### **Notes on Online Manual Usage**

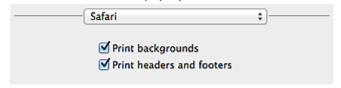

- Reproduction, diversion or copying of any text, photo or image published in the *Online Manual* (hereinafter referred to as "this guide"), in whole or in part, is prohibited.
- In principle, Canon shall change or delete the contents of this guide without prior notice to customers.
   In addition, Canon may suspend or stop the disclosure of this guide due to unavoidable reasons.
   Canon shall not be liable for any damage suffered by customers as a result of changes in or deletion of information in this guide, or suspension/stoppage of disclosure of this guide.
- Although the contents of this guide have been prepared with utmost care, please contact the service center if you find any incorrect or missing information.
- In principle, the descriptions in this guide are based on the product at the time of its initial sale.
- This guide does not disclose the manuals of all the products sold by Canon. See the manual supplied with the product when using a product that is not described in this guide.

### **How to Print**

Use the print function of your Web browser to print this guide.

To print background colors and images, follow the steps below to display the Print dialog options, then select the **Print backgrounds** checkbox.

- 1. Click **Print...** from the **File** menu.
- 2. Click **Show Details** or (Down Arrow).
- 3. Select **Safari** from the pop-up menu.

### **Symbols Used in This Document**

### **Marning**

Instructions that, if ignored, could result in death or serious personal injury caused by incorrect operation of the equipment. These must be observed for safe operation.

### Caution

Instructions that, if ignored, could result in personal injury or material damage caused by incorrect operation of the equipment. These must be observed for safe operation.

### >>>> Important

Instructions including important information. To avoid damage and injury or improper use of the product, be sure to read these indications.

### >>>> Note

Instructions including notes for operation and additional explanations.

#### Basic

Instructions explaining basic operations of your product.

### >>> Note

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

- 2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
- 3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of

their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

- 4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - 1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - 2. You must cause any modified files to carry prominent notices stating that You changed the files; and
  - 3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - 4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

- 5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
- 6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
- 7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
- 8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of

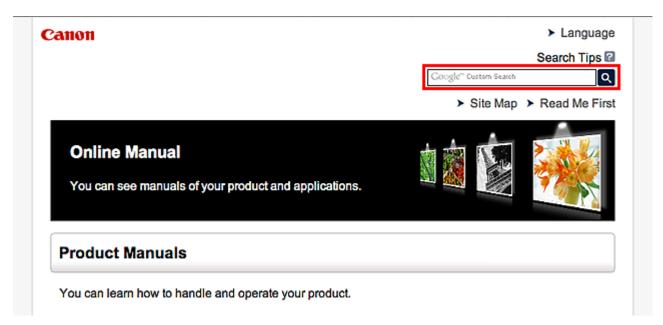

- goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
- 9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

You can search for target pages in this guide.

### **Search Tips**

You can search for target pages by entering keywords in the search window.

#### >>> Note

- · The displayed screen may vary.
- When searching from this page or the "Home" page without entering your product's model name or your application's name, all products supported by this guide will be considered for the search.
   If you want to narrow down the search results, add your product's model name or your application's name to the keywords.

#### Searching for Functions

Enter your product's model name and a keyword for the function you want to learn about

Example: When you want to learn how to load paper

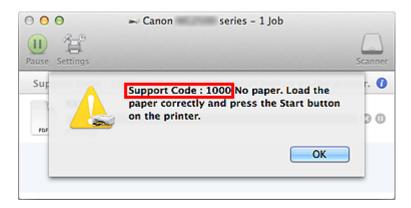

Enter "(your product's model name) load paper" in the search window and perform a search

### Troubleshooting Errors

Enter your product's model name and a support code

Example: When the following error screen appears

Enter "(your product's model name) 1000" in the search window and perform a search

### >>> Note

• The displayed screen varies depending on your product.

### Searching for Application Functions

Enter your application's name and a keyword for the function you want to learn about

Example: When you want to learn how to print collages with My Image Garden Enter "My Image Garden collage" in the search window and perform a search

### Searching for Reference Pages

Enter your model name and a reference page title\*

\* You can find reference pages more easily by entering the function name as well.

Example: When you want to browse the page referred to by the following sentence on a scanning procedure page

Refer to "Color Settings Tab" for your model from Home of the Online Manual for details.

Enter "(your product's model name) scan Color Settings Tab" in the search window and perform a search

### **Notes on Operation Explanations**

In this guide, most of the operations are described based on the windows displayed when OS X Mavericks v10.9 is used.

### **Useful Functions Available on the Machine**

- Connect Wirelessly with Ease in "Access Point Mode"
- Download a Variety of Content Materials
- Print Items with Easy-PhotoPrint+ (Web Application)
- Use the Printer More Conveniently with Quick Toolbox
- Connection Methods Available on the Printer
- Notice for Web Service Printing
- Use MAXIFY Cloud Link
- > Printing with Google Cloud Print
- Printing from AirPrint Compliant Device
- Checking Printer Information
- ► How to Use Print from E-mail
- ➤ Print Easily from a Smartphone or Tablet with MAXIFY Printing Solutions
- ➤ Printing with Windows RT

### **Connect Wirelessly with Ease in "Access Point Mode"**

The printer supports "access point mode" in which you can connect to the printer wirelessly from a computer or smartphone even in an environment without an access point or wireless LAN router. Switch to "access point mode" with simple steps to enjoy printing wirelessly.

When you use the printer with the access point mode, be sure to specify the access point name of the printer and the security setting in advance.

■ Using the Printer with the Access Point Mode

### **Download a Variety of Content Materials**

### **CREATIVE PARK**

A "printing materials site" where you can download all the printing materials for free.

Various types of content such as seasonal cards and paper crafts that can be made by assembling paper parts are provided.

### **CREATIVE PARK PREMIUM**

A service where customers using models that support PREMIUM Contents can download exclusive printing materials.

PREMIUM Contents can be downloaded easily via Easy-PhotoPrint+. Downloaded PREMIUM Contents can be printed directly with Easy-PhotoPrint+.

To download PREMIUM Contents, make sure that genuine Canon ink tanks/ink cartridges are installed for all colors on a supported printer.

### Note

• The designs of PREMIUM Contents provided in this page are subject to change without prior notice.

### **Print Items with Easy-PhotoPrint+ (Web Application)**

You can easily create and print personalized items such as calendars and collages, anytime and anywhere, by simply accessing Easy-PhotoPrint+ on the web from a computer or tablet.

By using Easy-PhotoPrint+, you can create items in the latest environment without going through the trouble of installation.

Moreover, you can use various photos for your item through integration with social networks such as Facebook, or with online storage, web albums, etc.

Refer to "Easy-PhotoPrint+ Guide" for details.

### **Use the Printer More Conveniently with Quick Toolbox**

Quick Toolbox is a shortcut menu that lets you access the functions you want to use with one click. After installing utilities compatible with Quick Toolbox, they will be added to this menu. The Quick Toolbox provides a convenient way to quickly launch added utilities for making printer settings and doing other management tasks.

Refer to "Quick Toolbox Guide" for details.

### **Connection Methods Available on the Printer**

The following connection methods are available on the printer.

#### With an access point

#### Without an access point

### **Wireless Connection**

There are two methods for connecting the printer to your device (such as a smartphone). One method is to connect using an access point, and the other method is to connect without using an access point. The two connection methods cannot be used at the same time.

If you have an access point (or wireless network router), it is recommended that you use the method described in Connection Using an Access Point.

When connecting another device while a device is already connected to the printer, connect it using the same connection method as the connected device.

If you connect using a different connection method, the connection to the device in use will be disabled.

### **Connection Using an Access Point**

- · Connect the printer and a device using an access point.
- Connection methods vary depending on the access point type.
- · You can change network settings such as the SSID and security protocol on the printer.

• When the connection between a device and an access point is completed and (Wi-Fi icon) is displayed in the device's screen, you can connect the device to the printer using the access point.

### **Connection without Using an Access Point**

- Connect the printer and a device without using an access point. Connect a device and the printer directly using the printer's access point mode function.
- When establishing a connection in access point mode, Internet connection may become unavailable. In that case, web services for the printer cannot be used.
- If you connect a device connected to the Internet via an access point to the printer that is in access
  point mode, the connection between the device and access point will be disabled. In that case, the
  connection of the device may switch to a mobile data connection automatically depending on your
  device. Transmission fees for connecting to the Internet using a mobile data connection apply.
- In access point mode, you can connect up to five devices at the same time. If you try to connect a
  sixth device while five devices are already connected, an error will appear.
   If an error appears, disconnect a device that does not use the printer, then configure settings again.
- Network settings such as the SSID and security protocol can be changed on the printer.

When Using Windows XP:

Connection without Using an Access Point (Windows XP)

Restrictions

(Appears in a new window)

#### Wired Connection

Connect the printer and a hub or router with an Ethernet cable. Prepare an Ethernet cable.

### **USB** Connection

Connect the printer and a computer with a USB cable. Prepare a USB cable.

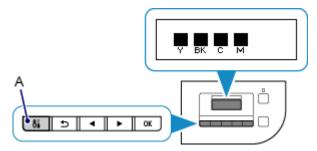

### Connection without Using an Access Point (Windows XP)

#### Restrictions

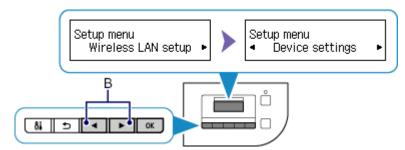

(Appears in a new window)

1. Make sure that the screen below is displayed.

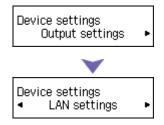

If another screen is displayed, press the **Setup** button (A) on the printer.

- 2. Press the **Setup** button.
- 3. Use the ◀ or ▶ button (B) to select **Device settings**, then press the **OK** button.

4. Select LAN settings, then press the OK button.

5. Select **Change LAN**, then press the **OK** button.

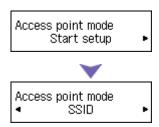

6. Select **AP mode active**, then press the **OK** button.

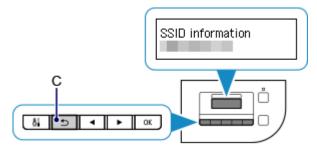

7. Select **SSID**, then press the **OK** button.

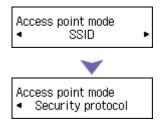

8. Check **SSID** information in the printer screen, then press the **Back** (C).

You will use the **SSID** information in the subsequent steps.

9. Select **Security protocol**, then press the **OK** button.

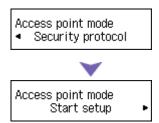

10. Check the **Password** (network key), then press the **Back** button.

You will use the **Password** (network key) in the subsequent steps.

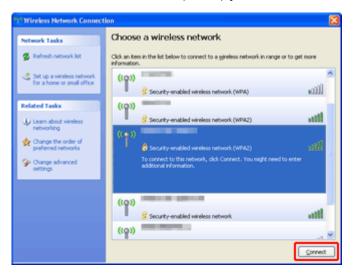

11. Select **Start setup**, then press the **OK** button.

12. Right-click the **Wireless Network Connection** icon in the notification area of the taskbar on the computer, then select **View Available Wireless Networks**.

13. Select the network name (SSID) you want to use, then click **Connect**.

14. Enter the Password (Network key), then click Connect.

15. When connection is complete, click **Back** until the screen below appears. Proceed with the setup.

### Restrictions

When connecting another device while a device (such as a smartphone) is already connected to the printer, connect it using the same connection method as the connected device.

If you connect using a different connection method, the connection to the device in use will be disabled.

Connection Using a Wired Network cannot be performed on printers that do not support a wired connection.

### **Connection Using an Access Point**

- Make sure that a device and an access point (or wireless network router) are connected. For details
  on how to check the settings, refer to the manual supplied with the access point or contact its
  manufacturer.
  - As for a device already connected to the printer without using an access point, reconnect it via an access point.
- The configuration, router functions, setup procedures and security settings of the network device vary depending on your system environment. For details, refer to the manual of your network device or contact its manufacturer.
- Check if your device supports IEEE802.11n (2.4 GHz), IEEE802.11g or IEEE802.11b.
- If your device is set to the "IEEE802.11n only" mode, WEP or TKIP cannot be used as a security protocol. Change the security protocol for your device to something other than WEP and TKIP or change the setting to something other than "IEEE802.11n only."
  - The connection between your device and the access point will be temporarily disabled while changing the setting. Do not operate the screen of this guide until the setup is complete.
- · For office use, consult your network administrator.
- Take added care when connecting to a network that is not protected with security measures, as there is a risk of disclosing data such as your personal information to a third party.

### **Connection without Using an Access Point**

### >>> Important

- If you connect a device connected to the Internet via an access point to the printer that is in access
  point mode, the connection between the device and access point will be disabled. In that case, the
  connection of the device may switch to a mobile data connection automatically depending on your
  device. When you connect to the Internet using a mobile data connection, charges may apply
  depending on your contract.
  - When you connect a device and the printer in access point mode, the connection information will be saved to Wi-Fi settings. The device may be connected to the printer automatically even after disconnecting it or connecting it to another access point.
  - You cannot connect to an access point and the printer that is in access point mode at the same time. If you have an access point, it is recommended that you use the access point to connect to the printer.
  - To prevent automatic connection to the printer that is in access point mode, change the
    connection mode after using the printer, or set not to connect automatically in the Wi-Fi settings
    of the device.
    - For details on how to change the settings of a device, refer to the manual supplied with the device or contact its manufacturer.

- When connecting a device and the printer in access point mode, Internet connection may become unavailable. In that case, web services for the printer cannot be used.
- In access point mode, you can connect up to five devices at the same time. If you try to connect a
  sixth device while five devices are already connected, an error will appear.
   If an error appears, disconnect a device that does not use the printer, then configure settings again.
- Devices connected to the printer in access point mode cannot communicate with each other.
- Firmware updates for the printer are not available while using the access point mode.
- When a device has been connected to the printer without using an access point and you want to set it up again using the same connection method, disconnect it first. Disable the connection between the device and printer in the Wi-Fi setting screen.

### **Connection Using a Wired Network**

- This printer cannot be used over wireless and wired connections at the same time.
- When using a router, connect the printer and a device to the LAN side (same network segment).

### **Notice for Web Service Printing**

### When Using Web Service

- Canon does not guarantee the continuity and reliability of the web services provided, the availability of site access, or permission to download the materials.
- Canon may at any time update, change, or delete the information provided through the web service, or may suspend or discontinue the service without prior notice. Canon shall not be held responsible for any damages resulting from such actions.
- In no event shall Canon be liable for any damages whatsoever resulting from the use of the web services.
- User registration is necessary before using the photo sharing site.
   When you use the photo sharing site, observe the conditions of use of the site and use the service within your own responsibility.
- All or part of the web service may not be available depending on the country or region you live in.
- Depending on your network environment, some functions on web service are not available. Even if
  they are available, it may take a while to print or display the contents, or communication may be
  interrupted while operation is in progress.
- When you use web service, your machine's name, information of your region or country, your selected language, and what kind of service you use (e.g. photo sharing site) are sent to and saved in our server. Canon is unable to identify specific customers using this information.
- Your login name and password for the photo sharing site are saved in the machine's memory (not encrypted).
  - If you hand over the machine to anyone or dispose of it, delete your login name and password from the machine's memory in advance.
- The account information will be sent to Canon Inc. server (located in Japan), then forwarded to the service provider's server.
- · Canon handles your account information as follows:
  - Your account information will be used in personal identification process of the selected service.
  - Canon will not provide your account information to any third party without your consent, except for sending to the service provider or providing based on laws and regulations.
  - After the conclusion of non-disclosure agreement, Canon may deposit your account information to the contractor to achieve the purpose of use.
  - Canon endeavors to secure the safety of your account information.
  - It is at your option to enter and send your account information. However, the service that requires to enter your account information is not available unless you enter and send it.
  - Your account information does not remain in Canon Inc. server. At the latest, it will be deleted when you have disconnected your printer from LAN.
  - For details, contact a Canon-authorized sales representative in the country or region you live in.

### To Those Living in Mainland China

 PIXMA/MAXIFY Cloud Link, Easy-PhotoPrint+, and some functions of PIXMA/MAXIFY Printing Solutions, which are included with this machine, are provided by Canon Inc.
 However, as the server is installed outside of mainland China, some of these services may not be available yet.

### Copyrights and Rights of Publicity

#### When printing from the photo sharing site:

- Observe the conditions of use of the photo sharing site when you use photos on the site.
- It is unlawful to reproduce or edit the copyrighted work of another person without permission from the
  copyright holder, except for personal use, use within the home, or other use within the limited scope
  as defined by the copyright. Additionally, reproducing or editing photographs of people may infringe
  on Rights of Publicity.

### When printing downloaded template forms:

- The copyright of each material (photos, illustrations, logos, or documents: hereinafter referred to as
  "the materials") provided on the web template printing service belongs to their respective owners.
  Issues pertaining to Rights of Publicity may arise regarding the use of any of people or characters
  displayed on the web template printing service.
  - Except as otherwise permitted (please see "2" below), copying, modifying or distributing all or a portion of any of the materials contained on the web template printing service without prior consent of the respective rights (Rights of Publicity and Copyright) holder is strictly prohibited.
- 2. All of the materials provided on the web template printing service can be freely used for personal and non-commercial purposes.

### **Use MAXIFY Cloud Link**

By using MAXIFY Cloud Link, you can connect your printer to a cloud service, such as CANON iMAGE GATEWAY, Evernote, or Twitter, and use the following functions without using a computer:

- · Print images from a photo-sharing service
- · Print documents from a data management service
- Use Twitter to report the printer status, such as no paper or low ink levels.

In addition, you can use various functions by adding and registering apps that are linked with various cloud services.

■ Using MAXIFY Cloud Link from Your Smartphone, Tablet, or Computer

### >>> Important

- In certain countries, MAXIFY Cloud Link may not be available or the available apps may be different.
- Some apps require that you have an account before you use those apps. For such apps, please set up an account beforehand.
- To find out which models support MAXIFY Cloud Link check the Canon homepage.
- · The screen display may change without prior notice.

## Using MAXIFY Cloud Link from Your Smartphone, Tablet, or Computer

- ➤ Before Using Canon Inkjet Cloud Printing Center
- ➤ Preparations Before Using Canon Inkjet Cloud Printing Center
- ➤ Using Canon Inkjet Cloud Printing Center
- ➤ Adding a Printer
- ➤ Adding a MAXIFY Cloud Link User
- ➤ Troubleshooting Canon Inkjet Cloud Printing Center

## **Before Using Canon Inkjet Cloud Printing Center**

Canon Inkjet Cloud Printing Center is a service that links with the cloud function of the printer and allows you to perform operations such as registering and managing apps from your smartphone or tablet device, and checking the print status, print error, and ink status of the printer. You can also print app photos and documents from your smartphone or tablet.

First, check the following content:

#### Precautions

If you plan to use the web service to print documents, be sure to check these <u>precautions</u> beforehand.

## · Printer specification

Check that Canon Inkjet Cloud Printing Center supports the printer.

#### Network environment

The printer must be connected to a LAN and to the Internet.

## >>> Important

· The user will bear the cost of Internet access.

#### · Operating requirements

For computers, smartphones, and tablet devices, see "Requirements for Canon Inkjet Cloud Printing Center operation".

## >>> Important

- This service may not be available in certain countries or regions. Also even if the service is available, there are apps that cannot be used in certain regions.
- Preparations Before Using Canon Inkjet Cloud Printing Center

# Requirements for Canon Inkjet Cloud Printing Center operation

## Computer

CPU	x86 or x64 1.6 GHz or higher		
RAM	2 GB or higher		
Monitor display	Resolution 1024 x 768 pixels or higher Number of display colors 24 bits (true-color) or higher		

os	Browser	
Windows XP SP3 or later	Internet Explorer 8* Mozilla Firefox Google Chrome	
Windows Vista SP1 or later	Internet Explorer 8*, 9 Mozilla Firefox Google Chrome	
Windows 7	Internet Explorer 8*, 9, 10, 11 Mozilla Firefox Google Chrome	
Windows 8	Internet Explorer 10 Mozilla Firefox Google Chrome	
Windows 8.1	Internet Explorer 11 Mozilla Firefox Google Chrome	
Mac OS X v10.6-OS X Mavericks v10.9	Safari 5.1, 6, 7	

<sup>\*</sup> When you use Internet Explorer 8, the web pages may not display correctly. Canon recommends that you upgrade to Internet Explorer 9 or later, or use another browser.

# Smartphone or tablet

os	Browser	Resolution	
iOS 5.1 or later	OS standard browser	320 x 480 (HVGA) or higher	
Android 2.3.3 or later	OS standard browser	480 x 800 (HVGA) or higher	

<sup>\*</sup>Android3.x is not supported.

## >>> Important

- · On the browser you are using, enable JavaScript and cookies.
- If you use the zoom function or change the font size on your browser, the web pages may not display correctly.
- If you use the translation function of Google Chrome, the web pages may not display correctly.
- If you use a proxy server outside of your country, the service may not be able to determine the correct region.

• In an in-house network environment, the 5222 port must be released. For confirmation instructions,

contact the network administrator.

# **Preparations Before Using Canon Inkjet Cloud Printing Center**

To use the Canon Inkjet Cloud Printing Center, you need to follow the steps described below and register the user information.

## Print registration information from the printer

- 1. On the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> IJCloudPrintingCtr -> Register w/ service
- 2. In the registration confirmation window, Select Yes

3. In the print settings, select the display language

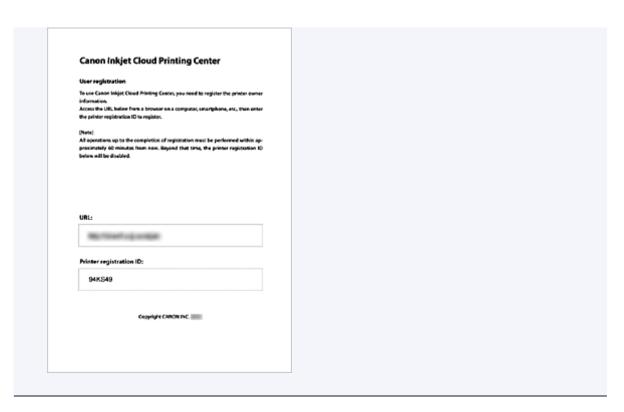

4. Follow the instructions displayed in the window, and print the URL of the authentication site and the **Printer registration ID** 

Set A4 size or Letter size plain paper and select **OK**. The authentication URL and **Printer registration ID** are printed.

· You will use this printed page in the next step.

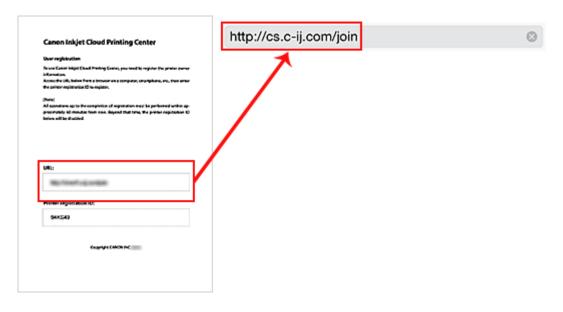

## >>>> Important

• The operation to complete the registration should be done within 60 minutes.

# Access the URL on the printed page, and then enter the e-mail address and other necessary information

## >>>> Important

- Do not use the Back button of the web browser while an operation is processing. The screen may not transition properly.
- 1. Use the web browser on your PC, smartphone, tablet, or other devices to access the authentication URL

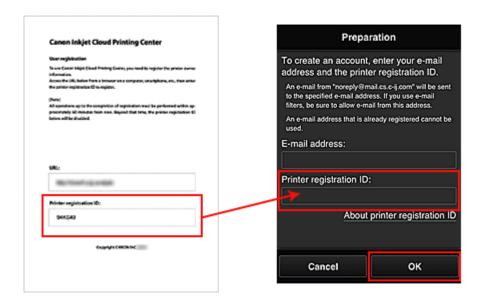

2. On the Login screen, select Create new account

3. Enter the **E-mail address** and **Printer registration ID** of the printer's owner, and then select **OK** 

The registration page URL is sent to the e-mail address entered.

# >>> Important

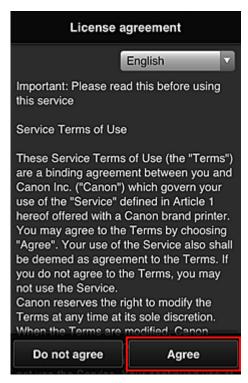

- There are character restrictions for the e-mail address, as shown below.
  - You can use up to 255 alphanumeric characters consisting of single-byte characters and symbols (!\$'\*/^\_{{}|~.-@}).
  - Multibyte characters cannot be used.
     You will get an error if the e-mail address you enter contains a character that cannot be used.
- If you registered a different e-mail address by mistake, you can cancel the registration by selecting the Setup button on the printer operation panel, and then selecting Web service setup -> Connection setup -> IJCloudPrintingCtr -> Delete from service.

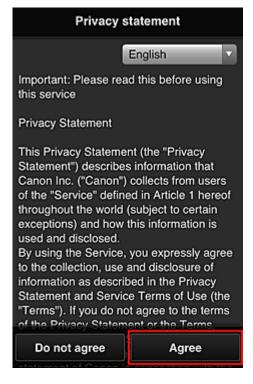

• You may not be able to receive the notification if you are using a spam filter. If you have a setting to receive only the e-mails from certain domains, be sure to change the setting to allow receiving e-mails from "noreply@mail.cs.c-ij.com".

There will be no error display even if you could not receive the e-mail because of the spam filter setting or if you entered an incorrect e-mail address.

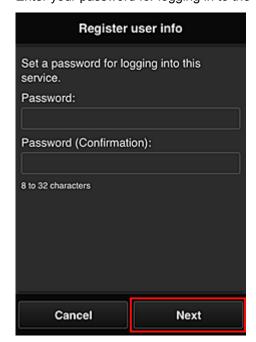

# Access the URL in the e-mail, register the information, and complete the user registration

- 1. When an e-mail with the subject "Information on Canon Inkjet Cloud Printing Center" is sent to the e-mail address that you entered, select the URL
- In the License agreement and Privacy statement windows of Canon Inkjet Cloud Printing Center, read the statements, and select Agree if you agree

3. In the user information entry screen, enter your **Password**, and select **Next**Enter your password for logging in to the Canon Inkjet Cloud Printing Center.

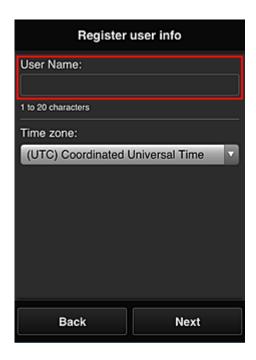

## >>> Important

- There are character restrictions for the **Password**, as shown below.
  - The password needs to be between 8 and 32 characters long, using single-byte alphanumeric characters and symbols (!"#\$%&'()\*+,-./:;<=>?@[\]^\_`{|}~). (Alphabets are case-sensitive)

#### 4. Enter the User name

Enter the name that identifies the user.

## >>> Important

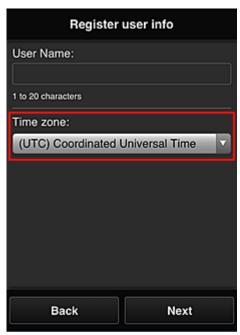

- The **User name** entry field has the following character restrictions:
  - The user name needs to be between 1 and 20 characters long, using single-byte alphanumeric characters and symbols (!"#\$%&'()\*+,-./:;<=>?@[\]^\_`{|}~). (Alphabets are case-sensitive)

## 5. Specify the **Time zone** setting, and select **Next**

Select your region on the list. If you cannot find your region on the list, select the one closest to your region.

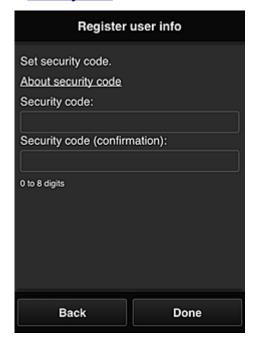

## Apply daylight saving time

This appears only when there is a daylight saving time in the **Time zone** that you selected. Select whether or not to apply the daylight saving time.

## 6. Enter the **Security code** and select **Done**

A **Security code** identifies the user when multiple other users are sharing the same printer.

## >>> Important

- The **Security code** entry field has the following character restrictions:
  - Single-byte numbers

The registration is complete. A registration completion message is displayed.

When you select the **OK** button in the message, the login screen is displayed.

Enter the registered e-mail address and password, and <u>log in</u> to the Canon Inkjet Cloud Printing Center.

■ Using Canon Inkjet Cloud Printing Center

## **Printing Your Printer registration ID**

To add a printer by using Canon Inkjet Cloud Printing Center, you will need a Printer registration ID.

From the operation panel of this printer, print the URL of the authentication site and your **Printer registration ID**. The procedure is as follows:

1. Check that the printer is connected to the Internet

- To use this function, you must connect this printer to the Internet.
- 2. On the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> IJCloudPrintingCtr -> Register w/ service
- 3. In the registration confirmation window, Select Yes

4. In the print settings, select the display language

5. Follow the instructions displayed in the window, and print the URL of the authentication site and your **Printer registration ID** 

When you set A4 size or Letter size plain paper and select **OK**, the authentication site URL and your **Printer registration ID** are printed.

## >>> Important

• The operation to complete the registration should be done within 60 minutes.

## **Canon Inkjet Cloud Printing Center window**

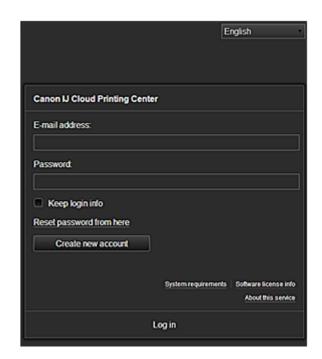

This section describes the Canon Inkjet Cloud Printing Center screens that are displayed on your smartphone, tablet device, or computer.

- Description of the Login screen
- Description of the Main screen

## **Description of the Login screen**

This section provides the description of the Login screen of Canon Inkjet Cloud Printing Center.

## >>>> Important

- You have 5 tries to enter your password. If you fail, you will not be able to log in for about the next
- · You remain logged in for an hour after the last access.

#### Language

Select the language you will be using.

#### E-mail address

Enter the e-mail address that you entered in the user registration.

## >>> Important

The e-mail address is case-sensitive. Make sure the case is correct.

#### **Password**

Enter the password that you entered in the user registration.

## Keep login info

When you select the check box, the login screen is skipped for 14 days since the last day that the service screen was accessed.

#### Reset password from here

Select this if you forgot the password.

Reset your password by following the instructions on the screen.

#### Create new account

A new registration will be added to the Canon Inkjet Cloud Printing Center.

For a new registration, you need the **Printer registration ID**.

#### System requirements

This displays the system requirements for the Canon Inkjet Cloud Printing Center.

#### Help/legal notices (smartphone and tablet devices only)

The description of the Canon Inkjet Cloud Printing Center screen and various reminders are displayed.

#### Software license info

The licensing information of Canon Inkjet Cloud Printing Center is displayed.

#### About this service

This displays the descriptions of this service.

## **Description of the Main screen**

When you log in to the Canon Inkjet Cloud Printing Center, the Main screen appears.

## >>> Important

• With this service, the functions available to <u>Standard user</u> of the printer are different from those available to the printer <u>Administrator</u>.

Standard user can only use the functions marked by an asterisk (\*).

You can use areas shown below to start\*, add, and manage apps.

If you are using a smartphone or a tablet, you can also print photos and documents.

- If you are using a smartphone or tablet
- If you are using a PC

# If you are using a smartphone or tablet

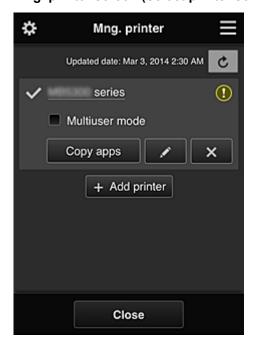

- (1) Left context menu
- (2) Printer name area
- (3) Right context menu
- (4) Display area
- (5) Menu area

## (1) Left context menu

When you select , the Mng. printer screen of the Manage users screen appears. For general users, the Select printer screen appears.

# **.** •

#### **Properties\***

This screen displays the status of the printer that is currently selected.

You can check how much ink is remaining or details about an error that occurred. You can also access the ink purchasing site and the *Online Manual*.

## >>>> Important

• The Properties displayed may differ from the actual status at the display time, depending on the printer status.

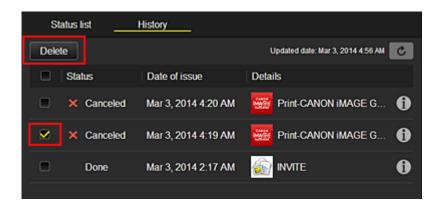

## Manage jobs\*

This screen displays the print status and the print history.

You can check the print status by looking at **Status list**, and the print history by looking at **History**. You can also cancel print jobs and delete history information.

To cancel or delete a job, select that job and then select **Cancel** or **Delete**.

## (5) Notices area

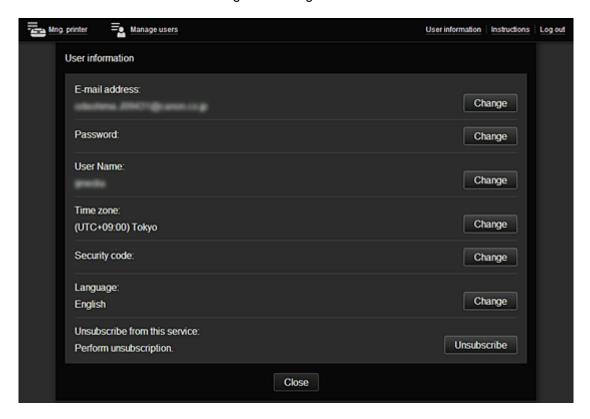

This displays the latest notice. Nothing is displayed in this area if there is no notice. When you select **Notice list**, you can display up to 40 items.

## (6) Information area

This display other information, including the privacy statement and other companies' licensing information.

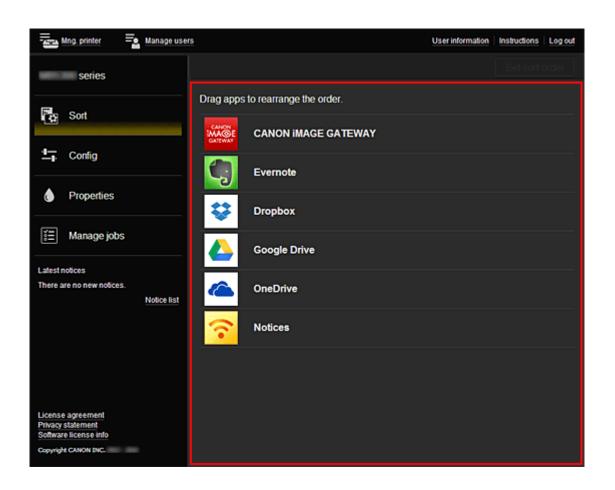

## (7) Global navigation area

The **User information**\*, **Instructions**\*, and **Log out**\* buttons are displayed. Press the **User information** to change the settings.

## (8) Display area

The display changes based on the menu you select.

## **Using Canon Inkjet Cloud Printing Center**

When the user registration is completed, you can log in to the Canon Inkjet Cloud Printing Center and use the service.

- 1. From your PC, smartphone, or tablet, access the service login URL (http://cs.c-ij.com/)
- 2. On the Login screen, enter the E-mail address and Password, and then select Log in

## >>>> Important

The e-mail address and password are case-sensitive. Make sure the case is correct.

#### E-mail address

Enter the e-mail address that you entered in the user registration.

#### **Password**

Enter the password that you entered in the user registration.

## Keep login info

When you select the check box, the login screen is skipped for 14 days since the last day that the service screen was accessed.

## >>> Important

- If you fail to log in five straight times, you will not be able to login again for an hour.
- You remain logged in for an hour after the last access.
- The service may not function properly if you log in from multiple devices at the same time.

After logging in, you can use useful services such as adding/managing apps that work in conjunction with this product's cloud functionality and checking the ink status.

For screen descriptions and operation instructions, see "Canon Inkjet Cloud Printing Center window".

## **Printing procedure**

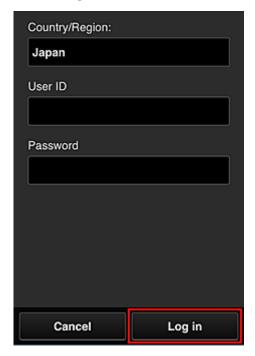

This section introduces the photo printing procedure by using CANON iMAGE GATEWAY as an example.

## >>> Important

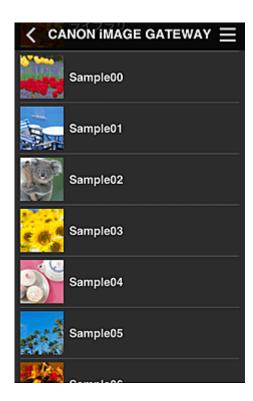

- The available functions differ depending on the app.
- The printing procedure differs depending on the app.
- You need to get the account and register photo and other data beforehand.
- The following file formats can be printed: jpg, jpeg, pdf, docx, doc, xlsx, xls, pptx, ppt, and rtf. The file formats that can be printed differ depending on the app.
- · Before you print, check that printer is on and is connected to the network. Then start.
- This is available if you are using a smartphone or tablet.

#### >>> Note

- You can use CANON iMAGE GATEWAY to print jpg and jpeg file formats.
- 1. On the Main screen, select the app to be used
- 2. Enter the information according to the instructions on the authentication screen, and then select **Log in**

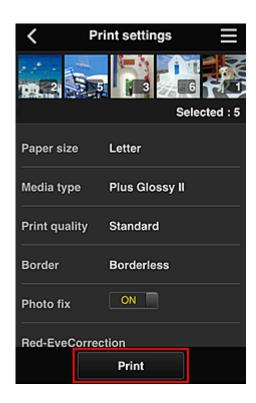

3. In the displayed album list, select the album of your choice

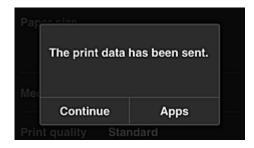

4. In the displayed image list, select the image that you want to print, and then select **Next** 

5. Make the necessary print settings, and then select **Print** 

6. A print job completion message appears, and printing starts

To end the printing, select **Apps** and return to the Apps list screen.

To continue printing, select **Continue** and repeat the procedure from step 3.

## >>> Important

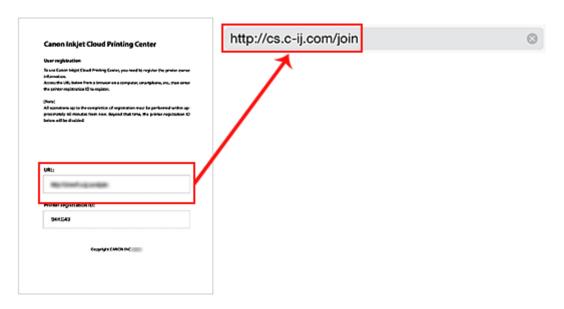

- If a print job is not printed within 24 hours after the print job is issued, the print job will expire and cannot be printed.
- With premium apps that limit the number of print jobs, print jobs that expire and cannot be printed are also included in the print count.
- Adding a Printer

# **Adding a Printer**

With one account, you can use the Canon Inkjet Cloud Printing Center services on multiple printers.

The procedure for adding a printer is as follows:

- 1. Print the registration information from the printer to be added
- 2. From the browser on your smartphone, tablet, or computer, access the authentication site URL

3. Select Add printer

- 4. When the confirmation message is displayed, select **OK**
- 5. Enter your **Printer registration ID**, and select **OK**

## >>>> Note

• When you access the service from **Remote UI**, the **Printer registration ID** is entered automatically.

Printer addition is completed.

Adding a MAXIFY Cloud Link User

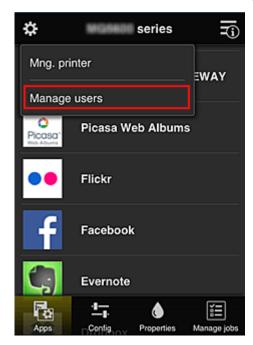

# Adding a MAXIFY Cloud Link User

Several people can use one printer.

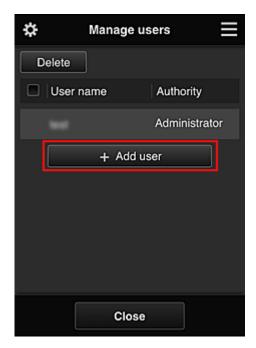

This section describes the user addition procedure and the user privileges.

## Adding a user

1. On the service screen, select Manage users

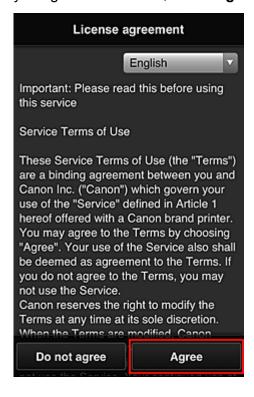

## 2. Select Add user

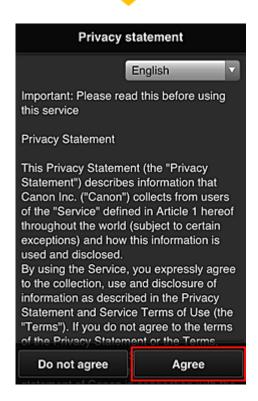

## Note

- When you select **Add user**, the service first checks whether the maximum number of users has been reached. If new users can be added, the user registration screen appears.
- The maximum number of users that can be added for 1 printer is 20.

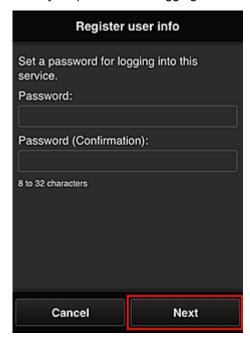

- Enter the e-mail address of the user to be added, and then select **OK** The URL for completing the registration is then sent to the entered e-mail address.
- 4. Access the URL reported in the e-mail
- 5. Read the terms displayed in the **License agreement** and **Privacy statement** screens. If you agree to the terms, select **Agree**.

6. In the user information entry screen, enter your Password, and select Next

Enter your password for logging in to the Canon Inkjet Cloud Printing Center.

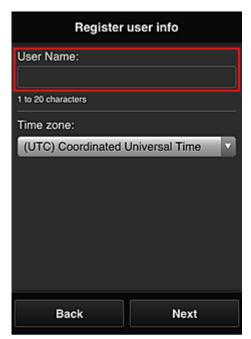

## >>> Important

- There are character restrictions for the password, as shown below.
  - The password needs to be between 8 and 32 characters long, using single-byte alphanumeric characters and symbols (!"#\$%&'()\*+,-./:;<=>?@[\]^\_`{|}~). (Alphabets are case-sensitive)

#### 7. Enter the User Name

Enter the name that identifies the user.

## >>>> Important

• The **User Name** entry field has the following character restrictions:

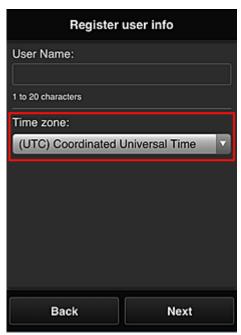

• The user name needs to be between 1 and 20 characters long, using single-byte alphanumeric characters and symbols (!"#\$%&'()\*+,-./:;<=>?@[\]^\_`{|}~). (Alphabets are case-sensitive)

#### 8. Set Time zone and select Next

Select your region on the list. If you cannot find your region on the list, select the one closest to your region.

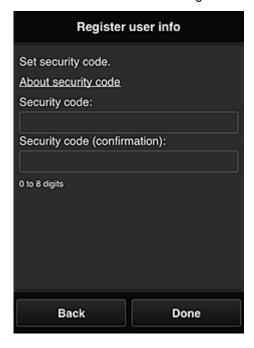

#### Apply daylight saving time

This appears only when there is a daylight saving time in the time zone that you selected. Select whether or not to apply the daylight saving time.

#### 9. Enter the Security code and select Done

Enter the code for authenticating the user.

## >>> Important

- The **Security code** entry field has the following character restrictions:
  - Single-byte numbers

The main registration is complete, and a registration completion e-mail is sent.

#### Note

• A cookie for the selected user is added to the printer, and the login status of each user is recovered. Cookies for up to 8 users can be registered to 1 printer.

## Printer user privileges

If several users are using the cloud service for 1 printer, each user is categorized as the **Administrator** or a **Standard user**.

#### Note

• The user who is registered first becomes the **Administrator**. The administrator can change the privileges of users from the <u>Manage users screen</u>.

An **Administrator** can change printer information, add and delete apps, manage users, and perform various other operations.

A **Standard user** can check printer information and start apps.

For information about the functions that each user can use, refer to the "Canon Inkjet Cloud Printing Center window".

If you are using MAXIFY Cloud Link from the printer, select **Multiuser mode** in the **Mng. printer** screen to set the printer to **Multiuser mode**. Each user can then start an app and print documents.

Troubleshooting Canon Inkjet Cloud Printing Center

## **Troubleshooting Canon Inkjet Cloud Printing Center**

- If an app cannot be installed
- If the registered app is not in the Apps list
- If the information is not updated when you press the **Update** button
- If you do not receive the registration e-mail
- If you cannot print
- Printing starts on its own even if you do not do anything
- If you are unable to log in correctly even after entering the correct password in iOS or Mac

## If an app cannot be installed

Check the country or region where the printer was purchased.

If the printer is taken outside the country or region where it was purchased, apps cannot be installed.

## If the registered app is not in the Apps list

Check the display language of Canon Inkjet Cloud Printing Center.

If the display language is switched to a language that does not support an app, the app will not be displayed in the apps list but will continue to be registered.

If you switch back to the target language of the app, it will be displayed in the apps list and you will be able to start, register, or unregister the app.

## If the information is not updated when you press the Update button

Because the Properties screen requires network connection with this product, the information may not be reflected immediately. Please wait awhile, and then try updating the information again.

If the information is still not updated, then check that the product is connected to the Internet.

## If you do not receive the registration e-mail

You may have entered a different e-mail address during the user registration of Canon Inkjet Cloud Printing Center.

On the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> IJCloudPrintingCtr -> Delete from service to delete the service registration. After resetting the printer, repeat the user registration of Canon Inkjet Cloud Printing Center from the beginning.

## If you cannot print

Check the following if you cannot print.

- Check that the printer is connected to the Internet.
- Check that the printer is connected to a LAN and the LAN environment is connected to the Internet.
- Check that no error message is displayed on the printer's LCD monitor.
- If printing does not start even after you wait awhile, go to the printer operation panel, select **Setup**, and run **Web service inquiry**. If printing does not start, run the inquiry several times.

If the problem is not resolved, use the printer driver from your computer to perform the print job and check whether the data can be printed normally on the printer.

If you still cannot print, see the troubleshooting page for your model on the Home of the Online Manual.

#### Note

- With a wireless LAN connection, after the printer is turned on, it may take several minutes before
  communication is possible. Check that your printer is connected to the wireless network, and wait a
  while before you start printing.
- If the printer is not turned on or is not connected to the Internet, and consequently a print job is not processed within 24 hours after it was submitted, the print job is automatically canceled. If this happens, check the printer power and the Internet connection, and then re-submit the print job.

## Printing starts on its own even if you do not do anything

A third party may be able to illegally use the Canon Inkjet Cloud Printing Center services.

On the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> IJCloudPrintingCtr -> Delete from service to delete the service registration.

After resetting the printer, repeat the user registration of Canon Inkjet Cloud Printing Center from the beginning.

# If you are unable to log in correctly even after entering the correct password in iOS or Mac

If you are using iOS or Mac, and the password contains the ¥ symbol, enter a backslash instead. For instructions on entering a backslash, see the OS help.

# What is a Security code?

A **Security code** identifies the user when multiple other users are sharing the same printer.

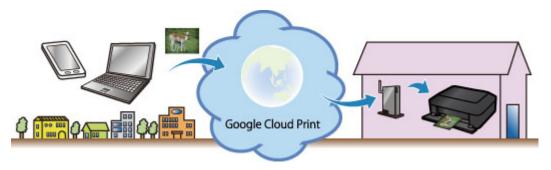

## >>>> Important

- If you do not set a **Security code**, another user may use your account.
- This code is valid only when you use MAXIFY Cloud Link from the printer operation panel. You cannot
  use this code when you access the Canon Inkjet Cloud Printing Center from your smartphone, tablet, or
  computer.

# **Printing with Google Cloud Print**

The printer is compatible with Google Cloud Print™ (Google Cloud Print is a service provided by Google Inc.).

By using Google Cloud Print, you can print from anywhere with applications or services supporting Google Cloud Print.

- 1. Preparations for Printing with Google Cloud Print
- 2. Printing from Computer or Smartphone with Google Cloud Print

#### >>> Important

- LAN connection with the printer and Internet connection are required to register the printer and to print with Google Cloud Print. Internet connection fees apply.
- This function may not be available depending on the country or region you live in.

# **Preparations for Printing with Google Cloud Print**

To print with Google Cloud Print, you need to get Google account and register the printer with Google Cloud Print in advance.

Getting Google Account

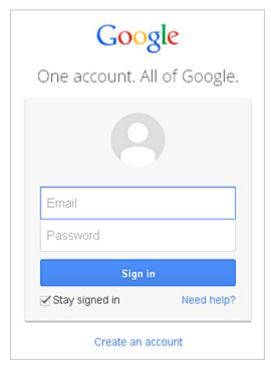

If you already have Google account, register the printer.

Registering the Printer with Google Cloud Print

## **Getting Google Account**

First, get your Google account in order to register the printer with Google Cloud Print.

Access to Google Cloud Print with the web browser on the computer or the mobile device, then register the required information.

<sup>\*</sup> The screen above may change without prior notice.

## **Registering the Printer with Google Cloud Print**

Register the printer with Google Cloud Print.

If the firmware version is Ver. 2.010 or later, registration is possible from Google Chrome on your computer, smartphone, or tablet device.

Registration Using Google Chrome

For earlier versions, register the information from the printer.

Registration from the Printer

## >>> Important

- For instructions on checking the firmware version and updating the firmware, refer to "Firmware Update".
- After you update the firmware, you must re-register the printer even if it was already registered.

- When you register a printer, the printer must be connected to the LAN and the LAN environment
  must be connected to the Internet. Note that the customer is responsible for all Internet connection
  fees.
- · When the printer owner changes, delete the printer registration from Google Cloud Print.

## **Registration Using Google Chrome**

- 1. Start the Google Chrome browser on your computer, smartphone, or tablet device.
  - Then from (Chrome menu), select **Sign in to Chrome...**, and log in to your Google account
- 2. From (Chrome menu), select **Settings**
- 3. Click **Show advanced settings...** to display the information. Then for **Google Cloud Print**, select **Manage**
- 4. Select **Add printers** for the printer to be added
- When the confirmation message for registering the printer appears, select **OK** Printer registration is complete.

#### **Registration from the Printer**

The authentication procedure using the web browser on the computer or the mobile device is required in the process of registering. Because the authentication URL is printed from printer when the authentication process is performed, prepare A4 or Letter-sized plain paper.

- 1. Make sure that the printer is turned on
- 2. From the operation panel, select the **Setup** button.
- 3. Select Web service setup -> Connection setup -> GoogleCloudPrint -> Register w/ service

- If you have already registered the printer with Google Cloud Print, the confirmation message to re-register the printer is displayed.
- 4. When the confirmation screen to register the printer is displayed, select **Yes**
- Select a display language on the print setting screen of Google Cloud Print The confirmation message to print the authentication URL is displayed.
- 6. Load A4 or Letter-sized plain paper, then select OK

The authentication URL is printed.

- 7. Ensure that the authentication URL is printed, select Yes
- 8. Perform the authentication process using the web browser on the computer or the mobile device

Access to the URL using the web browser on the computer or the mobile device and perform the authentication process following the on-screen instructions.

#### Note

- Perform the authentication process with your Google account which you have gotten in advance.
- 9. When the message that the registration is complete is displayed on the LCD of the printer, select OK

When authentication process is complete properly, the registration items are displayed. When authentication process is complete, <u>you can print the data with Google Cloud Print</u>. When authentication process is not complete properly and the error message is displayed, select OK. When the confirmation message to print the authentication URL is displayed, print the authentication URL, then perform the authentication process on the computer again.

## **Deleting the Printer from Google Cloud Print**

To change the printer owner or to re-register the printer, first delete the printer from Google Cloud Print by using the respective procedure.

- Deletion from Google Chrome
- Deletion from the Printer

#### **Deletion from Google Chrome**

- 1. Start the Google Chrome browser on your computer, smartphone, or tablet device.
  - Then from (Chrome menu), select **Sign in to Chrome...**, and log in to your Google account
- 2. From (Chrome menu), select **Settings**
- 3. Click **Show advanced settings...** to display the information. Then for **Google Cloud Print**, select **Manage**
- 4. Select **Delete** for the printer to be deleted
- 5. When the confirmation message for deleting the printer appears, select **OK**

## **Deletion from the Printer**

- 1. Make sure that the printer is turned on
- 2. From the operation panel, select the **Setup** button.
- 3. Select Web service setup -> Connection setup -> GoogleCloudPrint -> Delete from service
- 4. When the confirmation screen to delete the printer is displayed, select Yes

# **Printing from Computer or Smartphone with Google Cloud Print**

When you send print data with Google Cloud Print, the printer receives the print data and prints it automatically if the printer is turned on.

When printing from a smartphone, tablet, computer, or other external device by using Google Cloud Print, load paper into the printer in advance.

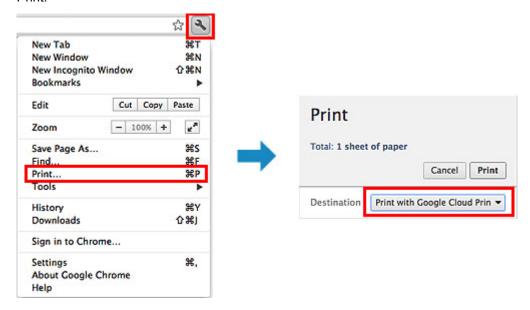

## Sending the Print Data with Google Cloud Print

1. Make sure that the printer is turned on

- If you want to send the print data from an outside location, turn on the printer in advance.
- 2. Send print data from your smartphone, tablet, or computer

The figure below is an example of when printing from the web browser corresponding with Google Cloud Print. The screen differs depending on the applications or services supporting Google Cloud Print.

When the preparation for printing with Google Cloud Print is complete and when the printer is turned on, the printer receives the print data and prints it automatically.

#### Note

- If the firmware version is Ver. 2.010 or later, you can select which printer to use.

  For the printing method, you can also select using the local network or using the cloud.
- Depending on the communication status, it may take a while to print the print data or the printer may not receive the print data.
- While printing with Google Cloud Print, the printing may be canceled depending on the printer's status, such as when the printer is being operated or an error has occurred. To resume printing, check the printer's status, then print with Google Cloud Print again.
- · For print settings:
  - If you select the media type other than plain paper or if you select the paper size other than A4/ Letter/B5/A5-size, the print data is printed in single-sided even when you select the duplex print setting. (\* The paper size differs depending on the model of your printer. For information about

- the supported paper sizes, go to the *Online Manual* home page, and refer to the "Cannot Print Properly with Automatic Duplex Printing" for your model.)
- If you select plain paper as media type or if you select B5/A5-size as paper size, the print data is printed with border even when you select the borderless print setting.
- The print results may differ from the print image depending on the print data.
- Depending on the device sending the print data, you may not select the print settings when sending the print data with Google Cloud Print.

## When you want to print from Google Cloud Print immediately

When the printer cannot receive the print data, or you want to start printing immediately, you can check whether there is a print job on the Google Cloud Print and start printing manually.

Follow the steps below.

## >>>> Important

- Depending on your printer model, this function may not be available.
- 1. Make sure that the printer is turned on
- 2. From the operation panel, select the **Setup** button.
- 3. Select Web service inquiry

#### Note

• If you have not registered the printer with Google Cloud Print, **Web service inquiry** is not displayed.

Register the printer with Google Cloud Print.

- 4. Select GoogleCloudPrint
- 5. Press the **OK** button

Connect to the server. If print data is available, print that data.

# **Printing from AirPrint Compliant Device**

This document explains how to use AirPrint to print wirelessly from your iPad, iPhone and iPod touch to a Canon printer.

AirPrint enables you to print photos, email, Web pages and documents from your Apple device directly to your printer without installing a driver.

## **Checking Your Environment**

First, check your environment.

#### AirPrint Operation Environment

To use AirPrint, you will need one of the following Apple devices running the latest version of iOS:

- ∘ iPad (all models)
- iPhone (3GS or later)
- iPod touch (3rd generation or later)

#### Network Environment

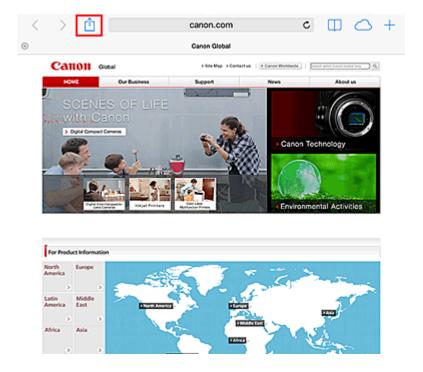

The Apple device (iPad, iPhone, or iPod touch) and this printer must be connected to the same Wi-Fi network or connected in AP mode.

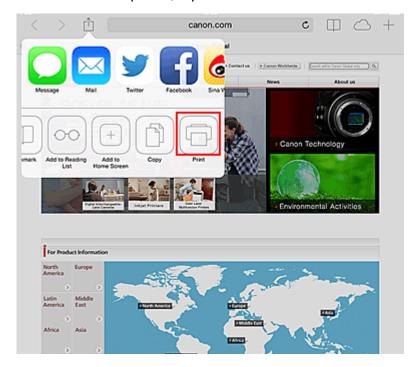

• If your iPad, iPhone or iPod touch is running the latest version of iOS, you do not need to download and install any drivers or additional software.

## **Printing with AirPrint**

- 1. Check that this printer is turned on and the Apple device and this printer is connected to the LAN or connected in AP mode.
- 2. From the app of your Apple device, tap the operation icon to display the menu options.

3. From the menu options, tap **Print**.

4. From **Printer Options**, select the model that you are using.

## >>>> Important

• Because some app does not support AirPrint, **Printer Options** may not be displayed. If an app does not let you use printer options, you cannot print from that app.

#### Note

• The **Printer Options** differ depending on the app and model you are using.

- 5. When printing a file type that has multiple pages, such as a PDF file, click **Range** and then click **All Pages** or select the range of pages to be printed.
- 6. For **1 Copy**, click **+** or **-** to set the number of required copies.
- 7. For **Duplex Printing**, click **On** to enable duplex printing or click **Off** to disable the function.
- 8. Tap the **Print**.

When you execute printing, the printer prints according to the specified settings.

## **Paper Size**

With AirPrint, the paper size is selected automatically according to the app being used on the Apple device and the region in which AirPrint is used.

When Apple's photo app is used, the default paper size is L size in Japan, and 4"x6" or KG in other countries and regions.

When documents are printed from Apple's Safari app, the default paper size is letter size in the U.S. region, and A4 in Japan and Europe.

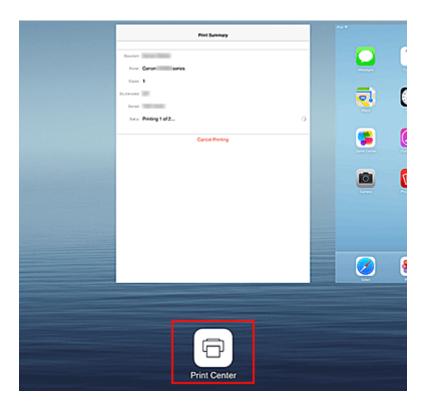

## >>> Important

• Your app may support different paper sizes.

## **Checking the Print Status**

During printing, a **Print Center** icon is displayed in the list of recently used apps, and you can use it to check the print progress.

Press the Home button on the Apple device twice to set the **Multitasking** mode. Then swipe to the right to display the **Print Center** icon and a **Print Summary**.

## **Deleting a Print Job**

To delete a print job with AirPrint, use one of the following two methods:

- From the printer: If your printer has a LCD monitor, use the operation panel to cancel the print job. If you printer does not have a LCD monitor, press the **Stop** button on the printer to cancel the print job.
- From an Apple device: Press the Home button on the Apple device twice to set the Multitasking
  mode, and then swipe to the right. Tap the Print Center icon to display a Print Summary. Tap the
  print job to be canceled, and then tap Cancel Printing.

## AirPrint Troubleshooting

If the document does not print, check the following:

- 1. Check that the printer power is on. If the printer power is on, turn it off and then back on again, and check whether the issue is resolved.
- 2. Check that the printer is connected by LAN to the same network subnet as the device on which iOS is installed.
- 3. Check that the printer has enough paper and ink.
- 4. If your printer has a LCD monitor, check that no error message is displayed on the LCD monitor.

If the problem persists, use the printer driver on your computer to execute printing and check whether the document can be printed normally on the printer.

If the document cannot be printed, refer to the Online Manual for your model.

## >>> Note

- After you turn on the printer, it may take few minutes before the printer can communicate through a
  wireless LAN connection. Confirm that the printer is connected to the wireless LAN, and then try
  printing.
- If Bonjour on the printer is disabled, AirPrint cannot be used. Check the LAN settings on the printer, and enable Bonjour.

#### Note

• The windows used in the explanations may differ from those displayed by your Apple product or app.

# **Checking Printer Information**

You can use your smartphone, tablet, or computer to check the **Printer status** and execute utility functions from apps such as Canon Inkjet Print Utility and MAXIFY Printing Solutions.

You can also use the convenient web services presented by Canon.

1. Selecting Printer Information in an Apps Screen

#### >>> Note

- You can also enter IPv4 address directly in the web browser to display printer information.
  - 1. Load one sheet of A4 size or Letter size plain paper
  - 2. On the printer operation panel, select the settings -> LAN settings -> Print LAN details

IP address printing starts.

3. From your computer, smartphone, or tablet device, open the Web browser, and enter the following URL:

http:// < Printer IP address>

For <Printer IP address>, enter the IP address that you checked in the previous procedure.

2. Entering **Username** and Administrator's Password

From the authentication screen, enter the **Username** and **Password**.

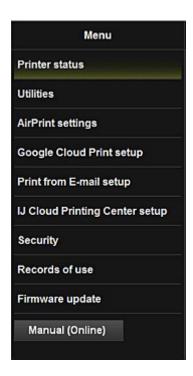

**Username**: ADMIN

Password: See "About the Administrator Password."

Note

- The **Username** display may differ depending on your browser.
- 3. Displaying Printer Information

The top screen for printer information is displayed.

#### **Printer status**

This function displays printer information such as the remaining ink amount, the status, and detailed error information.

You can also connect to the ink purchase site or support page, and use Web Services.

#### **Utilities**

This function allows you to set and execute the printer utility functions such as cleaning.

#### AirPrint settings

This function allows you to specify the Apple AirPrint settings, such as position information.

#### **Google Cloud Print setup**

This function allows you to register this printer to Google Cloud Print or delete the printer.

#### Print from E-mail setup

Allows you to register printers, check print addresses, and delete registered printers.

#### **IJ Cloud Printing Center setup**

Allows you to register to IJ Cloud Printing Center or to delete a registration.

#### Security

Allows you to set the **Administrator**'s password and **Operation restrictions** for the machine.

## >>> Important

- For the initial Password, see "About the Administrator Password."
   For Security reasons, we recommend that you change the Password to an individual password.
- The following character restrictions apply to the password that you enter:
  - Set the password by using 0 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters.

#### Records of use

Displays a record of your printer usage, such as the number of pages printed.

#### Firmware update

This function allows you to update the firmware and check version information.

## Manual (Online)

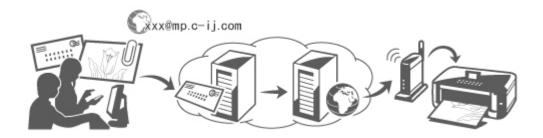

This function displays the *Online Manual*.

#### How to Use Print from E-mail

By using **Print from E-mail**, you can easily print a photo or document saved on your smartphone, tablet, or computer just by attaching it to an e-mail.

You can print simply from outside like a travel destination. Also, your family or friends can print by registering beforehand.

You can use **Print from E-mail** on any Canon printer that supports the service.

## **Checking Your Environment**

First, check your environment.

· Network environment

This product needs to be connected to a LAN with an Internet connection.

## >>> Important

- The user will bear the cost of Internet access.
- This function may not be available in some countries/regions.
- Depending on your printer model, this function may not be available.

## Preparing to use Print from E-mail

To use **Print from E-mail**, you need to register the printer by entering information about the printer's owner.

- 1. Print the printer registration page's URL and the PIN code
- 2. Access the URL and enter the owner's e-mail address and other required information
- 3. Check if an e-mail has been sent to the e-mail address you entered

4. Access the URL provided in the e-mail and complete the printer registration process

#### Note

- The e-mail address that appears on the screen when you have finished registering is the e-mail address that will be used just for the **Print from E-mail** function.
- For details about the registration procedure, see here

## Printing from Your Smartphone, Tablet, or Computer

1. Prepare a file that you want to print

The file format, number of files, and file size that this printing function supports are provided below.

Supported File Formats

- · Adobe PDF files
- · JPEG files
- · .doc/.docx/.xls/.xlsx/.ppt/.pptx files

#### >>>> Important

- Only files that are attached to e-mail can be printed. E-mail messages cannot be printed.
- Adobe PDF files and .doc/.docx/.xls/.xlsx/.ppt/.pptx files that are encrypted, password-protected, or set to print disabled cannot be printed.
- · Files that are attached as compressed files cannot be printed.
- Files other than Adobe PDF files, JPEG files and .doc/.docx/.xls/.xlsx/.ppt/.pptx files cannot be printed.

Supported Number of Files and File Sizes

- Up to 10 attachment files can be printed.
- The maximum size of an e-mail with attachment files is 10 MB.

#### Note

- The size of an e-mail is determined based on the size of the entire transmission file, including the e-mail message and the header. Therefore sometimes an attachment file cannot be printed even if the size of the attachment file is less than 10 MB.
- If the size of an attached JPEG file is less than 10 KB, the file cannot be printed.
- 2. Attach the file that you want to print from your smartphone, tablet, or computer to the e-mail and send it to the e-mail address for printing

To check the print address, on the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> Print from E-mail setup -> Register w/ service.

#### >>> Important

 You will not be able to use the service during periods when the service is undergoing maintenance.

#### Use the Service With More Than One Person

To allow multiple users to use this function, register users (other than the printer's owner) as members.

- 1. The printer's owner uses his/her smartphone, tablet, or computer to access the service's login URL (https://pr.mp.c-ij.com/po) and logs in
- Select the printer name that you want to add the member. Click Member Settings ->
   Add to enter the member's e-mail address, and click Add

A URL of the member registration page is sent to the e-mail address of the newly registered member.

3. Registered member accesses to the URL that is included in the e-mail, and complete the registration

You can use this service from registered e-mail address.

#### Note

You can register up to 500 members.

## **Print from E-mail Troubleshooting**

- The Document Does Not Print
- If You Cannot Register to the Service or Delete the Service
- If You Cannot Print after the Printer Is Repaired

#### The Document Does Not Print

If the document does not print, check the following:

- Check that the printer power is on.

  If the printer power is on, turn it off and then back on again, and check whether the issue is resolved.
- Check that the printer is connected to the network.
- Check that the printer is connected to a LAN and the LAN has an Internet connection.
- Look at the printer LCD monitor and check that no error message is displayed.
   If the problem persists, use the printer driver on your computer to execute printing and check whether the document can be printed normally on the printer.
  - If the document cannot be printed, refer to the *Online Manual* for your printer.
- Check that the file attached to the e-mail is an Adobe PDF file, a JPEG file, or a .doc/.docx/.xls/.xlsx/.ppt/.pptx file.
- · Check whether the e-mail address of the send destination is correct.

To check the print address, on the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> Print from E-mail setup -> Register w/ service.

- Check that the user's e-mail address for using this service is registered.
   If you want to check the error details, the printer owner have to access the login URL (https://pr.mp.c-ij.com/po).
- In the **Print Status** screen, click **Go to Print History Screen** and check the history of jobs that were sent. You can check the error details.

If you want to check the error details, the printer owner have to access the login URL (https://pr.mp.c-ij.com/po).

#### >>> Note

For a wireless LAN connection, after the printer is turned on, it may take a few minutes before
communication becomes possible. Confirm that your printer is connected to the wireless LAN, and
then try printing.

## If You Cannot Register to the Service or Delete the Service

#### If You Cannot Register to the Service

- If the printer operation panel display the message "Failed to register with "Print from E-mail".",
  the registration to Print from E-mail may not have been completed in time. Select OK to release
  the error, and start over again from the beginning.
- Check that the firmware version of the printer has been updated.

## If You Do Not Receive the URL to Complete the Registration by E-mail

 An incorrect e-mail address may have been entered. Wait about 30 minutes, and operate the printer operation panel to print the printer registration URL and PIN code. Then re-register from the beginning.

#### If You Cannot Delete the Service

- If the printer operation panel display the message "Failed to connect to "Print from E-mail". Only
  the information on the printer was deleted." is displayed, it could be that the registration
  information on the service could not be deleted even though the Print from E-mail information
  stored on this printer was deleted.
  - Select **OK** to release the error, and then access the service's login URL (https://pr.mp.c-ij.com/po) to delete the registration information.
- If the Print from E-mail information stored on this printer could not be deleted even though the

registration information on the service was deleted, on the printer operation panel, select the **Setup** button, and then select **Web service setup** -> **Connection setup** -> **Print from E-mail setup** -> **Delete from service**, and delete the registration information.

## If You Cannot Print after the Printer Is Repaired

Re-registering the printer and the printer owner

• When the printer is repaired, all of the registered information is deleted and **Print from E-mail** can no longer be used.

If you want to use this service again, you must re-register the printer and the printer owner. For information about the re-registration procedure, see "Preparing to Use Print from E-mail". Even if users other than the owner were registered as members, repeat the registration starting from here.

# Preparing to Use Print from E-mail

To use this service to print a photo or document, you need to follow the procedure provided below and register the printer.

## Print the Printer Registration Page's URL and the PIN Code

First, print the printer registration page's URL and the PIN code.

Check that there is sufficient amount of ink in the printer, and then print using the printer's operation panel.

1. Check that the printer is connected to the network

## >>> Important

- This product needs to be connected to a LAN with an Internet connection.
- 2. On the printer operation panel, select the Setup button, and then select Web service setup -> Connection setup -> Print from E-mail setup -> Register w/ service.
- 3. Follow the instructions on the screen and print the printer registration URL and PIN code

## >>>> Important

- Do not turn off the power on the printer until the registration process is completed. Access the printed URL and log in within 25 minutes.
- If you canceled the registration before it is completed, repeat the procedure from printing the registration information.

# Access the Printed URL and Enter the Owner's E-mail Address and Other Required Information

Next, enter the owner's e-mail address and other required information.

- 1. Access the printed URL by using the browser on your smartphone, tablet, or computer, and select **Log In**
- 2. In the use agreement window, select Agree

#### >>> Important

- If you do not select **Agree** in the use agreement window, you will not able to register as the printer owner.
- 3. Enter the printer owner's e-mail address, and select Next

#### >>> Important

• An e-mail is sent with the required information for completing the registration to the e-mail address entered for the printer's owner.

 If domain-specific reception is set, change the setting so that mail can be received from "info@mp.c-ij.com"

#### Note

• The e-mail address of the printer owner cannot be changed once the printer owner is registered.

To change the e-mail address, delete the registration of the registered printer, and re-register the printer owner by using the new e-mail address. In this case, all previously registered information will be deleted.

- The notification is sent automatically to the registered e-mail address when the printing or service maintenance starts.
- In the Printer Owner Registration window, enter the information shown below, and click Next

#### **User Name**

Enter any name.

The name that you enter is displayed at login.

## >>>> Important

The maximum number of characters that can be entered is 30.

#### Language

Select the language that you are using.

The language that you select is used in notification e-mails such as print start notices.

#### Time Zone

Refer to this section, and select the standard time of the city that is nearest to the region where you live.

#### **Date/Time Display Format**

Select the format of your choice.

The format that you select is applied to the date/time information in the screens and notification emails of this service.

#### **Daylight Saving Time**

This setting is combined with the **Time Zone** setting, and applied to the date/time information in the screens and notification e-mails of this service.

When you select **ON**, 1 hour is added to the **Time Zone** setting when the date/time information is displayed.

In the Printer Registration window, enter the Printer Name, and select Confirm

Enter any name that will allow you to identify the printer.

#### >>>> Important

• The maximum number of characters that can be entered is 30.

6. In the **Confirm Owner Registration** window, check the registration information, and select **Register** 

A temporary password will be displayed.

## >>>> Important

• The temporary password that appears is not included in the notification e-mail. Be sure to write down the temporary password before closing the screen.

#### Check if an E-mail Has Been Sent to the E-mail Address You Entered

A URL is notified to complete the registration to the e-mail address that for the registered printer's owner.

## Access the URL in the E-mail and Complete the Printer Registration

1. Access the URL provided in the e-mail

## >>> Important

- You have to complete the registration within 30 minutes.
- 2. Enter the registered e-mail address of the printer's owner, the temporary password, and select **Log In**
- 3. Set a password of your choice, and select Register

When the password setting process is completed, the printer's e-mail address and the service's URL are displayed, and the printer's registration process is completed.

# >>> Important

- When you enter the password, the following character restrictions apply.
  - Set a password that has 8 or more characters.
  - The characters that you can use are single-byte uppercase letters, single-byte lowercase letters, and single-byte numbers.
  - In the password, combine all of the different types of characters that can be used.
- The displayed printer's e-mail address and the URL of the login page are not sent. Be sure to write down the printer's e-mail address and the URL of the login page before closing the screen.

# **Print Easily from a Smartphone or Tablet with MAXIFY Printing Solutions**

Use MAXIFY Printing Solutions to easily print photos saved on a smartphone or tablet wirelessly.

MAXIFY Printing Solutions can be downloaded from App Store and Google Play.

# **Printing with Windows RT**

When you use Windows RT, printing is easy because you simply connect this printer to the network.

For information about connecting to the network, see the setup URL (http://www.canon.com/ijsetup) for using this product from your computer, smartphone, or tablet device.

When the connection is complete, the Canon Inkjet Print Utility software, which allows you to specify detailed print settings, is downloaded automatically.

By using Canon Inkjet Print Utility, you can check the **Printer status** and specify detailed print settings. (The available functions will differ depending on your usage environment and connection method.)

## Specifications

# Safety Guide

- ➤ Safety Precautions
- ➤ Regulatory and Safety Information

## **Safety Precautions**

## Choosing a location

- Do not install the machine in a location that is unstable or subject to excessive vibration.
- Do not install the machine in locations that are very humid or dusty, in direct sunlight, outdoors, or close to a heating source.
  - To avoid the risk of fire or electric shocks, use the machine under the operating environment specified in the On-screen Manual.
- Do not place the machine on a thick rug or carpet.
- Place the machine with its back in a location that is more than 2 inches (5 cm) away from the wall.

## **Power supply**

- Ensure that the area around the power outlet is kept clear at all times so you can easily unplug the power cord if necessary.
- Never remove the plug by pulling on the cord.
   Pulling the cord may damage the power cord, leading to possible fire or electrical shock.
- Do not use an extension lead/cord.

## Working around the machine

- Never put your hands or fingers in the machine while it is printing.
- When moving the machine, carry the machine at both ends. In case the machine weighs more than 14 kg, it is recommended to have two people lifting the machine. Accidental dropping of the machine causes injury. For the machine's weight, refer to the On-screen Manual.
- Do not place any object on the machine. Especially do not place metal objects (paper clips, staples, etc.) or containers of flammable solvents (alcohol, thinners, etc.) on top of the machine.
- Do not transport or use the machine on a slant, vertically or upside-down, as the ink may leak and damage the machine.

## Working around the machine (For the multifunction printer)

• When loading a thick book on the Platen Glass, do not press hard on the Document Cover. The Platen Glass may break and cause injury.

# Print Heads/ink tanks and FINE Cartridges

- Keep ink tanks out of the reach of children. In case ink\* is accidentally licked or swallowed, rinse out
  mouth or give one or two glasses of water to drink. If irritation or discomfort occurs, obtain medical
  advice immediately.
  - \* Clear Ink contains nitrate salts (For models containing Clear Ink).
- In case ink gets in contact with eyes, rinse with water immediately. In case ink gets in contact with skin, wash with soap and water immediately. If irritation to eyes or skin persists, obtain medical advice immediately.
- Never touch the electrical contacts on a Print Head or FINE Cartridges after printing.
   The metal parts may be very hot and could cause burns.
- Do not throw ink tanks and FINE Cartridges into fire.
- Do not attempt to disassemble or modify the Print Head, ink tanks, and FINE Cartridges.

# **Regulatory and Safety Information**

## For models containing lithium battery

- Dispose of used batteries according to the local regulations.
- · Risk of explosion if battery is replaced by an incorrect type.

#### Users in the U.S.A.

FCC Notice (U.S.A. Only) For 120V, 60Hz model

Model Number: K10409 (Contains FCC ID: AZDK30357)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of a shielded cable is required to comply with Class B limits in Subpart B of Part 15 of the FCC Rules.

Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment.

#### FCC ID:AZDK30357

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate equipment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The equipment complies with FCC radiation exposure limits for at uncontrolled equipment. This equipment should be installed and operated with minimum distance at least 20cm between the radiator and persons body (excluding extremities: hands, wrists, feet and ankles) and must not be colocated or operated with any other antenna or transmitter.

Canon U.S.A., Inc.
One Canon Park
Melville, New York 11747
1-800-652-2666

#### **Users in Canada**

This device complies with Industry Canada license-exempt RSS standard(s). Operation is subject to the following two conditions:

(1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated keeping the radiator at least 20cm or more away from person's body (excluding extremities: hands, wrists, feet and ankles).

## Pour les usagers résidant au Canada

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Cet équipement est conforme aux limites d'exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d'exposition aux fréquences radioélectriques (RF) CNR-102 de l'IC. Cet équipement doit être installé et utilisé en gardant une distance de 20 cm ou plus entre le dispositif rayonnant et le corps (à l'exception des extrémités : mains, poignets, pieds et chevilles).

Name of WLAN Module: K30357

# Only for European Union and EEA (Norway, Iceland and Liechtenstein)

This symbol indicates that this product is not to be disposed of with your household waste, according to the WEEE Directive (2012/19/EU) and national legislation. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about where you can drop off your waste equipment for recycling, please contact your local city office, waste authority, approved WEEE scheme or your household waste disposal service. For more information regarding return and recycling of WEEE products, please visit www.canoneurope.com/weee.

## Korisnici u Srbiji

Ovaj simbol označava da ovaj proizvod ne sme da se odlaže sa ostalim kućnim otpadom, u skladu sa WEEE Direktivom (2012/19/EU) i nacionalnim zakonima. Ovaj proizvod treba predati određenom centru za prikupljanje, npr. na osnovi "jedan-za-jedan" kada kupujete sličan novi proizvod, ili ovlašćenom centru za prikupljanje za reciklažu istrošene električne i elektronske opreme (EEE). Nepravilno rukovanje ovom vrstom otpada može da ima moguće negativne posledice po životnu sredinu i ljudsko zdravlje usled potencijalno opasnih materijala koji se uglavnom vezuju za EEE. U isto vreme, vaša saradnja na ispravnom odlaganju ovog proizvoda će doprineti efikasnom korišćenju prirodnih resursa. Za više informacija o tome gde možete da predate vašu staru opremu radi recikliranje, vas molimo, da kontaktirate lokalne gradske vlasti, komunalne službe, odobreni plan reciklaže ili Gradsku čistoću. Za više informacija o vraćanju i recikliranju WEEE proizvoda, posetite stranicu www.canon-europe.com/weee.

# India only.

This product is not to be disposed of with your household waste, according to the e-waste (Management and Handling) Rules, 2011.

This product should be handed over to a designated collection point, e.g., to an authorized collection site for recycling waste electrical and electronic equipment (EEE). Improper handling of this type of waste could have a possible negative impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. At the same time, your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information regarding return and recycling of WEEE products, please visit http://www.canon.co.in/environment/.

Also, this product complies with the "India E-waste Rule 2011" and prohibits use of lead, mercury, hexavalent chromium, polybrominated biphenyls or polybrominated diphenyl ethers in concentrations exceeding 0.1 % by weight and 0.01 % by weight for Cadmium, except for the exemptions set in Schedule II of the Rule.

#### **Environmental Information**

Reducing your environmental impact while saving money

## **Power Consumption and Activation Time**

The amount of electricity a device consumes depends on the way the device is used. This product is designed and set in a way to allow you to reduce your electricity costs. After the last print it switches to Ready Mode. In this mode it can print again immediately if required. If the product is not used for a time, the device switches to its Power Save Mode. The devices consume less power (Watt) in these modes. If you wish to set a longer Activation Time or would like to completely deactivate the Power Save Mode, please consider that this device may then only switch to a lower energy level after a longer period of time or not at all.

Canon does not recommend extending the Activation Times from the optimum ones set as default.

# **Energy Star®**

The Energy Star<sup>®</sup> programme is a voluntary scheme to promote the development and purchase of energy efficient models, which help to minimise environmental impact.

Products which meet the stringent requirements of the Energy Star<sup>®</sup> programme for both environmental benefits and the amount of energy consumption will carry the Energy Star<sup>®</sup> logo accordingly.

## Paper types

This product can be used to print on both recycled and virgin paper (certified to an environmental stewardship scheme), which complies with EN12281 or a similar quality standard. In addition it can support printing on media down to a weight of 64g/m<sup>2</sup>, lighter paper means less resources used and a lower environmental footprint for your printing needs.

Regulatory Model Code (RMC) is for identification and proof that the product complies with the regulations. Please note that RMC is different from the marketing model number of the product.

Managing the Printer Power

# **Notice for the Power Plug/Power Cord**

Unplug the power cord once a month to confirm that the power plug/power cord does not have anything unusual described below.

- The power plug/power cord is hot.
- The power plug/power cord is rusty.
- The power plug/power cord is bent.
- The power plug/power cord is worn.
- The power plug/power cord is split.

#### **⚠** Caution

• If you find anything unusual with the power plug/power cord described above, <u>unplug the power cord</u> and call for service. Using the printer with one of the unusual conditions above may cause a fire or an electric shock.

# **Notice for Unplugging the Power Cord**

To unplug the power cord, follow the procedure below.

## >>>> Important

- When you unplug the power cord, press the **ON** button, then confirm that the **POWER** lamp is off.

  Unplugging the power cord before the **POWER** lamp is turned off may cause drying or clogging of the print head and print quality may be reduced.
- 1. Press the **ON** button to turn the printer off.

2. Confirm that the **POWER** lamp is off.

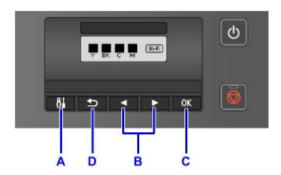

3. Unplug the power cord.

The specification of the power cord differs depending on the country or region of use.

# **LCD and Operation Panel**

Pressing the **Setup** button (A) on the operation panel shows the **Setup menu** screen to select various functions or settings.

# Selecting a Menu or Setting Item

On the menu screen or settings screen, use the  $\triangleleft$  or  $\triangleright$  button (B) to select an item or option, then press the **OK** button (C) to proceed with the procedure.

To return to the previous screen, press the **Back** button (D).

Example: Changing the automatic paper source switching setting for the cassettes.

Press the **Setup** button (A) in the standby screen.

Use the ◀ or ▶ button (B) to select **Device settings**.

Press the **OK** button (C).

Use the ◀ or ▶ button (B) to select Cassette settings.

Press the **OK** button (C).

Use the **◄** or **▶** button (B) to select **Auto feed switch**.

Press the **OK** button (C).

# Auto feed switch \*ON ▶

Use the ◀ or ▶ button (B) to change the setting, then press the **OK** button (C).

# **Loading Paper**

➤ Loading Paper

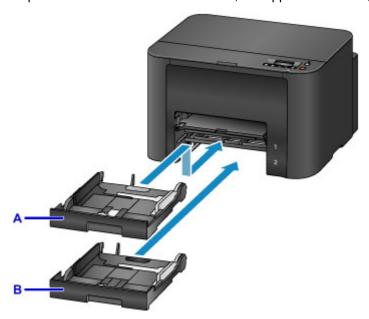

# **Loading Paper**

- ➤ Paper Sources to Load Paper
- ➤ Loading Plain Paper / Photo Paper
- ➤ Loading Envelopes
- ➤ Media Types You Can Use
- ➤ Media Types You Cannot Use
- ➤ Printing Area

# **Paper Sources to Load Paper**

# Page Sizes and Media Types compatible with the printer

Paper can be loaded into two sources, the upper cassette 1 (A) and lower cassette 2 (B).

In the upper cassette 1 (A), all sizes of paper compatible with this printer (plain paper, photo paper, envelopes, etc.) can be loaded.

In the lower cassette 2 (B), A4, Letter, and Legal-sized plain paper can be loaded.

#### Media Types You Can Use

You can load the same size of plain paper (A4, Letter, and Legal) in both cassettes, then set the printer to automatically switch the paper source and feed paper from the other cassette if paper in one cassette runs out.

Cassette settings

#### >>> Note

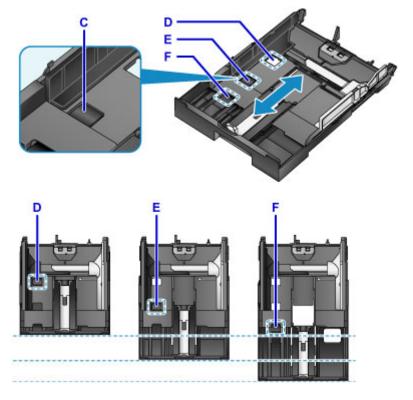

• When printing, be sure to select the correct page size and media type. If the wrong page size and media type are selected, the printer may feed paper from the wrong paper source or may not print with the proper print quality.

For details on loading paper in a cassette, see below.

- Loading Plain Paper / Photo Paper
- **Loading Envelopes**

# Adjusting the cassette according to the Paper

The cassette can be adjusted to three lengths. Press down the lock (C) on the cassette to extend the cassette.

D: Lock position for stowing the cassette

When not using this printer for long period of time or moving it, set it to the position D. The cassette will fit into the width of the printer. Paper cannot be loaded while in this position.

E: Lock position for A4 or Letter-sized paper or smaller

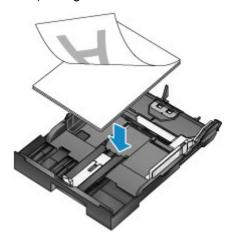

For A4 or Letter-sized paper or smaller, set it to the position E. The cassette sticks out of the printer, but you can cover it by pulling out the paper output tray. Set the cassette to this position for normal use.

F: Lock position for paper larger than A4 or Letter size

For paper larger than A4 size, such as Legal size, set the cassette to the position F. When the cassette is set to this position and inserted into the printer, pulling out the paper output tray will not fully cover it. (The cassette sticks out of the printer.)

# **Loading Paper with the Print Side Facing Down**

If the paper has a print side (front or back), such as photo paper, load it with the whiter side (or glossy side) facing down.

# **Loading Plain Paper / Photo Paper**

You can load paper in the cassette 1 or cassette 2.

\* This section describes how to load paper in the cassette 1. The procedure to loading paper in cassette 2 is also the same.

### >>> Important

• If you cut plain paper into small size such as 4" x 6" (10 x 15 cm) or 5" x 7" (13 x 18 cm) to perform trial print, it can cause paper jams.

#### Note

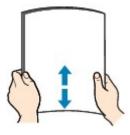

- In the cassette 1, you can load all sizes of paper compatible with this printer (plain paper, photo paper, envelopes, etc.).
- In the cassette 2, you can load A4, Letter, and Legal-sized plain paper.
- · We recommend Canon genuine photo paper for printing photos.

For details on the Canon genuine paper, see Media Types You Can Use.

- · You can use general copy paper.
- For the page size and paper weight you can use for this printer, see Media Types You Can Use.
- · For loading envelopes, see Loading Envelopes.

#### 1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

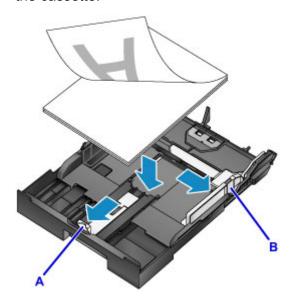

#### Note

- Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.
  - For details on how to flatten curled paper, see "Load the paper after correcting its curl." in <a href="Paper Is Smudged/Printed Surface Is Scratched">Paper Is Smudged/Printed Surface Is Scratched</a>.
- When using Photo Paper Plus Semi-gloss SG-201, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

#### 2. Pull out the cassette from the printer.

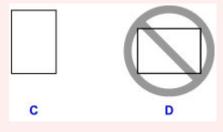

- 3. Slide the paper guide (A) in front and (B) on the right to open the guides.
- 4. Load the paper stack WITH THE PRINT SIDE FACING DOWN, and place it in the center of the cassette.

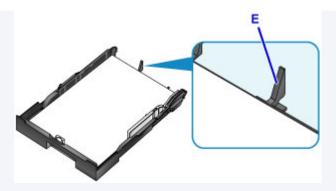

# >>> Important

• Always load paper in the portrait orientation (C). Loading paper in the landscape orientation (D) can cause paper jams.

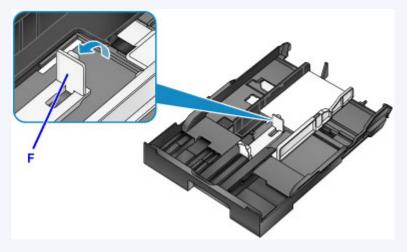

### Note

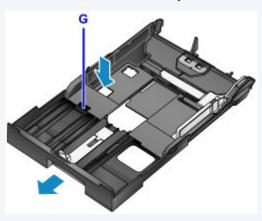

- If paper has print side (front or back), such as photo paper, load it with the whiter side (or glossy side) facing down.
- Align the paper stack with the edge of the cassette as shown in the figure below.
   If the paper stack is in contact with the protrusion (E), the paper may not be fed properly.

• To load 5" x 7" (13 x 18 cm) size paper or smaller, raise the tab (F) of the paper guide. (5" x 7" (13 x 18 cm) size paper or smaller can be loaded in the cassette 1 only.)

• To load paper larger than A4 size in the cassette, press down the lock (G) on the cassette, then extend the cassette all the way out.

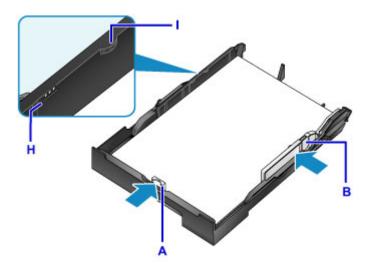

5. Align the paper guide (A) in front with the paper stack.

For standard sizes, set the paper guide (A) to where it clicks into place.

6. Slide the paper guide (B) on the right to align the right and left guides with both sides of the paper stack.

Do not slide the paper guides too hard against the paper. The paper may not be fed properly.

#### Note

- Do not load sheets of paper higher than the load limit mark (H).
- Keep the paper stack height below the tabs (I) of the paper guides.

## 7. Insert the cassette into the printer.

Push the cassette into the printer until it stops.

After inserting the cassette into the printer, the paper information registration screen for the cassette is displayed on the LCD.

#### Note

- When A4 or Letter-sized paper or smaller is loaded, the cassette stops at the same position as the extended paper output tray, which then covers the cassette.
- When paper larger then A4 or Letter size is loaded, the extended cassette protrudes beyond the
  paper output tray. Do not force the cassette into the printer any further. This can damage the
  printer or cassette.

8. Press the **OK** button.

9. Use the ◀ or ▶ button to select the size of the loaded paper in the cassette, then press the OK button.

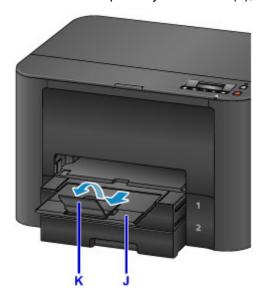

### Note

- The asterisk "\*" will appear with the current page size and media type settings.
  - Paper setting for Printing
- 10. Use the ◀ or ▶ button to select the type of the loaded paper in the cassette, then press the **OK** button.

11. Extend the output tray extension (J), then open the paper output support (K).

### Note

• When printing, select the size and type of the loaded paper on the print settings screen of the printer driver.

# **Loading Envelopes**

You can load envelopes in the cassette 1.

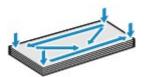

The address is automatically rotated and printed according to the envelope's direction by specifying with the printer driver properly.

## >>>> Important

- Do not use the following envelopes. They could jam in the printer or cause the printer to malfunction.
  - · Envelopes with an embossed or treated surface
  - · Envelopes with a double flap
  - · Envelopes whose gummed flaps are already moistened and adhesive

#### 1. Prepare envelopes.

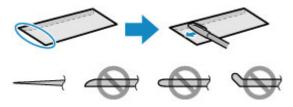

• Press down on all four corners and edges of the envelopes to flatten them.

 If the envelopes are curled, hold the opposite corners and gently twist them in the opposite direction.

- · If the corner of the envelope flap is folded, flatten it.
- Use a pen to press the leading edge in the inserting direction flat and sharpen the crease.

The figures above show a side view of the leading edge of the envelope.

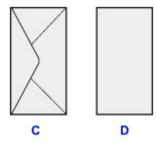

### Important

- The envelopes may jam in the printer if they are not flat or the edges are not aligned. Make sure that no curl or puff exceeds 0.1 inch (3 mm).
- 2. Pull out the cassette 1 from the printer.

- 3. Slide the paper guide (A) in front and (B) on the right to open the guides.
- 4. Load the envelopes WITH THE PRINT SIDE FACING DOWN, and place them in the center of the cassette 1.

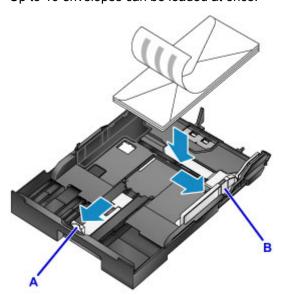

The folded flap of the envelope will be faced up as shown in the figure below (C).

C: Rear side

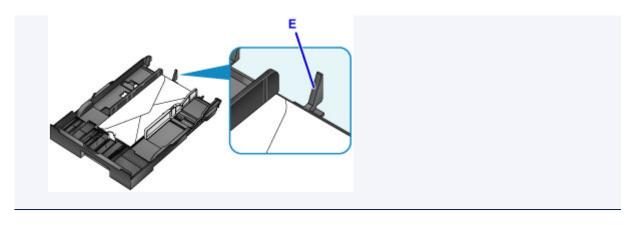

D: Address side

Up to 10 envelopes can be loaded at once.

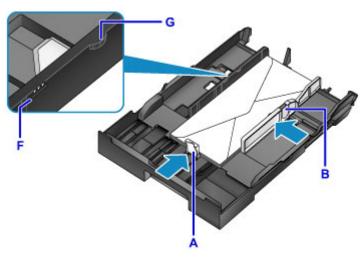

#### >>> Note

Align the envelope stack with the edge of the cassette 1 as shown in the figure below.
 If the envelopes are in contact with the protrusion (E), the envelopes may not be fed properly.

- 5. Align the paper guide (A) in front with the envelopes.
- 6. Slide the paper guide (B) on the right to align the right and left guides with both sides of the envelopes.

Do not slide the paper guides too hard against the envelopes. The envelopes may not be fed properly.

### >>> Note

- Do not load envelopes higher than the load limit mark (F).
- Keep the envelope stack height below the tabs (G) of the paper guides.
- 7. Insert the cassette 1 into the printer.

Push the cassette 1 into the printer until it stops.

After inserting the cassette into the printer, the paper information registration screen for the cassette is displayed on the LCD.

8. Press the **OK** button.

Register cassette 1 pape [OK]Next

9. Use the ◀ or ▶ button to select the size of the loaded envelopes in the cassette, then press the **OK** button.

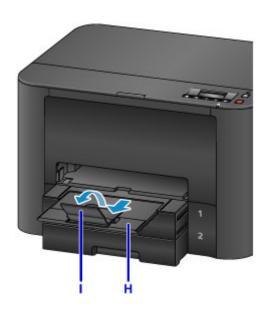

### Note

- The asterisk "\*" will appear with the current page size and media type settings.
  - Paper setting for Printing
- 10. Use the ◀ or ▶ button to select the type of the loaded envelopes in the cassette, then press the **OK** button.

11. Extend the output tray extension (H), then open the paper output support (I).

# >>> Note

• When printing, select the size and type of the loaded envelopes on the print settings screen of the printer driver.

# Media Types You Can Use

To get the best printing result, choose paper suitable for printing. Canon provides various types of paper suitable for documents as well as paper suitable for photos or illustrations. We recommend the use of Canon genuine paper for printing your important photos.

## Media Types

### Commercially available papers

- · Plain Paper (including recycled paper)
- Envelopes

### Canon genuine papers

The Model Number of Canon genuine paper is shown in brackets. Refer to the instruction manual supplied with the paper for detailed information on the printable side and notes on handling paper. For information on the page sizes available for each Canon genuine paper, access our website.

### Note

• You may not be able to purchase some Canon genuine papers depending on the country or region of purchase. Paper is not sold in the US by Model Number. Purchase paper by name.

#### Paper for printing photos:

- Glossy Photo Paper "Everyday Use" <GP-501/GP-601>
- Photo Paper Glossy <GP-601>
- Photo Paper Plus Glossy II <PP-201>
- Photo Paper Pro Luster <LU-101>
- Photo Paper Plus Semi-gloss <SG-201>
- Matte Photo Paper <MP-101>

#### Paper for printing business documents:

- High Resolution Paper <HR-101N>
  - Paper Load Limit
  - Paper Settings on the Printer Driver and the Printer (Media Type)

# **Page Sizes**

You can use the following page sizes.

#### Note

- · You can load the page sizes as follows.
  - cassette 1: A4, B5, A5, Letter, Legal, 4" x 6" (10 x 15 cm), 5" x 7" (13 x 18 cm), 8" x 10" (20 x 25 cm), Envelope DL, and Envelope Com 10
  - · cassette 2: A4, Letter, and Legal

#### Standard sizes:

- Letter
- Legal

- A5
- A4
- B5
- 4" x 6" (10 x 15 cm)
- 5" x 7" (13 x 18 cm)
- 8" x 10" (20 x 25 cm)
- Envelope DL
- Envelope Com 10

#### Non-standard sizes:

You can print on non-standard size paper within the following ranges.

- · cassette 1
  - Minimum size: 3.50 x 5.00 inches (89.0 x 127.0 mm)
  - Maximum size: 8.50 x 14.00 inches (215.9 x 355.6 mm)
- cassette 2
  - Minimum size: 8.27 x 11.00 inches (210.0 x 279.4 mm)
  - Maximum size: 8.50 x 14.00 inches (215.9 x 355.6 mm)

# **Paper Weight**

You can use paper in the following weight range.

• 17 to 28 lb (64 to 105 g /m²) (plain paper except for Canon genuine paper)

Do not use heavier or lighter paper (except for Canon genuine paper), as it could jam in the printer.

# **Notes on Storing Paper**

- Take out only the necessary number of paper from the package, just before printing.
- To avoid curling, when you do not print, put unused paper back into the package and keep it on a level surface. And also, store it avoiding heat, humidity, and direct sunlight.

# **Paper Load Limit**

# **Commercially Available Papers**

Media Name	Cassette 1	Cassette 2	Paper Output Tray
Plain Paper (including recycled paper)*1	Approx. 250 sheets	Approx. 250 sheets	Approx. 75 sheets
Envelopes	10 envelopes	N/A <u>*2</u>	<u>*3</u>

# **Canon Genuine Papers**

#### Note

- Feeding the following papers from the cassette 2 can damage the printer. Always load in the cassette 1.
- We recommend that you remove the previously printed sheet from the paper output tray before continuously printing to avoid blurs and discoloration (except for High Resolution Paper <HR-101N>).

### Paper for printing photos:

Media Name <model no.=""></model>	Cassette 1
Glossy Photo Paper "Everyday Use" <gp-501 gp-601="">*4</gp-501>	10 sheets: A4 and Letter
	20 sheets: 4" x 6" (10 x 15 cm)
Photo Paper Glossy <gp-601>*4</gp-601>	10 sheets: A4 and Letter
	20 sheets: 4" x 6" (10 x 15 cm)
Photo Paper Plus Glossy II <pp-201>*4</pp-201>	10 sheets: A4, Letter, 5" x 7" (13 x 18 cm), and 8" x 10" (20 x 25 cm)
	20 sheets: 4" x 6" (10 x 15 cm)
Photo Paper Pro Luster <lu-101>*4</lu-101>	10 sheets: A4 and Letter
Photo Paper Plus Semi-gloss <sg-201>*4</sg-201>	10 sheets: A4, Letter, 5" x 7" (13 x 18 cm), and 8" x 10" (20 x 25 cm)
	20 sheets: 4" x 6" (10 x 15 cm)
Matte Photo Paper <mp-101></mp-101>	10 sheets: A4 and Letter
	20 sheets: 4" x 6" (10 x 15 cm)

#### Paper for printing business documents:

Media Name <model no.=""></model>	Cassette 1	Paper Output Tray
High Resolution Paper <hr-101n></hr-101n>	65 sheets	65 sheets

<sup>\*1</sup> Proper feeding of paper may not be possible at the maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature or humidity). In such cases, reduce the number of paper you load at a time to less than half.

<sup>\*2</sup> Feeding envelopes from the cassette 2 can damage the printer. Always load in the cassette 1.

<sup>\*3</sup> We recommend that you remove the previously printed envelope from the paper output tray before continuously printing to avoid blurs and discoloration.

properly. In this case, load one sheet at a time.			

# **Media Types You Cannot Use**

Do not use the following types of paper. Using such paper will cause not only unsatisfactory results, but also the printer to jam or malfunction.

- · Folded, curled, or wrinkled paper
- · Damp paper
- Paper that is too thin (weighing less than 17 lb (64 g /m²))
- Paper that is too thick (plain paper weighing more than 28 lb (105 g /m²), except for Canon genuine paper)
- Paper thinner than a postcard, including plain paper or notepad paper cut to a small size (when printing on paper smaller than A5)
- · Picture postcards
- · Postcards affixed with photos or stickers
- · Envelopes with a double flap
- Envelopes with an embossed or treated surface
- Envelopes whose gummed flaps are already moistened and adhesive
- · Any type of paper with holes
- · Paper that is not rectangular
- · Paper bound with staples or glue
- · Paper with adhesives
- · Paper decorated with glitter, etc.

# **Printing Area**

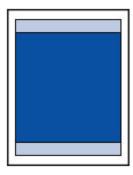

- ➤ Printing Area
- ➤ Other Sizes than Letter, Legal, Envelopes
- ➤ Letter, Legal
- ➤ Envelopes

# **Printing Area**

To ensure the best print quality, the printer allows a margin along each edge of media. The actual printable area will be the area inside these margins.

Recommended printing area \_\_\_\_\_: Canon recommends that you print within this area.

Printable area : The area where it is possible to print. However, printing in this area can affect the print quality or the paper feed precision.

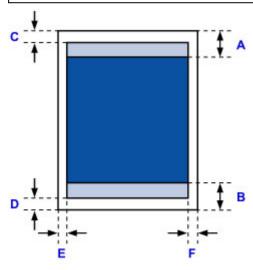

# Note

• With performing Automatic Duplex Printing, the printable area will be 0.08 inch (2 mm) smaller at the top margin.

# Other Sizes than Letter, Legal, Envelopes

Size	Printable Area (width x height)		
A5	5.56 x 7.95 inches (141.2 x 202.0 mm)		
A4	8.00 x 11.38 inches (203.2 x 289.0 mm)		
B5	6.90 x 9.80 inches (175.2 x 249.0 mm)		
4" x 6" (10 x 15 cm)	3.73 x 5.69 inches (94.8 x 144.4 mm)		
5" x 7" (13 x 18 cm)	4.73 x 6.69 inches (120.2 x 169.8 mm)		
8" x 10" (20 x 25 cm)	7.73 x 9.69 inches (196.4 x 246.0 mm)

# Replacing an Ink Tank

- ➤ Replacing an Ink Tank
- ➤ Checking the Ink Status

# Replacing an Ink Tank

When remaining ink cautions or errors occur, the message will appear on the LCD to inform you of the error. Take appropriate action according to the message.

**A** Message Is Displayed

#### Note

• If print results become faint or white streaks appear despite sufficient ink levels, see <u>Maintenance</u> Procedure.

# **Replacing Procedure**

When you need to replace an ink tank, follow the procedure below.

# Important

- If you remove an ink tank, replace it immediately. Do not leave the printer with the ink tank removed.
- Use a new ink tank for replacement. Installing a used ink tank may cause the nozzles to clog. Furthermore, with such an ink tank, the printer will not be able to inform you when to replace the ink tank properly.
- Once an ink tank has been installed, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out, and the printer may not operate properly when it is reinstalled. To maintain optimal printing quality, use an ink tank within six months of first use.

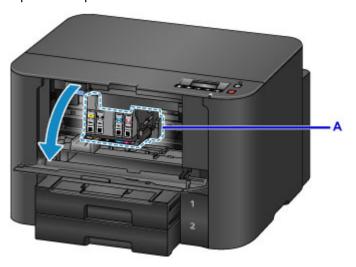

#### Note

• Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified.

Every ink is also consumed in the standard cleaning and deep cleaning of the print head, which may be necessary to maintain the performance of the printer. When an ink tank is out of ink, replace it immediately with a new one.

- Useful Information about Ink
- 1. Make sure that the power is turned on, then open the front cover.

The replaceable ink tank is displayed on the LCD and the print head holder (A) moves to the replacement position of that ink tank.

## ♠ Caution

• Do not hold the print head holder to stop or move it forcibly. Do not touch the print head holder until it stops completely.

# >>>> Important

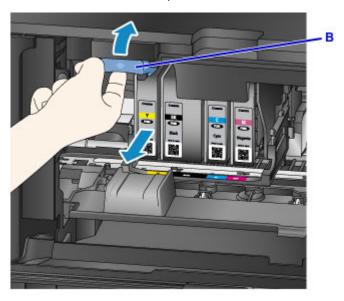

- Do not remove an ink tank until a new one is prepared to be installed.
  - · Once you remove an ink tank, the machine will not operate until a new one is installed.
  - Once you remove an ink tank, the machine will not operate even if the removed ink tank is just reinstalled.
- You cannot remove the ink tank which is not placed at the replacement position. Removing it
  forcibly may cause the printer to malfunction or damage the printer.
- Do not touch the metallic parts or other parts inside the printer.
- If the front cover is left open for more than 60 minutes, the print head holder moves to the right. In this case, close and reopen the front cover.

#### Note

- If the message for the ink tank replacement is displayed on the LCD, check it and then press the **OK** button.
- 2. When an ink tank for replacement is displayed on the LCD, push up the ink tank eject lever (B).

The ink tank will be ejected.

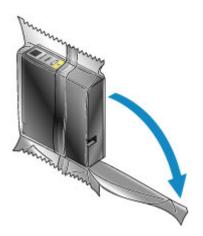

When you want to replace another ink tank, press the **OK** button to select **[OK]Next** and display the screen for the ink tank to replace.

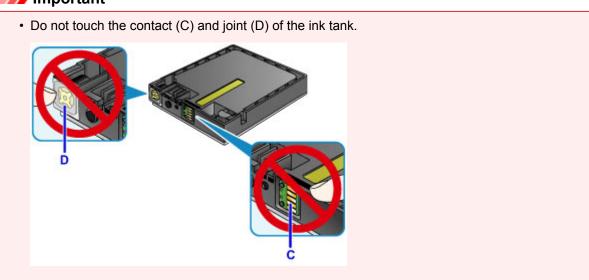

# >>>> Important

- Place the removed ink tank into a plastic bag immediately after removing from the printer. Otherwise, ink residue may stain your clothes or the surrounding area.
- Do not touch other parts besides the ink tanks.
- Discard the empty ink tank according to the local laws and regulations regarding disposal of consumables.
- Handle the ink tanks carefully. Do not drop or apply excessive pressure to them.

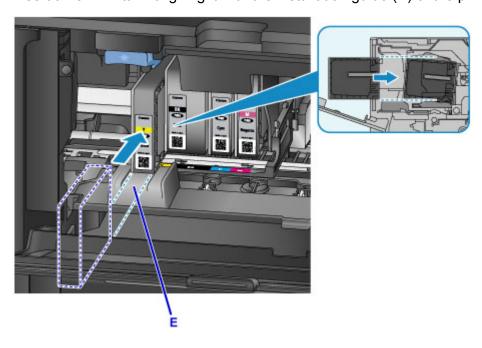

3. Remove the ink tank from the package.

# >>> Important

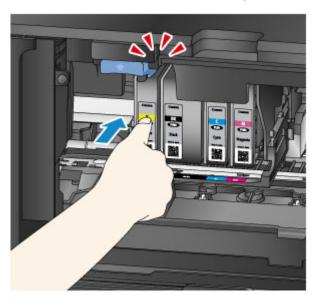

4. Insert a new ink tank aligning it with the installation guide (E) of the printer.

# >>> Important

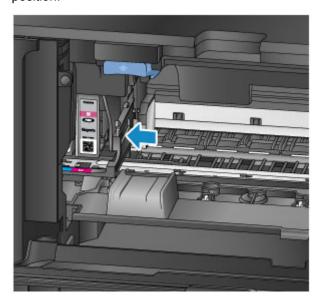

• You cannot insert the ink tank in the wrong position. Check the label under the installation position, then install the ink tank in the correct position.

# 5. Push the ink tank until it snaps firmly into place.

# 6. Press the **OK** button to select **[OK]Exit**.

If **[OK]Next** is displayed on the screen, it means there is another ink tank that can be replaced. If you want to replace this ink tank, press the **OK** button and then repeat procedures from step 2. To exit the ink tank replacement, press the **OK** button until **[OK]Exit** is displayed on the screen. The print head holder moves to the standby position. You cannot remove the ink tank while at this position.

# >>> Important

- You cannot print unless all the ink tanks are installed. Be sure to install all the ink tanks.
- An installed ink tank cannot be removed until the message to replace it is displayed.

## 7. Close the front cover.

After replacing the ink tanks, the printer starts mixing the ink automatically. Wait until the printer has stopped making operating noise. (This takes about 1 to 2 minutes.)

# Note

- If the error message appears on the LCD, take appropriate action.
  - A Message Is Displayed
- If the print head is out of alignment, as indicated by misaligned printed ruled lines or similar symptoms, align the print head.
- The printer may make noise during operation.

# **Checking the Ink Status**

➤ Checking the Ink Status with the LCD on the Printer

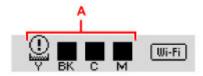

You can also check the ink status on the computer screen.

➤ Checking the Ink Status from Your Computer

# Checking the Ink Status with the LCD on the Printer

You can check the ink status on the LCD.

A symbol appears in the area (A) if there is any information about the remaining ink level.

Example: ①

Ink tank is running low. Prepare a new ink tank.

## >>> Note

- The above screen shows estimated ink levels.
- Select **Print ink number** in **Ink information** on the **Setup menu** screen to print the model number of the ink tank.
- · You can also check the ink status on the computer screen.
  - **Checking the Ink Status from Your Computer**

- **▶** Maintenance Procedure
- ➤ Printing the Nozzle Check Pattern
- ➤ Examining the Nozzle Check Pattern
- ➤ Cleaning the Print Head
- ➤ Cleaning the Print Head Deeply
- ➤ Aligning the Print Head

## **Maintenance Procedure**

If print results are blurred, colors are not printed correctly, or print results are unsatisfactory (e.g. misaligned printed ruled lines), perform the maintenance procedure below.

#### Note

- Increasing the print quality in the printer driver settings may improve the print result.
  - Changing the Print Quality and Correcting Image Data

#### When the Print Results Are Blurred or Uneven:

Step1 Print the nozzle check pattern.

From the printer

Printing the Nozzle Check Pattern

From the computer

■ Use Your Computer to Print a Nozzle Check Pattern

Step2 Examine the nozzle check pattern.

If there are missing lines or horizontal white streaks in the pattern:

Step3 Clean the print head.

From the printer

Cleaning the Print Head

From the computer

■ Cleaning the Print Heads from Your Computer

After cleaning the print head, print and examine the nozzle check pattern: ▶ Step1

If the problem is not resolved after performing from step 1 to step 3 twice:

Step4 Clean the print head deeply.

From the printer

■ Cleaning the Print Head Deeply

From the computer

■ Cleaning the Print Heads from Your Computer

#### Note

• When you have performed the procedure until step 4 and the problem has not been resolved, turn off the power and clean the print head deeply again after 24 hours.

If the problem is still not resolved, the print head may be damaged. Contact the service center.

# When the Print Results Are Not Even such as the Ruled Lines Are Misaligned:

Step Align the print head.

From the printer

Aligning the Print Head

From the computer

■ Aligning the Print Head Position from Your Computer

# **Printing the Nozzle Check Pattern**

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzle.

#### Note

- When the ink has run out during printing the nozzle check pattern, the error message will appear on the LCD
  - A Message Is Displayed

#### You need to prepare: a sheet of A4 or Letter-sized plain paper

- 1. Make sure that the power is turned on.
- 2. Load a sheet of A4 or Letter-sized plain paper in the cassette 1.

After inserting the cassette into the printer, the paper information registration screen is displayed on the LCD. Select **A4** or **Letter** for **Size:** and **Plain paper** for **Type:**, then press the **OK** button.

# >>>> Important

- The cassette 2 is not available for the nozzle check pattern print procedure. Be sure to load paper in the cassette 1.
- 3. Extend the output tray extension, then open the paper output support.
- Press the Setup button, use the 

  or 

  button to select Maintenance, then press the OK button.
  - **LCD** and Operation Panel
- 5. Use the **◄** or **▶** button to select **Nozzle check**, then press the **OK** button.

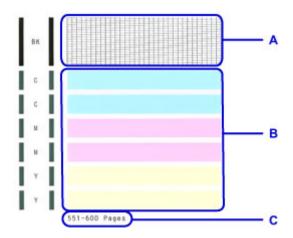

The nozzle check pattern will be printed.

6. Examine the nozzle check pattern.

# **Examining the Nozzle Check Pattern**

Examine the nozzle check pattern, and clean the print head if necessary.

1. Check if there are missing lines in the pattern A or horizontal white streaks in the pattern B.

C: Number of sheets printed so far

If there are missing lines in the pattern A:

Cleaning the print head is required.

D: Good

E: Bad (lines are missing)

If there are horizontal white streaks in the pattern B:

Cleaning the print head is required.

F: Good

G: Bad (horizontal white streaks are present)

# >>> Note

• The total number of sheets printed so far is shown in increments of 50 sheets on the printout of the nozzle check pattern.

# **Cleaning the Print Head**

Clean the print head if lines are missing or if horizontal white streaks are present in the printed nozzle check pattern. Cleaning unclogs the nozzles and restores the print head condition. Cleaning the print head consumes ink, so clean the print head only when necessary.

#### Note

- You can also clean the print head using the computer. When using the computer, select the ink group to clean, then start cleaning.
  - Cleaning the Print Heads from Your Computer
- When cleaning the print head using the operation panel, the print head of all ink colors are cleaned.
- 1. Make sure that the power is turned on.
- Press the Setup button, use the 

  or 

  button to select Maintenance, then press the OK button.
  - **LCD and Operation Panel**
- 3. Use the **◄** or **▶** button to select **Cleaning**, then press the **OK** button.

The printer starts cleaning the print head.

Do not perform any other operations until the printer completes the cleaning of the print head. This takes about 2 minutes.

4. Check the print head condition.

To check the print head condition, print the nozzle check pattern.

#### Note

• If the problem is not resolved after cleaning the print head twice, clean the print head deeply.

# **Cleaning the Print Head Deeply**

If print quality does not improve by the standard cleaning of the print head, clean the print head deeply. Cleaning the print head deeply consumes more ink than the standard cleaning of the print head, so clean the print head deeply only when necessary.

#### Note

- You can also clean the print head deeply using the computer. When using the computer, select the ink group to clean, then start the deep cleaning.
  - Cleaning the Print Heads from Your Computer
- When cleaning the print head deeply using the operation panel, the print head of all ink colors are cleaned.
- 1. Make sure that the power is turned on.
- Press the Setup button, use the 

  or 

  button to select Maintenance, then press the OK button.
  - **LCD and Operation Panel**
- 3. Use the **◄** or **▶** button to select **Deep cleaning**, then press the **OK** button.

The printer starts cleaning the print head deeply.

Do not perform any other operations until the printer completes the deep cleaning of the print head. This takes about 2 to 3 minutes.

4. Check the print head condition.

To check the print head condition, print the nozzle check pattern.

If the problem is not resolved, turn off the power and clean the print head deeply again after 24 hours.

If the problem is still not resolved, the print head may be damaged. Contact the service center.

# **Aligning the Print Head**

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

#### Note

- When the ink has run out during printing the nozzle check pattern, the error message will appear on the LCD.
  - A Message Is Displayed

You need to prepare: a sheet of A4 or Letter-sized plain paper (including recycled paper)\*

- \* Be sure to use paper that is white and clean on both sides.
  - 1. Make sure that the power is turned on.
  - 2. Load a sheet of A4 or Letter-sized plain paper in the cassette 1.

After inserting the cassette into the printer, the paper information registration screen is displayed on the LCD. Select **A4** or **Letter** for **Size:** and **Plain paper** for **Type:**, then press the **OK** button.

# Important

- The cassette 2 is not available for the print head alignment procedure. Be sure to load paper in the cassette 1.
- 3. Extend the output tray extension, then open the paper output support.
- Press the Setup button, use the 
   or ▶ button to select Maintenance, then press the OK button.
  - LCD and Operation Panel
- 5. Use the **◄** or **▶** button to select **Head alignment**, then press the **OK** button.

The print head alignment sheet will be printed and the print head position will be adjusted automatically. This takes about 3 to 4 minutes.

#### >>> Note

- If the automatic adjustment of the print head position has failed, the error message appears on the LCD.
  - A Message Is Displayed
- If the print results are still not satisfactory after adjusting the print head position as described above, adjust the print head position manually from the computer.

■ Aligning the Print Head Position Manually from Your Computer

# **Performing Maintenance from a Computer**

- ➤ Cleaning the Print Heads from Your Computer
- ➤ Use Your Computer to Print a Nozzle Check Pattern
- ➤ Aligning the Print Head
- ➤ Aligning the Print Head Position from Your Computer
- ➤ Checking the Ink Status from Your Computer

# **Cleaning the Print Heads from Your Computer**

The print head cleaning function allows you to clear up clogged print head nozzle. Perform print head cleaning if printing is faint or a specific color fails to print, even though there is enough ink.

The procedure for cleaning the print head is as follows:

# Cleaning

1. Select **Cleaning** from the pop-up menu on the <u>Canon IJ Printer Utility</u>

#### 2. Click the Cleaning icon

When the dialog opens, select the ink group for which cleaning is to be performed.

Click ? to display the items you need to check before performing cleaning.

#### 3. Execute cleaning

Make sure that the printer is on and then click **OK**.

Print head cleaning starts.

# 4. Complete cleaning

The **Nozzle Check** dialog opens after the confirmation message.

#### 5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

If cleaning the head once does not resolve the print head problem, clean it once more.

# >>> Important

Cleaning consumes a small amount of ink.
 Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

# **Deep Cleaning**

**Deep Cleaning** is more thorough than cleaning. Perform deep cleaning when two **Cleaning** attempts do not resolve the print head problem.

- 1. Select **Cleaning** from the pop-up menu on the <u>Canon IJ Printer Utility</u>
- 2. Click the Deep Cleaning icon

When the dialog opens, select the ink group for which deep cleaning is to be performed.

Click ? to display the items you need to check before performing deep cleaning.

#### 3. Execute deep cleaning

Make sure that the printer is on and then click **OK**.

Click **OK** when the confirmation message appears.

Print head deep cleaning starts.

#### 4. Complete deep cleaning

The **Nozzle Check** dialog opens after the confirmation message.

#### 5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

# >>> Important

Deep Cleaning consumes a larger amount of ink than Cleaning.
 Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

#### Note

• If there is no sign of improvement after **Deep Cleaning**, turn off the printer, wait 24 hours, and then perform **Deep Cleaning** again. If there is still no sign of improvement, the ink may have run out or the print head may be worn. For details on the remedial action to be taken, see "Ink Is Not Ejected."

# **Related Topic**

■ Use Your Computer to Print a Nozzle Check Pattern

# **Use Your Computer to Print a Nozzle Check Pattern**

The nozzle check function allows you to check whether the print head is working properly by printing a nozzle check pattern. Print the pattern if printing becomes faint, or if a specific color fails to print.

The procedure for printing a nozzle check pattern is as follows:

# **Nozzle Check**

1. Select **Test Print** from the pop-up menu on the <u>Canon IJ Printer Utility</u>

#### 2. Click the Nozzle Check icon

The confirmation message appears.

Click 10 to display the items that you need to check before printing the nozzle check pattern.

## 3. Load paper in the printer

Load one sheet of A4 size or Letter size plain paper into the cassette 1.

# >>> Important

• The cassette 2 is not available for the nozzle check pattern printing. Be sure to load paper in the cassette 1.

## Note

 If the cassette paper information registered on the printer is not set to A4 size and plain paper, an error may occur. For instructions on what to do if an error occurs, see "Paper setting for Printing."

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)

#### 4. Print a nozzle check pattern

Make sure that the printer is on and click Print Check Pattern.

Printing of the nozzle check pattern begins.

#### 5. Check the print result

When the dialog opens, check the print result. If the print result is normal, click Quit.

If the print result is smudged or if there are any unprinted sections, click **Cleaning** to clean the print head.

# **Related Topic**

Cleaning the Print Heads from Your Computer

# **Aligning the Print Head**

When you perform head position adjustment, errors in the print head adjustment position are corrected and conditions such as color and line streaking are improved.

If the print results appear uneven because of line shifts or other conditions, adjust the position of the print head.

On this printer, you can adjust the print head either automatically or manually.

# Aligning the Print Head Position from Your Computer

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

This printer supports two head alignment methods: automatic head alignment and manual head alignment. Normally, the printer is set for automatic head alignment.

If the printing results of automatic print head alignment are not satisfactory, perform manual head alignment.

The procedure for performing automatic print head alignment is as follows:

# **Print Head Alignment**

- 1. Select **Test Print** from the pop-up menu on the Canon IJ Printer Utility
- 2. Click the Print Head Alignment icon

A message is displayed.

3. Load paper in the printer

Load one sheet of A4 size or Letter size plain paper into the cassette 1.

## >>> Important

• The cassette 2 is not available for the print head alignment procedure. Be sure to load paper in the cassette 1.

#### Note

- The number of sheets to be used differs when you select the manual head alignment.
- If the cassette paper information registered on the printer is not set to A4 size and plain paper, an error may occur. For instructions on what to do if an error occurs, see "<u>Paper setting for</u> <u>Printing.</u>"

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)
- 4. Execute head alignment

Make sure that the printer is on and click **Align Print Head**. Print head alignment starts.

# >>>> Important

Do not open the front cover while printing is in progress.

#### Note

 Wait until printing ends before performing other operations. Printing takes about 3 to 4 minutes to complete.

# >>>> Note

• After head alignment is completed, you can print and check the current setting. To do so, click the **Print Head Alignment** icon and when the message is displayed, click **Print Alignment Value**.

# Aligning the Print Head Position Manually from Your Computer

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

This printer supports two head alignment methods: <u>automatic head alignment</u> and manual head alignment. Normally, the printer is set for automatic head alignment.

If the printing results of automatic print head alignment are not satisfactory, perform manual head alignment.

The procedure for performing manual print head alignment is as follows:

# **Print Head Alignment**

- 1. Select Custom Settings from the pop-up menu on the Canon IJ Printer Utility
- 2. Switch head alignment to manual

Check the Align heads manually check box.

3. Apply the settings

Click **Apply** and when the confirmation message appears, click **OK**.

- 4. Select **Test Print** from the pop-up menu on the Canon IJ Printer Utility
- 5. Click the **Print Head Alignment** icon

A message is displayed.

6. Load paper in the printer

Load two sheets of A4 size or Letter size plain paper into the cassette 1.

# >>>> Important

• The cassette 2 is not available for the print head alignment procedure. Be sure to load paper in the cassette 1.

#### Note

 If the cassette paper information registered on the printer is not set to A4 size and plain paper, an error may occur. For instructions on what to do if an error occurs, see "<u>Paper setting for</u> <u>Printing</u>."

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)
- 7. Execute head alignment

Make sure that the printer is on and click Align Print Head.

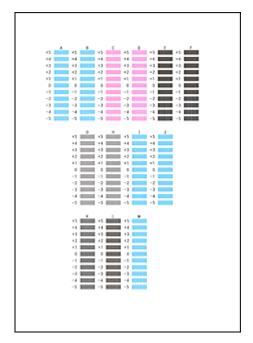

The first pattern is printed.

# >>> Important

• Do not open the front cover while printing is in progress.

# 8. Check the printed pattern

Enter the numbers of the patterns with the least noticeable streaks in the associated boxes, and click **OK**.

## >>> Note

• If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical streaks.

- (A) Least noticeable vertical streaks
- (B) Most noticeable vertical streaks

## 9. Confirm the displayed message and click **OK**

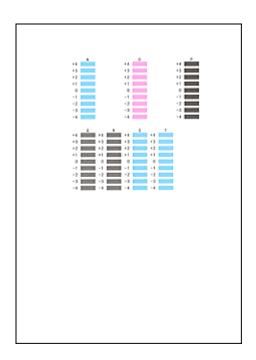

The second pattern is printed.

# >>>> Important

• Do not open the front cover while printing is in progress.

## 10. Check the printed pattern

Enter the numbers of the patterns with the least noticeable stripes or streaks in the associated boxes, and click  $\mathbf{OK}$ .

## Note

• If it is difficult to pick the best pattern, pick the setting that produces the least noticeable horizontal stripes.

- (A) Least noticeable horizontal stripes
- (B) Most noticeable horizontal stripes
- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical streaks.

- (A) Least noticeable vertical streaks
- (B) Most noticeable vertical streaks

## Note

• After head alignment is completed, you can print and check the current setting. To do so, click the **Print Head Alignment** icon and when the message is displayed, click **Print Alignment Value**.

# **Cleaning the Printer**

- ➤ Cleaning the Exterior of the Printer
- ➤ Cleaning the Paper Feed Roller
- ➤ Cleaning the Inside of the Printer (Bottom Plate Cleaning)
- ➤ Cleaning the Pad in the Cassette

# **Cleaning the Exterior of the Printer**

Be sure to use a soft and dry cloth such as eyeglasses cleaning cloth and wipe off dirt on the surface gently. Smooth out wrinkles on the cloth if necessary before cleaning.

# >>>> Important

- Be sure to turn off the power and unplug the power cord before cleaning the printer.
- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface. Paper tissue powder or fine threads may remain inside the printer and cause problems such as print head blockage and poor printing results.
- Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the printer, as this may cause a malfunction or damage the surface of the printer.

# **Cleaning the Paper Feed Roller**

If the paper feed roller is dirty or paper powder is attached to it, paper may not be fed properly.

In this case, clean the paper feed roller. Cleaning will wear out the paper feed roller, so perform this only when necessary.

#### You need to prepare: three sheets of A4 or Letter-sized plain paper

- 1. Make sure that the power is turned on.
- Press the Setup button, use the 

  or 

  button to select Maintenance, then press the OK button.
  - **LCD** and Operation Panel
- 3. Use the ◀ or ▶ button to select **Roller cleaning**, then press the **OK** button.

4. Remove any paper from the cassette.

#### >>> Note

- If a message is displayed on the screen after inserting the cassette into the printer, press the OK button.
- 5. Use the ◀ or ▶ button to select the paper source to clean (Cassette 1 or Cassette 2), then press the OK button.

The paper feed roller will rotate as it is cleaned.

6. Make sure that the paper feed roller has stopped rotating, then load three sheets of A4 or Letter-sized plain paper in the paper source you selected in step 5.

After inserting the cassette into the printer, the paper information registration screen is displayed on the LCD. Select **A4** or **Letter** for **Size:** and **Plain paper** for **Type:**, then press the **OK** button.

- 7. Extend the output tray extension, then open the paper output support.
- 8. Press the **OK** button again.

The printer starts cleaning. The cleaning will be complete when the paper is ejected.

9. Press the Back button to exit.

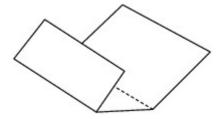

If the problem is not resolved after cleaning the paper feed roller, contact the service center.

## **Cleaning the Inside of the Printer (Bottom Plate Cleaning)**

Remove stains from the inside of the printer. If the inside of the printer becomes dirty, printed paper may get dirty, so we recommend performing cleaning regularly.

#### You need to prepare: a sheet of A4 or Letter-sized plain paper\*

- \* Be sure to use a new piece of paper.
  - 1. Make sure that the power is turned on, then remove any paper from the cassette 1.
  - 2. Fold a single sheet of A4 or Letter-sized plain paper in half widthwise, then unfold the paper.
  - 3. Fold one side of the opened paper in another half, aligning the edge with the center crease, then unfold the paper.

4. Load only this sheet of paper in the cassette 1 with the ridges of the creases facing up and the edge of the half with no crease facing to the far side.

After inserting the cassette into the printer, the paper information registration screen is displayed on the LCD. Select **A4** or **Letter** for **Size:** and **Plain paper** for **Type:**, then press the **OK** button.

### >>>> Important

• The cassette 2 is not available for the Bottom Plate Cleaning procedure. Be sure to load paper in the cassette 1.

- 5. Extend the output tray extension, then open the paper output support.
- 6. Press the **Setup** button, use the **◄** or **▶** button to select **Maintenance**, then press the **OK** button.
  - LCD and Operation Panel
- 7. Use the **◄** or **▶** button to select **Bottom cleaning**, then press the **OK** button.

The paper cleans the inside of the printer as it feeds through the printer.

Check the folded parts of the ejected paper. If they are smudged with ink, perform Bottom Plate Cleaning again.

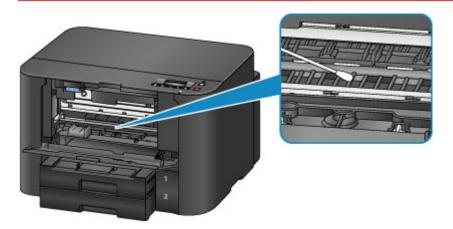

#### Note

• When performing Bottom Plate Cleaning again, be sure to use a new piece of paper.

If the problem is not resolved after performing cleaning again, the protrusions inside the printer may be stained. Wipe off any ink from the protrusions using a cotton swab or the like.

#### >>> Important

• Be sure to turn off the power and unplug the power cord before cleaning the printer.

## Cleaning the Pad in the Cassette

If the pad in a cassette is smeared with paper powder or dirt, two or more sheets of paper may be ejected. Follow the procedure below to clean the pad in a cassette.

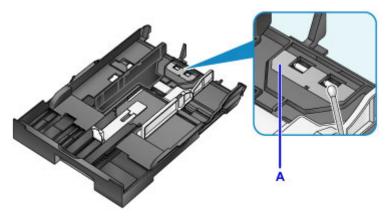

#### You need to prepare: cotton swab

- 1. Pull out the cassette 1 or cassette 2 from the printer, then remove all the paper.
- 2. Clean the pad (A) sideways with a moistened cotton swab.

## >>> Important

• After cleaning the smeared pad, dry it completely.

#### For an example of the cassette 1:

3. Reload the paper, then insert the cassette into the printer.

#### Note

• If a message is displayed on the screen after inserting the cassette into the printer, press the **OK** button.

If the problem is not resolved, contact the service center.

## **Changing the Printer Settings**

- ➤ Changing Printer Settings from Your Computer
- ➤ Changing the Machine Settings on the LCD

## **Changing Printer Settings from Your Computer**

- ➤ Checking the Ink Status from Your Computer
- ➤ Registering a Changed Printing Profile
- ➤ Managing the Printer Power
- ➤ Reducing the Printer Noise
- ➤ Changing the Printer Operation Mode

## **Checking the Ink Status from Your Computer**

You can check the detailed information such as the remaining ink level and the ink tank types of your model.

1. Select Ink Level Information from the pop-up menu on the Canon IJ Printer Utility

An illustration of the ink types and their status is displayed.

If a warning or error related to the remaining ink level occurs, the printer driver displays an icon to let you know.

#### 2. If necessary, click Ink Details

You can check the ink-related information.

#### Note

- Ink Details is displayed when the ink level is low.
- Click to check which ink tank your model uses.
- Click **Update** to display the current remaining ink level.
- When you receive a notice about the remaining ink level, a mark appears above the ink icon.

For example:

Ink tank is running low. Prepare a new ink tank.

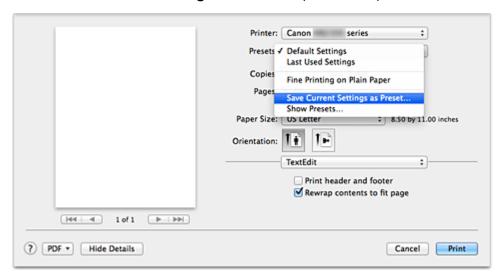

## **Registering a Changed Printing Profile**

You can name and register the printing profile you made in the <u>Print Dialog</u>. The registered printing profile can be called up from **Presets** to be used. You can also delete the unnecessary printing profile.

The procedure for registering a printing profile is as follows:

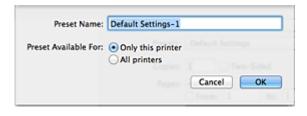

#### Registering a Printing Profile

- 1. In the Print dialog, set the necessary items
- 2. Select Save Current Settings as Preset... (Save As...) from the Presets

3. Save the settings

In the displayed dialog, enter a name in **Preset Name**, and if necessary, set **Preset Available For**. Then click **OK**.

## >>>> Important

· There are also print settings that cannot be saved to preset.

## **Using Registered Printing Profile**

1. On **Presets** in the Print dialog, select the name of printing profile you want to use Printing profile in the Print dialog will be updated to the called profile.

## **Deleting Unnecessary Printing Profile**

#### 1. Select the printing profile to be deleted

- If you are using OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7 In the print dialog, select **Show Presets...** in the **Presets** section. Then in the dialog that appears, select the name of the printing profile to be deleted.
- If you are using Mac OS X v10.6.8
   On Presets in the Print dialog, select the name of printing profile you want to delete.

#### 2. Delete the printing profile

- If you are using OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7
   Click Delete, and click OK. The selected printing profiles will be deleted from Presets.
- If you are using Mac OS X v10.6.8
   On Presets in the Print dialog, click Delete. The selected printing profiles will be deleted from Presets.

## **Managing the Printer Power**

This function allows you to manage the printer power from the printer driver.

The procedure for managing the printer power is as follows:

#### Power Off

The **Power Off** function turns off the printer. When you use this function, you will not be able to turn the printer on from the printer driver.

- 1. Select **Power Settings** from the pop-up menu on the Canon IJ Printer Utility
- 2. Execute power off

Click **Power Off**, and when the confirmation message appears, click **OK**. The printer power switches off.

### **Auto Power**

Auto Power allows you to set Auto Power On and Auto Power Off.

The Auto Power On function automatically turns on the printer when data is received.

The **Auto Power Off** function automatically turns off the printer when there are no operations from the printer driver or the printer for a specified period of time.

- 1. Select **Power Settings** from the pop-up menu on the Canon IJ Printer Utility
- 2. Check that the printer is on, and then click Auto Power

A dialog appears.

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.
- 3. If necessary, complete the following settings:

#### **Auto Power On**

Specifying **Enable** from the list will turn the printer on upon receipt of print data.

#### **Auto Power Off**

Specify the time from the list. When this time lapses without any operations from the printer driver or the printer, the printer is turned off automatically.

#### 4. Apply the settings

The setting is enabled after this. When you want to disable this function, select **Disable** from the list according to the same procedure.

## >>>> Important

• If you connect this printer to a network and use it, you can set **Auto Power Off** but the power will not be turned off automatically.

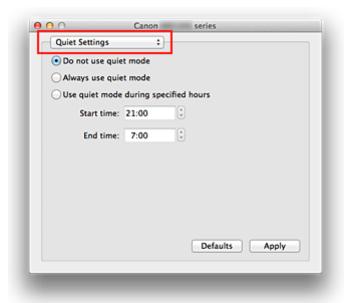

## **Reducing the Printer Noise**

The silent function allows you to reduce the operating noise of this printer. Select when you wish to reduce the operating noise of the printer at night, etc.

Using this function may lower the print speed.

The procedure for using the quiet mode is as follows:

1. Select Quiet Settings from the pop-up menu on the Canon IJ Printer Utility

#### Note

• If the computer is unable to communicate with the printer, a message may be displayed because the computer cannot access the function information that was set on the printer. If this happens, click **Cancel** to display the most recent settings specified on your computer.

#### Set the quiet mode

If necessary, specify one of the following items:

#### Do not use quiet mode

Select this option when you wish to use the printer with volume of normal operating noise.

#### Always use quiet mode

Select this option when you wish to reduce the operating noise of the printer.

#### Use quiet mode during specified hours

Select this option when you wish to reduce the operating noise of the printer during a specified period of time.

Set the **Start time** and the **End time** of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

#### Important

You can set the quiet mode from the printer or the printer driver.
 No matter how you use to set the quiet mode, the mode is applied when you perform operations from the printer or printing from the computer.

#### Apply the settings

Make sure that the printer is on and click **Apply**.

Click **OK** when the confirmation message appears.

The settings are enabled hereafter.

#### >>> Note

• The effects of the quiet mode may be less depending on the paper source and the print quality settings.

## **Changing the Printer Operation Mode**

If necessary, switch between various modes of printer operation.

The procedure for configuring **Custom Settings** is as follows:

1. Make sure that the printer is on, and then select **Custom Settings** from the pop-up menu on the Canon IJ Printer Utility

#### >>> Note

- If the computer is unable to communicate with the printer, a message may be displayed because the computer cannot access the function information that was set on the printer.
  - If this happens, click **Cancel** to display the most recent settings specified on your computer.
- 2. If necessary, complete the following settings:

#### **Ink Drying Wait Time**

You can set the length of the printer rest time until printing of the next page begins. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time. If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

Reducing the ink drying wait time speeds up printing.

#### **Display Guide Message**

Displays a guide when you perform operations in which the paper setting procedure is complicated. **Hagaki Printing** 

Displays the guide message before the printer begins hagaki printing.

To hide the guide messages, select the **Do not show again** check box in the displayed dialog. To display the guide messages again, display the Canon IJ Printer Utility pop-up menu, select **Custom Settings**, and then check the **Hagaki Printing** check box.

## >>>> Important

 With OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7, you cannot use Display Guide Message.

Therefore, if you check the **Do not show again** check box when a guide message is displayed before printing starts, this will stop any more guide messages from being displayed.

#### Prevent paper abrasion

The printer can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.

Check this check box to prevent paper abrasion.

#### Align heads manually

Usually, the **Print Head Alignment** function of **Test Print** on the pop-up menu in the Canon IJ Printer Utility is set to automatic head alignment, but you can change it to manual head alignment. If the printing results of automatic print head alignment are not satisfactory, <u>perform manual head alignment</u>.

Check this check box to perform the manual head alignment. Uncheck this check box to perform the automatic head alignment.

#### Don't detect mismatch of paper settings when printing from computer

When you print documents from your computer and the paper settings on the print dialog and the cassette paper information registered on the printer do not match, this setting disables the message

display and allows you to continue printing.

To disable detection of paper setting mismatches, select this check box.

## 3. Apply the settings

Click **Apply** and when the confirmation message appears, click **OK**.

The printer operates with the modified settings hereafter.

## **Changing the Machine Settings on the LCD**

- ➤ Changing the Printer Settings on the LCD
- Output settings
- ► LAN settings
- ➤ Dev. user settings
- ➤ Firmware update
- Cassette settings
- ▶ Reset setting
- ➤ About Quiet setting
- ➤ Turning on/off the Printer Automatically
- ➤ Using the Printer with the Access Point Mode

## **Changing the Printer Settings on the LCD**

This section describes the procedure to change the settings in the **Device settings** screen, taking the steps to specify **Prevent abrasion** as an example.

#### Note

- The \* (asterisk) on the LCD indicates the current setting.
- 1. Make sure that the printer is turned on.
- 2. Press the **Setup** button.

The **Setup menu** screen is displayed.

3. Use the **b** button to select **Device settings**, then press the **OK** button.

The **Device settings** screen is displayed.

4. Use the **◄►** button to select the setting item, then press the **OK** button.

The setting screen for the selected item is displayed.

5. Use the **b** button to select the menu, then press the **OK** button.

6. Use the **◄►** button to select a setting item, then press the **OK** button.

You can select the setting menus below.

- **■**Output settings
- **LAN** settings
- ■Dev. user settings
- Firmware update
- ■Cassette settings
- **■Reset setting**

#### Note

- You can use the printer considering the environment, such as enabling the printer to turn on/off automatically.
  - ■Turning on/off the Printer Automatically
- · You can reduce the operating noise when printing at night.

## **Output settings**

#### • Prevent abrasion

Use this setting only if the print surface becomes smudged.

## >>> Important

• Be sure to set this back to **OFF** after printing since it may result in lower printing speed or lower print quality.

## LAN settings

#### Change LAN

Enables either wireless LAN, wired LAN, or access point mode. You can also disable all.

#### Wireless LAN setup

Selects the setup method for wireless LAN connection.

#### >>> Note

 You can also enter this setting menu by selecting Wireless LAN setup from the Setup menu screen.

When this menu is selected, the printer starts searching for a WPS-compatible access point. If the printer detects the access point, follow the on-screen instructions to set up wireless LAN. If an access point is not detected or if you select another setup method, select one of the setup methods below.

#### WPS (Push button)

Select when you perform settings for wireless LAN using an access point supporting a Wi-Fi Protected Setup (WPS) push button method. Follow the on-screen instructions during setup.

#### Other setup

#### WPS (PIN code)

Select when you perform settings for wireless LAN using an access point supporting a Wi-Fi Protected Setup (WPS) PIN code method. Follow the on-screen instructions during setup.

#### Cableless setup

Select if you specify the settings of the access point information to the printer directly from a device (such as a smartphone) without operating the access point. Follow the on-screen instructions of the connecting device for the setup procedure.

#### Print LAN details

You can print out the network settings of the printer such as its IP address and SSID.

For more information on the printer's network setting is printed out, refer to <u>Printing Out Network Setting</u> <u>Information</u>.

#### Other settings

### >>>> Important

You cannot select the items below when LAN inactive is selected for Change LAN.

#### TCP/IP settings

Performs IPv4 or IPv6 setting.

#### WSD setting

Setting items when you use WSD (one of the network protocols supported in Windows 8.1, Windows 8, Windows 7, and Windows Vista).

#### Enable/disable WSD

Selects whether WSD is enabled or disabled.

#### >>> Note

• When this setting is enabled, the printer icon is displayed on the Network Explorer in Windows 8.1, Windows 8, Windows 7, and Windows Vista.

#### **Timeout setting**

Specifies the timeout length.

#### Bonjour settings

Setting items for LAN using Bonjour for Mac OS.

#### Enab./disab. Bonjour

Selecting **Active** allows you to use Bonjour to perform the network settings.

#### LPR setting

Activates/deactivates the LPR setting.

#### DRX setting

Enables discontinuous reception when using wireless or wired LAN. It allows you to save electricity.

#### Wireless LAN

Selecting Active allows you to enable discontinuous reception when using wireless LAN.

#### Wired LAN

Selecting Active allows you to enable discontinuous reception when using wired LAN.

#### >>> Note

- Depending on the access point you are using, discontinuous reception of the wireless LAN may not be activated even though **Active** is selected.
- Discontinuous reception is activated only while the printer is on standby. (The LCD is in the screen saver mode.)

## Dev. user settings

#### Language selection

Changes the language for LCD messages and menus.

Japanese / English / German / French / Italian / Spanish / Dutch / Portuguese / Norwegian / Swedish / Danish / Finnish / Russian / Ukrainian / Polish / Czech / Slovak / Hungarian / Slovene / Croatian / Romanian / Bulgarian / Turkish / Greek / Estonian / Latvian / Lithuanian / Simplified Chinese / Traditional Chinese / Korean / Indonesian

#### Key repeat

Enables/Disables continuous input by pressing and holding down the **\leftrigotarrow** button when selecting a setting menu or setting item.

#### · Device info sending

Selects whether you will send the printer usage information to Canon server. The information sent to Canon will be utilized to develop better products. Select **ON** to send the printer usage information to Canon server.

## Firmware update

You can update the firmware of the printer, check the firmware version, or perform settings of a notification screen.

#### >>> Note

• Only Current version is available when LAN inactive is selected for Change LAN in LAN settings.

#### · Install update

Performs the firmware update of the printer.

#### >>> Important

• When you use this function, make sure that the printer is connected to the Internet.

#### >>> Note

- If the firmware update is not complete, check the following and take an appropriate action.
  - When using wired LAN, make sure that the printer is connected to the computer with a LAN cable properly.
  - Check the network settings such as an access point or a router.
  - If Cannot connect to the server; try again is displayed on the LCD, press the OK button, then try again after a while.

#### Current version

You can check the current firmware version.

#### · Update notification

When **ON** is selected and the firmware update is available, the screen to inform you of the firmware update is displayed on the LCD.

## **Cassette settings**

By registering the paper size and the media type loaded in the cassette, you can prevent the printer from misprinting by displaying the message before printing starts when the paper size or the media type of the loaded paper differs from the print settings. In addition, you can allow the printer to switch the paper source automatically when a cassette runs out of paper.

#### · Register paper info

Registers the paper size and the media type you load in the cassette.

#### >>> Note

- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer
  - ■Setting the Paper Size with the Printer Driver and on the Printer

#### · Det. paper mismatch

If you select **ON**, the printer detects whether the paper size and the media type are the same as those registered in **Register paper info**. If printing starts with the settings that do not match, an error message is displayed on the LCD.

#### >>> Note

• When **OFF** is selected, **Detect reinsertion** is disabled.

#### · Detect reinsertion

If you select **ON**, the printer detects the cassette is reinserted. When the **Register paper info** screen is displayed, register the paper size and the media type.

#### · Auto feed switch

If you select **ON**, the printer switches the paper source automatically when a cassette runs out of paper. Load A4, Letter, or Legal sized plain paper in both of the cassettes to activate this function.

## **Reset setting**

Reverts all settings you made to the printer back to the default. However, some data may not be changed, depending on the current usage state of your printer.

#### · Web service setup

Reverts the Web service settings back to the default.

#### LAN settings

Reverts the LAN settings other than the administrator password specified by IJ Network Tool back to the default.

#### · Setting data

Reverts the settings such as the paper size or media type back to the default.

#### · Device info sending

Reverts only the device information sending settings.

#### · All data

Reverts all settings you made to the printer back to the default. The administrator password specified by IJ Network Tool reverts to the default setting.

#### >>> Note

- You cannot change the following setting items back to the default:
  - · The language displayed on the LCD
  - · The current position of the print head

## **About Quiet setting**

Enables this function on the printer if you want to reduce the operating noise, such as when printing at night. Follow the procedure below to perform setting.

- 1. Make sure that the printer is turned on.
- 2. Press the **Setup** button.

The **Setup menu** screen is displayed.

- 3. Use the **b** button to select **Quiet setting**, then press the **OK** button.
- 4. Use the **I** button to select **ON**, then press the **OK** button.

The LCD returns to the **Setup menu** screen.

You can reduce the operating noise while printing is in progress.

#### Important

- Operating speed may be reduced compared to when **OFF** is selected.
- This function may not be so effective depending on the printer's setting. Furthermore, certain noise, such as when the printer is preparing for printing, is not reduced.

#### Note

You can set the quiet mode from the operation panel of the printer or the printer driver. No matter
how you set the quiet mode, the mode is applied when you perform operations from the operation
panel of the printer or printing from the computer.

## **Turning on/off the Printer Automatically**

You can enable the printer to turn on/off automatically considering the environment

- ■Turning on the Printer Automatically
- ■Turning off the Printer Automatically

#### **Turning on the Printer Automatically**

You can enable the printer to turn on automatically when printing data is sent to the printer.

- 1. Make sure that the printer is turned on.
- 2. Press the **Setup** button.

The **Setup menu** screen is displayed.

- 3. Use the **b** button to select **ECO** (power on/off), then press the **OK** button.
- 4. Use the **b** button to select **Auto power on**, then press the **OK** button.
- 5. Use the **I** button to select **ON**, then press the **OK** button.

#### >>> Note

You can select whether you turn the printer on automatically from the operation panel of the
printer or the printer driver. No matter how you set the mode, the mode is applied when printing
data is sent to the printer.

## **Turning off the Printer Automatically**

You can enable the printer to turn off automatically when no operation is made or no printing data is sent to the printer for a specified period of time.

- 1. Make sure that the printer is turned on.
- 2. Press the **Setup** button.

The **Setup menu** screen is displayed.

- 3. Use the **b** button to select **ECO** (power on/off), then press the **OK** button.
- 4. Use the **◄▶** button to select **Auto power off**, then press the **OK** button.
- 5. Use the **b**utton to select the time, then press the **OK** button.

#### Note

 You can select whether you turn off the printer automatically from the operation panel of the printer or the printer driver.

## **Using the Printer with the Access Point Mode**

By using the printer as an access point in an environment that does not have wireless LAN router or access point, or by using the printer as an access point temporarily in an environment that has wireless LAN router or access point, you can connect the printer to an external device such as a computer or a smartphone and print from them.

This section describes how to enable the access point mode, the access point name of the printer, and the security setting.

- ■How to enable the Access Point Mode
- Printing with the Access Point Mode
- ■How to terminate the Access Point Mode
- Setting of the Access Point Mode

#### >>> Important

• Before using the printer with the access point mode, confirm the usage restrictions then switch the printer to the access point mode.

#### **M**Restrictions

If you use the printer with the access point mode for the long time, it is recommended that you change
the default access point name and the default password to the combination of numbers and letters with
the point of view of security.

#### **How to enable the Access Point Mode**

Enable the access point mode following the procedure below.

- 1. Make sure that the printer is turned on.
- 2. Press the **Setup** button.

The Setup menu screen is displayed.

3. Use the **b** button to select **Device settings**, then press the **OK** button.

The **Device settings** screen is displayed.

- 4. Use the **b** button to select **LAN settings**, then press the **OK** button.
- 5. Use the **I** button to select **Change LAN**, then press the **OK** button.
- 6. Use the **◄►** button to select **AP mode active**, then press the **OK** button.
- 7. Use the **b** button to select **Start setup**, then press the **OK** button.

The access point mode is enabled and the printer can be used as an access point.

• If you select **SSID** or **Security protocol** using the **I** button and press the **OK** button, you can confirm the current access point name (SSID) and the current security setting.

### **Printing with the Access Point Mode**

Print with the access point mode following the procedure below.

 Connect an external device such as a computer or a smartphone to the printer via wireless LAN.

Perform wireless LAN settings with your external device, then assign the access point name specified for the printer as a destination.

#### Note

- For details on how to perform wireless LAN settings with an external device, refer to the device's instruction manual.
- When a WPA2-PSK (AES) password is valid on the printer, entering the password is required to connect an external device to the printer via wireless LAN. Enter the password specified for the printer.
- 2. Start printing from an external device such as a computer or a smartphone.

#### Note

• For details on how to print from an external device such as a computer or a smartphone via wireless LAN, refer to the device's or application's instruction manual.

#### **How to terminate the Access Point Mode**

In environments that the printer is connected with the computer over the wireless LAN usually, set the printer to the wireless LAN connection following the procedure below when you finish using the printer with the access point mode temporarily.

1. Press the **Setup** button.

The **Setup menu** screen is displayed.

2. Use the **◄►** button to select **Device settings**, then press the **OK** button.

The **Device settings** screen is displayed.

- Use the ► button to select LAN settings, then press the OK button.
- 4. Use the **I** button to select **Change LAN**, then press the **OK** button.
- 5. Use the **b** button to select **Wireless LAN active**, then press the **OK** button.

If you do not use the printer over wireless LAN, select Wired LAN active or LAN inactive.

## **Setting of the Access Point Mode**

The initial value of the access point mode is set as follows.

SSID (access point name)		
	* "XXXXXX" is the last six digits of MAC address of the printer.	
Security setting	WPA2-PSK (AES)	
Password	Serial number of the printer	

#### >>> Note

- To confirm the MAC address of the printer, print out the network setting information.
  - Printing Out Network Setting Information
- You can change the security setting and the password using IJ Network Tool.

If you change the access point mode setting of the printer, also change the access point setting of the external device such as a computer or a smartphone.

## **Information about Network Connection**

➤ Useful Information about Network Connection

## **Useful Information about Network Connection**

- ➤ Default Values Set at Factory (Network)
- ➤ Connecting the Printer to the Computer Using a USB Cable
- ➤ When Detecting the Printers Have the Same Name
- ➤ Connecting to Other Computer with LAN/Changing the Connection Method from USB to LAN
- ➤ Printing Out Network Setting Information

## **Default Values Set at Factory (Network)**

## **Default Values of the LAN Connection**

Item	The default
Change LAN	LAN inactive
SSID	BJNPSETUP
Communication mode	Infrastructure
Wireless LAN security	Disable
IP address (IPv4)	Auto setup
IP address (IPv6)	Auto setup
TCP/IP settings	IPv4/IPv6
Enable/disable IPv6	Active
Enable/disable WSD	Active
Timeout setting	1 minute
Enab./disab. Bonjour	Active
Service name (Bonjour settings)	Canon iB4000 series
LPR setting	Active
DRX setting (Wireless LAN)	Active
DRX setting (Wired LAN)	Active

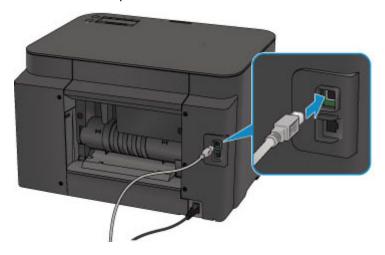

## **Default Values of the Access Point Mode**

Item	The default
SSID (access point name)	XXXXXX-iB4000series
Security setting	WPA2-PSK (AES)
Password	Serial number of the printer

(XXXXXX is the last six digits of MAC address of the printer.)

## Connecting the Printer to the Computer Using a USB Cable

Connect the printer and the computer using a USB cable as the illustration below. The USB port is located on the rear of the printer.

## When Detecting the Printers Have the Same Name

When the printer is detected, you may see multiple printers of the same name on the detection result screen. The printer names on the screen are displayed with the MAC address added at the end of the names or displayed as the printer name specified by Bonjour.

Select a printer with checking the MAC address, the printer name specified by Bonjour, or the serial number set to the printer against that on the detection result screen.

#### Note

• A serial number may not be displayed on the detection result screen.

To check the MAC address of the printer, print out the network setting information.

■ Printing Out Network Setting Information

# Connecting to Other Computer with LAN/Changing the Connection Method from USB to LAN

To add the computer connecting the printer with LAN or to change the connection method between the printer and the computer from USB to LAN, perform setup according to the instructions on our website.

### **Connecting to Other Computer with LAN**

To add the computer connecting the printer with LAN, perform setup according to the instructions on our website.

## **Changing the Connection Method from USB to LAN**

To change the connection method to LAN while you are using the printer with USB connection, perform setup again according to the instructions on our website and select **Change Connection Method**.

## **Printing Out Network Setting Information**

You can print out the current network settings of the printer.

#### >>>> Important

- This print out contains valuable information about your computer. Handle it with care.
- 1. Make sure that the printer is turned on.
- 2. Load a sheet of A4 or Letter-sized plain paper.
- 3. Press the **Setup** button.

The **Setup menu** screen is displayed.

- 4. Use the **I** button to select **Device settings**, then press the **OK** button.
- 5. Use the **b** button to select **LAN settings**, then press the **OK** button.
- 6. Use the **◄▶** button to select **Print LAN details**, then press the **OK** button.

The printer starts printing the network setting information.

The following information on the printer's network setting is printed out.

Item	Explanations of the item	Setting
Wireless LAN	Wireless LAN	Enable/Disable
Connection	Connection status	Active/Inactive
MAC Address	MAC Address	XX:XX:XX:XX:XX
SSID	SSID	SSID of the wireless LAN/SSID of the access point mode
Password	Password	Password of the access point mode (8 to 10 alphanumeric characters)
Communication Mode	Communication Mode	Infrastructure/Access Point Mode
Channel *1	Channel	XX (1 to 13)
Encryption	Method of the Encryption	none/WEP/TKIP/AES
WEP Key Length	WEP Key Length	Inactive/128/64
Authentication	Method of the Authentication	none/auto/open/shared/WPA-PSK/WPA2-PSK
Signal Strength	Signal Strength	0 to 100 [%]
TCP/IP Version	TCP/IP Version	IPv4 & IPv6/IPv4
IPv4 IP Address	Selected IP Address (IPv4)	xxx.xxx.xxx

IPv4 Default Gateway	Default Gateway (IPv4)	xxx.xxx.xxx	
Subnet Mask	Subnet Mask	XXX.XXX.XXX	
IPv6 IP Address *2	Selected IP Address (IPv6)	XXXX:XXXX:XXXX	
		XXXX:XXXX:XXXX	
IPv6 Default Gateway *2	Default Gateway (IPv6)	XXXX:XXXX:XXXX	
		XXXX:XXXX:XXXX	
Subnet Prefix Length *2	Subnet Prefix Length	xxx	
IPsec *3	IPsec setting	Active	
Security Protocol *3	Method of the Security Protocol	ESP/ESP & AH/AH	
Wireless LAN DRX	Discontinuous reception (wireless LAN)	Enable/Disable	
Wired LAN	Wired LAN	Enable/Disable	
Connection	Status of the Wired LAN	Active/Inactive	
MAC Address	MAC Address	XX:XX:XX:XX:XX	
TCP/IP Version	TCP/IP Version	IPv4 & IPv6/IPv4	
IPv4 IP Address	Selected IP Address (IPv4)	XXX.XXX.XXX	
IPv4 Default Gateway	Default Gateway (IPv4)	XXX.XXX.XXX	
Subnet Mask	Subnet Mask	XXX.XXX.XXX	
IPv6 IP Address *2	Selected IP Address (IPv6)	XXXX:XXXX:XXXXX XXXX:XXXX:XXXX	
IPv6 Default Gateway *2	Default Gateway (IPv6)	XXXX:XXXX:XXXX XXXX:XXXX:XXXX	
		^^^^	
Subnet Prefix Length *2	Subnet Prefix Length	xxx	
IPsec *3	IPsec setting	Active	
Security Protocol *3	Method of the Security Protocol	ESP/ESP & AH/AH	
Wired LAN DRX	Discontinuous reception (wired LAN)	Enable/Disable	
Other Settings	Other settings	-	
Printer Name	Printer name	Printer name (Up to 15 alphanumeric characters)	
WSD	WSD setting	Enable/Disable	
WSD Timeout	Timeout	1/5/10/15/20 [min]	
LPR Protocol	LPR protocol setting	Enable/Disable	
Bonjour	Bonjour setting	Enable/Disable	

Bonjour Service Name	Bonjour service name	Bonjour service name (Up to 52 alphanumeric characters)
DNS Server	Getting DNS Server automatically	Auto/Manual
Primary Server	Primary server address	XXX.XXX.XXX
Secondary Server	Secondary server address	XXX.XXX.XXX
Proxy Server	Proxy Server setting	Enable/Disable
Proxy Port	Specifying Proxy Port	1 to 65535
Proxy Address	Proxy Address	xxxxxxxxxxxxxxx

("XX" represents alphanumeric characters.)

<sup>\*1</sup> Depending on the country or region of purchase, one of the channels from 1 to 11 is printed.

<sup>\*2</sup> Only when IPv6 is enabled, the status of the network is printed.

<sup>\*3</sup> Only IPv6 and the IPsec setting are enabled, the status of the network is printed.

# **IJ Network Tool**

IJ Network Tool is a utility that enables you to display and modify the machine network settings. It is installed when the machine is set up.

# Important

- To use the machine over LAN, make sure you have the equipment necessary for the connection type, such as an access point or a LAN cable.
- Do not start up IJ Network Tool while printing.
- Do not print when IJ Network Tool is running.
- If the firewall function of your security software is turned on, a message may appear warning that
  Canon software is attempting to access the network. If the warning message appears, set the security
  software to always allow access.

# Starting up IJ Network Tool

1. Select **Applications** from the **Go** menu of Finder, double-click **Canon Utilities** > **IJ Network Tool**, and double-click the **Canon IJ Network Tool** icon.

Depending on the printer you are using, an administrator password is already specified for the printer at the time of purchase. When you change the network settings, authentication by the administrator password is required.

For details:

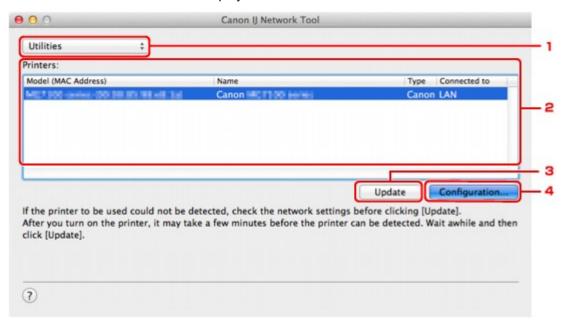

■About the Administrator Password

For improving security, it is recommended to change the administrator password.

■Changing the Settings in the Admin Password Sheet

# Canon IJ Network Tool Screen

This section describes the items displayed on the Canon IJ Network Tool screen.

# 1. Utilities

Modifies the settings of the machine.

Select to change the network name (SSID) settings.

# Setup

Sets up the machine.

If you setup the machine from scratch, connect your computer and the machine with a USB cable.

### 2. Printers:

Printer name, type, and connection destination are displayed.

The selected printer can be set up or be modified.

# 3. Update

Performs printer detection again. Click this button if the target printer is not displayed.

### Important

- To change the printer's network settings using IJ Network Tool, it must be connected via a LAN.
- If the printer on a network is not detected, make sure that the printer is turned on, then click
   Update. It may take several minutes to detect printers. If the printer is not yet detected, connect
   the machine and the computer with a USB cable, then click Update.
- If the printer is being used from another computer, a screen is displayed informing you of this condition.

### Note

• This item has the same function as Refresh in the View menu.

# 4. Configuration...

Enabled when **Utilities** is selected. Click to display the **Configuration** screen to configure settings of the selected printer.

# >>> Note

• This item has the same function as **Configuration...** in the **Settings** menu.

# **Canon IJ Network Tool Menus**

This section describes the menus in Canon IJ Network Tool.

### 1. Canon IJ Network Tool menu

### **About Canon IJ Network Tool**

Displays the version of this application.

### **Quit Canon IJ Network Tool**

Exits IJ Network Tool.

### 2. View menu

### **Status**

Displays the **Status** screen to confirm the printer connection status and wireless communication status.

In the access point mode, this item is grayed out and you cannot confirm the printer connection status.

#### Refresh

Updates and displays the contents of **Printers:** to the latest information.

# Important

- To change the printer's network settings using IJ Network Tool, it must be connected via a LAN.
- If the printer on a network is not detected, make sure that the printer is turned on, then select
  Refresh. It may take several minutes to detect printers. If the printer is not yet detected, connect the
  machine and the computer with a USB cable, then select Refresh.
- If the printer is being used from another computer, a screen is displayed informing you of this condition.

# Note

• This item has the same function as **Update** in the **Canon IJ Network Tool** screen.

#### **Network Information**

Displays the **Network Information** screen to confirm the network settings of the printer.

# 3. Settings menu

### Configuration...

Displays the **Configuration** screen to configure settings of the selected printer.

# Note

• This item has the same function as Configuration... in the Canon IJ Network Tool screen.

#### Maintenance...

Displays the **Maintenance** screen to revert the network settings of the printer to factory default.

# Set up printer's wireless LAN...

You can change the access point mode settings. Perform settings following the message on the screen.

If you change the **Encryption Method**: setting and the **Password**: setting, on the **Set up printer's** wireless LAN screen, the changed settings are applied to the printer settings.

# >>> Note

• You can use this function only when you are using a computer compatible with the wireless LAN.

# 4. Help menu

# Instructions

Displays this guide.

# Changing the Settings in the Wireless LAN Sheet

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the machine after modifying the settings.

### Note

- This screen is not available depending on the printer you are using.
- · Activate the wireless LAN setting of the printer to change the settings in the Wireless LAN sheet.

### 1. Start up IJ Network Tool.

# 2. Select the printer in **Printers**:.

When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.

- 3. Click the **Configuration...** button.
- 4. Click the Wireless LAN button.
- 5. Change the settings or confirm.

Click **OK** after changing configuration. A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

# 1. Network Type:

Displays the wireless LAN mode currently selected.

# AirPort Network (Infra)

Connects the printer to the wireless LAN with an access point.

### Access point mode

Connects external wireless communication devices (e.g. computers, smartphones, or tablets) to the printer using it as an access point.

### Note

- When Access point mode is displayed on Network Type:, you cannot change the settings on the Wireless LAN sheet or the Admin Password sheet.
- You can perform setting from **Set up printer's wireless LAN...** on the **Settings** menu when you use the printer with the access point mode.

Depending on the printer you are using, you can change the settings using the operation panel.

### 2. Network (SSID):

The network name (SSID) of the wireless LAN currently used is displayed.

In the access point mode, the access point name (SSID) of the printer is displayed.

### Note

• Enter the same SSID that the access point is configured to use. The SSID is case-sensitive.

#### 3. Search...

The **Access Points** screen is displayed to select an access point to connect to.

MAccess Points Screen

### Note

When IJ Network Tool runs over a LAN, the button is grayed out and cannot be selected.
 Connect the printer and the computer with a USB cable temporarily to change the settings.

### 4. Encryption Method:

Select the encryption method used over the wireless LAN.

# >>> Important

- If all encryption types of the access point, printer, or computer do not match, the printer cannot communicate with the computer. If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point match that set to the printer.
- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

### Do Not Use

Select to disable encryption.

### **Use Password (WEP)**

Transmission is encrypted using a WEP key you specified.

If a network password (WEP) has not been set, the **WEP Details** screen is displayed automatically. To change WEP settings set before, click **Configuration...** to display the screen.

### ■ Changing the WEP Detailed Settings

### **Use WPA/WPA2**

Transmission is encrypted using a network key you specified.

The security has been strengthened more than WEP.

If a network key has not been set, the **Authentication Type Confirmation** screen is displayed automatically. To change network key settings before, click **Configuration...** to display the **WPA/WPA2 Details** screen.

Changing the WPA/WPA2 Detailed Settings

### 5. Configuration...

The detailed settings screen is displayed. The network password (WEP) or the WPA/WPA2 key selected in **Encryption Method:** can be confirmed and changed.

# For details on WEP setting:

Changing the WEP Detailed Settings

### For details on WPA/WPA2 setting:

■Changing the WPA/WPA2 Detailed Settings

### 6. TCP/IP Setting:

Sets the IP address of the printer to be used over the LAN. Specify a value appropriate for your network environment.

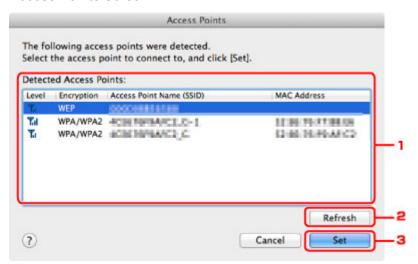

### Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your wireless LAN router or access point.

### Use following IP address

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a particular IP address or a fixed IP address.

### · Access Points Screen

### 1. Detected Access Points:

The signal strength from the access point, encryption type, name of access point, and the radio channel can be confirmed.

# >>>> Important

• If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

### >>> Note

· Signal strength is displayed as follows.

Good:

🏗 : Fair

T: Poor

· Type of encryption is displayed as follows.

Blank: No encryption **WEP**: WEP is set

WPA/WPA2: WPA/WPA2 is set

# 2. Refresh

Click to update the list of access points when your target access point is not detected.

If the target access point is set to a closed network (the stealth mode), click **Cancel** to return to the previous screen and enter the network name (SSID) in **Network (SSID)**.

### >>> Note

• Make sure that the access point is turned on.

### 3. **Set**

Click to set the network name (SSID) in Network (SSID): on the Wireless LAN sheet.

# >>>> Note

- The WEP Details screen or the WPA/WPA2 Details screen appears if the selected access
  point is encrypted. In this case, configure the details to use the same encryption settings set
  to the access point.
- Access points that cannot be used by this machine (including those configured to use different encryption methods) are displayed grayed out and cannot be configured.

# **Changing the WEP Detailed Settings**

# Note

· This screen is not available depending on the printer you are using.

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the machine after modifying the settings.

## 1. Start up IJ Network Tool.

### 2. Select the printer in **Printers**:.

When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.

- 3. Click the Configuration... button.
- 4. Click the Wireless LAN button.
- 5. Select Use Password (WEP) in Encryption Method: and click Configuration....

The WEP Details screen is displayed.

Change the settings or confirm.

When changing the password (WEP key), the same change must be made to the password (WEP key) of the access point.

# 1. Password (WEP Key):

Enter the same key as the one set to the access point.

The number of characters and character type that can be entered differ depending on the combination of the key length and key format.

		Key Length	
		64 bit	128 bit
Key Format	ASCII	5 characters	13 characters

	Hexadecimal ( <b>Hex</b> )	10 digits	26 digits
--	----------------------------	-----------	-----------

# 2. Key Length:

Select either 64 bit or 128 bit.

### 3. Key Format:

Select either ASCII or Hex.

### 4. Key ID:

Select the Key ID (index) set to the access point.

# Note

• When the printer is connected to an AirPort Base Station via a LAN:

When the printer is connected to an AirPort Base Station via a LAN, confirm the settings in **Wireless Security** of **AirPort Utility**.

- Select **64 bit** if **WEP 40 bit** is selected for the key length in the AirPort Base Station.
- Select 1 for **Key ID**:. Otherwise your computer will not be able to communicate with the printer via the access point.

### 5. Authentication:

Select the authentication method to authenticate the printer's access to the access point.

Normally, select **Auto**. If you want to specify the method manually, select **Open System** or **Shared Key** according to the setting of the access point.

### 7. Click OK.

# >>> Important

• If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point match that set to the printer.

# **Changing the WPA/WPA2 Detailed Settings**

# Note

• This screen is not available depending on the printer you are using.

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the machine after modifying the settings.

The example screenshots in this section refer to the WPA detailed settings.

- 1. Start up IJ Network Tool.
- 2. Select the printer in **Printers**:.

When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.

- 3. Click the **Configuration...** button.
- 4. Click the Wireless LAN button.
- 5. Select Use WPA/WPA2 in Encryption Method: and click Configuration....
- 6. Enter the passphrase, then click **OK**.

### 1. Passphrase:

Enter the passphrase set to the access point. The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

If you do not know the access point passphrase, refer to the instruction manual provided with the access point or contact its manufacturer.

### 2. Dynamic Encryption Type:

The dynamic encryption method is selected from either TKIP (basic encryption) or AES (secure encryption) automatically.

# >>> Important

 If Auto is not displayed on Dynamic Encryption Type:, select either TKIP(Basic Encryption) or AES(Secure Encryption). • If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point match that set to the printer.

# Note

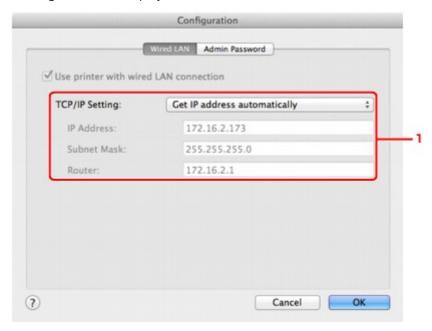

This machine supports WPA/WPA2-PSK (WPA/WPA2-Personal) and WPA2-PSK (WPA2-Personal).

# **Changing the Settings in the Wired LAN Sheet**

# Note

- · This screen is not available depending on the printer you are using.
- Activate the wired LAN setting of the printer to change the settings in the Wired LAN sheet.
- 1. Start up IJ Network Tool.
- 2. Select the printer in **Printers**:.
- 3. Click the **Configuration...** button.
- 4. Click the Wired LAN button.
- 5. Change the settings or confirm.

Click **OK** after changing configuration. A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

# 1. TCP/IP Setting:

Sets the IP address of the printer to be used over the LAN. Specify a value appropriate for your network environment.

# Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your router.

### Use following IP address

Select this option if no DHCP server functionality is available in your setup where you use the printer, or you want to use a particular IP address or a fixed IP address.

# **Changing the Settings in the Admin Password Sheet**

# Note

- · You cannot change the settings when using the access point mode.
- Start up IJ Network Tool.
- 2. Select the printer in **Printers**:.
- 3. Click the **Configuration...** button.
- 4. Click the Admin Password button.

The **Admin Password** sheet is displayed.

5. Change the settings or confirm.

### 1. Use admin password

Set an administrator password with privileges to set up and change detailed options. To use this feature, select this check box and enter a password.

# >>> Important

• The password should consist of alphanumeric characters and be no longer than 32 characters. The password is case-sensitive. Do not forget the password you set.

# 2. Password:

Enter the password to set.

### 3. Password Confirmation:

Enter the password again for confirmation.

### 6. Click OK.

A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

# **Enter Password Screen**

The following screen is displayed if an administrator password is set to the printer.

### Admin Password

Enter the administrator password that was set. For security purposes, your password is not displayed as you type it.

# >>> Important

• If you forget the administrator password you specified, initialize the printer to revert the password to the default setting.

### • OK

Click this item after you enter the administrator password.

### Cancel

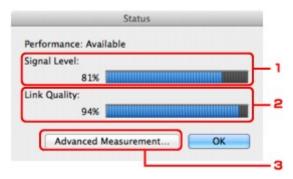

This item returns you to list of detected printers. If you do not enter the correct administrator password, you cannot operate the printer.

# **Monitoring Wireless Network Status**

### >>>> Note

- This screen is not available depending on the printer you are using.
- When using the machine over the wired LAN, you cannot monitor network status.
- 1. Start up IJ Network Tool.
- 2. Select the printer in **Printers**:.
- 3. Select **Status** from the **View** menu.

The **Status** screen is displayed and you can check the printer status and connection performance.

# 1. Signal Level:

Indicates the strength of the signal received by the printer, ranging from 0% to 100%.

# 2. Link Quality:

Indicates the signal quality excluding the noise while communicating, ranging from 0% to 100%.

# >>>> Important

• If the indicated value is low, move your printer closer to the wireless network device.

#### 3. Advanced Measurement...

Click to examine the connection performance between the printer and the access point. Follow the instructions on the screen to start measuring and display the status. Measurement takes a few minutes.

When so is displayed in Connection performance between the printer and the access point:, the printer can communicate with the access point. Otherwise, refer to displayed comments and Help for improving the status of communication link, and click **Remeasurement**.

- Check that the printer and the access point are located within the wireless connectivity range with no obstacles between them.
- Check if the distance between the printer and the access point is not too far. If they are too far, move them closer together (within 164 ft./50 m).
- Check that there is no barrier or obstacle between the printer and the access point.
   In general, connection performance decreases for communications through walls or between different floors. Adjust the locations to avoid such situations.
- · Check that there are no sources of radio interference near the printer and the access point.

The wireless connection may use the same frequency band as microwave ovens and other sources of radio interference. Try to keep the printer and the access point away from such sources.

- Check if the radio channel of the access point is close to that of other access points nearby.
   If the radio channel of the access point is close to that of other access points nearby, the connection performance may become unstable. Be sure to use a radio channel that does not interfere with other access points.
- Check that the printer and the access point face each other.
   Connection performance may depend on the orientations of the wireless devices. Replace the access point and the printer in another direction to achieve the best performance.
- · Check whether other computers are not accessing the printer.
  - If ② appears in the result of the measurement, check whether other computers are not accessing the printer.

If still appears even if you have tried the above, finish the measurement, then restart the IJ Network Tool to start over the measurement.

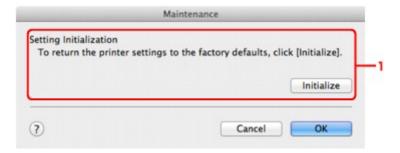

## Note

• If any messages appear on **Overall Network Performance**:, move the machine and access point as instructed to improve the performance.

# **Initializing the Network Settings of the Machine**

# >>> Important

- Note that initialization erases all network settings on the machine, and printing or scanning operation
  from a computer over network may become impossible. To use the machine over network, perform
  setup according to the instructions on our website.
- 1. Start up IJ Network Tool.
- 2. Select the printer in **Printers**:.
- 3. Select Maintenance... from the Settings menu.

### 1. Setting Initialization

#### Initialize

Reverts all the network settings of the printer to factory default.

# 4. Click Initialize.

The **Setting Initialization** screen is displayed.

Click **OK** to initialize the network settings of the printer. Do not turn off the printer during initialization.

Click **OK** when initialization is complete.

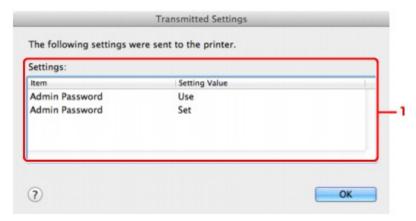

Performing initialization when connected over wireless LAN will break the connection, so perform setup according to the instructions on our website.

# Note

 You can change the network settings of the printer using IJ Network Tool with USB connection after initializing the LAN settings. To change the network settings using Canon IJ Network Tool, activate wireless LAN in advance.

# **Viewing the Modified Settings**

The **Confirmation** screen is displayed when you modified the printer settings on the **Configuration** screen. When you click **OK** on the **Confirmation** screen, the following screen is displayed for confirming the modified settings.

# 1. Settings:

A list of changes made in the **Configuration** screen is displayed.

# **Appendix for Network Communication**

- ➤ Using the Card Slot over a Network
- ➤ About Technical Terms
- **▶** Restrictions

# **Using the Card Slot over a Network**

# Note

- This screen is not available depending on the printer you are using.
- Mounting the Card Slot as the Network Drive
- Restrictions on Card Slot Use over a Network

# Mounting the Card Slot as the Network Drive

The card slot must be mounted to use it over a network.

To mount the card slot as the network drive, follow the procedure below.

- 1. Insert a memory card into the card slot of the machine.
- 2. Check the current printer name.

You can check the current printer name on the LCD of the printer.

- 3. On Finder, click the **Go** menu and **Connect to Server**.
- 4. Input "smb://xxxxxxxxxxx/canon\_memory/", then click **Connect**.

For example, if the current printer name is "123ABC000000", then input "smb://123ABC000000/canon\_memory/".

5. Make sure that the card slot is mounted.

When the card slot is mounted, the following icon appears on the desktop or in the **Computer** window on the **Go** menu of Finder.

### Note

- The authentication screen may appear. If it appears, you do not need to input the password.
- If you cannot mount the card slot with the method above, input the IP address of the machine
  instead of the current printer name, and try again. For example, "smb://192.168.1.1/
  canon\_memory/". If you mount the card slot with the IP address, you have to remount it
  whenever the machine's IP address changes.

### Restrictions on Card Slot Use over a Network

 You cannot write data to a memory card in the card slot over a network. You can only read data from a memory card.

- The card slot can be shared by multiple computers, if the machine is connected to a network. Multiple computers can read files from a memory card in the card slot at the same time.
- If your computer joins a domain, the card slot may not be mounted as the network drive.
- If you use the memory card stored the large size files or many files, a large amount of card access may be generated. In this case, the operation in the memory card may be impossible or slow. Operate after the **Access** lamp of the machine is lit.
- When you access the network drive for the card slot over the network, file names consisting of eight or less lowercase letters (not including its extension) may be shown in uppercase.
  - For example, a file name such as "abcdefg.doc" will be "ABCDEFG.DOC", while a name such as "AbcdeFG.doc" will appear the same.

The file is not actually renamed, but merely appears to be changed.

• Disable the function to write files to a memory card from a computer to read files from a memory card over a network.

# **About Technical Terms**

In this section, technical terms used in the manual are explained.

oo Doint		

#### Access Point

A wireless transceiver or base station that receives information from wireless clients/the machine and rebroadcasts it. Required in an infrastructure network.

### · Access point mode

The machine is used as an access point to connect external wireless communication devices (e.g. computers, smartphones, or tablets) in an environment where no access point or wireless LAN router is available. You can connect up to 5 devices to the machine using the access point mode.

### Ad-hoc

Client computer and machine setting where wireless communication occurs on a peer-to-peer basis, i.e., all clients in with the same SSID/network name communicate directly with each other. No access point is required. This machine does not support ad-hoc communication.

# Admin Password

Administrator password in IJ Network Tool to restrict access to network users. It must be entered to access the printer and change printer settings.

# · AES

An encryption method. It is optional for WPA/WPA2. Strong cryptographic algorithm adopted within U.S. government organizations for information processing.

### AirPort Network (Infra)

Client computer and machine setup where all wireless communications pass through an access point.

#### Authentication Method

The method that an access point uses to authenticate a printer through a wireless LAN. The methods are agreeable each other.

When using WEP as an encryption method, the authentication method is able to fix to **Open System** or **Shared Key**.

For WPA/WPA2, authentication method is PSK.

#### Auto

The printer automatically changes its authentication method to match the access point.

### Open System

In this authentication method, the communication partner is authenticated without using WEP key even if **Use Password (WEP)** is selected.

# Shared Key

In this authentication method, the communication partner is authenticated using the WEP key that was set for encryption.

# В

# Bonjour

A service built into Mac OS X operating system to detect the connectable devices on a network automatically.

# C

### Channel

Frequency channel for wireless communication. In the infrastructure mode, the channel is automatically adjusted to match that set to the access point. This machine supports channels 1 to 13. (Channels 12 and 13 are not supported depending on the country or region of purchase.) Note that the number of channels that can be used for your wireless LAN varies depending on the region or country.

### D

### DHCP server functionality

The router or the access point assigns an IP address automatically whenever the printer or the personal computer on a network starts up.

### DNS server

A server that converts device names into IP addresses. When specifying IP addresses manually, specify the addresses of both a primary and a secondary server.

### F

#### Firewall

It is a system that prevents an unlawful computer access in the network. To prevent, you can use the firewall function of a broadband router, the security software installed in the computer, or operation system for computer.

### I

# • IEEE 802.11b

International standard for wireless LAN using the 2.4 GHz frequency range with a throughput of up to 11 Mbps.

### • IEEE 802.11g

International standard for wireless LAN using the 2.4 GHz frequency range with a throughput of up to 54 Mbps. Compatible with 802.11b.

### • IEEE 802.11n

International standard for wireless LAN using the 2.4 GHz and 5 GHz frequency ranges. Even when using two or more antennas simultaneously or obtaining a bigger transfer rate than before by using multiple communication channels at the same time, the transmission speed may be influenced by the connected apparatus.

At the maximum transfer rate of 600 Mbps, it is possible to communicate with multiple computer terminals within a dozen or so metre radius.

Compatible with 802.11b and 802.11g.

### IP Address

A unique number with four parts separated by dots. Every network device that is connected to the Internet has an IP address. Example: 192.168.0.1

An IP address is usually assigned by an access point or a DHCP server of the router automatically.

# • IPv4/IPv6

They are internetwork-layer protocol used on the internet. IPv4 uses 32-bit addresses and IPv6 uses 128-bit addresses.

# K

### Key Format

Select either **ASCII** or **Hex** as the Password (WEP) key format. The character that can be used for the WEP key differs depending on the selected key formats.

### · ASCII

Specify with a 5 or 13-character string that can include alphanumeric and underscore "\_" characters. It is case-sensitive.

### Hex

Specify a 10-digit or 26-digit string that can contain hexadecimal (0 to 9, A to F, and a to f).

### · Key Length

Length of the WEP key. Select either 64 bits or 128 bits. Longer key length allows you to set a more complex WEP key.

### L

### Link Quality

The status of connection between the access point and the printer excluding noise (interference) is indicated with a value from 0 to 100%.

### • LPR

A platform-independent printing protocol used in TCP/IP networks. It is not supported bidirectional communication.

### M

### MAC Address (AirPort ID)

Also known as the physical address. A unique and permanent hardware identifier that is assigned to network devices by its manufacturer. MAC addresses are 48 bits long and are written as a hexadecimal number separated by colons, i.e., 11:22:33:44:55:66.

## Ν

# Network (SSID)

Unique label for wireless LAN. It is often represented such as a network name or a access point name.

SSID distinguishes one wireless LAN from another to prevent interference.

The printer and all clients on a wireless LAN must use the same SSID in order to communicate with each other. The SSID can be up to 32 characters long, and is made up of alphanumeric characters. The SSID may also be referred to by its network name.

### P

### Password (WEP)/Password (WEP Key)

An encryption method employed by IEEE 802.11. Shared security key used to encrypt and decrypt data sent over wireless networks. This printer supports key length of 64 bits or 128 bits, key format of ASCII code or Hexadecimal, and key number of 1 to 4.

#### Performance

Indicates the status on whether the printer can be used.

### Proxy server

A server that links a LAN-connected computer to the Internet. When using a proxy server, specify the address and the port number of the proxy server.

### PSK

An encryption method employed by WPA/WPA2.

# R

#### Router

A relay device to connect to another network.

### S

### · Signal Level

The strength of the signal received by the printer from the access point is indicated with a value from 0 to 100%.

### · SSID

Unique label for wireless LAN. It is often represented such as a network name or an access point name.

SSID distinguishes one wireless LAN from another to prevent interference.

The printer and all clients on a wireless LAN must use the same SSID in order to communicate with each other. The SSID can be up to 32 characters long, and is made up of alphanumeric characters. The SSID may also be referred to by its network name.

#### Stealth

In the stealth mode, an access point hides itself by not broadcasting its SSID. The client must specify the SSID set to the access point to detect it.

The stealth mode is called a "closed network".

### Subnet Mask Address

IP address has two components, the network address and the host address. Subnet Mask used to calculate the Subnet Mask address from the IP address. A Subnet Mask is usually assigned by an access point or a DHCP server of the router automatically.

Example:

IP Address: 192.168.127.123 Subnet Mask: 255.255.255.0

Subnet Mask Address: 192.168.127.0

### Т

### • TCP/IP

Suite of communications protocols used to connect hosts on the Internet or the LAN. This protocol allows different terminals to communicate with each other.

### TKIP

An encryption protocol employed by WPA/WPA2.

### U

#### USB

Serial interface designed to enable you to "hot-swap" devices, i.e., by plugging and unplugging them without turning off the power.

### W

### WEP/WEP Key

An encryption method employed by IEEE 802.11. Shared security key used to encrypt and decrypt data sent over wireless networks. This printer supports key length of 64 bits or 128 bits, key format of ASCII code or Hexadecimal, and key number of 1 to 4.

#### · Wi-Fi

International association that certifies interoperability of wireless LAN products based on the IEEE 802.11 specification.

This machine is a Wi-Fi authorized product.

#### Wireless LAN

A network that, instead of being connected by physical wires, is connected by a wireless technology, such as Wi-Fi.

#### WPA

Security framework announced by the Wi-Fi Alliance in October 2002. The security has been strengthened more than WEP.

#### Authentication

WPA defines the following authentication methods: WPA Personal that can be used without an authentication server, plus WPA Enterprise that do require an authentication server.

This machine supports WPA Personal.

### Passphrase

This encrypted key is used to perform WPA Personal authentication.

The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

### • WPA2

Security framework released by the Wi-Fi Alliance in September 2004 as a later version of WPA. Provides a stronger encryption mechanism through Advanced Encryption Standard (AES).

### Authentication

WPA2 defines the following authentication methods: WPA2 Personal that can be used without an authentication server, plus WPA2 Enterprise that do require an authentication server.

This machine supports WPA2 Personal.

### Passphrase

This encrypted key is used to perform WPA2 Personal authentication.

The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

# WPS (Wi-Fi Protected Setup)

WPS is a standard for easy and secure establishment of a wireless network.

There are 2 primary methods used in the Wi-Fi Protected Setup:

PIN entry: a mandatory method of setup for all WPS certified devices

Push button configuration (PBC): an actual push button on the hardware or through a simulated push button in the software.

# Restrictions

If you use a printer over the wireless LAN, the printer may recognize nearby wireless systems, you should set a network key (WEP or WPA/WPA2) to the access point to encrypt wireless transmission. Wireless communication with a product that does not comply with the Wi-Fi standard cannot be guaranteed.

Connecting with too many computers may affect the printer performance, such as printing speed.

# **Tips for Ensuring Optimal Printing Quality**

- ➤ Useful Information about Ink
- ➤ Key Points to Successful Printing
- ➤ Be Sure to Check Paper Settings before Printing
- ➤ Be Sure to Set Cassette Paper Information after Loading Paper
- Canceling a Print Job
- ➤ Key to Enjoying Consistent Printing Quality
- ➤ Precautions for Safe Transport of the Printer

### **Useful Information about Ink**

### How is ink used for various purposes other than printing?

Ink may be used for purposes other than printing.

When you use the Canon printer for the first time after you install the bundled ink tanks, the printer consumes a small amount of ink in the amount to enable printing by filling the nozzles of the Print Head with ink.

The printing costs described in the brochures or websites are based on the consumption data from not the first ink tank /ink cartridge but the succeeding ink tank /ink cartridge.

Ink is sometimes used to maintain the optimal printing quality.

To keep printer's performance, Canon printer performs cleaning automatically according to its condition. When the printer performs cleaning, a small amount of ink is consumed. In this case, all colors of ink may be consumed.

#### [Cleaning function]

The cleaning function helps the printer to suck air bubbles or ink itself from the nozzle and thus prevents print quality degradation or nozzle clogging.

### Does black-and-white printing use color ink?

Black-and-white printing may use ink other than black ink depending on the type of printing paper or the settings of the printer driver. So, color ink is consumed even when printing in black-and-white.

#### Note

• The printer uses pigment ink. Due to the nature of the pigment ink, the ink on the printed surface may be removed when being rubbed or scratched.

### **Key Points to Successful Printing**

### Check the printer status before printing!

• Is the print head OK?

If a print head nozzle is clogged, print will be faint and papers will be wasted. Print the nozzle check pattern to check the print head.

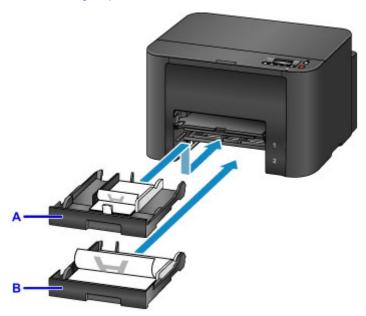

- Maintenance Procedure
- · Is the inside of the printer smeared with ink?

After printing large quantities of paper, the area where papers go through may get smeared with ink. Clean the inside of your printer with <u>Bottom Plate Cleaning</u>.

### Check how to load the paper correctly!

Is the paper loaded in the correct orientation?
 To load paper in a cassette, load paper WITH THE PRINTING SIDE FACING DOWN.

Loading Paper

A: cassette 1

B: cassette 2

· Is the paper curled?

The curled paper causes paper jam. Flatten the curled paper, then reload it.

■ "Load the paper after correcting its curl." in Paper Is Smudged/Printed Surface Is Scratched

### Be Sure to Check Paper Settings before Printing

Before printing, make paper settings in the computer screen.

There are various types of paper, such as paper with a special surface coating for printing photos at optimal quality and paper suitable for documents.

Each media type has specific preset settings (how ink is used and sprayed, distance from nozzles, etc.), that allow you to print to that type with optimal image quality. The wrong paper settings may cause poor printout color quality or scratches on the printed surface.

If you notice blurring or uneven colors, increase the print quality setting and try printing again.

### Be Sure to Set Cassette Paper Information after Loading Paper

When you insert a cassette into the printer after loading paper, the screen for setting the type and size of paper is displayed. Set the cassette paper information according to the type and size of loaded paper.

To prevent incorrect printing, this printer has a function that detects whether the information set for the paper loaded in the cassette matches the paper settings. Before printing, make paper settings in accordance with the cassette paper information. When this function is enabled, an error message is displayed if these settings do not match to prevent incorrect printing. When this error message is displayed, check and correct the paper settings.

To check cassette paper information, display the paper information screen on the operation panel.

# **Canceling a Print Job**

### **Never press the ON button!**

If you press the **ON** button while printing is in progress, the print data sent from the computer queues in the printer and you may not be able to continue to print.

Press the **Stop** button to cancel printing.

### **Key to Enjoying Consistent Printing Quality**

The key to printing with the optimal printing quality is to prevent the print head from drying or clogging. Always observe the following rules for optimal printing quality.

### Never unplug the power cord until the power is turned off!

If you press the **ON** button to turn off the power, the printer caps the print head (nozzles) automatically to prevent from drying. If you unplug the power cord from the wall outlet while the **POWER** lamp is lit or flashing, the print head will not be capped properly and this will cause drying or clogging.

When unplugging the power cord, make sure that the POWER lamp is not lit.

### **Print periodically!**

Just as the tip of a felt pen becomes dry and unusable if it has not been used for a long time, even if it is capped, the print head too, may become dried or clogged if the printer has not been used for a long time. We recommend you to use the printer at least once a month.

### Ink is mixed at fixed intervals.

The printer is set to automatically mix the ink to maintain optimal printing quality. Therefore, printing on a regular basis helps keep the ink in good condition.

If the printer is not used for an extended period of time, the printer will automatically mix the ink before printing.

### Note

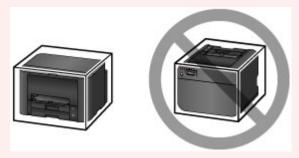

• Depending on the type of paper, ink may blur if you trace the printed area with a highlight pen or paint-stick, or bleed if water or sweat comes in contact with the printed area.

### **Precautions for Safe Transport of the Printer**

When relocating the printer, make sure of the following.

### >>>> Important

- Pack the printer in a sturdy box so that it is placed with its bottom facing down, using sufficient protective material to ensure safe transport.
- Always transport the printer with ink tanks installed. If you transport the printer without ink tanks, ink in the print head may leak.
- With the print head and ink tank left installed in the printer, press the **ON** button to turn off the power. This allows the printer to automatically cap the print head, thus preventing it from drying.
- After packing, do not tilt the box containing the printer or turn it on its side or upside down. Doing so may cause the ink to leak during transport and cause damage to the printer.
- When a shipping agent is handling transport of the printer, have its box marked "THIS SIDE UP" to keep the printer with its bottom facing down. Mark also with "FRAGILE" or "HANDLE WITH CARE".

- 1. Turn the printer off.
- 2. Confirm that the **POWER** lamp is off and unplug the power cord.

### Important

- Do not unplug the printer while the **POWER** lamp is lit or flashing, as it may cause malfunction or damage to the printer, making the printer unable to print.
- Remove the cassettes from the printer, then shorten it until the retraction position after removing paper.
  - Paper Sources to Load Paper
- 4. Close the paper output support, then retract the output tray extension and the paper output tray.
- 5. Reinsert the cassettes.
- 6. Unplug the printer cable from the computer and from the printer, then unplug the power cord from the printer.

7.	Use adhesive tape to secure all the covers on the printer to keep them from opening and to
	prevent the cassettes from falling out during transportation. Then pack the printer in the
	plastic bag.

8. Attach the protective material to the printer when packing the printer in the box.

# Legal Limitations on Use of Your Product and Use of Images

It may be unlawful to print the following documents.

The list provided is non-exhaustive. When in doubt, check with a legal representative in your jurisdiction.

- · Paper money
- · Money orders
- · Certificates of deposit
- Postage stamps (canceled or uncanceled)
- · Identifying badges or insignias
- · Selective service or draft papers
- · Checks or drafts issued by governmental agencies
- · Motor vehicle licenses and certificates of title
- · Traveler's checks
- Food stamps
- Passports
- · Immigration papers
- Internal revenue stamps (canceled or uncanceled)
- · Bonds or other certificates of indebtedness
- · Stock certificates
- · Copyrighted works/works of art without permission of copyright owner

# **Specifications**

# **General Specifications**

Printing resolution (dpi)	600 (horizontal) x 1200 (vertical)
Interface	USB Port:
	Hi-Speed USB *1
	LAN Port:
	Wired LAN: 100BASE-TX / 10BASE-T
	Wireless LAN: IEEE802.11n / IEEE802.11g / IEEE802.11b *2
	*1 A computer that complies with Hi-Speed USB standard is required. Since the Hi-Speed USB interface is fully upwardly compatible with USB 1.1, it can be used at USB 1.1.
	*2 Setup possible through WPS (Wi-Fi Protected Setup), WCN (Windows Connect Now) or Cableless setup.
	USB and LAN can be used at the same time.
	Wireless LAN and wired LAN cannot be used at the same time.
Print width	8 inches/203.2 mm
Operating environment	Temperature: 41 to 95 °F (5 to 35 °C)
	Humidity: 10 to 90 % RH (no condensation)
	* The performance of the printer may be reduced under certain temperature and humidity conditions.
	Recommended conditions:
	Temperature: 59 to 86 °F (15 to 30 °C)
	Humidity: 10 to 80 % RH (no condensation)
	* For the temperature and humidity conditions of papers such as photo paper, refer to the paper's packaging or the supplied instructions.
Storage environment	Temperature: 32 to 104 °F (0 to 40 °C)
	Humidity: 5 to 95 % RH (no condensation)
Power supply	AC 100-240 V, 50/60 Hz
Power consumption	Printing: Approx. 24 W
	Standby (minimum): Approx. 1.0 W *1*2
	<b>OFF:</b> Approx. 0.3 W *1
	*1 USB connection to PC
	*2 The wait time for standby cannot be changed.
External dimensions	Approx. 18.3 (W) x 15.5 (D) x 11.5 (H) inches
	Approx. 463 (W) x 394 (D) x 290 (H) mm
	* With the Paper Output Tray and Cassettes retracted.
Weight	Approx. 21.5 lb (Approx. 9.8 kg)
	* With the Print Head and ink tanks installed.
Print Head/Ink	Total 4352 nozzles (BK 1280 nozzles, C/M/Y 512 x 6 nozzles)

# **Network Specifications**

Communication protocol	TCP/IP
Wired LAN	Supported Standards: IEEE802.3u (100BASE-TX) / IEEE802.3 (10BASE-T)
	Transfer speed: 10 M/100 Mbps (auto switching)
Wireless LAN	Supported Standards: IEEE802.11n / IEEE802.11g / IEEE802.11b
	Frequency bandwidth: 2.4 GHz
	Channel: 1-11 or 1-13
	* Frequency bandwidth and available channels differ depending on country or region.
	Communication distance: Indoors 164 feet/50 m
	* Effective range varies depending on the installation environment and location.
	Security:
	WEP (64/128 bits)
	WPA-PSK (TKIP/AES)
	WPA2-PSK (TKIP/AES)
	Setup:
	WPS (Push button configuration/PIN code method)
	WCN (WCN-NET)
	Cableless setup
	Other Features: Administration password

# **Minimum System Requirements**

Conform to the operating system's requirements when higher than those given here.

### **Windows**

Operating System	Windows 8, Windows 8.1
	Windows 7, Windows 7 SP1
	Windows Vista SP1, Windows Vista SP2
	Windows XP SP3 32-bit only
	Printer driver only:
	Windows Server 2003*, Windows Server 2003 R2*, Windows Server 2008, Windows Server 2008 R2, Windows Server 2012, and Windows Server 2012 R2
	* XPS driver is not supported.
Browser	Internet Explorer 8 or later
Hard Disk Space	2.5 GB
	Note: For bundled software installation.
	The necessary amount of hard disk space may be changed without notice.
Display	XGA 1024 x 768

#### Mac OS

Operating System	Mac OS X v10.6.8 or later
Browser	Safari 5 or later
Hard Disk Space	0.5 GB
	Note: For bundled software installation.
	The necessary amount of hard disk space may be changed without notice.
Display	XGA 1024 x 768

### **Other Supported OS**

Some functions may not be available with each OS. Refer to the manual or the Canon web site for details on operation with iOS, Android, and Windows RT.

### **Mobile Printing Capability**

Apple AirPrint
Google Cloud Print
Print from E-mail
MAXIFY Cloud Link

- · An internet connection is required to view the Online Manual.
- Windows: Operation can only be guaranteed on a computer with Windows 8.1, Windows 8, Windows 7, Windows Vista or Windows XP pre-installed.
- Windows: A CD-ROM Drive or internet connection is required during software installation.
- Windows: Internet Explorer 8, 9, 10 or 11 is required to install Easy-WebPrint EX.
- · Windows: Some functions may not be available with Windows Media Center.
- Windows: .NET Framework 4 or 4.5 must be installed to use the Windows software.
- · Windows: XPS Essentials Pack is required to print on Windows XP.
- Mac OS: Hard Disk must be formatted as Mac OS Extended (Journaled) or Mac OS Extended.
- · Mac OS: For Mac OS, an internet connection is required during software installation.
- In an in-house network environment, the 5222 port must be open. Contact the network administrator for details.

Information in this guide is subject to change without notice.

### **Administrator Password**

Depending on the printer you are using, an administrator password is specified at the time of purchase.

The password is either "canon" or the printer serial number if it is specified.

#### Model whose administrator password is specified as "canon":

• The administrator password is specified as "canon" for the models below.

MG7500 series, MG6700 series, MG6600 series, MG5600 series

MG2900 series, MX490 series, MB5300 series, MB5000 series

MB2300 series, MB2000 series, E480 series, E460 series

iP110 series, iB4000 series, PRO-100S series, PRO-10S series

- At the time of purchase, the user name "ADMIN" is also specified for the models above.
- The following character restrictions apply to the password that you change:
  - Set the password by using 0 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters.
  - For security reasons, we recommend you use 6 and more alphanumeric characters.

#### Model whose serial number is used as the administrator password:

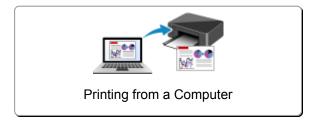

- For the models other than the above, the printer serial number is used as the administrator password.
  - ■Where Serial Number Is Located
- The following character restrictions apply to the password that you change:
  - Set the password by using 4 to 32 characters.
  - The allowed characters are single-byte alphanumeric characters.
  - For security reasons, we recommend you use 6 and more alphanumeric characters.

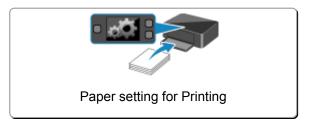

### >>>> Important

- You can change the password using one of the tools below. (Some tools may not be available depending on the printer you are using.)
  - operation panel of the printer
  - · IJ Network Tool
  - printer information screen displayed on some Canon application software
- If the password has been changed while you are sharing the printer and you do not know the password, ask the administrator of the printer you are using.
- Set the password back to the default setting by initializing the printer settings.

For more on initializing the printer, search for "UG067" or "UG505" on your printer's Online Manual and see the instructions shown.

# **Printing**

# **Printing from a Computer**

➤ Printing with Application Software that You are Using (Printer Driver)	

# Printing with Application Software that You are Using (Printer Driver)

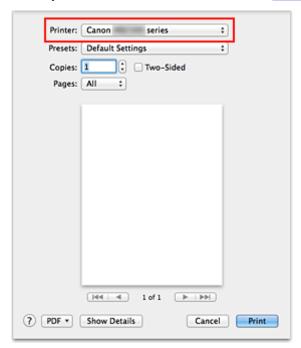

- ➤ Printing with Easy Setup ⊌Basic
- ➤ Various Printing Methods
- ➤ Changing the Print Quality and Correcting Image Data
- ➤ Overview of the Printer Driver

# **Printing with Easy Setup**

The simple setup procedure for carrying out appropriate printing on this printer is as follows:

- 1. Check that the printer is turned on
- 2. Load paper on the printer
- 3. Select the printer

Select your model from the **Printer** list in the **Print Dialog**.

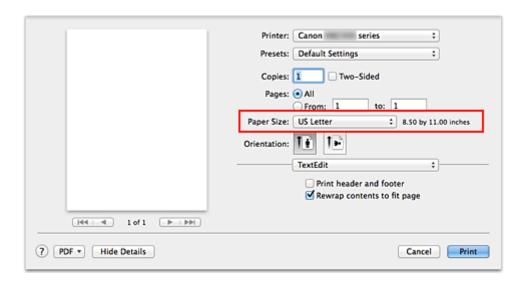

#### >>> Note

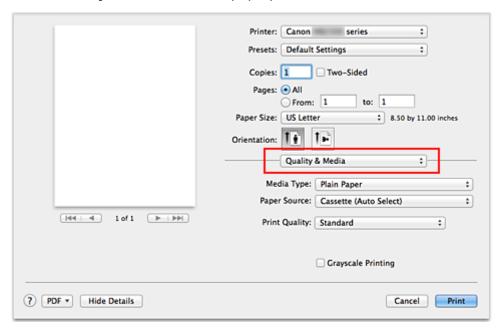

- Click **Show Details** ( (the disclosure triangle)) to switch the Setup window to the detailed display.
- 4. Select the paper size

For **Paper Size**, select the paper size to be used.

If necessary, set the number of copies, the pages to be printed, and the orientation.

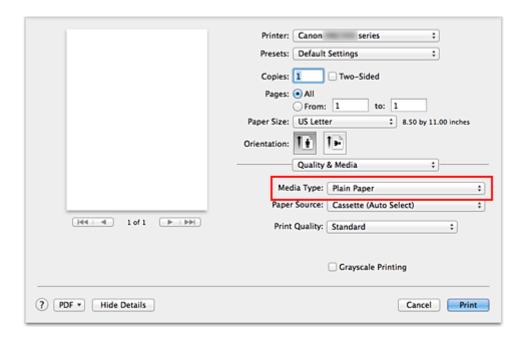

### 5. Select Quality & Media from the pop-up menu

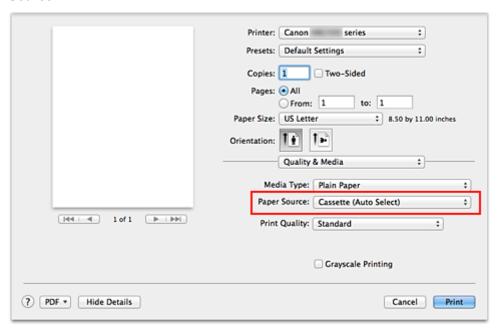

### 6. Select the media type

For **Media Type**, select the same paper type loaded in the printer.

### 7. Select the paper source

Select Cassette (Auto Select), Cassette 1, or Cassette 2 that matches your purpose for Paper Source.

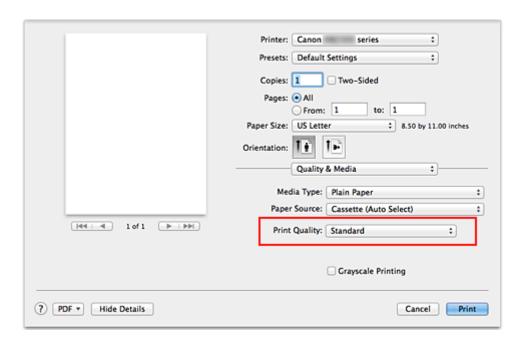

### >>>> Important

• The paper source settings that can be selected may differ depending on the paper type and size.

### 8. Select the print quality

For **Print Quality**, select **High** or **Standard** according to your purpose.

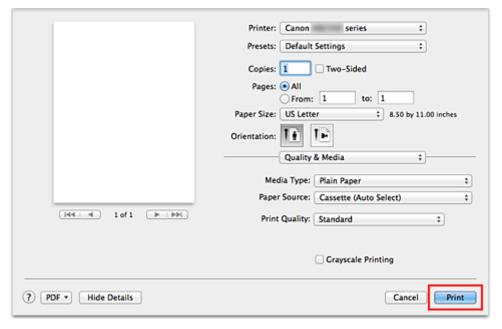

### >>> Important

• The print quality settings that can be selected may differ depending on a printing profile.

### 9. Complete the setup

#### Click Print.

When you execute print, the document will be printed in accordance with the type and size of the media.

### >>>> Important

• In the **Presets** section, click **Save Current Settings** as **Preset...** (**Save As...**) to <u>register the specified settings</u>.

#### >>> Note

• If the paper settings on the print dialog differ from the cassette paper information registered on the printer, an error may occur. For instructions on what to do if an error occurs, see "Paper setting for Printing."

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)

# Paper Settings on the Printer Driver and the Printer (Media Type)

When you use this printer, selecting a media type and <u>paper size</u> that matches the print purpose will help you achieve the best print results.

You can use the following media types on this printer.

### Commercially available papers

Media name	Media Type in the printer driver	Cassette paper information registered on the printer
Plain Paper (including recycled paper)	Plain Paper	Plain paper
Envelopes	Envelope	Envelope

### **Canon genuine papers (Photo Printing)**

# **Various Printing Methods**

- ➤ Setting the Number of Copies and Printing Order
- ➤ Setting the Stapling Margin
- ➤ Scaling the Printing to Fit the Paper Size
- Scaled Printing
- ➤ Page Layout Printing
- Duplex Printing
- ➤ Printing on Postcards
- ➤ Switching the Paper Source to Match the Purpose
- ➤ Displaying the Print Results before Printing
- ➤ Setting Paper Dimensions (Custom Size)

### **Setting the Number of Copies and Printing Order**

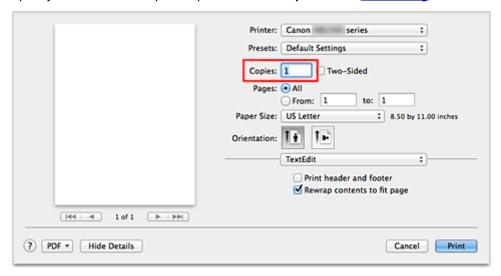

Collate pages + Reverse Collate pages + Normal Reverse

The procedure for specifying the number of copies and printing order is as follows:

1. Specify the number of copies to be printed

Specify the number of copies to print from the Copies in the Print Dialog.

- 2. Select Paper Handling from the pop-up menu
- 3. Check the **Collate pages** check box when you are specifying multiple copies in the **Copies** box

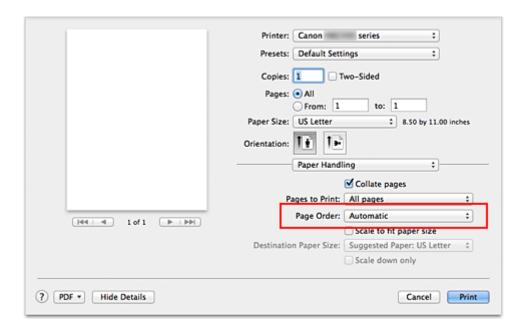

Check the **Collate pages** check box to print all the pages of a single copy together. Uncheck this check box to print all pages with the same page number together.

4. Specify the print order

Check Page Order.

When you select Automatic or Reverse, printing starts from the last page.

When you select **Normal**, printing starts from the first page.

### 5. Complete the setup

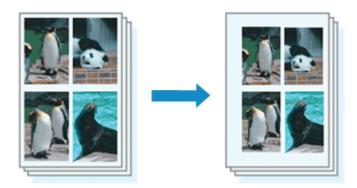

#### Click Print.

When you execute print, the specified number of copies will be printed with the specified printing order.

### >>>> Important

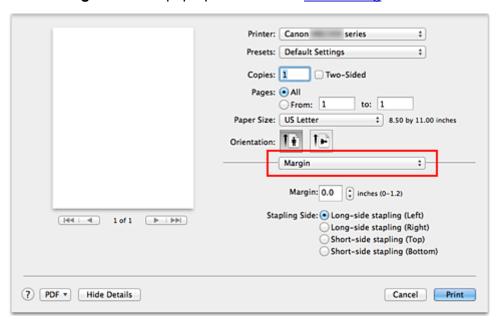

When the application software that you used to create the document has the same function, specify the
settings on the printer driver. However, if the print results are not acceptable, specify the function
settings on the application software. When you specify the number of copies and the printing order with
both the application software and this printer driver, the number of copies may be multiplied numbers of
the two settings or the specified printing order may not be enabled.

### **Setting the Stapling Margin**

The procedure for setting the margin width and the staple side is as follows:

1. Select Margin from the pop-up menu on the Print Dialog

2. Set the margin width and the staple side

If necessary, set the Margin width, and select a stapling position from the Stapling Side list.

- The printer automatically reduces the print area depending on the staple position margin.
- Depending on the **Two-Sided** setting in the **Layout** pop-up menu, the **Stapling Side** that can be selected differs.

### 3. Complete the setup

#### Click Print.

When you execute print, the data is printed with the specified margin width and staple side.

### Scaling the Printing to Fit the Paper Size

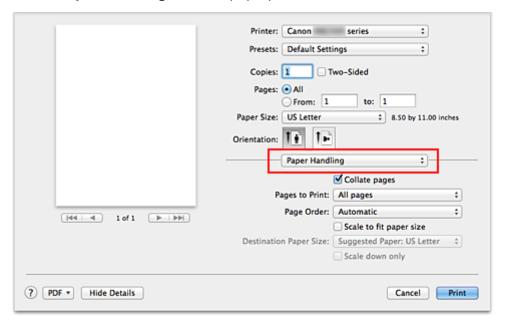

The procedure for printing a document that is automatically enlarged or reduced to fit the page size to be used is as follows:

### 1. Check the paper size

Check that the **Paper Size** in the <u>Print Dialog</u> is the same as the paper size that you set in the application software.

### 2. Select Paper Handling from the pop-up menu

### 3. Set the print paper size

Check the **Scale to fit paper size** check box. Then from the **Destination Paper Size** pop-up menu, select the paper size that is actually loaded in the printer.

### 4. If necessary, check the **Scale down only** check box

When you check this check box, the document will be reduced to fit to the paper size when the document size is larger than the page size. The document will be printed in the original size when the document size is smaller than the page size.

### 5. Complete the setup

### Click Print.

When you execute print, the document will be enlarged or reduced to fit to the page size.

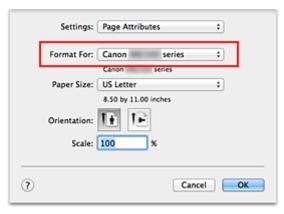

### **Scaled Printing**

The procedure for printing a document with pages enlarged or reduced is as follows:

### 1. Select the printer

In the <u>Page Setup Dialog</u>, select your model name from the **Format For** list.

### 2. Set scaled printing

Specify the scaling factor in the **Scale** box, and click **OK**.

### Note

• Depending on the **Scale** value that you set, an error message may be displayed.

### 3. Complete the setup

On the Print Dialog, click Print.

When you execute print, the document will be printed with the specified scale.

### >>>> Important

 When the application software which you used to create the original has the scaled printing function, configure the settings on your application software. You do not need to configure the same setting in the Page Setup dialog.

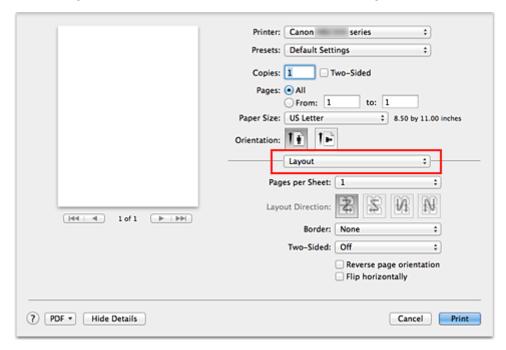

### **Page Layout Printing**

The page layout printing function allows you to print more than one page image on a single sheet of paper.

The procedure for performing page layout printing is as follows:

1. Select Layout from the pop-up menu in the Print Dialog

2. Set the number of original you print on one page

In **Pages per Sheet**, specify the number of page you print on one page.

3. If necessary, set the following items

### **Layout Direction**

To change the page placement order, select an icon from the list.

#### Border

To print a page border around each document page, select a type of page border.

#### Reverse page orientation

Select this check box to change the paper orientation.

#### Flip horizontally

Select this check box to reverse left and right of the document.

### 4. Complete the setup

### Click Print.

When you execute print, the specified number of pages will be arranged on each sheet of paper in the specified order.

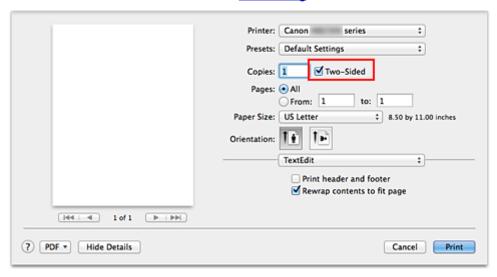

# **Duplex Printing**

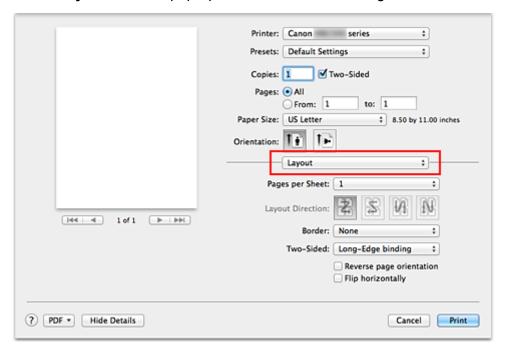

The procedure for printing data on both sides of one sheet of paper is as follows:

### 1. Set duplex printing

Check the Two-Sided check box in the Print Dialog.

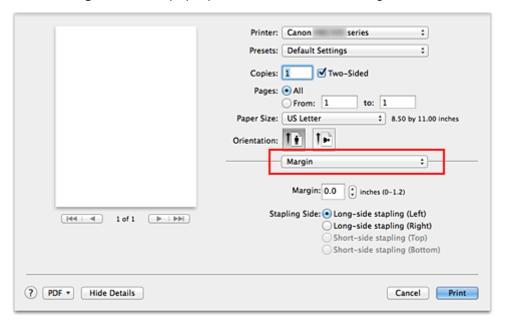

2. Select Layout from the pop-up menu on the Print Dialog

3. Set the stapling side

For Two-Sided, select either Long-Edge binding or Short-Edge binding.

4. Select Margin from the pop-up menu on the Print Dialog

### 5. Set the stapling margin

If necessary, set the Margin width, and to change the Stapling Side, select a setting from the list.

### Note

• Depending on the **Two-Sided** setting in the **Layout** pop-up menu, the **Stapling Side** that can be selected differs.

#### 6. Complete the setup

Click Print.

When you execute print, duplex printing will be started.

### >>>> Important

- When a media type other than Plain Paper is selected from Media Type menu of Quality & Media, duplex printing cannot be executed.
- Duplex printing can be performed only when one of the following paper sizes is selected from Paper
   Size.
  - US Letter, A4
- After printing the front page, there is an ink drying wait time before starting to print the back page (Operation stops temporarily). Do not touch the paper during this time. You can change the ink drying wait time from Custom Settings in the Canon IJ Printer Utility.

### Note

• When you use duplex printing, the print area becomes slightly smaller than the normal print area.

### **Related Topic**

■ Changing the Printer Operation Mode

### **Printing on Postcards**

This section describes the procedure for postcard printing.

- 1. Load postcard on the printer
- 2. Select paper size in the Print Dialog

Select Postcard or Postcard Double from the Paper Size menu.

### >>>> Important

- Return postcards can be used only when you print them from the computer.
- When printing a return postcard, always set the paper size to Postcard Double from your application software or the printer driver.
- Do not fold the return postcard. If a crease is formed, the printer will not be able to feed the postcard properly, and this condition will cause line shifts or a paper jam.
- 3. Select Quality & Media from the pop-up menu
- 4. Select the media type

For **Media Type**, select the same paper type loaded in the printer.

### >>> Important

- This printer cannot print on postcards that have photos or stickers attached.
- When printing on each side of a postcard separately, you will get cleaner printing if you print the message side first and then print the address side.
- The paper settings on the printer driver and the cassette paper information to register on the
  printer are different, depending on whether you are printing on the address side or the message
  side. For details about the cassette paper information to be registered on the printer, see the
  following:
  - Paper Settings on the Printer Driver and the Printer (Media Type)
  - Paper Settings on the Printer Driver and the Printer (Paper Size)

#### 5. Complete the setup

Click Print.

When you execute printing, the data will be printed onto the postcard.

### Switching the Paper Source to Match the Purpose

In this printer, there are two paper sources, a cassette 1 and a cassette 2.

You can facilitate printing by selecting a paper source setting that matches your media type or purpose.

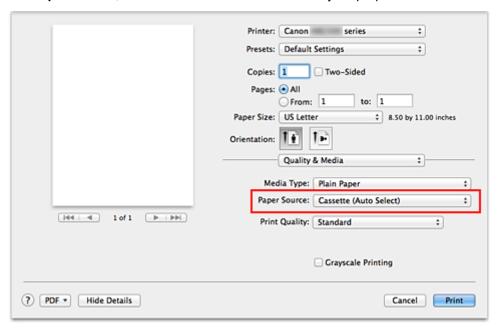

The procedure for setting paper source is as follows:

- 1. Select Quality & Media from the pop-up menu of the Print Dialog
- 2. Select the media type

For Media Type, select the same paper type loaded in the printer.

3. Select the paper source

For **Paper Source**, select the item below that matches your purpose.

#### Cassette (Auto Select)

Based on the paper settings on the print dialog and the cassette paper information registered on the printer, the printer automatically determines which cassette to use and feeds paper from that cassette.

#### Cassette 1

Paper is fed from the cassette 1.

#### Cassette 2

Paper is fed from the cassette 2.

### Important

- When a media type other than Plain Paper is selected for Media Type, paper cannot be supplied from the cassette 2.
- When a paper size other than **US Letter**, **US Legal**, or **A4** is selected for **Paper Size**, paper cannot be supplied from the cassette 2.

### 4. Complete the setup

#### Click Print.

When you execute print, the printer uses the specified paper source to print the data.

#### >>> Note

• If the paper settings on the print dialog differ from the cassette paper information registered on the printer, an error may occur. For instructions on what to do if an error occurs, see "Paper setting for Printing."

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)

# **Displaying the Print Results before Printing**

If you are using Mac OS X v10.6.8, you can display and check the print result before printing.

To display the print result before printing, click **Preview** on the <u>Print Dialog</u>.

#### >>>> Note

• When you click **(the disclosure triangle)** in the Print dialog and switch to the detailed display, **Preview** is not displayed.

For detailed display, a preview is displayed on the left side of the Print dialog.

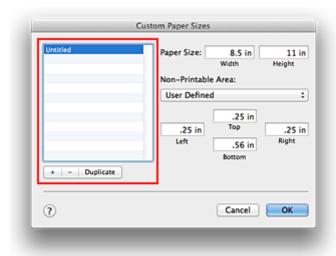

## **Setting Paper Dimensions (Custom Size)**

You can specify the height and width of paper when its size cannot be selected from the **Paper Size** menu. Such a paper size is called "custom size."

The procedure for specifying a custom size is as follows:

1. Creating a new custom paper size

In the <u>Print Dialog</u>, select **Manage Custom Sizes...** from **Paper Size**. In the **Custom Paper Sizes** dialog, click +.

Untitled will be added to the list.

2. Setting details about the custom paper size

Double-click **Untitled**, enter the name of the paper size you want to register, and specify the **Width** and **Height** of the paper for **Paper Size**.

Select **User Defined** or your model for **Non-Printable Area**, and enter the margins.

3. Registering the custom paper size

Click OK.

The custom size is registered.

#### Important

If the application software that created the document has a function for specifying height and width
values, use the application software to set the values. If the application software does not have such a
function or if the document does not print correctly, perform the above procedure from the printer driver
to set the values.

#### >>>> Note

- To duplicate the registered paper size, select the paper size that you want to duplicate from the **Custom Paper Sizes** list, and click **Duplicate**.
- To delete a registered paper size, select the paper size that you want to delete from the Custom Paper Sizes list, and click -.
- If the paper settings on the print dialog differ from the cassette paper information registered on the printer, an error may occur. For instructions on what to do if an error occurs, see "Paper setting for

## Printing."

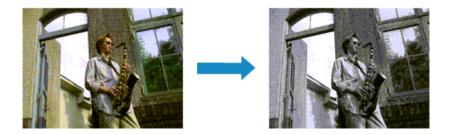

For details about the cassette paper information to be registered on the printer, see the following:

- Paper Settings on the Printer Driver and the Printer (Media Type)
- Paper Settings on the Printer Driver and the Printer (Paper Size)

## **Changing the Print Quality and Correcting Image Data**

- ➤ Printing a Color Document in Monochrome
- ➤ Specifying Color Correction
- Optimal Photo Printing of Image Data
- Adjusting Colors with the Printer Driver
- ➤ Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)
- ➤ Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)
- Adjusting Color Balance
- Adjusting Brightness
- ➤ Adjusting Intensity
- ➤ Adjusting Contrast

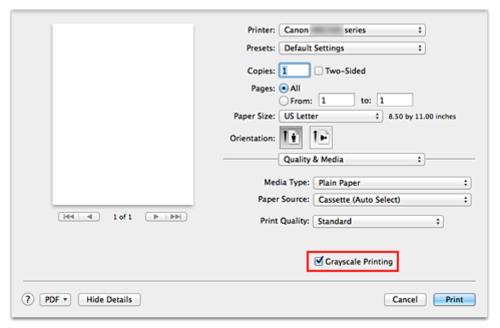

# **Printing a Color Document in Monochrome**

The procedure for printing a color document in monochrome is as follows:

- 1. Select Quality & Media from the pop-up menu on the Print Dialog
- 2. Set grayscale printing

Check the Grayscale Printing check box.

#### 3. Complete the setup

#### Click Print.

When you execute print, the document is converted to grayscale data. It allows you to print the color document in monochrome.

#### >>> Note

• During Grayscale Printing, inks other than black ink may be used as well.

## **Specifying Color Correction**

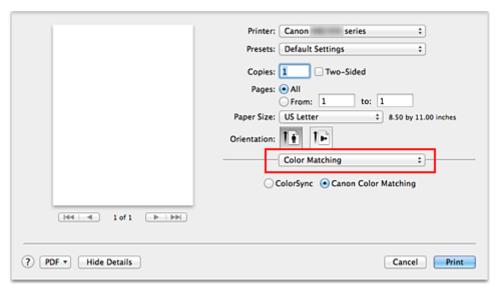

You can specify the color correction method suited to the type of document to be printed.

Normally, the printer driver adjusts the colors by using Canon Digital Photo Color so that data is printed with color tints that most people prefer.

When you want to print by using the color space (Adobe RGB or sRGB) of the image data effectively or by specifying a printing ICC profile from your application software, select **ColorSync**. When you want to print by having the printer driver correct the colors, select **Canon Color Matching**.

The procedure for specifying color correction is as follows:

#### 1. Select **Color Matching** from the pop-up menu of the <u>Print Dialog</u>

#### 2. Select color correction

Select the item below that matches your purpose.

#### ColorSync

Perform color correction using ColorSync.

#### **Canon Color Matching**

With Canon Digital Photo Color, you can print with color tints that most people prefer.

#### 3. Complete the setup

#### Click Print.

When you execute print, the document data is printed with the specified color correction.

#### >>>> Important

- Depending on the application software, when a printing ICC profile is specified from that application software, **Canon Color Matching** cannot be selected because **ColorSync** is selected automatically.
- The Quality & Media setting is necessary even when ColorSync or Canon Color Matching is selected.

- Optimal Photo Printing of Image Data
- Adjusting Colors with the Printer Driver

- Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)
- Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)

## **Optimal Photo Printing of Image Data**

When people print images taken with digital cameras, they sometimes feel that the printed color tones differ from those of actual image or those displayed on the monitor.

To get the print results as close as possible to the desired color tones, you must select a printing method that is best suited to the application software used or to your purpose.

## **Color Management**

Devices such as digital cameras, scanners, monitors, and printers handle color differently. Color management (color matching) is a method that manages device-dependent "colors" as a common color space.

For Mac OS, a color management system called "ColorSync" is built into the operating system. Adobe RGB and sRGB are popularly used as common color spaces. Adobe RGB has a wider color space than sRGB.

ICC profiles convert device-dependent "colors" into a common color space. By using an ICC profile and carrying out color management, you can draw out the color space of the image data within the color reproduction area that the printer can express.

## Selecting a Printing Method Suited to the Image Data

The recommended printing method depends on the color space (Adobe RGB or sRGB) of the image data or the application software to be used.

There are two typical printing methods.

Check the color space (Adobe RGB or sRGB) of the image data and the application software to be used, and then select the printing method suited to your purpose.

#### **Adjusting Colors with the Printer Driver**

Describes the procedure for printing by using the color correction function of the printer driver.

- · To print using Canon Digital Photo Color
  - The printer prints data with color tints that most people prefer, reproducing colors of the original image data and producing three-dimensional effects and high, sharp contrasts.
- · To print by directly applying editing and touch-up results of an application software
  - When printing the data, the printer brings out subtle color difference between dark and light areas, while leaving the darkest and lightest areas intact.
  - When printing the data, the printer applies fine adjustment results, such as brightness adjustments made with an application software.

#### Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

Describes the procedure for printing by using the color space of Adobe RGB or sRGB effectively.

You can print with a common color space by setting up the application software and the printer driver so that the color management matches the input ICC profile of the image data.

The method for setting up the printer driver differs depending on the application software to be used.

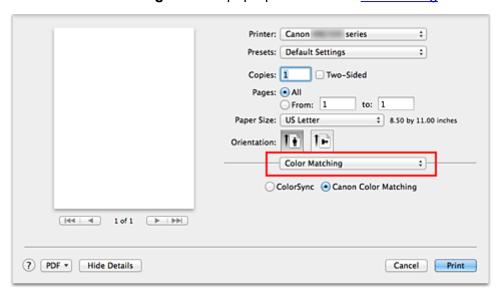

## **Adjusting Colors with the Printer Driver**

You can specify the color correction function of the printer driver to print with color tints that most people prefer through the use of Canon Digital Photo Color.

When printing from an application software that can identify ICC profiles and allows you to specify them, use a printing ICC profile in the application software, and select settings for color management.

The procedure for adjusting colors with the printer driver is as follows:

1. Select Color Matching from the pop-up menu of the Print Dialog

#### 2. Select color correction

Select Canon Color Matching.

#### 3. Set the other items

From the pop-up menu, select **Color Options**. If necessary, adjust the color balance (**Cyan**, **Magenta**, **Yellow**) and adjust **Brightness**, **Intensity**, and **Contrast** settings.

#### 4. Complete the setup

Click Print.

When you execute print, the printer driver adjusts the colors when printing the data.

- Specifying Color Correction
- Adjusting Color Balance
- Adjusting Brightness
- Adjusting Intensity
- Adjusting Contrast

# Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

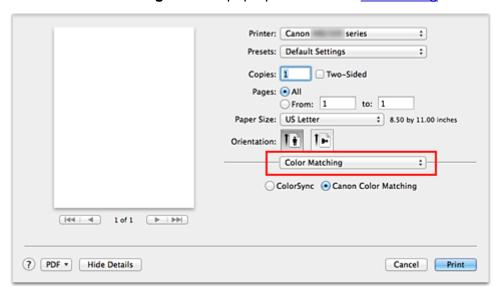

When you print from Adobe Photoshop, Canon Digital Photo Professional, or any application software that can identify input ICC profiles and allows you to specify such profiles, printer uses the color management system (ColorSync) built-into Mac OS when printing. The printer prints the editing and touch-up results of the application software and effectively uses the color space of the input ICC profile specified in the image data.

To use this printing method, use your application software to select color management items and specify an input ICC profile and a printing ICC profile in the image data.

Even if you print using a printing ICC profile that you created yourself from your application software, be sure to select color management items from your application software.

For instructions, refer to the manual of the application software you are using.

#### 1. Select Color Matching from the pop-up menu of the Print Dialog

#### 2. Select color correction

#### Select ColorSync.

You can leave Profile set to Automatic.

## Important

- Depending on the application software you use, you may not be able to select setting items other than ColorSync.
- If you choose a **Profile** setting other than **Automatic**, the printer will not be able to print with the correct colors.

#### 3. Complete the setup

Click Print

When you execute print, the printer uses the color space of the image data.

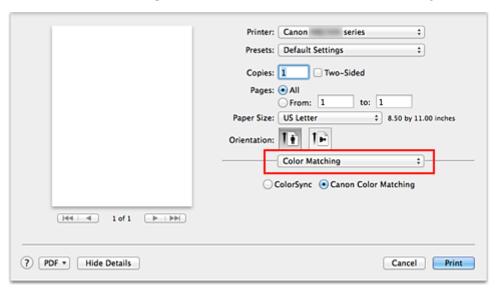

- **Specifying Color Correction**
- Adjusting Color Balance

- Adjusting Brightness
- **■** Adjusting Intensity
- Adjusting Contrast

# Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)

Print from an application software that cannot identify or specify input ICC profiles by using the color space of the input ICC profile (sRGB) found in the data.

1. Select Color Matching from the pop-up menu of the Print Dialog

#### 2. Select color correction

#### Select ColorSync.

You can leave Profile set to Automatic.

## >>> Important

- If you choose a **Profile** setting other than **Automatic**, the printer will not be able to print with the correct colors.
- 3. Complete the setup

#### Click Print

When you execute print, the printer uses the color space of the image data.

#### >>>> Important

· You cannot specify an input ICC profile from the printer driver.

- **Specifying Color Correction**
- Adjusting Color Balance
- M Adjusting Brightness
- Adjusting Intensity
- **Adjusting Contrast**

## **Adjusting Color Balance**

You can adjust the color tints when printing.

Since this function adjusts color balance of the output by changing the ink ratios of each color, it changes the total color balance of the document. Use the application software when you want to change the color balance significantly. Use the printer driver only when you want to adjust the color balance slightly. The following sample shows the case when color balance is used to intensify cyan and to diminish yellow so that the overall colors are more uniform.

No adjustment

Adjust color balance

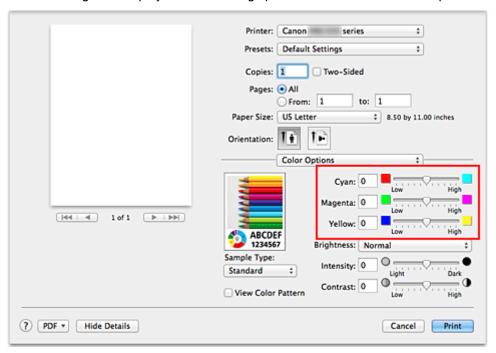

The procedure for adjusting color balance is as follows:

1. Select Color Options from the pop-up menu of the Print Dialog

#### 2. Adjust color balance

There are individual sliders for **Cyan**, **Magenta**, and **Yellow**. Each color becomes stronger when the corresponding slider is moved to the right, and becomes weaker when the corresponding slider is moved to the left. For example, when cyan becomes weaker, the color red becomes stronger.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

#### 3. Complete the setup

#### Click Print.

When you execute print, the document is printed with the adjusted color balance.

#### >>>> Important

- When the **Grayscale Printing** check box is checked for **Quality & Media**, the color balance (**Cyan**, **Magenta**, **Yellow**) appear grayed out and are unavailable.
- If you select **ColorSync** for **Color Matching**, then the color balance (**Cyan**, **Magenta**, **Yellow**) appear grayed out and are unavailable.

- Specifying Color Correction
- M Adjusting Brightness
- Adjusting Intensity
- Adjusting Contrast

## **Adjusting Brightness**

You can change the brightness of the overall image data during printing.

This function does not change pure white or pure black but it changes the brightness of the intermediate colors.

The following sample shows the print result when the brightness setting is changed.

Light is selected

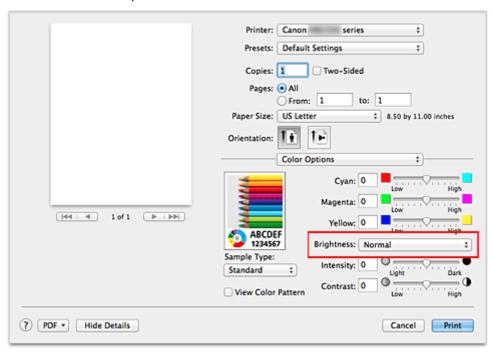

Normal is selected

Dark is selected

The procedure for adjusting brightness is as follows:

- 1. Select **Color Options** from the pop-up menu of the Print Dialog
- 2. Specify the brightness

Select **Light**, **Normal**, or **Dark** for **Brightness**. The current settings are displayed in the settings preview on the left side of the printer driver.

3. Complete the setup

Click Print.

When you execute print, the data is printed at the specified brightness.

## >>>> Important

 If you select ColorSync for Color Matching, then the Brightness appears grayed out and is unavailable.

- Specifying Color Correction
- Adjusting Color Balance
- Adjusting Intensity
- Adjusting Contrast

## **Adjusting Intensity**

You can dilute (brighten) or intensify (darken) the colors of the overall image data during printing.

The following sample shows the case when the intensity is increased so that all colors become more intense when the image data is printed.

No adjustment

Higher intensity

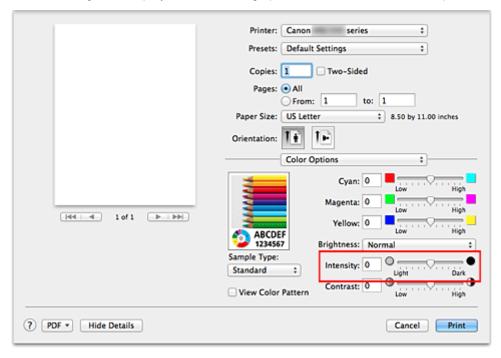

The procedure for adjusting intensity is as follows:

1. Select Color Options from the pop-up menu of the Print Dialog

#### 2. Adjust intensity

Moving the **Intensity** slider to the right intensifies (darkens) the colors, and moving the slider to the left dilutes (brightens) the colors.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

#### 3. Complete the setup

Click Print.

When you execute print, the image data is printed with the adjusted intensity.

#### Important

• If you select ColorSync for Color Matching, then the Intensity appears grayed out and is unavailable.

- Specifying Color Correction
- Adjusting Color Balance
- M Adjusting Brightness
- Adjusting Contrast

## **Adjusting Contrast**

You can adjust the image contrast during printing.

To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

No adjustment

Adjust the contrast

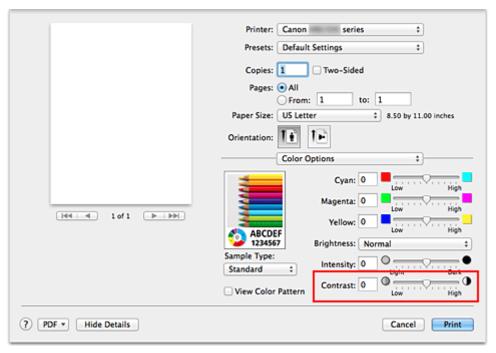

The procedure for adjusting contrast is as follows:

1. Select **Color Options** from the pop-up menu of the Print Dialog

#### 2. Adjust the contrast

Moving the **Contrast** slider to the right increases the contrast, and moving the slider to the left decreases the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

#### 3. Complete the setup

Click Print.

When you execute print, the image is printed with the adjusted contrast.

#### >>> Important

• If you select ColorSync for Color Matching, then the Contrast appears grayed out and is unavailable.

- ➤ Instructions for Use (Printer Driver)

## **Canon IJ Printer Driver**

The Canon IJ printer driver (called printer driver below) is a software that is installed on your computer for printing data with this printer.

The printer driver converts the print data created by your application software into data that your printer can understand, and sends the converted data to the printer.

Because different models support different print data formats, you need a printer driver for the specific model you are using.

## **Using Help of the Printer Driver**

You can display Help function from the Print Dialog.

Select a setup item from the pop-up menu in the Print dialog. Then click ? at the bottom left of the screen to display an explanation of the item.

Help for the printer driver is displayed when the following pop-up menu item is selected:

- · Quality & Media
- Color Options
- Margin

# **How to Open the Printer Driver Setup Window**

You can display the printer driver setup window from the application software you are using.

## **Opening the Page Setup Dialog**

Use this procedure to set the page (paper) settings before printing.

Select Page Setup... from the File menu of the application software
 The Page Setup Dialog opens.

## **Opening the Print Dialog**

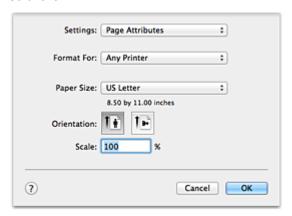

Use this procedure to set the print settings before printing.

Select **Print...** from the **File** menu of the application software
 The <u>Print Dialog</u> opens.

## **Page Setup Dialog**

In the Page Setup dialog, you configure the basic print settings such as the size of paper loaded in the printer or the scaling ratio.

To open the Page Setup dialog, you typically select **Page Setup...** from the **File** menu of your application software.

#### **Settings**

Click the pop-up menu, and then select the following items:

#### **Page Attributes**

Set the paper size or scaled printing.

#### Save as Default

You can save the attributes of the displayed page as the default settings.

#### **Format For**

Select the model to be used for printing.

#### Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select Manage Custom Sizes....

#### Orientation

Select the print orientation.

#### **Scale**

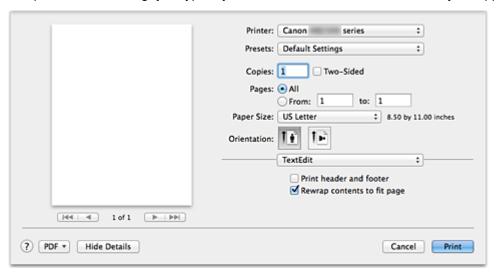

Set the scaling percentage.

You can expand or reduce the size of the document when printing.

## **Print Dialog**

In the Print dialog, you can set paper type, paper source and print quality to start printing.

To open the Print dialog, you typically select **Print...** from the **File** menu of your application software.

#### **Printer**

Select the model to be used for printing.

When you click **Add Printer...**, a dialog for specifying the printer opens.

#### **Presets**

You can save or delete the settings of the Print dialog.

#### Note

• If you are using OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7, you can select **Show Presets...** to check the print settings that are set in the Print dialog.

#### Copies

You can set the number of copies to be printed.

#### Note

- If you are using Mac OS X v10.6.8, you can also set collate printing.
- If you are using OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7, you can set collated printing by choosing **Paper Handling** from the pop-up menu.

#### Two-Sided

You can set duplex printing.

#### **Pages**

You can set the range of pages to be printed.

#### Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select Manage Custom Sizes....

#### Orientation

Select the print orientation.

#### Pop-up Menu

You can switch between pages in the Print dialog by the pop-up menu. The first menu to appear differs depending on the application software that opened the Print dialog.

You can choose one of the following items from the pop-up menu.

#### Layout

You can set page layout printing.

Use **Reverse page orientation** to change the paper orientation, and use **Flip horizontally** to print a mirror image of the document. You can also set duplex printing.

#### **Color Matching**

You can select the color correction method.

#### **Paper Handling**

You can set the pages to be printed on paper and the print order.

#### **Cover Page**

You can output cover pages both before and after a document.

#### **Scheduler**

You can set the print start time and print priorities.

#### **Quality & Media**

You can set basic print settings that match the printer.

#### **Color Options**

You can adjust the print colors as you desire.

#### Margin

You can set the stapling side and the stapling margin.

#### **Supply Levels**

A rough indication of the remaining ink level is displayed.

#### **Summary**

The selected items in the Print dialog are displayed.

#### >>>> Important

• If you are using OS X Mavericks v10.9, OS X Mountain Lion v10.8, or OS X Lion v10.7, you cannot use **Scheduler** and **Summary**.

#### **PDF**

You can save a document in PDF (Portable Document Format) format.

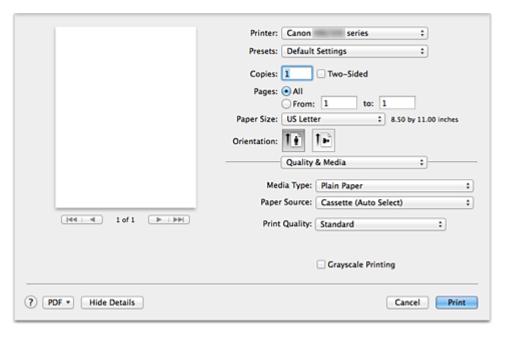

#### **Preview**

If you are using Mac OS X v10.6.8, when you click (the disclosure triangle) on the side of **Printer** and switch to the simple display, **Preview** is displayed.

This button allows you to check the print results on the screen before printing.

## **Quality & Media**

This dialog allows you to create a basic print setup in accordance with the paper type. Unless special printing is required, normal printing can be performed just by setting the items in this dialog.

#### Media Type

Select the type of media to be used.

You must select the type of media actually loaded in the printer. This selection enables the printer to carry out printing properly for the material of the media used.

#### **Paper Source**

Select the source from which paper is supplied.

#### Cassette (Auto Select)

Based on the paper settings on the print dialog and the cassette paper information registered on the printer, the printer automatically determines which cassette to use and feeds paper from that cassette.

#### Cassette 1

Paper is fed from the cassette 1.

#### Cassette 2

Paper is fed from the cassette 2.

#### **Print Quality**

Select the one that is closest to the original document type and the purpose.

When one of the radio buttons is selected, the appropriate quality will be set automatically.

#### High

Gives priority to print quality over printing speed.

#### Standard

Prints with average speed and quality.

#### **Grayscale Printing**

Set grayscale printing. Grayscale printing refers to the function of converting your document to grayscale data in the printer to print it in monochrome.

When you check the check box, both monochrome and color documents will be printed in monochrome.

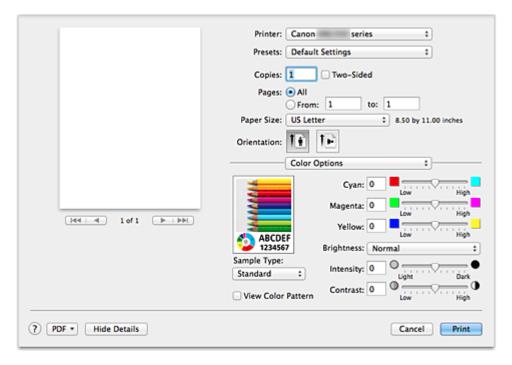

When printing a color document, be sure to uncheck the check box.

- Switching the Paper Source to Match the Purpose
- Printing a Color Document in Monochrome

## **Color Options**

This dialog allows you to adjust the print color as you like. If the color of the printed image is not as expected, adjust the properties in the dialog and retry printing.

The adjustments made here do not affect the colors of the original print data unlike application software dedicated to image processing. Use this dialog just to make fine adjustments.

#### **Preview**

Shows the effect of color adjustment.

As you adjust each item, the effects are reflected in the color and brightness.

#### Sample Type

Select an image that you want to display as a sample.

If necessary, select one from **Standard**, **Portrait**, **Landscape**, or **Graphics**, whichever is most similar to the print results.

#### View Color Pattern

Displays a pattern for checking color changes produced by color adjustment.

When you want to display the sample image with a color pattern, check this check box.

When you want to display the sample image with one that you selected with **Sample Type**, uncheck this check box.

#### Note

 When the Grayscale Printing check box is checked in the Quality & Media, the graphic is displayed in monochrome.

#### Color balance (Cyan, Magenta, Yellow)

If necessary, adjust the strength of each color. To strengthen a color, drag the slider to the right. To weaken a color, drag the slider to the left.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Adjusting the color balance will result in variations in the balance among the volumes of the individual color inks and hence in the hues of the document as a whole.

Use the printer driver only when adjusting the color balance slightly. To change the color balance significantly, use the application software.

#### **Brightness**

Select the brightness of printed images.

You cannot change the levels of pure white and black. You can change the contrast of the colors between white and black.

#### Intensity

Select this method to adjust the overall density of your print.

To increase the overall intensity, drag the slider to the right. To decrease the overall intensity, drag the slider to the left.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

#### **Contrast**

The Contrast function changes the differences between light and dark in images during printing. To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

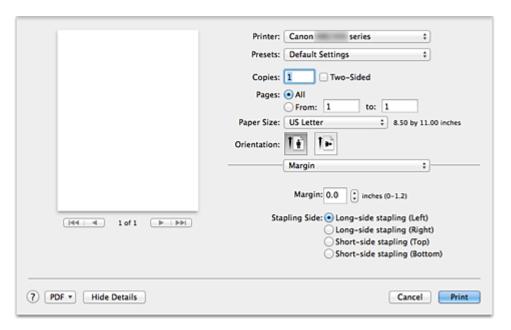

#### >>>> Important

- When the **Grayscale Printing** check box is checked for **Quality & Media**, the color balance (**Cyan**, **Magenta**, **Yellow**) appear grayed out and are unavailable.
- If you select ColorSync for Color Matching, then the color balance (Cyan, Magenta, Yellow), Brightness, Intensity, and Contrast appear grayed out and are unavailable.

- **Specifying Color Correction**
- M Adjusting Color Balance
- Adjusting Brightness
- Adjusting Intensity
- Adjusting Contrast

## Margin

This dialog allows you to set the stapling side and amount of margin for stapling multiple sheets of paper.

#### Margin

Specify the amount of margin space for stapling the paper. Enter a value between 0 inches (0 mm) to 1.2 inches (30 mm).

#### Stapling Side

Specify the stapling side.

#### Long-side stapling (Left) / Long-side stapling (Right)

Select this option to staple the long side of the paper.

Choose left or right.

#### Short-side stapling (Top) / Short-side stapling (Bottom)

Select this option to staple the short side of the paper.

Choose top or bottom.

- Setting the Stapling Margin
- Duplex Printing

## **Canon IJ Printer Utility**

The Canon IJ Printer Utility allows you to perform printer maintenance or change the settings of the printer.

## What You Can Do with the Canon IJ Printer Utility

You can switch between pages in Canon IJ Printer Utility by the pop-up menu. You can choose one of the following items from the pop-up menu.

#### Cleaning

Clean the printer to clear up clogged print head nozzle.

#### **Test Print**

Execute a test print to check the condition of the print head nozzle and to adjust the print head position.

#### **Power Settings**

Operate the power of this printer from the printer driver.

#### **Ink Level Information**

Check the remaining ink levels.

#### **Quiet Settings**

You can reduce the operating noise of the printer.

## **Custom Settings**

Change the settings of this printer.

## >>> Note

- To operate the Canon IJ Printer Utility, you must first turn on the printer.
- Depending on the items selected, the computer communicates with the printer to obtain information.
   If the computer is unable to communicate with the printer, an error message may be displayed.
   If this happens, click Cancel to display the most recent settings specified on your computer.

- Cleaning the Print Heads from Your Computer
- Use Your Computer to Print a Nozzle Check Pattern

- Aligning the Print Head Position from Your Computer
- Checking the Ink Status from Your Computer
- Managing the Printer Power
- Reducing the Printer Noise
- Changing the Printer Operation Mode

# **Opening the Canon IJ Printer Utility**

To open the Canon IJ Printer Utility, follow the steps below.

- 1. Open **System Preferences**, and select **Printers & Scanners** (**Print & Scan** or **Print & Fax**)
- 2. Start the Canon IJ Printer Utility

Select your model from the printer list, and click **Options & Supplies...**.

Click Open Printer Utility in Utility tab.

Canon IJ Printer Utility is launched.

## **Maintenance of this Printer**

- ➤ Cleaning the Print Heads from Your Computer
- ➤ Use Your Computer to Print a Nozzle Check Pattern
- ➤ Aligning the Print Head Position from Your Computer
- ➤ Checking the Ink Status from Your Computer
- ➤ Managing the Printer Power
- ➤ Reducing the Printer Noise
- ➤ Changing the Printer Operation Mode

### **Display the Printing Status Screen**

Check the print progress according to the following procedure:

#### 1. Launch the printing status screen

· If the print data has been sent to the printer

The printing status screen opens automatically. To display the printing status screen, click the (the printer icon) displayed on the Dock.

· If the print data has not been sent to the printer

Open System Preferences, and select Printers & Scanners (Print & Scan or Print & Fax). To display the printing status screen, select the name of your printer model from the printer list, and then click Open Print Queue....

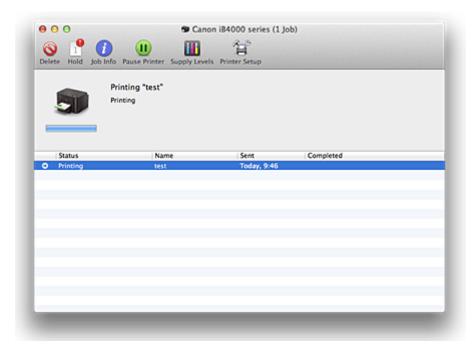

#### 2. Checking the printing status

You can check the name of the file being printed or ready for being printed.

• If you are using OS X Mavericks v10.9 or OS X Mountain Lion v10.8

- Deletes the specified print job.
- Stops printing the specified document.
- Resumes printing the specified document.
- Stops printing all documents.
- Displayed only when printing of all documents is being stopped, and resumes printing all documents.
  - If you are using OS X Lion v10.7 or Mac OS X v10.6.8

- O Deletes the specified print job.
- Stops printing the specified document.
- Resumes printing the specified document.
- Displays the print job information.
- Stops printing all documents.
- Displayed only when printing of all documents is being stopped, and resumes printing all documents.

# **Deleting the Undesired Print Job**

If the printer does not start printing, canceled or failed print job data may be remaining. Delete unnecessary print jobs from the print status check screen.

- Open System Preferences, and select Printers & Scanners (Print & Scan or Print & Fax)
- 2. Select your model, and then click Open Print Queue...

The print status check screen appears.

3. Select the unnecessary print job and click ⊗ (**Opelete**)

The selected print jobs will be deleted.

#### **Instructions for Use (Printer Driver)**

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

#### **Restrictions on the Printer Driver**

- When you set up the Page Setup dialog, be sure to begin by selecting the model you are using from the **Format For** list. If you select another printer, printing may not be performed properly.
- If the Canon IJ Printer Utility does not display the remaining ink level in the **Ink Level Information**, check whether the print head and the ink tank are properly installed.
- When the Canon IJ Printer Utility displays the **Ink Level Information**, close the front cover of the printer.
- The following functions cannot be used in Mac OS, though they can be used in Windows computers.
  - Duplex Printing (manual)
  - Booklet Printing
  - Tiling/Poster Printing
- Depending on the application software that you are using, a preview may not be displayed on the left side of the Print dialog.
- Do not start up the Canon IJ Network Tool while printing.
- Do not print when the Canon IJ Network Tool is running.
- If you connect this printer and AirPort with a USB cable and print, you must install the latest AirPort firmware.
- If you are using OS X Mavericks v10.9, close the print status check window when you perform printer maintenance from the Canon IJ Printer Utility.

#### Notes on Adding a Printer

- If you will be installing the Canon printer driver on Mac OS and using the printer through a network connection, you can select **Bonjour** or **Canon IJ Network** in the **Add (Add Printer)** dialog. Canon recommends you to use **Canon IJ Network** for printing.
  - If **Bonjour** is selected, remaining ink level messages may differ from those indicated by **Canon IJ Network**.

# **Updating the Printer Driver**

- ➤ Obtaining the Latest Printer Driver
- ➤ Delete the Unnecessary Canon IJ Printer from the Printer List
- ➤ Before Installing the Printer Driver
- ➤ Installing the Printer Driver

# **Obtaining the Latest Printer Driver**

By updating the printer driver to the latest version of the printer driver, unresolved problems may be solved.

You can access our website and download the latest printer driver for your model.

#### >>> Important

• You can download the printer driver for free, but any Internet access charges incurred are your responsibility.

#### **Related Topics**

- Before Installing the Printer Driver
- Installing the Printer Driver

#### **Delete the Unnecessary Canon IJ Printer from the Printer List**

A Canon IJ Printer that you no longer use can be deleted from the printer list.

Before deleting the Canon IJ Printer, disconnect the cable that connects the printer to the computer.

The procedure to delete the unnecessary Canon IJ Printer from the printer list is as follows:

You cannot delete the Canon IJ Printer unless you are logged in as a user with the administrative right. For information about an administrative user, refer to the user's manual for the Mac OS.

- Open System Preferences, and select Printers & Scanners (Print & Scan or Print & Fax)
- 2. Delete the Canon IJ Printer from the printer list

From the printer list, select the Canon IJ Printer to be deleted, and then click -.

Click **Delete Printer** when the confirmation message appears.

#### Note

• Even if a Canon IJ Printer is deleted from the printer list, you can re-register it automatically by connecting the printer and your computer with a USB cable.

## **Before Installing the Printer Driver**

This section describes the items that you should check before installing the printer driver. You should also refer to this section if the printer driver cannot be installed.

#### **Checking the Personal Computer Settings**

- · Terminate all running applications.
- Log on as a user who has the administrator account. The installer will prompt you to enter the name and password of the administrative user. When multiple users are using Mac OS, log on with the account of the administrator who registered first.

#### >>> Important

• When you upgrade Mac OS, all printer drivers that were installed will be deleted. If you plan to continue using this printer, re-install the latest printer driver.

#### **Related Topics**

- Obtaining the Latest Printer Driver
- Installing the Printer Driver

## **Installing the Printer Driver**

You can access our web site through the Internet and download the latest printer driver for your model.

The procedure for installing the downloaded printer driver is as follows:

#### 1. Mount the disk

Double-click the disk image file you have downloaded.

The file is unpacked, and then the disk is mounted.

#### 2. Start the installer

Double-click "PrinterDriver\_XXX\_YYY.pkg" (where "XXX" is your model name, and "YYY" is version) contained in the disk.

#### 3. Start the installation

Install the printer driver according to the messages on the screen.

When the Software License Agreement is displayed, check the contents, and click **Continue**. If you do not agree to the terms of the Software License Agreement, you cannot install this software.

#### 4. Selecting the install destination

If necessary, select where you want to install the printer driver, and then click Continue.

#### 5. Executing the installation

Click Install.

When the authentication screen is displayed, enter the name and password of the administrator, and then click **Install Software (OK)**.

#### 6. Complete the installation

When the completion message appears, click Close.

The printer driver is installed successfully.

#### >>> Important

- If the Installer does not operate properly, select **Quit Installer** from the **Installer** menu of the Finder to quit the Installer. Then start the Installer again.
- You can download the printer driver for free, but you are responsible for paying any connection fees to the Internet.

#### **Related Topics**

- Obtaining the Latest Printer Driver
- Delete the Unnecessary Canon IJ Printer from the Printer List
- Before Installing the Printer Driver

#### **Paper setting for Printing**

By registering the paper size and the media type loaded in the cassette, you can prevent the printer from misprinting by displaying the message before printing starts when the paper size or the media type of the loaded paper differs from the print settings.

• When you load paper in the cassette:

The screen to register the cassette paper information is displayed.

Register cassette 1 pape [OK]Next

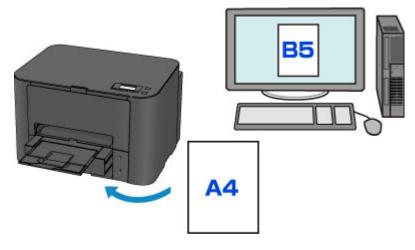

Press the **OK** button, then register the paper size and the media type according to the loaded paper.

#### >>> Important

- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer
  - ■Setting the Paper Size with the Printer Driver and on the Printer
- When the paper settings for printing are different from the cassette paper information registered to the printer:

Ex:

- Paper setting for printing: B5
- Cassette paper information registered to the printer: A4

When you start printing, a message is displayed.

Size/type of paper 2111 [OK]Select option

Confirm the message, then press the **OK** button. When the screen to select the operation is displayed, select one of the operations below.

#### Note

• Depending on the setting, the choices below may not be displayed.

#### Use cass. settings

Select if you want to print on the paper loaded in the cassette without changing the paper settings.

For example, when the paper setting for printing is B5 and the cassette paper information registered to the printer is A4, the printer starts printing with B5 on the paper loaded in the cassette.

#### Replace the paper

Select if you want to print after replacing the paper of the cassette.

For example, when the paper setting for printing is B5 and the cassette paper information registered to the printer is A4, you load B5 sized paper in the cassette before you start printing.

The cassette paper information registration screen is displayed after replacing the paper and inserting the cassette. Register the cassette paper information according to the paper you loaded in the cassette.

#### Note

- If you do not know what paper information to register to the printer, press the **Back** button when the screen to select the operation is displayed. When the previous screen is displayed, confirm the paper size and the media type, then register them to the printer.
- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - Setting the Media Type with the Printer Driver and on the Printer
  - ■Setting the Paper Size with the Printer Driver and on the Printer

#### **Cancel printing**

Cancels printing.

Select when you change the paper settings specified for printing. Change the paper settings, then try printing again.

#### >>> Note

- You can disable the message which prevents misprinting. When you disable the message, the
  printer starts printing even though the paper settings for printing and the cassette paper information
  registered to the printer are different.
  - To change the setting using the operation panel:
  - **■**Cassette settings
  - To change the setting using the printer driver:
    - Changing the Printer Operation Mode

# **Troubleshooting**

- ➤ The Printer Cannot Be Powered On
- ➤ Printing Does Not Start
- ➤ Paper Does Not Feed Properly/"No Paper" Error Occurs
- ➤ Print Results Not Satisfactory
- ➤ Ink Is Not Ejected
- ▶ Paper Jams
- ► If an Error Occurs

#### **Search Each Function**

# **Problems with the Printer While Using with Network**

- ➤ The Printer Stopped Working Suddenly
- ➤ Printing Speed Is Slow
- ➤ Cannot Use the Printer on Replacing an Access Point or Changing Its settings

#### The Printer Stopped Working Suddenly

- ■Cannot Communicate with the Printer over the Wireless LAN
- ■Cannot Communicate with the Printer Using the Access Point Mode
- ■Cannot Communicate with the Printer over the Wired LAN
- ■Cannot Print from a Computer Connected to the Network

# Cannot Communicate with the Printer over the Wireless LAN

Check1 Make sure that the printer is turned on.

Check2 Make sure that the network settings in the printer are identical with those of the access point.

Refer to the instruction manual provided with the access point or contact its manufacturer to check the access point settings, and then modify the printer settings.

How to Set an Encryption Key

Check3 Make sure that the printer is not placed far away from the access point.

The access point is located indoors within the effective range for wireless communication. Locate the printer within 164 ft. / 50 m from the access point.

Check4 Make sure that there is no obstruction.

Wireless communication between different rooms or floors is generally poor. Adjust the location of the devices.

Check5 Make sure that there is no source of radio wave interference in your vicinity.

If a device (e.g. microwave oven) using the same frequency bandwidth as the wireless station is placed nearby, the device may cause interference. Place the wireless station as far away from the interference source as possible.

Check6 Make sure that the network settings of the computer are correct.

For the procedures to connect a network device to the computer and set them up, refer to the instruction manual of your network device or contact its manufacturer.

Check7 Make sure that the radio status is good and adjust the installation positions while monitoring the radio status with IJ Network Tool.

Monitoring Wireless Network Status

Check8 Make sure that a valid wireless channel is used.

The wireless channel to be used may be limited depending on wireless network devices installed in the computer. Refer to the instruction manual provided with your computer or your wireless network device to specify the valid wireless channel.

Check9 Make sure that the channel confirmed in Check 8 can communicate with the computer.

If not, change the channel set to the access point.

Check10 Make sure that the firewall of the security software is disabled.

If the firewall function of your security software is turned on, a message may appear warning that Canon software is attempting to access the network. If the warning message appears, set the security software to always allow access.

If using any programs that switch the network environment, check their settings. Some programs will enable a firewall by default.

Check11 When using a router, connect the printer and computer to the LAN side (same network segment).

Check12 When the printer is connected to an AirPort Base Station via a LAN, use alphanumeric characters for the name of the network (SSID).

If the problem is not resolved, perform setup again according to the instructions on our website.

#### · For placement:

Make sure that there is no barrier or obstacle between the access point and the printer.

# Cannot Communicate with the Printer Using the Access Point Mode

Check1 Make sure that the printer is turned on.

Check2 Is Change LAN in LAN settings under Device settings set to LAN inactive, Wireless LAN active, or Wired LAN active?

Select AP mode active.

Check3 Is the printer selected to connect external communication devices (e.g. computers, smartphones, or tablets)?

Select an access point name (SSID) specified for the printer as a destination for external communication devices.

Check4 Enter a password if you specify it for the printer.

Check5 Make sure that external communication devices are not placed far away from the printer.

Do not locate external communication devices too far away from the printer.

Check6 Make sure that there is no obstruction.

Wireless communication between different rooms or floors is generally poor. Adjust the location of the devices.

Check7 Make sure that there is no source of radio wave interference in your vicinity.

If a device (e.g. microwave oven) using the same frequency bandwidth as the wireless station is placed nearby, the device may cause interference. Place the wireless station as far away from the interference source as possible.

Check8 Are you trying to connect 6 devices or more?

You can connect up to 5 devices using the access point mode.

# Cannot Communicate with the Printer over the Wired LAN

Check1 Make sure that the printer is turned on.

Check2 Make sure that the LAN cable is connected properly.

Make sure that the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

If the LAN cable is connected to the WAN side of the router, connect the cable to the LAN side of the router.

If the problem is not resolved, perform setup again according to the instructions on our website.

# Cannot Print from a Computer Connected to the Network

Check1 Make sure that the network settings of the computer are correct.

For the procedures to set up the computer, refer to the instruction manual of your computer or contact its manufacturer.

Check2 If the printer driver is not installed, install it.

Install the printer driver from our website.

Check3 When using wireless LAN, make sure that access control is not set to the access point.

For the procedures to connect an access point and set it up, refer to the instruction manual of your access point or contact its manufacturer.

#### >>> Note

• To check the MAC address or the IP address of the computer, see Checking the IP Address or the MAC Address of the Computer.

#### **Printing Speed Is Slow**

Check1 The printer may be printing out a large job issued from another computer.

Check2 When using wireless LAN, make sure that the radio status is good and adjust the installation positions while monitoring the radio status with IJ Network Tool.

#### ■Monitoring Wireless Network Status

Make sure that there is no barrier or obstacle between the access point and the printer. Wireless communication between different rooms or floors is generally poor. The metal, concrete, or timber including the metallic material, mud wall, or insulator may interrupt a wireless communication. If the printer cannot communicate with the computer over a wireless LAN for the wall material, place the printer and the computer in the same room or floor.

Check3 Make sure that there is no source of interference in your vicinity.

If a device (e.g. microwave oven) using the same frequency bandwidth as the wireless station is placed nearby, the device may cause interference. Place the wireless station as far away from the interference source as possible.

# Cannot Use the Printer on Replacing an Access Point or Changing Its settings

When you replace an access point, perform network setup of the printer again.

Perform network setup again according to the instructions on our website.

If the problem is not resolved, see below.

- ■Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering an Encryption
  Key to the Access Point
- When Encryption Is Enabled, Cannot Communicate With the Printer After the Encryption Type Was Switched on the Access Point

# Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering an Encryption Key to the Access Point

Check1 Confirm the access point setting.

Refer to the instruction manual provided with the access point or contact its manufacturer to confirm the access point setting. Make sure that the computer and the access point can communicate with each other under this setting.

Check2 If you are performing MAC address filtering or IP address filtering at the access point, confirm that the MAC address or IP address for both the computer or the network device and the printer are registered.

Check3 If you are using a WEP or WPA/WPA2 key, make sure that the encryption key for the computer or the network device and the printer matches that set to the access point.

Besides the WEP key itself, the key length, key format, the key ID to use, and the authentication method must match among the printer, the access point, and the computer.

Normally, select **Auto** for the authentication method. If you want to specify the method manually, select **Open System** or **Shared Key** according to the setting of the access point.

■How to Set an Encryption Key

# When Encryption Is Enabled, Cannot Communicate With the Printer After the Encryption Type Was Switched on the Access Point

If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point matches that set to the printer.

Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering an Encryption Key to the Access Point

#### **Cannot Detect a Printer on a Network**

- ➤ Cannot Detect the Printer When Setting up Network Communication
- ➤ The Printer Cannot Be Detected in the Wireless LAN
- > The Printer Cannot Be Detected in the Wired LAN

#### >>> Note

• You cannot use the wireless LAN and the wired LAN at the same time.

# **Cannot Detect the Printer When Setting up Network Communication**

If the printer could not be detected on the network when setting up the network communication, confirm the network settings before redetecting the printer.

- ■Cannot Detect the Printer during Wireless LAN Setup: Check 1
- MCannot Detect the Printer during Wired LAN Setup: Check 1

#### >>> Important

- If the printer cannot be detected while you are setting up the network communication using a USB cable, the printer may be in the access point mode. In this case, finish the access point mode and enable the wireless LAN, then try to redetect the printer.
  - ■Using the Printer with the Access Point Mode

#### Are the printer and network device (router, access point, etc.) turned on?

Make sure that the printer is turned on.

Confirming that the Power Is On

Make sure that the network device (router, access point, etc.) is turned on.

#### If the printer or the network device is turned off:

Turn on the printer or the network device.

After turning on the printer or the network device, it may take some time until ready for use. After a while just turning on the printer or the network device, click **Redetect** on the **Check Printer Settings** screen.

When the printer is detected, follow the instructions on the screen to continue to set up the network communication.

#### If the printer and the network device are turned on:

If the printer could not be detected after clicking **Redetect** even when the printer and the network device are turned on, or when you have turned them on, go to check 2.

■Cannot Detect the Printer during Wireless LAN Setup: Check 2

#### Is the wireless LAN setting of the printer enabled?

Make sure that the wi-fi or icon is displayed on the LCD.

#### If the icon is not displayed:

The wireless LAN setting of the printer is disabled. Enable the wireless LAN setting of the printer.

After enabling the wireless LAN setting, click **Back to Top** on the **Check Printer Settings** screen to try to set up the network communication from the beginning.

#### If the icon is displayed:

Go to check 3.

■Cannot Detect the Printer during Wireless LAN Setup: Check 3

#### Is the printer connected to the access point?

By using the icon on the LCD, make sure that the printer is connected to the access point.

## If the wifi icon is displayed:

The printer may be placed far away from the access point. Place the printer near the access point temporarily, then click **Redetect** on the **Check Printer Settings** screen.

When the printer is detected, follow the instructions on the screen to continue to set up the network communication.

If the printer cannot be detected, the printer is not connected to the access point. Connect the printer to the access point.

Click **Back to Top** on the **Check Printer Settings** screen to try to set up the network communication from the beginning.

# If the Wi-Fi icon is displayed:

Go to check 4.

■Cannot Detect the Printer during Wireless LAN Setup: Check 4

# Does the firewall function of your security software or operation system for computer interfere with setting up the network communication?

The firewall function of your security software or operation system for computer may limit communications between the printer and your computer. Confirm the setting of firewall function of your security software or operation system or the message appearing on your computer.

#### If the firewall function interferes with setting up:

When the message appears on your computer:

If the message warning that Canon software is attempting to access the network appears on the computer, set the security software to allow access.

· When the message does not appear on your computer:

Cancel to set up, then set the security software to allow Canon software\* to access the network.

\* Set the security software to allow **Setup.app**, **Canon IJ Network Tool.app**, **canonijnetwork.bundle**, **CIJScannerRegister.app**, **Canon IJ Scan Utility2.app**, and **CIJSUAgent.app** to access the network.

After setting the security software, try to set up the network communication from the beginning.

#### Note

• For the operation system firewall settings or the security software firewall settings, refer to the instruction manual of the computer or software, or contact its manufacturer.

#### If there is no problem with the firewall settings:

Go to check 5.

■ Cannot Detect the Printer during Wireless LAN Setup: Check 5

#### Check the settings of the access point.

Check the settings of the access point for the network connection such as IP address filtering, MAC address filtering, or DHCP function.

Make sure that the radio channel of the access point and that assigned to the printer are the same.

For details on how to check the settings of the access point, refer to the instruction manual supplied with the access point or contact its manufacturer.

#### Is the LAN cable connected, and are the printer and the router turned on?

Make sure that the LAN cable is connected.

Make sure that the printer is turned on.

Confirming that the Power Is On

Make sure that the router is turned on.

# If the LAN cable is connected and the printer or the network device is turned off:

Turn on the printer or the network device.

After turning on the printer or the network device, it may take some time until ready for use. After a while just turning on the printer or the network device, click **Redetect** on the **Check Printer Settings** screen.

When the printer is detected, follow the instructions on the screen to continue to set up the network communication.

# If the LAN cable is connected and the printer and the network device are turned on:

If the printer could not be detected after clicking **Redetect** even when the printer and the network device are turned on, or when you have turned them on, go to check 2.

■Cannot Detect the Printer during Wired LAN Setup: Check 2

# Are the computer and the router configured and can the computer connect to the network?

Make sure that you can view web pages on your computer.

#### If you cannot view any web pages:

Click **Cancel** on the **Check Printer Settings** screen to cancel to set up the network communication. After that, configure the computer and network device.

For the procedures, refer to the instruction manuals supplied with the computer and network device, or contact their manufacturers.

If you can view web pages after configuring the computer and network device, try to set up the network communication from the beginning.

#### If you can view web pages:

Go to check 3.

■Cannot Detect the Printer during Wired LAN Setup: Check 3

#### **Enable the wired LAN setting of the printer.**

Press the **Setup** button, then select **Device settings** and **LAN settings** in this order, then select **Wired LAN active** for **Change LAN**.

The LAN icon is displayed on the LCD.

#### The Printer Cannot Be Detected in the Wireless LAN

Check1 Make sure that the printer is turned on.

Check2 Is Change LAN in LAN settings under Device settings set to LAN inactive?

Check3 When the printer is connected to the computer temporarily using a USB cable, make sure that the USB cable is connected properly.

When you set up the wireless LAN connection or change the wireless LAN settings using IJ Network Tool through USB connection, make sure that the printer is connected to the computer with a USB cable securely.

Connecting the Printer to the Computer Using a USB Cable

Check4 Make sure that the printer setup is completed.

If not, perform setup according to the instructions on our website.

Check5 When using IJ Network Tool, click **Update** to search for the printer again.

Canon IJ Network Tool Screen

Check6 Make sure that the network settings in the printer are identical with those of the access point.

Refer to the instruction manual provided with the access point or contact its manufacturer to check the access point settings, and then modify the printer settings.

**■**How to Set an Encryption Key

Check7 Make sure that there is no obstruction.

Wireless communication between different rooms or floors is generally poor. Adjust the location of the devices.

Check8 Make sure that the printer is not placed far away from the access point.

The access point is located indoors within the effective range for wireless communication. Locate the printer within 164 ft. / 50 m from the access point.

Check9 Make sure that there is no source of radio wave interference in your vicinity.

If a device (e.g. microwave oven) using the same frequency bandwidth as the wireless station is placed nearby, the device may cause interference. Place the wireless station as far away from the interference source as possible.

Check10 Make sure that the network settings of the computer are correct.

Make sure that the computer can communicate with the access point over the wireless LAN.

Check11 Make sure that the firewall of the security software is disabled.

If the firewall function of your security software is turned on, a message may appear warning that Canon software is attempting to access the network. If the warning message appears, set the security software to always allow access.

If using any programs that switch the network environment, check their settings. Some programs will enable a firewall by default.

Check12 When using a router, connect the printer and computer to the LAN side (same network segment).

Check13 When the printer is connected to an AirPort Base Station via a LAN, use alphanumeric characters for the name of the network (SSID).

If the problem is not resolved, perform setup again according to the instructions on our website.

#### The Printer Cannot Be Detected in the Wired LAN

Check1 Make sure that the printer is turned on.

Check2 Is Change LAN in LAN settings under Device settings set to LAN inactive?

**LAN** settings

Check3 Make sure that the LAN cable is connected properly.

Make sure that the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

If the LAN cable is connected to the WAN side of the router, connect the cable to the LAN side of the router.

#### **Other Problems with Network**

- ➤ Forgot an Access Point Name, SSID, or a Network Key
- > The Message Is Displayed on the Computer Screen During Setup
- ➤ The Administrator Password Set to the Printer Was Forgotten
- ➤ Checking Information about the Network
- ➤ How to Restore the Printer's Network Settings to Factory Default

#### Forgot an Access Point Name, SSID, or a Network Key

- ■Cannot Connect with an Access Point to Which a WEP or WPA/WPA2 Key Is Set (You Forgot the WEP or WPA/WPA2 Key)
- How to Set an Encryption Key

# Cannot Connect with an Access Point to Which a WEP or WPA/WPA2 **Key Is Set (You Forgot the WEP or WPA/WPA2 Key)**

For information on how to set up the access point, refer to the instruction manual provided with the access point or contact its manufacturer. Make sure that the computer and the access point can communicate with each other.

After that, set up the printer to match the settings of the access point using IJ Network Tool.

# How to Set an Encryption Key

For information on how to set up the access point, refer to the instruction manual provided with the access point or contact its manufacturer. Make sure that the computer and the access point can communicate with each other.

After that, set up the printer to match the settings of the access point using IJ Network Tool.

#### When using WEP

The key length, key format, the key to use (one of 1 to 4), and the authentication method must match among the access point, the printer, and the computer.

In order to communicate with an access point that uses automatically generated WEP keys, you must configure the printer to use the key generated by the access point by entering it in hexadecimal format.

Normally, select Auto for the authentication method. Otherwise, select Open System or Shared Key according to the setting of the access point.

When the WEP Details screen appears after clicking Set on the Access Points screen, follow the on-screen instructions and set the key length, the key format, the key number, and the authentication to enter a WEP key.

For details, see Changing the WEP Detailed Settings.

#### >>> Note

- When the printer is connected to an AirPort Base Station via a LAN:
  - When the printer is connected to an AirPort Base Station via a LAN, confirm the settings in Wireless Security of AirPort Utility.
    - Select **64 bit** if **WEP 40 bit** is selected for the key length in the AirPort Base Station.

• Select **1** for **Key ID**:. Otherwise your computer will not be able to communicate with the printer via the access point.

#### When using WPA/WPA2

The authentication method, passphrase, and dynamic encryption type must match on the access point, the printer, and the computer.

Enter the passphrase configured on the access point (a sequence of between 8 and 63 alphanumeric characters, or a 64-character hexadecimal number).

Either TKIP (basic encryption) or AES (secure encryption) is selected automatically for the dynamic encryption method.

For details, see Changing the WPA/WPA2 Detailed Settings.

#### >>> Note

This printer supports WPA/WPA2-PSK (WPA/WPA2-Personal) and WPA2-PSK (WPA2-Personal).

## The Message Is Displayed on the Computer Screen During Setup

- ■The Enter Password Screen Is Displayed During Setup
- ■The Screen for Setting the Encryption Is Displayed After Selecting the Access Point in the Access Points
  Screen
- "You are connecting the printer to the non encrypted wireless network" Is Displayed

## The Enter Password Screen Is Displayed During Setup

The following screen is displayed if an administrator password is set to the printer which has already been set up to use via a network.

Enter the administrator password you have set.

#### Note

- An administrator password is already specified for the printer at the time of purchase.
  - For details:
  - MAbout the Administrator Password

For improving security, it is recommended to change the administrator password.

■Changing the Settings in the Admin Password Sheet

# The Screen for Setting the Encryption Is Displayed After Selecting the Access Point in the Access Points Screen

This screen is displayed automatically if the selected access point is encrypted. In this case, configure the details to use the same encryption settings set to the access point.

For information on the encryption settings, see Changing the Settings in the Wireless LAN Sheet.

# "You are connecting the printer to the non encrypted wireless network" Is Displayed

Security is not configured on the access point. The printer can still be used, so continue the setup procedure to complete it.

## >>> Important

• If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

# The Administrator Password Set to the Printer Was Forgotten

Initialize the printer settings.

Select All data, then the administrator password reverts to the default.

#### **■**Reset setting

After initializing the printer settings, perform setup according to the instructions on our website.

## **Checking Information about the Network**

- ■Checking the IP Address or the MAC Address of the Printer
- ■Checking the IP Address or the MAC Address of the Computer
- ■Checking If the Computer and the Printer, or Computer and the Access Point Can Communicate
- ■Checking the Network Setting Information

# Checking the IP Address or the MAC Address of the Printer

To check the IP address or the MAC address of the printer, print out the network setting information using the operation panel of the printer.

Printing Out Network Setting Information

To display the network setting information using IJ Network Tool, select **Network Information** on the **View** menu.

Canon IJ Network Tool Menus

## Checking the IP Address or the MAC Address of the Computer

To check the IP address or MAC address assigned to the computer, follow the procedure below.

- 1. Select **System Preferences** from the Apple menu, then click **Network**.
- 2. Make sure that the network interface you are using on your computer is selected, then click **Advanced**.
  - In Mac OS X v10.9, Mac OS X v10.8, or Mac OS X v10.7:
    - When you are using wireless LAN on your computer, make sure that **Wi-Fi** is selected as the network interface. When you are using wired LAN, make sure that **Ethernet** is selected.
  - In Mac OS X v10.6.8:
    - When you are using wireless LAN on your computer, make sure that **AirMac** is selected as the network interface. When you are using wired LAN, make sure that **Ethernet** is selected.
- 3. Confirm the IP address or MAC address.
  - In Mac OS X v10.9, Mac OS X v10.8, or Mac OS X v10.7:
    - Click TCP/IP to confirm the IP address.
    - Click Hardware to confirm the MAC address.
  - In Mac OS X v10.6.8:
    - Click TCP/IP to confirm the IP address.

# Checking If the Computer and the Printer, or Computer and the Access Point Can Communicate

To check that communication is available, perform the ping test.

- 1. Open the **Utilities** folder in the **Applications** folder.
- 2. Start Network Utility.
- 3. Click the **Ping** button.
- 4. Make sure that **Send only XX pings** (XX are numbers) is selected.
- 5. Enter the IP address of the target printer or the target access point in **Enter the network** address to ping.
- 6. Click Ping.

"XXX.XXX.XXX.XXX" is the IP address of the target device.

A message such as the following is displayed.

64 bytes from XXX.XXX.XXX.XXX: icmp\_seq=0 ttl=64 time=3.394 ms

64 bytes from XXX.XXX.XXX.XXX: icmp\_seq=1 ttl=64 time=1.786 ms

64 bytes from XXX.XXX.XXX.XXX: icmp\_seq=2 ttl=64 time=1.739 ms

--- XXX.XXX.XXX ping statistics ---

3 packets transmitted, 3 packets received, 0% packet loss

If the packet loss is 100%, the communication is not available. Otherwise, the computer is communicating with the target device.

## Checking the Network Setting Information

To check the network setting information of the printer, print out the network setting information using the operation panel of the printer.

■ Printing Out Network Setting Information

## **How to Restore the Printer's Network Settings to Factory Default**

## >>> Important

• Note that initialization erases all network settings on the printer, and printing operation from a computer over network may become impossible. To use the printer over network, perform setup according to the instructions on our website.

Select **Reset LAN settings** on the operation panel of the printer to initialize the network setting.

Reset setting

# **Problems with Printing**

- ➤ Printing Does Not Start
- ➤ Paper Jams
- ➤ Paper Does Not Feed Properly/"No Paper" Error Occurs
- ➤ Cannot Print Properly with Automatic Duplex Printing
- ➤ Printing Stops Before It Is Completed

## **Printing Does Not Start**

Check1 Make sure that the power plug is securely plugged in, then press the **ON** button to turn the printer on.

While the **POWER** lamp is flashing, the printer is initializing. Wait until the **POWER** lamp stops flashing and remains lit.

#### >>> Note

 When printing large data such as a photo or graphics, it may take longer to start printing. While the POWER lamp is flashing, the computer is processing data and sending it to the printer. Wait until printing starts.

Check2 Make sure that the printer is connected to your computer properly.

When the printer is connected to your computer with a USB cable, make sure that the USB cable is securely plugged in to the printer and the computer, then check the followings:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
- There could also be a problem with the USB cable. Replace the USB cable and try printing again.

When you use the printer over LAN, make sure that the printer is connected to the network with a LAN cable or is set up correctly.

Check3 Is the access point mode enabled?

When you print using a mode other than the access point mode, disable the access point mode in advance.

Check4 Are the paper settings identical with those registered to the cassette?

When the paper settings are not identical with those registered to the cassette, an error message is displayed. Resolve the error according to the instructions on the LCD.

Paper Setting for Printing

#### Note

- · You can disable the message which prevents misprinting.
  - To change the setting using the operation panel:
    - **Cassette settings**
  - To change the setting using the printer driver:
    - **■**Changing the Printer Operation Mode

Check5 If there are any unnecessary print jobs, delete them.

Deleting the Undesired Print Job

Check6 Make sure that your printer's name is selected in the Print dialog.

The printer will not print properly if you are using a printer driver for a different printer.

Make sure that your printer's name is selected in **Printer** in the Print dialog.

#### >>>> Note

• To make the printer the one selected by default, select the printer for **Default printer**.

Check7 Restart your computer.

## **Paper Jams**

When paper is jammed, a troubleshooting message is displayed automatically. Take the appropriate action described in the message.

• When a Support Code and a message are displayed on the computer screen:

- \* The screen differs depending on the OS you are using.
- When a Support Code and a message are displayed on the LCD:

For details on how to remove the jammed paper, refer to Support Code List (When Paper Is Jammed).

#### >>> Note

- You can confirm the actions against errors with Support Codes on your computer or on the LCD by searching a Support Code.
  - **■**Click Here to Search

## Paper Does Not Feed Properly/"No Paper" Error Occurs

Check1 Make sure that paper is loaded.

**Loading Paper** 

Check2 Make sure of the following when you load paper.

When loading two or more sheets of paper, flip through the paper before loading. In addition, when you load
paper with some paper remaining in the cassette, flip through the remaining paper and the newly loaded
paper before loading.

- When loading two or more sheets of paper, align the edges of the sheets before loading.
- When loading two or more sheets of paper, make sure that the paper stack does not exceed the paper load limit.

However, proper feeding of paper may not be possible at this maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature and humidity). In such cases, reduce the sheets of paper you load at a time to less than half of the paper load limit.

- Always load the paper in portrait orientation, regardless of the printing orientation.
  - **M**Loading Paper

#### Important

- When loading paper in the cassette, slide the paper guide on the front side to align with the corresponding mark of page size. Load the paper with the print side facing DOWN, load the paper stack in the center of the cassette, then slide the paper guides to align with the both edges of the paper stack.
  - **■**Loading Paper

Check3 Check to see if the paper you are printing on is not too thick or curled.

Media Types You Cannot Use

Check4 Make sure of the following when you load Hagakis or envelopes.

• If a Hagaki is curled, it may not feed properly even though the paper stack does not exceed the paper load limit.

Load Hagakis with a zip code column toward the far end of the cassette 1.

• When printing on envelopes, refer to Loading Paper, and prepare the envelopes before printing.

Once you have prepared the envelopes, load them in portrait orientation. If the envelopes are placed in landscape orientation, they will not feed properly.

Check5 Confirm that the media type and the paper size settings correspond with the loaded paper.

Check6 Clean the paper feed roller.

Cleaning the Paper Feed Roller

#### >>> Note

• Cleaning the paper feed roller will wear the roller, so perform this procedure only when necessary.

Check7 If two or more sheets of paper feed from the cassette at once, clean the inside of the cassette.

For information on cleaning the inside of the cassette, refer to Cleaning the Pad in the Cassette.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

## **Cannot Print Properly with Automatic Duplex Printing**

Check1 Is the setting for automatic duplex printing selected?

Make sure that the Two-Sided check box is selected on the Print dialog.

#### Duplex Printing

Check2 Make sure that the actual size of the paper is suitable for automatic duplex printing.

The sizes of media suitable for automatic duplex printing are A4 and Letter.

Load paper of suitable size, then press the **OK** button on the printer.

Check3 Make sure that the paper size setting is correct.

Make sure that the paper size setting matches the actual size of the paper with a size suitable for automatic duplex printing.

First, check the paper size setting in the application software you are printing from.

Then, check the Paper Size on the Page Setup dialog.

#### Note

• Duplex printing may not be available depending on the version of the application software.

Check4 Make sure that the media type setting is correct.

Make sure that the media type setting matches the actual size of the paper with a size suitable for automatic duplex printing.

Make sure that the type of loaded paper is suitable for automatic duplex printing on the **Quality & Media** sheet on the Print dialog.

#### >>> Note

· Manual duplex printing is not available.

## **Printing Stops Before It Is Completed**

Check1 Is the paper loaded?

Make sure that paper is loaded.

If the printer has run out of paper, load paper.

Check2 Do the printing documents have lots of photographs or illustrations?

As printing large data such as photos or graphics takes time for the printer and the computer to process, the printer may appear to have stopped operating.

In addition, when printing data that uses a large amount of ink continuously on plain paper, the printer may pause temporarily. In either case, wait until the process is complete.

#### >>> Note

• If you are printing a document with a large printing area or printing multiple copies of a document, printing may pause to allow the ink to dry.

## Check3 Has the printer been printing continuously for a long period?

If the printer has been printing continuously for a long time, the print head or other parts around it may overheat. The printer may stop printing at a line break for a period of time and then resume printing.

In this case, wait for a while without operation. If the printing still does not resume, interrupt your print session at a convenient time and turn the printer off for at least 15 minutes.

#### Caution

• The print head and the surrounding area can become extremely hot inside the printer. Never touch the print head or nearby components.

# **Problems with Printing Quality**

- ➤ Print Results Not Satisfactory
- ➤ Ink Is Not Ejected

## **Print Results Not Satisfactory**

If the print result is not satisfactory due to white streaks, misaligned lines, or uneven colors, confirm the paper and print quality settings first.

Check1 Do the page size and media type settings match the size and type of the loaded paper?

When these settings are incorrect, you cannot obtain a proper print result.

If you are printing a photograph or an illustration, incorrect paper type settings may reduce the quality of the printout color.

Also, if you print with an incorrect paper type setting, the printed surface may be scratched.

Confirm the page size and media type settings using the printer driver.

Printing with Easy Setup

Check2 Make sure that the appropriate print quality is selected using the printer driver.

Select a print quality option suitable for the paper and image for printing. If you notice blurs or uneven colors, increase the print quality setting and try printing again.

You can confirm the print quality setting using the printer driver.

**■**Changing the Print Quality and Correcting Image Data

Check3 If the problem is not resolved, there may be other causes.

See also the sections below:

- Cannot Print to End of Job
- ■No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks
- Lines Are Misaligned
- Printed Paper Curls or Has Ink Blots
- ■Paper Is Smudged/Printed Surface Is Scratched
- ■Back of the Paper Is Smudged
- Colors Are Uneven or Streaked

# **Cannot Print to End of Job**

Check Is the space of your computer's hard disk sufficient?

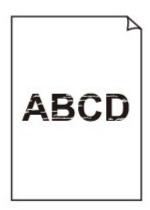

Delete unnecessary files to free disk space.

# No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks

No Printing Results

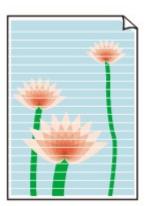

Printing Is Blurred

## **Colors Are Wrong**

## White Streaks

Check1 Did you confirm the paper and print quality settings?

Print Results Not Satisfactory

Check2 Check the status of ink tanks. Replace the ink tank if the ink has run out.

Replacing an Ink Tank

Check3 Print the Nozzle Check Pattern and perform any necessary maintenance operations such as Print Head Cleaning.

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to When Printing Becomes Faint or Colors Are Incorrect for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

· If the Nozzle Check Pattern is not printed correctly:

Check to see if a particular color's ink tank is not empty.

If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.

• If the problem is not resolved after performing the Print Head Cleaning twice:

Perform the Print Head Deep Cleaning.

If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.

• If the problem is not resolved after performing the Print Head Deep Cleaning twice:

If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged. Contact the service center.

Check4 When using paper with one printable surface, make sure that the paper is loaded with the printable side facing down.

Printing on the wrong side of such paper may cause unclear prints or prints with reduced quality.

Load paper with the printable side facing down.

Refer to the instruction manual supplied with the paper for detailed information on the printable side.

## **Lines Are Misaligned**

Check1 Did you confirm the paper and print quality settings?

Print Results Not Satisfactory

Check2 Perform Print Head Alignment.

If printed lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

Aligning the Print Head

#### Note

• If the problem is not resolved after performing the Print Head Alignment, perform Print Head Alignment manually referring to Aligning the Print Head Position Manually from Your Computer.

Check3 Increase the print quality and try printing again.

Increasing the print quality in the printer driver may improve the print result.

## **Printed Paper Curls or Has Ink Blots**

Printed Paper Has Ink Blots

.

Printed Paper Curls

Check1 Did you confirm the paper and print quality settings?

Print Results Not Satisfactory

Check2 If the intensity is set high, reduce the intensity setting and try printing again.

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

You can confirm the intensity using the printer driver.

**Adjusting Intensity** 

Check3 Is Photo Paper used for printing photographs?

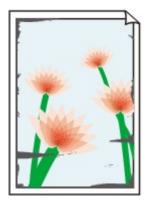

When printing data with high color saturation such as photographs or images in deep color, we recommend using Photo Paper Plus Glossy II or other Canon speciality paper.

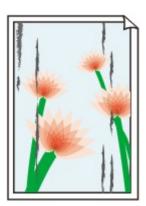

■ Media Types You Can Use

## Paper Is Smudged/Printed Surface Is Scratched

## Paper Is Smudged

The Edges of Paper Are Smudged Printed Surface Is Smudged

Printed Surface Is Scratched

Check1 Did you confirm the paper and print quality settings?

■Print Results Not Satisfactory

Check2 Is the appropriate type of paper used?

Check to see if the paper you are printing on is suitable for your printing purpose.

Media Types You Can Use

Check3 Load the paper after correcting its curl.

When using Photo Paper Plus Semi-gloss, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

We recommend putting unused paper back into the package and keeping it on a level surface.

#### · For Plain Paper

Turn the paper over and reload it to print on the other side.

#### For Other Paper

If the curl on the four corners of the paper is more than 0.1 inch / 3 mm (A) in height, the paper may be smudged or may not be fed properly. In such cases, follow the procedure described below to correct the paper curl.

1. Roll up the paper in the opposite direction to the paper curl as shown below.

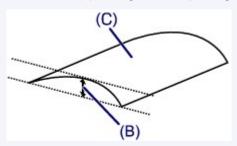

2. Check that the paper is now flat.

We recommend printing curl-corrected paper one sheet at a time.

#### Note

 Depending on the media type, the paper may be smudged or may not be fed properly even if it is not curled inward. In such cases, follow the procedure described below to curl the paper outward within 0.1 inch / 3 mm (B) in height before printing. This may improve the print result.

(C) Printing side

We recommend printing paper that has been curled outward one sheet at a time.

#### Check4 Adjust the setting to prevent paper abrasion.

Adjusting the setting to prevent paper abrasion will widen the clearance between the print head and the loaded paper. If you notice abrasion even with the media type set correctly to match the loaded paper, set the printer to prevent paper abrasion by using the operation panel or the computer.

Print speed may be reduced if you apply the setting to prevent paper abrasion setting.

- \* Readjust the setting not to prevent paper abrasion once printing is complete. If not, this setting remains enabled for all subsequent print jobs.
  - · To set by using the operation panel

Press the **Setup** button, then select **Device settings** and **Output settings** in this order, then set **Prevent** abrasion to **ON**.

- Changing the Printer Settings on the LCD
- · To set by using your computer

In the Canon IJ Printer Utility, select **Custom Settings** in the pop-up menu, select the **Prevent paper abrasion** check box, and then click **Apply**.

To open the Canon IJ Printer Utility, see Opening the Canon IJ Printer Utility.

Check5 If the intensity is set high, reduce the intensity setting and try printing again.

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

Reduce the intensity setting in the printer driver and try printing again.

- 1. Open the Print dialog.
  - How to Open the Printer Driver Setup Window
- 2. Select Color Options in the pop-up menu.
- 3. Drag the **Intensity** slide bar to set the intensity.

## Check6 Is printing performed beyond the recommended printing area?

If you are printing beyond the recommended printing area of your printing paper, the lower edge of the paper may become stained with ink.

Resize your original document in your application software.

Printing Area

## Check7 Is the paper feed roller dirty?

Clean the paper feed roller.

Cleaning the Paper Feed Roller

#### Note

· Cleaning the paper feed roller will wear the roller, so perform this procedure only when necessary.

#### Check8 Is the inside of the printer dirty?

When performing duplex printing, the inside of the printer may become stained with ink, causing the printout to become smudged.

Perform the Bottom Plate Cleaning to clean the inside of the printer.

**■**Cleaning the Inside of the Printer (Bottom Plate Cleaning)

#### Note

• To prevent the inside of the printer from stains, set the paper size correctly.

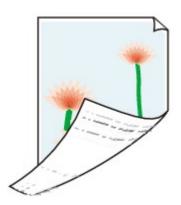

#### Check9 Set the time to dry the printed surface longer.

Doing so gives the printed surface enough time to dry so that paper smudged and scratched are prevented.

- 1. Make sure that the printer is turned on.
- 2. Open the Canon IJ Printer Utility.
  - ■Opening the Canon IJ Printer Utility
- 3. Select **Custom Settings** in the pop-up menu.
- 4. Drag the Ink Drying Wait Time: slide bar to set the wait time, and then click Apply.
- 5. Confirm the message and click OK.

## **Back of the Paper Is Smudged**

Check1 Did you confirm the paper and print quality settings?

Print Results Not Satisfactory

Check2 Perform the Bottom Plate Cleaning to clean the inside of the printer.

**■**Cleaning the Inside of the Printer (Bottom Plate Cleaning)

#### >>> Note

• When performing duplex printing or too much printing, the inside may become stained with ink.

#### Colors Are Uneven or Streaked

## Colors Are Uneven

### Colors Are Streaked

Check1 Did you confirm the paper and print quality settings?

Print Results Not Satisfactory

Check2 Print the Nozzle Check Pattern and perform any necessary maintenance operations such as Print Head Cleaning.

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to When Printing Becomes Faint or Colors Are Incorrect for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- · If the Nozzle Check Pattern is not printed correctly:
  - Check to see if a particular color's ink tank is not empty.
  - If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.
- If the problem is not resolved after performing the Print Head Cleaning twice:
  - Perform the Print Head Deep Cleaning.
  - If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:

If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged. Contact the service center.

Check3 Perform Print Head Alignment.

MAligning the Print Head

### >>> Note

• If the problem is not resolved after performing the Print Head Alignment, perform Print Head Alignment manually referring to <u>Aligning the Print Head Position Manually from Your Computer</u>.

## Ink Is Not Ejected

Check1 Has the ink run out?

Check the Support Code on the LCD and take the appropriate action to resolve the error.

Support Code List

Check2 Are the print head nozzles clogged?

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to When Printing Becomes Faint or Colors Are Incorrect for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

• If the Nozzle Check Pattern is not printed correctly:

Check to see if a particular color's ink tank is not empty.

If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.

• If the problem is not resolved after performing the Print Head Cleaning twice:

Perform the Print Head Deep Cleaning.

If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.

• If the problem is not resolved after performing the Print Head Deep Cleaning twice:

If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged. Contact the service center.

## **Problems with the Printer**

- ➤ The Printer Cannot Be Powered On
- ➤ The Printer Turns Off Unintentionally
- ➤ Cannot Connect to Computer with a USB Cable Properly
- ➤ Cannot Communicate with the Printer with USB Connection
- ► LCD Cannot Be Seen At All
- ➤ An Unintended Language Is Displayed on the LCD
- > Print Head Holder Does Not Move to the Position for Replacing

## The Printer Cannot Be Powered On

Check1 Press the **ON** button.

Check2 Make sure that the power plug is securely plugged into the power cord connector of the printer, then turn it back on.

Check3 Unplug the printer from the power supply, then plug the printer back in and turn the printer back on after leaving it for at least 2 minutes.

If the problem is not resolved, contact the service center.

# The Printer Turns Off Unintentionally

Check Deactivate the setting to turn the unit off automatically.

The printer turns off automatically according to the elapsed time you specified if you activate the setting to turn the unit off automatically.

If you do not want the printer to turn off automatically, open Canon IJ Printer Utility, select **Power Settings** in the pop-up menu, then select **Disable** for **Auto Power Off** on **Auto Power**.

## **Cannot Connect to Computer with a USB Cable Properly**

# Printing Speed Is Slow/Hi-Speed USB Connection Does Not Work

If your system environment is not fully compatible with Hi-Speed USB, the printer will operate at a lower speed provided under USB 1.1. In this case, the printer operates properly but printing speed may slow down due to communication speed.

Check the following to make sure that your system environment supports Hi-Speed USB connection.

- · Does the USB port on your computer support Hi-Speed USB connection?
- Does the USB cable or the USB hub support Hi-Speed USB connection? Be sure to use a certified Hi-Speed USB cable. We recommend that the cable is no longer than around 10 feet / 3 meters.
- · Does the operating system of your computer support Hi-Speed USB connection? Obtain and install the latest update for your computer.
- · Does the Hi-Speed USB driver operate properly? Obtain the latest version of the Hi-Speed USB driver compatible with your hardware and reinstall it on your computer.

## Important

· For details on Hi-Speed USB of your system environment, contact the manufacturer of your computer, USB cable, or USB hub.

## **Cannot Communicate with the Printer with USB Connection**

Check1 Make sure that the printer is turned on.

Check2 Make sure that the USB cable is connected properly.

See Connecting the Printer to the Computer Using a USB Cable to connect the USB cable properly.

Check3 Do not start up IJ Network Tool while printing.

Check4 Do not print while IJ Network Tool is running.

## **LCD Cannot Be Seen At All**

### • If the POWER lamp is off:

The printer is not powered on. Connect the power cord and press the  ${\bf ON}$  button.

### • If the POWER lamp is lit:

The LCD may be in the screen-saver mode. Press one of the buttons on the operation panel.

## An Unintended Language Is Displayed on the LCD

Select the language you want to be displayed according to the following procedure.

- 1. Press the **Setup** button, then wait for about 5 seconds.
- 2. Press the ▶ button once, then press the **OK** button.
- 3. Press the ▶ button twice, then press the **OK** button.
- 4. Press the **OK** button again.
- 5. Use the **ID** button to select the language for the LCD, then press the **OK** button.

The desired language is displayed on the LCD.

## Print Head Holder Does Not Move to the Position for Replacing

## Important

• The print head holder moves to the position for replacing only when an ink tank runs out of ink. If no ink tanks run out of ink, the print head holder does not move even though you open the front cover.

## Check1 Is the **POWER** lamp off?

Check if the **POWER** lamp is lit.

The print head holder will not move unless the power is on. If the **POWER** lamp is off, close the front cover and turn the printer on.

While the **POWER** lamp is flashing, the printer is initializing. Wait until the **POWER** lamp stops flashing and remains lit, and then open the front cover again.

Check2 Is an error message displayed on the LCD?

Close the front cover, follow the Support Code (error number) displayed in the error message to resolve the error, and then reopen it. For details on how to resolve the error, refer to <u>Support Code List</u>.

Check3 Has the front cover been left open for 60 minutes or longer?

If the front cover is left open for more than 60 minutes, the print head holder moves to the position to protect it to prevent the print head from drying out. Close and reopen the front cover to return the print head holder to the position for replacing.

# **Problems with Installation/Downloading**

- ➤ Cannot Install the Printer Driver
- ➤ Uninstalling IJ Network Tool

# **Cannot Install the Printer Driver**

Download the driver from the support page of our website, then reinstall it.

# **Uninstalling IJ Network Tool**

Follow the procedure below to uninstall IJ Network Tool from your computer.

## >>>> Important

- Even if IJ Network Tool is uninstalled, you can print over network. However, you cannot change the network settings over network.
- Select Applications from the Go menu of Finder, double-click Canon Utilities > IJ
   Network Tool, drag the Canon IJ Network Tool icon into the Trash.
- 2. Restart the computer.

Empty the **Trash** and restart your computer.

#### >>> Note

• To reinstall IJ Network Tool, uninstall IJ Network Tool, then install it again from our website.

# **About Errors/Messages Displayed**

- ➤ If an Error Occurs
- ➤ A Message Is Displayed

### If an Error Occurs

When an error occurs in printing such as the printer is out of paper or paper is jammed, a troubleshooting message is displayed automatically. Take the appropriate action described in the message.

When an error occurs, a Support Code (error number) is displayed on the computer screen or the LCD.

• When a Support Code and a message are displayed on the computer screen:

- \* The screen differs depending on the OS you are using.
- When a Support Code and a message are displayed on the LCD:

```
No paper in cass. 2
Load paper in casse 1008
```

For details on how to resolve errors with Support Codes, refer to Support Code List.

#### Note

- You can confirm the actions against errors with Support Codes on your computer or on the LCD by searching a Support Code.
  - **■**Click Here to Search

For details on how to resolve errors without Support Codes, see A Message Is Displayed.

# A Message Is Displayed

This section describes some of the errors or messages.

#### Note

• A Support Code (error number) is displayed on the computer or on the LCD for some error or message. For details on errors with Support Codes, refer to <u>Support Code List</u>.

If a message is displayed on the LCD, see below.

• A Message Is Displayed on the LCD

If a message is displayed on the computer, see below.

- Error Regarding Automatic Duplex Printing Is Displayed
- ‡The Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears

# A Message Is Displayed on the LCD

Confirm the message and take an appropriate action.

· Cannot connect to the server; try again

You cannot connect to the server due to some communication error. When you have tried to access a photo sharing site, it is possible that your photos have been deleted.

Press the **OK** button to dismiss the error, then try again after a while.

# **Error Regarding Automatic Duplex Printing Is Displayed**

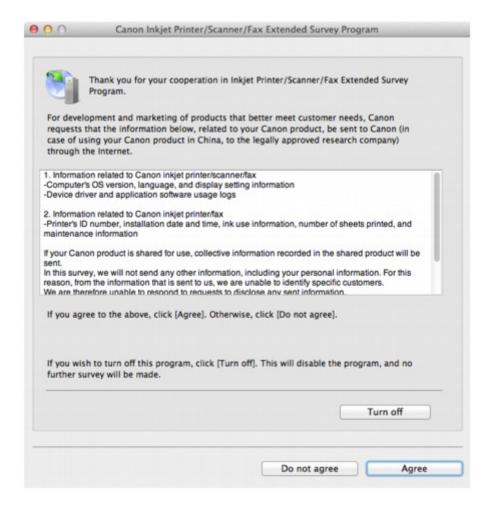

Check See <u>Cannot Print Properly with Automatic Duplex Printing</u> and take the appropriate action.

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, the printer and application software usage information is scheduled to be sent every month for about ten years. The **Inkjet Printer/Scanner/Fax Extended Survey Program** icon appears in the Dock when it is time to send the printer usage information.

Read the instructions on the screen after clicking the icon, then follow the procedure below.

#### If you agree to participate in the survey program:

Click **Agree**, then follow the on-screen instructions. The printer usage information will be sent via the Internet. If you have followed the on-screen instructions, the information will be sent automatically from the second time onward and the confirmation screen will not be displayed again.

#### Note

If you deselect the Send automatically from the next time check box, the information will not
be sent automatically from the second time onward and the Inkjet Printer/Scanner/Fax
Extended Survey Program icon will appear in the Dock at the time of the next survey.

#### • If you do not agree to participate in the survey program:

Click **Do not agree**. The confirmation screen will be closed, and the survey at that time is skipped. The confirmation screen will be displayed again one month later.

#### · To stop sending the information:

Click **Turn off**. The Inkjet Printer/Scanner/Fax Extended Survey Program is stopped, and the information will not be sent. To resume the survey, see <u>Changing the setting</u>:.

#### To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program:

- 1. Stop the Inkjet Printer/Scanner/Fax Extended Survey Program.
  - Changing the setting:
- 2. Select **Applications** from the **Go** menu of Finder, and double-click the **Canon Utilities** folder, then the **Inkjet Extended Survey Program** folder.

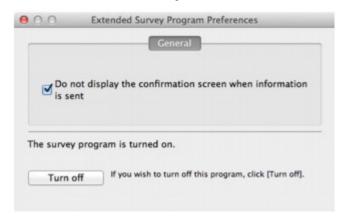

- 3. Place the Canon Inkjet Printer/Scanner/Fax Extended Survey Program.app file into the Trash.
- 4. Restart the computer.

Empty the **Trash** and restart your computer.

#### · Changing the setting:

To display the confirmation screen every time the printer usage information is sent or to resume surveying, follow the procedure below.

- 1. Select **Applications** from the **Go** menu of Finder, and double-click the **Canon Utilities** folder, then the **Inkjet Extended Survey Program** folder.
- 2. Double-click the Canon Inkjet Printer/Scanner/Fax Extended Survey Program icon.

• Do not display the confirmation screen when information is sent:

If the check box is selected, the information will be sent automatically.

If the check box is not selected, the **Inkjet Printer/Scanner/Fax Extended Survey Program** icon will appear in the Dock at the time of the next survey. Click the icon, then follow the onscreen instructions.

• Turn off/Turn on button:

Click the Turn off button to stop the Inkjet Printer/Scanner/Fax Extended Survey Program.

Click the **Turn on** button to restart the Inkjet Printer/Scanner/Fax Extended Survey Program.

## If You Cannot Resolve the Problem

If you cannot resolve the problem with any of the workarounds in this chapter, please contact the seller of the printer or the service center.

Canon support staff are trained to be able to provide technical support to satisfy customers.

#### Caution

- If the printer emits any unusual sound, smoke, or odor, turn it off immediately. Unplug the power cord from the outlet and contact the seller or the service center. Never attempt to repair or disassemble the printer yourself.
- Attempts by customers to repair or take apart the printer will invalidate any warranty regardless of whether the warranty has expired.

Before contacting the service center, confirm the following:

- · Product name:
  - \* Your printer's name is located on the front cover of the setup manual.
- · Serial number: please refer to the setup manual
- · Details of the problem
- · What you tried to solve the problem, and what happened

# **Support Code List**

The support code appears on the LCD and the computer screen when an error occurs.

"Support Code" means the error number and appears with an error message.

When an error occurs, check the support code displayed on the LCD or the computer screen and take the appropriate action.

About the support code for paper jam, you can also refer to Support Code List (When Paper Is Jammed).

# **Support Code List (When Paper Is Jammed)**

If the paper is jammed, remove it following the procedure appropriate for each case.

• If the paper is jammed inside the front cover:

### **1300**

• If the paper is jammed inside the rear cover:

### **1303**

• If the paper is jammed inside the rear cover as the printer pulled in the printed paper:

#### **1313**

• If the paper is jammed inside the rear cover when automatic duplex printing:

#### **1314**

· Cases other than above:

#### **■**In Other Cases

#### Cause

Paper is jammed inside the front cover.

#### **Action**

If the paper is jammed inside the front cover, remove the paper following the procedure below.

#### Note

- If you need to turn off the printer to remove jammed paper during printing, press the **Stop** button to cancel print jobs before turning off the printer.
- 1. Open the front cover.

## >>> Important

• Do not touch the clear film (A) or the white belt (B).

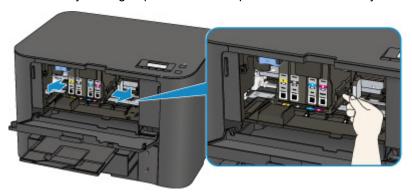

If the paper or your hands touch these parts and blot or scratch them, the printer can be damaged.

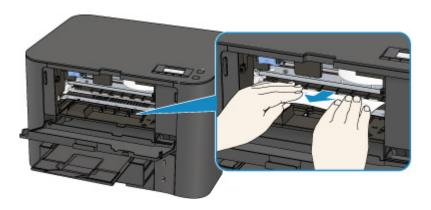

2. Make sure that the jammed paper is not under the print head holder.

If the jammed paper is under the print head holder, move the print head holder to the right edge or the left edge whichever is easier to remove the paper.

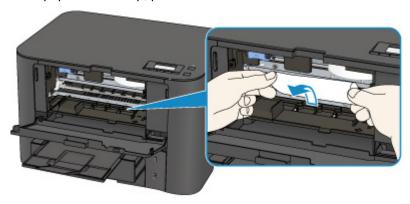

When you move the print head holder, press either the right side or the left side of the print head holder with your fingertips and slide the print head holder slowly to the right edge or the left edge.

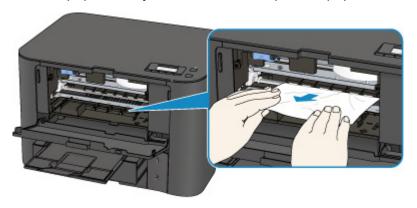

3. Hold the jammed paper with your hands.

If the paper is rolled up, pull it out.

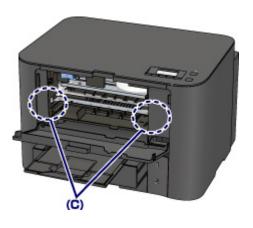

4. Pull the paper slowly not to tear it, then pull the paper out.

5. Make sure that all the jammed paper is removed.

If the paper is torn, a piece of paper may remain inside the printer. Check the following and remove the piece of paper if it remains.

- Does the piece of paper remain under the print head holder?
- Does the little piece of paper remain inside the printer?
- Does the piece of paper remain in the right side or the left side space (C) inside the printer?

#### 6. Close the front cover.

### 7. Press the printer's **OK** button.

If you turned off the printer, all print jobs in the queue are canceled. Reprint if necessary.

#### >>>> Note

- When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly.
  - Align the paper guides with the both edges of the paper when you load paper.
- If the message about paper jam is displayed on the LCD of the printer or on the computer screen when you resume printing after removing all the jammed paper, a piece of paper may remain inside the printer. In this case, confirm that no piece of paper remains inside the printer.
- We recommend you use paper other than A5 sized one to print documents with photos or graphics; otherwise, the printout may curl and cause paper exit jams.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

#### Cause

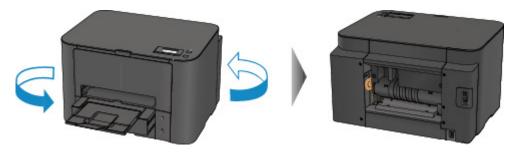

Paper is jammed inside the rear cover.

## **Action**

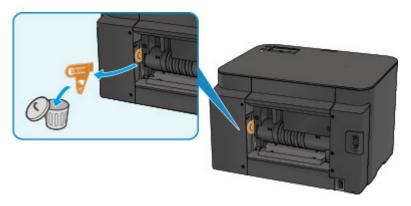

If the paper is jammed inside the rear cover, remove the paper following the procedure below.

## >>>> Note

- If you need to turn off the printer to remove jammed paper during printing, press the **Stop** button to cancel print jobs before turning off the printer.
- 1. Rotate the printer so that the rear side of the printer faces toward you.

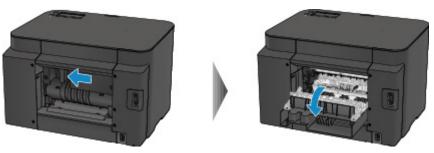

2. If the protective material for the rear cover remains attached, remove it.

3. Open the rear cover.

Slide the rear cover to the left then open it.

4. Pull out the paper slowly.

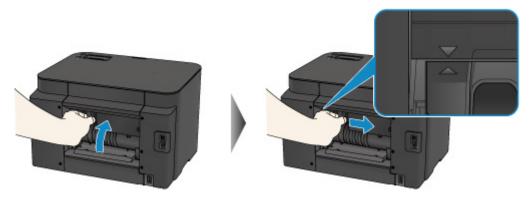

#### >>> Note

- Do not touch the inner parts of the printer.
- If you cannot pull the paper out, try the following.
  - Turn the printer off and turn it back on.
     The paper may be ejected automatically.
  - Pull out the paper output tray.
     It becomes easy to pull out the paper.

#### 5. Close the rear cover slowly.

Close the rear cover then slide it to the right.

Slide the rear cover so that the  $\triangle$  mark on the rear cover aligns with the  $\nabla$  mark on the printer.

6. Reload the paper, then press the printer's **OK** button.

If you turned off the printer, all print jobs in the queue are canceled. Reprint if necessary.

#### >>>> Note

• When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly.

Align the paper guides with the both edges of the paper when you load paper.

• We recommend you use paper other than A5 sized one to print documents with photos or graphics; otherwise, the printout may curl and cause paper exit jams.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

### Cause

Paper is jammed inside the rear cover as the printer pulled in the printed paper.

### **Action**

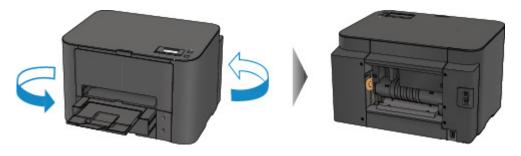

If the paper is jammed inside the rear cover as the printer pulled in the printed paper, remove the paper following the procedure below.

## >>> Important

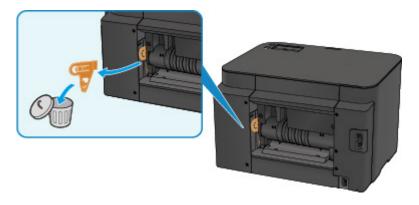

• If the printed paper piles up on the paper output slot, the printer may pull it in and the paper is jammed inside the printer. Remove the printed paper from the paper output tray before it amounts to 75 sheets.

#### >>> Note

- If you need to turn off the printer to remove jammed paper during printing, press the **Stop** button to cancel print jobs before turning off the printer.
- 1. Rotate the printer so that the rear side of the printer faces toward you.

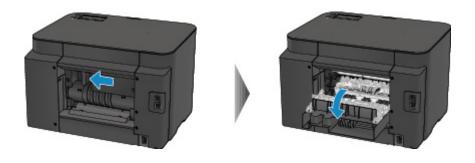

2. If the protective material for the rear cover remains attached, remove it.

3. Open the rear cover.

Slide the rear cover to the left then open it.

### 4. Pull out the paper slowly.

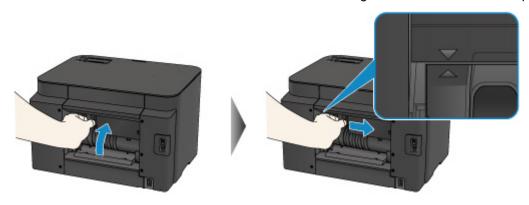

### Note

- Do not touch the inner parts of the printer.
- If you cannot pull the paper out, try the following.
  - Turn the printer off and turn it back on.
     The paper may be ejected automatically.
  - Pull out the paper output tray.
     It becomes easy to pull out the paper.

### 5. Close the rear cover slowly.

Close the rear cover then slide it to the right.

Slide the rear cover so that the  $\triangle$  mark on the rear cover aligns with the  $\nabla$  mark on the printer.

6. Reload the paper, then press the printer's **OK** button.

If you turned off the printer, all print jobs in the queue are canceled. Reprint if necessary.

#### >>> Note

• When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly.

Align the paper guides with the both edges of the paper when you load paper.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

### Cause

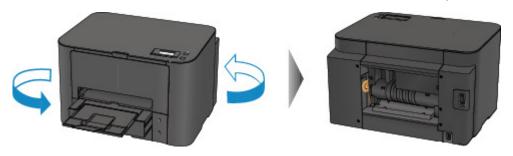

Paper is jammed inside the rear cover when performing automatic duplex printing.

### **Action**

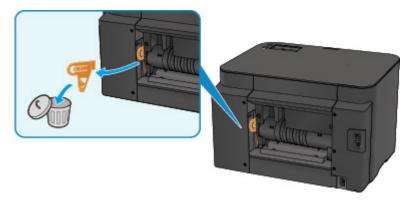

If the paper is jammed inside the rear cover when performing automatic duplex printing, remove the paper following the procedure below.

### Note

- If you need to turn off the printer to remove jammed paper during printing, press the **Stop** button to cancel print jobs before turning off the printer.
- 1. Rotate the printer so that the rear side of the printer faces toward you.

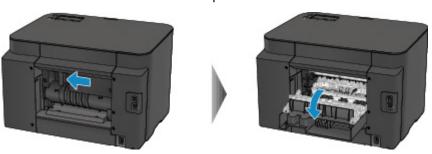

2. If the protective material for the rear cover remains attached, remove it.

3. Open the rear cover.

Slide the rear cover to the left then open it.

4. Pull out the paper slowly.

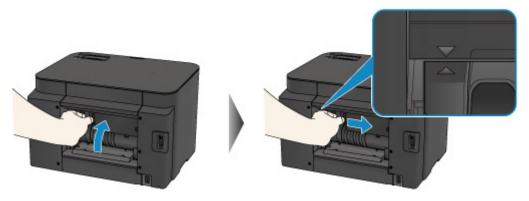

#### >>> Note

- Do not touch the inner parts of the printer.
- If you cannot pull the paper out, try the following.
  - Turn the printer off and turn it back on.
     The paper may be ejected automatically.
  - Pull out the paper output tray.
     It becomes easy to pull out the paper.
- 5. Close the rear cover slowly.

Close the rear cover then slide it to the right.

Slide the rear cover so that the  $\triangle$  mark on the rear cover aligns with the  $\nabla$  mark on the printer.

6. Reload the paper, then press the printer's **OK** button.

If you turned off the printer, all print jobs in the queue are canceled. Reprint if necessary.

#### >>>> Note

• When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly.

Align the paper guides with the both edges of the paper when you load paper.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

# **In Other Cases**

Make sure of the following:

Check1 Are there any foreign objects around the paper output slot?

Check2 Are the rear cover attached properly?

Check3 Is the paper curled?

Load the paper after correcting its curl.

### Cause

Possible causes include the following.

- There is no paper in the cassette 1.
- Paper is not loaded in the cassette 1 properly.

### **Action**

Take the corresponding actions below.

- Load paper in the cassette 1.
- Align the paper guides with the both edges of the paper when you load paper in the cassette 1.

After carrying out the above measures, press the **OK** button to dismiss the error.

### >>> Note

- The loadable paper differs depending on the paper source.
  - A4, Letter, or Legal-sized plain paper can be loaded in both the cassette 1 and the cassette 2.
- If you want to cancel printing, press the printer's **Stop** button.

### Cause

Possible causes include the following.

- There is no paper in the cassette 2.
- Paper is not loaded in the cassette 2 properly.

## **Action**

Take the corresponding actions below.

- Load paper in the cassette 2.
- Align the paper guides with the both edges of the paper when you load paper in the cassette 2.

After carrying out the above measures, press the **OK** button to dismiss the error.

## >>>> Important

• The loadable paper differs depending on the paper source.

The loadable paper in the cassette 2 is A4, Letter, or Legal-sized plain paper.

#### >>> Note

• If you want to cancel printing, press the printer's **Stop** button.

# Cause

The front cover is open.

# **Action**

Close the front cover and wait for a while.

Do not close it while you are replacing an ink tank.

## Cause

The size of paper may not be compatible with automatic duplex printing.

## **Action**

The sizes of media suitable for auto duplex printing are A4 and Letter. Make sure that the size of the paper loaded in the printer is correct. Pressing the **OK** button will eject the paper and restart printing from the front side of the next paper. The reverse side of the ejected sheet will not be printed.

## Cause

Ink cannot be correctly detected.

# **Action**

If an ink tank becomes empty, replace it.

An ink tank cannot be replaced until it becomes empty.

Please be advised that Canon shall not be liable for any malfunction or trouble caused by continuation of printing under the ink out condition.

#### Cause

Ink may have run out.

## **Action**

Replacing the ink tank is recommended.

If printing is in progress and you want to continue printing, press the machine's **OK** button with the ink tank installed. Then printing can continue. Replacing the ink tank is recommended after the printing. The machine may be damaged if printing is continued under the ink out condition.

## >>> Important

- Do not remove an ink tank until a new one is prepared to be installed.
  - Once you remove an ink tank, the machine will not operate until a new one is installed.
  - Once you remove an ink tank, the machine will not operate even if the removed ink tank is just reinstalled.

# Cause

The ink tank is not installed.

# **Action**

Install the ink tank.

#### Cause

The ink has run out.

### **Action**

Replace the ink tank and close the front cover.

Printing under the current condition may damage the machine.

If you want to continue printing in this condition, you need to release the function for detecting the remaining ink level. Press and hold the machine's **Stop** button for at least 5 seconds, and then release it.

With this operation, releasing the function for detecting the remaining ink level is memorized. Please be advised that Canon shall not be liable for any malfunction or trouble caused by continuation of printing under the ink out condition.

## >>>> Important

- Do not remove an ink tank until a new one is prepared to be installed.
  - Once you remove an ink tank, the machine will not operate until a new one is installed.
  - Once you remove an ink tank, the machine will not operate even if the removed ink tank is just reinstalled.

# Cause

The ink absorber is almost full.

# **Action**

Press the printer's  $\mathbf{OK}$  button to continue printing. Contact the service center.

# Cause

The ink absorber is almost full.

# **Action**

Press the printer's  $\mathbf{OK}$  button to continue printing. Contact the service center.

## Cause

The ink tank is not installed properly.

# Action

Open the front cover.

Then push the ink tank.

After installing the ink tank properly, close the front cover.

If the problem is not resolved, contact the service center.

# >>> Important

• The ink tank that was once installed cannot be removed until the ink runs out.

## Cause

The ink has run out.

## **Action**

To maintain both machine and print quality, the machine cannot continue printing under the ink out condition.

Cancel printing and replace the ink tank before printing again.

## >>> Important

- Do not remove an ink tank until a new one is prepared to be installed.
  - Once you remove an ink tank, the machine will not operate until a new one is installed.
  - Once you remove an ink tank, the machine will not operate even if the removed ink tank is just reinstalled.

## Cause

The cassette 1 is not inserted.

# Action

Insert the cassette 1.

### >>> Note

- The cassette paper information registration screen is displayed after inserting the cassette 1. Register the cassette paper information according to the paper you loaded in the cassette 1.
- If you want to cancel printing, press the printer's **Stop** button.

## Cause

The cassette 2 is not inserted.

# **Action**

Insert the cassette 2.

### >>> Note

- The cassette paper information registration screen is displayed after inserting the cassette 2. Register the cassette paper information according to the paper you loaded in the cassette 2.
- If you want to cancel printing, press the printer's **Stop** button.

## Cause

The cassette 1 and the cassette 2 are not inserted.

# **Action**

Insert the both cassettes.

### >>> Note

- The cassette paper information registration screen is displayed after inserting the cassettes. Register the cassette paper information according to the paper you loaded in the cassette 1 and the cassette 2.
- If you want to cancel printing, press the printer's **Stop** button.

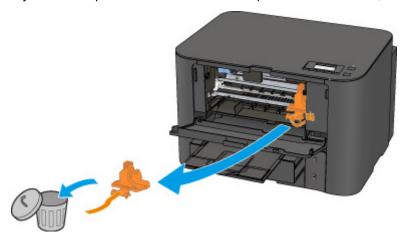

## Cause

The protective material for the print head holder or the tape may remain attached to the holder.

# Action

Open the front cover, then confirm that the protective material or the tape does not remain attached to the print head holder.

If you find the protective material or the tape remains attached, remove it, then close the front cover.

#### Cause

The paper settings for printing are different from the cassette paper information registered to the printer.

#### Note

- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD.
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Mac)
- For details on the cassette paper information registering to the printer:
  - Paper setting for Printing (Windows)
  - Paper setting for Printing (Mac)
  - Paper setting for Printing (Smartphone and so on)

If the paper settings for printing are different from the cassette paper information registered to the printer as the following, a message is displayed on the LCD.

· Print settings specified on the printer driver:

Paper size: B5

Media type: Plain paper

• Cassette paper information registered to the printer:

Paper size: A4

Media type: Plain paper

Size/type of paper 2111 [OK]Select option

#### **Action**

Pressing the printer's **OK** button, the following screen is displayed on the LCD.

Select what to do as necessary.

#### Note

· Depending on the setting, the choices below may not be displayed.

#### Use cass. settings

Select if you want to print on the paper loaded in the cassette 1 without changing the paper settings.

For example, when the paper setting for printing is B5 and the cassette paper information registered to the printer is A4, the printer starts printing with B5 on the paper loaded in the cassette 1.

#### Replace the paper

Select if you want to print after replacing the paper of the cassette 1.

For example, when the paper setting for printing is B5 and the cassette paper information registered to the printer is A4, you load B5 sized paper in the cassette 1 before you start printing.

The cassette paper information registration screen is displayed after replacing the paper and inserting the cassette 1. Register the cassette paper information according to the paper you loaded in the cassette 1.

#### >>> Note

- If you do not know what paper information to register to the printer, press the **Back** button when the screen to select the operation is displayed. When the previous screen is displayed, confirm the paper size and the media type, then register them to the printer.
- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Mac)

#### **Cancel printing**

Cancels printing.

Select when you change the paper settings specified for printing. Change the paper settings, then try printing again.

#### >>> Note

- You can disable the message which prevents misprinting. When you disable the message, the printer starts printing even though the paper settings for printing and the cassette paper information registered to the printer are different.
  - To change the setting using the operation panel:
    - **■**Cassette settings (Windows)
    - Cassette settings (Mac)
    - ■Cassette settings (Smartphone and so on)
  - · To change the setting using the printer driver:
    - Changing the Printer Operation Mode (Windows)
    - ■Changing the Printer Operation Mode (Mac)

#### Cause

The paper settings for printing are different from the cassette paper information registered to the printer.

#### Note

- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Mac)
- For details on the cassette paper information registering to the printer:
  - Paper setting for Printing (Windows)
  - Paper setting for Printing (Mac)
  - Paper setting for Printing (Smartphone and so on)

If the paper settings for printing are different from the cassette paper information registered to the printer as the following, a message is displayed on the LCD.

· Print settings specified on the printer driver:

Paper size: A4

Media type: Plain paper

• Cassette paper information registered to the printer:

Paper size: Legal

Media type: Plain paper

Size/type of paper 2112 [OK]Select option

#### **Action**

Pressing the printer's **OK** button, the following screen is displayed on the LCD.

Select what to do as necessary.

#### Note

· Depending on the setting, the choices below may not be displayed.

#### Use cass. settings

Select if you want to print on the paper loaded in the cassette 2 without changing the paper settings.

For example, when the paper setting for printing is A4 and the cassette paper information registered to the printer is Legal, the printer starts printing with A4 on the paper loaded in the cassette 2.

#### Replace the paper

Select if you want to print after replacing the paper of the cassette 2.

For example, when the paper setting for printing is A4 and the cassette paper information registered to the printer is Legal, you load A4 sized paper in the cassette 2 before you start printing.

The cassette paper information registration screen is displayed after replacing the paper and inserting the cassette 2. Register the cassette paper information according to the paper you loaded in the cassette 2.

#### Note

- If you do not know what paper information to register to the printer, press the **Back** button when the screen to select the operation is displayed. When the previous screen is displayed, confirm the paper size and the media type, then register them to the printer.
- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Mac)

#### **Cancel printing**

Cancels printing.

Select when you change the paper settings specified for printing. Change the paper settings, then try printing again.

#### >>> Note

- You can disable the message which prevents misprinting. When you disable the message, the printer starts printing even though the paper settings for printing and the cassette paper information registered to the printer are different.
  - To change the setting using the operation panel:
    - **■**Cassette settings (Windows)
    - Cassette settings (Mac)
    - **■**Cassette settings (Smartphone and so on)
  - · To change the setting using the printer driver:
    - Changing the Printer Operation Mode (Windows)
    - ■Changing the Printer Operation Mode (Mac)

#### Cause

The paper settings for printing are different from the cassette paper information registered to the printer.

#### Note

- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Mac)
- For details on the cassette paper information registering to the printer:
  - Paper setting for Printing (Windows)
  - Paper setting for Printing (Mac)
  - Paper setting for Printing (Smartphone and so on)

If the paper settings for printing are different from the cassette paper information registered to the printer as the following, a message is displayed on the LCD.

· Print settings specified on the printer driver:

Paper size: A4

Media type: Plain paper

• Cassette paper information registered to the printer:

Paper size: Legal

Media type: Plain paper

Size or type of loa: 2113 [OK]Select option

#### **Action**

Pressing the printer's **OK** button, the following screen is displayed on the LCD.

Select what to do as necessary.

#### Note

· Depending on the setting, the choices below may not be displayed.

#### Use cass. settings

Select if you want to print on the paper loaded in the cassette 1 and the cassette 2 without changing the paper settings.

For example, when the paper setting for printing is A4 and the cassette paper information registered to the printer is Legal, the printer starts printing with A4 on the paper loaded in the cassette 1 and the cassette 2.

#### Replace the paper

Select if you want to print after replacing the paper of the cassette 1 and the cassette 2.

For example, when the paper setting for printing is A4 and the cassette paper information registered to the printer is Legal, you load A4 sized paper in the cassette 1 and the cassette 2 before you start printing.

The cassette paper information registration screen is displayed after replacing the paper and inserting the cassettes. Register the cassette paper information according to the paper you loaded in the cassette 1 and the cassette 2.

#### Note

- If you do not know what paper information to register to the printer, press the **Back** button when the screen to select the operation is displayed. When the previous screen is displayed, confirm the paper size and the media type, then register them to the printer.
- For details on the proper combination of paper settings you can specify by the printer driver or on the LCD:
  - ■Setting the Media Type with the Printer Driver and on the Printer (Windows)
  - ■Setting the Media Type with the Printer Driver and on the Printer (Mac)
  - ■Setting the Paper Size with the Printer Driver and on the Printer (Windows)
  - Setting the Paper Size with the Printer Driver and on the Printer (Mac)

#### **Cancel printing**

Cancels printing.

Select when you change the paper settings specified for printing. Change the paper settings, then try printing again.

### >>> Note

- You can disable the message which prevents misprinting. When you disable the message, the printer starts printing even though the paper settings for printing and the cassette paper information registered to the printer are different.
  - To change the setting using the operation panel:
    - **■**Cassette settings (Windows)
    - **■**Cassette settings (Mac)
    - Cassette settings (Smartphone and so on)
  - · To change the setting using the printer driver:
    - Changing the Printer Operation Mode (Windows)
    - **■**Changing the Printer Operation Mode (Mac)

## Cause

The paper settings of the cassette 1 is not complete.

# Action

If the following screen is displayed, the paper settings of the cassette 1 is not complete.

Press the printer's  $\mathbf{OK}$  button to terminate the paper settings of the cassette.

## Cause

The paper settings of the cassette 2 is not complete.

# Action

If the following screen is displayed, the paper settings of the cassette 2 is not complete.

Press the printer's  $\mathbf{OK}$  button to terminate the paper settings of the cassette.

#### Cause

The cause of following may have occurred the failure of Automatic Print Head Alignment.

- · Print head nozzles are clogged.
- The paper of size other than A4 or Letter is loaded in the cassette 1.
- The paper output slot is exposed to strong light.

#### Action

Press the printer's **OK** button to dismiss the error, then take the actions described below.

- Print the nozzle check pattern to check the status of the print head.
- Load one sheet of A4/Letter-sized plain paper in the cassette 1 and perform Automatic Print Head Alignment again.

For Automatic Print Head Alignment, always load paper in the cassette 1.

• Adjust your operating environment and/or the position of the printer so that the paper output slot is not exposed directly to strong light.

After carrying out the above measures, if the problem continues after aligning the print head again, press the printer's **OK** button to dismiss the error, and then perform Manual Print Head Alignment.

## Cause

The specified data cannot be printed.

# Action

When you print the contents on CREATIVE PARK PREMIUM, confirm the message on the computer screen, make sure that genuine Canon ink tanks are installed properly for all colors, then start printing again.

# Cause

Cannot perform printing with the current print settings.

# Action

Press the printer's **Stop** button to cancel printing.

Then change the print settings and print again.

## Cause

The paper size or the media type that cannot be fed from the cassette 2 is specified.

# Action

Press the printer's **Stop** button to cancel printing.

Specify the paper size setting to A4, Letter, or Legal and specify the media type setting to Plain Paper. Then print again.

## Note

• If you will not change the paper size setting or the media type setting, select the cassette 1 as the paper source. If this is the case, register the cassette 1 paper information properly.

#### Cause

Printer error has occurred.

### **Action**

Cancel printing and turn off the printer.

Then confirm the following.

• Confirm that there are no materials (e.g. the protective material or jammed paper) that is preventing the print head holder from moving.

If any, remove the materials.

· Confirm that the ink tanks are installed properly.

Push an ink tank until it clicks into place.

After confirming the conditions above, turn on the printer again.

If the problem is not resolved, contact the service center.

### >>> Important

• When you clear the jammed paper or protective material that is preventing the print head holder from moving, be careful not to touch the clear film (A) or the white belt (B).

#### Cause

Printer error has occurred.

#### Cause

Printer error has occurred.

#### **Action**

Cancel printing and turn off the printer.

Then confirm the following.

• Confirm that there are no materials (e.g. the protective material or jammed paper) that is preventing the print head holder from moving.

If any, remove the materials.

· Confirm that the ink tanks are installed properly.

Push an ink tank until it clicks into place.

After confirming the conditions above, turn on the printer again.

If the problem is not resolved, contact the service center.

#### >>> Important

• When you clear the jammed paper or protective material that is preventing the print head holder from moving, be careful not to touch the clear film (A) or the white belt (B).

If the paper or your hands touch these parts and blot or scratch them, the printer can be damaged.
