced throughout the summer season. This is called "Daylight Saving Time."

The default setting is <OFF>.

1. Press [Menu].
2. Press [◀] or [▶] to select <TIMER SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <DAYLIGHT SV.TIME>, then press [OK].
4. Press [◀] or [▶] to select <ON>, then press [OK].
5. Press [◀] or [▶] to select <START DATE/TIME>, then press [OK].
6. Press [◀] or [▶] to select <MONTH>, then press [OK].
7. Press [◀] or [▶] to select the month, then press [OK].
8. Press [◀] or [▶] to select <WEEK>, then press [OK].
9. Press [◀] or [▶] to select the week, then press [OK].
10. Press [◀] or [▶] to select <DAY>, then press [OK].
11. Press [◀] or [▶] to select the day, then press [OK].
12. Press [Menu].
13. Press [◀] or [▶] to select <END DATE/TIME>, then press [OK].

Document Requirements

Size (W x L)	Quantity (for 25 lb bond (75 g/m ²) paper)	Weight
Max. 8 1/2" x 15 3/4" (Max. 216 x 400 mm)	– Max. 30 A4- or Letter-size sheets – Max. 10 Legal-size sheets or the stack height of 1/4" (5 mm)	17 to 28 lb bond (64 to 105 g/m ²)
Min. 5 7/8" x 4 1/8" (Min. 148 x 105 mm)		

NOTE

If using fine art paper, it should be 0.004 in. (0.1 mm) or thicker per sheet.

- **Do not place the document in the ADF until the glue, ink or correction fluid on the document is completely dry.**
- **To prevent document jams, do not use any of the following:**
 - Wrinkled or creased paper
 - Carbon paper or carbon-backed paper
 - Curled or rolled paper
 - Coated paper
 - Torn paper
 - Onion skin or thin paper
 - Documents with staples or paper clips attached
 - Paper printed with a thermal transfer printer
 - Transparencies

Paper Requirements

Paper Size Setting	Weight	Quantity
LTR, LGL, A4, B5*, A5*, Executive*, Envelope* (COM10, Monarch, DL, ISO-C5 (6 3/8" x 9" (162 x 229 mm)), Oficio, Brazil-Oficio, Mexico-Oficio, Folio, Government-LTR, Government-LGL, Foolscap, Custom paper* (3" x 5" to 8 1/2" x 14" (76 x 127 to 216 x 356 mm))	17 to 34 lb bond (64 to 128 g/m ²)	Max. stack height: 5/8" (15 mm) (Approx. 150 sheets of 21 lb bond (80 g/m ²) paper)

* Only for PC printing

Paper Type Setting	Paper Type	Weight
Plain Paper	Plain paper	17 to 24 lb bond (64 to 90 g/m ²)
Plain Paper L		
Heavy Paper	Heavy paper	28 to 34 lb bond (105 to 128 g/m ²)
Heavy Paper H		
Transparency	Transparencies	

NOTE

- The default paper size is LTR. If you use a different paper size, you must change the paper size settings. (See "Setting Paper Size and Type," on p. 2-11.)
- For transparencies, you can load only up to 100 sheets.

● To prevent paper jams, do not use any of the following:

- Wrinkled or creased paper
- Curled or rolled paper
- Coated paper
- Torn paper
- Damp paper
- Very thin paper
- Paper which has been printed on using a thermal transfer printer (Do not copy on the reverse side.)

● The following types of paper do not print well:

- Highly textured paper
- Very smooth paper
- Shiny paper

- Make sure the paper is free from dust, lint, and oil stains.
- Be sure to test paper before purchasing large quantities.
- Store all paper wrapped and on a flat surface until ready for use. Keep opened packs in their original packaging in a cool, dry location.
- Store paper at 64.4°F–75.2°F (18°C–24°C), 40%–60% relative humidity.
- Use only the transparencies designed for laser printers. Canon recommends you to use Canon type transparencies with this machine.

Loading Paper

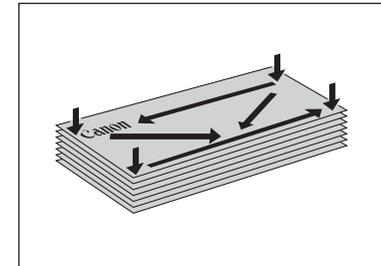

To load paper in the paper feeder, see “Set Up the Machine,” in the Starter Guide.

■ Loading Envelopes

- Use standard envelopes with diagonal seams and flaps.
- Make sure to set the correct envelope size in the printer driver. (See [Online Help](#).)
- To prevent jams, do not use the following:
 - Envelopes with windows, holes, perforations, cutouts, and double flaps
 - Envelopes made with special coated paper or deeply embossed paper
 - Envelopes with peel-off sealing strips
 - Envelopes with letters enclosed

1. Place the stack of envelopes on a firm, flat surface, and press down firmly on the edges to make the folds crisp.

Press all the way around the envelopes to remove any curls and expel air from inside the envelopes. Make sure that the stack is flat before loading it in the machine.

- Adjust the side paper guides to the size of the stack.

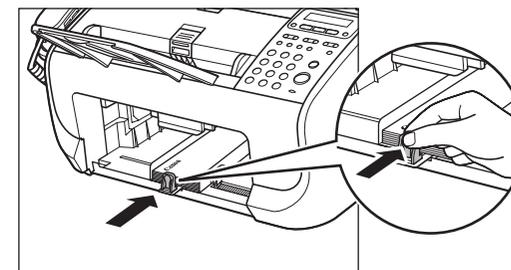

NOTE

If the paper guides are not adjusted correctly for the size of the envelopes, the quality of your printouts may be adversely affected.

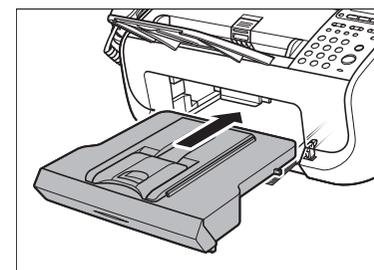

- Push back the paper guide rail to the front edge of the stack.

- Pinch and slide the front paper guide to match the envelope size.

- Insert the paper stack cover.

NOTE

Make sure the back end of the cover does not catch and lower the scanning platform.

Setting Paper Size and Type

The default setting is <LTR> and <PLAIN PAPER>. When you place other sizes and/or types of paper, follow this procedure to change the settings.

1. Press [Menu].
2. Press [◀] or [▶] to select <PAPER SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <CASSETTE>, then press [OK].
4. Press [◀] or [▶] to select <PAPER SIZE>, then press [OK].
5. Press [◀] or [▶] to select the paper size, then press [OK].

You can select from the following paper sizes:
<LTR>, <LGL>, <A4>, <OFICIO>, <BRAZIL-OFICIO>, <MEXICO-OFICIO>, <FOLIO>, <GOVERNMENT-LETTER>, <GOVERNMENT-LEGAL>, and <FOOLSCAP>

**NOTE**

The available paper size will vary depending on the country where the unit was purchased.

6. Press [OK].

7. Press [◀] or [▶] to select <PAPER TYPE>, then press [OK].

8. Press [◀] or [▶] to select the paper type, then press [OK].

You can select from the following paper types:

<PLAIN PAPER> or <PLAIN PAPER L>*¹ for Plain paper (17 lb to 24 lb (64 g/m² to 90 g/m²))

<HEAVY PAPER> or <HEAVY PAPER H>*² for Heavy paper (Paper feeder: 28 lb to 34 lb (105 g/m² to 128 g/m²)), or Envelope <TRANSPARENCY> for Transparency

*¹ If paper curls excessively when printed with <PLAIN PAPER> selected, select <PLAIN PAPER L>.

*² If print fixing is not sufficient when printed with <HEAVY PAPER> selected, select <HEAVY PAPER H>.

9. Press [Stop/Reset] to return to the standby mode.

Scan Settings

You can adjust the image quality and density of the document you send. The higher image quality you set, the better the output will be, but the longer the transmission will take.

NOTE
These settings return to the default values after all documents are scanned. If you want to keep the settings, set the density and/or image quality as following;
[Menu] → <FAX SETTINGS> → <USER SETTINGS> → <STANDARD SETTINGS> → <DENSITY> or <IMAGE QUALITY>
(See "STANDARD SETTINGS," on p. 9-7.)

Image Quality

The default setting is <STANDARD>.

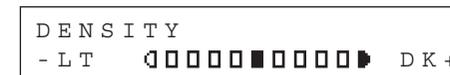

1. Press [Image Quality].
2. Press [←] or [→] to select the resolution, then press [OK].
 <STANDARD>: for most text-only documents (200 x 100 dpi)
 <FINE>: for fine-print documents (the resolution is twice that of <STANDARD>) (200 x 200 dpi)
 <PHOTO>: for documents that contain photographs (the resolution is twice that of <STANDARD>) (200 x 200 dpi)
 <SUPER FINE>: for documents that contain fine print and images (the resolution is four times that of <STANDARD>) (200 x 400 dpi)

Density

The default setting is (5).

1. Press [Density].
2. Press [←] or [→] to adjust the density, then press [OK].

Ex.

[←]: to make dark documents lighter.
[→]: to make light documents darker.

Storing/Editing Address Book

This machine provides you with various ways to specify the fax/telephone numbers besides using the numeric keys. You can register fax/telephone numbers to the Address Book. Once you have registered fax/telephone numbers using these functions, you can specify the fax/telephone numbers by simply pressing one or a combination of keys:

- **Using One-Touch Speed Dialing Keys (p. 3-14)**

You can specify fax/telephone numbers by pressing one-touch speed dialing keys. You can register up to 15 one-touch speed dialing keys, including group dialing.

- **Using Coded Speed Dialing (p. 3-14)**

You can specify fax/telephone numbers by pressing [Coded Dial] followed by two-digit code. You can register up to 100 coded speed dialing codes.

- **Using Group Dialing (p. 3-15)**

You can specify up to 15 groups of fax/telephone numbers registered in one-touch speed dialing keys. You can register up to 50 fax/telephone numbers in a group.

- **Using Address Book Key (p. 3-15)**

You can specify fax/telephone numbers by pressing [Address Book] and searching a fax/telephone number from Address Book.

■ Storing/Editing One-Touch Speed Dialing Keys/Coded Speed Dialing Codes

Registering One-Touch Speed Dialing Keys/Coded Speed Dialing Codes

1. Press [Menu].
2. Press [◀-] or [+▶] to select <ADDRESS BOOK SET.>, then press [OK].
3. Press [◀-] or [+▶] to select <1-TOUCH SPD DIAL> or <CODED DIAL>, then press [OK].
4. Press [◀-] or [+▶] to select a one-touch speed dialing key (01 to 15) or coded speed dialing code (00-99) for which you want to register the fax/telephone number, then press [OK].

You can also select a one-touch speed dialing key or coded speed dialing code by pressing the corresponding one-touch speed dialing key, or [Coded Dial] followed by the desired two-digit code.

- 5. Enter the recipient name (max. 20 characters, including spaces) with the numeric keys, then press [OK].

Ex.

N A M E	[A]
C a n	

If you do not want to register the recipient name, press [OK] again to proceed to the next.

- 6. Enter the fax/telephone number you register (max. 50 digits, including spaces and pauses) with the numeric keys, then press [OK].

Ex.

T E L N U M B E R E N T R Y
0 1 2 X X X X X X X X _

Press [Pause] to enter a pause. (See "Dialing an Overseas Number (With Pauses)," on p. 3-20.)

- 7. Press [◀] or [▶] to select <ON>, then press [OK].

If no subaddress or password is required, press [◀] or [▶] to select <OFF>, then press [OK]. And press [Stop/Reset] to return to the standby mode.

- 8. Enter the subaddress number you register (max. 20 digits) with the numeric keys, then press [OK].

If you want to attach a subaddress to your send job, make sure that the recipient's fax machine supports ITU-T standard subaddresses.

Ex.

S U B A D D R E S = 1 2 3 4 _

- 9. Enter the password you register (max. 20 digits) with the numeric keys, then press [OK].

Ex.

P A S S W O R D = 5 6 7 8 _

- 10. Press [Stop/Reset] to return to the standby mode.

Specifying Recipients

Follow the procedure below to send documents to registered recipients.

■ Using One-Touch Speed Dialing Keys

You can specify up to 15 recipients using one-touch speed dialing keys.

NOTE
To use this feature, you must register recipients in one-touch speed dialing keys beforehand. (See "Storing/Editing Address Book," on p. 3-7.)

1. Set documents.

If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.

2. Press the desired one-touch speed dialing keys (01 to 15).

If you pressed a wrong key, press [Stop/Reset] and try again.

Ex.

```
☒ = 0 1 2 3 X X X X X X
[ 0 5 ] C A N O N
```

3. Press [Start].

■ Using Coded Speed Dialing Codes

You can specify up to 100 recipients using coded speed dialing codes.

NOTE
To use this feature, you must register recipients in coded speed dialing codes beforehand. (See "Storing/Editing Address Book," on p. 3-7.)

1. Set documents.

If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.

2. Press [Coded Dial].

3. Enter the desired two-digit code (00 to 99) with the numeric keys.

Ex.

```
☒ = 0 1 2 X X X X X X X X
[ * 0 1 ] C A N O N
```

If you entered a wrong code, press [Stop/Reset], then try again from step 2.

4. Press [Start].

■ Group Dialing

NOTE

To use this feature, you must register recipients in a group dialing beforehand. (See "Storing/Editing Address Book," on p. 3-7.)

1. Set documents.

If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.

2. Press the one-touch speed dialing key (01 to 15) under which the desired group dialing is registered.

If you pressed a wrong key, press [Stop/Reset], and perform step 2 again.

3. Press [Start].

■ Using Address Book Key

Address Book search enables you to search for a particular recipient registered in the machine. This is useful when you forget which one-touch speed dialing key or coded speed dialing code the recipient you want is registered under.

You can either go through all the recipients registered in the machine (<LIST>), or look up a particular one by their name (<SEARCH>).

NOTE

To use this feature, you must register destinations in Address Book beforehand. (See "Storing/Editing Address Book," on p. 3-7.)

Listing All Recipients

1. Set documents.

If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.

2. Press [Address Book].

If no recipient is registered for speed dialing, <NOT REGISTERED> is displayed.

3. Press [◀-] or [+▶] to select <LIST>, then press [OK].

Index

4. Press [**←**] or [**+**] to find the required recipient.
 - The recipients are listed in the order of one-touch speed dialing keys (01 to 15), and coded speed dialing codes (00 to 99).
 - For a one-touch speed dialing key or coded speed dialing code with no recipient name registered, their fax number is displayed.

5. Press [Start] to start dialing the displayed recipient.

Looking Up a Recipient

1. **Set documents.**
If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.
2. **Press [Address Book].**
If no recipient is registered for speed dialing, <NOT REGISTERED> is displayed.
3. Press [**←**] or [**+**] to select <SEARCH>, then press [OK].

4. Use the numeric keys to enter up to 10 first characters of the recipient's name, then press [OK].

Ex.

S E A R C H	[A]
C A N O N	

- Press [*****] to switch between input modes:
 - [A]: Letter mode
 - [1]: Number mode
- When the search is complete, the number of recipients that match the characters you entered is displayed in parentheses.
- Press [Clear] to run a new search.

5. Press [**←**] or [**+**] to find the required recipient.
 - [**←**]: displays recipients in order of registration.
 - [**+**]: displays recipients in reverse order.
6. When the recipient's name is displayed, press [Start].

Manual Sending

Use manual sending when you want to talk to the recipient before sending a document, or if the recipient does not have a fax machine that can receive automatically.

You cannot use group dialing for manual sending.

- 1. Connect the handset or an external telephone to the machine if you want to talk to the recipient before sending a document.**

For details on how to connect the handset or an external telephone to the machine, see "Before FAX Setting," in the Starter Guide.

- 2. Set documents.**

If you want to adjust the image quality and density, see "Scan Settings," on p. 3-6.

- 3. Press [Hook] or pick up the handset or the handset of your external telephone.**

- 4. Dial the recipient's fax/telephone number.**

Make sure to confirm the dial tone before entering a fax number. If you enter the number before the dial tone can be heard, the call may not connect, or the wrong number may be dialed.

- 5. Talk through the handset to the recipient.**

If you press [Hook] in step 3, you can pick up the handset when you hear the recipient's voice.

If you hear a high-pitched signal instead of the recipient's voice, go to step 7.

- 6. Ask the recipient to set their fax machine to receive faxes.**

- 7. When you hear a high-pitched signal, press [Start], then hang up the handset.**

Fax Dialing Features

■ Switching Temporarily to Tone Dialing

If your machine is set for pulse dialing, use the procedure below to switch to tone dialing to use information services (e.g., banks, airline reservations, and hotel reservations).

NOTE

To talk to the other party, you will need to connect an external telephone to the machine.

1. Press [Hook].

NOTE

Make sure to confirm the dial tone before entering a fax number. If you enter the number before the dial tone can be heard, the call may not be connected, or the wrong number may be dialed.

2. Use the numeric keys to dial the required information service.

3. When the recorded message of the information service answers, press [Tone] to switch to tone dialing.

4. Use the numeric keys to enter the numbers requested by the information service.

5. If you want to receive faxes, press [Start].

If you are using the external telephone, hang up the handset after pressing [Start].

■ Redialing

Redialing can be done manually or automatically. For automatic redialing, you can set how many times the machine redials and the time between redials.

Redialing Manually

1. Set documents.
2. Press [Redial].
3. Press [Start].

NOTE

When <RESTRICT REDIAL> is set to <ON> in the <ACCESS TO DEST.> of the <SYSTEM SETTINGS> menu, redialing is not available.

Redialing Automatically

The default settings are as follows:

- AUTO REDIAL: <ON>
- REDIAL TIMES: <2TIMES>
- REDIAL INTERVAL: <2MIN.>

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <TX SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <AUTO REDIAL>, then press [OK].
5. Press [◀] or [▶] to select <ON>, then press [OK].
6. Press [◀] or [▶] to select the number of redials the machine will make, then press [OK].

Ex.

REDIAL TIMES	2 TIMES
--------------	---------

You can also enter values with the numeric keys.

Back

7. Press [**←**] or [**+**] to select the time (in minutes) between redials, then press [OK].

Ex.

REDIAL INTERVAL
2 MIN .

You can also enter values with the numeric keys.

8. Press [Stop/Reset] to return to the standby mode.

■ Checking Dialing Line

Checking dialing line function enables you to configure the setting on whether to check for a dial tone. The default setting is <OFF>.

1. Press [Menu].
2. Press [**←**] or [**+**] to select <FAX SETTINGS>, then press [OK].
3. Press [**←**] or [**+**] to select <TX SETTINGS>, then press [OK].
4. Press [**←**] or [**+**] to select <DIALING LINE CHCK>, then press [OK].

5. Press [**←**] or [**+**] to select <ON>, then press [OK].

6. Press [Stop/Reset] to return to the standby mode.

■ Dialing an Overseas Number (With Pauses)

When you dial or register an overseas number, you may need to insert a pause within the number.

NOTE

Make sure the LCD shows the fax mode. If the LCD shows the copy mode, press [Stop/Reset].

1. Set documents.
2. Use the numeric keys to dial the international access code.
For details on international access codes, contact your local telephone company.
3. If necessary, press [Pause] to insert a pause.

Ex.

☎ = 1 2 3 P _

- The letter <P> is displayed between the numbers.
- <P> in the fax/telephone number represents 2.5-second pause.

Basic Receiving Method

Follow this procedure to set the machine for receiving faxes.
The default setting is <FaxOnly>.

Any data stored in the memory, including received fax documents, will be deleted if you disconnect the power cord of the machine.

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <RX MODE>, then press [OK].

4. Press [◀] or [▶] to select the receive mode, then press [OK].

<FaxOnly>: Answers all calls as faxes.

<AnsMode>: Receives faxes automatically and records voice messages.

<DRPD> (Distinctive Ring Pattern Detection): Distinguishes between fax and voice calls using distinctive ring patterns. Select the ring pattern assigned by your telephone company. For optional settings, see "DRPD: Optional Settings," on p. 3-24.

<FAX/TEL>: Switches between fax and voice calls automatically if the handset or an external telephone is connected to the machine. For optional settings, see "FAX/TEL: Optional Settings," on p. 3-23.

<MANUAL>: Does not answer any calls. You have to manually receive faxes. See "Manual Reception," on p. 3-24.

- For <FAX/TEL> or <MANUAL>, make sure the handset or an external telephone is connected to the machine.
- For <AnsMode>, make sure an external telephone with built in answering machine is connected to the machine.
- For <DRPD>, subscription to a DRPD service is required. Contact your telephone company for availability.

5. Press [Stop/Reset] to return to the standby mode.

Receiving Features

You can set the fax receive mode to suit your needs, set the machine to receive fax documents into memory (memory lock), and use the external telephone connected to the machine to receive faxes manually (remote reception). You can also set how the received documents are printed.

■ FAX/TEL: Optional Settings

If required, change the optional settings as follows:

1. Press [Menu].
2. Press [◀-] or [+▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀-] or [+▶] to select <RX SETTINGS>, then press [OK].
4. Press [◀-] or [+▶] to select <FAX/TEL OPT. SET>, then press [OK].

5. For <RING START TIME>, press [◀-], [+▶], or the numeric keys to specify the duration (4 to 30 seconds) for which the machine attempts to detect the fax tone before it starts ringing, then press [OK].

If the machine receives a fax, the machine does not ring and switches to the receive mode automatically.
The default setting is <6SEC>.

6. For <F/T RING TIME>, press [◀-], [+▶], or the numeric keys to specify the duration (10 to 45 seconds) of ringing, then press [OK].

The default setting is <22SEC>.

7. For <F/T SWITCH ACTION>, press [◀-] or [+▶] to select the action the machine will take after the ringing ends, then press [OK].

The default setting is <RECEIVE>.

<RECEIVE>: Receives a fax.

<DISCONNECT>: Disconnects the call.

8. Press [Stop/Reset] to return to the standby mode.

■ DRPD: Optional Settings

When you select <DRPD> in <RX MODE>, select the ring pattern assigned by your telephone company. The default setting is <NORMAL RING>.

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <RX SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <DRPD:SELECT FAX>, then press [OK].
5. Press [◀] or [▶] to select a ring pattern, then press [OK].
 - <NORMAL RING>
 - <DOUBLE RING>
 - <SHORT-SHORT-LONG>
 - <SHORT-LONG-SHORT>
 - <OTHER RING TYPE>

6. Press [Stop/Reset] to return to the standby mode.

■ Manual Reception

When you select <MANUAL> in <RX MODE>, follow the procedure below to receive a fax.

1. When the telephone rings, pick up the external telephone.
2. Confirm that the modem's connecting sound is heard, then press [Start].
3. Hang up the external telephone.

■ Memory Reception

The machine automatically receives faxes in memory when printing is disabled under certain conditions (e.g., toner or paper has run out).

Load paper and press [OK] to start printing faxes stored in memory. For toner empty, the machine automatically starts printing when the error is cleared.

- The machine memory can store up to 346 fax jobs or approximately 346 pages.*
- * Based on the condition that the other party sends the fax by FAXPHONE L90 with ITU-T Standard Chart No.1, standard mode. The maximum number of pages that the machine's memory can store differs depending on the other party's machine.
- Once the pages are printed, they are deleted from the memory.
- If the memory becomes full, you will not be able to receive the remaining pages. Contact the other party and ask them to resend the remaining pages of the fax.

■ Memory Lock Reception

You can set the machine to store all documents in memory without automatically printing them.

The default setting is <OFF>.

1. Press [Menu].
2. Press [◀] or [▶] to select <SYSTEM SETTINGS>, then press [OK].
If the System Password has been set, enter the System Password using the numeric keys, then press [OK].
3. Press [◀] or [▶] to select <COMMUNICATIONS>, then press [OK].
4. Press [◀] or [▶] to select <MEMORY LOCK>, then press [OK].
If the memory lock password has already been set, enter the password, then press [OK].
5. Press [◀] or [▶] to select <ON>, then press [OK].

When you select <OFF>, the machine starts to print the received documents in memory.

- 6. If you want to set a password, press [◀-] or [+▶] to select <PASSWORD>, then press [OK].

If you do not need to set a password, skip to step 8.

- 7. Use the numeric keys to enter the memory lock reception password (up to seven digits), then press [OK].

Ex.

```
P A S S W O R D = 5 6 7 8 _
```

If the memory lock password has already been set, press [+▶] repeatedly to go to the digit you want to change, and then press [Clear]. Enter a new number with the numeric keys, then press [OK].

- 8. If you want to specify <MEMORY RX TIME>, press [◀-] or [+▶] to select <MEMORY RX TIME>, then press [OK].

If you do not need to set the timer for memory lock, skip to step 12.

- 9. Press [◀-] or [+▶] to select <ON>, then press [OK].

- 10. For <MEM. RX START TIME>, use the numeric keys to enter the start time (in 24-hour military time format), then press [OK].

Ex.

```
MEM . RX START TIME
      0 0 : 0 0
```

- 11. For <MEM. RX END TIME>, use the numeric keys to enter the end time (in 24-hour military time format), then press [OK].

- 12. Press [Stop/Reset] to return to the standby mode.

Printing All Documents Stored in Memory

1. Perform step 1 to 3 in "Memory Lock Reception," on p. 3-25.
2. Press [◀-] or [+▶] to select <MEMORY LOCK>, then press [OK].
3. Use the numeric keys to enter the memory lock reception password, then press [OK].
4. Press [◀-] or [+▶] to select <OFF>, then press [OK].
The received documents are printed.
5. Press [Stop/Reset] to return to the standby mode.

■ Remote Reception

Remote reception enables you to use an external telephone connected to the machine to receive faxes manually. This can be useful when the machine is not nearby or is being used by someone else.

The default settings are as follows:

- REMOTE RX: <ON>
- REMOTE RX ID: <25>

Registering Remote Reception ID

Follow this procedure if you want to change the default remote reception ID of 25.

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <RX SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <REMOTE RX>, then press [OK].
5. Press [◀] or [▶] to select <ON>, then press [OK].

6. Use the numeric keys to enter a new remote reception ID (a combination of two characters using 0 to 9), then press [OK].
7. Press [Stop/Reset] to return to the standby mode.

Receiving a Fax Remotely

1. When you receive a call, pick up the external telephone.
2. Use the numeric keys to enter the two-digit remote reception ID to start reception.

NOTE

If the machine is set for pulse dialing, press [Tone] to switch to tone dialing before pressing the remote reception ID.

3. When the reception is complete, hang up the telephone.

■ Selecting the Receive Mode for Printing

You can select whether the machine stores all received pages in the memory before printing them out or prints each page as it is received.

1. Press [Menu].
2. Press [◀-] or [+▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀-] or [+▶] to select <RX SETTINGS>, then press [OK].
4. Press [◀-] or [+▶] to select <RX PRINT>, then press [OK].
5. Press [◀-] or [+▶] to select desired printing method, then press [OK].
 <MEMORY RX>: Prints after all the pages of the document are received.
 <PRINT RX>: Prints each page as it is received.
6. Press [Stop/Reset] to return to the standby mode.

■ Reception Restriction

You can reject incoming faxes from the senders who do not transmit their fax numbers to your machine.

The default setting is <OFF>.

1. Press [Menu].
2. Press [◀-] or [+▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀-] or [+▶] to select <RX SETTINGS>, then press [OK].
4. Press [◀-] or [+▶] to select <RX RESTRICTION>, then press [OK].
5. Press [◀-] or [+▶] to select <ON>, then press [OK].
6. Press [Stop/Reset] to return to the standby mode.

■ Printing Received Documents

The machine provides the received image reduction.

Received Image Reduction

You can print received documents in a reduced size.
The default setting is <ON>.

1. Press [Menu].
2. Press [◀] or [▶] to select <FAX SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <PRINTER SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <RX REDUCTION>, then press [OK].
5. Press [◀] or [▶] to select desired setting, then press [OK].

<ON>: Reduces the documents automatically depending on the length of the documents.

<OFF>: Prints documents on a paper without reducing the size.

<CUT>: Cuts off the end of a document that does not fit on one page up to 1 in. (24mm). When the height of the area to be cut off is more than 1 in. (24mm), the document will be printed on the following page without being cut off.

6. Press [Stop/Reset] to return to the standby mode.

Advanced Features

The machine provides the following additional fax modes: **broadcasting, delayed sending, polling, and relay.**

■ Broadcasting

Broadcasting enables you to send the same document to multiple recipients.

NOTE

- A maximum of 131 recipients can be specified at the same time. (Out of the 131 recipients, a maximum of 16 recipients can be specified with the numeric keys.) If you specify a group, which is made up of several recipients, each recipient in the group is counted as a separate dialing.
- If you frequently send documents to multiple recipients, it is recommended that you store those recipients as a group.

- 1. Set documents.**
- 2. Press [Add. Mode].**
- 3. Press [←] or [→] to select <BROADCAST>, then press [OK].**

- 4. Specify the destination.**

Use the numeric keys, one touch speed dialing keys, coded speed dialing codes or [Address Book] key to specify recipients. Be sure to press [OK] after entering the recipient's number if you use the numeric keys. You can enter up to 16 different fax numbers using the numeric keys.

- 5. Repeat step 4 to enter all required destinations.**

To check all the specified destinations, press [←] or [→] to scroll the display.

- 6. Press [Start].**

■ Delayed Sending

Delayed sending enables you to start transmission at a specified time. You can combine other fax features with delayed sending.

- 1. Set documents.**
- 2. Press [Add.Mode].**

3. Press [**←**] or [**→**] to select **<DELAYED TX>**, then press [**OK**].
4. Use the numeric keys to enter the time of transmission (in 24-hour military time format), then press [**OK**].

Ex.

T X	T I M E	S E T . =	2 0 : 0 0
-----	---------	-----------	-----------

5. Use the numeric keys, one-touch speed dialing keys, coded speed dialing codes, or [**Address Book**] key to enter a destination, then press [**OK**].

You can use the following features to send a fax by pressing [Add. Mode].

<BROADCAST>: Sends the same document to multiple recipients at a time. (See "Broadcasting," on p. 3-30.)

<POLLING RX>: Retrieve documents stored in remote machines for polling. (See "Polling Receiving," on p. 3-32.)

<RELAY>: Sends a document to be relayed to other recipients. (See "Relay," on p. 3-33.)

6. Press [**Start**] to scan the document for the delayed sending.

■ Polling

Polling Sending

Polling sending enables you to send a document in response to the recipient machine's request.

You can store up to 30 documents in the memory.

1. Set documents.
2. Press [**Add.Mode**].
3. Press [**←**] or [**→**] to select **<POLLING TX>**, then press [**OK**].
4. Press [**←**] or [**→**] to select **<SINGLE>** or **<MULTI>**, then press [**OK**].
 - <SINGLE>**: The document will be deleted after it is sent to a recipient.
 - <MULTI>**: The document will be retained in memory until manually deleted.

5. Use the numeric keys to enter the four-digit subaddress, then press [OK].

If no subaddress is required, press [Start].

Ex.

SUBADDRESS = 1 2 3 4 _

6. Use the numeric keys to enter the four-digit password, then press [OK].

If no password is required, press [Start].

Ex.

PASSWORD = 5 6 7 8 _

7. Press [Start].

Polling Receiving

Polling receiving enables you to retrieve documents stored in remote machines for polling.

- 1. Press [Add.Mode].**
- 2. Press [◀-] or [+▶] to select <POLLING RX>, then press [OK].**
- 3. Use the numeric keys, one-touch speed dialing keys, coded speed dialing codes, or [Address Book] key to enter a destination, then press [OK].**
- 4. Repeat the previous step to enter all required recipients (up to 131), then press [Start].**

If the recipient sets a subaddress and/or password, you also need to set the same subaddress and/or password in the one-touch speed dialing or coded speed dialing codes. See "Storing/Editing One-Touch Speed Dialing Keys/Coded Speed Dialing Codes," p. 3-7.

You can enter only up to 16 destinations if using the numeric keys.

■ Relay

Relay enables you to send a document to a remote machine (relay station), which in turn sends the document to other destinations. (The remote machine needs to have the relay feature.) How the document is handled after it reaches the relay station depends on what function is registered in the station's subaddress.

1. Set documents.
2. Press [Add.Mode].
3. Press [←] or [→] to select <RELAY>, then press [OK].
4. Use the numeric keys, one-touch speed dialing key, coded speed dialing, or [Address Book] key to specify the relay station, then press [OK].
5. Use the numeric keys to enter the relay station's subaddress (up to 20 digits), then press [OK].

Ex.

SUBADDRESS = 1 2 3 4 _

6. Use the numeric keys to enter the password (up to 20 digits).

If no password is required, press [Start].

Ex.

PASSWORD = 5 6 7 8 _

7. Press [Start].

Checking and Deleting TX/RX Jobs

System monitor enables you to view the transmission and reception results, monitor the status of the send and receive jobs currently being processed.

■ Checking Transmission/Reception Results

1. Press [System Monitor].
2. Press [◀-] or [+▶] to select <TX/RX LOG>, then press [OK].
3. Press [◀-] or [+▶] to view the required transmission/reception result.
4. Press [Stop/Reset] to return to the standby mode.

■ Checking and Deleting Fax Documents Stored in Memory

1. Press [System Monitor].
2. Press [◀-] or [+▶] to select <TX STATUS>, then press [OK].
3. Press [◀-] or [+▶] to scroll through the job list, and check the status of the fax jobs.
If you want to delete the job, go to step 4. Otherwise, press [Stop/Reset] to return to the standby mode.
4. Press [◀-] or [+▶] to select the desired job, then press [OK].

NOTE

For <BROADCAST>, all recipients entered for a broadcasting job will be canceled.

5. Press [◀-] to select <YES>.
If you do not want to cancel the job, press [+▶] to select <NO>.
6. Press [Stop/Reset] to return to the standby mode.

Basic Copying Method

Follow this procedure to make a copy.

- 1. Set documents.**
For documents you can copy, see "Document Requirements," on p. 2-2.
- 2. Press [Copy].**
The copy mode automatically resets to the fax mode after one minute of inactivity, or when you press [Stop/Reset].
- 3. Use the numeric keys to enter the desired copy quantity (1 to 99).**
- 4. Press [Start].**

Scan Settings

Before pressing [Start] to begin copying, you can adjust the settings to better suit the document to be scanned. These settings return to the default values if the machine remains idle for one minute or if you press [Stop/Reset].

Image Quality

The default setting is <TEXT/PHOTO>.

1. Press [Copy].
2. Press [Image Quality] repeatedly to select the document type.

<TEXT>: for text documents

<PHOTO>: for documents that contain fine text or photos

<TEXT/PHOTO>: for documents that contain text and photos

NOTE

- When you press [Stop/Reset], the setting will be canceled. If you want to keep the settings, set the image quality as following:
[Menu] → <COPY SETTINGS> → <STANDARD SETTINGS> → <IMAGE QUALITY> → Press [◀] or [▶] to select the desired document type.
- Copy density automatically changes to the manual mode when <TEXT/PHOTO> or <PHOTO> is set.

Density

You can adjust the density to the most appropriate level for the document either automatically or manually. The default setting is <MANUAL> (5).

Adjusting Automatically

1. Press [Copy].
2. Press [Density] repeatedly to select <AUTO>, then press [OK].

NOTE

The image quality is automatically set to <TEXT>.

Printing Documents

Follow this procedure to print a document from your computer. Make sure that the printer driver is installed. To check if the driver is installed, see “Software Settings with Computer” in the Starter Guide.

For details on the printer driver settings, see [Online Help](#).

 NOTE

How to display the print screen or items on the screen may vary depending on your application and/or OS.

1. From an open document on an application, click [File] → [Print].
2. Select the printer icon for the machine ([Canon L90/L160/L230 UFR II LT]), then click [Preferences] or [Properties] to open the dialog box.
3. After finished setting, click [OK].
4. Click [Print] or [OK].

Restricting Access to Destinations

You can send the documents with following restrictions or settings.

- Confirming Entered Fax Numbers
- Restricting Redial

■ Confirming Entered Fax Numbers

You can specify whether or not to confirm the entered fax numbers each time you send a fax.

The default setting is <OFF>.

1. Press [Menu].
2. Press [◀-] or [+▶] to select <SYSTEM SETTINGS>, then press [OK].
If the System Password has been set, enter the System Password using the numeric keys, then press [OK].
3. Press [◀-] or [+▶] to select <ACCESS TO DEST.>, then press [OK].

4. Press [◀-] or [+▶] to select <CONFIRM FAX NO.>, then press [OK].

5. Press [◀-] or [+▶] to select <ON> or <OFF>, then press [OK].

<OFF>: The confirmation screen does not appear.

<ON>: The confirmation screen appears when you enter a fax number using the numeric keys.

6. Press [Stop/Reset] to return to the standby mode.

■ Restricting Redial

You can specify whether or not to allow using [Redial].

The default setting is <OFF>.

1. Press [Menu].
2. Press [◀-] or [+▶] to select <SYSTEM SETTINGS>, then press [OK].
If the System Password has been set, enter the System Password using the numeric keys, then press [OK].

Cleaning the Machine

Note the following before cleaning your machine:

- Make sure no document is stored in memory, and disconnect the power cord.
- Use a soft cloth to avoid scratching the components.
- Do not use tissue paper, paper towels, or similar materials for cleaning; they can stick to the components or generate static charges.

CAUTION

Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the machine. These can damage the machine components.

NOTE

When you disconnect the power cord, the documents stored in memory will be erased. To check the jobs stored in memory, see the following:

- Checking and Deleting Fax Documents Stored in Memory on p. 3-35
- Checking and Deleting Print Jobs on p. 5-4

■ Exterior

1. **Disconnect the power cord from the machine.**
2. **Wipe the machine's exterior with a clean, soft, lint-free cloth dampened with water or diluted dishwashing detergent solution.**
3. **Wait for the machine to dry, then reconnect the power cord.**

■ Interior

Clean the machine's print area periodically to prevent toner powder and paper dust from accumulating inside.

1. **Disconnect the power cord from the machine.**

2. Close the paper delivery tray extension (A), and then the paper delivery tray (B) itself.

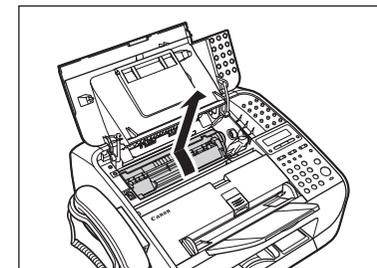

CAUTION

Do not close the paper delivery tray without folding the extension first.

3. Open the toner cover by the notch (A).

4. Remove the toner cartridge.

CAUTION

- Do not touch the rollers and parts which have labels "CAUTION! Hot surface avoid contact" on. They become very hot during use.
- To avoid exposing the toner cartridge to light, place it in its protective bag or wrap it in a thick cloth.
- Do not open the drum protective shutter on the toner cartridge. Print quality may deteriorate if the drum surface is exposed to light or is damaged.

NOTE

Always hold the toner cartridge by its handle.

Fuser Roller

If black streaks appear with printing, the fuser roller in the main unit may be dirty. Should this occur, clean the fusing roller in the following procedure. The roller should also be cleaned each time the toner cartridge is replaced. Load a sheet of blank LTR paper into the paper feeder and start cleaning.

NOTE

Cleaning the roller takes approximately 180 seconds.

1. Press [Menu].
2. Press [←] or [→] to select <ADJUST./CLEANING>, then press [OK].
3. Make sure that a sheet of blank LTR paper is in the paper feeder.
4. Press [←] or [→] to select <FIX.UNIT CLEANING>, then press [OK].

NOTE

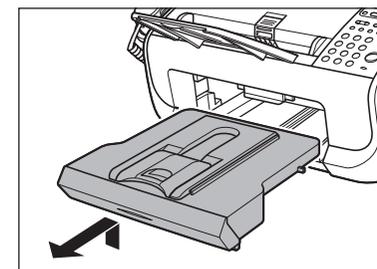

Use standard paper as the cleaning paper. Throw away the cleaning paper after use.

Scanning area

Keep the scanning area clean to avoid dirty copies or faxes to be sent.

If your documents have black streaks or appear dirty after copying them using the ADF, this may be caused by pencil lead rubbing off the documents and onto the roller. Clean the ADF scanning area and roller.

1. Disconnect the power cord from the machine.
2. Lift the paper stack cover and pull it out completely.

NOTE

Make sure the back end of the cover does not catch the front paper guide.

4. Gently wipe the scanning glass (A) and white sheet (B) with a clean, soft, lint-free cloth moistened with water.

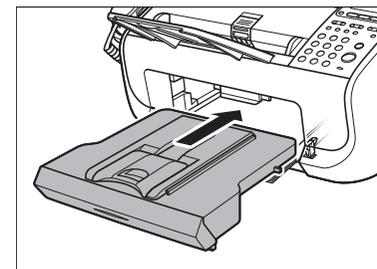

NOTE

Do not dampen the cloth too much, as this may tear the document or damage the machine.

5. After the scanning area becomes dry, lift the scanning platform back into place.

6. Insert the paper stack cover.

NOTE

Make sure the back end of the cover does not catch and lower the scanning platform.

7. Reconnect the power cord.

Replacing the Toner Cartridge

When the toner is running low, the message <TONER LOW/ PREPARE NEW TONER> appears on the LCD. In that case, redistribute toner in the toner cartridge. We recommend that you prepare a new toner cartridge for future replacement with ease.

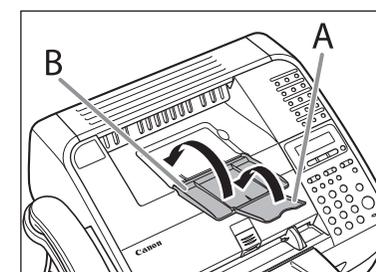

If the message appears while copying or printing, the running job will be executed. If the message appears while receiving a fax, the fax will not be printed and the received data will be stored in the memory. If you do not have a new toner cartridge and you want to print out the documents immediately, set <CONT. PRINTING> in <PRINTER SETTINGS> in <FAX SETTINGS> to <ON>. The default setting for <CONT.PRINTING> is <OFF>. We recommend that you set the setting back to <OFF> after replacing the toner. (See "CONT. PRINTING," on p. 9-11.)

CAUTION

- When <CONT. PRINTING> is set to <ON>, the printed documents may be light or blurred because of lack of toner. The data is erased when the documents are printed out, so you can not print the same documents again.
- Do not touch the rollers and parts which have labels "CAUTION! Hot surface avoid contact" on. They become very hot during use.

Redistributing Toner

1. Close the paper delivery tray extension (A), and then the paper delivery tray (B) itself.

CAUTION

Do not close the paper delivery tray without folding the extension first.

Recycling Used Cartridges

Canon has instituted a worldwide recycling program for cartridges called “The Clean Earth Campaign”. This program preserves precious natural resources by utilizing a variety of materials found in the used cartridges that are of no further use, to remanufacture new cartridges which, at the same time, keeps the environment cleaner by reducing landfill waste. Complete details concerning this program are enclosed in each Cartridge box.

■ The Clean Earth Campaign

THE Canon CARTRIDGE RECYCLING PROGRAM

The Canon Cartridge Recycling Program fulfills the first initiative of Canon’s Clean Earth Campaign, which supports four critical environmental areas:

- Recycling in the Workplace
- Conserving Environmental Resources
- Scientific Research and Education
- Encouraging Outdoors Appreciation

The remaining “Clean Earth” initiatives are supported in the U.S. through sponsorships of the National Park Foundation, the National Wildlife Federation, and The Nature Conservancy and in Canada through donations to the World Wildlife Fund Canada and The Nature Conservancy of Canada.

Since its inception, The Canon Cartridge Recycling Program has collected huge amount of cartridges that otherwise would have been discarded into landfills or similar facilities. Instead, this rapidly growing program returns used cartridges to the manufacturing process, thus conserving an array of resources.

Becoming a part of this worthwhile program is easy. When your cartridge is of no further use, simply follow the instructions detailed for U.S. or Canadian residents.

We appreciate your support of The Canon Cartridge Recycling Program.

Working together we can make a significant contribution to a cleaner planet.

- Cartridges collected through this program are not refilled.
- You are not entitled to a tax deduction or rebate for the return of empty cartridges.
- This program may be modified or discontinued without notice.

The Clean Earth Campaign

Supporting Environmental Initiatives With

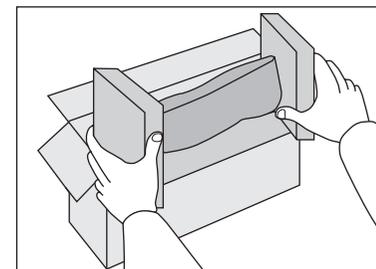

U.S.A. PROGRAM

Packaging

Option A-1: Single Box Return

- Repackage the empty cartridge utilizing the wrapper and pulp mould end-blocks from the new cartridge's box.
- Place the empty cartridge in the box of your new cartridge. Seal the box.

Option B: Volume Box Return

We encourage you to use this option as a more efficient way to ship cartridges.

- Place as many cartridges as possible into one box. Carefully seal the box with tape; or
- Call **1-800-OK-Canon** to receive your free eight cartridge collection box.

Option A-2: Multiple Box Return

We encourage you to use this option as a more efficient way to ship cartridges.

- Complete Option A-1.
- Bundle multiple cartridge boxes together securely with tape.

Please be sure that the shipment does not exceed UPS specifications.

Maximum weight = 70 lb. (31.8 kg)

Maximum length = 108 in. (2,743 mm)

Maximum girth (length + 2 x width + 2 x height) = 130 in. (3,302 mm)

If your shipment exceeds the above limits, please call **1-800-OK-Canon** for special shipping information.

Please Note:

Do not send defective cartridges for replacement.

Defective cartridges under warranty should be exchanged by an authorized dealer or service facility as provided in the warranty.

Shipping

Apply the UPS authorized returning label provided in this guide.

Residents of Alaska and Hawaii: Do not use the UPS authorized returning label. For Alaska and Hawaii Canon set up alternative mail service with the U.S. Postal Service.

Please call **1-800-OK-Canon** to receive U.S. Postal Service merchandise returning label.

- Give the shipment to your UPS driver when you receive your next regular delivery (UPS may charge a fee for customers who call UPS to pick up a cartridge shipment if they do not already have a delivery scheduled.);

or

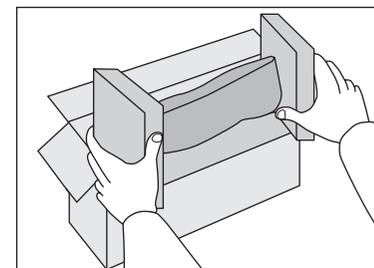

- Take the shipment to your local UPS receiving point.

CANADA PROGRAM-CANADA PROGRAMME

Option A: Single Box Return

- Repackage the empty cartridge utilizing the wrapper and pulp mould end-blocks from the new cartridge's box.
- Place the empty cartridge in the box of your new cartridge. Seal the box.
- Apply the Canon Canada Inc./Canada Post label provided in this brochure. Canon's labels are specially marked so that Canon pays the postage.
- Deposit your empty cartridge in any full size street mailbox or take it to your local Canada Post outlet or franchise.

Option B: Volume Box Return (eight or more cartridges)

We encourage you to use this option as a more efficient way to ship cartridges.

- Call **1-800-667-2666** to receive your free Canon collection box kit.
- The collection box can accommodate eight individual cartridge boxes.
- Place your eight individually packaged boxes of empty cartridges into the Canon collection box. Seal the box.
- Apply the Canon Canada Inc./Canada Post label provided in this brochure.
- Canon's labels are specially marked so that Canon pays the postage.
- Deliver to any local Canada Post outlet or franchise. Customers who hold a Commercial pick-up agreement with Canada Post may have their collection box picked up.

Working to preserve endangered species is a long-standing Canon interest.

To this end, for every cartridge collected, Canon Canada donates \$1, shared equally between World Wildlife Fund Canada and the Nature Conservancy of Canada. This donation is utilized in Canada.

Transporting the Machine

Follow this procedure to avoid vibration damage to the machine when transporting it over a long distance.

1. Disconnect the power cord and all the cables from the back of the machine.
2. Close the paper delivery tray extension (A), and then the paper delivery tray (B) itself.

CAUTION

Do not close the paper delivery tray without folding the extension first.

3. Open the toner cover by the notch (A).

4. Remove the toner cartridge.

CAUTION

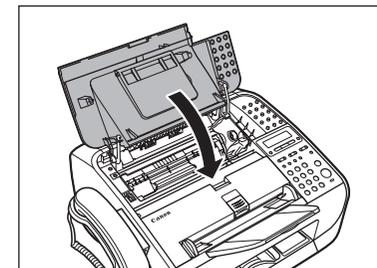

- To avoid exposing the toner cartridge to light, place it in its protective bag or wrap it in a thick cloth.
- Do not open the drum protective shutter (A).

NOTE

Always hold the toner cartridge by its handle.

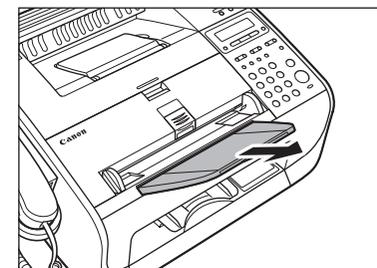

5. Close the toner cover.

CAUTION

Be careful not to get your fingers caught.

6. Detach the document feeder tray.

Clearing Jams

When <CHECK DOCUMENT> or <PAPER JAM/OPEN TONER COVER> appears on the LCD display, remove jammed paper from the machine first, then from the paper feeder if necessary. Check the following if you experience repeated paper jams:

- Fan and tap the paper stack on a flat surface before loading it in the machine.
- Check that the paper you are using meets the requirements for use. (See "Paper Requirements," on p. 2-5.)
- Make sure you have removed any scraps of paper from the inside of the machine.

CAUTION

- When removing jammed documents or paper, take care not to cut your hands on the edges of the document or paper.
- When removing jammed paper or when inspecting the inside of the machine, do not allow necklaces, bracelets, or other metal objects to touch the inside of the machine, as this may result in burns or electrical shock.
- If you tear the paper, remove any torn pieces to avoid further jams.
- If loose toner comes into contact with your skin or clothing, wash with cold water. Warm water will set the toner.

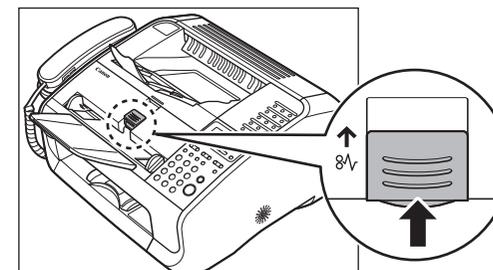

NOTE

Do not force a jammed document or paper out of the machine. Contact Canon Customer Care Center if needed.

Document Jams

When <CHECK DOCUMENT> appears on the LCD display, remove a jammed document from the ADF.

1. Lift the document release lever.

If a multi-page document is loaded, remove the entire document from the ADF.

LCD Messages

See the following when the LCD displays error and status messages.

ALREADY REGISTERED

Description The same recipient was entered twice.

Action Select a different recipient.

AVAILABLE MEMORY

nn%

Description This message shows the percentage of the memory currently available.

Action If you need more space, wait for the machine to send any documents in memory. Also print, send, or delete any documents stored in memory.

CANNOT PRINT RX DATA

Description The machine temporarily received the fax in memory because an error of some kind has occurred in the machine.

This error message appears with one of the messages below.

- <CLOSE COVER/TONER COVER>
- <LOAD CORRECT PAPER>
- <SET PAPER AGAIN/SET TONER AGAIN>
- <PAPER JAM /OPEN TONER COVER>
- <LOAD PAPER>

Action This error message appears with another message. When the error is resolved, the received data will be printed out. For how to solve the problem, see the action for the messages displayed with it.

CANNOT REGISTER MORE

Description The number of entered recipients for broadcasting has already reached the upper limit (131).

Action Send the document separately.

Description The number of registered recipients for group dialing has already reached the upper limit (50).

Action Register a different one-touch speed dialing key for group dialing.

Description The number of memory stored in Polling TX has already reached the upper limit (30).

Action Wait for the sending to complete or delete the unnecessary documents.

Description The number of entered recipients for Polling RX has already reached the upper limit (131).

Action Send the document separately.

CANNOT USE FUNCTION

Description Redialing is not available with [Redial]. This message appears when <RESTRICT REDIAL> is set to <ON> in the <ACCESS TO DEST.> of the <SYSTEM SETTINGS> menu.

Action Dial the number manually.

CHECK DOCUMENT

Description A document jam may have occurred in the ADF.

Action Remove the jammed document.

Description The document is longer than 15 3/4" (400 mm).

Action Reduce the length of the document to within 15 3/4" (400 mm), then try again.

CHECK DESTINATION

Description The fax number entered at the second time is different from the one entered at the first time. This message appears when <CONFIRM FAX NO.> is set to <ON> in the <ACCESS TO DEST.> of the <SYSTEM SETTINGS> menu.

Action Check if the fax number is correct, then enter the same fax number as the first one after pressing [Start].

CHECK SCANNING AREA

Description The scanning platform is dirty, or not set into scanning position.

Action Clean the scanning area, or lift the scanning platform into place.

CLOSE COVER TONER COVER

Description The toner cover is not closed completely.

Action Check the toner cover, and make sure that it is completely closed.

HANG UP PHONE

Description The handset or the external telephone is off the hook.

Action Hang up the handset or the external telephone.

INITIALIZING...

Description This message appears when connecting the power cord, or when the machine is not ready for printing.

Action Wait until the message disappears.

LOAD CORRECT PAPER

Description The size of the paper in the paper feeder is different from that of the paper specified in <CASSETTE> of the <PAPER SETTINGS> menu.

Action Load the correct size paper or change the paper size in <CASSETTE> of the <PAPER SETTINGS> menu. For more information, see "If <LOAD CORRECT PAPER> is displayed," on p. 8-18.

LOAD PAPER

Description No paper is loaded in the paper feeder.

Action Load paper correctly. Then press [OK] when using the paper feeder.

LOST IMAGE

Description The machine was turned off when any documents were stored in the machines memory. Any data stored in the memory, including received fax documents, will be deleted if you disconnect the power cord of the machine.

Action The error is automatically released after two seconds, and the machine automatically prints out the lost report that shows the records still existing in the activity report.

MEMORY FULL

- Description** The machine is full of jobs.
- Action** Print, send, or delete any documents stored in memory.
- Action** Divide the document stack into a few parts and try again one by one.
- Action** Send the document with low resolution.
- Description** The number of TX/RX jobs that can be stored in memory reached the maximum.
- Action** The maximum numbers of jobs that can be stored in memory are as follows (Based on the condition that the other party sends the fax by FAXPHONE L90 with ITU-T Standard Chart No.1, mode); Up to 256 jobs for sending and receiving. Wait for the machine to send any documents in memory. Also print, send, or delete any documents stored in memory.

NOT AVAILABLE

- Description** You pressed the one-touch speed dialing key that has already been registered, when you are registering group dialing.
- Description** You pressed the group dialing that has already been registered, when you are registering a one-touch speed dialing key.
- Action** Register the one-touch speed dialing key or coded speed dialing that is not used.
- Description** The number of entered recipients for broadcasting by the numeric keys has already reached the upper limit (16).
- Action** Enter not more than 16 recipients for broadcasting by the numeric keys.
- Description** You have specified the group dialing when the line is off the hook or [Hook] key is pressed.
- Action** Specify the recipient other than group dialing.
- Description** A group dialing key is used for Relay TX.
- Action** Enter the recipients except group dialing keys.

NOT REGISTERED

Description No destination is registered for the one-touch speed dialing key or coded speed dialing you pressed.

Action Register the destinations before using the Address Book function.

OUT OF TONER CHANGE TONER

Description Toner has run out.

Action Install a new cartridge.

PAPER JAM OPEN TONER COVER

Description Paper jams have occurred in the machine.

Action Clear the paper jam (See "Paper Jams," on p. 8-5.) and reload paper in the paper feeder.

PRINTER DATA ERROR CHECK PRINTER

Description The data from the PC was not printed.

Action Check if the software is installed properly or if the printer cable is properly connected.

Action Check if the memory is full.

REGISTERING KEY CANNOT REGISTER

Description The selected one-touch speed dialing key is already used as the group dialing key it is being assigned to.

Action Select a different one-touch speed dialing key.

SET DOCUMENT

Description No document was set on the machine when [Start] was pressed. (in the copy/fax mode)

Action Set a document.

SYSTEM ERROR EXXX

Description A system error has occurred. <XXX> will be a three-digit code that indicates a particular type of error.

Action Unplug the machine. Wait for at least 5 seconds and reconnect the power cord. If the message persists, disconnect the power cord, and contact your local authorized Canon dealer or the Canon help line.

SET PAPER AGAIN SET TONER AGAIN

Description Paper is not loaded properly, or the toner cartridge is not set.

Action Load paper properly. (For instructions on how to load paper in the paper feeder, see "Set Up the Machine," in the Starter Guide.
Set the toner cartridge in the machine. For details, see "Set Up the Machine," in the Starter Guide.

TONER LOW PREPARE NEW TONER

Description The toner is running low.

Action Redistribute toner in the toner cartridge. (See "Redistributing Toner," on p. 7-8.) Prepare a new toner cartridge for future replacement with ease.

WRONG NUMBER ENTRY

Description An invalid number was entered in the date and time setting, then [OK] key was pressed.

Action Enter a correct date or time.

WRONG PASSWORD

Description The memory lock reception password or system password you entered is incorrect.

Action Enter the correct password.
For details, see "Receiving Features," on p. 3-23 or "Specifying the System Manager Settings," on p. 6-2.

If <LOAD CORRECT PAPER> is displayed

When <LOAD CORRECT PAPER> appears on the LCD display, the size of the paper in the paper feeder is different from that of the paper specified in <CASSETTE> of the <PAPER SETTINGS> menu. You need to load the correct size paper or change the paper size in <CASSETTE> of the <PAPER SETTINGS> menu.

NOTE

- For print jobs, you need to specify the paper size from your computer.
- For copy jobs, <LOAD CORRECT PAPER> disappears automatically. Load the correct size paper or change the paper size setting. (See “Setting Paper Size and Type,” on p. 2-11.)

■ Re-Loading the Paper

1. **Load the correct size paper as shown on LCD display, then press [OK] to resume the job.**

The machine re-starts printing.

■ Changing the Paper Size Setting

1. Press [Menu].
2. Press [◀] or [▶] to select <PAPER SETTINGS>, then press [OK].

3. Press [◀] or [▶] to select <CASSETTE>, then press [OK].
4. Press [◀] or [▶] to select <PAPER SIZE>, then press [OK].
5. Press [◀] or [▶] to select the paper size same as paper loaded into the machine, then press [OK].
6. Press [Stop/Reset] to return to the standby mode.
7. Press [OK] to resume the job.
No further operation is required.

General Problems

The machine has no power.

Q Is the power cord plugged in securely?

A Check that the power cord is securely plugged into the machine and into the wall outlet. If the machine is plugged into a power strip, make sure the power strip is plugged in and turned on.

Q Is the power cord supplying power?

A Use a different power cord, or test the cord for continuity using a voltmeter.

Nothing appears in the LCD.

Q Is the power cord plugged in securely?

A Check that the power cord is securely plugged into the machine and into the wall outlet. If the machine is plugged into a power strip, make sure the power strip is plugged in and turned on.

Q Is the machine in the Sleep mode?

A Press [Energy Saver] on the operation panel to cancel the Sleep mode.

Paper Feeding Problems

Paper does not feed properly.

- Q

Is the paper loaded correctly?
- A

Make sure the paper is correctly loaded. (See "Set Up the Machine," in the Starter Guide.)
- Q

Does the machine contain too many sheets?
- A

Make sure you load the correct quantity. (See "Paper Requirements," on p. 2-5.)

Multiple sheets feed together into the machine.

- Q

Is the paper loaded correctly?
- A

Make sure the paper is correctly loaded. (See "Set Up the Machine," in the Starter Guide.)
- Q

Does the machine contain too many sheets?
- A

Make sure you load the correct quantity. (See "Paper Requirements," on p. 2-5.)

Q

Are different types of paper loaded in the machine?

- A

Load only one type of paper.
- A

Make sure you load paper that meets the requirements for use. (See "Paper Requirements," on p. 2-5.)
- A

Let the paper run out before refilling the machine. Avoid mixing new stock with paper already loaded.

Repeated paper jams occur.

- Q

Is the correct type of paper loaded in the machine?
- A

Make sure you load paper that meets the requirements for use. (See "Paper Requirements," on p. 2-5.)

Sending/Receiving Problems

■ Sending Problems

Cannot send a fax.

- Q

Is the machine set for the correct telephone line type?
- A

Make sure the machine is set for the correct telephone line type. (See "Before FAX Setting," in the Starter Guide.)
- Q

Is the document loaded correctly?
- A

Make sure the document is correctly loaded. (See "Loading Documents," on p. 2-4.)
- A

Make sure the scanning platform is fully closed. (See "Paper Jams," on p. 8-5.)

- Q

Is the one-touch speed dialing key or coded speed dialing code you entered registered correctly?
- A

Check that the Address Book settings are registered correctly. (See "Storing/Editing Address Book," on p. 3-7.)
- Q

Did you dial the correct number?
- A

Check that you have the correct number.
- Q

Is the machine in the Sleep mode?
- A

The machine does not scan documents if it is in the Sleep mode. To take the machine out of the Sleep mode, press [Energy Saver] on the operation panel.
- Q

Is the recipient's machine out of paper?
- A

Ask the recipient to make sure paper is loaded in the machine.

Q

Are there other documents being sent from memory?

A

Allow time for the documents to finish sending.

Q

Has an error occurred during transmission?

A

Check the LCD for an error message. (See "LCD Messages," on p. 8-10.)

A

Print an Activity Report and check for an error. (See "ACTIVITY REPORT," on p. 9-22.)

Q

Is the telephone cable connected properly?

A

Make sure the cable is connected properly. (See "Before FAX Setting," in the Starter Guide.)

Q

Is the telephone line working properly?

A

Make sure there is a dial tone when you press [Hook] or when you lift the handset of any external telephone connected to the machine. If there is no dial tone, contact your local telephone company.

Q

Is the recipient's machine a G3 fax machine?

A

Make sure the recipient's machine is compatible with your machine.

Q

Did the recipient's machine answer within 35 seconds (after all automatic redialing attempts)?

A

Ask the recipient to check the machine. For an overseas call, add pauses to the registered number. (See "Dialing an Overseas Number (With Pauses)," on p. 3-20.)

Q

Is the Processing/Data indicator lit?

A

The external phone is busy. Please wait until the external phone becomes free.

Q

Is the machine overheated?

A

Unplug the machine and let it cool for about 5 minutes. Then plug in the machine and try sending again.

Appendix 9

Memory fills up immediately when you try to send.

Q Are you sending with the resolution set to <SUPER FINE>?

A If you want to keep your document quality, divide the document into some parts and send them separately.

A If your document does not contain fine text or photographs, set the resolution to <STANDARD>.

A If your document contains fine text or photographs, send it directly rather than using a memory transmission.

Q Is a document stored in memory, leaving little memory available?

A Print, send, or delete any documents stored in memory.

Faxes sent from the machine are spotted or dirty.

Q Is the recipient's machine working properly?

A Check the machine by making a copy. If the copy is clear, the problem may be in the recipient's machine. If the copy is spotted or dirty, clean the scanner components. (See "Scanning Area," on p. 2-3.)

Q Is the document loaded correctly?

A Make sure the document is correctly loaded. (See "Loading Documents," on p. 2-4.)

The documents you sent are too light.

Q Is the density setting changed to be lighter?

A Adjust the density for light documents to be darker. (See "Density," on p. 3-6.)

Q Are the scanning components of the machine clean?

A If the received document is spotted or dirty, clean the scanning components. (See "Scanning area," on p. 7-6.)

Sending of documents is too slow.

Q Is the resolution set to <FINE>, <PHOTO> or <SUPER FINE>?

A Setting the resolution to <STANDARD> reduces the sending time.

Errors occur frequently while sending.

Q Are the telephone lines in poor condition, or do you have a bad connection?

A Check if there is a device nearby that interferes with signal transmission (e.g., microwave oven).

Cannot redial with [Redial].

Q Is <RESTRICT REDIAL> set to <ON>?

A When <RESTRICT REDIAL> is set to <ON>, Redialing is not available. (See "Restricting Redial," on p. 6-3.)

Entering the fax number is required again after pressing [Start].

Q Is <CONFIRM FAX NO.> set to <ON>?

A When <CONFIRM FAX NO.> is set to <ON>, you need to enter the fax number again after pressing [Start]. (See "Confirming Entered Fax Numbers," on p. 6-3.)

Receiving Problems

Cannot receive a fax automatically.

Q Is the machine set to receive automatically?

A For the machine to receive faxes automatically, the receive mode must be set to <FaxOnly>, <FaxTel>, <AnsMode>, or <DRPD>. If you have set <AnsMode>, confirm that an answering machine is connected to the machine and that it is turned on with an outgoing message properly recorded. (See "Basic Receiving Method," on p. 3-22.)

Q

Are documents stored in memory, leaving little or no memory available?

A

Print, send, or delete any documents stored in memory.

Q

Has an error occurred during reception?

A

Check the LCD for an error message. (See "LCD Messages," on p. 8-10.)

A

Print an Activity Report and check for an error. (See "ACTIVITY REPORT," on p. 9-22.)

Q

Is paper loaded in the machine?

A

Make sure paper is loaded in the machine. (See "Set Up the Machine," in the Starter Guide.)

Q

Is the telephone cable connected properly?

A

Make sure the cable is connected properly. (See "Before FAX Setting," in the Starter Guide.)

No automatic switching between telephone and fax calls.

Q

Is the machine set to switch automatically between telephone and fax calls?

A

For the machine to switch between fax and telephone calls automatically, the receive mode must be set to <FaxTel>, <AnsMode>, or <DRPD>. If you have set <AnsMode>, confirm that an answering machine is connected to the machine and that it is turned on with an outgoing message properly recorded. (See "Basic Receiving Method," on p. 3-22.)

Q

Are documents stored in memory, leaving little or no memory available?

A

Print, send, or delete any documents stored in memory.

Q

Has an error occurred during reception?

A

Check the LCD for an error message. (See "LCD Messages," on p. 8-10.)

A

Print an Activity Report and check for an error. (See "ACTIVITY REPORT," on p. 9-22.)

Q Is paper loaded in the machine?

A Make sure paper is loaded in the machine. (See "Set Up the Machine," in the Starter Guide.)

Q Can the sender's machine send the CNG signal, which tells your machine that the incoming call is a fax call?

A Some machines cannot send this signal. In such cases, receive the fax manually.

Cannot receive a document manually.

Q Is the machine set to receive manually?

A For the machine to receive faxes manually, the receive mode must be set to <Manual>. (See "Basic Receiving Method," on p. 3-22.)

Q Did you hang up the handset or the external telephone before pressing [Start] or dialing the remote reception ID?

A Always press [Start] or dial the remote reception ID before hanging up. Otherwise you will disconnect the call.

Q Are documents set on the ADF?

A After removing the document from the ADF, please attempt manual receiving again. If you press [Start] when documents are set on the ADF, it automatically switches to manual sending.

Print quality is poor.

Q Is the toner low or unevenly distributed?

A Redistribute the toner inside the toner cartridge. If the problem persists, replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Q Is the correct type of paper loaded in the machine?

A Make sure you load paper that meets the requirements for use. (See "Paper Requirements," on p. 2-5.)

Q Is the sender's machine functioning properly?

A Ask the sender to check that the scanning components of the machine are clean.

Q Is the machine in the toner saver mode?

A Set <TONER SAVER MODE> to <OFF>. (See "COMMON SETTINGS," on p. 9-6.)

Faxes do not print.

Q Have you removed the plastic seal from the toner cartridge?

A Make sure you remove the seal from the toner cartridge. (See "Set Up the Machine," in the Starter Guide.)

Q Is the toner cartridge installed properly?

A Make sure the toner cartridge is installed properly. (See "Set Up the Machine," in the Starter Guide.)

Q Is the cartridge out of toner?

A Replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Q Is the correct size of paper loaded in the machine?

A Make sure you load paper that meets the requirements for use. (See "Paper Requirements," on p. 2-5.)

A Change <PAPER SETTINGS>. (See "Setting Paper Size and Type," on p. 2-11.)

Received faxes print blotched or unevenly.

Q Is the sender's machine functioning properly?

A Ask the sender to check that the scanning components of the machine are clean.

Part of the documents you receive are cut off.

Q Are the slide guides of the paper feeder set to the size of the paper?

A Adjust the guides of the paper feeder to the size of the paper.

Q Have you specified the correct paper size for the paper feeder?

A Specify the correct paper size for the paper feeder.

Q Is the toner low or unevenly distributed?

A Redistribute the toner inside the toner cartridge. If the problem persists, replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Q Is the printing method for received documents set to <CUT>?

A If you want to print a received document without cutting off the end, set the printing method to <ON> or <OFF>. (See "Received Image Reduction," on p. 3-29.)

Cannot receive using Error Correction Mode (ECM).

Q Does the sender's machine support ECM?

A If the sender's machine does not support ECM, the document is received in normal mode without error checking.

Receiving of documents is too slow.

Q Is the resolution of the sender's machine set higher?

A Contact to the sender and make sure the resolution of the sender's machine has been set properly.

You cannot get documents from information services.

Q Is your machine set to the tone dialing type of the telephone line?

A Press [Tone] to set the tone dialing.

Q Do you receive messages from the information services such as to press [Start] after the beep to receive?

A When you hear the beep sound, press [Start].

Errors occur frequently while receiving.

Q Are the telephone lines in poor condition, or do you have a bad connection?

A Check if there is a device nearby that interferes with signal reception (e.g., microwave oven).

Q

Is the sender's machine functioning properly?

A

Ask the sender to check that the machine is functioning properly.

Copying Problems

Blank paper comes out from the machine.

Q Have you removed the plastic seal from the toner cartridge?

A Make sure you remove the seal from the cartridge. (See "Set Up the Machine," in the Starter Guide.)

Q Is the toner cartridge installed properly?

A Make sure the toner cartridge is installed properly. (See "Set Up the Machine," in the Starter Guide.)

Q Is the cartridge out of toner?

A Replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Q Does the document meet the requirements for the machine?

A Make sure you load documents that meet the requirements for use. (See Chapter 2, "Document Requirements," on p. 2-2.)

Copy is too light or has uneven density.

Q Is the toner low or unevenly distributed?

A Redistribute the toner inside the toner cartridge. If the problem persists, replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Copy has vertical white streaks.

Q Is the toner low or unevenly distributed?

A Redistribute the toner inside the toner cartridge. If the problem persists, replace the toner cartridge. (See "Replacing the Toner Cartridge," on p. 7-8.)

Copy is spotted or dirty.

A If the copy is spotted or dirty, clean the scanning components and machine's interior (See "Cleaning the Machine," on p. 7-2.)

Cannot print documents from a computer.

Q Is the printer driver properly installed?

A Make sure that the printer driver is properly installed.

Q Are the printer driver settings (Paper Size, Output Size) correct?

A Make sure that the printer driver settings (Paper Size, Output Size) are correct. ([See Online Help.](#))

Q Is the USB cable properly connected to the machine and the computer?

A Make sure that the USB cable is properly connected to the machine and the computer. Try a different USB cable.

Q Does the USB port you are using properly work?

A Restart your computer and the machine. If the computer has other ports, connect the USB cable to others.

Q

Are there any jobs remaining in the print queue?

A

A print job may be stuck in the print queue when it could not be finished due to an expected interruption. When this happens, follow this procedure to delete any remaining print jobs, and then print the documents again.

1. Double-click the icon of the printer you installed.
 - For Windows Vista
Click [Start] on the Windows task bar → [Control Panel] → [Printers] under [Hardware and Sound].
 - For Windows 2000:
Click [Start] on the Windows task bar → [Settings] → [Printers].
 - For Windows XP Professional/Server 2003:
Click [start] on the Windows task bar → [Printers and Faxes].
 - For Windows XP Home Edition:
Click [start] on the Windows task bar → [Control Panel] → [Printers and Other Hardware] → [Printers and Faxes].
2. Delete the print job.
 - For deleting all the print jobs:
Click [Printers] → [Cancel All Documents]
 - For the specified job:
Right-click the specified print job → [Cancel]

Telephone Problems

Cannot dial.

Q Is the telephone cable connected properly?

A Make sure the cable is connected properly. (See "Before FAX Setting," in the Starter Guide.)

Q Is the power cord plugged in securely?

A Check that the power cord is securely plugged into the machine and into the wall outlet. If the machine is plugged into a power strip, make sure the power strip is plugged in and turned on.

Q Is the machine set for the correct telephone line type?

A Make sure the machine is set for the correct telephone line type. (See "Before FAX Setting," in the Starter Guide.)

Telephone disconnects while you are talking.

Q Is the telephone cable connected properly?

A Make sure the cable is connected properly. (See "Before FAX Setting," in the Starter Guide.)

Q Is the telephone cable defective?

A Use another cord.

Calls do not connect, or the wrong number is dialed.

Q Did you confirm the dial tone before entering the telephone number?

A Make sure to confirm the dial tone before entering a telephone number. If you enter the number before the dial tone can be heard, the call may not connect, or the wrong number may be dialed.

If a Power Failure Occurs

If a power failure occurs, machine functions will be limited as follows:

- Depending on your telephone, you may not be able to make telephone calls.
- You can receive telephone calls from the handset or telephone connected to the machine.
- You cannot send, receive, or copy documents.

If power is suddenly lost due to a power failure or accidental unplugging, the machine may lose any data stored in the memory, including received fax documents. If this happens, the LCD displays <LOST IMAGE> when power is restored and automatically prints a Lost Report (unless the cartridge is empty or there is no paper in the machine) that lists the documents (received in the last 60 transactions) that were lost from memory as a result of the power cut.

If You Cannot Solve a Problem

Customer Support (U.S.A.)

If you cannot solve the problem after having referred to the information in this chapter, contact Canon Customer Care Center at 1-800-828-4040 between the hours of 8:00 A.M. to 8:00 P.M. EST for U.S.A. and 9:00 A.M. to 8:00 P.M. EST for Canada Monday through Friday and 10:00 A.M. to 8:00 P.M. on Saturday. On-line support for 24 hours is also available at the website.

<http://www.canontechsupport.com/>

Customer Support (Canada)

Canon Canada Inc., offers a full range of customer technical support options*:

- For step-by-step troubleshooting, e-mail technical support, the latest driver or document downloads, and answers to frequently asked questions, visit <http://www.canon.ca/>
- Free live technical support 9:00 A.M. to 8:00 P.M. EST Monday through Friday (excluding holidays) for products still under warranty 1-800-652-2666
- For the location of the authorized service facility nearest you, visit <http://www.canon.ca/> or 1-800-652-2666
- If the problem cannot be corrected by using one of the above technical support options, repair options are available at the time of your call to the live technical support number above or via the website at <http://www.canon.ca/>

* Support program specifics are subject to change without notice.

Please have the following information ready when you contact Canon:

- Product name (FAXPHONE L90)
- Serial number (On the label located at the back of the machine)
- Place of purchase
- Nature of problem
- Steps you have taken to solve the problem and the results

CAUTION

If the machine makes strange noises, emits smoke or odd odor, disconnect the power cord immediately, and contact Canon Customer Care Center. Do not attempt to disassemble or repair the machine yourself.

NOTE

Attempting to repair the machine yourself may void the limited warranty.

PAPER SETTINGS	
Setting Item	Description
1. CASSETTE	Sets the paper size and type on the paper feeder. (See "Setting Paper Size and Type," on p. 2-11.)
1. PAPER SIZE	Sets the paper size from the following options: LTR , LGL, A4, OFICIO, BRAZIL-OFICIO, MEXICO-OFICIO, FOLIO, GOVERNMENT-LETTER, GOVERNMENT-LEGAL, and FOOLSCAP
2. PAPER TYPE	Sets the paper type from the following options: PLAIN PAPER , PLAIN PAPER L, HEAVY PAPER, HEAVY PAPER H, and TRANSPARENCY

VOLUME CONTROL	
Setting Item	Description
1. MONITOR VOLUME	Sets the volume for monitor tone during the fax transmission. (0-3 (2))
2. CALLING TONE	Sets the volume of the ring produced when the machine detects a call. (0-3 (2))
3. ENTRY TONE	Beeps when pressing the keys on the operation panel. (0-3 (2))
4. ERROR TONE	Beeps when an error (e.g., TX error) occurs. (0-3 (2))

FAX SETTINGS	
5. RX PRINT	Sets whether to store all received pages in memory before printing them out or print each page as it is received. (See "Selecting the Receive Mode for Printing," on p. 3-28)
MEMORY RX	Print after all the pages of the document are received.
PRINT RX	Print each page as it is received.
6. RX TERMINAL ID	Sets whether to insert the machine's fax number and the sender information on received faxes. - OFF - ON
7. RX RESTRICTION	You can reject faxes from senders with no fax/telephone number in their sender information. (See "Reception Restriction," on p. 3-28.)
OFF	All receptions are conducted.
ON	Receives the fax only from the sending fax machine that sends the TSI signal.
5. PRINTER SETTINGS	Sets the printer functions.
1. RX REDUCTION	Sets whether to reduce or truncate the image when a faxed page is larger than the size of paper loaded. (See "Received Image Reduction," on p. 3-29.)
ON	Reduces the image to fit on the size of paper loaded.
OFF	Retains the original size of the image.
CUT	The image that is larger than 1-page record area is cut and not recorded.

ADDRESS BOOK SET.	
Setting Item	Description
1. 1-TOUCH SPD DIAL	Registers recipients on one-touch speed dialing keys. Up to 15 recipients can be registered. (See "Storing/Editing One-Touch Speed Dialing Keys/Coded Speed Dialing Codes," on p. 3-7.)
NAME	Registers the recipient's name (max. 20 characters, including spaces).
TEL NUMBER ENTRY	Registers the recipient's fax/telephone number (max. 50 digits, including spaces).
OPTIONAL SETTING	Sets the optional settings for sending faxes.
OFF	The optional setting is not set.
ON	The optional setting is set.
SUBADDRESS	Sets the subaddress (20 digits).
PASSWORD	Sets the password (20 digits).
2. CODED DIAL	Registers recipients for coded speed dialing codes. Up to 100 recipients can be registered. (See "Storing/Editing One-Touch Speed Dialing Keys/Coded Speed Dialing Codes," on p. 3-7.)
NAME	Registers the recipient's name (max. 20 characters, including spaces).
TEL NUMBER ENTRY	Registers the recipient's fax/telephone number (max. 50 digits, including spaces).

Summary of Reports and Lists

The machine can generate the following reports and lists.

Report/List	Description
TX REPORT	Shows the transmission result. Can be set to print automatically.
RX REPORT	Shows the reception result. Can be set to print automatically.
ACTIVITY REPORT	Shows the last 60 transactions performed by the machine.
MEMORY DATA LIST	Lists reserved jobs stored in memory.
MEMORY IMAGE PRNT	Shows information and the first page of a reserved job.
1-TOUCH LIST	Lists the recipient numbers registered to all the one-touch speed dialing keys.
CODED DIAL LIST	Lists the recipient numbers registered to all the coded speed dialing.
GROUP DIAL LIST	Lists groups registered for group dialing.
USER DATA LIST	Lists all the current settings and registered sender information.
LOST REPORT	Lists received documents that were lost from the memory due to power cut. Cannot be manually printed out.

Printing Reports Automatically

TX REPORT, RX REPORT, and ACTIVITY REPORT can be set to print automatically.

TX REPORT

The default setting is <PRINT ERROR ONLY>.

1. Press [Menu].
2. Press [◀] or [▶] to select <REPORT SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <TX REPORT>, then press [OK].
5. Press [◀] or [▶] to select the setting you want, then press [OK].
 - <PRINT ERROR ONLY>: Prints a report only when a transmission error occurs.
 - <OUTPUT NO>: Does not print a report. Press [Stop/Reset] to return to the standby mode.
 - <OUTPUT YES>: Prints a report every time you send a document.
6. Press [Stop/Reset] to return to the standby mode.

Report Items

The following items are displayed in the Transmission Report:

- **JOB NO.:** Job number
- **MODE:** Mode of transaction (G3 or ECM)
- **NO.:** Sequence number
- **DESTINATION TEL/ID:** Name and number of recipient
- **START TIME:** Date and time of transaction
- **PAGE:** Number of pages sent
- **RESULT:** Result of transaction, transaction duration
 - OK: Transmission successful
 - NG: Transmission failed
 - STOP: Transmission manually canceled before completion
 - MEM. FULL: Memory became full during transmission
 - NO ANSWER: Call not answered
 - PAPER JAM: ADF jam occurs during Manual TX
- **Error code:** For descriptions of error codes, See "Error Codes," on p. 8-16.

RX REPORT

The default setting is <OUTPUT NO>.

1. Press [Menu].
2. Press [◀] or [▶] to select <REPORT SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <RX REPORT>, then press [OK].
5. Press [◀] or [▶] to select the setting you want, then press [OK].
 - <OUTPUT NO>: Does not print a report.
 - <OUTPUT YES>: Prints a report every time you receive a document.
 - <PRINT ERROR ONLY>: Prints a report only when a reception error occurs.
6. Press [Stop/Reset] to return to the standby mode.

Report Items

The following items are displayed in the Reception Report:

- **JOB NO.:** Job number
- **MODE:** Mode of transaction (G3 or ECM)
- **NO.:** Sequence number
- **DESTINATION TEL/ID:** Number of the sending machine (displayed only if registered in their machine)
- **START TIME:** Date and time of transaction
- **PAGE:** Number of pages received
- **RESULT:** Result of transaction, transaction duration
 - OK: Reception successful
 - NG: Reception failed
- **Error code:** For descriptions of error codes, see “Error Codes,” on p. 8-16.

ACTIVITY REPORT

The default setting is <OUTPUT YES>.

1. Press [Menu].
2. Press [◀] or [▶] to select <REPORT SETTINGS>, then press [OK].
3. Press [◀] or [▶] to select <SETTINGS>, then press [OK].
4. Press [◀] or [▶] to select <ACTIVITY REPORT>, then press [OK].
5. Press [◀] or [▶] to select the setting you want, then press [OK].
 - <OUTPUT YES>: Prints a report after every 60 transactions.
 - <OUTPUT NO>: Does not print a report. Press [Stop/Reset] to return to the standby mode.
6. Press [Stop/Reset] to return to the standby mode.

Printing Reports and Lists Manually

You can print the following reports and lists manually.

- TX REPORT
- RX REPORT
- ACTIVITY REPORT
- MEMORY DATA LIST
- MEMORY IMAGE PRNT
- 1-TOUCH LIST
- CODED DIAL LIST
- GROUP DIAL LIST
- USER DATA LIST

NOTE
For information on each report or list, see "Summary of Reports and Lists," on p. 9-19.

1. Press [Menu].
2. Press [◀-] or [+▶] to select <REPORT SETTINGS>, then press [OK].
3. Press [◀-] or [+▶] to select <LIST PRINT>, then press [OK].
4. Press [◀-] or [+▶] to select a desired report or list, then press [OK].

Printing starts, and the screen automatically returns to the standby mode.

Glossary

A

Activity Report

A journal of the machine's transactions, both sent and received.

Address Book

The Address Book is a feature used for storing fax recipients. The Address Book is divided into one-touch speed dialing keys and coded speed dialing codes. You can register multiple recipients in a group, and assign a one-touch speed dialing key to this group. Registering a destination in the Address Book saves you the effort of entering that fax number each time you send a fax.

Automatic Document Feeder (ADF)

The device included in the machine that feeds the document being sent or copied, or scanned into the machine.

Automatic redialing

When the recipient's machine is busy or does not answer, or when an error occurs while sending, the machine waits a specified time and then automatically redials the number. If the receiving fax is still busy or does not answer, the machine waits the specified time and dials again.

B

bps

Bits per second. Refers to the speed with which a fax machine sends and receives data.

Broadcasting

Transmitting documents to more than one location (through the machine's memory).

Buffer size

The size of a data area, or buffer, shared by devices or programs working at different speeds or with different priorities. The buffer is designed to prevent one device or process from being held up by another. For this to be possible, the buffer must be set up correctly.

C

CNG

Calling Tone. This is a signal sent by fax machines to identify the call as an incoming document. When the receiving fax detects this signal, it automatically starts to receive the fax transmission. The majority of fax machines in use today can send and detect CNG signals.

Coded Speed Dialing Codes

A method to specify a recipient registered in Address Book. Press [Coded Dial] and a two-digit code using the numeric keys.

Cookie

A file left on a user's computer when the user visits a web site. A cookie allows the web site to recognize the user on subsequent visits. Cookies are generally used to enable a user to automatically sign on to certain web sites and to customize the features offered by such sites.

Cursor

The underline symbol you see on the LCD when you register numbers and names in the machine.

D

Document

The sheet of paper containing the data that you send to, or receive from a machine.

dpi

Dots per inch. A machine of measurement for indicating a machine's resolution.

DRPD

This receive mode allows the machine to distinguish fax and voice calls depending on the distinctive ring patterns assigned to different numbers. Subscription to a DRPD service offered by some telephone companies is required.

E

ECM

Error Correction Mode. The ability of your machine to reduce system and line errors when sending or receiving from another fax with ECM capability. ECM is most effective in areas where the telephone lines are in poor condition or there is frequent interference on the line.

Extension

A telephone connected to the machine that is used in place of the handset. You can use the extension telephone to activate incoming reception of documents manually.

F

FAX/TEL switching

This option allows you to set the machine to automatically detect whether a call is from a fax or telephone. If the call is from another fax, the transmission is automatically received. If the call is from a telephone, the machine rings to let you know, so you can pick up the handset. With this feature, one telephone line can be shared by both the telephone and the fax.

FINE

The resolution setting for documents with very small characters and lines.

Table of Contents

Index

G

G3, Group 3 fax machine

Defined by CCITT/ITU-T. Uses encoding schemes to transmit image data while reducing the amount of data that needs to be transmitted, thus reducing transmission time. G3 fax machines can transmit one page in less than one minute. Encoding schemes for G3 fax machines are Modified Huffman (MH), Modified READ (MR), Modified Modified READ (MMR), and Joint Bi-level Image expert Group (JBIG).

Group Dialing

A method of specifying recipients that enables you to specify multiple recipients registered in Address Book as a group. This means that you can press just a single one-touch speed dialing key to specify recipients when sending the same document to many recipients.

H

HP-GL/2

A graphics language that allows computer applications to draw graphic images using printers. Images in HP-GL/2 are represented as vector graphics. Vector objects describe an image in terms of geometric shapes, such as lines and polygons, and fills. HP-GL/2 is supported by your Canon machine.

I

Interface

The connection between two devices that makes it possible for them to communicate with each other. The machine features a USB interface, which makes it compatible with IBM and similar personal computers.

Interface cable

The cable used to create the interface between a printer and a computer.

Interface port

The machine comes with one USB port, located on the back of the machine. You attach the cable that connects your computer and machine to this port.

ITU-T

A committee created to set international standards for telecommunications.

L

Log in

Entering a password as a means of user authentication to start a computer session or access to a service.

LPD

Line Printer Daemon. A daemon is a program that runs, without human intervention, to accomplish a given task. The Line Printer Daemon controls the flow of print jobs to a printer.

Table of Contents

Index

M

Manual receiving

A method of receiving faxes in which you answer all incoming calls using the external telephone. If you hear a slow beep it indicates an incoming fax transmission from another machine. Just press [Start] to receive the incoming fax.

N

Numeric keys

The round, numbered keys on the operation panel marked the same as a standard telephone keypad.

Press them to perform regular dialing. You also use the numeric keys to enter characters and numbers during registration, and for entering coded speed dialing codes.

O

One-Touch Speed Dialing keys

The numbered keys on the operation panel that may be registered as single or a group of recipients. Once a number or group is registered, you press one key to dial the entire number or group.

P

Paper feed

Refers to guiding a sheet of paper into the machine's paper path.

Paper feeder

The device in the machine that feeds recording media into the machine for printing copied or sent documents.

Pause

A timing entry required for registering certain long distance numbers. Pressing [Pause] enters a pause between digits of a telephone number.

PDF

Portable Document Format. The page description language used in Adobe Systems' Acrobat document exchange system, which is restricted neither by device nor resolution. PDF displays documents in a way that is independent of the original application software, hardware, and operating system used to create those documents. A PDF document can contain any combination of text, graphics, and images.

PHOTO

The document setting you use for sending or copying documents with intermediate tones, such as photographs.

Polling

One fax machine requesting another to send a document. The receiving party calls the fax machine holding the document to be sent, and requests that it be sent.

Pulse

See Rotary pulse.

R

Raster

Raster graphics describes an image as a pattern of dots, compared to vector graphics which represents an image as a geometrical formula. Each row of color dots in the mosaic of color dots constitutes one raster graphic. In a printer, a raster graphic is used as the master image from which a page is printed, because the image can be transferred to paper by printing one raster at a time.

Receiving

Receiving transmission is also defined as RX or Reception. The machine can be customized to receive fax documents in several ways.

Reception

See Receiving.

Redialing-automatic

See Automatic redialing.

Registering

A process by which you place recipient's information (such as the name, fax number) in the machine's memory, so that you save time specifying recipients you send documents frequently.

Regular dialing

Pressing the individual numeric keys to dial a fax or telephone number.

Remote reception ID

The two-digit code that enables you to manually activate fax reception using an external telephone.

Remote reception

Activating fax reception by answering an external telephone that is not located near the machine. You need to dial a remote receiving ID number to start remote reception.

Report

A document printed by the machine and containing information about the documents it has sent or received.

Resolution

The density of dots for any given output device. Expressed in terms of dots per inch (dpi). Low resolution causes font characters and graphics to have a jagged appearance. Higher resolution means smoother curves and angles as well as a better match to traditional typeface designs. Resolution values are represented by horizontal data and vertical data, for example, 600 x 600 dpi.

RIP (Raster Image Processor)

The hardware and/or software functions of a printer that convert vector graphic descriptions from a computer into raster graphic images that can be printed.

Rotary pulse

A telephone dialing system where a dial is rotated to send pulses to the telephone switching system. In pulse dialing, you hear clicks. In touch-tone dialing, the most common dialing system, you hear tones. Rotary pulse dialing requires certain setting adjustments.

RX

See Receiving.

S

Sending

Sending documents is also defined as TX or Transmit. The machine can scan and send documents via fax.

Sending speed

The rate at which faxes are transmitted through the phone line. See also bps (bits per seconds).

Standby

The mode in which the machine is on and ready to use.

Subaddress

Subaddress is the global telecommunications standard specified by the ITU-T. When the remote party's machine supports the same standard, confidential or relayed communications are possible by attaching a subaddress and a password in advance.

T

Tone

A key that allows you to temporarily switch to touch-tone from pulse dialing. In some countries, on-line data services may require that you use tone dialing.

Tone/pulse setting

The ability to set the machine to match the telephone dialing system your telephone line uses: touch-tone or rotary pulse.

Toner

A black, resin coated powder contained in the toner cartridge. The machine applies the toner to the surface of the photosensitive drum inside the machine via an electrophotographic mechanism.

Toner saver

The feature that extends cartridge life by reducing toner consumption rate at a slight decrease in print quality.

Transmit

See Sending.

TX

See Sending.

V

Vector Graphics

See Raster.
