Important Usage Instructions

WARNING! TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE.

WARNING! TO REDUCE THE RISK OF ELECTRIC SHOCK AND TO REDUCE ANNOYING INTERFERENCE, USE THE RECOMMENDED ACCESSORIES ONLY.

COPYRIGHT WARNING: Unauthorized recording of copyrighted materials may infringe on the rights of copyright owners and be contrary to copyright laws.

DVD Camcorder, DC100 A systems

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Canon U.S.A. Inc.
One Canon Plaza, Lake Success, NY 11042, U.S.A.
Tel No. (516) 328-5600

CAUTION: TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

Important Warning

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure, that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point, within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.
In these safety instructions the word “product” refers to the Canon DVD Camcorder DC100 A and all its accessories.

1. Read Instructions — All the safety and operating instructions should be read before the product is operated.

2. Retain Instructions — The safety and operating instructions should be retained for future reference.

3. Heed Warnings — All warnings on the product and in the operating instructions should be adhered to.

4. Follow Instructions — All operating and maintenance instructions should be followed.

5. Cleaning — Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. The product should be cleaned only as recommended in this manual.

6. Accessories — Do not use accessories not recommended in this manual as they may be hazardous.

7. Avoid magnetic or electric fields — Do not use the camera close to TV transmitters, portable communication devices or other sources of electric or magnetic radiation. They may cause picture interference, or permanently damage the camera.

8. Water and Moisture — Hazard of electric shock — Do not use this product near water or in rainy/moist situations.

9. Placing or Moving — Do not place on an unstable cart, stand, tripod, bracket or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.

10. Power Sources — The CA-570 Compact Power Adapter should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. Regarding other power sources such as battery power, refer to instructions in this manual.

11. Polarization — The CA-570 Compact Power Adapter is equipped with a polarized 2-prong plug (a plug having one blade wider than the other). The 2-prong polarized plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

12. Power Cord Protection — Power cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to plugs and the point from which the cords exit the product.

13. Outdoor Antenna Grounding — If an outside antenna is connected to the product, be sure the antenna is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI / NFPA No. 70—1984, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See figure 1.
14. Lightning — For added protection of this product during a lightning storm, or when it is left unattended and unused for long periods of time, disconnect it from the wall outlet and disconnect the antenna. This will prevent damage to the product due to lightning and power-line surges.

15. Overloading — Do not overload wall outlets and extension cords as this can result in a risk of fire or electric shock.

16. Objects and Liquid Entry — Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Be careful not to spill liquid of any kind onto the product.

17. Servicing — Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service — Disconnect this product from the wall outlet and all power sources including battery, and refer servicing to qualified service personnel under the following conditions:
   a. When the power-supply cord or plug is damaged.
   b. If any liquid has been spilled onto, or objects have fallen into, the product.
   c. If the product has been exposed to rain or water.
   d. If the product does not operate normally even if you follow the operating instructions. Adjust only those controls that are covered by the operation instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation.
   e. If the product has been dropped or the cabinet has been damaged.
   f. When the product exhibits a distinct change in performance. This indicates a need for service.

19. Replacement Parts — When replacement parts are required, be sure the service technician has used replacement parts that are specified by Canon or that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

20. Safety Check — Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in safe operating order.

When replacement of the power supply is required, please return it to the responsible nearest Canon Service Center and please replace it with the same type number CA-570.

The Adapter can be used with a power supply between 100 and 240 V AC. For areas where 120 V AC power is not used, you will need a special plug adapter. Contact your nearest Canon Service Center for further information.

This Class B digital apparatus complies with Canadian ICES-003.
The Advantages of DVDs

RECORDING

With a DVD you just press the recording start/stop button and the camcorder will find the empty space on the disc (24). Don’t waste time fast forwarding and rewinding a tape to find from where to start a new recording.

Never worry about mistakenly recording over a precious memory!

PLAYING

Just select a scene from the index screen!

Just insert your finalized* disc into a DVD player and immediately find the scene you want to play back from the index (28). No need to play the whole thing or run the tape forward and back to find that scene you want.

* Finalization is a process required to make the DVD discs you recorded playable on common DVD players (61).
An Introduction to DVDs

You have probably heard of DVD discs and they come in various types and in two sizes - the more common 12 cm DVDs and 8 cm Mini DVDs. This camcorder uses commercially available 8 cm DVD-R or DVD-RW discs.

So... what disc to choose?

**DVD-R**
- Can be recorded only once.
- You cannot edit or delete the recordings.

**DVD-RW**
- You can record on it many times.
- You can delete scenes or initialize the disc and start recording again.

Now that I have the disc... What disc standard do I choose to initialize it?

**VIDEO mode**
- Once finalized, a disc recorded in VIDEO mode will play in most common DVD players. However, you cannot edit the recordings.

**VR* mode**
- You can easily edit the recordings. However, the disc can only be played back with DVD players compatible with DVD-RW discs in VR mode.

* Video Recording
## Differences in Available Features Depending on the Disc

The camcorder’s features and functions available will differ depending on the type of disc you use and the disc specification selected when initializing it.

* You will need to unfinalize the disc first.

**Recommended Discs:** This camcorder’s performance was tested using Hitachi-Maxell HG-series DVD discs. For use of other DVD media, contact directly the manufacturer’s customer support center.

- Attempting to record or play with this camcorder DVD discs that were recorded, initialized or finalized with other digital devices can result in lost data.
- You need to initialize newly bought DVD-RW discs with this camcorder before using them for the first time.

About this Manual

Thank you for purchasing the Canon DC100. Please read this manual carefully before you use the camcorder and retain it for future reference. Should your camcorder fail to operate correctly, refer to the Troubleshooting table (p. 66).

Conventions Used in the Manual

- : Precautions related to the camcorder operation.
- : Additional topics that complement the basic operating procedures.
- : Reference page number.
- Buttons and switches other than the multi selector’s ( ) are indicated as (for example ).
- [ ] are used to refer to menu items displayed on the screen. Menu options in boldface indicate a default setting (for example ON, OFF).
- “Screen” refers to the LCD and the viewfinder screen.
- The photos included in the manual are simulated pictures taken with a still camera.

About the Multi Selector

Use the multi selector to select options in a menu and change settings.

Push the multi selector up, down, left or right ( ) to select an item. In most places, press the multi selector itself ( ) to make a selection or change a setting.

Selecting an Option - MENU/FUNC.

Many of the camcorder’s functions can be adjusted from the menus that open after pressing the MENU button ( ) and the FUNC. button ( ).

For details about the available menu options and settings, refer to Options Lists - MENU/ FUNC. (p. 33).

Selecting MENU options

1. Press MENU.
2. Select ( ) the desired menu from the left side column and press ( ).

The title of the selected menu appears on top of the screen and under it the list of settings.
3. Select (▲▼) the setting you want to change and press (⏎).  
- The orange selection bar indicates the menu setting currently selected. Items not available appear in black.  
- To return to the menu selection screen, select (▼) [RETURN] and press (⏎).

4. Select (▲▼) the desired option and press (⏎) to save the setting.  
5. Press menu.  
   You can press menu to close the menu at any time.

Selecting FUNC. Menu Options
1. Press func.
2. Select (▲▼) the icon of the function you want to change from the left side column.
3. Select (◄►) the desired setting from the available options at the bottom bar.  
The selected option will be highlighted in light blue.

4. Press func. to save the settings and close the menu.  
   - You can press func. to close the menu at any time.  
   - With some settings, you will need to make further selections (▲▼, ◄►) and/or press (⏎). Follow the additional operation guides that will appear on the screen (such as the icon, small arrows, etc.).

About the Operating Modes

<table>
<thead>
<tr>

<td>PLAY</td>
<td>🎥 (PLAY) Green LED</td>
<td>Playing movies 28</td>
</tr>
</tbody>
</table>

* To use the still images functions (CAMERA or PLAY) you need to set [STILL IMAGES] to [ON] as explained below.

To activate the still images modes
1. Press menu.
2. Select (▲▼) [SYSTEM SETUP] and press (⏎).
3. Select (▲▼) [STILL IMAGES] and press (⏎).
4. Select (▲▼) [ON] and press (⏎).
5. Press menu again to close the menu.

To change the operating mode
In addition to turning the camcorder on and off, the power switch also toggles the camcorder's operating mode.  
From the ON position, slide down the power switch momentarily towards MODE and release it.
This action will toggle the operation mode in the following sequence:

[STILL IMAGES] set to [OFF] (default)  [STILL IMAGES] set to [ON]

- Record, \(\text{Record pause,} \) Playback, \(\text{Playback pause,} \) Fast playback, Fast reverse playback, Slow playback*, Slow reverse playback*

* Only with a DVD-RW in VR mode.
Number of still images available
- flashing in red: No disc
- in green: 6 or more images
- in yellow: 1 to 5 images
- in red: No more images can be recorded

Depending on the recording conditions, the number of still images available displayed may not decrease even after a recording has been made, or may decrease by 2 still images at once.

Remaining battery charge

- When " " starts flashing in red replace the battery pack with a fully charged one.
- When you attach an empty battery pack, the power may turn off without displaying " ".
- Depending on the conditions under which the camcorder and the battery pack are used, the actual battery charge may not be indicated accurately.

Getting Started

Step 1: Preparing the Power Supply

The camcorder can be powered with a battery pack or directly using the compact power adapter. Charge the battery pack before use.

1. Turn off the camcorder.
2. Attach the battery pack to the camcorder.
   - Open the LCD panel.
   - Slide in the connector end of the battery in the direction of the arrow and press it gently until it clicks.
3. Connect the power cord to the compact power adapter.
4. Plug the power cord into a power outlet.
5. Connect the compact power adapter to the camcorder’s DC IN terminal.
   - The CHG. (charge) indicator starts flashing. The indicator will stay on when the charging is completed.
   - You can also use the compact power adapter without attaching a battery pack.
   - When the compact power adapter is connected, even if a battery is attached its power will not be consumed.

Once the battery is fully charged:
1. Disconnect the compact power adapter from the camcorder.
2. Unplug the power cord from the power outlet and the compact power adapter.

To remove the battery pack:

Slide down BATTERY RELEASE to release the battery pack, and pull out the battery pack holding it from the ridge on its bottom part.

Charging, Recording and Playback Times with the BP-208 Battery Pack

The charging time of the BP-208 battery pack is 165 min.

The following recording and playback times are approximate and vary according to the charging, recording or playback conditions.
Approximate times for recording with repeated operations such as start/stop, zooming, power on/off.  

1. Turn off the camcorder before connecting or disconnecting the power adapter.  
2. Do not connect to the camcorder’s DC IN terminal or to the compact power adapter any electrical equipment that is not expressly recommended for use with this camcorder.  
3. You may hear some noise from the compact power adapter during use. This is not a malfunction.  
4. To prevent equipment breakdowns and excessive heating, do not connect the supplied compact power adapter to voltage converters for overseas travels or special power sources such as those on aircraft and ships, DC-AC inverters, etc.  
5. We recommend charging the battery pack in temperatures between 10 °C and 30 °C (50 °F and 86 °F). Outside the temperature range of 0 °C to 40 °C (32 °F to 104 °F), the charging will not start.  
6. If you connect a faulty power adapter or battery pack, the CHG. (charge) indicator flashes rapidly (approx. twice per second) and the charging stops.  
7. The CHG. (charge) indicator also serves as a rough estimate of the battery charge status.  
   - Continuously on: Battery fully charged.  
   - Flashes approx. twice per second: Battery over 50% charged.  
   - Flashes approx. once per second: Battery less than 50% charged.  
8. We recommend that you prepare battery packs 2 to 3 times longer than you think you might need.  
9. The charging time will vary depending on the surrounding temperature and the battery pack’s initial charge condition.  
10. In cold surroundings the usable time of the battery pack will decrease.

<td></td>
</tr>
</tbody>
</table>

* Approximate times for recording with repeated operations such as start/stop, zooming, power on/off.
Step 2: Preparing the Camcorder

1. Turn on the camcorder.
2. Adjust the viewfinder.
   Keep the LCD panel closed to use the viewfinder and adjust the dioptic adjustment lever as necessary.
3. Fasten the grip belt.
   Adjust the grip belt so that you can reach the zoom lever with your index finger, and the start/stop button with your thumb.

Step 3: Adjusting the LCD Screen

Rotating the LCD Panel
Open the LCD panel 90 degrees.
• You can rotate the panel downward by 90 degrees.
• You can rotate the panel by 180 degrees toward the lens (allowing the subject to monitor the LCD screen while you use the viewfinder). Rotating the panel by 180 degrees is also useful if you wish to include yourself when recording with the self-timer.

LCD Backlight
You can switch the brightness of the LCD screen to [NORMAL] or [BRIGHT].
1. Press [MENU].
2. Select (▲) [DISPLAY SETUP] and press (OK).
3. Select (▲) [BACKLIGHT] and press (OK).
4. Select (▲) the desired option and press (OK).
5. Press [MENU] to close the menu.

- This setting does not affect the brightness of the recording or the viewfinder screen.
- Using the [BRIGHT] setting will shorten the effective usage time of the battery.
Step 4: Changing the Display Language

MENU
(33)
DISPLAY SETUP LANGUAGE ENGLISH

Options

- DEUTSCH
- ENGLISH
- ESPANOL
- FRANCAIS
- ITALIANO
- POLSKI

1. Press MENU.
2. Select (▲▼) [DISPLAY SETUP] and press (OK).
3. Select (▲▼) [LANGUAGE ] and press (OK).
4. Select (▲▼) the desired option and press (OK).
5. Press MENU to close the menu.

If you changed the language by mistake, follow the * mark next to the menu item to change the setting.

Step 5: Setting the Time Zone / Daylight Saving Time

MENU
(33)
DATE/TIME SETUP T.ZONE/DST NEW YORK

1. Press MENU.
2. Select (▲▼) [DATE/TIME SETUP] and press (OK).
3. Select (▲▼) [T.ZONE/DST] and press (OK).

The time zone setting appears. The default setting is New York.

4. Select (▲▼) your time zone and press (OK).

To adjust for daylight saving time, select the time zone with the * mark next to the area.
Time Zones

Once you have set the time zone, date and time, you do not need to reset the clock every time you travel to another time zone. Select the time zone referring to the date and time displayed on the screen.

</tbody>
</table>

Step 6: Setting the Date and Time

1. Press \(\text{MENU}\).
2. Select \(\text{DATE/TIME SETUP}\) and press \(\text{SET}\).
3. Select \(\text{DATE/TIME}\) and press \(\text{SET}\). The year is displayed in orange.
4. Select \(\uparrow\) the month and move \(\downarrow\) to the day setting.
   - The next part of the date/time is displayed in orange.
   - Set the day, year, hours and minutes in the same way.
   - If you do not need to change all settings, move \(\text{SET}\) to a specific setting you want to change.
5. Press \(\text{MENU}\) to close the menu and start the clock.

\(\text{Note:\quad}\) When you do not use the camcorder for about 3 months, the built-in rechargeable lithium battery may discharge completely and the date and time setting may be lost. In such case, recharge the built-in lithium battery \(\text{(72)}\) and set the time zone, date and time again.

\(\text{Note:\quad}\) You can also change the date format \(\text{(37)}\).
Step 7: Loading and Removing a Disc

Inserting the Disc

1. Move the power switch to ON to set the camcorder in [CAMERA: \( \text{ } \)] mode.
2. Slide [OPEN] fully in the direction of the arrow and gently open the disc cover completely until it stops. Retract the grip belt under the camcorder so it will not get in the way of the disc cover.
3. Insert the disc and press its center firmly until it clicks in place.
   - Insert the disc with the recording side facing down (single sided discs - label side facing out).
   - Be careful not to touch the recording surface of the disc or the pick up lens.
4. Close the disc cover. Do not force the cover closed if the disc is not correctly inserted and firmly set in place.

When using DVD-R discs:
You can start recording movies once the record pause \( \text{ } \) indication appears.

When using a DVD-RW:
You need to initialize new discs before you can start recording. The disc initialization screen will appear when a new DVD-RW is first inserted. It will not appear when inserting a disc already initialized. In that case, you can start recording once the record pause \( \text{ } \) indication appears.

1. Select \( \text{ } \) the desired disc specification desired and press \( \text{ } \). For a comparison between the specifications [VIDEO] and [VR], see An Introduction to DVDs (6).
2. You will be asked to confirm the disc specification you selected. Select \( \text{ } \) [YES] and press \( \text{ } \) to continue, or select [NO] and press \( \text{ } \) to return and select a different disc specification.
A confirmation message will appear on the screen. Select (▲▼) [YES] and press (◄) to start the disc initialization.
• The disc initialization will take approximately one minute. Avoid moving the camcorder while the operation is in progress.
• You can start recording movies once the record pause indication appears.

The disc initialization screen may not appear automatically if you operated the camcorder’s buttons while the disc recognition was in progress. In that case, initialize the disc using the menu option (8 57).

The process of recognizing a disc may take a moment. The display will move while the disc is being read. Wait until the camcorder finishes recognizing the disc before you start recording.

Removing the Disc
1. Slide OPEN fully in the direction of the arrow and gently open the disc cover completely until it stops.
   • Do not subject the camcorder to strong impacts while the DISC access indicator is on or flashing.
   • Retract the grip belt under the camcorder so it will not get in the way of the disc cover.
   • It may take a moment after pressing OPEN for the disc cover to open.
2. Grab the edges of the disc and gently pull it out.
   Be careful not to touch the recording surface of the disc or the pick up lens.
3. Close the disc cover.

When you slide OPEN after making a recording, additional important data is recorded on the disc before the disc cover opens. While the DISC access indicator is on or flashing do not subject the camcorder to shocks such as forcefully laying it on a table.
Recording

Recording Movies

Before You Begin Recording
Make a test recording first to check if the camcorder operates correctly. Since recordings made on a DVD-R cannot be deleted, we recommend you use a DVD-RW disc to make the test recordings.

To change the operating mode, refer to About the Operating Modes (11).

1. Open the LCD panel and the lens cover (move the lens cover switch down to ).
2. Press to begin recording.
   - Press again to pause recording.
   - While recording and immediately after pausing, the DISC access indicator may go on while the scene is being recorded on the disc.

When you have finished recording:
1. Remove the disc.
2. Turn off the camcorder.
3. Disconnect the power source and remove the battery pack.
4. Close the LCD panel and the lens cover (move the lens cover switch to ).

Avoid the following actions while the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
- Do not subject the camcorder to vibrations or strong impacts.
- Do not open the disc cover and do not remove the disc.
- Do not disconnect the power source or turn off the camcorder.
- Do not change the operating mode.

About the recording time: By changing the recording mode you can change the recording time available on the disc (38).
About the Power Save mode: In order to save power when the camcorder is powered by a battery pack, the camcorder will automatically shut off if left without any operations for 5 minutes (36). To restore the power, slide the
power switch towards MODE and release it, or move the power switch to OFF and back to ON.

About the LCD and viewfinder screen: The screens are produced using extremely high-precision manufacturing techniques, with more than 99.99% of the pixels operating to specification. Less than 0.01% of the pixels may occasionally misfire or appear as black, red, blue or green dots. This has no effect on the recorded image and does not constitute a malfunction.

When using a tripod: Do not leave the viewfinder exposed to direct sunlight as it may melt (due to concentration of the light by the lens). Do not use tripods with fastening screws longer than 5.5 mm (0.2 inch). Doing so may damage the camcorder.

Reviewing the Last Scene Recorded
Press and release  (record review).
- The camcorder plays back the last scene and returns to record pause mode.
- While reviewing the scene, select ( ) the + icon and press ( ) to return to the recording mode.
- While reviewing a scene immediately after recording it, you can also delete the scene by selecting ( ) the - icon (55).

Selecting the Aspect Ratio of your Recordings
(16:9 Widescreen or 4:3)
You can select the aspect ratio of your recording to match your TV.

Widescreen is not available when the recording mode is set to [LP] on a disc initialized in VIDEO mode.

Press WIDE SCR.
Repeatedly pressing WIDE SCR toggles between the Widescreen (16:9) and normal (4:3) aspect ratios.

When recording in Widescreen mode, with [IMG STAB] set to [OFF] (33), you can have a wider view angle.

Playing back a Widescreen recording: TV sets compatible with the Video ID-1 system will automatically switch to wide (16:9) mode. Otherwise, change the aspect ratio of the TV manually. To play back on a TV with normal aspect ratio (4:3) change the [TV TYPE] setting accordingly.
Recording Still Images

To use the still images functions, you will need to set [STILL IMAGES] to [ON] beforehand (11).

To change the operating mode, refer to About the Operating Modes (11).

1. Open the LCD panel and the lens cover (move the lens cover switch down to ).
2. Press Start/Stop halfway.
   Once the focus is automatically adjusted, will turn green and one or more AF frames appear.
3. Press Start/Stop fully.
   The DISC access indicator will flash as the image is being recorded.

Avoid the following actions while the disc access display appears and while the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
- Do not subject the camcorder to vibrations or strong impacts.
- Do not open the disc cover and do not remove the disc.
- Do not disconnect the power source or turn off the camcorder.
- Do not change the operating mode.

If the subject is not suitable for autofocus, turns yellow. Keep Start/Stop pressed halfway and adjust the focus manually with the multi selector ( ).
Zooming

To change the operating mode, refer to About the Operating Modes (11).

In addition to the 25x optical zoom, the 1000x digital zoom is also available (33).

25x Optical Zoom

Move the zoom lever toward W to zoom out (wide-angle). Move it toward T to zoom in (telephoto).

You can also change the zoom speed (33). You can select one of three fixed zoom speeds or a variable speed that depends on how you operate the zoom lever: Press lightly for a slow zoom; press harder for faster zooms.

Keep at least 1 m (3.3 ft.) to the subject. At wide-angle, you can focus on a subject as close as 1 cm (0.39 in.).

When set to [VARIABLE], the zoom speed will be faster in the record pause mode.
Playback

Playing Back Movies

To change the operating mode, refer to About the Operating Modes (11). The scene index screen appears with the selection frame on the first scene.

1. Move ( , ) the selection frame to the scene you want to play back.
   Press ( or ) to move to the next or previous index page.

2. Press ( ) to begin the playback.
   • Playback of the scenes recorded on the disc will start from the scene selected.
   • When the end of the last movie recorded is reached, playback will stop and the camcorder will return to the scene index screen.

During Playback:

3. Press ( ) again to pause the playback.

4. Press ( ) to stop the playback and return to the scene index screen.

To use the viewfinder, close the LCD panel.

About the screen display: During playback, the recording’s time code will be displayed at the upper right corner of the screen in hours : minutes : seconds. You can also choose to display instead the date and time when the scene was recorded and additional recording data (32).

As long as you don’t turn off the camcorder you can resume playback from the point you stopped last.

Special Playback Modes

Fast Forward Playback / Fast Reverse Playback
During normal playback, press ( or ) repeatedly to increase the playback speed.
Fast forward: 1.5x → 5x → 15x → 25x the normal speed.
Fast reverse: 2.5x → 5x → 15x → 25x the normal speed.

Playback Pause
During normal playback, press ( ).
**Slow Forward Playback / Slow Reverse Playback**

During playback pause, press \( \rightarrow \) or \( \leftarrow \). Repeatedly press the button to increase the playback speed.

Slow playback: 1/16 → 1/8 → 1/4 → 1/2 the normal speed.

**Skipping Scenes**

During normal playback, push the multi selector (↑) to skip to the beginning of the next scene. Push the multi selector (↓) to return to the beginning of the current scene. Repeat to skip to the beginning of the previous scene.

- Except for fast playback at 1.5x the normal speed, there is no sound during special playback modes.
- The picture may become distorted during some special playback modes.
- Slow playback is not available with discs initialized in VIDEO mode.
- Depending on the recording, you might occasionally notice a brief stop of the picture or sound at the point where the scene changes.
- During the playback of a Photomovie scene, even though the display may change according to the fast forward/reverse playback, the actual playback speed will not change.

**Adjusting the Volume**

The camcorder plays the sound with the built-in speaker. The volume will be muted when you close the LCD panel.

1. Press \( \text{MENU} \).
2. Select (↑↓) [SYSTEM SETUP] and press (OK).
3. Select (↑↓) [VOLUME] and press (OK).
4. Adjust (←→) the volume as desired and press (OK). To turn off the volume completely, keep pressing (←) until the volume icon changes to 
5. Press \( \text{MENU} \) to save the setting and close the menu.
Viewing Still Images

To use the still images functions, you will need to set [STILL IMAGES] to [ON] beforehand (11).

To change the operating mode, refer to About the Operating Modes (11).

Use the multi selector (◀▶) to move between images.

- The following may not be displayed correctly:
  - Images not recorded with this camcorder.
  - Images edited on or uploaded from a computer.
  - Images whose file names have been changed.
- Avoid the following actions while the DISC access indicator is on or flashing. Failing to do so may result in permanent data loss.
  - Do not subject the camcorder to vibrations or strong impacts.
  - Do not open the disc cover and do not remove the disc.
  - Do not disconnect the power source or turn off the camcorder.
  - Do not change the operating mode.

Slideshow

1. Press FUNC.
2. Select (▲▼) [SLIDESHOW] and press (SET).
3. Select (◀▶) [START] and press (SET).

- Images are played back one after another.
- Press FUNC. to stop the slideshow.

Index Screen

1. Move the zoom lever toward W.
   The stills index screen appears with the first six still images.
2. Select (▲▼, ◀▶) an image.
   - Move the cursor ◀▶ to the image you want to view.
   - Press ◀ or ▶ to move to the next or previous index page.
3. Move the zoom lever toward T.
   The index screen closes and the selected image is displayed.
**Image Jump Function**
You can also quickly locate a specific image without having to browse all of them one by one.

Push the multi selector ( ◄► ) and keep it pressed down.
Image numbers will quickly run in sequence. When you release the multi selector the image corresponding to the number selected will be displayed.

**Magnifying the Image**
During playback, still images can be magnified up to 5 times.

1. Move the zoom lever toward T.
   - The image is magnified by 2 times and a frame appears indicating the position of the magnified area.
   - To further enlarge the image, move the zoom lever toward T. To reduce the magnification to less than 2 times, move the zoom lever toward W.
   -  will appear for images that cannot be enlarged.

2. Select the part of the image to be magnified with the multi selector.
   - Move ( ◄► ◄◄ ) the frame to the part of the image you want to see enlarged.
   - To cancel the magnification, move the zoom lever toward W until the frame disappears.
Selecting the Recording Data Display

The camcorder keeps a data code containing the recording date and time and other camera data such as shutter speed and exposure (f-stop).

![Camera modes](CAMERA: 🎬 CAMERAS: 📽️ PLAY: 🎥 PLAY: 🍞)

To change the operating mode, refer to About the Operating Modes (1 11).

PLAY : [DATE], [TIME], [DATE&TIME] only.

Data Code display

You can select the data code display style on the screen.

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[DATE]</td>
<td>Displays the date or time when the scene or still image was recorded.</td>
</tr>
<tr>
<td>[TIME]</td>
<td>Displays both the date and time of the recording.</td>
</tr>
<tr>
<td>[DATE &amp; TIME]</td>
<td>Displays the exposure (f-stop) and shutter speed used when recording the image.</td>
</tr>
<tr>
<td>[CAMERA DATA]</td>
<td>Displays the exposure, shutter speed, date and time of the recording.</td>
</tr>
<tr>
<td>[CAM &amp; D/T]</td>
<td>All on-screen displays + data code display on</td>
</tr>
<tr>
<td>[DATE]</td>
<td>Only the data code display on</td>
</tr>
<tr>

<td>All on-screen displays off</td>
</tr>
</tbody>
</table>

Selecting the Data Code

1. Press MENU.
2. Select (▲) [DISPLAY SETUP] and press ( ).
3. Select (▲) [DATA CODE] and press ( ).
4. Select (▲) the desired option and press ( ).
5. Press MENU to close the menu.

Turning the On-screen Displays On/Off

During playback, repeatedly press DISPLAY (▲) to turn the on-screen displays on/off in the following sequence:

- All on-screen displays + data code display on
- Only the data code display on
- All on-screen displays off
Options Lists – MENU | FUNC.

Menu items not available appear in black on the screen. For details about how to select an item, refer to Selecting an Option – MENU/FUNC. (10).

**MENU Options**

**CAMERA SETUP**

- **A.SL SHUTTER.**

  
  
  
<table>
<thead>
<tr>
<th>OFF</th>
<th>ON</th>
</tr>
</thead>
<tbody>
<tr>
<td>O</td>
<td>N</td>
</tr>
</tbody>
</table>

  The camcorder automatically uses slow shutter speeds to obtain brighter recordings in places with insufficient lighting.

  - If a trailing afterimage appears, set the slow shutter to [OFF].
  - If “ ” (camcorder shake warning) appears, we recommend stabilizing the camcorder, for example, by mounting it on a tripod.

- **D.ZOOM**

  
  
  
<table>
<thead>
<tr>
<th>OFF</th>
<th>100X</th>
</tr>
</thead>
<tbody>
<tr>
<td>1000X</td>
<td></td>
</tr>
</tbody>
</table>

  Determines the operation of the digital zoom.

  - When activated, the camcorder will switch automatically to the digital zoom when you zoom in beyond the optical zoom range.
  - With the digital zoom the image is digitally processed, so the image resolution will deteriorate the more you zoom in.
  - The digital zoom indicator will appear in light blue from 25x up to 100x and dark blue from 100x up to 1000x.
  - The digital zoom cannot be used with the [ NIGHT] recording program ( ) or with the multi-image screen.

- **ZOOM SPEED**

  
  
  
<table>
<thead>
<tr>
<th>VARIABLE</th>
<th>SPEED 3</th>
<th>SPEED 2</th>
<th>SPEED 1</th>
</tr>
</thead>
</table>

  - When set to [ VARIABLE] the zoom speed depends on how you operate the zoom lever: Press lightly for a slow zoom; press harder for faster zooms.
  - The fastest zoom speed can be achieved with [ VARIABLE]. Among the fixed zoom speeds, [ SPEED 3] is the fastest and [ SPEED 1] the slowest.

- **IMG STAB**

  
  
  
<table>
<thead>
<tr>
<th>OFF</th>
<th>ON</th>
</tr>
</thead>
</table>

  The image stabilizer compensates for camcorder shake even at full telephoto.

  - The image stabilizer is designed to compensate for a normal degree of camcorder shake.
  - The image stabilizer may not be effective when recording in dark places using the [ NIGHT] recording program ( )
  - The image stabilizer cannot be turned off when the mode switch is set to [ ].
The camcorder records the still image only after the focus has been adjusted.

- Set it to [OFF] if you wish to record a still image as soon as you press Start/Stop. When set to [OFF], no focusing frame appears.
- Focus priority cannot be turned off when the mode switch is set to .
- In the [FIREWORKS] recording program the setting is automatically set to [OFF].

Focus priority cannot be turned off when the mode switch is set to .

In the [FIREWORKS] recording program the setting is automatically set to [OFF].

When activated, the camcorder will reduce the background sound of wind when recording outdoors.

- Set the mode switch to a position other than [OFF].
- Some low-frequency sounds will be suppressed along with the sound of wind. We recommend to leave the wind screen [OFF] for most recording environments.

Displays a screen where you can verify the details regarding the disc.

- The disc information includes the disc title, the disc type (DVD-R or DVD-RW), the disc specification (VIDEO mode or VR mode), and icons that indicate if the disc is finalized ( ) or protected ( ).
- This option is available only in the original index screen.
This option is available only in the playlist index screen.

**DISPLAY SETUP**

**BRIGHTNESS**
- Adjusts the brightness of the LCD screen.
- Use the multi selector ( ) to adjust the brightness to your preference.
- Changing the brightness of the LCD screen does not affect that of the viewfinder or the recordings.

**BACKLIGHT**
- [NORMAL], [BRIGHT]

**LCD MIRROR**
- [ON], [OFF]

When you rotate the LCD panel 180 degrees to face the subject, the picture displayed will be a mirror image (right and left reversed) so that the image on the display will match that of the subject. All on-screen displays will also be reversed.

**DATA CODE**

**LEVEL MARKER**
- [ON], [OFF]

A horizontal line will appear at the center of the screen. You can frame the picture by referring to the level marker.

**LANGUAGE**
- [DEUTSCH], [ENGLISH], [ESPAÑOL], [FRANÇAIS], [ITALIANO], [POLSKI], [РУССКИЙ], [繁体中文], [簡體中文], [한국어], [ไทย], [日本語]
The demonstration mode displays the camcorder’s main features. It starts automatically when the camcorder is powered with the power adapter if you leave it turned on without loading a disc for more than 5 minutes. 

To cancel the demo mode once it started, press any button, turn off the camcorder or load a disc.

**SYSTEM SETUP**

<table>
<thead>
<tr>
<th>STILL IMAGES</th>
<th>VOLUME</th>
<th>BEEP</th>
<th>FIRMWARE</th>
<th>POWER SAVE</th>

<td>[ON], [OFF]</td>
<td>[RESET], [CONTINUOUS]</td>
<td>[ON], [OFF]</td>
<td>[RESET], [CONTINUOUS]</td>
</tr>
</tbody>
</table>

A beep will accompany some operations like turning on the camcorder, the self-timer countdown, etc. It also serves as a warning beep under unusual conditions.

You can check the current version of the camcorder’s firmware.

In order to save power when the camcorder is powered by a battery pack, it will automatically shut off if left without any operation for five minutes. Approximately 30 seconds before the camcorder shuts off, the message "AUTO POWER OFF" will appear.

Select the image numbering method to be used on a new disc. Images are automatically assigned consecutive image numbers from 0101 to 9900, and stored in folders containing up to 100 images. Folders are numbered from 101 to 998.

**[RESET]**: Image numbering will start anew from 101-0101 every time you insert a new disc. If it already contains image files, a new image will be given the number following that of the last image on the disc.

**[CONTINUOUS]**: Image numbering will start from the number following that of the last image recorded with the camcorder. If the disc already contains an image with a larger image number, a new image will be given the number following that of the last image on the disc. This numbering method is useful for organizing images on a computer. We recommend using this setting.
In order to display the picture in full and in the correct aspect ratio, select the setting according to the type of television to which you will connect the camcorder.

[NORMAL TV]: TV sets with 4:3 aspect ratio.
[WIDE TV]: TV sets with 16:9 aspect ratio.

DATE/TIME SETUP

**DATE/TIME SETUP**

- **DATE/TIME** (21)
- **DATE FORMAT**

- **[Y.M.D (2006.1.1 AM 12:00)], [M.D,Y (JAN. 1, 2006 12:00 AM)], [D.M.Y (1.JAN.2006 12:00 AM)]**

  - [D.EFFECT OFF], [FADE], [EFFECT], [MULTI-S]

* Not available while using the [NIGHT] recording program.
Recording mode
- **HIGH QUALITY**, [STANDARD PLAY], [LONG PLAY]

Approximate recording times with a brand new DVD-R disc are as follows:
- XP: 20 minutes, SP: 30 minutes, LP: 60 minutes.

Recording in LP mode gives you a longer recording time; however, depending on the condition of the disc (long usage, imperfections, etc.) the picture and sound recorded in LP mode may be distorted. We recommend using the XP or SP mode for important recordings.

Depending on the recording mode, you might occasionally notice a brief stop of the picture or sound at the point where the scene changes.

The camcorder uses a variable bit rate (VBR) when encoding the video data so the actual recording times will vary depending on the content of the scenes.

**Still image size/quality**
- **SUPER FINE**, [FINE], [NORMAL]

Size: [L 1024x768], [S 640x480]

Using the Recording Programs

To change the operating mode, refer to About the Operating Modes (11).

**Auto**
The camcorder adjusts focus, exposure and other settings automatically, allowing you to just point and shoot.

**P Program AE (40)**
Tv Shutter-Priority AE (41)
Av Aperture-Priority AE (42)

**Portrait**
The camcorder uses a large aperture, achieving a focus on the subject while blurring other distracting details.

**Sports**
Use this mode to record sports scenes such as tennis or golf.

**Snow**
Use this mode to record in bright ski resorts. It prevents the subject from being underexposed.

**Spotlight**
Use this mode to record spotlight scenes.

**Beach**
Use this mode to record on a sunny beach. It prevents the subject from being underexposed.

**Fireworks**
Use this mode to record fireworks.

**Night**
Use this mode to record in poorly lit places.

**Sunset**
Use this mode to record sunsets in vibrant colors.
Selecting the Recording Program

To change the operating mode, refer to About the Operating Modes (11).

Move the mode switch between the recording categories.

Automatic mode

- **P**: Select [PROGRAM AE], [Tv SHUTTER-PRIO. AE], [Av APERTURE-PRIO. AE]
- **SCN**: Select [PORTRAIT], [SPORTS], [NIGHT], [SNOW], [BEACH], [SUNSET], [SPOTLIGHT], [FIREWORKS]

To select a recording program after choosing **P, SCN**:

1. **FUNC.** Recording Program icon
2. **FUNC.** Desired option

- Do not change the recording program while recording as the brightness of the image may change abruptly.
- [PORTRAIT]
  - The blur effect of the background increases the more you zoom in (T).
  - The picture may not appear smooth when played back.
- [SPORTS]
  - The picture may not appear smooth when played back.
- [SNOW] [BEACH]
  - The subject may become overexposed on cloudy days or in shaded places.
  - Check the image on the screen.
  - The picture may not appear smooth when played back.
- [FIREWORKS]
  - To avoid camcorder shake, we recommend using a tripod. Make sure to use a tripod especially in **CAMERA** as the shutter speed slows down.

Using the Program AE Mode

The camcorder automatically adjusts the aperture and shutter speed according to the subject to achieve the best exposure conditions. With [PROGRAM AE], you can point and shoot as in **CAMERA** mode, while still enjoying the option to manually adjust some settings.

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: **P**

Select the recording program [P PROGRAM AE] as described in Selecting the Recording Program (11).
If the optimal exposure cannot be obtained, try the following actions.

- Manually adjust the exposure (43).
- Change the metering method (43).

Tv Using the Shutter-Priority AE Mode

You can select a shutter speed, and the camcorder automatically sets the aperture setting most appropriate for the subject. Select a high shutter speed for recording fast moving subjects, and a slow shutter speed to add a motion blur to moving objects, enhancing the feel of movement of the image.

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: P

Shutter speed guideline

<table>
<thead>

<td>—</td>
</tr>
</tbody>
</table>

1. Select the recording program [Tv SHUTTER-PRIOR.AE] as described in Selecting the Recording Program (40).
2. Press ( ).
3. Change ( ) the shutter speed and press ( ) to save the setting.

- The shutter speed denominator flashes when the selected shutter speed is not appropriate for the recording condition. In such case, readjust the shutter speed.
- When using a slow shutter speed in dark places, you can obtain a brighter image, but the image quality may be lower, and the autofocus may not work well.
- Do not point the camcorder directly at the sun when the shutter speed is set to 1/1000 or higher.
- The image may flicker when recording with high shutter speeds.
- Recording movies under fluorescent lights: In P or NIGHT (SCN) mode, the camcorder automatically detects the flicker of fluorescent lighting and adjusts the shutter speed accordingly. However, if the screen starts to flicker, select [Tv SHUTTER-PRIOR.AE] and set the shutter speed to 1/100.
Using the Aperture-Priority AE Mode

You can select an aperture value, and the camcorder automatically sets the shutter speed most appropriate for the subject. Use low aperture values (large aperture) to blur the background for a portrait, or high aperture values (small aperture) to achieve a broad depth of field for recording landscapes.

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: P

Aperture value guideline

[1.8], [2.0], [2.4], [2.8], [3.4], [4.0], [4.8], [5.6], [6.7], [8.0], [9.5], [11], [14], [16]

large ← aperture size → small

1. Select the recording program [Av APERTURE-PRIOR.AE] as described in Selecting the Recording Program (40).
2. Press (O).
3. Change (A) the aperture value and press (O) to save the setting.

Available aperture values vary depending on the zoom position.
The aperture value flashes when the selected aperture is not appropriate for the recording condition. In such case, readjust the aperture.
Manually Adjusting the Exposure

Adjust the exposure when a subject is underexposed (for example, when backlit subjects appear too dark in the image) or overexposed (for example, when recording subjects under very strong light and they appear too bright or glaring in the image).

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: P, SCN (except for the [FIREWORKS] recording program).

1. Press EXP ( ).
   • The exposure adjustment indicator and the neutral value “±0” appear on the screen.
   • If you operate the zoom during exposure lock, the brightness of the image may change.

2. Adjust ( ) the brightness of the image as required.
   • The adjustment range depends on the brightness of the picture at the time you locked the exposure.
   • Pressing EXP ( ) again will cancel the exposure lock and return the camcorder to the previous setting.

Changing the Metering Method

You can select the light metering mode.

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: P

Options

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>[EVALUATIVE]</td>
<td>Appropriate for standard shooting conditions, including backlit scenes. The camcorder divides the picture into several zones for light metering and evaluates complex lighting conditions for the optimal exposure of the subject.</td>
</tr>
<tr>
<td>[CENT.WEIGHT.AVERAGE]</td>
<td>Averages the light metered from the entire screen, giving more weight to the subject in the center.</td>
</tr>
<tr>
<td>[SPOT]</td>
<td>Meters the area within the spot AE point frame. Use this setting to adjust the exposure to match the subject in the center of the screen.</td>
</tr>
</tbody>
</table>

FUNC. ➔ Metering Method icon

FUNC. ➔ Desired option
**Manually Adjusting the Focus**

Autofocus may not work well on the following subjects. In such case, focus manually.

<table>
<thead>
<tr>
<th>Reflective surfaces</th>
<th>Subjects with low contrast or without vertical lines</th>
<th>Fast Moving Subjects</th>
<th>Through dirty or wet windows</th>
<th>Night Scenes</th>
</tr>
</thead>
</table>

To change the operating mode, refer to *About the Operating Modes* (11).

Mode switch: P, SCN

1. Adjust the zoom.
2. Press FOCUS ( ).
   *“MF”* appears.
3. Adjust ( ) the focus as required until the image appears focused.
   Pressing FOCUS ( ) again will return to autofocus.

- The camcorder will automatically return to autofocus when you set the mode switch toCAMERA .
- Readjust the focus when you have turned off the camcorder.

**Infinity Focus**

Use this function when you wish to focus on faraway subjects such as mountains or fireworks.

1. Adjust the zoom.
2. Keep FOCUS ( ) pressed down for more than 2 seconds.
   * “∞” appears.
   - Pressing FOCUS ( ) again will return to autofocus.

If you operate the zoom or the multi selector ( ) during infinity focus, “∞” changes to “MF” and the camcorder returns to manual focusing mode.
Changing the Autofocus Mode

You can change the AF (autofocus) frame selection mode.

To change the operating mode, refer to About the Operating Modes (1 1).

Options

<table>
<thead>
<tr>
<th>Options</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>9 Point AiAF</td>
<td>Depending on the shooting conditions, one or more AF frames out of the nine frames available are automatically selected and focused on. Four framing corners will appear on the screen when making the selection; the corners do not appear while actually recording.</td>
</tr>
<tr>
<td>Center point</td>
<td>The center AF frame is selected to focus. This is convenient for making sure the focus is exactly where you want it. A single focusing frame appears in the center of the screen when making the selection; the frame will appear also while actually recording.</td>
</tr>
</tbody>
</table>

* Except for the [FIREWORKS] recording program.

Select ( ◀) the autofocus mode.
Using the Self Timer

To change the operating mode, refer to About the Operating Modes (11).

CAMERA : Set the camcorder in record pause mode.

" " appears.

CAMERA : Press Start/Stop.
The camcorder starts recording after a 10-second countdown. The countdown appears on the screen.

CAMERA : Press Start/Stop, first halfway to activate the autofocus and then fully to record the still image.
The camcorder will record the still image after a 10-second countdown. The countdown appears on the screen.

Once the countdown has begun, you can also press Start/Stop to cancel the self timer. The self timer will be canceled if you turn off the camcorder.
Setting the White Balance

You can choose one of the preset settings to reproduce colors more accurately, or set a custom white balance to obtain the setting best suited to your specific recording conditions.

Mode switch: P

Options

- **[AUTO]** Settings are automatically set by the camcorder. Use this setting for outdoor scenes.
- **[DAYLIGHT]** For recording outdoors on a bright day.
- **[SHADE]** For recording in shaded places.
- **[CLOUDY]** For recording on a cloudy day.
- **[TUNGSTEN]** For recording under tungsten and tungsten type (3-wavelength) fluorescent lighting.
- **[FLUORESCENT]** For recording under warm white, cool white or warm white type (3-wavelength) fluorescent lighting.
- **[FLUORESCENT H]** For recording under daylight or daylight type (3-wavelength) fluorescent lighting.
- **[SET]** Use the custom white balance setting to make white subjects appear white under colored lighting.

To change the operating mode, refer to About the Operating Modes (11).

To set the custom white balance when you select [SET]:

1. Point the camcorder at a white object, zoom in until it fills the whole screen and press ( ).
2. Keep the camcorder zoomed at the white object until ( ) stops flashing.
3. Press **FUNC.** to save the setting and close the menu.

Depending on the type of fluorescent light, optimal color balance may not be obtained with [FLUORESCENT] or [FLUORESCENT H]. If the color looks unnatural, adjust it using [AUTO] or [SET].

When you have set the custom white balance:
- Depending on the light source, ( ) may keep flashing. The result will still be better than with [AUTO].
- Reset the white balance when the lighting condition changes.
- Turn off the digital zoom.
- The camcorder retains the custom white balance setting even if you turn it off.
Custom white balance may provide better results in the following cases:
- Changing lighting conditions
- Close-ups
- Subjects in a single color (sky, sea or forest)
- Under mercury lamps and certain types of fluorescent lights
**Applying Image Enhancing Effects**

You can record with different color saturation and contrast effects.

To change the operating mode, refer to *About the Operating Modes* (11).

Mode switch: P

- **IMAGE EFFECT OFF**: Records with no image enhancing effects.
- **VIVID**: Emphasizes the contrast and color saturation.
- **NEUTRAL**: Tones down the contrast and color saturation.
- **LOW SHARPENING**: Records subjects with softened outlines.
- **SOFT SKIN DETAIL**: Softens the details in the skin tone area for a more complimentary appearance. To obtain the best effect, use this setting when recording a person in close-up. Note that areas similar to the skin color may lack in detail.
- **CUSTOM**: Allows you to adjust the brightness, contrast, sharpness, and color depth of the image.
  - **BRIGHTN.**: (–) Darker picture, (+) Brighter picture
  - **CONTRAST**: (–) Flatter picture, (+) More defined light and shade
  - **SHARPNESS**: (–) Vaguer outlines, (+) Sharper outlines
  - **COL.DEPTH**: (–) Shallower colors, (+) Richer color tonality

*To set the custom image effect when you select **CUSTOM**:*

1. Press (2) and select (4) the custom setting options: [BRIGHTN.], [CONTRAST], [SHARPNESS] or [COL.DEPTH].
2. Adjust (4) each setting as desired and then press (1) .
3. Press **FUNC.** to save the setting and close the menu.
Using the Digital Effects

[FADER] Faders
Begin or end scenes with a fade to or from black. You can preview the effect on the display.

<table>
<thead>
<tr>
<th>[FADE-T] (fade trigger)</th>
<th>[WIPE]</th>

</table>

[MULTI-S] Multi-Image Screen (51)
Captures moving subjects as a sequence of 4, 9 or 16 still images and displays them as one split screen. Sound will be recorded normally.

4 split images
9 split images
16 split images

When you are not using the digital effect, select [D.EFFECT OFF].

Selecting a Fader / Effect

To change the operating mode, refer to About the Operating Modes (31).

Mode switch: P, SCN
CAMERA - [BLK&WHT] only.

FUNC
(37) D.EFFECT OFF
Setting

You can preview the effect on the screen before pressing ( ).

The selected effect icon appears.

Applying

1. Press D.EFFECTS to activate the fader/effect.
   • To fade in, press D.EFFECTS before you start recording, then press Start/Stop to start recording.
   • To fade out, press D.EFFECTS while recording, then press Start/Stop to pause the recording.

2. Press D.EFFECTS again to deactivate the fader/effect.

The camcorder retains the setting last used even if you turn off the digital effects or change the recording program.

Using the Multi-Image Screen

To change the operating mode, refer to About the Operating Modes (11).

Mode switch: [SCN] (except for the [NIGHT] recording program).

Options

[S.SPEED] Select how fast the images will be captured.
   [MANUAL]: One image will be added to the split screen every time you press D.EFFECTS. Hold D.EFFECTS pressed down for more than 1 second to delete images from the split screen.
   [FAST]: Every 4 frames
   [MOD.]: Every 6 frames
   [SLOW]: Every 8 frames

[S.SPLIT] Select how many images in the split screen: [4], [9], [16].
Setting

Digital Effects icon

Press ( )

\[ \text{MULTI-S} \]

Press ( )

\[ \text{(▲▼) S.SPEED} \] ( ) Desired transition speed

\[ \text{(▲▼) S.SPLIT} \] ( ) Desired number of images

Press ( )

' ' appears.

Applying

1. Press \text{D.EFFECTS} to capture the images.
2. Press \text{Start/Stop} to record the multi-image screen displayed.
Selecting the Size and Quality of Still Images

Still images are recorded on the disc using the JPEG (Joint Photographic Experts Group) compression. As a general rule select a larger image size for higher quality.

Options and number of still images that can be recorded on a disc:

<table>
<thead>
<tr>
<th>Image Size</th>
<th>Image Quality</th>
<th>VIDEO Mode (DVD-R/RW)</th>
<th>VR Mode (DVD-RW)</th>
</tr>
</thead>
<tbody>
<tr>
<td>L 1024x768</td>
<td>SUPER FINE</td>
<td>3130</td>
<td>3135</td>
</tr>
<tr>
<td></td>
<td>FINE</td>
<td>4530</td>
<td>4540</td>
</tr>
<tr>
<td></td>
<td>NORMAL</td>
<td>8610</td>
<td>8630</td>
</tr>
<tr>
<td>S 640x480</td>
<td>SUPER FINE</td>
<td>7825</td>
<td>7845</td>
</tr>
<tr>
<td></td>
<td>FINE</td>
<td>9999</td>
<td>(11510)*</td>
</tr>
<tr>
<td></td>
<td>NORMAL</td>
<td>9999</td>
<td>(19185)*</td>
</tr>
</tbody>
</table>

* This number is the number of images that can be recorded on the disc; however, the maximum number of remaining images displayed on the screen will be 9999.

To change the operating mode, refer to About the Operating Modes (11).

Options:
- Image Size icon
- Desired image size*
- Press ( )
- Desired image quality*

* The number displayed on the right corner indicates the approximate number of images that can be recorded with the current quality/size setting.
Editing Functions

Editing the Scenes
(DVD-RW in VR mode only)

Creating a Playlist
Create a playlist to easily edit your movies (for example, change the order in which the scenes you recorded will be played back or edit scenes including only the best parts and cutting out the rest) without affecting your original recordings. After you add scenes to the playlist you will have two types of index screens: The original index screen (for the original recordings) and the playlist index screen.

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW initialized in VR mode.

Adding Scenes to the Playlist
Options

- [ALL SCENES] Adds all scenes in the original index screen to the playlist.
- [ONE SCENE] Adds only the selected scene to the playlist.
- [CANCEL] Returns to the original index screen.

From the original index screen, select (, ) the scene to add to the playlist. To add all scenes there is no need to select any particular scene.

When the operation is completed “ADDED TO PLAYLIST” will be displayed. Press # PLAYLIST # to check the scenes in the playlist index screen.

Moving Scenes in the Playlist
From the original index screen, press # PLAYLIST #. From the playlist index screen, select (, ) the scene to move.

Move ( , ) the orange marker to the new position of the scene and press ( ).

YES
Deleting Scenes
You can delete those scenes that you are not interested in keeping. Remember that when you delete scenes in the playlist, you do not affect your original recordings; however, when you delete an original recording, it will be deleted also from the playlist.

- Be careful when deleting original recordings. Once deleted, an original scene cannot be recovered.
- Do not change the operating mode while the scene is being deleted.
- Scenes cannot be deleted when the disc is protected (57).
- You may not be able to delete scenes shorter than 5 seconds.

Deleting a Single Scene

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW initialized in VR mode.

From the original index screen, select ( , ) the scene to delete. To delete a scene only in the playlist, press PLAYLIST first, and then select the scene.

Deleting a Scene Just After Recording
As long as you have not turned the camcorder off or changed the operating mode after recording a scene, you can delete it while reviewing it.

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW discs (VIDEO or VR mode).

1. Immediately after recording a scene, press (record review).
2. While reviewing the scene, select ( , ) and press ( ).
3. Select ( ) [YES] and press ( ).

Deleting All Scenes

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW initialized in VR mode.

To delete all the scenes from the original index screen follow the procedure below. This will delete also the whole playlist. If you only want to delete all the scenes from the playlist (without affecting the original recordings), press PLAYLIST first and then continue as follows.
When you are deleting the playlist, this menu option will be replaced by [PLAYLST ALL DEL].

Dividing a Scene

You can divide your recordings in order to leave only the best parts and later cut out the rest. Remember that when you divide scenes in the playlist, you do not affect your original recordings.

Photomovie scenes and scenes created by converting single still images cannot be divided.

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW initialized in VR mode.

From the original index screen, select the scene to divide. To divide a scene only in the playlist, press first, and then select the scene.

* You can use the following icons and the special playback modes (28) to bring the scene to a precise point.
  - : Skip to the beginning of the current/next scene.
  - One frame reverse/advance.
Disc Options

Protecting the Disc
You can protect the whole disc to prevent the accidental erasure of important recordings.

Initializing the disc (57) will permanently erase all recordings, even if the disc is protected.

To change the operating mode, refer to About the Operating Modes (11).

Disc type: DVD-RW initialized in VR mode.

Initializing the Disc
You need to initialize a DVD-RW disc when first inserting it into the camcorder and you may have to initialize a disc if you get the "DISC ERROR" message. You can also choose to initialize the disc if you wish to erase all the recordings on the disc or in order to change the disc specification.

Avoid moving the camcorder while the operation is in progress.
Initializing the disc will permanently erase all recordings, even if the disc is protected. The lost original recordings cannot be recovered.
The disc initialization will take approximately one minute.

Disc type: DVD-RW discs (VIDEO or VR mode).

Options

VIDEO mode: Most DVD players will play the disc, but except for the disc title, the recordings cannot be edited with the camcorder.

VR mode: You will have the option to edit the recordings with the camcorder, but the disc can only be played in VR mode-compatible DVD players and computer DVD drives.

* Close the menu only after the screen display returns to the [DISC OPERATIONS] menu.
Changing the Disc Title

Before you finalize your disc, you can give it a title. The disc title will be displayed on the index screen when playing the finalized disc in most DVD players.

To change the operating mode, refer to About the Operating Modes (11).

* Select one character at a time and press ( ) to add it to the title. Select [BACKSPACE] and press ( ) to delete the last character.

* * Select one character at a time and press ( ) to add it to the title. Select [BACKSPACE] and press ( ) to delete the last character.
Erasing Still Images

Be careful when erasing images. Erased images cannot be recovered.

Still images on a protected disc cannot be erased.

Erasing a Single Image

To change the operating mode, refer to About the Operating Modes (11).
Disc type: DVD-RW initialized in VR mode.

Erasing a Single Image Just After Recording

You can erase the still image you recorded last, while you are reviewing the image immediately after recording it.

To change the operating mode, refer to About the Operating Modes (11).
Disc type: DVD-RW discs (VIDEO or VR mode).

While reviewing the image immediately after recording:

Erasing All Images

To change the operating mode, refer to About the Operating Modes (11).
Disc type: DVD-RW initialized in VR mode.

ERASE ALL IMAGES

FUNCTION

YES
Converting Still Images into Photomovie Scenes

Still images are recorded using JPEG compression, but a DVD player only recognizes the MPEG standard. Thus, to play back your still images with your DVD player, first you need to create a Photomovie scene – a slide show of all still images on the disc, where each image will be displayed for approx. 3 seconds.

To change the operating mode, refer to About the Operating Modes (11).

Converting a Single Image
Select (►) the still image you want to convert to a scene.

Converting All Images

This function does not affect the original still images.

If the disc becomes full while creating a Photomovie scene, the operation will be canceled.
Preparing your Disc for Playing on a DVD Player – [FINALIZE]

To play the disc you recorded on a DVD player, a computer’s DVD drive or other digital device, you need to finalize it first. You do not need to finalize the disc to play back your recordings with the camcorder connected to the TV.

To view your still images on a DVD player you will need to convert them to Photomovie scenes beforehand (60).

- Be sure to finalize the disc in normal room temperatures. If the procedure was not completed correctly due to high temperature, let the camcorder cool off before resuming operation.
- Place the camcorder on a table or other stable surface before starting the procedure. Subjecting the camcorder even to slight impacts (for example to place it on a table or to disconnect the AV cable) after the finalization process started may result in permanent data loss.
- Always power the camcorder using the compact power adapter. The operation cannot be started if the camcorder is powered only with the battery pack.
- Avoid the following actions while the operation is in progress. Failing to do so can interrupt the process and result in permanent data loss.
  - Do not move the camcorder.
  - Do not disconnect the compact power adapter.
- Depending on the type of disc and the disc specification, after finalizing the disc you may not be able to initialize the disc, edit your recordings or add new recordings to the disc.
- Do not finalize with the camcorder discs that were not recorded using this camcorder.

Restrictions after Disc Finalization

<table>
<thead>
<tr>
<th>Disc Type</th>
<th>Additional Recordings</th>

<td>–</td>
<td>–</td>
</tr>
<tr>
<td>DVD-RW in VR mode</td>
<td>●</td>
<td>–</td>
<td>●</td>
<td>●</td>
</tr>
</tbody>
</table>

* You will need to unfinalize the disc first.
Finalizing the Disc

The length of the finalization process depends on the scenes recorded and the remaining free space on the disc.

* During the disc finalization a progress bar is displayed. Close the menu only after the screen display returns to the [DISC OPERATIONS] menu.

When using a finalized disc, the finalization mark ☑ will appear next to the disc type display.

Playing Back your Disc on a DVD Player or a Computer’s DVD Drive

After finalizing it, you can play the disc on DVD-R or DVD-RW compatible devices. On most DVD players look for the DVD-R/RW compatibility logo DVD. Refer also to the instruction manual of your DVD device.

On a DVD Player
1. Turn on the TV and DVD player.
2. Insert a finalized disc in the DVD player.
3. Select the scene you want to play from the index screen.

On a Computer’s DVD Drive
You need to have DVD playback software installed in your computer to play the disc.
1. Insert a finalized disc in the DVD drive.
2. Run the DVD playback software.
   - Refer also to the instruction manual and help modules of your DVD playback software.
   - To view still images recorded on the disc, close first any DVD playback software that may be running.

○ DVD-RW discs recorded in VR mode can only be played on VR mode-compatible DVD players. Depending on your DVD device you may not be able to play the disc.
○ In order to view the still images recorded on the disc in a DVD player, you have to convert individual images to scenes, or create a Photomovie scene (60) before finalizing the disc. The resolution of Photomovie scenes will be lower than that of the original still images.
Recording Additional Movies on a Finalized Disc – [UNFINALIZE]

You can record additional movies after the finalization by unfinalizing an already finalized DVD-RW disc in VIDEO mode.

Disc type: DVD-RW initialized in VIDEO mode.

- Be sure to unfinalize the disc in normal room temperatures. If the procedure was not completed correctly due to high temperature, let the camcorder cool off before resuming operation.
- Place the camcorder on a table or other stable surface before starting the procedure. Subjecting the camcorder even to slight impacts (for example to place it on a table or to disconnect the AV cable) after the unfinalization process started may result in permanent data loss.
- Always power the camcorder using the compact power adapter. The operation cannot be started if the camcorder is powered only with the battery pack.
- Avoid the following actions while the operation is in progress. Failing to do so can interrupt the process and result in permanent data loss.
  - Do not move the camcorder.
  - Do not disconnect the compact power adapter.
- Only discs that were finalized using this camcorder can be unfinalized with this camcorder.

<table>
<thead>
<tr>
<th>Disc Can Be Unfinalized</th>
<th>DVD-R in VIDEO mode</th>
<th>DVD-RW in VIDEO mode</th>
<th>DVD-RW in VR mode</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>~</td>
<td>•</td>
<td>You can record additional scenes even without unfinalizing the disc</td>
</tr>
</tbody>
</table>

* During the disc unfinalization a progress bar is displayed. Close the menu only after the screen display returns to the [DISC OPERATIONS] menu.
Playing Back on a TV Screen

Selecting the Type of TV

To change the operating mode, refer to About the Operating Modes (11).

Before connecting the camcorder, select the [TV TYPE] setting according to the TV set to which you will connect the camcorder: [WIDE TV]: TV sets with 16:9 aspect ratio or [NORMAL TV]: TV sets with 4:3 aspect ratio (37).

Connection Diagram

1. Turn off all devices before starting the connections.
2. Connect the STV-250N Stereo Video Cable to the camcorder’s AV terminal and the terminals on the TV or VCR.
   Connect the white plug to the white audio terminal L (left), the red plug to the red audio terminal R (right) and the yellow plug to the yellow VIDEO terminal.
3. On a TV: Set the input selector to VIDEO. On a VCR: Set the input selector to LINE (IN).

We recommend powering the camcorder using the compact power adapter. TV sets compatible with the Video ID-1 system will automatically switch to the appropriate aspect ratio. Otherwise, change the aspect ratio of the TV manually.
**Recording to a VCR**

You can copy your recordings by connecting the camcorder to a VCR or a digital video device. For a connection diagram showing how to connect the camcorder to a VCR see the previous section *Playing Back on a TV Screen* (64).

To change the operating mode, refer to *About the Operating Modes* (11).

1. **Connected device:** Load a blank cassette and set the device to record pause mode.
2. **This camcorder:** Locate the scene you wish to copy and pause playback shortly before the scene.
3. **This camcorder:** Resume the movie playback.
4. **Connected device:** Begin recording when the scene you wish to copy appears. Stop recording when copying is complete.
5. **This camcorder:** Stop playback.

- We recommend powering the camcorder using the compact power adapter.
- By default, the on-screen displays will be embedded in the output video signal, but you can select to turn off the screen displays or select the data that will be displayed instead (32).
## Troubleshooting

If you have a problem with your camcorder, refer to this checklist. Consult your dealer or a Canon Service Center if the problem persists.

### Power Source

<table>

| Image will not appear on the screen. | Set the camcorder to **CAMERA**.  
Open the lens cover. |
| “SET THE TIME ZONE, DATE AND TIME” appears on the screen. | Set the time zone, date and time.  
Recharge the built-in lithium battery and set the time zone, date and time. |
| Pressing the start/stop button will not start recording. | Set the camcorder to **CAMERA**.  
Load a disc.  
The disc is full ( \( \bullet \) END \) flashes on the screen). Delete some recordings (DVD-RW in VR mode) to free some space or replace the disc. |
| Even after stopping recording, the disc access indicator does not go off. | The scene or still image is being recorded on the disc.  
There is a slight interval between pressing the start/stop button and the actual start of the recording on the disc. This is not a malfunction. |
| The point where the start/stop button was pressed does not match the beginning/end of the recording. | The camcorder has exceeded its operational temperature. Disconnect the compact power adapter and remove the battery pack and let the camcorder cool down before resuming use.  
The disc is dirty. Clean the disc with a soft lens-cleaning cloth. |
| The recording suddenly stops shortly after starting recording. | The camcorder has exceeded its operational temperature. Disconnect the compact power adapter and remove the battery pack and let the camcorder cool down before resuming use.  
The disc is dirty. Clean the disc with a soft lens-cleaning cloth. |
| Camcorder will not focus. | Autofocus does not work on that subject. Focus manually.  
Adjust the viewfinder with the diopter adjustment lever. |
| Sound is distorted. | Bright light in a dark scene may cause a vertical light bar (smear) to appear. This is not a malfunction.  
When recording near loud sounds (such as fireworks or concerts), sound may become distorted. This is not a malfunction. |
| A vertical light bar appears on the screen | \[ E \] |
| Viewfinder picture is blurred. | Adjust the viewfinder with the diopter adjustment lever. |
### Playback/Editing

</tbody>
</table>
**Handling Precautions**

### Camcorder

- Do not subject the camcorder to vibrations or strong impacts while the DISC access indicator is on or flashing. The data may not be correctly recorded on the disc, and the recording may be permanently lost.
- Do not touch the pick up lens.
- Do not carry the camcorder by the LCD panel or the disc cover. Be careful when closing the LCD panel.
- Do not leave the camcorder in places subject to high temperatures (like the inside of a car under direct sunlight), or high humidity.
- Do not use the camcorder near strong electric or magnetic fields such as above TVs, near plasma TVs or mobile phones.
- Do not point the lens or viewfinder at strong light sources. Do not leave the camcorder pointed at a bright subject.
- Do not use or store the camcorder in dusty or sandy places. The camcorder is not waterproof – avoid also water, mud or salt. If any of the above should get into the camcorder it may damage the camcorder and/or the lens. Be sure to close the disc compartment cover after use.
- Be careful of heat generated by lighting equipment.
- Do not disassemble the camcorder. If the camcorder does not function properly, consult qualified service personnel.
- Handle the camcorder with care. Do not subject the camcorder to shocks or vibration as this may cause damage.

### Battery Pack

<table>
<thead>
<tr>
<th>DANGER!</th>
<th>Treat the battery pack with care.</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Keep it away from fire (or it might explode).</td>
<td></td>
</tr>
<tr>
<td>• Do not expose the battery pack to temperature higher than 60 °C (140 °F). Do not leave it near a heater or inside a car in hot weather.</td>
<td></td>
</tr>
<tr>
<td>• Do not try to disassemble or modify it.</td>
<td></td>
</tr>
<tr>
<td>• Do not drop or knock it.</td>
<td></td>
</tr>
<tr>
<td>• Do not get it wet.</td>
<td></td>
</tr>
</tbody>
</table>

- Charged battery packs continue to discharge naturally. Therefore, charge them on the day of use, or the day before, to ensure a full charge.
- Attach the terminal cover whenever a battery pack is not in use. Contact with metallic objects may cause a short circuit and damage the battery pack.
- Dirty terminals may cause a poor contact between the battery pack and the camcorder. Wipe the terminals with a soft cloth.
- Since storing a charged battery pack for a long time (about 1 year) can shorten its lifecycle or affect performance, we recommend to discharge the battery pack fully and to store it in a dry place at temperatures no higher than 30 °C (86 °F). If you do not use the battery pack for long periods, charge and discharge it fully at least once a year. If you have more than one battery pack, perform these precautions at the same time for all battery packs.
Although the battery pack’s operating temperature range is from 0 °C to 40 °C (32 °F to 104 °F), the optimal range is from 10 °C to 30 °C (50 °F to 86 °F). At cold temperatures, performance will temporarily decline. Warm it in your pocket before use.

Replace the battery pack if the usable time after full charge diminishes substantially at normal temperatures.

About the battery terminal cover

The battery terminal cover has a [ ]-shaped hole. This is useful when you wish to differentiate between charged and uncharged battery packs.

Mini DVD Disc

The recording surface of DVD discs is extremely delicate. Be sure to observe the following precautions when handling your discs.

- Keep the disc clean of dust, dirt or smudges. Even very small smudges or particles of dust can lead to problems when recording or playing back the disc. Carefully inspect the recording surface of the disc before inserting it in the camcorder. If the disc gets dirty use a dry, soft lens-cleaning cloth to remove any fingerprints, dirt buildup or smudges from the disc surface. Clean the disc in a radial motion from its center outwards.
- Never use a chemically treated cloth or flammable solvents such as paint thinner to clean the disc.
- Do not bend, scratch or wet the disc and do not subject it to strong shocks.
- Do not attach labels or stickers on the disc surfaces. The disc may not rotate in a stable manner and this may cause malfunctions.
- Return discs to their case for storage.
- When writing on the label side of the disc, avoid hard tip pens. Use waterproof soft-tipped felt pens instead.
- Moving a disc rapidly between hot and cold temperatures may cause condensation to form on its surfaces. If condensation forms on the disc, put it aside until the water droplets have evaporated completely.
- Never expose the disc to direct sunlight and do not store it in places subject to high temperatures or high humidity.
- Make sure to finalize a disc before inserting it in a DVD player, DVD recorder or a computer’s DVD drive. Failing to do so can result in the loss of the recorded data.

Built-in Rechargeable Lithium Battery

The camcorder has a built-in rechargeable lithium battery to keep the date/time and other settings. The built-in lithium battery is recharged while you use the camcorder, however, it will become totally discharged if you do not use the camcorder for about 3 months.

To recharge the built-in lithium battery: Connect the compact power adapter to the camcorder and leave it connected for 24 hours with the power switch set to .
## Maintenance/Others

### Storage

- If you do not intend to use the camcorder for a long time, store it in a place free of dust, in low humidity, and at temperatures not higher than 30 °C (86 °F).

### Cleaning

#### Camcorder Body

- Use a soft, dry cloth to clean the camcorder body. Never use chemically treated cloth or volatile solvents such as paint thinner.

#### Pick Up Lens

- Remove any dust or dirt particles using a non-aerosol type blower brush. Never touch the pick up lens directly to clean it.

#### Lens and Viewfinder

- If the lens surface is dirty, the autofocus may not work properly.
- Remove any dust or dirt particles using a non-aerosol type blower brush.
- Use a clean, soft lens-cleaning cloth to gently wipe the lens or viewfinder. Never use tissue paper.

#### LCD Screen

- Clean the LCD screen using a clean, soft lens-cleaning cloth.
- Condensation may form on the surface of the screen when the temperature changes suddenly. Wipe it with a soft dry cloth.

### Condensation

Moving the camcorder rapidly between hot and cold temperatures may cause condensation (water droplets) to form on its internal surfaces. Stop using the camcorder if condensation is detected. Continued use may damage the camcorder.
Condensation may form in the following cases:

- When the camcorder is moved from an air-conditioned room to a warm, humid place
- When the camcorder is moved from a cold place to a warm room
- When the camcorder is left in a humid room
- When a cold room is heated rapidly

How to avoid condensation:
- Do not expose the camcorder to sudden or extreme changes in temperature.
- Unload the disc, place the camcorder in an airtight plastic bag and let it adjust to temperature changes slowly before removing it from the bag.

When condensation is detected:
- The camcorder automatically shuts off. If a disc is loaded, remove the disc immediately and leave the disc cover open. Leaving the disc in the camcorder may damage it.
- A disc cannot be loaded when condensation is detected.

Resuming use:
- The precise time required for water droplets to evaporate will vary depending on the location and weather conditions. As a general criterion, wait for 2 hours before resuming use of the camcorder.

Using the Camcorder Abroad

Power Sources
You can use the compact power adapter to operate the camcorder and to charge battery packs in any country with power supply between 100 and 240 V AC, 50/60 Hz. Consult the Canon Service Center for information on plug adapters for overseas use.

Playback on a TV Screen
You can only play back your recordings on TVs compatible with the NTSC system. The NTSC system is used in the following countries/areas:
- American Samoa, Antigua, Aruba, Bahamas, Barbados, Bermuda, Bolivia, Canada, Chile, Colombia, Costa Rica, Cuba, Ecuador, El Salvador, Guam, Guatemala, Greenland, Haiti, Honduras, Jamaica, Japan, Korea, Mexico, Micronesia, Myanmar, Nicaragua, Panama, Peru, Philippines, Puerto Rico, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Suriname, Taiwan, Trinidad and Tobago, USA, Venezuela, Virgin Islands.

Optional Accessories

Call or visit your local retailer/dealer for genuine Canon video accessories. You can also obtain genuine accessories for your Canon camcorder by calling: 1-800-828-4040, Canon U.S.A. Information Center.

Use of genuine Canon accessories is recommended.

This product is designed to achieve excellent performance when used with genuine Canon accessories. Canon shall not be liable for any damage to this product and/or accidents such as fire, etc., caused by the malfunction of non-genuine Canon accessories (e.g., a leakage and/or explosion of a battery pack). Please note that this warranty does not apply to repairs arising out of the malfunction of non-genuine Canon accessories, although you may request such repairs on a chargeable basis.

Battery Packs
When you need extra battery packs, select only the BP-208 battery pack.

CG-300 Battery Charger
Use the battery charger for charging the battery packs. It plugs directly into a power outlet without a cable.
Charging Time: 105 min.
Charging time varies according to the charging condition.

Shoulder Strap
You can attach a shoulder strap for more security and portability.
Pass the ends through the strap mount and adjust the length of the strap.
WS-20 Wrist Strap
Use this for extra additional protection for active shooting.

SC-2000 Soft Carrying Case
A handy camcorder bag with padded compartments and plenty of space for accessories.

This mark identifies genuine Canon video accessories. When you use Canon video equipment, we recommend Canon-brand accessories or products bearing the same mark.

## Specifications

### DC100

#### System

- **Disc Recording System**
  - Video: DVD-VIDEO (VIDEO mode)
  - DVD-VR (VR mode) only with 8 cm DVD-RW
  - Video Compression: MPEG2
  - Audio Compression: Dolby Digital 2ch
  - Still Images: Exif 2.2 compliant with JPEG compression

- **Television System**
  - EIA standard (525 lines, 60 fields) NTSC color signal

- **Image Sensor**
  - 1/6-inch CCD, approx. 680,000 pixels
  - Effective pixels:
    - Movies 16:9 (Image stabilizer [ON]): approx. 400,000
    - 16:9 (Image stabilizer [OFF]): approx. 450,000
    - 4:3 recordings: approx. 340,000
  - Still images: approx. 450,000

- **Compatible Media**
  - 8 cm (3 in.) mini DVD discs marked with the DVD-R or DVD-RW logo

- **Maximum Recording Time**
  - (1.4 GB single-sided 8 cm Mini DVD)
    - XP: approx. 20 min., SP: approx. 30 min., LP: approx. 60 min.

- **LCD Screen**
  - 2.7 in., wide, TFT color, approx. 112,000 pixels

- **Viewfinder**
  - 0.3 in., TFT color, approx. 123,000 pixels

- **Microphone**
  - Stereo electret condenser microphone

- **Lens**
  - f=2.6-65 mm, F/1.8-4.4, 25x power zoom
  - 35 mm equivalent:
    - Movies 16:9 (Image stabilizer [ON]): 43.8-1,095 mm
    - 16:9 (Image stabilizer [OFF]): 41.0-1,025 mm
    - 4:3 recordings: 49.8-1,245 mm
  - Still images: 43.6-1,090 mm

- **Lens Configuration**
  - 10 elements in 8 groups

- **AF system**
  - TTL autofocus, manual focusing possible

- **Minimum Focusing Distance**
  - 1 m (3.3 ft.); 1 cm (0.39 in.) on maximum wide angle

- **White Balance**
  - Auto white balance, preset white balance (DAYLIGHT, SHADE, CLOUDY, TUNGSTEN, FLUORESCENT, FLUORESCENT H) or custom white balance

- **Minimum Illumination**
  - 2.0 lx ([INIGHT] recording program (SCN), Shutter speed at 1/6)
  - 7.5 lx (Auto mode, Auto slow shutter [ON], Shutter speed at 1/60)

- **Recommended Illumination**
  - More than 100 lx

- **Image Stabilization**
  - Electronic

#### Output Terminals

- **AF OUT Terminal**
  - 3.5 mm minijack; Output only
  - Video: 1 Vp-p/75 ohms unbalanced
  - Audio: –10 dBV (47 kohm load)/3 kohm or less

#### Power/Others

- **Power supply (rated)**
  - 7.4 V DC (battery pack), 8.4 V DC (compact power adapter)

- **Power consumption**
  - 3.9 W (viewfinder), 4.6 W (LCD screen [NORMAL])

- **Operating temperature**
  - 0 – 40 °C (32 – 104 °F)

- **Dimensions (W x H x D)**
  - 8.9 x 86 x 123 mm (2.0 x 3.4 x 4.8 in.) excluding protrusions

- **Weight (camcorder body only)**
  - 410 g (14.5 oz.)

CANON CONSUMER DIGITAL VIDEO EQUIPMENT LIMITED WARRANTY FOR THE UNITED STATES

The warranty set forth below is given by Canon U.S.A., Inc. with respect to equipment purchased in the United States. The limited warranty is only effective upon presentation of your Bill of Sale or other proof of purchase.

Canon consumer DVD equipment is warranted under normal, non-commercial, personal use, against defective materials or workmanship as follows:

Parts: Defective parts will be exchanged for new parts or comparable rebuilt parts for a period of ONE YEAR from the date of original purchase, except for a defective Video Head, which will be exchanged for a period of three months from the date of purchase.

Labor: For a period of ONE YEAR from the date of original purchase, labor will be provided free of charge by our factory service centers or designated service facilities located in the United States. When returning equipment under this warranty, you must pre-pay the shipping charges, and you must enclose the Bill of Sale or other proof of purchase with a complete explanation of the problem. During your ONE-YEAR warranty period, repairs will be made and the equipment return-shipped to you free of charge. After your warranty period is over, you will be given an estimate of the cost of repair and an opportunity to approve or disapprove of the repair expense before it is incurred. If you approve, repairs will be made and the equipment return-shipped to you. (shipping charges apply). If you disapprove, we will return-ship the equipment at no charge to you.

Non-Canon brand peripheral equipment and software which may be distributed with Canon DVD camcorders are sold “AS IS” without warranty of any kind by CUSA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

CUSA shall have no responsibility under this limited warranty for use of Canon DVD Camcorders in conjunction with incompatible peripheral equipment and incompatible software.

In order to obtain warranty service, contact the authorized Canon retail dealer from whom you purchased the DV Camcorder or call the CANON INFORMATION CENTER AT 1-800-828-4040. You will be directed to the nearest service facility for your product.

Non-Canon brand peripheral equipment and software which may be distributed with Canon DVD camcorders are sold “AS IS” without warranty of any kind by CUSA, including any implied warranty regarding merchantability or fitness for a particular purpose. The sole warranty with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

This Limited Warranty covers all defects encountered in normal use of the equipment and does not apply in the following cases:

A) Loss or damage to the equipment due to abuse, mishandling, accident, improper maintenance, or failure to follow operating instructions;
B) If the equipment is defective as a result of leaking batteries, sand, dirt or water damage;
C) If defects or damages are caused by the use of unauthorized parts or by service other than from our authorized agent;
D) If the equipment is used for commercial or industrial use.

This Limited Warranty does not cover cabinet (exterior finish), DVD discs, nor does it apply to equipment purchased outside the United States. This warranty does not cover units sold to rental firms, military operations, hotels, schools, hospitals or for other commercial, industrial, or institutional applications. These uses are covered only by such specific warranty as Canon may issue with such sales.

This Limited Warranty does not apply to accessories or consumables for the DVD Camcorder, which are sold “AS IS,” without warranty of any kind by CUSA.

Please retain this warranty card and your Bill of Sale as a permanent record of your purchase. This card is most important in order to be sure you are contacted right away should there be a safety inspection, modification or product recall under applicable laws or regulations.

NO IMPLIED WARRANTY INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE APPLIES TO THIS EQUIPMENT AFTER THE APPLICABLE PERIOD OF EXPRESS WARRANTY OR GUARANTEE EXCEPT AS MENTIONED ABOVE. GIVEN BY ANY PERSON, FIRM OR CORPORATION WITH RESPECT TO THIS EQUIPMENT SHALL BIND THE UNDERSIGNED. (SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU).

CUSA SHALL NOT BE LIABLE TO RECOVER LOSS OF REVENUES OR PROFITS, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE OR INABILITY TO USE THE DV CAMCORDER, REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED. EVEN IF CUSA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CUSA BE GREATER THAN THE PURCHASE PRICE OF THE DV CAMCORDER SOLD BY CUSA AND CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF USE, MISUSE OR INABILITY TO USE THE DV CAMCORDER NOT CAUSED DIRECTLY BY THE NEGLIGENCE OF CUSA. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU). THIS WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THIS EQUIPMENT OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. CANON U.S.A., INC.
Additional Information

CANON CONSUMER DIGITAL VIDEO EQUIPMENT LIMITED WARRANTY

The limited warranty set forth below is given by Canon Canada Inc. ("Canon Canada") with respect to Canon DVD equipment purchased in Canada. This limited warranty is only effective upon presentation of a bill of sale or other proof of purchase for this Canon digital video equipment to a Canon Service Facility when repairs are required.

Canon consumer video digital equipment is warranted under normal, non-commercial, personal use, against defective materials or workmanship as follows:

Parts: Defective parts will be exchanged for new parts or, at Canon Canada's option, comparable rebuilt parts for a period of one year from the date of original purchase, except Video Heads which will be exchanged for a period of 3 months from the date of purchase.

Labour: For a period of one year from the date of original purchase, labour will be provided free of charge by our Canon Service Facilities in Canada.

This limited warranty covers all defects except where:

(a) The loss or damage to the product results from:
   i) accident, natural disaster, mishandling, abuse, neglect, unauthorized product modification or failure to follow instructions contained in the instruction manual;
   ii) the use of accessories, attachments, products, supplies, parts or devices with this Canon product that do not conform to Canon specifications or that cause abnormally frequent service problems;
   iii) repairs or services performed by any party other than a Canon Service Facility;
   iv) defective batteries or any exposure to water, sand or dirt;
   v) shipping (claim must be presented to the shipper).

(b) Any serial number on the video equipment is altered or removed.

(c) The digital video equipment is used for commercial, professional or industrial purposes.

This limited warranty does not cover the cabinet (exterior finish) of the DVD equipment, DVD discs, nor does it apply to DVD equipment purchased outside Canada.

TO OBTAIN WARRANTY SERVICE

Ship your Canon digital video equipment in its original carton, box or equivalent, properly packed, fully insured with shipping charges prepaid, together with a copy of your bill of sale or other proof of purchase and a description of the problem to any of the Canon Service Facilities in Canada.

LIMITATIONS

Except as otherwise required by applicable legislation, this warranty is in lieu of all other warranties, conditions, guarantees or representations, express or implied, statutory or otherwise, relative to this Canon product, including implied warranties or conditions of merchantability or fitness for a particular purpose. Canon Canada assumes no liability for special, consequential or incidental damages or loss that may arise, whether on account of negligence or otherwise, from the use, misuse or inability to use this Canon product (including loss of profit, revenue, discs or enjoyment) or from failure to conform to any express or implied warranties, conditions, guarantees or representations. Any recovery under this limited warranty shall not exceed the purchase price of the product. Canon Canada does not assume or authorize any other person to assume for Canon Canada any other liability with respect to this Canon product. This warranty does not extend to any person other than the original purchaser of this Canon product or the person for whom it was purchased as a gift and states your exclusive remedy.

NOTICE TO CONSUMER

If you plan to take important videos or if the product has not been used for some time, please check all functions with the instruction book before using it.
