Document Requirements

The documents you load on the platen glass for copying, faxing, or scanning must meet these requirements:

| Document Type | All types of paper documents  
|               | Photographs  
|               | Books  
| Size (W × L) | Max. 8 1/2 in. × 11 3/4 in.  
|              | (216 mm × 297 mm)  
| Quantity | 1 sheet  
|          | PC 10 documents for Multi-Scan  
| Thickness | Max. 3/4 in. (20 mm)  

**NOTE**

PC Multi-Scan is a function for scanning multiple documents (small-size documents) at a time. For more information, see *Software Guide*, located on your Setup CD-ROM.
Loading Documents

To copy, fax, or scan a document, set it on the platen glass.

NOTE
Make sure any glue, ink, or correction fluid on the document is completely dry before loading.

1 Lift the document cover.

2 Load your document on the platen glass.
   • Place your document face down on the platen glass.
   • Align the upper left corner of your document with the alignment mark on the lower right corner of the platen glass.

   NOTE
The machine cannot scan the area within approximately 1/8 in. (3 mm) of the front and right edges of the platen glass.

3 Gently close the document cover.

NOTE
Thick documents (Max. 3/4 in./20 mm), such as books, can also be scanned.
General Paper Guidelines

Paper Types You Cannot Use

Do not use:

– Folded, creased, curled, or wrinkled paper
– Envelopes with double flaps, or with pressure seals
– Moist paper
– Paper with holes (e.g. punched holes)
– Very thin paper (less than 17 lb. or 64 g/m²)
– Very thick paper (more than 28 lb. or 105 g/m²) *Other than Canon genuine paper.
– Postcards with photographs or stickers adhered to them
– Envelopes made with embossed or treated surfaces

Handling Paper

• Hold the paper as closely as possible to its edges and try not to touch the print surface. Print quality will deteriorate if the print surface is damaged or becomes dirty.
• Do not touch the print surface until the ink has dried.
• Some paper may curl and the print surface may smudge if you have used a large amount of ink for printing. If this occurs, move the paper thickness lever to the right (see page 26). Paper that tends to curl is not recommended for printing photographs or graphics. Use it for printing mainly text.
• If the paper is curled, uncurl it before printing.
• Place the paper back into its packet when not using it, and store out of direct sunlight in a place where the temperature and humidity are low.

**Photo Paper Pro Guidelines**

- Do not touch the print surface until the ink is dry (approx. 30 minutes). Colors in dark images may appear indistinct at first, but will become clearer after approx. 30 minutes.
- Images may smudge if you place them in an album before the ink is completely dry. It is recommended that you allow the ink to dry for 24 hours.
- Do not attempt to dry the ink with a hair dryer or by exposing printouts to direct sunlight.
- Do not store or display printouts in hot, damp, or humid conditions. Never expose them to heat or direct sunlight.
- Store printouts in photo albums, photo frames, or presentation binders to protect them from direct exposure to air or sunlight.
- Do not mount printouts in an adhesive-type album as you may not be able to remove them.
- Be aware that some types of clear plastic folders and albums may cause the edges of the paper to turn yellow.

### Making Copies

When making color or black & white copies, you can adjust the print resolution and density. You
also can change reduction or enlargement settings.

**IMPORTANT**
After turning ON the machine, or after recovering from Power Save mode (see page 120), the image
may not be correctly read by the machine. Wait at least one minute before copying.

Follow this procedure:

1 Load the document on the platen glass.
   **NOTE**
   For details on how to load documents, see page 19.

2 Press [COPY].

3 Use [◄] or [►] to select the number of copies, or enter the number using
   the numeric keys (max. 99 copies).

Ex: 100% LTR NORMAL 03

   **NOTE**
   For the maximum load limit for the paper you are using in the multi-purpose tray, see page 21.

4 Adjust the settings for your document as necessary.

   **NOTE**
   • To select the paper size and type, see page 30.
   • To select the image quality, see page 32.
   • To select the scanning exposure, see page 33.

5 Press [Color] for color copying, or [Black] for black & white copying. The machine starts copying.

NOTE
• To cancel copying, press [Stop/Reset].
• The machine can also receive faxes in copy mode (when [COPY] is pressed).

Adjusting Image Quality
You can adjust the image quality according to the document to be copied.

Follow this procedure:
1 Press [COPY].
2 Press [Menu] four times until <4. IMAGE QUALITY> appears.

3 Use [◄] or [►] to select the image quality.
   - <NORMAL>: Suitable for text-only documents.
   - <FINE (PHOTO)>: Suitable for photographs.
   - <FAST>: Suitable for high speed copying at a lower image quality.

NOTE
• <NORMAL> cannot be selected when <GLOSSY>, <HIGH RES.>, <PHOTO PRO>, <PHOTO PLUS>, or <OTHER> is selected as the paper type. (See page 30)
• <FAST> is only available when <PLAIN> is selected as the paper type. (See page 30)

4 Press [Set].

NOTE
When using <FAST>, if the quality is different from that expected, select <NORMAL> or <FINE (PHOTO)> and try copying again.
Adjusting Exposure (Density)

Exposure (density) is the degree of difference between light and dark. Increasing the exposure setting further blackens dark areas and whitens bright areas. Whereas decreasing the exposure setting reduces the difference between bright and dark areas. You can adjust the exposure between nine gradations.

Follow this procedure:
1. Press [COPY].
3. Use [◄] or [►] to select the exposure.
   - Pressing [◄] decreases the density, and pressing [►] increases the density.
4. Press [Set].

Reducing Or Enlarging A Copy

You can reduce or enlarge copies using three different methods:
1. Preset copy ratios  You can select one of the preset ratios to reduce or enlarge copies.
2. Custom copy ratios  You can specify the copy ratio in percentage to reduce or enlarge copies.
3. Automatic ratios   The machine automatically reduces or enlarges the image to fit the paper size.

The following sections describe how to use these methods.

Using Preset Copy Ratios

Preset copy ratios are convenient when changing between standard paper sizes, for example, reducing A4 to letter size, or enlarging 4" × 6" to letter size.

Follow this procedure:
1. Press [COPY].
3. Press [Set].

Ex: Preset Ratio
- 100% +
4 Use [◄] or [►] to select the copy ratio.

- <25% MIN.>: Reduces the document to 25% when copying.
- <95% A4→LTR>: Reduces an A4-size document to letter size when copying.
- <100%>: Does not change the document size when copying.
- <170% 5"×7"→LTR>: Enlarges a 5" × 7" document to letter size when copying.
- <212% 4"×6"→LTR>: Enlarges a 4" × 6" document to letter size when copying.
- <400% MAX.>: Enlarges the document to 400% when copying.

NOTE
Pressing the numeric keys while setting the preset copy ratio switches to the custom copy ratio (zoom copy) setting.

5 Press [Set].

Using Custom Copy Ratios
In addition to making reduction and enlargement decisions using preset copy ratios, you can make reduction and enlargement decisions in custom 1% increments.

Follow this procedure:

1 Press [COPY].

3 Use [◄] or [►] to select <ZOOM>.

4 Press [Set].

Ex: ZOOM 25-400% - 100% +

5 Use [◄] or [►] to select a copy ratio between 25% and 400%, or enter the ratio using the numeric keys.

- Pressing [◄] decreases the copy ratio, and pressing [►] increases the ratio.
- Press and hold down the [◄] or [►] to quickly advance through the ratios.

6 Press [Set].
Copying An Image To Fit The Page

If the document to be copied is larger or smaller than the specified paper size, you can automatically reduce or enlarge the image to fit the size of the paper you are printing on.

**NOTE**
Some document sizes may not be correctly detected. If the document cannot be correctly detected, select the preset copy ratio or custom copy ratio.

Follow this procedure:

1. Press [COPY].
3. Use [◄] or [►] to select <FIT-TO-PAGE>.
4. Press [Set].

**Advanced Copy Features**

The following advanced copy features are available:

- **2 on 1 copying** Reduces two document pages to fit onto one page.
- **Borderless copying** Copies color images so that they fill the entire page without borders.
- **Repeating an image on a page** Copies an image multiple times onto a single page.
- **Creating a mirror image** Makes a mirror copy of a document, for example, when copying onto T-shirt transfers.
- **Shrinking an image to fit the page** Copies an image by reducing the size slightly so it does not crop the fringe area of the document.

The following sections describe how to use these features.
Copying Two Pages To Fit Onto A Single Page

This feature enables you to copy two documents onto a single sheet of paper, by reducing and rotating each image 90 degrees.

NOTE
- If <MEMORY FULL> appears on the LCD when copying, set the image quality to <NORMAL> and try copying again. (See page 32)
- You can use this feature only when the paper size is set to <LTR> or <A4>. (See page 30)

Follow this procedure:

1 Load the first document on the platen glass.
2 Press [COPY].
3 Use [◄] or [►] to select the number of copies, or enter the number using the numeric keys (max. 99 copies).

NOTE
For the maximum load limit for the paper you are using in the multi-purpose tray, see page 21.

4 Adjust the settings for your document as necessary.

NOTE
- To select the paper size and type, see page 30.
- To select the image quality, see page 32.
- To select the scanning exposure, see page 33.
- You cannot select the copy ratio.

5 Press [Menu] repeatedly until <5.SPECIAL COPY> appears.

Ex: 62%  LTR  NORMAL  2 on 1

6 Press [Set].
Borderless Copying
This feature enables you to copy color images so that they fill the entire page without borders.

Ọ NOTE
- You can use this feature only when the paper type is set to <GLOSSY>, <HIGH RES.>, <PHOTO PRO>, <PHOTO PLUS>, or <OTHER>. For details on setting the paper type, see page 30.
- You can only copy in color with this feature.
- The copied image may need to be enlarged to fit onto the selected paper size when making borderless copies. Some cropping may occur.
- When borderless copying is selected, the LCD will display the setting with the symbol “+,” such as <95%+>, <100%+>, etc.
Follow this procedure:

1. Load the document on the platen glass.

2. Press [COPY].

3. Use [◄] or [►] to select the number of copies, or enter the number using the numeric keys (max. 99 copies).

   \[NOTE\]
   For the maximum load limit for the paper you are using in the multi-purpose tray, see page 21.

4. Adjust the settings for your document as necessary.

   \[NOTE\]
   • To select the paper size and type, see page 30.
   • The image quality is fixed to <FINE (PHOTO)>. You cannot change this setting.
   • To select the scanning exposure, see page 33.

There are several ways you can print photos directly from a memory card, without using a computer. In particular, if you use a Photo Index Sheet, you can easily specify photographs and set printing options.

**Step 1**
Make sure the machine is turned ON.

**Step 2**
Load paper into the multi-purpose tray. (See page 27)

**Step 3**
Insert a memory card. (See page 45)

**Step 4**
Select the printing method. Three main methods are:
- Printing by using the Photo Index Sheet (See page 50)
- Printing all images (See page 54)
- Printing an index* (See page 57)

* For the operation flow, see page 56.
Compatible Memory Cards

The following cards are compatible with the machine. They are inserted into the card slots as described below:

<table>
<thead>
<tr>
<th>Left Card Slot</th>
<th>Right Card Slot</th>
</tr>
</thead>
<tbody>
<tr>
<td>MEMORY STICK</td>
<td>CompactFlash Type I/II</td>
</tr>
<tr>
<td>MultiMediaCard</td>
<td>xD-Picture Card</td>
</tr>
<tr>
<td>SmartMedia</td>
<td>SD Secure Digital memory card</td>
</tr>
<tr>
<td></td>
<td>Microdrive memory card</td>
</tr>
</tbody>
</table>

⚠️ CAUTION
When using an xD-Picture Card, make sure to insert the xD-Picture Card into a CompactFlash card adapter (must be purchased separately) before inserting it into the card slot of the machine.

🌟 IMPORTANT
- For CompactFlash Type I/II, only 3.3V cards are compatible.
- For SmartMedia, only 3.3V cards are compatible. You cannot use cards that have less than 2 MB of memory.
- Image data on memory cards that are incompatible with the digital camera may be unreadable or the image data may be damaged. For details on which memory cards are compatible with the digital camera, see the manuals supplied with your digital camera.
- Format the memory card with a digital camera. The memory card may not be usable with the machine if formatted with a computer.
- For information on memory cards compatible with your digital camera, see the manual supplied with your digital camera.
- 🎨 To use your computer to read or write data on a memory card, see Software Guide, located on your Setup CD-ROM.
- ✨ If you have copied image data from a memory card to your computer and then edited the images, be sure to print the images from your computer. Copying edited image data back onto a memory card and then printing the images from your machine will degrade the print quality.

🔍NOTE
Direct printing requires that images be saved onto the memory card using a JPEG (DCF/CIFF/Exif 2.2 or earlier/JFIF) format. RAW files are not compatible with direct printing.
# Inserting/Removing A Memory Card

## Inserting A Memory Card

There are two ways of inserting a memory card depending on the type of memory card: one is to insert a memory card directly into the card slot, and the other one is to insert a memory card through a CompactFlash card adapter (must be purchased separately).

⚠ **CAUTION**

When using an xD-Picture Card, make sure to insert the card into a CompactFlash card adapter (must be purchased separately) before inserting it into the card slot of the machine.

Follow this procedure:

1. **Make sure the machine is turned ON.**
2. **Open the card slot cover on the lower right of the machine.**
3. **Insert the memory card or the CompactFlash card adapter containing the memory card into the appropriate card slot.**

⚠ **CAUTION**

- Do not force a memory card into a CompactFlash card adapter while the adapter is in the card slot. For more information, see the manual supplied with your CompactFlash card adapter.
- If you are using an SD Secure Digital memory card, depending on how you insert it, the write protect lock occasionally may lock, and you will not be able to write from a computer. If this occurs, release the SD Secure Digital memory card lock, and while being cautious not to engage the write protect lock, then insert the memory card.

![Card slot diagram]

**IMPORTANT**

When inserting the memory card or the CompactFlash card adapter containing the memory card into the card slot, insert it with its front side (labeled side) facing outside.
Removing A Memory Card

Follow this procedure:

⚠️ CAUTION

- If an error occurs during printing from the memory card (e.g. paper runs out), do not remove the memory card or CompactFlash card adapter containing a memory card as this may damage the data on the memory card.
- While the Access lamp is lit or flashing, do not remove the memory card or the CompactFlash card adapter containing a memory card as this may damage the data on the memory card.

1. Press [ON/OFF] to turn OFF the machine.

   PC If you have been writing to a memory card in Windows 2000, wait at least 10 seconds before turning OFF the machine.

2. Remove the memory card from the card slot.

   To remove the xD-Picture Card (CompactFlash card adapter), Microdrive memory card, or CompactFlash, first press the button A at the bottom of the card slot.
   For the MEMORY STICK, MultiMediaCard, SmartMedia, or SD Secure Digital memory card, remove the card without pressing the button.

A telephone connected to your machine will not ring.

**NOTE**
The telephone does not ring when it receives a fax call. If you want it to ring, connect a telephone to your machine and enable the <3.Incoming Ring> setting (see page 155). You can also select the number of rings before the machine answers. (See page 155)

Customizing FAX/TEL AUTO SW
You can customize this mode to control precisely how your machine handles incoming calls. You can adjust the time the machine takes to check whether a call is a fax or voice call, the length of time the machine rings when it is a voice call, and the action the machine must take if no one answers a voice call.

**NOTE**
For details on the FAX/TEL AUTO SW settings, see page 152.

If You Want To Receive Only Faxes Automatically With Your Machine, Or You Have A Dedicated Telephone Line For Fax Use Only:

- **Select <FAX ONLY MODE>**.
  - When you receive a fax call: The machine will receive the fax automatically.
  - When you receive a voice call: You will not be able to answer the call.

**NOTE**
The telephone does not ring when it receives a fax call. If you want it to ring, connect a telephone to your machine and enable the <3.Incoming Ring> setting (see page 155). You can also select the number of rings before the machine answers. (See page 155)
If You Have Subscribed To A Distinctive Ring Pattern Detection (DRPD) Service With Your Telephone Company:

- Select <DRPD>.
  - When you receive a fax call: The machine will ring according to the ring pattern you have chosen and receive the fax automatically.
  - When you receive a voice call: The machine will ring according to the ring pattern you have chosen. Pick up the handset to answer the call.

Setting The Ring Pattern
Your telephone company will assign a distinctive ring pattern to each number when you order the DRPD service. Set the fax ring pattern that matches the pattern assigned by the telephone company.

NOTE
For details on the DRPD settings, see page 155.

If You Receive Mainly Voice Calls And Sometimes Faxes, Or You Want To Receive Faxes Manually:

- Select <MANUAL MODE>.
  - When you receive a fax call: The telephone will ring. Pick up the handset and if you hear a beep, press [Black] or [Color] on the machine to receive the fax.
  - When you receive a voice call: The telephone will ring. Pick up the handset to answer the call.
  - For remote receiving: If you are far from your machine, dial 25 (the remote receiving ID) on your telephone to receive faxes.

NOTE
- The machine can receive faxes automatically after the telephone rings for a specified length of time. (See page 155)
- You can customize remote receiving by enabling/disabling it, or by changing the remote receiving ID. (See page 155)
- If you have an answering machine connected to your machine that can carry out remote-control operations (controlling your answering machine from a remote telephone), the security code for this function may be the same as the remote receiving ID. If so, make sure you change the machine’s remote receiving ID to make it distinct from the answering machine’s security code. (See page 155)

If You Want To Receive Voice Messages On Your Answering Machine And Receive Faxes Automatically:

- Select <ANS.MACHINE MODE>.
  - When you receive a fax call: First the answering machine connected to your machine will respond to an incoming call, and then the machine will receive faxes automatically.
  - When you receive a voice call: The answering machine connected to your machine will respond to an incoming call.

Adjusting The Answering Machine
Adjust your answering machine as follows:
- Set the answering machine to answer on the first or second ring.
- The entire message should be no longer than 15 seconds.
- In the message, tell your callers how to send a fax.
Setting The Receive Mode

Follow this procedure:

1. Press [Additional Functions].

   Ex: RECEIVE MODE  
   FAX/TEL AUTO SW

3. Use [◄] or [►] to select the receive mode.
   - <FAX/TEL AUTO SW>: Set to automatically switch between fax and voice calls. Faxes will be received automatically, and the machine will ring for voice calls. (If you connected a telephone to your machine, the telephone will not ring.)
   - <FAX ONLY MODE>: Set to automatically receive faxes only. (If you connected a telephone to your machine, the telephone will not ring.)
   - <DRPD>: Set if you have subscribed to a Distinctive Ring Pattern Detection (DRPD) service offered by some companies.
   - <MANUAL MODE>: Set for the machine to ring for fax and voice calls. Fax calls must be answered manually.
   - <ANS. MACHINE MODE>: Set for the answering machine connected to your machine to respond to an incoming call first, and then to receive faxes automatically.

4. Press [Set].

   The receive mode will be displayed on the bottom left of the LCD.

   Ex: 12/04/2003 THU 15:30  
   FaxTel STANDARD  
   Receive mode

Canceling Receiving

Press [Stop/Reset] and follow any instructions on the LCD.
Memory Receiving

If paper has run out, ink has run low, or a paper jam occurs while receiving faxes, the fax will be stored in memory, and the LCD will display a message such as <RECEIVED IN MEMORY>. The fax stored in memory will be printed when paper is reloaded, the ink tank is replaced, or the paper jam is cleared.

NOTE
- The machine can store up to 200 pages* of faxes in memory.
- Received faxes are stored in memory. You can reprint the faxes and also delete the unnecessary faxes.
  For details, see <MEMORY REFERENCE>. (See page 152)
- If the memory becomes full, the machine cannot receive the remaining faxes. Contact the sender and have him/her resend them.

*When using ITU-T No.1 chart (Standard mode)

Paper Size And Type

Load letter- or A4-size paper in the multi-purpose tray when you print the fax.

IMPORTANT
- If paper other than letter- or A4-size paper is loaded in the multi-purpose tray, only one sheet of the loaded paper is printed and the messages <RECEIVED IN MEMORY> and <CHECK PAPER SIZE PRESS SET KEY> are displayed. Load letter- or A4-size paper in the multi-purpose tray and then press [Set].
- If the paper size is set to a setting other than <LTR> or <A4>, the received faxes will not be printed, and the LCD will display <CHANGE PAPERSIZE: FAX> and <RECEIVED IN MEMORY>. Change the paper size setting to <LTR> or <A4>, and then press [Set]. (See page 30)

NOTE
If the sender sent documents larger than letter-size, such as 11” × 17” or legal-size, the sender’s machine may send the fax, automatically shrinking or dividing it, or send only a part of the original.
**Chapter 12 Maintenance**

**IMPORTANT**
- When unplugging the power cord, be sure to press [ON/OFF] first. When you press [ON/OFF], the print head is protected by the cap to prevent the ink from drying. When unplugging the power cord, be sure to unplug it after turning OFF the machine with [ON/OFF].
- When not using the machine for a long time, print or copy in both black & white and in color, or perform print head cleaning, about once a month to prevent degradation of the print head.
- Numerous nozzles are installed in the print head for high-precision printing. Just as the uncapped tip of a ballpoint pen or marker becomes dry and unusable if not used for a long period of time, the print head nozzles become blocked by dried ink. Periodically printing or cleaning the print head can prevent this blockage.

**Replacing Ink Tanks**

**Low Ink Warning**
When ink is running low, the LCD will display <BLACK INK LOW>, <COLOR INK LOW>, or <COLOR/BLACK INK LOW> warning you to have a new ink tank ready before the ink runs out.

If the machine stops printing when the warning appears, you can continue printing by pressing [Set]. However, note that ink may have run out (when printing from a computer, printing does not stop even if this warning message appears).

You can check the current ink level at any time. (See page 113)

**NOTE**
If the low ink warning does not display even when ink runs low (see page 113), set <LOW INK WARNING> to <ON>. (See page 156)

**When To Replace An Ink Tank**
In general, you will need to replace an ink tank when print quality deteriorates or printouts are blank. However before replacing an ink tank, refer to the flowchart on page 114 to check whether poor print quality is due to another problem.

**Compatible Ink Tanks**
Ink tanks compatible with the machine are as follows:

- Black ink tank: BCI-24 Black
- Color ink tank: BCI-24 Color
CAUTION

- Keep the print head and ink tanks out of the reach of children. If a child inadvertently ingests ink, consult a physician immediately.
- To ensure optimum printing results and to avoid printing problems, Canon recommends using original Canon ink tanks only. Damage caused by using refilled tanks is not covered by Canon's warranty.
- Replaced ink tanks should be new. If you install partially used ink tanks, the nozzles may block and the ink counter may not be accurate.
- For best ink quality, use ink tanks within one year of purchase. After placing ink tanks in the machine, use the ink tanks within six months.
- Do not open the ink tank packaging until ready to install. After opening the ink tank packaging, use the ink tanks within six months.
- Do not touch printouts with wet hands or spill liquids on them as the ink may run.
- Replace ink tanks quickly. Once installed, do not remove it from the machine or leave out in the open. Doing so may cause the ink tank not to function when reinstalled in the machine.

Replacing An Ink Tank

This section describes how to replace an ink tank. For details on when to replace an ink tank, see page 109. After replacing an ink tank, be sure to reset the ink counter as quickly as possible (see page 112). Please note that if you do not reset the ink counter after replacing an ink tank, the low ink warning will not display properly (see page 109) and you will not be able to check the ink level. (See page 113)

CAUTION
- Do not replace ink tanks while the machine is printing or performing another operation.

Follow this procedure:

1 Make sure the power is turned ON.

2 Lift the scan unit until it locks into place.

   When the machine is ON, the paper output tray automatically opens when the scan unit is lifted.
   If the paper output tray does not open, press the Open button to open the paper output tray.

   The print head holder moves to the middle.

3 Open the inner cover.

CAUTION
- Do not try to manually move or stop the print head holder.
- Do not touch any metal parts.
4 Hold the empty ink tank’s tab and pull forward to release. Lift out the ink tank.

⚠️ **CAUTION**
- Do not remove the print head from the machine.
- Remove one ink tank at a time.
- Do not touch the round shaft 📩, transparent film 📩, film cable 📩, ink absorber (sponge part) 📩, or any metal parts.

⚠️ **IMPORTANT**
- Discard the empty ink tank according to local laws and regulations for disposal of consumables.
- Handle ink tanks carefully to avoid staining clothing or the surrounding area.

5 Remove the new ink tank from its packaging. Then hold the ink tank as shown and remove the protective cap 📩.

⚠️ **CAUTION**
- Do not touch the ink port 📩.
- Do not shake or drop the ink tank as the ink may leak and stain your clothes or hands.
- Do not attempt to reattach the protective cap once you remove it.
- Do not place the ink port in contact with any other surface.

6 Insert the ink tank into the empty slot on the print head.

Press firmly on the ink tank’s tab until it locks into place.

⚠️ **IMPORTANT**
- Set a black ink tank in the right slot of the print head.
- Set a color ink tank in the left slot of the print head.

7 If you need to replace another ink tank, repeat steps 4 to 6.

8 Close the inner cover.

⚠️ **CAUTION**
Press the center of the inner cover until the cover locks into place.
9 Return the scan unit to its original position.
   The LCD displays a message asking if you replaced an ink tank.
   
   INK TANK CHANGED?
   - YES  NO +

10 Press [ ].

   The LCD displays a message asking if you replaced the color ink tank.
   
   COLOR INK CHANGED?
   - YES  NO +

12 If you replaced the color ink tank, press [ ]. If you did not, press [ ].
   The ink counter is now reset, and replacement of the ink tanks is completed.

NOTE
• To check the ink level of the ink tanks at any time, see page 113.
• Pressing [ ] does not reset the ink counter. Be sure to press [ ] if you replaced the ink tank.
• If you pressed [ ] by mistake, follow the procedure to reset the ink counter. (See below)

Resetting The Ink Counter
The ink counter keeps track of how much ink is left in the ink tanks, enabling the machine to warn you when ink is running low. Thus, it is important to reset the ink counter when replacing ink tanks. You can also check the current ink level of the ink tanks at any time.
When you replace an ink tank, the LCD will automatically prompt you to reset the ink counter. However, if for any reason you did not reset the ink counter when replacing the ink tanks, follow this procedure to reset it.

NOTE
• You can also reset the ink counter from your computer. (See Software Guide, located on your Setup CD-ROM)
• The ink counter cannot be reset while the Alarm lamp is lit.

Follow this procedure:

1 Press [Additional Functions].

2 Use [ ] or [ ] to select <2. INK VOLUME>.
   
   USER DATA
   2. INK VOLUME
Checking The Ink Level

If you reset the ink counter when you installed/replaced the ink tanks, you can check the current ink level of the ink tanks at any time.

To check the current ink level of the ink tanks, press [COPY], [FAX], [SCAN], or [PHOTO PRINT].

The LCD will display the ink level for approx. three seconds.

![Ex: COPY MODE COL. | BLK ]

- Indicates the remaining ink volume at three different levels.
- Indicates the ink counter was not reset after replacing the ink tanks.

**NOTE**
The LCD will not display the ink level when <LOW INK WARNING> is set to <OFF>. (See page 156)
Maintaining The Print Head

You can print a nozzle check pattern to check whether the print head is operating properly, and then clean or align the print head.

Flowchart Of Print Head Maintenance

Step 1

Print the nozzle check pattern.
This pattern enables you to check whether the ink is ejecting from the print head nozzles correctly and whether the print head is aligned. For instructions on printing and reading the nozzle check pattern, see page 115 and page 116.

If the nozzle check patterns are not printed correctly,

Step 2

Perform normal print head cleaning. <CLEANING> (See page 117)

If there is no improvement,

Step 3

Perform deep print head cleaning. <HEAD REFRESHING> (See page 117)

If there is no improvement,

Step 4

Replace the ink tanks. (See page 110)

If there is no improvement,

The print head may be damaged. Contact the Canon Customer Care Center.

If the print head position patterns are not uniform,

Step 2

Align the print head. (See page 118)

If there is no improvement,

Step 3

Replace the ink tanks. (See page 110)

If there is no improvement,
Printing The Nozzle Check Pattern

The nozzle check pattern shows whether the print head is operating properly.

**NOTE**

You can also print the nozzle check pattern from your computer. (See *Software Guide*, located on your Setup CD-ROM)

- **Print head position**
  For details on confirming the print head position pattern, see page 116.
Confirming The Nozzle Check Pattern

This section describes how to confirm the nozzle check pattern and the print head position pattern.

**NOTE**

If the ink level is low, the nozzle check pattern is not printed correctly. If the ink level is low, replace the relevant ink tank. (See page 110)

- **If the lines are broken, or white lines are present in pattern ①:**
  1. Clean the print head. (See page 117)

- **If the pattern ② is not uniform:**
  1. Align the print head. (See page 118)

- **If white vertical lines are obvious in pattern ③:**
  1. Align the print head. (See page 118)
Cleaning The Print Head
If the printed nozzle check pattern is broken, missing, or a specific color is not printed, clean the print head.

NOTE
• Cleaning the print head consumes a small amount of ink. Cleaning too often reduces the amount of ink in the ink tanks.
• Your machine may perform print head cleaning periodically to avoid clogging.
• You can also clean the print head from your computer. (See Software Guide, located on your Setup CD-ROM)

Follow this procedure:

1  Press [Additional Functions].
2  Use [◄] or [►] to select <3. MAINTENANCE>.

  –<HEAD REFRESHING>: Performs deep print head cleaning.

5  Press [Set].

Ex: CLEANING

IMPORTANT
If normal print head cleaning does not improve print quality, perform deep print head cleaning.

NOTE
When cleaning has finished, the machine will return to standby mode and no document will be printed.
Aligning The Print Head

If you have printed the nozzle check pattern (see page 115) and determined that the print head needs aligning, align it from the operation panel.

**NOTE**

You can also align the paper from your computer. (See *Software Guide*, located on your Setup CD-ROM)

Follow this procedure:

1. Load letter- or A4-size plain paper in the multi-purpose tray.

- The machine starts calibrating.
- When calibration completes, the machine switches to the standby mode.
Setting The Power Save Timer

Power Save mode allows the scanning lamp is shut off, based on the length of time you specify using the Power Save Timer setting. If you perform an operation immediately after recovering from Power Save mode, the image may not be correctly read by the machine. If you use the machine frequently, we recommend that you set the Power Save Timer to <4 HOURS> or <8 HOURS>.

IMPORTANT

* After recovering from Power Save mode, wait at least one minute before scanning, copying, or sending faxes.
* The default setting is <1 HOUR>.

Follow this procedure:

1. Press [Additional Functions].

2. Use [◄] or [►] to select <10.POWER SAVE TIMER>.

3. Press [Set].

   Ex: 

   POWER SAVE TIMER

4. Use [◄] or [►] to select the time to switch the machine to Power Save mode.

   --<1 HOUR>: Switches the machine to Power Save mode if any key on the operation panel is not pressed for one hour.

   --<4 HOURS>: Switches the machine to Power Save mode if any key on the operation panel is not pressed for four hours.

   --<8 HOURS>: Switches the machine to Power Save mode if any key on the operation panel is not pressed for eight hours.

5. Press [Set].
Cleaning Your Machine

This section describes the necessary cleaning procedures for your machine.

⚠️ CAUTION
- Be sure to turn OFF the power and disconnect the power cord before cleaning the machine.
- If you turn OFF the machine, all the documents stored in memory are deleted. Print all the necessary documents stored in memory before turning OFF the machine.
- Do not use tissue paper, paper towels, or similar materials for cleaning; they can stick to the components or generate static charges. Use a soft cloth to avoid scratching the components.
- Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the machine; these can damage the machine's components.

Cleaning The Platen Glass And Document Cover

Wipe the platen glass (A), and the inner side of the document cover (white area) (B) with a clean, soft, lint-free cloth moistened with water. Then wipe with a clean, soft, dry, lint-free cloth making sure not to leave any residue, especially on the platen glass. If you have trouble getting the scanning area clean, wipe with diluted mild detergent (for dish washing).

Cleaning The Exterior

Wipe the machine’s exterior with a clean, soft, lint-free damp cloth.

Cleaning The Roller

Clean the roller when paper does not feed correctly.

Follow this procedure:

1. Remove any paper from the multi-purpose tray.
2. Press [Additional Functions].
3. Use [◄] or [►] to select <3. MAINTENANCE>.
4. Press [Set].
5. Use [◄] or [►] to select <5. ROLLER CLEANING>.
6. Press [Set].

The machine starts cleaning the roller.
7 When cleaning has finished, repeat steps 2 to 6 for a total of three times.

8 Load letter- or A4-size plain paper in the multi-purpose tray and repeat steps 2 to 6 an additional three times.

| There is a power failure or you accidentally disconnected the power cord. | User data and directory dialing settings are stored using the internal battery. However, all documents stored in memory will be deleted. If the power disconnects, the following will apply:  
  • You will not be able to send or receive faxes or make copies.  
  • If a telephone is connected to the machine, you can receive voice calls.  
  • Whether you are able to make voice calls or not depends on your telephone type.  
  When power is restored, the MEMORY CLEAR REPORT will be printed automatically listing the documents deleted from memory. Note however that this report will not be printed if the paper size is set to a setting other than <LTP> or <A4>, black ink has run low, or paper has run out. When power is restored, <BLACK INK LOW> or <LOAD PAPER> will be displayed on the LCD if black ink has run low or the paper is not set in the multi-purpose tray. If the LCD displays these messages, press [Set] to return to the standby mode. In this case, the MEMORY CLEAR REPORT will not be printed even if you replace the black ink tank or reload the paper in the multi-purpose tray. |

| You cannot scan because the machine is connected to a USB hub. | Connect the USB cable directly to the computer without using a USB hub. To connect to the computer via a USB hub, overwrite the INI file by the following procedure. We recommend that you copy to another folder the files you open in 1., and save the files before overwriting them.  
1. In Memo Pad or Text Editor, open the following files.   
   - Windows 98/Me  
     Windows/System/CNCMP51.ini  
   - Windows 2000  
     Winnt/system32/CNCMP51.ini

| The machine is not recognized in the [Scanners and Cameras] window of [Control Panel]. | Follow this procedure to check whether the machine icon is present in [Scanners and Cameras] of [Control Panel]:  
 1. Confirm that the USB cable is connected, and start the computer.  
2. For Windows XP, click [Start] on the taskbar, then [Control Panel]. (Other Windows: Click [Start] on the taskbar, point to [Settings], then click [Control Panel].)  
3. For Windows XP, in the [Control Panel] window, click [Printers and Other Hardware], then [Scanners and Cameras]. (Other Windows: Double-click [Scanners and Cameras].)  
4. In the [Scanners and Cameras] window, if [WIA Canon MP390] (Other Windows: [Canon MP390]) is present, the machine is recognized. If not, uninstall the software and reinstall it. (See page 72) |

### Safety Information

Please read the safety warnings and cautions provided in this guide to ensure that you use your machine safely. Do not attempt to use the machine in any way not described in this guide.

#### WARNING

You may cause an electric shock/fire or damage the machine if you ignore any of these safety precautions.

- **Location**

  Do not place the machine close to flammable solvents such as alcohol or thinners. If flammable substances come into contact with electrical parts inside the machine, it may result in fire or electrical shock.

- **Power supply**

  Never attempt to plug or unplug the machine from the power supply when your hands are wet. This may result in electrical shock.

  Always push the plug all the way into the power outlet. If the prongs of the power plug come into contact with metal objects, it may result in fire or electrical shock.

  Never damage, modify, stretch or excessively bend or twist the power cord. Do not place heavy objects on the power cord. These actions may cause electrical damage and result in fire or electrical shock.

  Never plug the machine into a power socket that is shared with other equipment (extension lead/cord, 2- or 3-way adapter, etc.). This may result in fire or electrical shock.

  Never use the machine if the power cord is bundled or knotted. Knots in the cord may result in fire or electrical shock.

  If you detect smoke, unusual smells or strange noises around the machine, immediately unplug the machine at the power supply and contact the Canon Customer Care Center at 757-413-2848. Using the machine in such conditions may result in fire or electrical shock.

  Periodically, unplug the machine and use a dry cloth to wipe off any dust or dirt collected on the plug and the power outlet.

  If the machine is placed at a location exposed to a lot of dust, smoke, or high humidity, the dust collected on the plug absorbs moisture and may cause insulation failure and fire.

</tr>
</tbody>
</table>
Do not plug the machine into the same circuit as appliances such as an air conditioner, television, or copier. These devices generate electrical noise which may interfere with your machine’s operation.

Whenever you turn OFF the power and unplug the machine, wait at least five seconds before you plug it in again.

Use only the power cord that came with the machine. Using a different power cord may cause electric leakage or damage to the machine.

Turn OFF the power and unplug the machine in the following conditions:
• When the power cord or plug is damaged or frayed.
• If liquid has spilled into the machine.
• If the machine has been exposed to rain or water.
• If the machine does not operate normally when you have followed the instructions in the guides included with your machine.
• If the machine does not operate normally when you have followed the instructions provided in Chapter 13, “Troubleshooting.”
• If the machine has been dropped or damaged.
• If the machine exhibits a distinct change in performance, indicating a need for servicing.

Turn OFF the power and disconnect the power cord if the machine will not be used for a long period such as during holidays.

---

**Handling**

Close the document cover gently to avoid catching your hand. Failing to do so may result in personal injury.

Do not press down hard on the document cover when using the platen glass to scan thick books. This may damage the platen glass and document cover and/or result in personal injury.

Do not place the following objects on top of the machine. If such objects come into contact with internal electrical components, the machine may short-circuit, resulting in fire or electrical shock.
– Metal objects such as jewelry and watches
– Containers of water or other liquids such as glasses, vases, or pot plants

If water does spill inside the machine, turn OFF the power immediately by pressing the [ON/OFF] key, and disconnect the power cord. Then, contact the Canon Customer Care Center at 757-413-2848.

Do not touch the high-voltage electrical parts as this may result in electrical shock.

Do not place heavy objects on top of the machine as these may topple over and result in injury.
When removing paper jammed in the machine, be careful not to get ink on your hands or clothing. If ink gets on your hands or clothing, wash them soon in running water. If you use hot water, the ink may adhere and become difficult to remove.

After printing, do not touch the electrical contacts of the print head. They will be hot and may result in burns or electrical shock.

Do not subject the machine to strong physical shock or vibration. This can damage the machine’s components.

Before moving the machine, turn OFF the power and unplug the machine.

When moving the machine, carry the machine at both ends.

A distinct change in performance may indicate a need for servicing.

Do not insert your hands into the machine while it is printing. Parts inside the machine are moving and this may result in injury.

Do not turn the machine upside down. Ink may leak out and stain clothing or the surrounding area.

Adjust only those controls that are covered by the instructions in the guides since improper adjustment of other controls may result in damage and require extensive repair by a qualified technician to restore the product to normal operation.

- **Print head/Ink tanks**

  For safety reasons, store print heads and ink tanks out of the reach of small children.
  If a child ingests any ink, consult a doctor immediately.

  Do not shake print heads or ink tanks. Ink may leak out and stain clothing or the surrounding area.

  Never touch the print head.

Pre-installation Requirements For Canon Facsimile Equipment

A. Location
Supply a suitable table, cabinet, or desk for the machine. See the Appendix for the machine’s specific dimensions and weight.

B. Order Information
1. Only a single telephone line (touch-tone or rotary) should be used.
2. Order an RJ11-C modular wall jack (USOC code), which should be installed by the telephone company. If the RJ11-C modular wall jack is not present, telephone/fax operation is not possible.
3. Order a normal business line from your telephone company’s business representative. The line should be a regular voice grade line or the equivalent one. Use one line per machine.
   - DDD (Direct Distance Dial) line
   - or-
   - IDDD (International Direct Distance Dial) line if you communicate overseas

NOTE
Canon recommends an individual line following industry standards, such as the 2500 (touch-tone) or 500 (rotary/pulse dial) telephones. A dedicated extension off a PBX (Private Branch Exchange) unit without “Call Waiting” can be used with the machine. Key telephone systems are not recommended because they send nonstandard signals to individual telephones for ringing and special codes, which may cause a fax error.

C. Power Requirements
This machine should be connected to a standard 120 volt AC, two-prong grounded outlet only. Do not connect this machine to an outlet or power line shared with other appliances that cause “electrical noise.” Air conditioners, electric typewriters, copiers, and machines of this sort generate electrical noise which often interferes with communications equipment and the sending or receiving of documents.
Connection Of The Equipment

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the rear panel of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. The REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3).

An FCC compliant telephone line cable cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. See Installation instructions for details.

This equipment if it uses a telephone receiver is hearing aid compatible.

This equipment may not be used on coin service provided by the telephone company. Connection to party lines is subjected to state tariffs.

In Case Of Equipment Malfunction

Should any malfunction occur which cannot be corrected by the procedures described in this guide, disconnect the equipment from the telephone line cable, turn off the power and disconnect the power cord. The telephone line cable should not be reconnected or the main power switch turned ON until the problem is completely resolved. Users should contact their local authorized Canon Facsimile Service Dealer for the servicing of equipment.

Rights Of The Telephone Company

If this equipment causes harm to the telephone network, the telephone company may temporarily disconnect service. The telephone company also retains the right to make changes in facilities and services that may affect the operation of this equipment. When such changes are necessary, the telephone company is required to give adequate prior notice to the user. However, if advance notice is not possible, the telephone company will notify the customer as soon as possible. Also, the customer will be advised of his/her right to file a compliant with the FCC if he/she believes it is necessary.

⚠ WARNING

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device to send any message via a telephone facsimile machine unless such message clearly contains in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual.

In order to program this information into your machine, you should complete the procedure to register your name, unit’s telephone number, time, and date. (See “Registering Sender Information,” on page 84)
FCC Notice

MultiPASS MP390: Facsimile Transceiver, Model H12407

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE

This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

– Reorient or relocate the receiving antenna.
– Increase the separation between the equipment and receiver.
– Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
– Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of the FCC Rules.

⚠️ WARNING

Do not make any changes or modifications to the equipment unless otherwise specified in this guide. If such changes or modifications should be made, you could be required to stop operation of the equipment.

Pre-installation Requirements For Canon Facsimile Equipment

A. Location
Supply a suitable table, cabinet, or desk for the machine. See the Appendix for the machine’s specific dimensions and weight.

B. Order Information
1. Provide only a single line touch-tone or rotary telephone set terminated with a standard 4-pin modular telephone plug. (Touch-tone is recommended if available in your area.)
2. Order a CA11A modular wall jack, which should be installed by the telephone company. If the CA11A modular wall jack is not present, installation cannot occur.
3. Order a normal business line from your telephone company’s business representative. The line should be a regular voice grade line or an equivalent one. Use one line per machine.
   DDD (Direct Distance Dial) line
   -or-
   IDDD (International Direct Distance Dial) line if you communicate overseas

NOTE
Canon recommends an individual line following industry standards, such as the 2500 (touch-tone) or 500 (rotary/pulse dial) telephones. A dedicated extension off a PBX (Private Branch Exchange) unit without “Call Waiting” can be used with your facsimile unit. Key telephone systems are not recommended because they send non-standard signals to individual telephones for ringing and special codes, which may cause a fax error.

C. Power Requirements
The power outlet should be a two-prong grounded receptacle (Single or Duplex). It should be independent from copiers, heaters, air conditioners or any electric equipment that is thermostatically controlled. The rated value is 120 volts and 15 amperes. The CA11A modular jack should be relatively close to the power outlet to facilitate installation.

Notice
This equipment meets the applicable Industry Canada terminal Specifications.

Avis
Le présent matériel est conforme aux spécifications techniques applicables d'Industrie Canada.

Before installing this equipment, users should ensure that it is permitted to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connection. In some cases, the company’s inside wiring associated with a single-line individual service may be extended by means of a certified connector assembly (telephone extension cord). The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations.

The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

Even if the dual-line option is installed, the REN is applicable to each port.

Avis
L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de terminaux qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister
en une combinaison quelconque de dispositifs, à la seule condition que la somme d’indices
d’équivalence de la sonnerie de tous les dispositifs n’excède pas 5.

Repairs to certified equipment should be made by an authorized Canadian maintenance facility
designated by the supplier. Any repairs or alterations made by the user to this equipment, or
equipment malfunctions, may give the telecommunications company cause to request the user to
disconnect the equipment.

Users should ensure for their own protection that the electrical ground connections of the power
utility, telephone lines and internal metallic water pipe system, if present, are connected together.
This precaution may be particularly important in rural areas.

⚠️ CAUTION

- Users should not attempt to make such connections themselves, but should contact the appropriate
electric inspection authority, or electrician, as appropriate.
- This Class B digital apparatus meets all requirements of the Canadian Interference-Causing
  Equipment Regulations.
- Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel
  brouilleur du Canada.

Canon Limited Warranty --- (USA Only)

The limited warranty set forth below is given by Canon U.S.A., Inc. ("Canon USA") with respect to the new or refurbished Canon-brand product ("Product") packaged with this limited warranty, when purchased and used in the United States only.

The Product is warranted against defects in materials and workmanship under normal use and service (a) for a period of one (1) year from the date of original purchase when delivered to you in new condition in its original container or (b) for 90 days from the date of original purchase for refurbished Products. Defective parts or a defective Product returned to a Canon USA repair facility or a Canon USA Authorized Service Facility ("ASF"), and proven to be defective upon inspection, will be repaired, exchanged for new or comparable rebuilt parts, or exchanged for a refurbished Product, as determined by the Canon USA repair facility or the ASF. Warranty repair or replacement shall not extend the original warranty period of the Product. A dated proof of purchase is required at the time of warranty service. A copy of your dated bill of sale will satisfy this requirement. This warranty does not cover any accessories, or any consumables, such as paper or ink tanks, as to which there shall be no warranty or replacement.

This limited warranty shall only apply if the Product is used in conjunction with compatible computers, peripheral equipment and software. Canon shall have no responsibility for such items except for compatible Canon brand peripheral equipment covered by a separate warranty ("Separate Warranty"). Repairs of such Canon brand peripheral equipment shall be governed by the terms of the Separate Warranty. Non-Canon brand equipment and software that may be distributed with the Product are sold "as is" and without warranty of any kind by Canon USA, including any implied warranty regarding merchantability or fitness for a particular purpose, and all such warranties are disclaimed. The sole warranty, if any, with respect to such non-Canon brand items is given by the manufacturer or producer thereof.

This limited warranty covers all defects encountered in normal use of the Product and does not apply in the following cases:

(a) Loss of or damage to the Product due to abuse, neglect, mishandling, improper packaging by you, alteration, accident, electrical current fluctuations, improper use, failure to follow operating or maintenance instructions, or environmental conditions, prescribed in Canon USA's user's manual or other documentation, or services performed by someone other than a Canon USA repair facility or ASF. Without limiting the foregoing, dropping the Product, scratches, and abrasions will be presumed to have resulted from misuse, abuse or failure to operate the Product as set forth in the user's manual or other documentation for the Product.

(b) Use of parts or supplies (other than those sold by Canon USA) that cause damage to the Product or cause abnormally frequent service calls or service problems.

(c) If the Product has had its serial number or dating defaced, altered or removed.

ANY SYSTEM SOFTWARE (WHETHER FACTORY LOADED ON THE PRODUCT OR CONTAINED ON THE SOFTWARE DISKETTES OR CD-ROM'S ENCLOSED WITH, OR ACCOMPANYING, THE PRODUCT), AND ANY UTILITY SOFTWARE, DISTRIBUTED WITH OR FOR THE PRODUCT, IS SOLD "AS IS" AND WITHOUT WARRANTY BY CANON. THE SOLE WARRANTY WITH RESPECT TO SUCH SOFTWARE IS CONTAINED IN THE SOFTWARE MANUFACTURER'S LICENSE AGREEMENT DISTRIBUTED THEREWITH, INCLUDING ANY LIMITATIONS AND DISCLAIMERS THEREON. PLEASE CONTACT CANON IMMEDIATELY IF YOU HAVE NOT RECEIVED A COPY OF THE SOFTWARE MANUFACTURER'S LICENSE AGREEMENT.
NO IMPLIED WARRANTY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, APPLIES TO THE PRODUCT AFTER THE APPLICABLE PERIOD OF THE EXPRESS LIMITED WARRANTY STATED ABOVE, AND NO OTHER EXPRESS WARRANTY OR GUARANTY, EXCEPT AS MENTIONED ABOVE, GIVEN BY ANY PERSON OR ENTITY WITH RESPECT TO THE PRODUCT SHALL BIND CANON USA, OR ITS ASF. (SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.) CANON USA SHALL NOT BE LIABLE FOR LOSS OF REVENUES OR PROFITS, INCONVENIENCE, EXPENSE FOR SUBSTITUTE EQUIPMENT OR SERVICE, STORAGE CHARGES, LOSS OR CORRUPTION OF DATA, OR ANY OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE USE, MISUSE, OR INABILITY TO USE THE PRODUCT REGARDLESS OF THE LEGAL THEORY ON WHICH THE CLAIM IS BASED, AND EVEN IF CANON USA OR ITS ASF HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. NOR SHALL RECOVERY OF ANY KIND AGAINST CANON USA OR ITS ASF BE GREATER IN AMOUNT THAN THE PURCHASE PRICE OF THE PRODUCT CAUSING THE ALLEGED DAMAGE. WITHOUT LIMITING THE FOREGOING, YOU ASSUME ALL RISK AND LIABILITY FOR LOSS, DAMAGE OR INJURY TO YOU AND YOUR PROPERTY AND TO OTHERS AND THEIR PROPERTY ARISING OUT OF THE POSSESSION, USE, MISUSE, OR INABILITY TO USE THE PRODUCT SOLD BY CANON USA NOT CAUSED SOLELY AND DIRECTLY BY THE NEGLIGENCE OF CANON USA, OR ITS ASF. (SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE EXCLUSION OR LIMITATION MAY NOT APPLY TO YOU.) THIS LIMITED WARRANTY SHALL NOT EXTEND TO ANYONE OTHER THAN THE ORIGINAL PURCHASER OF THE PRODUCT OR THE PERSON FOR WHOM IT WAS PURCHASED AS A GIFT, AND STATES YOUR EXCLUSIVE REMEDY.
