### Note

In order to be printed easily, this PDF-format manual is converted from the HTML-format instruction manual included on the "User Manuals CD-ROM" supplied with the printer. Thus, there are descriptions that are applied only in HTML format, and functions (video display function, etc.) that cannot be used. We appreciate your understanding.

### **Printing Options Using Rolls and Sheets**

The printer supports both rolls and sheets.

This section introduces the main features of each, as well as the main printing methods available. Select rolls or sheets to suit your particular printing application.

• For information on the types of paper the printer supports, see "Types of Paper." -P.522

Note • A variety of other ways to print are available besides those introduced here. For details, see "Enhanced Printing Options." →P.35

### Roll printing

Media in spooled rolls is generally called Roll Media. Rolls are loaded on the Roll Holder, which are in turn loaded in the printer.

Rolls can be used to print large photos or create posters or banners that cannot be printed on regular sheets.

Large-format printing

Easily print vertical or horizontal banners from familiar applications such as Microsoft Office applications. (See "Printing Vertical or Horizontal Banners (Large-Format Printing).") —P.108

Borderless printing

Print without a margin (border) around posters or photos. (See "Borderless Printing on Paper of Equivalent Size.") →P.95 (See "Borderless Printing by Resizing Originals to Fit the Roll Width.") →P.101 (See "Borderless Printing at Actual Size.") →P.89

- Banner printing You can print multiple pages as a single continuous image, without margins between pages. (See "Printing Multiple Pages Continuously.") →P.125
- 90-degree rotation before printing Originals in portrait orientation are rotated 90 degrees when possible to use paper more efficiently. (See "Conserving Roll Paper by Rotating Originals 90 Degrees.") →P.148
- Enlarged/reduced printing
   You can freely adjust the size of originals by enlarging or reducing originals before printing.
   (See "Resizing Originals to Match the Paper Size.") →P.68
   (See "Resizing Originals to Fit the Roll Width.") →P.72
   (See "Resizing Originals by Entering a Scaling Value.") →P.78
- Free Layout (Windows) and imagePROGRAF Free Layout (Macintosh) Print multiple documents from multiple applications (such as word-processing programs, spreadsheet programs, and so on) next to each other.
- (See "Printing Multiple Originals Next to Each Other.") →P.121

### Sheet printing

20

Sheets refer to individual sheets of paper.

Insert the sheet between the Platen and the Paper Retainer.

- Enlarged/reduced printing
   You can freely adjust the size of originals by enlarging or reducing originals before printing.
   (See "Resizing Originals to Match the Paper Size.") →P.68
   (See "Resizing Originals by Entering a Scaling Value.") →P.78
- Free Layout (Windows) and imagePROGRAF Free Layout (Macintosh) Print multiple documents from multiple applications (such as word-processing programs, spreadsheet programs, and so on) next to each other.
   (See "Printing Multiple Originals Next to Each Other.") →P.121

### Turning the Printer On and Off

### Turning the printer on

Press the **Power** button to turn on the printer. The printer will now start up. After the Display Screen shows the Canon logo, "**Start-ing up... Please wait.**" is displayed.

The **Power Lamp** is lit when the printer finishes starting up, and the printer is now in **Standby**.

The printer will not go into **Standby** in the following situations. Take the appropriate action.

- The Top Cover is open Close the Top Cover.
- The Ink Tank Cover is open Close the Ink Tank Cover.
- The Printhead is not installed see "Replacing the Printhead." →P.840
- An Ink Tank is not installed see "Replacing Ink Tanks." →P.826
- If ERROR is shown on the Display Screen see "Error Messages." →P.908

21

**Basic Printing Workflow** 

- The **Power Lamp** and **Message Lamp** are not lit (even once), and nothing appears on the Display Screen Make sure the printer is plugged in correctly. Check the connection at the plug and electrical outlet.
- No paper is loaded
   Load paper. (See "Loading and Printing on Rolls.") →P.22 (See "Loading and Printing on Sheets.")
   →P.25
- Starting the printer when it is connected via the USB cable to a Macintosh computer that is off may cause the computer to start up at the same time. To prevent this, disconnect the USB cable before starting the printer. Connecting the printer to the computer via a USB hub may solve this issue.

### Turning the printer off

Important

1

2

2.2

- Never disconnect the printer's power supply or unplug it during a print job. This may damage the printer.
- Make sure no print jobs are in progress. If the **Message Lamp** is flashing, check the message on the Display Screen and take action as necessary. (See "Error Messages.") →P.908
- If the **Data Lamp** is flashing, the printer is receiving a print job. Turn off the printer only after printing is finished.

Hold down the **Power** button for more than a second.

After "**Shut Down.. Please Wait..**" is shown on the Display Screen, the printer shuts off.

### Loading and Printing on Rolls

These are the basic steps for loading and printing on rolls. Follow these steps to load and print on rolls.

- For details on using the Output Stacker, see "Using the Output Stacker." →P.564
- For details on using the Media Take-up Unit, see "Media Take-up Unit." →P.570

5

OK)

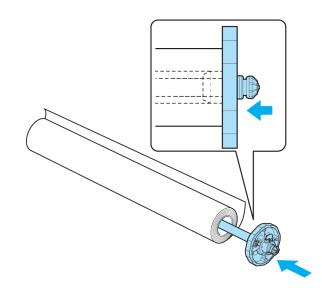

• If you are not using the Media Take-up Unit when printing long documents such as banners, spread a clean cloth or paper on the floor. Use the Output Stacker to prevent long printed documents from being soiled by the floor after they are printed. (See "Using the Output Stacker.") →P.564

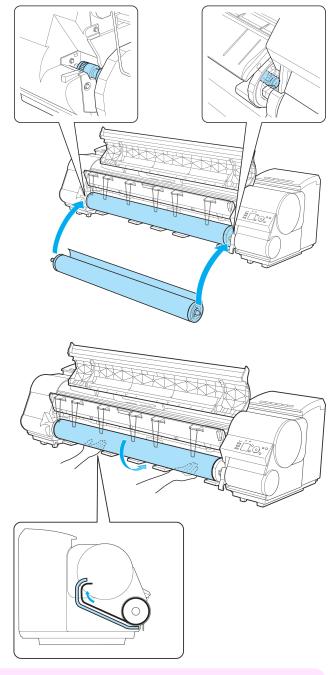

- For details on supported sizes and types of rolls, see **Paper Sizes** or the Paper Reference Guide. (See "Paper Sizes.") →P.522 (See "Types of Paper.") →P.522
- To wait until the ink dries after printing before cutting the roll, set **Drying Time** in the printer driver. (See "Specifying the Ink Drying Time for Rolls.") —P.544
- Once you have used all the paper on a roll, clean the platen. If the Platen inside the Top Cover becomes dirty, it may soil the underside of paper. (See "Cleaning Inside the Top Cover.") →P.861
- 1 Turn the printer on. (See "Turning the Printer On and Off.") →P.21

2 Load the roll on the Roll Holder. (See "Attaching the Roll Holder to Rolls.") →P.530

# 3 Load the roll in the printer. (See "Loading Rolls in the Printer.") $\rightarrow$ P.533

• When printing without borders, definitely set the blue Switch on the platen to the • side. If the switch is set incorrectly, print quality may deteriorate. (See "Setting the Blue Switch on the Platen.") —P.893

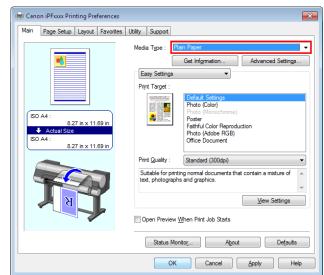

4 Select the type of paper. (See "Changing the Type of Paper.") →P.537

5 Complete settings in the printer driver for the type of paper and other details.

- Specifying Paper in the Printer Driver (Windows) →P.174
- Specifying Paper in the Printer Driver (Mac OS X) → P.360

Send the print job.

- Printing in Windows →P.26
- Printing from Mac OS X → P.27

The printer now starts printing the print job.

### Loading and Printing on Sheets

These are the basic steps for loading sheets and then printing. Follow the steps below to load and print on sheets.

1

6

For details on supported types and sizes of paper, see **Paper Sizes** or the Paper Reference Guide. (See "Paper Sizes.") →P.522 (See "Types of Paper.") →P.522

• Borderless printing is not supported on sheets. For the features and the main printing methods available for sheet printing, see "Printing Options Using Rolls and Sheets." →P.20

Turn the printer on. (See "Turning the Printer On and Off.")  $\rightarrow$  P.21

Complete settings in the printer driver for the type of paper and other details.

- Specifying Paper in the Printer Driver (Windows) →P.174
- Specifying Paper in the Printer Driver (Mac OS X) → P.360

Start printing.

### **Printing in Windows**

Print from the application menu.

1

26

• We recommend exiting unnecessary applications before printing. Running several applications while printing may interrupt the transfer of print data and affect printing quality.

In the source application, select **Print** from the **File** menu to display the dialog box for printing conditions.

27

**Basic Printing Workflow** 

After confirming that the printer is selected in the dialog box, click Print or OK to start printing.

- The appearance of the dialog box varies depending on the
- Note software application. In most cases, the dialog box includes basic printing options and enables you to choose the printer, specify the range of pages, number of copies, and so on.

Example: Print dialog box displayed by the application

Pages:	1	Collate
	single page number or a single or example, 5-1 2	11 22 3

• If another printer is selected, select the printer you want to use under **Select Printer** or in the dialog box displayed after clicking **Printer**.

Settings for many printing methods (including enlarged or reduced printing, borderless printing, and so on) are displayed in the printer driver dialog box. There are two ways to access the printer driver dialog box, as follows.

- From the application (See "Accessing the Printer Driver Dialog Box from Applications.") →P.179
- From the operating system menu (See "Accessing the Printer Driver Dialog Box from the Operating System Menu.") →P.181

### Printing from Mac OS X

Print from the application menu after registering the printer.

 We recommend exiting unnecessary applications before printing. Running several applications while printing may interrupt the transfer of print data and affect printing quality.

### Registering the printer

Before printing, you must register the printer in **imagePROGRAF PrinterSetup.app**. For instructions on registering the printer, see "Configuring the Printer Driver Destination."  $\rightarrow$  P.709

During this setup process, the printer will not be listed among available printers if it is off or disconnected.

### Printing from the application software

In the application software, select **Print** from the **File** menu to display the dialog box for printing conditions.

 This dialog box includes basic printing options and enables you to choose the printer, specify the range of pages, number of copies, and so on.

# Canceling print jobs

Canceling Print Jobs from the Control Panel	. 29
Canceling Print Jobs from Windows Canceling Print Jobs from Mac OS X	

### **Canceling Print Jobs from the Control Panel**

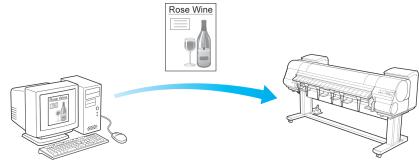

To cancel printing or reception of print jobs, press the **Stop** button on the Control Panel.

When you press the **Stop** button during printing, printer operation varies depending on the current status.

• If you press the Stop button before printing starts

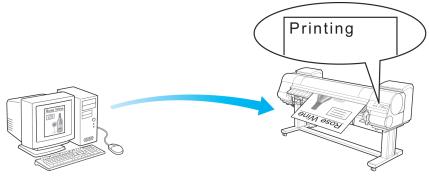

Pressing the **Stop** button before printing starts will display a confirmation message. To cancel the print job, select "**Yes**".

The Printer does not print.

### • If you press the **Stop** button during printing

Pressing the **Stop** button during printing will display a confirmation message. To cancel the print job immediately, select "**Yes**".

The printer stops immediately.

### **Canceling Print Jobs from Windows**

In the printer window, you can cancel jobs that are being sent to the printer.

Using imagePROGRAF Status Monitor, you can cancel print jobs that have already been received by the printer or that are currently being printed.

Click the printer icon in the taskbar to display the printer window.

 You can also display this window by double-clicking the printer icon in the Printers and Faxes (or Printer) folder, accessible through the Windows start menu.

Right-click the job to cancel and select Cancel.

🖶 Canon iPF9400					- • •

The screen may differ slightly depending on the model you are using.

### **Canceling Print Jobs from Mac OS X**

In the printer window, you can cancel jobs that are being sent to the printer. Otherwise, you can cancel jobs from imagePROGRAF Printmonitor if they have been received by the printer or are currently being printed.

- · Print jobs are shown in the printer window while they are being sent from the computer. After transmission, jobs are not displayed even during printing. Note
  - Print jobs are displayed in the imagePROGRAF Printmonitor window from the moment the printer starts receiving the print data until the moment printing is finished. They are not displayed before print data is sent to the printer, even if the computer has started preparing the print data.

Basic Printing Workflow

Canceling print jobs

1 Click the printer icon in the **Dock** to display the printer window. Click Pause Printer to stop printing. 2 🔋 iPFxxxx (1 Job) 0 0 Ť П É Printing 'sample.txt'. Processing lob User xxxxxxxx When xx/xx/xx xx:xx Statu Completed sample.txt 3 If there are no jobs in the printer window that can be iPFxxxx (1 Job) canceled, (that is, if the print data has already been ì sent to the printer), click Utility to display imagePROG-RAF Printmonitor. # **Choosing Paper for Printing**

Choosing a Paper for Printing Changing the Type of Paper	
Specifying Paper in the Printer Driver Specifying Paper in the Printer Driver (Windows) Specifying Paper in the Printer Driver (Mac OS X)	174

### **Choosing a Paper for Printing**

Select the appropriate media type from the printer control panel or printer driver to match the paper loaded in the printer. The appropriate media type differs between the case of genuine Canon paper or Canon feed confirmed paper and the case of paper other than Canon feed confirmed paper. Select the media type by following the description below. For information on how to select the media type in the printer control panel, see "Changing the Type of Paper"  $\rightarrow P.537$ , and for information on how to select the media type in the printer driver, "Specifying Paper in the Printer Driver (Windows)"  $\rightarrow P.174$  or see "Specifying Paper in the Printer Driver (Mac OS X)."  $\rightarrow P.360$ 

• If you use paper other than Canon feed confirmed paper, Canon provides absolutely no guarantees regarding print quality or paper feed properties.

- Genuine Canon paper and Canon feed confirmed paper are detailed in " Paper Reference Guide".
- Note An error message is displayed on the printer Control Panel if the media type specified in the printer driver does not match the media type specified in the printer. Although you can print under these conditions, the printing results may not be suitable.

### • Genuine Canon paper or Canon feed confirmed paper

For genuine Canon paper or Canon feed confirmed paper, select the settings that are optimized for that type of paper. For more information on the settings for genuine Canon paper or Canon feed confirmed paper, see " Paper Reference Guide."

### • Paper other than Canon feed confirmed paper

For paper other than Canon feed confirmed paper, one method is to select from existing settings and another method is to create a new media type and add it to the printer control panel and printer driver. For details, see "Using Paper Other Than Genuine Paper and feed confirmed Paper." -P.525

### **Specifying Paper in the Printer Driver**

If you replace the paper, complete the printer driver settings for the paper type and size. For instructions on configuring paper settings in the printer driver, refer to the following topics, as appropriate for your computer and operating system.

- Specifying Paper in the Printer Driver (Windows) —P.174
- Specifying Paper in the Printer Driver (Mac OS X) → P.360

Printing Office Documents Printing Office Documents (Windows) Printing Office Documents (Mac OS X)	. 48
Using PosterArtist to Compose Originals	52

#### **Printing Photos and Images**

By selecting the following Print Target from Easy Settings of the printer driver, you can easily configure the printing of illustrations and photos.

	Print Target	Description
	Photo (Color)	Print photographic images from digital cameras with an optimal set- ting.
	Photo (Monochrome)	Print monochrome photos with an optimal setting.
	Poster	An optimal setting for posters. Print in vivid colors with impact and high saturation.
	Faithful Color Reproduction	Print with minimum color difference. Suitable for printing scanner im- ages and when print results are too vivid.
Adobe RGB	Photo (Adobe RGB)	Setting suitable for printing images created using the color space of Adobe RGB in optimal color.

 Depending on the Media Type setting, some Print Target options may not be available. Important

You can check the settings values for each print target by clicking View Settings.

Note • You can also fine-tune these values as needed. ( Advanced Settings) For details on Advanced Settings, refer to "Giving Priority to Particular Graphic Elements and Colors for Printing -P.61".

For instructions on printing photos and images, refer to the following topics, as appropriate for your computer and operating system.

Printing Photos and Images (Windows) → P.38

n III

Printing Photos and Images (Mac OS X) → P.39

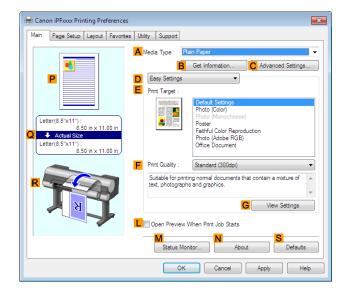

#### Printing Photos and Images (Windows)

This topic describes how to print photos based on the following example.

- Document: Photo image from a digital camera
- Page size: 10×12 inches (254.0×304.8 mm)
- Paper: Roll

1

- Paper type: Canon Premium Glossy Paper 2 280
- Roll paper width: 10 inches (254.0 mm)
  - Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")
- 3 Make sure the **Main** sheet is displayed.

4 In the A Media Type list, select the type of paper that is loaded. In this case, click Canon Premium Glossy Paper 2 280.

In the **A Media Type**, choose the type of paper used for printing, such as Glossy Paper, **Canon Coated Paper**, and so on. Make sure the paper you select is loaded in the printer.

 The paper type setting in the printer driver and related software (as well as on the Control Panel) is updated when you install the Media Configuration Tool from the User Software CD-ROM or if you change paper information by using the Media Configuration Tool. For details, see Media Configuration Tool (
 —P.582).

5 After confirming that D Easy Settings is selected, click Photo (Color) in the E Print Target list.

• You can check the settings values selected in the E Print Target list by clicking G View Settings. Note iPF9400

In the A Page Size list, click the size of the original as specified in the application. In this case, click 10"x12".
Select and click a roll paper in the L Paper Source list.
Select the width of the loaded roll in the M Roll Paper Width list—in this case, 10-in. Roll (254.0mm).
Specify additional printing conditions. For details on available printing conditions, see "Printer Driver Settings —P.172"
Confirm the print settings and print as desired.
For instructions on confirming print settings, see "Confirming Print Settings." —P.176

#### Printing Photos and Images (Mac OS X)

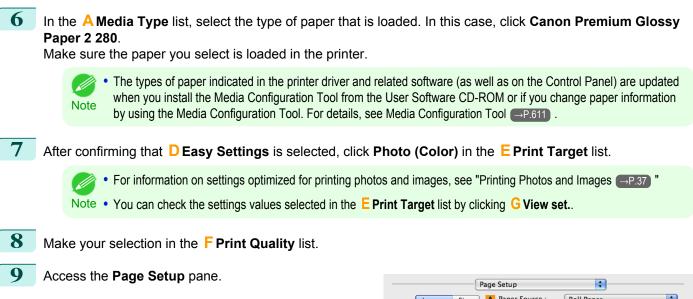

This topic describes how to print photos based on the following example.

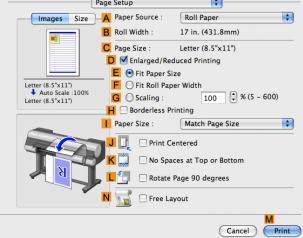

- Document: Photo image from a digital camera
- Page size: 10×12 inches (254.0×304.8 mm)
- Paper: Roll paper
- Paper type: Canon Premium Glossy Paper 2 280
- Roll paper width: 10 inches (254.0 mm)

1 This sets the <b>B</b> Format for and <b>C</b> Paper S	ize.
<ul> <li>The configuration method varies dependent of the application software you are using. If Page Setup is displayed in the applications are configured by opening the Pathox from Page Setup.</li> </ul>	A Settings: Page Attributes ÷
If it is not displayed, the settings are c per part of the printer driver displayed <b>Print</b> from the application software me	when you select B Presets: Default Settings +

- 2 Select the printer in the **A Printer** list.
- 3 In the **F Paper Size** list, click the size of the original. In this case, click **10"x12"**.
- 4 If you configured the settings using the **Page Attributes** dialog box, click **FOK** to close the dialog box, and then select **Print** from the application software menu.
- 5 Access the **Main** pane.

H Main		•
Images Size A	Media Type :	Plain Paper 🛟

F	Print Quality :	Standard(300dpi)
<b>F</b>		ting normal documents that contain , photographs and graphics.
		G View set.
C C	Print Preview	L Printer Information
		Cancel Print

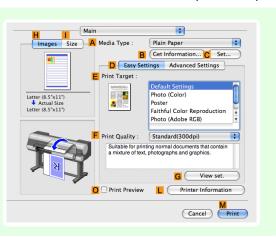

**10** Select and click a roll paper in the **A Paper Source** list.

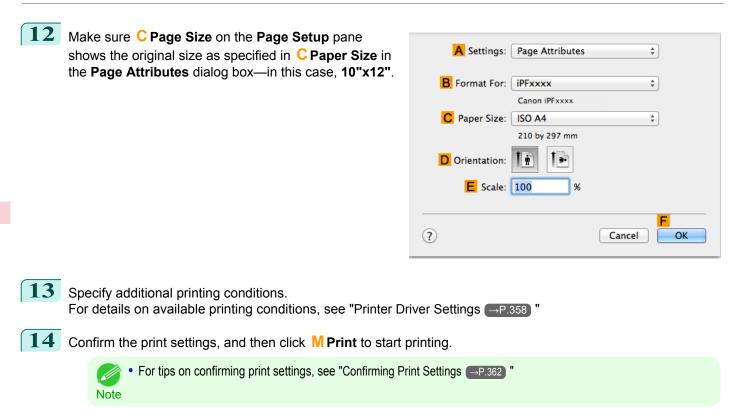

11 Make sure the width of the loaded roll is displayed in the BRoll Width list—in this case, 10 in. (254.0mm).

• If the width of the roll loaded in the printer is not shown in **B Roll Width**, click **L Printer Information** on the **Main** 

pane to update the printer information.

#### **Printing from Photoshop**

You can print images in the Adobe RGB color space that you have created in Photoshop, the Adobe Systems photo retouching application. Using the dedicated Photoshop printer driver plug-in (provided with the printer) makes it easy to print Adobe RGB images more attractively.

• Using the Plug-in to Print

The imagePROGRAF Print Plug-In for Photoshop is a dedicated plug-in provided with the printer that you can load in Photoshop and customize for your printing needs. By using the plug-in, you can print while preserving the 16-bit RGB data from Photoshop without losing the exceptional color gradations of original image. Some of the settings and customizations available in the plug-in are as follows.

- Automatic detection of the color space (sRGB or Adobe RGB) for automatic selection of the optimal profile. This feature eliminates the need to complete intricate settings when printing Adobe RGB images.
- Advanced gray adjustment, including adjustment of tone curves, in addition to an array of standard adjustments for color balance, brightness, contrast, highlight, and shadow.
- Fine-tune color tones in Photoshop while viewing a preview that accurately reproduces printing results.
- With print log management, you can save and load setting parameters from past print jobs.

• imagePROGRAF Print Plug-In for Photoshop for Windows and Macintosh are provided with the printer.

For instructions and details on which versions of Photoshop are compatible with the imagePROGRAF Print Plug-In for Photoshop, refer to the following topics, as appropriate for your computer and operating system.

- Print Plug-In (Windows) →P.251
- Print Plug-In (Macintosh) →P.458
- Using the Printer Driver to Print

Note

The printer driver offers the following settings and adjustments.

• Choose the standard sRBG color space or Adobe RGB as desired.

• Adjust the color balance, brightness, contrast, saturation, and gray levels.

For instructions on using the printer driver to print Adobe RGB images created in Photoshop, refer to the following topics, as appropriate for your computer and operating system.

- Printing Adobe RGB Images (Windows) →P.43
- Printing Adobe RGB Images (Mac OS X) → P.46

#### Printing Adobe RGB Images (Windows)

This topic describes how to print Adobe RGB images based on the following example.

- Document: Adobe RGB image created in Photoshop
- Page Size: 10×12 inches (254.0×304.8 mm)
- Paper: Roll
- Paper type: Canon Premium Glossy Paper 2 280
- Roll Paper Width: 10 inches (254.0 mm)

In Photoshop, select no color-matching.

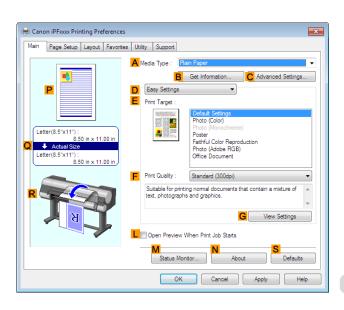

Important • In the printer driver settings, select Driver Matching Mode and choose Adobe RGB in Color Space.

In Photoshop, create an image in the Adobe RGB color space.

The following procedures are based on the example of Photoshop CS3/CS4/CS5.

Note • For instructions on creating Adobe RGB images, refer to the Photoshop documentation.

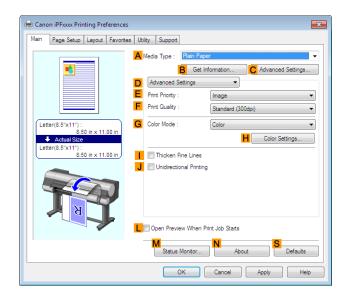

- 2 Choose **Print with Preview** from the **File** menu to display the **Print** dialog box.
- 3 Make sure the setting mode is **Color Management**.
- 4 In the Color Handling list in Options, click Printer Manages Colors.
- 5 Click **Print** to display the **Print** dialog box.
- **6** Select the printer and click **Properties** to display the printer driver dialog box.
- 7 Make sure the **Main** sheet is displayed.

**Enhanced Printing Options** 

**9** Click **D** Advanced Settings to switch the print mode.

- Click Image in the E Print Priority list.
   Select the print quality in the F Print Quality list.
   Options displayed in the F Print Quality list vary depending on the paper type. Note
- 12 Click Color in the G Color Mode list.
- 13 Click H Color Settings to display the Color Settings dialog box.

Color Adjustment Matching	1			-

#### **Printing Office Documents**

By selecting Office Document from Easy Settings of the printer driver, you can easily configure settings for printing office documents.

Print Target	Description
Office Document	Setting optimized for printing general office documents such as ma- terials for distribution so that they can be viewed easily.

- You can check the settings values for each print target by clicking View Settings.
- Note You can also fine-tune these values as needed. (Advanced Settings) For details on Advanced Settings, refer to "Giving Priority to Particular Graphic Elements and Colors for Printing = P.61".

For instructions on printing office documents, refer to the following topics, as appropriate for your computer and operating system.

- Printing Office Documents (Windows) → P.48
- Printing Office Documents (Mac OS X) → P.50

#### **Printing Office Documents (Windows)**

48

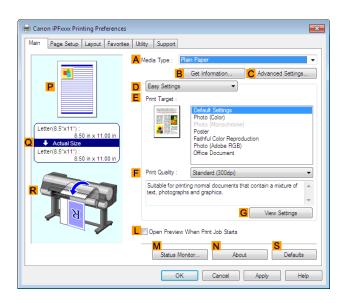

This topic describes how to print office documents based on the following example.

- Document: Office document created using word-processing or spreadsheet programs
- Page size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])
- · Paper: Sheets

5

Enhanced Printing Options

- Paper type: Plain Paper
- Paper size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])
- 1 Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")
- 3 Make sure the **Main** sheet is displayed.

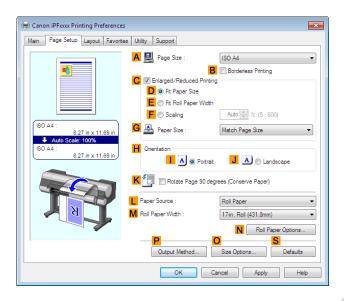

4 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.

After confirming that D Easy Settings is selected, click Office Document in the E Print Target list.

• You can check the settings values selected in the **E Print Target** list by clicking **G View Settings**. Note

6 Click the **Page Setup** tab to display the **Page Setup** sheet.

In the A Page Size list, click the size of the original as specified in the application. In this case, click ISO A4.

Click **Cut Sheet** in the **L** Paper Source list.

7

8

Note

9

For details on available printing conditions, see "Printer Driver Settings →P.172) "

For tips on confirming print settings, see "Confirming Print Settings —P.176)"

#### Printing Office Documents (Mac OS X)

This topic describes how to print office documents based on the following example.

- · Document: Office document created using word-processing or spreadsheet programs
- Page size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])
- Paper: Sheets
- Paper type: Plain Paper
- Paper size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])

#### This sets the **B** Format for and **C** Paper Size.

<ul> <li>The configuration method varies depending on the OS and application software you are using.</li> <li>If Page Setup is displayed in the application menu, the settings are configured by opening the Page Attributes dialog box from Page Setup.</li> </ul>	A Settings: Page Attributes   B Format For: IPFxxxx   Canon IPFxxxx   Canon IPFxxxx   Paper Size:   ISO A4   210 by 297 mm   D Orientation:   Image: Scale:   100   %

- 2 Select the printer in the **A Printer** list.
  - In the **F** Paper Size list, click the size of the original. In this case, click **ISO A4 for Paper Tray (Large Mar-gins)**.
- 4 If you configured the settings using the **Page Attributes** dialog box, click **FOK** to close the dialog box, and then select **Print** from the application software menu.

1

7

Access the Main pane.

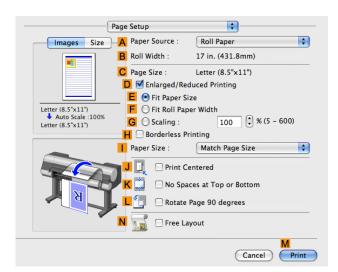

6 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.

After confirming that **D** Easy Settings is selected, click Office Document in the E Print Target list.

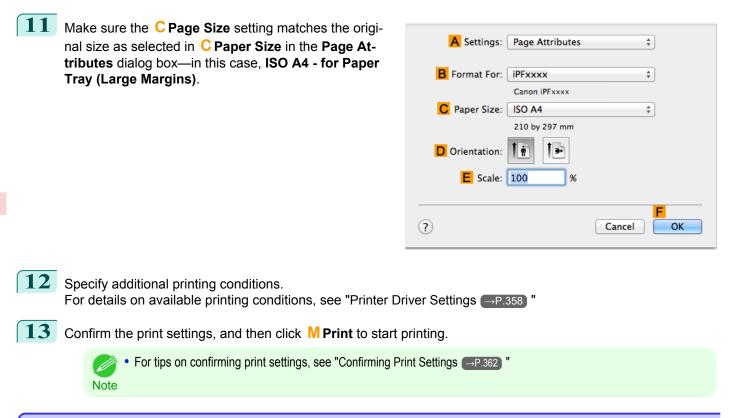

• You can check the settings values selected in the E Print Target list by clicking G View set. Note

- 8 Make your selection in the **F** Print Quality list.
  - 9 Access the Page Setup pane.

10 Click Cut Sheet in the A Paper Source list.

#### Using PosterArtist to Compose Originals

You can print a variety of source documents from word-processing or spreadsheet programs or screen shots from web browsers after composing an original with them using PosterArtist.

This topic describes how to use PosterArtist to compose originals from multiple applications, creating a poster layout for printing.

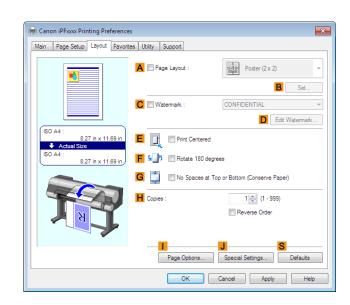

- Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then open the printer driver dialog box. (See "Accessing the Printer Driver Dialog Box from Applications (Windows).") →P.179

Make sure the **Main** sheet is displayed.

🖶 Canon iPFxxxx Printing Preference	es	x		
Main Page Setup Layout Favor	ites Utility Support	_		
Letter(8.5'x11''):           8.50 in x 11.00 in           Letter(8.5'x11'):           8.50 in x 11.00 in	A Media Type : Plan Paper G Get Infomation Fasy Settings Print Target :			
* <b>T</b>	Print Quality : Standard (300dpi)     Suitable for printing normal documents that contain a midure of text, photographs and graphics.     G View Settings

	OK Cancel Apply Help			

4 Click the Layout tab to display the Layout sheet.

5 Select the **A Page Layout** check box.

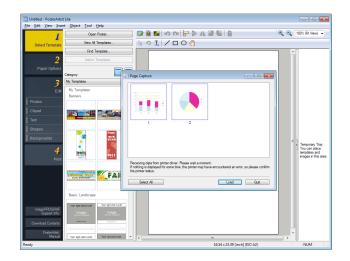

Click in the Edit Using PosterArtist in the A Page Layout list.

6

This function cannot be used with a 64-bit version OS.

7 When you attempt to print, PosterArtist starts up and the PageCapture window is displayed. (At this point, the document will not be printed yet.)

8 Choose the page to load in PosterArtist.

9 Edit and rearrange the image in the PosterArtist window as desired. Without closing the PosterArtist window, repeat steps 1-8 to arrange originals from multiple applications on the same page.

For details on how to edit and sort images, refer to the PosterArtist Manual. Note

**10** Print from the PosterArtist menu.

### **Adjusting Images**

Adjusting the Color in the Printer Driver Fine-Tuning Colors of Photos and Images (Windows) Fine-Tuning Colors of Photos and Images (Mac OS X)	56
Giving Priority to Particular Graphic Elements and Colors for Printing Choosing the Document Type and Printing Conditions (Windows) Choosing the Document Type and Printing Conditions (Mac OS X)	63

#### Adjusting the Color in the Printer Driver

Color settings specified in the application for your documents are essentially given priority over other settings for each print job, but further color adjustment is possible in the printer driver.

#### Color Mode

Choose how the printer driver processes color, as desired.

The available options vary depending on the color mode.

Color Mode	Description	Color Adjustment
Color	Print in color.	You can select the color balance and color matching functions.
Monochrome (Photo)	Grayscale printing optimized for mono- chrome photos.	You can adjust the color balance in ways tail- ored to monochrome photos.
Monochrome	Print in grayscale.	You can adjust the color balance.
No color correction (*1)	Prints without performing color-matching in the printer driver.	You can adjust the color balance.

\*1: If No color correction is selected, the Matching sheet / Matching pane is not displayed.

#### Color Adjustment

You can adjust colors separately for images, graphics, and text documents.

Adjustment Item	Description		
Cyan	Fine-tune color tones by adjusting the levels of Cyan, Magenta, and Yellow.		
Magenta			
Yellow			
Gray Tone	Adjust the grayscale, in a range from cool, blue tones to warm, red tones.		
Brightness	Adjust the brightness of printed images while keeping the darkest and lightest portions intact.		
Contrast	Adjust the contrast of the darkest and lightest portions relative to each other. For soft gradation, decrease the contrast. For hard gradation, increase the contrast.		
Saturation	Adjust the level of color saturation, in a range from subdued to vivid.		

Click **Object Adjustment** to open the **Object Adjustment** dialog box, which allows you to select the color adjustment target from **Image**, **Graphics**, and **Text**.

#### Matching

54

You can choose the color-matching mode and method.

By adjusting the color-matching mode and method, you can make printed colors match the colors of on-screen images more closely.

• If No color correction is selected under Color Mode, the Matching cannot be changed.

Important

		, ,	
Matching Mode	Description	Remarks	
Driver Matching Mode	Enables printing of optimal color tones using a driver specific color profile.	You should normally select this mode.	
ICC Matching Mode	Enables color matching using ICC profiles. Select this if you want to print by specifying the input profile, printer profile, and match- ing method in detail.	This allows you to use ICC profiles for digital cameras and scanners, ICC profiles created using the profile creation tool, etc.	
Host ICM Mode	Enables color matching by the host comput- er using the ICM function of Windows. Select this if you want to print from an appli- cation that supports the ICM function.	Available when using Windows.	
ColorSync	Enables color matching by using the Color- Sync function of Mac OS. Select this if you want to perform soft proof- ing using ColorSync before printing.	Available when using Mac OS. To select <b>ColorSync</b> , choose <b>ColorSync</b> on the <b>Color Matching</b> panel.	
Matching Method	Description	Remarks	
Auto	Color-matching optimized for images, graphics, or text.	The available options and their display order vary depending on your selected color-match-	
Perceptual	Color-matching optimized for printing typical photos attractively. Smooth gradation is a feature. This is also an easy-to-use mode when performing color adjustment using ap- plication software.	ing mode, as well as the operating system.	
Colorimetric	Color-matching optimized for printing image data with accurate colors in input color space. This is the easiest-to-use mode when you want to adjust the color and print. However, gradation may be lost for colors of wider range than the color reproduction range of the printer. Generally, this is also called relative colorimetric.		
Colorimetric (No Wht-pnt Corr)	Color-matching, which uses the same pro- cessing method as <b>Colorimetric</b> process- ing, is useful when you want to reproduce colors down to the color of the paper. Color- matching is often called "absolute colorimet- ric."		
Saturation	Color-matching optimized for printing posters, etc., vividly.		
Monitor Matching	Suitable for optimized printing to match the appearance on the monitor. Color-matching optimized for accurately reproducing colors on the calibrated sRGB or AdobeRGB monitor.		

For instructions on color adjustment, refer to the following topics, as appropriate for your computer and operating system.

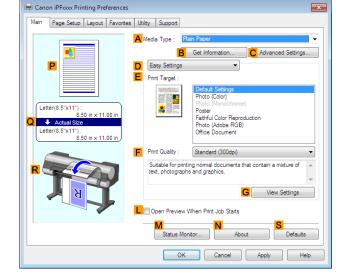

- Fine-Tuning Colors of Photos and Images (Windows) →P.56
- Fine-Tuning Colors of Photos and Images (Mac OS X) →P.58

#### Fine-Tuning Colors of Photos and Images (Windows)

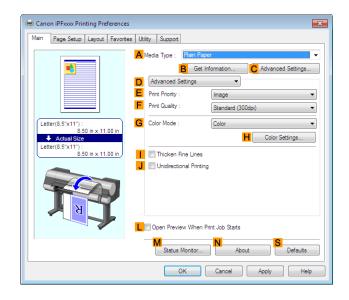

You can specify your own print settings instead of using the **Print Target** presets. This topic describes how to fine-tune the color tone of photos before printing.

# Adjusting Images

- Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")
- 3 Make sure the **Main** sheet is displayed.

- 4 In the **A Media Type** list, select the type of paper that is loaded.
- 5 Click **D**Advanced Settings to switch the print mode.

56

Click **Color** in the **G** Color Mode list.

8

9

# 7 Click **H** Color Settings to display the Color Settings dialog box.

### **10** On the **Color Adjustment** pane, adjust the color tones, brightness, and so on as desired.

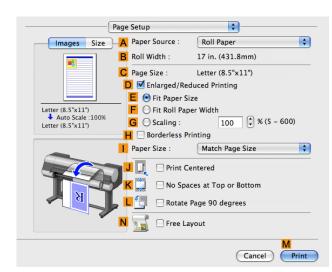

Adjustment Item	Description		
D Cyan	Fine-tune color tones by adjusting the levels of Cyan, Magenta, and Yellow.		
E Magenta			
<b>F</b> Yellow			
G Gray Tone	Adjust the gray tone to suit the images of monochrome photos. Choose cool black (tinged with blue), pure black (neutral), warm black (tinged with red), and so on. Select the color tone in the color region or from the list.		
H Brightness	Adjust the brightness of printed images while keeping the darkest and lightest portions intact.		
Contrast	Adjust the contrast of the darkest and lightest portions relative to each other. For soft gradation, decrease the contrast. For hard gradation, increase the contrast.		
J Saturation	Adjust the level of color saturation, in a range from subdued to vivid.		

Click Object Adjustment to open the Object Adjustment dialog box, which allows you to select the color adjustment target from Images, Graphics, and Text.

**11** Click **OK** to close the **Color Settings** dialog box.

#### 12 Access the Page Setup pane.

61

13 Confirm the settings of A Paper Source and C Page Size.

**14** Confirm the print settings, and then click **M Print** to start printing.

For tips on confirming print settings, see "Confirming Print Settings —P.362"

#### Giving Priority to Particular Graphic Elements and Colors for Printing

You can specify detailed print settings as desired for the quality level, colors, and other criteria.

#### Print Priority

Note

Choose the graphic elements that you want to emphasize for printing.

Print Priority (*1)	Description
Image	A setting for posters or other documents made up mainly of photos or images, or for emphasizing photos or images in printed documents.
Line Drawing/Text	Choose this setting for CAD drawings made up mainly of intricate lines, or to enhance the finish- ing of fine text. However, the quality may not be sufficient when printing photos or images that require a lot of color coverage. In this case, choose <b>Image</b> instead.
Office Document	Choose this setting for better legibility of documents combining text and graphics, such as documents and presentation material created with typical office applications.
Proof	This is a setting for enhancing the reproduction of text, illustrations, and photos on print proofs. However, this takes more time than regular printing.

\*1: Options suitable for the selected type of paper are listed under Print Priority.

#### • Print Quality

Choose the print quality.

The printing mode is determined by a combination of the print quality and resolution.

Print Quality (*1)	Description	Print Priority
Highest	A setting for printing at the highest resolution when quality is most important. Printing takes longer and consumes more ink than in other modes, but this mode offers superior printing quality.	Image Proof

Print Quality (*1)	Description	Print Priority
High	Choose this setting to print at high resolution when quality is most important. Printing takes longer and consumes more ink than in <b>Standard</b> or <b>Fast</b> modes, but this mode offers exceptional printing quality.	Image Line Drawing/Text Proof
Standard	Choose this setting to print at standard resolution when quality and speed are both important. Printing takes less time than in <b>Highest</b> or <b>High</b> mode.	Image Line Drawing/Text Office Document Proof
Fast	Choose this setting to print faster. Printing in draft mode can help you work more effi- ciently when checking layouts.	Image Line Drawing/Text

\*1: Options suitable for the selected Print Priority are listed under Print Quality.

#### Color Settings

Setting Item	Options	Description
Color Mode (*1)	Color Monochrome (Photo) Monochrome No color correction	Choose whether to print in color or mono- chrome. (Refer to "Adjusting the Color in the Printer Driver →P.54 ")
Color Adjustment (Images)	Cyan	You can adjust the levels of cyan, magenta,
Color Adjustment (Graphics)	Magenta Yellow	and yellow as well as the brightness, con- trast, saturation, and gray tone separately for
Color Adjustment (Text)	Gray Tone Brightness Contrast Saturation	images, graphics, and text documents. If you choose <b>Monochrome</b> in <b>Color Mode</b> only <b>Brightness</b> and <b>Contrast</b> can be adjus- ted.
Gray Adjustment	Color Balance Brightness Contrast Highlight Shadow	Choose the gray tone color balance ( <b>Cool</b> <b>Black</b> or <b>Warm Black</b> ) and adjust levels of brightness, contrast, highlight, and shadow as desired. These levels can be adjusted when <b>Mono-</b> <b>chrome (Photo)</b> is selected in <b>Color Mode</b> .
Color-Matching Modes	Driver Matching Mode ICC Matching Mode	Choose the color-matching mode. Other col- or-matching modes may be provided by the computer operating system, such as ICM and ColorSync.
Color-Matching Method (*2)	Auto Perceptual Saturation Monitor Matching Colorimetric other	Choose the color-matching method. The available options vary depending on your selection in <b>Color-Matching Mode</b> .
Color Space (*3)	sRGB Adobe RGB	Choose a standard color space ( <b>sRGB</b> ) or an expanded color space ( <b>Adobe RGB</b> ).

\*1: Options suitable for the selected **Print Priority** and **Media Type** are listed under **Color Mode**.

\*2: The order of options displayed varies depending on the operating system.

\*3: Adobe RGB is not available if an incompatible combination of the paper type and print quality is selected.

#### Enhancing printing quality

Setting Item	Description
Thicken Fine Lines	Prints making fine lines appear thicker.

Setting Item	Description
Unidirectional Printing	Prints by suppressing color variations and misaligned ruled lines. However, this takes more time than regular printing.

To print at a higher level of quality, in the printer driver, choose **High** or **Highest** in **Print Quality**, and select the **Unidirectional Printing** check box.

For instructions on specifying the print quality and color settings before printing, refer to the following topics, as appropriate for your computer and operating system.

- Choosing the Document Type and Printing Conditions (Windows) → P.63
- Choosing the Document Type and Printing Conditions (Mac OS X) → P.65

#### **Choosing the Document Type and Printing Conditions (Windows)**

You can specify your own print settings instead of using the **Print Target** presets. This topic describes how print photographic images in monochrome.

2

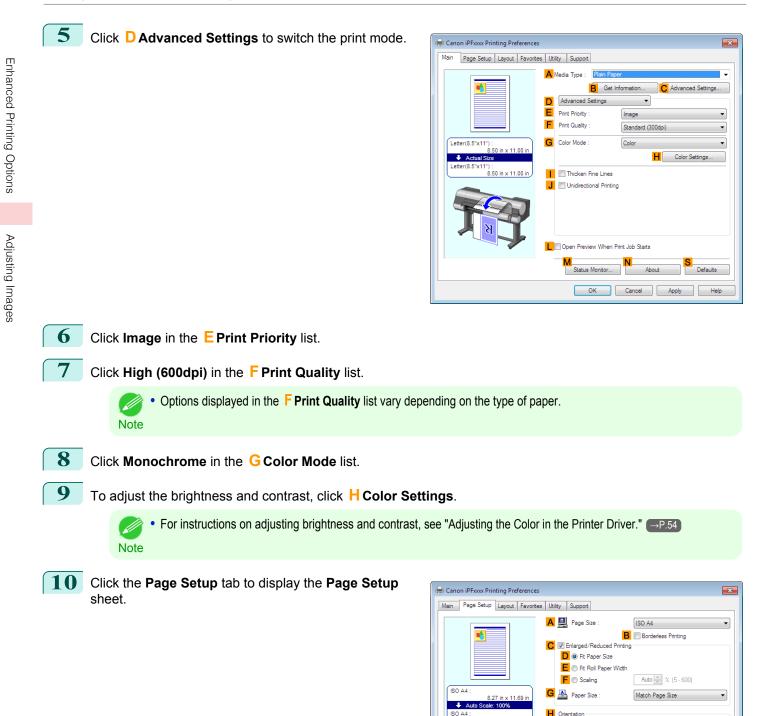

Choose **Print** in the application menu.

Select the printer in the dialog box, and then display the printer driver dialog box. (Refer to "Accessing the Printer Driver Dialog Box from Applications  $\rightarrow P.179$ ")

3 Make sure the **Main** sheet is displayed.

#### **Resizing Originals to Match the Paper Size**

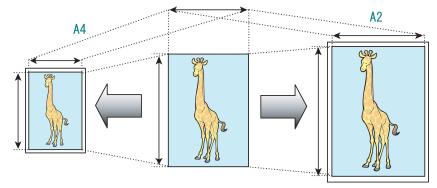

You can freely adjust the size of originals by enlarging or reducing them as desired.

#### • Enlarged/Reduced Printing

Enlarge or reduce the original in the printer driver, as desired.

#### • Fit Paper Size

Enlarge or reduce the original to match the size of the paper you are using.

For instructions on resizing originals to match the paper size, refer to the following topics, as appropriate for your computer and operating system.

- Resizing Originals to Match the Paper Size (Windows) → P.68
- Resizing Originals to Match the Paper Size (Mac OS X) → P.70

For better printing results when enlarging photos from a digital camera in TIFF or JPEG format, use an image-editing application software such as Adobe Photoshop to specify an image resolution of 150 dpi or more at actual size.

#### **Resizing Originals to Match the Paper Size (Windows)**

This topic describes how to enlarge originals before printing to match the paper size, based on the following example.

- Document: Any Type
- Page size: A4 (210.0×297.0mm)/Letter (8.3 × 11.7 in)
- Paper: Roll

- Paper type: Plain Paper
- Roll paper width: A2/A3 roll (420.0 mm [16.5 in])
- Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then open the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179")

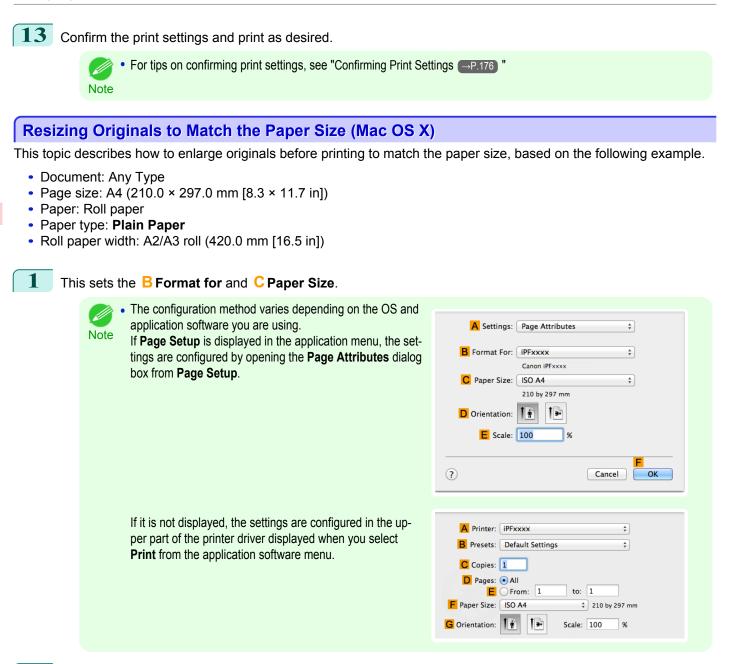

3	Make sure the	e <b>Main</b> sheet is	displayed.

# Printing at full size

Printing on Oversize Paper Printing at Full Size (Windows) Printing at Full Size (Mac OS X)	85
Borderless Printing at Actual Size Borderless Printing at Actual Size (Windows) Borderless Printing at Actual Size (Mac OS X)	90

# **Printing on Oversize Paper**

You can print all areas of the original at full scale by selecting the paper size from **Oversize** (sizes where the margins needed for printer operation have been added to the page size). We recommend when printing with a focus on image.

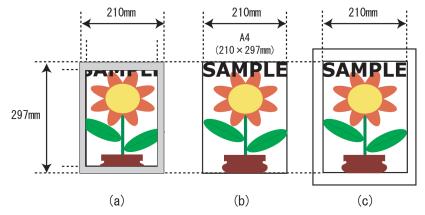

• If you prepare an original for printing without a margin and print it on paper of regular size, the image near the edge will not be printed.

#### • Oversize

When printing on standard paper sizes, printing is performed by taking the margins necessary for printer operations inside the region of the original. (See "Print Area.")  $\rightarrow$  P.935 For example, printing the A4 size (210 x 297 mm) original shown in Figure (b) gives the result as shown in Figure (a).

However, if **Oversize** paper is selected, printing is performed by taking the margins necessary for printer operations outside of the region of the original to give the result as shown in Figure (c).

The A4 size print as shown in Figure (b) can then be obtained by trimming the margins from the periphery after printing.

• When printing on **Oversize** paper, load paper larger than the page size—a size that includes the margin required by the printer.

- Sheets: Load paper that is at least 10 mm (0.39 in) wider and 28 mm (1.10 in) higher than the page size
- Rolls:Load paper that is at least 10 mm (0.39 in) wider and 10 mm (0.39 in) higher than the page size
- - Oversized printing (selecting Oversize in Page Size) is only available in Windows.
  - To perform oversized printing on a Macintosh computer, you must specify a non-standard page size and print on it.
  - To specify a non-standard paper size in oversized printing, register the paper size as a Custom Paper Size. Oversized printing is not available with **Custom Size**. (See "Printing on Non-Standard Paper Sizes.") →P.116

For instructions on oversized printing, refer to the following topics, as appropriate for your computer and operating system.

- Printing at Full Size (Windows) →P.85
- Printing at Full Size (Mac OS X) → P.86

### Printing at Full Size (Windows)

This topic describes how to print at full size based on the following example. (Oversized Printing)

- Document: Any Type
- Page Size: A4 (210.0×297.0 mm)/Letter (8.3 × 11.7 in)
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: A2/A3 roll (420.0 mm [16.5 in])
- 1 Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179")

For tips on confirming print settings, see "Confirming Print Settings —P.362"

# **Borderless Printing at Actual Size**

Take advantage of borderless printing to print documents such as posters (made up mainly of photos or images) without a surrounding margin, or border.

Borderless printing is only available with rolls.

#### Borderless Printing

Note

In regular printing, a margin required by the printer is added around the original. With borderless printing, you can print documents without the margin, so that the printed image covers the entire surface of the paper.

Paper incompatible with the printer's auto cut function can be printed without borders on the left and right sides only.

Printing without borders on the left and right sides only is available when **CutDustReduct.** is set to **On**.

• When printing without borders, be certain to set the blue switch on the platen to the ● side. If the switch is set incorrectly, print quality may deteriorate. (See "Setting the Blue Switch on the Platen.") → P.893

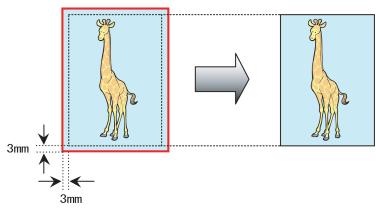

- There are limits on the media type and roll paper width of paper that can be used for borderless printing. For information on the media types that can be used for borderless printing, see " Paper Reference Guide."
- Borderless printing is not possible if details such as crop marks and margins are included as data on the periphery of the original.
- These features cannot be used in combination with borderless printing: special page layouts, centering originals, and printing cut lines on rolls.
- If Fit Paper Size or Print Image with Actual Size (Windows only) is selected while performing borderless printing, Rotate Page 90 degrees (Conserve Paper) cannot be selected. Note that if borderless printing is possible, then even if the original is rotated 90 degrees, it will be printed by automatically rotating the page by 90 degrees.

#### Borderless Printing Method

Choose the method of borderless printing that suits the original, as desired.

#### • Print Image with Actual Size

Prints originals at actual size, without enlarging or reducing them. We recommend when focusing on image quality. You should create the original at a size larger by 3 mm on each side than the paper size.

Note • When performing borderless printing without using **Print Image with Actual Size**, the image deteriorates slightly because the image is automatically enlarged.

For instructions on borderless printing of photos and images at actual size, refer to the following topics, as appropriate for your computer and operating system.

- Borderless Printing at Actual Size (Windows) → P.90
- Borderless Printing at Actual Size (Mac OS X) → P.92

# Borderless Printing at Actual Size (Windows)

This topic describes how to print borderlessly at actual size based on the following example.

When borderless printing is used, the edge of the paper is cut during printing. Thus, ink density may be uneven at the edges.
 If you require higher image quality, select No from the Automatic Cutting list in the Roll Paper Options dialog box. In this case, the paper can be printed without borders on the left and right sides only. Once printed and cut, please cut the upper and lower bands with scissors.

- Document: Any type
- Page size: 10×12 inches (254.0×304.8 mm)
- Paper: Roll

4

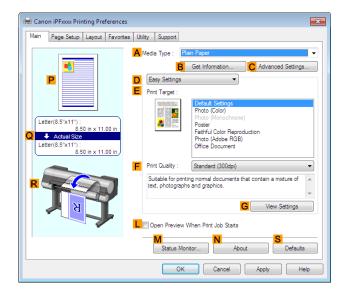

- Paper type: Canon Heavyweight Coated Paper
- Roll paper width: 10 inches (254.0 mm)
- Create the original in the source application 3 mm (0.12 in) larger on each side than 254.0×304.8 mm (10 × 12 in) —that is, 260.0×310.8 mm (10.2 × 12.2 in)

• If you can specify the margin, as in Microsoft Word, set the margin at 0 mm. For instructions on specifying the margin, refer to the software documentation.

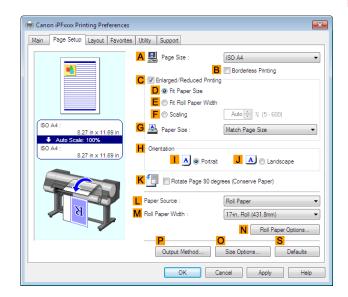

• The extra 3 mm (0.12 in) on each side will not be printed. Create the original so that it fits inside the paper area to be printed on.

- 2 Choose **Print** in the application menu.
- 3 Select the printer in the dialog box, and then display the printer driver dialog box. (See "Accessing the Printer Driver Dialog Box from Applications.") →P.179
  - Make sure the **Main** sheet is displayed.

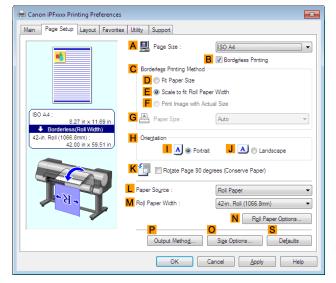

- 5 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Canon Heavyweight Coat**ed Paper.
- 6 Select the print target in the **E Print Target** list.
  - When you are using paper that takes longer for ink to adhere for borderless printing and the Cutter Unit touches printing surfaces that are not dry yet, it may damage the paper or the edge of the document that is cut, depending on frequency of use. In this kind of situation, change the ink drying time using the following procedure.
    - Click Advanced Settings in Media Type.
    - Select an ink drying time in the list for the Between Pages setting of Drying Time.
- 7 Click the **Page Setup** tab to display the **Page Setup** sheet.

- 8 In the A Page Size list, click the size of the original as specified in the source application. In this case, click 10"x12".
- 9 Select and click a roll paper in the **L** Paper Source list.
- **10** Select the **B** Borderless Printing check box to display the Information dialog box.

- 11 Select the width of the loaded roll in the Roll Paper Width list—in this case, click 10-in. Roll (254.0mm).
- **12** Click **OK** to close the **Information** dialog box.
- 13 In C Borderless Printing Method, click F Print Image with Actual Size.
  - 4 Confirm the print settings and print as desired.

For tips on confirming print settings, see "Confirming Print Settings." —P.176

# Borderless Printing at Actual Size (Mac OS X)

This topic describes how to print borderlessly at actual size based on the following example.

• When borderless printing is used, the edge of the paper is cut during printing. Thus, ink density may be uneven at the edges. If you require higher image quality, select **No** from the **Automatic Cutting** list in the **Paper Detailed Settings** dialog box. In this case, the paper can be printed without borders on the left and right sides only. Once printed and cut, please cut the upper and lower bands with scissors.

- Document: Any type
- Page size: 10 × 12 inches (254.0×304.8 mm)–Borderless
- Paper: Roll
- Paper type: Canon Heavyweight Coated Paper
- Roll paper width: 10 inches (254.0 mm)

Borderless Printing at Actual Size Borderless Printing at Actual Size (Windows) Borderless Printing at Actual Size (Mac OS X)	. 90

# **Borderless Printing on Paper of Equivalent Size**

Take advantage of borderless printing to print documents such as posters (made up mainly of photos or images) without a surrounding margin, or border.

Borderless printing is only available with rolls.

#### Borderless Printing

In regular printing, a margin required by the printer is added around the original. With borderless printing, you can print documents without the margin, so that the printed image covers the entire surface of the paper.

Paper incompatible with the printer's auto cut function can be printed without borders on the left and right sides only.

Printing without borders on the left and right sides only is available when **CutDustReduct.** is set to **On**.

• When printing without borders, be certain to set the blue switch on the platen to the • side. If the switch is set incorrectly, print quality may deteriorate. (See "Setting the Blue Switch on the Platen.") = P.893

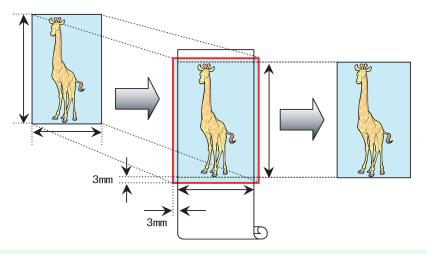

- There are limits on the media type and roll paper width of paper that can be used for borderless printing. For information on the media types that can be used for borderless printing, see " Paper Reference Guide."
- Borderless printing is not possible if details such as crop marks and margins are included as data on the periphery of the original.
- These features cannot be used in combination with borderless printing: special page layouts, centering originals, and printing cut lines on rolls.
- If Fit Paper Size or Print Image with Actual Size (Windows only) is selected while performing borderless printing, Rotate Page 90 degrees (Conserve Paper) cannot be selected. Note that if borderless printing is possible, then even if the original is rotated 90 degrees, it will be printed by automatically rotating the page by 90 degrees.

#### Borderless Printing Method

Choose the method of borderless printing that suits the original, as desired.

#### • Fit Paper Size

Enlarge or reduce the original to match the size of the paper you are using.

• The printer driver automatically enlarges originals 3 mm (0.12 in) past the dimensions of the paper on each side. The 3 mm portion beyond the edge on each side is not printed.

For instructions on borderless printing of photos, images, and other documents to match the paper size, refer to the following topics, as appropriate for your computer and operating system.

- Borderless Printing by Resizing Originals to Match the Paper Size (Windows) → P.96
- Borderless Printing by Resizing Originals to Match the Paper Size (Mac OS X) → P.98

# Borderless Printing by Resizing Originals to Match the Paper Size (Windows)

Note

# Borderless Printing by Resizing Originals to Fit the Roll Width

Take advantage of borderless printing to print documents such as posters (made up mainly of photos or images) without a surrounding margin, or border.

Borderless printing is only available with rolls.

#### Borderless Printing

In regular printing, a margin required by the printer is added around the original. With borderless printing, you can print documents without the margin, so that the printed image covers the entire surface of the paper.

Paper incompatible with the printer's auto cut function can be printed without borders on the left and right sides only.

Printing without borders on the left and right sides only is available when **CutDustReduct.** is set to **On**.

Important

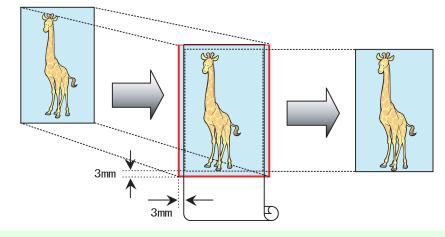

- There are limits on the media type and roll paper width of paper that can be used for borderless printing. For information on the media types that can be used for borderless printing, see " Paper Reference Guide."
- Borderless printing is not possible if details such as crop marks and margins are included as data on the periphery of the original.
- These features cannot be used in combination with borderless printing: special page layouts, centering originals, and printing cut lines on rolls.
- If Fit Paper Size or Print Image with Actual Size (Windows only) is selected while performing borderless printing, Rotate Page 90 degrees (Conserve Paper) cannot be selected. Note that if borderless printing is possible, then even if the original is rotated 90 degrees, it will be printed by automatically rotating the page by 90 degrees.

#### Borderless Printing Method

Choose the method of borderless printing that suits the original, as desired.

#### Scale to fit Roll Paper Width

Enlarge or reduce the original as a whole to match the roll paper width.

• You can combine this function with rotating pages 90 degrees before printing so that the original width (relative to portrait orientation) matches the roll paper width in borderless printing.

For instructions on borderless printing of photos, images, and other documents to match the roll paper width, refer to the following topics, as appropriate for your computer and operating system.

- Borderless Printing by Resizing Originals to Fit the Roll Width (Windows) →P.102
- Borderless Printing by Resizing Originals to Fit the Roll Width (Mac OS X) →P.104

# Borderless Printing by Resizing Originals to Fit the Roll Width (Windows)

# Printing banners or at other non-standard sizes

Printing Vertical or Horizontal Banners (Large-Format Printing) Printing Vertical or Horizontal Banners (Large-Format Printing; Windows) Printing Vertical or Horizontal Banners (Large-Format Printing; Mac OS X)	. 109
Printing on Non-Standard Paper Sizes Printing on Non-Standard Paper Sizes (Windows) Printing on Non-Standard Paper Sizes (Mac OS X)	. 116

# Printing Vertical or Horizontal Banners (Large-Format Printing)

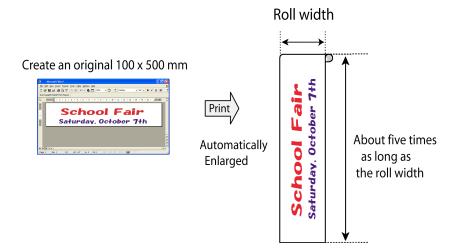

On this printer, large-format printing of up to 18.0 m is available using rolls.

If you use Print Plug-In for Office or PosterArtist, you can easily print maximum 18.0 m vertical or horizontal banners. (Refer to "Print Plug-In for Office features (Windows)  $\rightarrow$  P.316 " and "Using PosterArtist to Compose Originals  $\rightarrow$  P.52 ".) However, you may not be able to print 18.0 m due to restrictions in the settable document size according to the application software.

#### Fit Roll Paper Width

To match the width of vertical and horizontal banners with the width of rolls, use the printer driver function for automatically enlarging/reducing and printing.

For example, if you automatically enlarge a document created with application software such as Microsoft Word, you can print the full width of the roll easily.

For instructions on printing vertical or horizontal banners, refer to the following topics, as appropriate for your computer and operating system.

- Printing Vertical or Horizontal Banners (Large-Format Printing; Windows) —P.109
- Printing Vertical or Horizontal Banners (Large-Format Printing; Mac OS X) →P.113

Important

• Before printing, check how much of the roll paper is left. If you have activated automatic detection of the remaining roll paper, a warning message is displayed when there is not enough roll paper left.

- If not much ink is left, prepare replacement ink tanks.
- To print at a higher level of quality, in the printer driver, choose **High** or **Highest** in Print Quality, and choose **Unidirectional Printing** as the direction of printing.

### Printing Vertical or Horizontal Banners (Large-Format Printing; Windows)

By automatic enlargement of a document created with an application software by the printer driver, you can print maximum 18.0 m vertical or horizontal banners.

However, you may not be able to print 18.0 m due to restrictions in the settable document size according to the application software.

This topic describes how to print a banner about five times as long as the roll width based on the following example.

- Document: A horizontal banner created in Microsoft Word
- Page size: Non-standard (100×500 mm [3.9×19.7 in])
- Paper: Roll
- Paper type: **Plain Paper**
- Roll paper width: 16 in (406.4 mm)

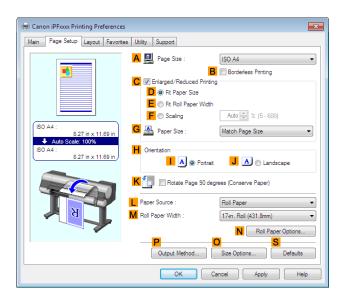

The print procedure is as follows.

- Register a Custom Paper Size in the printer driver. Call a non-standard paper size registered in the printer driver with Custom Paper Size. Once you register Custom Paper Size, you then can select it repeatedly from the paper size list. Custom Paper Size can be set up to 18.0 m.
- 2. In the application, create an original in the size you registered.
- Print the banner, using the settings that correspond to banners.

#### Registering a Custom Paper Size

This example describes how to register a paper size that is horizontally elongated and suitable for banners in either horizontal or vertical format.

- Display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from the Operating System Menu →P.181 ")
- 2 Click the **Page Setup** tab to display the **Page Setup** sheet.

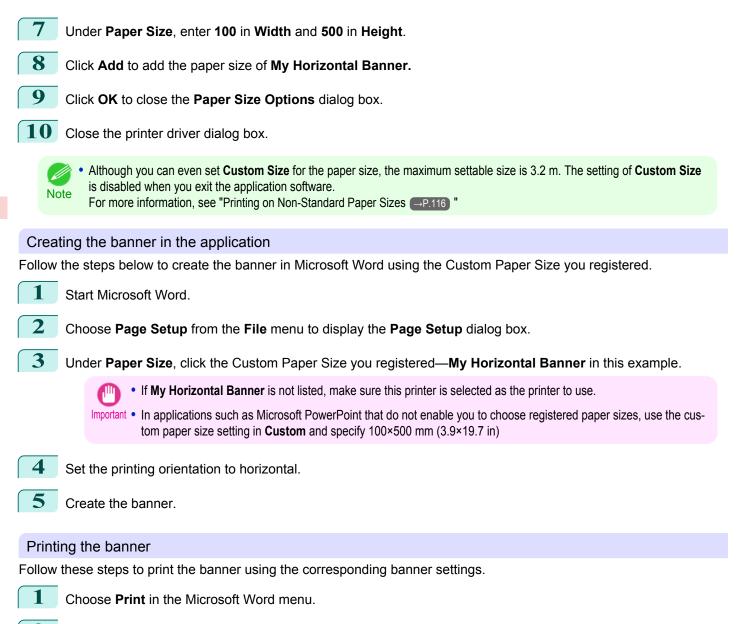

**3** Select and click a roll paper in the **L** Paper Source list.

4 Click O Size Options to display the Paper Size Options dialog box.

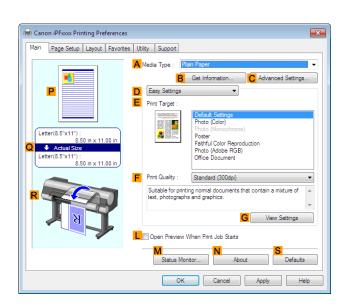

5 Enter a desired paper name in **Custom Paper Size Name**. My Horizontal Banner is used in this example.

6 In Units, click mm.

2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")

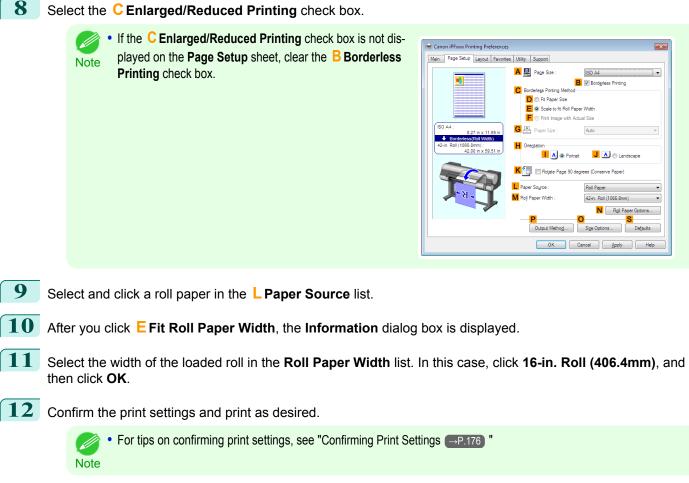

3 Make sure the **Main** sheet is displayed.

- 4 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.
- 5 After confirming that **D** Easy Settings is selected, click Poster in the **E** Print Target list.
- 6 Click the **Page Setup** tab to display the **Page Setup** sheet.

# Printing Vertical or Horizontal Banners (Large-Format Printing; Mac OS X)

By automatic enlargement of a document created with an application software by the printer driver, you can print maximum 18.0 m vertical or horizontal banners.

This topic describes how to print a banner about five times as long as the roll width based on the following example.

- Document: An original designed for a horizontal banner
- Page Size: Non-standard (100×500 mm [3.9×19.7 in])
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: 16 inches (406.4 mm)

The print procedure is as follows.

- ${f 1}_{f \cdot}$  In the application, create an original in the format of a horizontal or vertical banner.
- In Page Setup, register Custom Page Sizes (Mac OS X v10.5) / Custom Paper Sizes (Mac OS X v10.6 or later). Once you register Custom Page Sizes / Custom Paper Sizes, you then can select it repeatedly from the paper size list.

Custom Page Sizes / Custom Paper Sizes can be set up to 18.0 m.

3. Print the banner, using the settings that correspond to banners.

• The following procedures are based on Mac OS X v10.5. The method of setting up non-standard paper sizes varies depending on the version of Mac OS X.

#### Register a Custom Page Sizes

This example describes how to register and print using a page size that is horizontally elongated and suitable for banners in either horizontal or vertical format.

Create the document in the application.

A Printer:	iPFxxxx	*
B Presets:	Default Settings	*
C Copies:	1	
D Pages:	• All

5 Double-click **Untitled** in the list at left, and then enter a name for the page size you want to register. Here, enter **100\*500**.

If the  $\ensuremath{\textbf{Untitled}}$  size is not listed at left, click + below the list.

- **6** Under **Page Size**, enter **10** in **Width** and **50** in **Height**. Here, measurements are entered in centimeters.
- 7 Specify the margins by entering **0.3** in **Printer Margins**. Here, too, measurements are entered in centimeters.
- 8 Click **OK** to close the **Custom Page Sizes** dialog box.
- 9 In the **F** Paper Size list, click the size of the original. In this case, click **100\*500**, the size you registered.
- **10** In **GOrientation**, click the icon of the document in landscape orientation.
- **11** Click **OK** to close the dialog box.

#### Print the banner

Follow the steps below to print the banner using the corresponding banner settings.

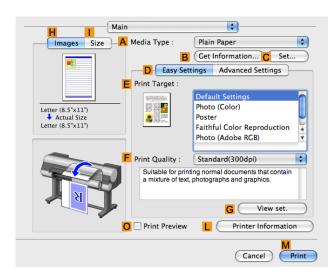

114

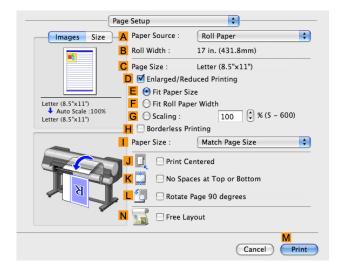

Choose **Print** in the application menu.

2

Access the Main pane.

- **3** In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.
- 4 Make your selection in the **E Print Target** list.
- 5 Make your selection in the **F** Print Quality list.
- 6 Access the Page Setup pane.

Select and click a roll paper in the A Paper Source list.

8	Make sure	the width of the loaded roll is displayed in the ${\sf B}$ Rol	I Width list—in this case, 16 in. (406.4mm).
	Note •	If the width of the loaded roll is not displayed in <b>B Roll</b> Width, click <b>L Printer Information</b> on the Main pane and update the printer information. Print Preview       Printer Information
9	In <mark>C Page</mark>	Size, make sure 100*500 is displayed, as registered	l in <b>Page Setup</b> .
10	Select the	D Enlarged/Reduced Printing check box.	
11	Click F Fit	Roll Paper Width.	
12	Confirm the	e print settings, and click <b>M Print</b> to start printing.	
	Note •	For tips on confirming print settings, see "Confirming Print Sett	tings →P.362 "

# Printing on Non-Standard Paper Sizes

For printing on non-standard size paper, first register the paper size in the printer driver. Once you register a paper size, you then can select it repeatedly from the paper size list. The paper size can be set up to 18.0 m.

 In Windows, although you can even set Custom Size for the paper size, the maximum settable size is 3.2 m. The setting of Custom Size is disabled when you exit the application software.

For instructions on specifying non-standard paper sizes for printing, refer to the following topics, as appropriate for your computer and operating system.

- Printing on Non-Standard Paper Sizes (Windows) →P.116
- Printing on Non-Standard Paper Sizes (Mac OS X) →P.118

#### Printing on Non-Standard Paper Sizes (Windows)

For printing on non-standard size paper, first register the paper size in the printer driver. Call a non-standard paper size registered in the printer driver with Custom Paper Size. Once you register Custom Paper Size, you then can select it repeatedly from the paper size list. Custom Paper Size can be set up to 18.0 m.

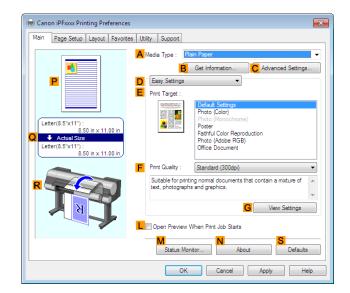

116

Although you also can set Custom Size for the paper size temporarily, the maximum settable size is 3.2 m. Also, the setting
of Custom Size is disabled when you exit the application software.

#### Registering and Printing With a Custom Paper Size

This topic describes how to register a non-standard paper size by the name of **430 mm Square** and print based on the following example.

- Document: Any Type
- Page Size: A square sheet (430 × 430 mm [16.9 × 16.9 in])
- Paper: Sheets
- Media Type: Any type
- Paper Size: A square sheet (430 × 430 mm [16.9 × 16.9 in])
- Load the square paper (430 × 430 mm [16.9 × 16.9 in]) in the printer.
- 2 Choose **Print** in the application menu.
- 3 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179")
- 4 Make sure the **Main** sheet is displayed.

5 In the **A Media Type** list, select the type of paper that is loaded.

6 After confirming that **D** Easy Settings is selected, select from the **E** Print Target list.

### Printing Multiple Pages Per Sheet

To conserve paper, you can print several pages of the original on a single sheet by reducing the original and dividing the sheet into areas for each page.

#### Page Layout

Specify a number of pages of the original to print on a single sheet, in a layout of multiple pages per sheet.

- This function cannot be combined with the following options.
- Important Borderless Printing
  - Scaling Originals (Windows)
  - Banner Printing (Windows)
  - When printing using this function, the Print Centered setting is disabled.

You can print up to 16 pages of the original on a single sheet.

Note • You can also change the page layout order and print page boundary lines, as desired.

For instructions on printing multiple pages per sheet, refer to the following topics, as appropriate for your computer and operating system.

- Printing Multiple Pages Per Sheet (Windows) →P.129
- Printing Multiple Pages Per Sheet (Mac OS X) —P.131

#### **Printing Multiple Pages Per Sheet (Windows)**

This topic describes how to print four pages of originals together on a single sheet based on the following example.

- Document: Any Type
- Page size: A3 (297.0×420.0 mm [11.7×16.5 in])
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: A2/A3 roll (420.0 mm [16.5 in])

Conserving Roll Paper by Printing Originals Without Top and Bottom Margins (Mac OS X)	154

## **Conserving Roll Paper by Rotating Originals 90 Degrees**

You can conserve roll paper by specifying particular settings as suitable for your original.

#### • Rotate Page 90 degrees (Conserve Paper)

When originals are printed in portrait orientation, the original is rotated 90 degrees before printing if it fits within the roll width. This enables you to conserve paper.

• If the page would exceed the roll paper width after rotation, use this function with Scale to fit Roll Paper Width to print rotated pages.

For tips on conserving roll paper, refer to the following topics, as appropriate for your computer and operating system.

- Conserving Roll Paper by Rotating Originals 90 Degrees (Windows) →P.148
- Conserving Roll Paper by Rotating Originals 90 Degrees (Mac OS X) →P.150

## **Conserving Roll Paper by Rotating Originals 90 Degrees (Windows)**

This topic describes how to conserve paper by rotating originals 90 degrees before printing, based on the following example.

- Document: Any type
- Page size: A4 (210.0×297.0 mm)/Letter (8.3×11.7 in)
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: A3/A4 roll (297.0 mm [11.7 in])

This example illustrates how to rotate an A4 (210.0×297.0 mm)/Letter (8.3×11.7 in) original in portrait orientation 90 degrees to fit within the width of A3/A4 roll paper (297.0 mm [11.7 in]), which enables you to conserve paper.

Choose **Print** in the application menu.

Select the printer in the dialog box, and then open the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")

Access the **Page Setup** pane.

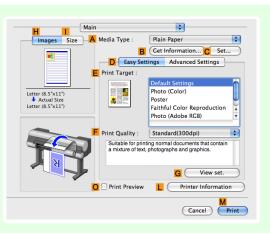

8 Select and click a roll paper in the **A Paper Source** list.

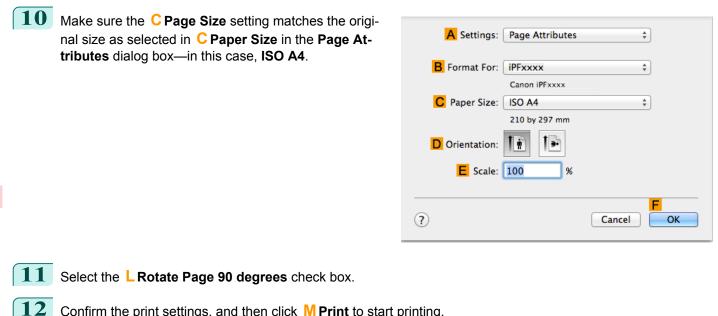

Make sure the width of the loaded roll is displayed in **B Roll Width** —in this case, **ISO A3/A4 (297.0mm)**.

If the width of the roll loaded in the printer is not shown in
 B Roll Width, click L Printer Information on the Main pane to update the printer information.

151

- Confirm the print settings, and then click **M Print** to start printing.
  - For tips on confirming print settings, see "Confirming Print Settings →P.362"

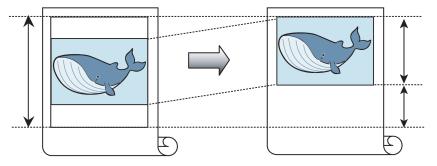

## **Conserving Roll Paper by Printing Originals Without Top and Bottom Margins**

You can conserve roll paper by specifying particular settings as suitable for your original.

#### No Spaces at Top or Bottom (Conserve Paper)

Note

You can print without feeding the paper for blank portions of originals if there are top and bottom margins in originals. This enables you to conserve as much paper as the size of the margins.

- Printing without the top and bottom margins is not supported in the following cases.
  - Banner printing

Important

- If you have chosen poster as the type of page layout
- Even during borderless printing, you can print without the top and bottom margins.
- Note Printing without the top and bottom margins may cause inconsistency in the size of printed documents, depending on the layout of images or text in your originals.

For tips on conserving roll paper, refer to the following topics, as appropriate for your computer and operating system.

- Conserving Roll Paper by Printing Originals Without Top and Bottom Margins (Windows) 

   —P.153
- Conserving Roll Paper by Printing Originals Without Top and Bottom Margins (Mac OS X) 

   —P.154

## Conserving Roll Paper by Printing Originals Without Top and Bottom Margins (Windows)

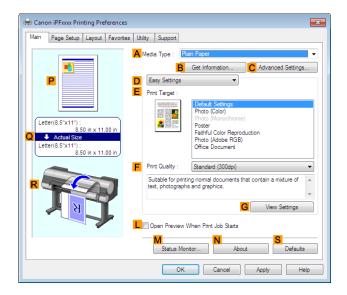

This topic describes how to conserve roll paper when printing originals that have a top and bottom margin, based on the following example.

- Document: Any type
- Page size: A4 (210.0×297.0mm)/Letter (8.3 × 11.7 in)
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: A3/A4 roll (297.0 mm [11.7 in])

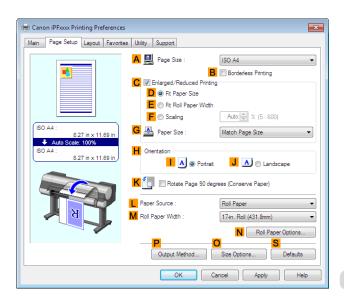

Choose **Print** in the application menu.

- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")
- 3 Make sure the **Main** sheet is displayed.

- 4 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.
- 5 Click the **Page Setup** tab to display the **Page Setup** sheet.

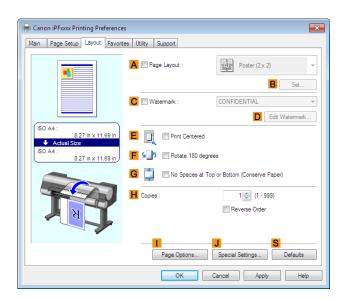

6 In the A Page Size list, click the size of the original as specified in the application. In this case, click ISO A4 or Letter (8.5"x11").

Select and click a roll paper in the **L Paper Source** list.

- Select the width of the loaded roll in the MRoll Paper Width list—in this case, ISO A3/A4 Roll (297.0mm).
- 9 Click the Layout tab to display the Layout sheet.

10 Select the GNo Spaces at Top or Bottom (Conserve Paper) check box.

**11** Confirm the print settings and print as desired.

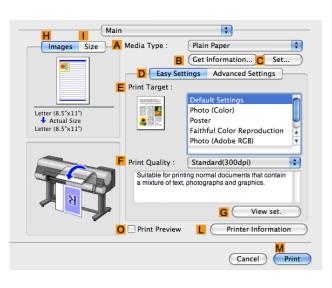

### Conserving Roll Paper by Printing Originals Without Top and Bottom Margins (Mac OS X)

This topic describes how to conserve roll paper when printing originals that have a top and bottom margin, based on the following example.

- Document: Any Type
- Page size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])
- Paper: Roll paper
- Paper type: Plain Paper

**11** Select the **KNo Spaces at Top or Bottom** check box.

156

**12** Confirm the print settings, and then click **M Print** to start printing.

Note

• For tips on confirming print settings, see "Confirming Print Settings  $\rightarrow$  P.362 "

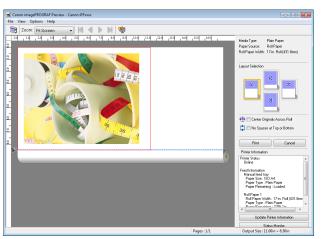

# **Checking Images Before Printing**

## Checking the Layout in a Preview Before Printing

You can check the print layout on the preview screen.

#### • Open Preview When Print Job Starts (Windows)

While viewing the preview screen, you can also adjust orientation or other settings, and your changes will be instantly applied on the preview screen.

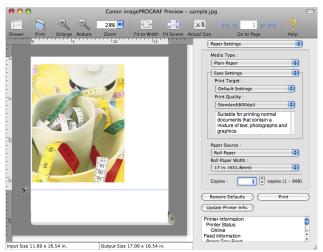

• Under some settings and in some environments, PageComposer may be started.

#### • Preview (Macintosh)

Note

While viewing the preview screen, you can also adjust layout or size settings, and your changes will be instantly applied on the preview screen.

For instructions on how to check the layout before printing, refer to the following topics:

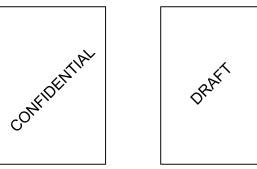

- Checking the Layout in a Preview Before Printing (Windows) →P.176
- Checking the Layout in a Preview Before Printing (Mac OS X) →P.362

## Other useful settings

## **Printing With Watermarks**

You can add watermarks (background images) to documents that require special handling.

#### • Watermark

Watermarks are applied to all pages of your document.

· Watermarks are not printed if you select poster as the type of page layout.

Important

The following watermarks are provided:

- CONFIDENTIAL
- COPY
- DRAFT
- FILE COPY
- FINAL
- PRELIMINARY
- PROOF

TOP SECRET

You can also create your own watermarks. Specify the following options to customize your watermark.

- Watermark string: Specify the font, size, color, and so on. Surround the watermark with a frame, if desired.
- Watermark position: Specify the position on the page, the angle, and so on.
- Watermark printing method: Specify whether to print the watermark superimposed or under the document image. You can also print the watermark only on the first page, if desired.

• Watermarks are supported in Windows.

Note • In addition to the provided watermarks, you can create up to 50 original watermarks.

For detailed instructions on printing with watermarks, refer to the following topics:

• Printing with Watermarks— COPY, FILE COPY, and so on (Windows) →P.160

## Printing with Watermarks— COPY, FILE COPY, and so on (Windows)

This topic describes how to print with watermarks, based on the following example of printing with a **FILE COPY** watermark.

- Document: Any type
- Page size: A2 (420.0×594.0 mm [16.5 × 23.4 in])
- Paper: Roll paper
- Paper type: Plain Paper
- Roll paper width: A2/A3 roll (420.0 mm [16.5 in[)
- 1 Choose **Print** in the application menu.
- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179)")
- 3 Make sure the **Main** sheet is displayed.

🖶 Canon iPFxxx Printing Preference	is Example 1

4 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.

Make your selection in the **E Print Target** list.

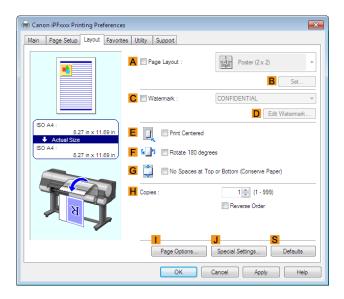

• You can check the settings values selected in the **E Print Target** list by clicking **G View Settings**. Note

7

6 Click the **Page Setup** tab to display the **Page Setup** sheet.

- In **A Page Size**, click the size of the original as specified in the application software. In this case, click **ISO A2**.
- 8 Select and click a roll paper in the **L Paper Source** list.
- 9 Select the width of the loaded roll in the MRoll Paper Width list—in this case, ISO A2/A3 Roll (420.0mm).
- **10** Click the **Layout** tab to display the **Layout** sheet.

- **11** Select the **C** Watermark check box.
- 12 Click FILE COPY in the Watermarks list.

Note

Click D Edit Watermark to open the Edit Watermark dialog box. In the Edit Watermark dialog box, you can create custom watermarks and change the position and angle of watermarks.

13 Confirm the print settings and print as desired.

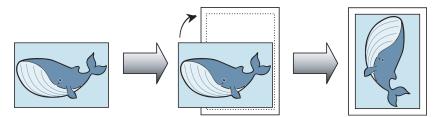

For tips on confirming print settings, see "Confirming Print Settings —P.176)"

## Making the Original Orientation Match the Paper Orientation

You can specify the original orientation to match the orientation of the paper for printing.

#### Orientation

Paper is usually loaded in the printer in portrait orientation. When you have an original in landscape orientation, you can specify the printing orientation so that the original is printed in landscape orientation.

#### • Rotate 180 degrees

The original is rotated 180 degrees to print it upside down.

#### • Mirror

A mirror image of the original is printed.

For instructions on specifying the original orientation before printing, refer to the following topics, as appropriate for your computer and operating system.

- Making the Original Orientation Match the Paper Orientation (Windows) —P.162
- Making the Original Orientation Match the Paper Orientation (Mac OS X) →P.164

## Making the Original Orientation Match the Paper Orientation (Windows)

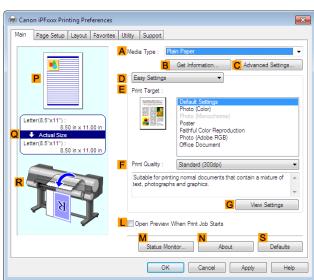

This topic describes how to print an original in landscape orientation after matching the paper orientation, based on the following example.

- Document: An original in landscape orientation
- Page size: A4 (210.0 × 297.0 mm)/Letter (8.3 × 11.7 in)
- Paper: Roll
- Paper type: Plain Paper
- Roll paper width: A2/A3 roll (420.0 mm [16.5 in])
- 1

Choose **Print** in the application menu.

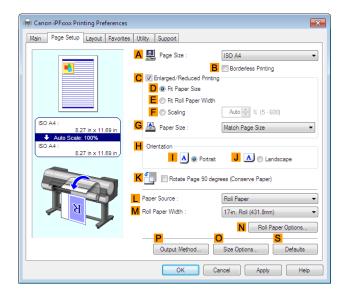

2 Select the printer in the dialog box, and then open the printer driver dialog box. (See "Accessing the Printer Driver Dialog Box from Applications →P.179")

3 Make sure the **Main** sheet is displayed.

**Enhanced Printing Options** 

- 4 In the **A Media Type** list, select the type of paper that is loaded. In this case, click **Plain Paper**.
- **5** Make your selection in the **E Print Target** list.
- 6 Make your selection in the **F Print Quality** list.
- 7 Click the **Page Setup** tab to display the **Page Setup** sheet.

- 8 In the A Page Size list, click the size of the original as specified in the application. In this case, click ISO A4 or Letter (8.5"x11").
- 9 In **H** Orientation, click **J** Landscape.
- **10** Select and click a roll paper in the **L** Paper Source list.
- 11 Select the width of the loaded roll in the MRoll Paper Width list—in this case, ISO A2/A3 Roll (420.0mm).

For tips on confirming print settings, see "Confirming Print Settings —P.176"

## Making the Original Orientation Match the Paper Orientation (Mac OS X)

This topic describes how to print an original in landscape orientation after matching the paper orientation, based on the following example.

- Document: An original in landscape orientation
- Page size: A4 (210.0 × 297.0 mm [8.3 × 11.7 in])
- Paper: Roll paper
- Paper type: Plain Paper

Note

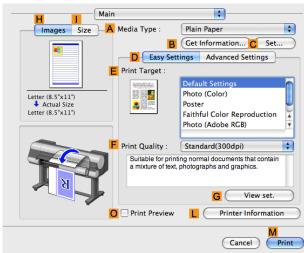

Roll paper width: A2/A3 roll (420.0 mm [16.5 in])

#### This sets the **B** Format for and **C** Paper Size.

For tips on confirming print settings, see "Confirming Print Settings →P.362"

#### **Using Favorites**

You can register print settings as **Favorites** to reuse settings from a particular job that met your expectations, or settings for a particular page size that you will use repeatedly.

#### Favorites

Registering a favorite for later use. You can choose the settings you have registered from a list before printing, and you can check the settings details.

• You can also save the favorite settings as files. Using these files is a convenient way to print under the same conditions on another computer. (In Windows.)

For instructions on using favorites to print, refer to the following topics, as appropriate for your computer and operating system.

- Using Favorites (Windows) →P.178
- Using Favorites (Mac OS X) →P.363

## **Cutting Roll Paper After Printing**

Roll paper can be automatically cut after printing.

It may not be possible to cut certain types of paper, such as adhesive paper. For details on types of paper that cannot be used with the auto cut feature, see the Paper Reference Guide. (See "Types of Paper  $\rightarrow$  P.522) ")

#### Automatic Cutting

Roll paper is cut automatically after printing. If you prefer, you can print continuously without cutting the roll, or you can print a cut line.

For instructions on cutting roll paper after printing, refer to the following topics, as appropriate for your computer and operating system.

- Cutting Roll Paper After Printing (Windows) →P.167
- Cutting Roll Paper After Printing (Mac OS X) → P.168

### **Cutting Roll Paper After Printing (Windows)**

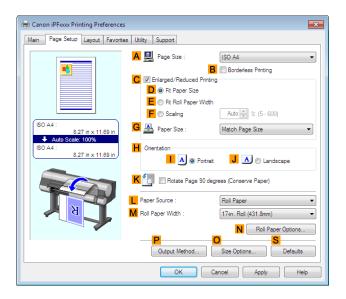

This topic describes how to cut roll paper automatically after printing (using the auto cut function), as well as how to print a cut line for manual cutting.

The auto cut function is activated on the printer by default and when the printer driver is installed. Follow the steps below to
reactivate the function if it is disabled, or to select the setting for printing a cut line instead.

1 Choose **Print** in the application menu.

- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications (-P.179)")
- 3 Click the **Page Setup** tab to display the **Page Setup** sheet.

Select and click a roll paper in the **L** Paper Source list.

 Device Settings Sheet —P.206 You can display settings for optional equipment installed on the printer and see the version information for the printer driver.

**imagePROGRAF Free Layout** is a feature for freely arranging originals from various source applications on a single page as desired before printing. For details, see Free Layout (-P.217).

**Color imageRUNNER Enlargement Copy** is a feature for automatic enlargement and printing of scanned originals from a **Color imageRUNNER**. For details, see Color imageRUNNER Enlargement Copy —P.240.

#### **Specifying Paper in the Printer Driver**

If you have replaced the paper, you must complete the following settings in the printer driver.

1

Choose **Print** in the application menu.

2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")

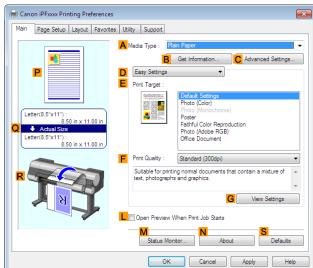

3

4

5

Ν

Specifying Paper in t	he Printer Driver (	(Windows)
-----------------------	---------------------	-----------

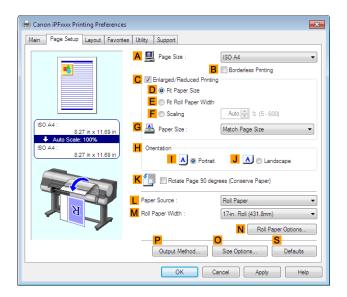

In the **A Media Type** list, select the type of paper that is loaded.

Click the B Get Information button to display the Paper Information on Printer dialog box. On the Paper Information on Printer dialog box, you can obtain information on the paper in the printer and configure printer driver settings for the feed source and type of paper.

This function requires that the Status Monitor be installed.

Click the **Page Setup** tab to display the **Page Setup** sheet.

- **6** In the **APage Size** list, select the size of the original as specified in the application.
  - 7 In the **L Paper Source** list, select how paper is supplied.
  - 8 If you have selected roll paper in L Paper Source, select the width of the loaded roll in M Roll Paper Width.

A variety of settings are available in the printer driver to suit different printing applications.

For details on available printing conditions, see "Printer Driver Settings -P.172"

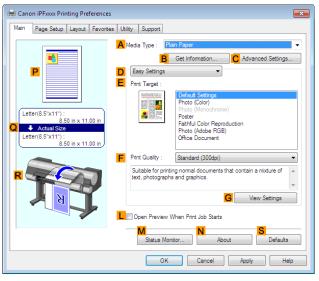

Note

## **Confirming Print Settings**

There are two ways to confirm the print settings, as follows.

#### Checking a preview of the settings

A preview of the settings is displayed on the left side of the **Main**, **Page Setup**, and **Layout** sheets. By checking illustrations and numerical values in the preview, you can confirm current settings for the page size, orientation, paper source, layout, and so on.

Display Area	Information Displayed					
P Top illustrations	Illustrations indicate the orientation, page layout, borderless printing selection, color mode, and other settings information.					
Q Middle, bordered area	The page size, paper size, and method and percentage of enlargement or reduction are indica- ted.					
R Bottom illustrations	Illustrations indicate the feed source, orientation, borderless printing selection, and other settings information.					

 To confirm the Print Target specified in Easy Settings, click G View Settings on the Main sheet to display the View Settings dialog box.

#### Checking a print preview

You can check an image of the original just as it will be printed.

When you activate this feature, imagePROGRAF Preview or PageComposer is started before printing. Confirming how documents will be printed this way helps prevent printing errors.

For details on print previews, see "Checking the Layout in a Preview Before Printing →P.158"

### Checking the Layout in a Preview Before Printing

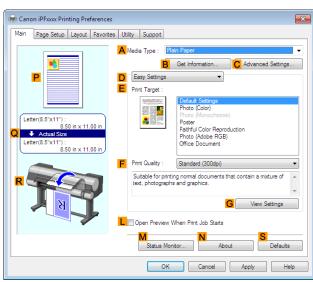

This topic describes how to preview images of print jobs before actually printing them.

2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")

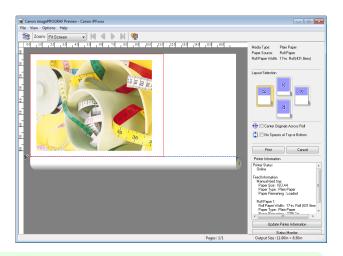

Make sure the **Main** sheet is displayed.

Printer Driver

- 4 Select the **L** Open Preview When Print Job Starts check box.
- 5 After you click **OK**, when you print a job, the **image-PROGRAF Preview** window will be displayed.

• If PageComposer is running, access the Special Settings dialog box from the Layout sheet and clear Enable Preview Switching.

- **6** On the main window, you can check the layout and change settings as needed.
  - To print, click **Print** in the **File** menu.

## Using Favorites

This topic describes how to register favorites and print using favorite settings.

#### Registering a favorite

This section describes the procedure for registering printing settings that have been changed in the driver as **Favor**ites.

Printer Driver

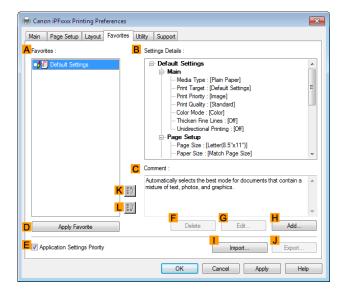

178

2

Choose **Print** in the application menu.

Select the printer in the dialog box, and then display the printer driver dialog box. (Refer to "Accessing the Printer Driver Dialog Box from Applications →P.179 ")

- **3** Perform normal printing settings. The favorite is registered from here.
- 4 Click the **Favorites** tab to display the **Favorites** sheet.

5 Click **H** Add to display the Add dialog box.

Name :							
lcon :		٦	*		7	A4	
	•						1
Comment :							

6 Enter a desired name in Name, such as Photos for Presentations or Monthly Report.

Choose a fitting icon for these print settings in the **Icon** list.

8 In **Comment**, enter a description of the favorite to be added, as desired.

9 Click **OK** to close the **Add** dialog box. The favorite you have added is now displayed in **A Favorites**.

To save a favorite as a file, click J Export and specify the file to save.

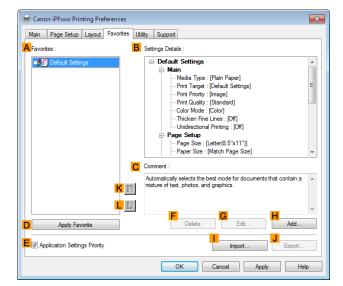

#### Printing using the favorite

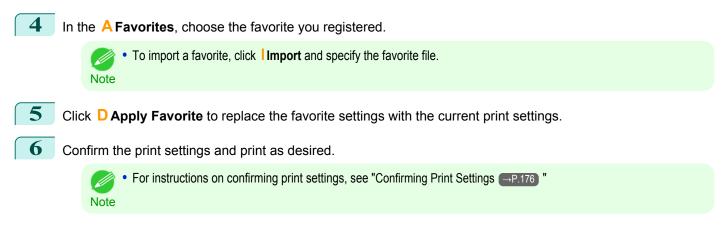

Follow the steps below to print using the favorite you have registered.

1

Choose **Print** in the application menu.

- 2 Select the printer in the dialog box, and then display the printer driver dialog box.(See "Accessing the Printer Driver Dialog Box from Applications →P.179 ")
- 3 Click the Favorites tab to display the Favorites sheet.

### Accessing the Printer Driver Dialog Box from Applications

Choose **Print** from the **File** menu to display the dialog box for printing conditions.

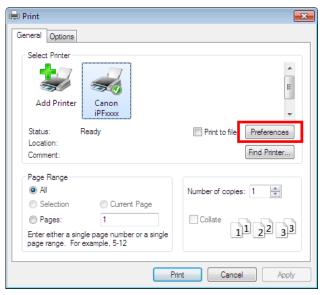

Select the printer, and then display the printer driver dialog box.

2

 The dialog box for specifying printing conditions varies depending on the source application. In some cases, when you select the printer, a sheet for configuring the printer driver is added to the dialog box. In the following case, click **Preferences**.

· Example: Print dialog box displayed by the application software

Six sheets of print settings are displayed by the printer driver: **Main**, **Page Setup**, **Layout**, **Favorites**, **Utility**, and **Support**.

🖶 Canon iPFxxxx Printing Preferences		×				
Main Page Setup Layout Favorite	s Utility Support					
Letter(8.5"x11"): 850 in x 11.00 in ▲ Actual Size Letter(8.5"x11"):	Media Type : [ Easy Settings Print Target :	Plain Paper  Get Information Advanced Settings  Default Settings Photo (Color) Photo (Monochrome) Poster Fathful Color Reproduction Photo (Adobe RGB) Office Dag ment

	Status M					

• The titles of dialog boxes may vary depending on the application, and sheets other than these six sheets may be displayed.

180

• If you access the printer driver dialog box from the source application, changes you make to the settings will only apply temporarily to that application. Because these are sizes you specify temporarily in the printer driver, the sizes will not be available after you exit the application.

You can also access the printer driver dialog box from the Windows system menu.
 To use the settings continuously in all applications, open the printer driver from the system menu to make the settings.
 See "Accessing the Printer Driver Dialog Box from the Operating System Menu →P.181 ".

# Accessing the Printer Driver Dialog Box from the Operating System Menu

- 1
- Click start > Printers and Faxes (or Printers).
  - 2 Select the printer, and then display the printer properties dialog box.

	OK Cancel

• To display the **Paper Information on Printer** dialog box, on the **Main** sheet, click **Get Information** by **Media Type**.(See "Main Sheet —P.182")

#### • A Paper Source

Shows the paper source supported by the printer, as well as information about the loaded paper. To update the paper source and media type settings in the printer driver, select the desired **Paper Source** option and click **OK**.

# **Paper Detailed Settings Dialog Box**

In the **Paper Detailed Settings** dialog box, you can set **Drying Time** for the paper selected with **Media Type** of the **Main** sheet, etc.

You can display this dialog box by clicking **Settings** of **Media Type** on the **Main** sheet. (Refer to "Main Sheet  $\rightarrow$  P.182".)

As for the items for which you can select **Printer Default** in this dialog box, you also can set them from the control panel of the printer. (Refer to "Menu Settings  $\rightarrow$  P.667".)

Paper Detailed Settings	<b></b>
A Drying Time	
B Between Pages :	Printer Default 🗸
C Between Scans :	Printer Default 🔹
D Roll Paper Margin for Safety	
E Near End Margin :	Printer Default
Eut Speed :	Printer Default
H Collection Makes	
Calibration Value :	Printer Default 🔹
ОК	Cancel Defaults Help

## A Drying Time

Specify the time that the printer waits for ink to dry, as needed. The Drying Time setting is only valid for rolls.

#### • B Between Pages

You can set the time to wait after printing 1 document page until ejecting the paper. Since waiting time is required for ink to dry before a roll is cut, you can deliver paper in the Output Stacker with the ink dried even if **Cutting Mode** is set to **Automatic**.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
Off	Paper is ejected immediately after printing completes.
30 sec. / 1 min. / 3 min. / 5 min. / 10 min. / 30 min. / 60 min.	Paper is ejected when the set time elapses after printing completes.

#### C Between Scans

You can set the time to wait after printing 1 line on a page until printing the next line. Set this to avoid bleeding or color unevenness such as when bleeding occurs on a page or when color unevenness occurs during borderless printing.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
Off	The next line is printed immediately after a line is printed.
1 sec. / 3 sec. / 5 sec. / 7 sec. / 9 sec.	The next line is printed when the set time elapses after a line is printed.
	* Increase the time according to the occurrence condition of bleeding or unevenness.

# D Roll Paper Margin for Safety

You can specify the length of a margin on the leading edge of paper to ensure that paper susceptible to curling is held firmly against the Platen.

#### • E Near End Margin

Specify the length of the Near End Margin (the leading edge margin) of the roll, as needed.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
5 mm (0.2 in)	The document is printed in the standard size.
	* Select this when you do not have any problems in printing.
20 mm (0.8 in)	Select this when rubbing against the printhead occurs such as when using paper that tends to curl.

## F Cut Speed

Select the speed of automatic cutting, as needed. You can adjust this setting if paper is not cut well when automatic cutting is used.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
High Speed	When the Standard setting does not result in cutting the surface cleanly, select this.
Standard	Select this when you do not have any problems in automatic cutting.
Low Speed	This helps prevent adhesive from sticking to the cutter and keeps the cutter sharp if you select it when using adhesive paper.

#### H Calibration Value

186

You can specify whether to apply the results of calibration performed on the printer to image processing.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.

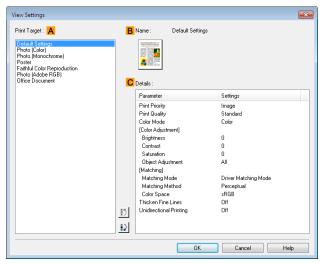

Setting Item	Details
Enabled	Print using the calibration results.
Disabled	Print without using the calibration results. Select this to avoid the changing of the color of images during printing by color calibration.

# **G** Mirror

Specify whether to print a mirror image, as needed. Select this option to print a version of the document or image with the left and right sides inverted.

# View Settings Dialog Box for the Printing Application

In the **View Settings** dialog box, you can check details of the selected printing application.

#### • A Print Target

Shows all **Print Target** options (settings items for the printing application).

• B Name

Identifies the item selected in **Print Target** by its name and an icon.

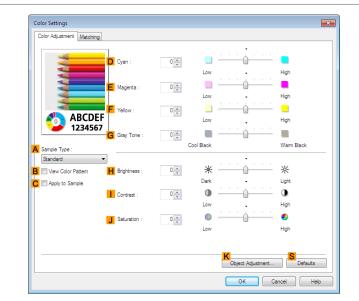

• C Details

Here, you can confirm detailed settings values for each listed item for the selected Print Target.

# **Color Adjustment Sheet: Color**

If the color tone as printed is not as you expected, you can adjust it on the Color Adjustment sheet.

Printer Drive

• To display the Color Adjustment sheet, on the Main sheet, click Color Settings by Color Mode in Advanced Settings.(See "Main Sheet P.182")

## • A Sample Type

Choose a sample image from Standard, Portrait, Landscape, or Graphics.

#### B View Color Pattern

Select this checkbox to display the color pattern.

• C Apply to Sample

Select this checkbox to apply the changed settings to the sample image.

#### • D Cyan / E Magenta / F Yellow

Fine-tune color tones by adjusting the levels of each color.

#### • G Gray Tone

Adjust the color tone of grays as desired. Choose Cool Black (tinged with blue) or Warm Black (tinged with red).

#### H Brightness

Adjust the overall image brightness as desired. You can adjust the brightness if the printed document is lighter or darker than the original image (that is, the original photo that was scanned or the original graphic as it appears on the computer screen).

#### Contrast

Adjust the contrast of the darkest and lightest portions relative to each other, as desired. Increasing the **Contrast** makes images sharper, and reducing the **Contrast** softens images.

#### • J Saturation

Adjust the color intensity as desired. Increasing the **Saturation** setting makes colors more vivid, and reducing the **Saturation** makes colors more subdued.

#### • KObject Adjustment

Select this option to display the **Object Adjustment** dialog box, in which you can specify objects subject to color adjustment.

• Object Adjustment Dialog box: Color →P.189

#### • S Defaults

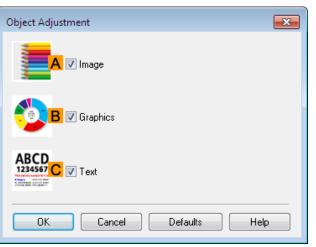

Click to restore all settings on the sheet to the default values.

Note

For details on settings items, see "Adjusting the Color in the Printer Driver →P.54 "

# **Object Adjustment Dialog box: Color**

In the **Object Adjustment** dialog box, you can specify what type of print jobs to apply color adjustment to. If an original comprises images, graphics, and text, you can specify which portion to apply color adjustment to.

• To display the **Object Adjustment** dialog box, click **Object Adjustment** on the **Color Adjustment** sheet. Note

#### • A Image

Select this option to apply color adjustment to image areas, such as photos.

• B Graphics

Select this option to apply color adjustment to graphics, such as lines and circles.

• C Text

Select this option to apply color adjustment to text.

## **Matching Sheet**

On the **Matching** sheet, you can specify color matching to compensate for differences in the appearance of colors on various devices.

If No color correction is selected under Color Mode, the Matching sheet is not displayed.

 To display the Matching sheet, on the Main sheet, click Color Settings in Color Mode in Advanced Settings, and then click the Matching sheet. (Refer to "Main Sheet 
P.182")

## **Driver Matching Mode**

The following options are available when you select **Driver Matching Mode** in the **A Matching Mode** list.

olor Settings		
Color Adjustment Matching		
Matching Mode :	Driver Matching Mode ICC Matching Mode Host ICM Mode	
Matching Method :	Monitor Matching	
Color Space :	sRGB	
Monitor White Point :	6500K	•
Gamma	2.2	-
		Defaults

#### • A Matching Mode

Select the color matching mode to use, as desired.

Normally, select **Driver Matching Mode**. For color matching based on ICC profiles, select **ICC Matching Mode** or **Host ICM Mode**, depending on your color matching system.

#### • B Matching Method

Select the color matching method that suits the document to be printed. Various **Matching Method** options are available depending on your selection in **Matching Mode**.

#### • Color Space

Select the applicable color space as desired.

#### • D Monitor White Point

Enter the color temperature set on the monitor.

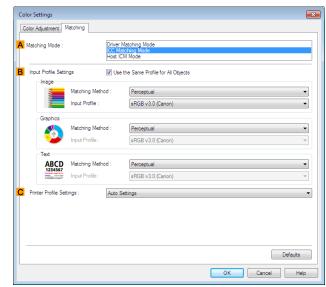

Displayed when the **B** Matching Method is set to Monitor Matching.

#### • E Gamma

You can adjust the gradation of intermediate tones in an image. **2.2** is normally selected. If you want a softer impression than **2.2**, select **1.8**.

# ICC Matching Mode and Host ICM Mode

The following options are available when you select **ICC Matching Mode** or **Host ICM Mode** in the **A Matching Mode** list.

#### • A Matching Mode

Select the color matching mode to use, as desired.

#### B Input Profile Settings

You can select Image, Graphics, or Text. You can choose Matching Method and Input Profile.

Various options are available depending on your selected Matching Mode.

To apply the same input profile automatically for **Graphics** and **Text**, select **Use the Same Profile for All Objects**. To apply separate input profiles to **Graphics** and **Text**, clear **Use the Same Profile for All Objects** and specify the individual settings.

#### C Printer Profile Settings

Specify the printer profile as desired. Normally, select Auto Settings.

We recommend that you select an ICC profile created using commercially available profile creation software in order to perform color management accurately on paper other than genuine Canon paper and feed confirmed paper. The created ICC profile needs to be saved in the following folder on the computer you are using.

C:Windows\system32\spool\drivers\color folder

Note

• C: may vary according to the user environment.

• For details on settings items, see "Adjusting the Color in the Printer Driver." →P.54

# **Color Adjustment Sheet: Monochrome**

On the **Color Adjustment** sheet for monochrome printing, you can adjust the brightness and contrast.

Color Adjustment

- To display the Gray Adjustment sheet, on the Main Sheet —P.182), select Monochrome (Photo) by Color Mode in Advanced Settings, and then click Color Settings.
  - Monochrome (Photo) is not available for all types of paper.

## • A Sample Type

The image at left is updated to reflect any changes you make to setting items on the sheet, enabling you to check the results of adjustment.

#### • B Sample List

Select a sample image, as desired.

#### Color Balance

Click the list to select a color balance that suits the printing application.

## • DX / EY

Adjust the color balance as you check the color tone in the adjustment area. You can adjust the square area in the center by clicking or dragging it.

Drag the vertical or horizontal scroll bars for adjustment, as desired.

You can click the arrows by the DX (horizontal) and EY (vertical) boxes or enter the values directly.

#### • J Tone

You can adjust the brightness of intermediate tones in an image. Selecting **Hard tone** gives a hard impression with more definition. Selecting **Soft tone** gives a soft impression.

#### • F Brightness

Adjust the overall image brightness as desired. You can adjust the brightness if the printed document is lighter or darker than the original image (that is, the original photo that was scanned or the original graphic as it appears on the computer screen).

#### G Contrast

194

Adjust the contrast of the darkest and lightest portions relative to each other, as desired. Increasing the **Contrast** makes images sharper, and reducing the **Contrast** softens images.

#### • HHighlight

Adjust the brightness of the lightest portion.

#### Shadow

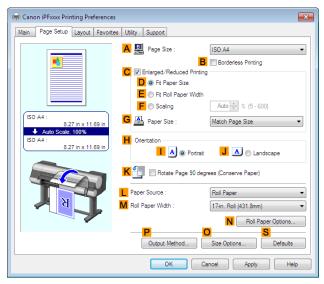

Adjust the brightness of the darkest portion.

#### • S Defaults

Click to restore all settings on the sheet to the default values.

# **Page Setup Sheet**

The following settings are available on the **Page Setup** sheet. For details on settings items, refer to the printer driver help file.

#### • A Page Size

Select the page size as specified in the source application. For details on available page sizes, see "Paper Sizes →P.522"

#### • B Borderless Printing

	Borderless Printing
Borderless Printing Method	
D 💿 Fit Paper Size	
E 🖲 Scale to fit Roll Paper	Width
G F Print Image with Actua	I Size
Paper Size :	Auto 👻

Borderless printing is available if roll paper is selected in the **L Paper Source** list. Choose from the following options when this setting is activated.

- Borderless Printing on Paper of Equivalent Size →P.95
- Borderless Printing by Resizing Originals to Fit the Roll Width →P.101
- Borderless Printing at Actual Size →P.89

## • D Fit Paper Size

Scales the document image to match the paper size.

#### • EScale to fit Roll Paper Width

Scales the document image to match the roll width.

#### • F Print Image with Actual Size

Prints documents at their actual size. This function is available when you have selected the size same as the width of **Roll Paper** for either the length or width of the document from the **A Page Size** list.

#### • G Paper Size

Available when D Fit Paper Size is selected.
Choose the size of the paper you will print on.
For details on available paper sizes, see "Paper Sizes →P.522"
Paper sizes compatible with borderless printing are shown in the list.

#### • C Enlarged/Reduced Printing

To display the Output Method dialog box, on the Page Setup sheet, click Output Method. (Refer to "Page Setup Sheet —P.195)")

#### • A Output Method

If **Print** is selected, the print job is saved to the printer hard disk after printing has finished.

If **Save in mail box** is selected, the print job is saved to the printer hard disk. If you choose **Save in mail box**, also specify the destination personal box in the **Mail box** list.

If **Print after reception is complete** is checked, you can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

These can be selected as **Print** options.

#### B Name of data to be saved

To use the file name, choose **Use file name**.

Otherwise choose Enter name and enter a name in Name.

#### • C Mail box

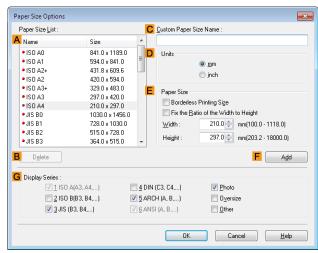

Displays a list of mail boxes. If you choose **Save in mail box**, also specify the destination personal box from the list.

#### • D Acquire Mail Box Name

When this is clicked, the box name acquired from the printer main unit is displayed in Mail box.

# Paper Size Options Dialog Box

In the **Paper Size Options** dialog box, you can create and register your own Custom Paper Size. The sizes you define are listed with standard paper sizes for selection later as needed.

- You cannot create any arbitrary roll paper width as a Custom Paper Size.
- Important If you select a Paper Size from Paper Size Options, load paper of a size equal to or larger than the Paper Size Options into the printer. If the size of the loaded paper is smaller than the Paper Size Options, an incomplete output image may be printed.
  - To display the Paper Size Options dialog box, on the Page Setup sheet, click Paper Size Options. (See "Page Setup Sheet.") →P.195

#### • A Paper Size List

Shows the names and sizes of paper that can be used with the printer driver.

#### • B Delete

n III

Note

Custom paper sizes created by users can be deleted from the **A Paper Size List**, as needed.

However, they cannot be deleted in the following situations.

- If a standard paper size of the printer driver is selected.
- If an oversized paper size is selected.
- If a paper size marked with a red circle is selected.

#### • C Custom Paper Size Name

You can name Custom Paper Size as desired.

#### • D Units

Specify the desired unit of measure for the Custom Paper Size height and width.

#### • E Paper Size

Specify the desired **Width** and **Height**. You can make your selection from sizes that are compatible with **Borderless Printing** by selecting **Borderless Printing Size**. To maintain the aspect ratio of the **Width** and **Height** as you resize the paper, select **Fix the Ratio of the Width to Height**.

#### • FAdd

Enables you to register the custom paper size you have specified or overwrite an existing custom paper size.

#### • G Display Series

You can limit the number of options shown in Page Size, Paper Size, and Paper Size List.

# Layout Sheet

The following settings are available on the Layout sheet. For details on settings items, refer to the printer driver help.

## • A Page Layout

Activate this setting to select a particular page layout.

- Printing Multiple Pages Per Sheet →P.129
- Printing Posters in Sections →P.134
- Printing Multiple Originals Next to Each Other →P.121
- Using PosterArtist to Compose Originals →P.52

#### • B Set

Click to display one of the following dialog boxes depending on the selection in **A Page Layout**. In these dialog boxes, you can specify layout details and which pages to print, as well as other settings.

- Page Layout Printing
- Pages to Print
- Free Layout Settings

#### C Watermark

Activating this option makes two settings available, **Watermarks** and **D** Edit Watermark.

- Printing With Watermarks →P.159
- Watermarks

Lists the provided watermarks. Choose the watermark to print.

#### • D Edit Watermark

Click to display the Edit Watermark dialog box for creating your own, original watermark.

#### • E Print Centered

Activate this setting to print document images in the center of the paper.

- Printing Originals Centered on Rolls →P.138
- Printing Originals Centered on Sheets →P.143

#### • FRotate 180 degrees

Activate this option to rotate document images by 180 degrees before printing.

#### • G No Spaces at Top or Bottom (Conserve Paper)

Activate this setting to print the next image skipping blank areas above and below printable data in documents, which enables you to conserve the paper.

Conserving Roll Paper by Printing Originals Without Top and Bottom Margins →P.152

#### • H Copies

Enter the number of copies to print, in a range of **1–999.** 

#### Reverse Order

Activate this option to print pages in reverse order.

#### Page Options

Click to display the **Page Options** dialog box, which enables you to complete settings for printing the user name, date, or page number in the header or footer.

Page Options Dialog Box →P.201

#### • J Special Settings

If the printing results are not as you expected, click this option to change how printing is processed.

• Special Settings Dialog Box →P.202

#### S Defaults

Click to restore all settings on the sheet to the default values.

# **Page Options Dialog Box**

The Page Options dialog box offers the following settings.

Page Options
Print Date : 🗛
Do Not Print 🔹
🗌 Print Time Also 🖪
Print User Name : C
Do Not Print 🔹
Print Page Number : D
Do Not Print 🔹
E Format Settings
OK Cancel Defaults Help

• To display the **Page Options** dialog box, on the **Layout** sheet, click **Page Options**.(See "Layout Sheet -P.200")

#### • A Print Date

Note

Select where the date is printed, as desired. To print the time as well, select **B** Print Time Also.

# C Print User Name

Select where the user name is printed, as desired.

#### • D Print Page Number

Select where the page number is printed, as desired.

#### • E Format Settings

Click to display the **Format Settings** dialog box, which enables you to complete format-related settings.

Format Settings	<b>X</b>
Font :	[Aria] ▼
Style :	Regular
Size :	11 🚔 Points (1 - 72)
Color :	Black 👻
ОК	Cancel Defaults Help

• If you specify the same position for multiple items, the items are printed from left to right in this order: date, user name, and page number.

• When you print multiple pages per sheet using **Page Layout Printing** or similar functions, these items will be printed for each page.

# **Special Settings Dialog Box**

If the printing results are not as you expected, you can change how printing is processed in the **Special Settings** dialog box.

Parameter	Settings
Spooling at Printer Driver	Auto
FineZoom Settings 🛛 🔒	Auto
Preview Switching C	Off
Application Color Matching Priority	On
Fast Graphic Process	On
Extend Print Pass	Off
pooling at Printer Driver	Auto
pooling at 1 miles of wes	Auto

• To display the Special Settings dialog box, on the Layout sheet, click Special Settings. (See "Layout Sheet.") —P.200

Note • Click the processing method for **Parameter** within the **Settings Summaries** frame to display a list of the setting details under the frame.

#### • A Spooling at Printer Driver

Sets whether or not print jobs are spooled in the printer driver and processed by PageComposer. Printing results may be improved in some cases by setting this to **No** or **No** (**EMF Spooling**).

 When set to No or No (EMF Spooling), functions such as Page Layout, Watermark, Reverse Order, Page Options, FineZoom Settings, and Preview Switching can no longer be used.

#### B FineZoom Settings

This function is used in large-format printing.

If it is set to Yes, problems in the printing may be improved.

If it is set to **No**, image distortions such as fine lines disappearing may be improved.

#### C Preview Switching

When this setting is turned on, PageComposer starts when printing is performed with the **Open Preview When Print Job Starts** check box selected in the **Main** sheet.

#### D Application Color Matching Priority

When this is on, you can give applications priority in color management.

#### E Fast Graphic Process

Turning this setting on may help produce the expected results if image colors are inconsistent in printed documents or if lines are printed in varying thicknesses.

This function cannot be used on 64-bit version of Windows.

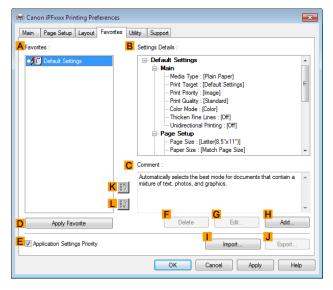

Note

#### • F Extend print pass

Uneven printing that occurs when printing with Highest selected in Print Quality may be improved in some cases by turning this setting on. However, this also reduces the printing speed.

# **Favorites Sheet**

The following settings are available on the Favorites sheet. For details on settings items, refer to the printer driver help.

#### A Favorites

Printing favorites you have created are listed with **Default Settings** favorites.

Using Favorites →P.166

## • **B** Settings Details

Displays details of the favorite selected in the **A Favorites**.

Comment

Displays notes registered in the favorite.

#### D Apply Favorite

Click to change the current print settings to those of the favorite selected in the A Favorites.

#### • E Application Settings Priority

Activate this setting to use settings values specified in the source application in preference to favorite settings selected in the A Favorites, when clicking D Apply Favorite. For details on the settings items used in preference, refer to the printer driver help.

#### • F Delete

Click to delete the selected favorite from the **A Favorites** list.

#### • G Edit

Click to display the **Edit** dialog box, which enables you to change the name and icon for the favorite selected in the **A Favorites** list.

#### • HAdd

Click to display the **Add** dialog box, which enables you to add the current print settings as a favorite.

#### • Import

Click to display the **Open** dialog box, which enables you to import favorite settings saved as a file.

#### • J Export

Click to display the Save As dialog box, which enables you to save the favorite settings as a file.

• KUp

Click to move the selected favorite up in the A Favorites list.

• L Down

Click to move the selected favorite down in the **A Favorites** list.

# **Utility Sheet**

The following items can be executed on the **Utility** sheet. For details on the utilities, refer to the relevant utility help.

#### • A Maintenance

Click to start the imagePROGRAF Status Monitor, which offers the following maintenance for the printer.

- Nozzle (ink ejecting outlet) check
- Nozzle (ink ejecting outlet) cleaning
- Head alignment adjustment
- Feed amount adjustment

## • B Color imageRUNNER Enlargement Copy

Click to launch Color imageRUNNER Enlargement Copy (iR enlargement copy), which enables you to create hot folders used for Color imageRUNNER Enlargement Copy and assign print settings to hot folders.

• Printing Enlargements of Scanned Originals from a Color imageRUNNER →P.249

For details, see Color imageRUNNER Enlargement Copy →P.240 .

Free Layout starts, laying out the document created with application software in the layout area as an object.

Leaving Free Layout running, open other files with other application software and repeat the above steps.

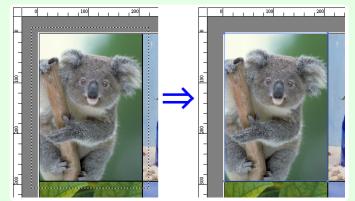

# Selecting an Object

When an object is selected, a select box (blue border) appears around the object.

Note

- To select an object, click that object.
  - To select multiple successive objects, click them while holding down the Shift key.
  - To select multiple arbitrary objects, click them while holding down the Ctrl key.
  - To select all objects, select Select All from the Edit menu.
  - When you specify the area with dragging the mouse, the object in the area is selected.

# **Changing the Object Size**

You can change the object size by means of mouse operation or by specifying a scaling value.

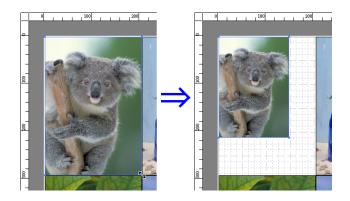

• The vertical-to-horizontal ratio remains unchanged when the object is enlarged or reduced.

#### Resizing by means of mouse operation

Select an object.

2 Place the pointer at a corner of the selection box around the object to show the arrow handle, and drag this handle to change the object size.

# Resizing by specifying a scaling value Select an object. Click on the Enl./Red. checkbox in the Format Dialog Box →P.223 and select Scaling. You either enter numbers directly. You can input between 25 and 600. You can change the numbers by clicking either ▲ button or ▼ button. Click the OK button.

# Moving an Object

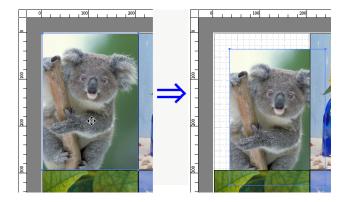

You can move the object position.

Select an object.

2 Place the pointer inside the selection box of the object to show the crosshair handle, and drag it to move the object.

Alternatively, you can move the **Object Position** by changing the values in **Vertical Pos**, **Horizontal Pos** and **Page Pos** in the Format Dialog Box ( $\rightarrow$ P.223).

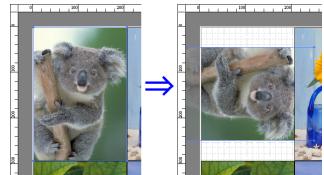

# **Rotating an Object**

You can rotate the object.

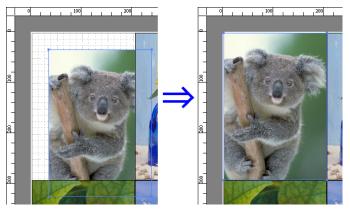

2 Select Rotate Left 90 Degrees or Rotate Right 90 Degrees from the toolbar. Alternatively, you may click on the Rotate check box in the Format Dialog Box →P.223 then select Rotate

Right or Rotate Left, and click the OK button.

# Laying out Objects Automatically

Click Auto Arrange Object in the tool bar. This automatically lays out objects. Alternatively, you may select Auto Arrange Object from the Object menu.

# **Aligning Objects**

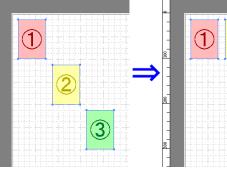

You can align objects systematically.

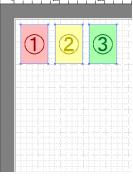

- Select multiple objects.
- 2 Click the align button from the toolbar. Alternatively, you may select the align menu from the **Object** menu.

# Align Top

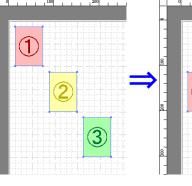

Lays out the objects, justifying them to the top.

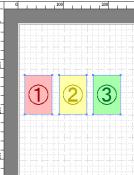

#### Center Vertically

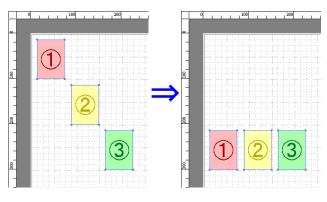

Lays out the objects, justifying them to the vertical center.

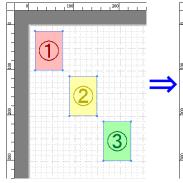

# Align Bottom

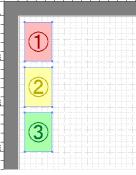

Lays out the objects, justifying them to the bottom.

## Align Left

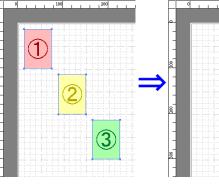

Lays out the objects, justifying them to the left.

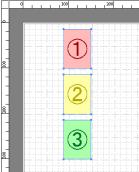

#### Center Horizontally

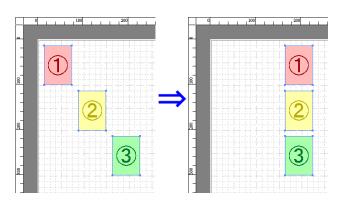

Lays out the objects, justifying them to the horizontal center.

#### Align Right

Lays out the objects, justifying them to the right.

# **Changing the Object Overlapping Order**

You can change the object overlapping order.

1 Select an object.

2

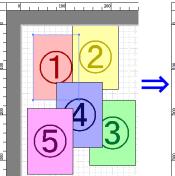

Select the Overlapping Order menu from the **Object** menu.

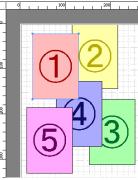

The order of overlapping affects the order of objects automatically laid out.

Note • You can also select by clicking the right button of the mouse on an object.

# Bring to Front

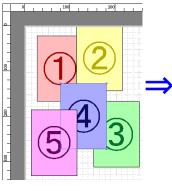

Moves the object to the frontmost position.

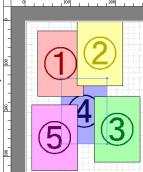

#### Send to Back

Moves the object to the backmost position.

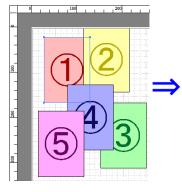

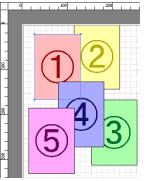

# Bring Forward

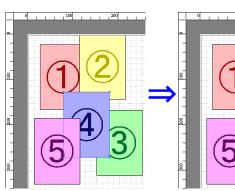

Send Backward

Moves the object one position to the front.

Moves the object one position to the back.

# Pasting a Copied or Cut Object

- Click Copy or Cut from the toolbar. Alternatively, you may select Copy or Cut from the Edit menu.
- 2 Click **Paste** from the toolbar.

Alternatively, you may select **Paste** from the **Edit** menu.

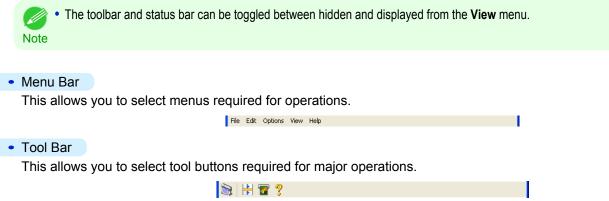

- The copied or cut object is laid out at the end of the page.
- Note You can also select by clicking the right button of the mouse on an object.
  - In order to paste an object on any position that you like, you can paste the object with **Pointed Paste** by clicking the right button of the mouse on any position that you want.

# Folded Duplex Window

This window is displayed if you select **Folded Duplex** from the **Edit** menu after selecting an object. Using the **Folded Duplex** function allows you to print with fold lines added.

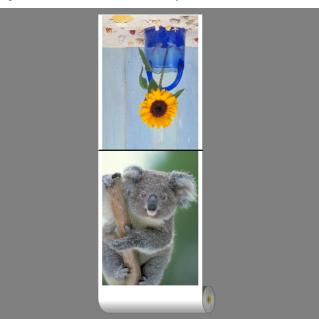

The Folded Duplex window consists of the menu and tool bars, layout area and status bar.

## Layout Area

This allows you to check the arrangement and orientation of objects.

#### Status Bar

This shows the paper source, roll paper width, and output size.

Roll Paper Width: 17-in. Roll (431.8mm) Output Size: 17.00inch x 44.26inch

# **Finished Size Settings Dialog Box**

This dialog box is displayed when you select **Finished Size Settings** from the **Edit** menu. This allows you to configure finished size settings.

Finished Size Settings	×
Finished Size O Fit Roll Paper Width O Specify Folded Size	
17"x22"(ANSI C)	
OK Cancel Defaults	

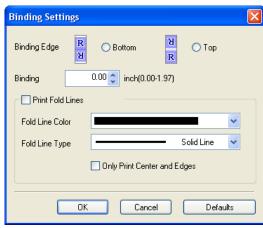

#### • Finished Size

Selects the method for setting the finished size. The following settings are available for the finished size.

Setting	Details
Fit Roll Paper Width	Prints by automatically enlarging or reducing the entire document so that the width of the document matches the roll paper width.
Specify Folded Size	Prints by automatically enlarging or reducing the entire document to match the size of the paper. Select the actual size of the paper you want to print on in <b>Fit Paper Size</b> .
Rotate Page 90 degrees (Conserve Paper)	Prints by rotating pages by 90 degrees. Pages are automatically rotated if they will fit within the roll paper width when rotated, and are not rotated if they will not fit within the roll paper width.

# **Binding Settings Dialog Box**

This is displayed when you select **Binding Settings** from the **Edit** menu. This allows you to configure the binding edge settings.

#### Binding Edge

Configures the binding edge when folding paper.

The following settings are available for the binding edge.

Setting	Details
Bottom	Prints by placing the binding margin (gutter) at the bottom of the document.
Тор	Prints by placing the binding margin (gutter) at the top of the document.

#### Binding

Configures the binding margin (gutter).

Prints by creating a binding margin (gutter) of the specified size. Enter the margin size as a number.

• The values that can be entered are 0 to 50 (mm).

#### Print Fold Lines

Configures the color and type of fold lines.

• To not print fold lines, clear the Print Fold Lines checkbox.

#### • Fold Line Color

You can select the fold lines.

#### Fold Line Type

You can select the fold lines.

The following settings are available for the fold line type.

Setting	Details
Solid Line	You can print the solid line as the frame style.
Dotted Line	You can print the dotted line as the frame style.
Dashed Line	You can print the dashed line as the frame style.

To print fold lines at the center and both edges, select the **Only Print Center and Edges** checkbox.

IFT 9400	Filits using Folded Duplex (Wildows
Prints using	Folded Duplex
This prints 2 page	es consecutively. Folding back the paper at the fold lines of the center substitutes for duplex printing.
1 Select two	o objects from the layout area of Free Layout.
	Ided Duplex from the Edit menu of Free Layout. Folded Duplex window and arrange the selected objects in the layout area.
3 Open the	Finished Size Settings dialog box from the Edit menu.
4 Select Fit	Roll Paper Width or Specify Folded Size in Finished Size.
Note	<ul> <li>Rotate Page 90 degrees (Conserve Paper) is also available when Specify Folded Size is selected.</li> </ul>
5 Click OK	to save the settings.
6 Open the	Binding Settings dialog box from the Edit menu.
7 Select Bo	ttom or Top in Binding Edge.
8 Specify th	e Binding width in Binding.
9 Configure	the Fold Line Color and Fold Line Type from Print Fold Lines.
Note	• When the <b>Only Print Center and Edges</b> checkbox is selected, fold lines are only printed at the three locations of the center and both edges.

 $\fbox{10} Click$ **OK**to save the settings.

Refer to Printer Driver  $\rightarrow$  P.172) for details on the printer driver.

• The only three sheets displayed are the **Main** sheet, the **Page Setup** sheet, and the **Layout** sheet. Some of the printer driver settings may be disabled.

#### Apply Sharpness

Place a checkmark here to set the sharpness.

Drag the slider bar to the left or right to adjust. You can also adjust by directly entering a number in the numeric input field.

You can input between 0 and 500.

- Note 
   You can change the numbers by clicking either ▲ button or ▼ button.
  - You cannot be applied to PDF files.

# Printing Enlargements of Scanned Originals from a Color imageRUNNER

Scanned originals from a Color imageRUNNER can be enlarged and printed automatically. Originals you create by scanning with a Color imageRUNNER are transferred to a "hot folder" and printed automatically after enlargement according to printing conditions you specify for that folder. This processing sequence is called the Color imageRUNNER Enlargement Copy function.

To use Color imageRUNNER Enlargement Copy, first complete these settings in the following order.

- Register a hot folder on your computer. Register a hot folder on your computer for storing scanned originals from the Color imageRUNNER and complete the settings for enlargement copy. For details, see "Creating a New Hot Folder." →P.243
- 2. Complete the scanning settings on the Color imageRUNNER. Configure the Color imageRUNNER to send scanned originals to the hot folder.

After these settings are complete, you can print enlarged copies of scanned originals from the Color imageRUNNER.

#### Completing the scanning settings on the Color imageRUNNER.

Configure the Color imageRUNNER to send scanned originals to the hot folder. It is easy to send scanned originals to the hot folder if you assign the scanning settings and destination to a **Favorites** button on the Color imageRUNNER. For instructions on assigning scanning settings and destinations to a **Favorites** button, refer to the setting manual, displayed by clicking **Color imageRUNNER Enlargement Copy Setup Manual** button of Color imageRUNNER Enlargement Copy utility, or refer to the Color imageRUNNER manual.

#### Scanning the original and print an enlargement

Follow the steps below to scan an original on the Color imageRUNNER for enlarged printing on the printer. For detailed instructions, refer to the Color imageRUNNER manual.

- Load the original on the platen glass or document feeder of the Color imageRUNNER.
- 2 Press **Send** to display the screen for transmission.
- **3** Press **Favorites**, and then press the **Favorites** button assigned to the hot folder.
  - Press **Start** on the control panel. If you scan originals on the platen glass, after scanning all originals, press **Done** on the touch-panel display.

Scanned originals are sent to the hot folder and automatically enlarged and printed following the conditions you specified for the folder.

# Features of the Print Plug-In for Photoshop/Digital Photo Professional

The main features of the Print Plug-In for Photoshop/Digital Photo Professional are as follows.

- You can automatically detect the color space of Adobe RGB or sRGB-use images, etc., and automatically set optimal profiles. Thus, you can print without the trouble of configuring settings.
- You can modify image data directly in Photoshop and send the image data to the printer. This allows you to process not only 8-bit, but also 16-bit image data.
- By using the preview function for images based on real images, and the preview function for layouts based on image positioning by media size, you can use this software to make color adjustments and confirm print layout.
- You can perform basic printer settings such as printer selection, media type and output profile selection, and matching methods, in addition to borderless printing and enlargement/reduction process without growing through the printer driver.
- You can print an image with adjustment values such as the color balance, brightness, and contrast varying in steps and select your preferred adjustment values. (See "Adjustment pattern setting dialog box.") →P.270
- You can create and print a layout image for finishing by mounting in a frame with the image extended to the sides of the frame by using the Layout Plug-In that is installed at the same time as the Print Plug-In for Photoshop. (See "About the Layout Plug-In.") →P.311
- By using the print history management function, you can import past print settings parameters. Additionally, you can save preferences as a file.

Note

• The actual output may differ from the settings in Print Plug-In for Photoshop/Digital Photo Professional (the arrangement of the image in the layout preview, print start position, and paper size) depending on the media type, image size, paper detailed settings, and printer main unit settings.

• Loss of gradation in dark areas can be reduced by performing black point compensation.

• Adobe CMM is required in order to use the black point compensation function.

• You can perform a printer simulation print by specifying the printer profile.

# **Installation Procedures**

The procedure for installing the Print Plug-In for Photoshop/Digital Photo Professional is as follows.

The Layout Plug-In is also installed when the Print Plug-In for Photoshop is installed.

Insert the User Software CD-ROM into the CD-ROM drive to start the installer.

• If the installer screen does not appear, open the CD-ROM icon in **My Computer** and click on **setup.exe** to open the icon.

Click imagePROGRAF Print Plug-in button.

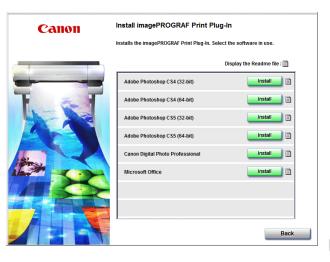

3 Click the **Install** button corresponding to the Print Plug-In for Photoshop/Digital Photo Professional you are using.

• For 32-bit Windows

	Installs the imagePROGRAF Print Plug-In. Select the	software in use.
	Disp	lay the Readme file : 📄

# **Uninstall Procedures**

The procedure for uninstalling the Print Plug-In for Photoshop/Digital Photo Professional and Layout Plug-In is as follows.

• This section describes the procedure in Windows 7.

#### • Uninstall the Print Plug-In for Photoshop

- **1.** Select **start** in **Control Panel** menu.
- 2. Select Programs and Features.
- 3. Select Canon iPFxxxx Print Plug-In for Photoshop xx, then click Change/Remove.
- Uninstall the Print Plug-In for Digital Photo Professional
  - 1. Select start in Control Panel menu.
  - 2. Select Programs and Features.
  - 3. Select Canon iPFxxxx Print Plug-In for Digital Photo Professional, then click Change/Remove.

• iPFxxxx is the name of your printer.

#### • Uninstalling the Layout Plug-In

- 1. Select Control Panel from the start menu.
- 2. Select Programs and Features.
- **3.** Select **imagePROGRAF Layout Plug-In**, and then click the **Change/Remove** button.

#### **Starting from Photoshop**

Follow the procedure below to start the Print Plug-In for Photoshop from Photoshop.

Start Photoshop.

If required, select the print range.

Note

3

4

• Images for use with Print Plug-In for Photoshop are less than 60,000 pixels in width and height. Reduce the selection range or reduce the image with processing for images more than 60,000 pixels in width and height, and then attempt step 3.

Select **Export**(or **Data Export**) from the **File** menu and then select the output plug-in that matches your printer. The imagePROGRAF Print Plug-In for Photoshop window (known below as the Print Plug-In window) is displayed.

nagePROGRAF Print Plug-In for Photoshop Main Page Setup   Color Settings   Print History   Supp	t	
	A Printer:	Canon iPFxxxx Select

Image Properties(0)		
	Print	Quit Help

• When a profile is created with a commercially available profile creation tool, it may be created in ICCv4 format. When an image source profile is ICCv4, you must install AdobeCMM or use Print Plug-In in a Windows Vista or later environment.

When Adobe CMM is not installed in a Windows XP environment, a message is displayed, and the source profile changes to Adobe RGB. To use an ICCv4 profile in a Windows XP environment, exit Plug-In and then install Adobe CMM. For details on installing Adobe CMM, refer to Using Adobe CMM  $\rightarrow$  P.290.

- When the color space of the entry screen is CMYK, it changes to AdobeRGB due to processing with Print Plug-In. Also, **Relative Colorimetric** is used for the matching method.
  - If the message below is displayed but the Print Plug-In window is not displayed, install the newest imagePROGRAF
    printer driver and then attempt step 3.

The imagePROGRAF Printer Driver for iPFxxxx is either not installed correctly or not installed at all. Please install.

(The iPFxxxx portion of the above message will reflect your printer name.)

 If the message below is displayed but the Print Plug-In window is not displayed, convert the color space of the image to either RGB color, grayscale, or CMYK color and then attempt step 3.

Set the color space of the image to either RGB color, grayscale, or CMYK color.

# **Starting from Digital Photo Professional**

Follow the procedure below to start the Print Plug-In for Digital Photo Professional from Digital Photo Professional.

Open the RGB color image that you want to print.

Windows Software

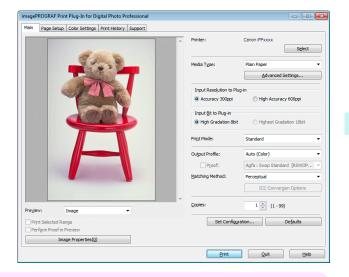

3

#### If required, select the print range.

 Images for use with Print Plug-In for Digital Photo Professional are less than 6,000 pixels in width and height. Reduce the selection range or reduce the image with processing for images more than 6,000 pixels in width and height, and then attempt step 3.

4 Select File from the Plug-in printing menu and then select the output plug-in that matches your printer. The imagePROGRAF Print Plug-In for Digital Photo Professional window (hereinafter referred to as the Print Plug-In window) is displayed.

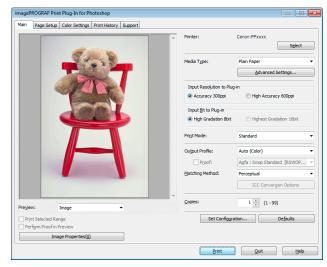

• When a profile is created with a commercially available profile creation tool, it may be created in ICCv4 format. When an image source profile is ICCv4, you must install AdobeCMM or use Print Plug-In in a Windows Vista or later environment.

When Adobe CMM is not installed in a Windows XP environment, a message is displayed, and the source profile changes to Adobe RGB. To use an ICCv4 profile in a Windows XP environment, exit Plug-In and then install Adobe CMM. For details on installing Adobe CMM, refer to Using Adobe CMM (-P.290).

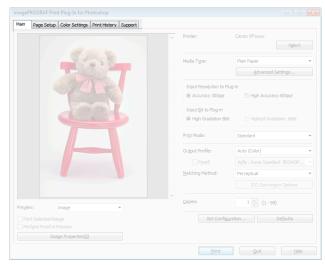

# Print Plug-In for Photoshop/Digital Photo Professional Main Window

The Print Plug-In for Photoshop/Digital Photo Professional main window consists of the sheet selection area, and the preview and button area.

#### Sheet Selection Area

The tabs used to switch between each sheet on the Print Plug-In for Photoshop/Digital Photo Professional window are displayed.

When you select a tab, a sheet is displayed. The settings available on each sheet are as follows.

- Main Sheet →P.261
- Page Setup Sheet →P.264
- Color Settings Sheet (Color) →P.266
- Print History Sheet →P.268
- Support Sheet →P.269

#### Preview Area

You can check the settings you made on the image in this area.

#### PrintButton

Click this button to begin printing.

• QuitButton

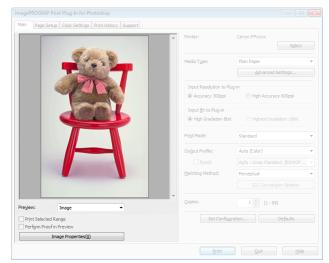

Click this button to close the Print Plug-In for Photoshop/Digital Photo Professional Main window and return to application software.

#### • HelpButton

Click this button to display the Print Plug-In for Photoshop/Digital Photo Professional Help file.

# **Preview Area**

You can check the settings you made on the image in this area.

#### • Preview

Select the preview display method. For more information about preview, see "Utilize Three Types of Previews." →P.281

Setting	Details	
Print Area Layout	Displays the print range and the area out of the print range in the layout matching the Paper Size	
	set.	

Setting	Details
Print Area Layout	*You can change the image print position when you drag the image while the cursor is displayed as ${}^{m}$ .
Image	The entire image is displayed.
	*You can select the print range when you drag the image while the cursor is displayed as $+$ When you click the image while the cursor is displayed as $=$ , the selected area is deselected.
Roll Paper Preview	Display the media size and roll paper information on the top in the layout printing on roll paper.
	*To select Roll Paper Preview, select Roll Paper in Paper Source.

#### Print Selected Range

Place a checkmark here to only print the selected range.

• When you select **Preview** in the **Image**, then select a portion of the image on the preview display, this becomes valid.

#### • Perform Proof in Preview

Place a checkmark here to simulate the colors of the output product in the preview.

• If Auto (Color) is selected under Output Profile, some media types are enabled.

- Note If ICC profile is selected under **Output Profile**, this is always enabled.
  - The actual color balance of the print product and the simulation product may differ with some environments and conditions. In addition, when you have selected an ICC Profile with **Output Profile** and it is not compatible with the printer or media that you are using, the color balance of the actual print product will differ.

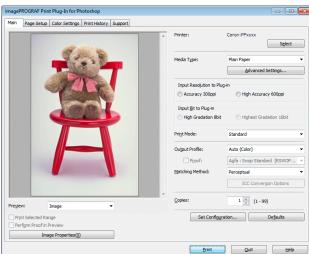

#### Image Properties button

When you click the button to open the **Image Properties** dialog box, where **Image Size**, **Resolution**, **Bit** and **Color Space** information of the image imported to Print Plug-In are displayed. Click the **Close** button to return to Print Plug-In for Photoshop/Digital Photo Professional.

Â	Image Size: Resolution: Bit: Color Space:	Width 4. 13in x Height 6. 19in 400dpi 8bit/channel sRGB IEC61966-2. 1

# Main Sheet

You can use this sheet to perform basic settings such as selecting a printer, setting the media type, or adjusting image quality.

#### • Printer

The printer types are displayed.

#### • Select button

Click this button to display the Select Printer dialog box.

When you click the **OK** button after selecting the printer in the **Select Printer** dialog box, you can change the printer that corresponds with Print Plug-In for Photoshop/Digital Photo Professional.

#### • Media Type

This allows you to select the media type.

For more information about Media Type, see "Customize Media Settings." - P.299

Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

#### Advanced Settings button

Click the button to display the **Paper Detailed Settings** dialog box. For more information about the media detailed settings, see "Paper Detailed Settings Dialog Box." —P.274

# Input Resolution to Plug-in

You can select the resolution to process the image with Print Plug-In. The following settings are available for resolution.

Setting	Details
Accuracy 300ppi	This processes images at an accurate resolution. This can control print speed and memory capacity.
High Accuracy 600ppi	This processes images at a more accurate resolution. This setting results in the best print quality, but this takes more time to print than <b>Accuracy 300ppi</b> while also requiring more memory capacity.
	*This may not be displayed depending on how you set <b>Media Type</b>

#### Input Bit to Plug-in

You can select the bit number to process with Print Plug-In for Photoshop/Digital Photo Professional. The following settings are available for the input bit number.

Setting	Details
High Gradation 8bit	This processes images with at 8bit/channel (24 bit).
Highest Gradation 16bit	This processes images with at 16bit/channel (48 bit).
	*This may not be displayed depending on how you set <b>Media Type</b> and <b>Input Resolution to Plug-in</b> .

# Print Mode

Selecting the printing mode strikes the balance between the quality of the printed image and printing speed. The following settings are available for the print mode.

Setting	Details
Highest	A setting for printing at the highest resolution when quality is most important. Printing takes longer and consumes more ink than in other modes, but this mode offers superior printing quality.
High	Choose this setting to print at high resolution when quality is most important. Printing takes longer and consumes more ink than in <b>Standard</b> or <b>Fast</b> modes, but this mode offers exceptional printing quality.
Standard	Choose this setting to print at standard resolution when quality and speed are both important. Printing takes less time than in <b>Highest</b> or <b>High</b> mode.
Fast	Choose this setting to print faster. Printing in fast mode can help you work more efficiently when checking layouts.
Highest (Max. No. of Passes)	If you are concerned about uneven colors in the print result of <b>Highest quality</b> , selecting this op- tion may improve printing results. However, printing may take longer.

• The selectable fields may vary according to the Media Type, Input Resolution to Plug-in and Input Bit to Plug-in settings.

# Output Profile

You can select the output profile.

The following settings are available for the output profile.

Setting	Details
Auto (Color)	Performs the optimum color conversion from the input image data color space information (sRGB, Adobe RGB), media settings etc. You should normally select these settings.
Auto (Monochrome Photo)	Performs the best color conversion to monochrome from the input image data color space information (sRGB, Adobe RGB), media settings etc.
None (No Color Correction)	You cannot perform color conversion with a plug-in. This is useful for creating an original ICC profile.
External ICC Profiles	This selects printer ICC profiles to be output to ICC profiles saved in the OS standard folder. Use the color space of the input data as well as the select ICC profile to perform color conversion.

• To use an ICCv4 profile, you must install AdobeCMM or use Print Plug-In in a Windows Vista or later environment. For details on installing Adobe CMM, refer to Using Adobe CMM (-P.290).

• Auto (Monochrome Photo) can only be selected for the corresponding media types.

#### Proof

262

Note

This is displayed when an ICC profile is selected as the **Output Profile**. When this is checked, you can perform printing press simulation prints. Refer to Perform Printing Press Simulation Print **P.294** for details on printing press simulation prints.

#### Matching Method

You can select the processing method when performing color conversion.

The following settings are available for the matching method.

Setting	Details
Perceptual	This converts the image to an image with natural color balance and gradation. This is useful for pictures.
Saturation	This converts the image to an image with heightened color saturation. The color balance of pic- tures and drawings may change.
Relative Colorimetric	This converts the image with emphasis on color balance before the conversion or on visual color balance. This is useful for pictures and drawings.

• When the **Output Profile** you have set is **Auto (Monochrome Photo)** or **None (No Color Correction)**, you cannot select a matching method.

# ICC Conversion Options button

This is displayed when an ICC profile is selected as the Output Profile.

When this button is clicked, the **ICC Conversion Options** dialog box is displayed allowing you to configure color conversion related settings.

Refer to ICC Conversion Options dialog box →P.277 for details on ICC Conversion Options.

#### Copies

You can input the number of print copies in numerical characters.

The maximum value is 99.

#### • Set Configuration button

Clicking the button opens the **Set Configuration** dialog box that provides settings for the adjustment of image sharpness and image enlargement method.

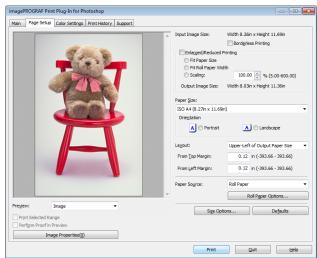

For more information about Set Configuration, see "Set Configuration Dialog Box." (-P.276)

#### • Defaults button

Click the button to return all of the settings on the Main sheet to their defaults.

# Page Setup Sheet

You can use this sheet to set the size of the image to be printed, the media size, and whether to enlarge/reduce the image.

# Input Image Size

The size of the image imported to Print Plug-In for Photoshop/Digital Photo Professional is displayed.

#### **Borderless Printing** •

When you place a checkmark here, the Specify Roll Paper Width dialog box is displayed and you can print an image without borders.

For more information about Borderless Printing, see "Print with No Borders." →P.298

Available only if rolls are selected in Paper Source.

Note

#### **Enlarged/Reduced Printing** •

When you place a checkmark here, you can print enlarged/reduced images.

When printing an enlarged/reduced image, select the method for enlargement/reduction. The image size sent to the printer is displayed matching the selected method in Output Image Size.

The following settings are available for enlarged/reduced printing.

Setting	Details
Fit Paper Size	This automatically enlarges/reduces the entire image imported to Print Plug-In to match the export media size when printing.
Fit Roll Paper Width	This automatically enlarges/reduces the entire image imported to Print Plug-In to match the width of the roll paper with the width of the image when printing.
	*Displayed only if rolls are selected in <b>Paper Source</b> .
Scaling	This enlarges/reduces the entire image by the specified scaling value. Input the scaling value in numerical characters. You can specify a range between 5-600%.
	*You can change the numbers by clicking either $\blacktriangle$ or $\blacktriangledown$ .

This is not displayed when a checkmark is placed in Borderless Printing.

264

# Output Image Size

Note

The output image size is displayed up to one place after the decimal point in millimeters.

• When Paper Size is smaller than Output Image Size, part of the image may not print.

#### • Paper Size

You can select the size of the print media.

Note

This is not displayed when a checkmark is placed in Borderless Printing.

Note • This is not displayed when Fit Roll Paper Width is set in Enlarged/Reduced Printing.

### Orientation

This selects the print orientation.

The following settings are available for orientation.

Setting	Details
Portrait	Prints the image on the media as it appears on the screen.
Landscape	Prints the image on the media rotated 90 degrees.

#### Layout

You can select the print position of an image on the media. The following settings are available for layout.

#### Layout

Setting	Details		
Upper-Left of Output Paper Size	Prints the image with fitting	Prints the image with fitting the top left of the active print area for <b>Paper Size</b> .	
Center of Output Paper Size	Prints the center of the ima	Prints the center of the image on the center of the selected Paper Size.	
Specify Print Start Position	You can print with specifying the top and left printing start positions in <b>From Top Margin</b> and <b>From Left Margin</b> for <b>Paper Size</b> .		
	From Top Margin	Input the margin from the top of the media in numbers. *You can input between -9999 and 9999 mm.	
	From Left Margin	Input the margin from the left of the media in numbers. *You can input between -9999 and 9999 mm.	

Select Print Area Layout or Image in Preview when you select Layout.
 Note

#### **Roll Paper Layout**

Setting	Details
Upper-Left of Roll Paper	Prints the top left of Media Size on the top left of the selected roll paper.
Center of Roll Paper	Prints the center of Media Size on the center of the selected roll paper.

• Select Roll Paper Preview in Preview when you select Roll Paper Layout.

Note

# Paper Source

You can select the media source.

The following settings are available for media source.

Setting	Details
Roll Paper	Select to print on roll paper.

Setting	Details
Cut Sheet	Select to print on the cut sheet.

#### Roll Paper Options button

Click this button to open the **Roll Paper Options** dialog box, where you can set roll paper width and perform auto cut settings.

For more information about the roll paper options, see "Roll Paper Options Dialog Box." →P.278

#### Size Options

Click the Size Options button to open the **Size Options** dialog box and you can select a media name, size and other settings.

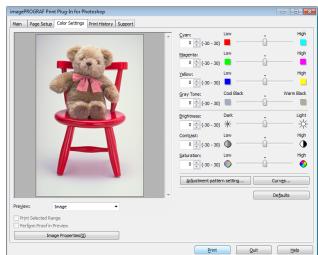

For more information about the size options, see "Size Options Dialog Box." →P.278

#### Defaults button

Click the button to return all of the settings on the **Page Setup** sheet to their defaults.

# **Color Settings Sheet (Color)**

You can use this sheet to adjust image Color, **Brightness**, **Contrast**, **Saturation**, and you can set the color balance of print product more to your liking.

Note

You can check a preview of the adjusted state for the following items.

Cyan / Magenta / Yellow, Gray Tone, Brightness, Contrast, Saturation, and Gray Tone Adjustment

#### Cyan / Magenta / Yellow

You can adjust the strength or weakness of a color by either inputting a numerical value or dragging the slide bar.

#### Gray Tone

You can adjust gray tone from cool black (cool tones) to warm black (red tones) by either inputting a numerical value or dragging the slide bar.

#### Brightness

You can adjust the brightness of the printed image without losing the brightest and darkest areas by either inputting a numerical value or dragging the slide bar.

#### Contrast

You can relatively adjust the brightness of the brightest and darkness areas by either inputting a numerical value or dragging the slide bar.

#### Saturation

You can adjust the saturation of vivid color balance to dark color balance by either inputting a numerical value or dragging the slide bar.

#### Adjustment pattern setting button

When this button is clicked, the **Adjustment pattern setting** dialog box is displayed. The **Adjustment pattern setting** dialog box allows you to print an adjustment pattern with adjustment values that vary in steps up and down, and to select your preferred adjustment values.

For details on Adjustment pattern setting, see "Adjustment pattern setting dialog box." -P.270

#### Curve button

Click the button to open the **Curve** dialog box then set the **Channel** and other settings. For more information about **Curve**, see "Curves Dialog Box." →P.279

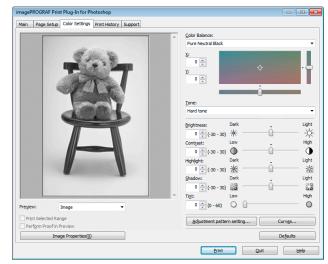

• Defaults button

Click the button to return all of the settings on the Color Settings sheet to their defaults.

# **Color Settings Sheet (Monochrome)**

This screen allows you to adjust settings such as the **Color Balance**, **Tone**, **Brightness**, and **Contrast** to configure the printing result to be closer to your expected tone and gradation.

This is displayed when Auto (Monochrome Photo) is selected in the Output Profile on the Main Sheet -P.261.

You can check a preview of the adjusted state for the following items.

Color Balance, Tone, Brightness, Contrast, Highlight, Shadow, and Tint

#### Color Balance

Allow you to select the color balance to suit your application.

#### • X / Y

Note

Adjust the color balance as you check the color tone in the adjustment area.

You can adjust the square area in the center by clicking or dragging it.

Drag the vertical or horizontal scroll bars for adjustment, as desired.

You can click the arrows by the X (horizontal) and Y (vertical) boxes or enter the values directly.

#### Tone

You can adjust the brightness of intermediate tones in an image. Selecting **Hard tone** gives a hard impression with more definition. Selecting Soft tone gives a soft impression.

#### Brightness

You can adjust the brightness of the printed image without losing the brightest and darkest areas by either inputting a numerical value or dragging the slide bar.

#### Contrast

You can relatively adjust the brightness of the brightest and darkness areas by either inputting a numerical value or dragging the slide bar.

#### • Highlight

Adjust the brightness of the lightest portion.

#### Shadow

Adjust the brightness of the darkest portion.

#### Tint

Fills in the white parts of the paper with a small amount of ink in order to reduce the difference in texture between highlights in the image and the white parts of the paper.

#### Adjustment pattern setting button

When this button is clicked, the Adjustment pattern setting dialog box is displayed. The Adjustment pattern setting dialog box allows you to print an adjustment pattern with adjustment values that vary in steps up and down, and to select your preferred adjustment values.

For details on Adjustment pattern setting, see "Adjustment pattern setting dialog box." — P.270

#### Curve button

Click the button to open the **Curve** dialog box then set the **Channel** and other settings.

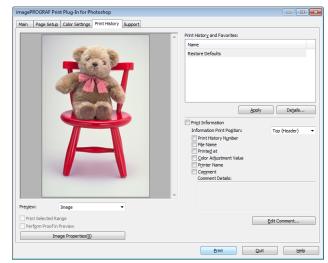

For more information about Curve, see "Curves Dialog Box." →P.279

#### • Defaults button

Click the button to return all of the settings on the **Color Settings** sheet to their defaults.

# **Print History Sheet**

You can use this sheet to apply settings history used in printing, and to print information, such as the image file name, with the image.

# 268

#### Print History and Favorites

This displays a list of print preferences.

Windows Software

Select Restore Defaults and click the Apply button to restore all settings to their initial settings.

You can check the 3 print preferences in the preview display.

#### • Apply button

Note

When you click the button, the print setting content applies to the current image selected with **Print History and Favorites**.

#### Details button

Click the Details button to open the **Print History Details** dialog box, where you can manage print history. For more information about the print history details, see "Print History Details Dialog Box." —P.280

#### Print Information

When you place a checkmark here, you can print the file name and print time and date on the image. The following settings are available for the print position and content.

#### For more information about **Print Information**, see "Set Information to Print with Image." — P.309

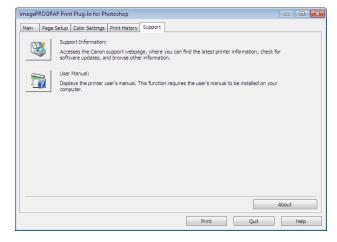

Setting	Details	
Information Print Position	Selects the information print position.	
	Top (Header)	Information is printed on the top of the image.
	Bottom (Footer)	Information is printed on the bottom of the image.
Print History Number	Place a checkmark here to print the print history number.	
File Name	Place a checkmark here to print the file name.	
Printed at	Place a checkmark here to print the time and date.	
Color Adjustment Value	Place a checkmark here to print the color adjustment value.	
Printer Name	Place a checkmark here to print the printer name.	
Comment	Place a checkmark here to print the comment details.	
Comment Details	Place a checkmark here to display the comment details.	

#### • Edit Comment button

Click the button to display the **Edit Comment** dialog box, where you can edit the comment.

#### **Support Sheet**

You can display product support information and the electronic manual.

#### Support Information button

Click the button to display websites that contain the latest product information.

An Internet connection is needed to view the websites.

#### • User Manual button

Click the button to display the printer manuals installed on the computer.

Windows Software

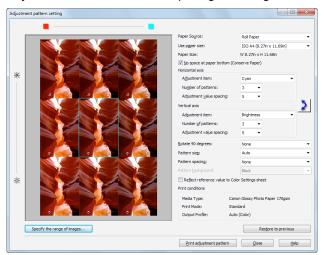

Print Plug-In for Photoshop / Digital Photo Professiona

• You must have User Manual installed on your computer.

Note

# Adjustment pattern setting dialog box

Displays the adjustment pattern by taking images with the adjustment values varying up and down in steps from the baseline adjustment values in the **Color Settings** sheet (color or monochrome). This allows you to print the adjustment pattern and select your preferred adjustment values while comparing the images.

#### Preview Area

This area allows you to view adjustment pattern images side-by-side to check the state when changes to adjustment values are applied.

The adjustment values of the image enclosed in the blue frame in the center are used as the base values, with images arranged around this with the adjustment values varying in steps up and down from these base values. If you click any of the images, the adjustment pattern is redisplayed with the adjustment values from that image as the base values.

The adjustment values are displayed at the top of each image. If both the **Horizontal Axis** and **Vertical Axis** are configured, the adjustment value for the **Horizontal Axis** is displayed on the right and the adjustment value for the **Vertical Axis** is displayed on the left. If the image is so small that the adjustment values cannot be displayed, you can check the adjustment values by displaying the tool tip.

• For images where the adjustment values are out of range, an adjustment pattern is not displayed and the message **Out** of **Range** is displayed instead.

#### Paper Source

Selects the paper feed method for the paper to print the adjustment pattern on. You can split the usage between printing adjustment patterns on cut paper (manual feed) and printing work pieces on roll paper.

#### Use Paper Size

Selects the paper size to print the adjustment pattern on.

The adjustment pattern is printed so that it fits into the selected paper size.

• If the image size is large and **Dimensions** is selected in **Pattern Size**, the pattern display might not fit within the vertical direction of the paper size. In this case, select **Auto** in **Pattern Size**.

• The printed paper size is displayed in **Paper Size**.

#### Paper Size

Since the length in the vertical direction may differ between the **Use Paper Size** and actual printed material, this displays the actual output paper size.

#### • No Space at Paper Bottom (Conserve Paper)

If a margin appears at the bottom of the paper with the paper size selected in **Use Paper Size**, you can conserve paper by selecting this check box to print excluding the margin area. The state of the length in the vertical direction being shortened to conserve the margin area is reflected in the displayed **Paper Size**.

#### Horizontal Axis / Vertical Axis

Configures settings such as the items that change in steps and the number of patterns when multiple adjustment patterns are arranged horizontally or vertically.

#### Adjustment Item

Selects the items to change in steps.

For color, you can select **Cyan**, **Magenta**, **Yellow**, **Gray Tone**, **Brightness**, **Contrast**, or **Saturation**. For monochrome, you can select X **Color Balance**, Y **Color Balance**, **Tone**, **Brightness**, **Contrast**, **High-light**, **Shadow**, or **Tint**.

The icons for Horizontal Axis Adjustment Item are displayed above the preview area and the icons for Vertical Axis Adjustment Item are displayed on the left of the preview area.

None can only be selected for Vertical Axis in both color and monochrome.

#### Number of Patterns

You can select the number of images to display in the pattern in the horizontal or vertical direction from 3, 5, and 7. If the adjustment item is **Tone**, you can select 3 or 5. When **Tone** is selected as the adjustment value, -1 is **Soft tone**, 0 is **Middle tone**, 2 is **Medium-hard tone**, 3 is **Hard tone**, and 5 is **Strong-hard tone**.

#### Adjustment Value Spacing

You can select the interval of the variation in adjustment values between neighboring adjustment pattern images from the range of 1 to 10. The larger the value, the greater the differences between the states of the adjustment pattern images. Note that if the adjustment item is **Tone**, the **Adjustment Value Spacing** cannot be selected.

(Swap) button

Rearranges the adjustment pattern with the Horizontal Axis and Vertical Axis adjustment items swapped.

#### Rotate 90 degrees

Rotating the image may make it easier to conserve paper and compare images. Select **Per Image** to rotate each of the images in the adjustment pattern by 90 degrees. Select **Entire Image after layout** to rotate the entire adjustment pattern by 90 degrees. When **None** is selected, the image is not rotated.

#### Pattern Size

You can specify the size of the image when printing the adjustment pattern.

When **Auto** is selected, the image is enlarged or reduced to fit the adjustment pattern into the **Use Paper Size**. When **Dimensions** is selected, the image is printed at the input image size without enlarging or reducing. **Dimensions** cannot be selected when the paper feed method is **Manual**.

• If the input image size is large, check the **Paper Size** before starting printing because it may be larger than the actual printed material size.

- Select Dimensions in Pattern Size to print at the input image size without enlarging or reducing the images.
- Patterns that extend past the horizontal width of the paper are printed wrapped onto the next line.

#### Pattern Spacing

You can select **None** or **Available**. If **Available** is selected, you can insert a background between each image. The background color can be specified in **Pattern Background**.

#### Pattern Background

You can select the background color from White, Black, and Gray.

If it is difficult to compare the differences between neighboring adjustment pattern images, changing the background color may make it easier to compare. The **Pattern Spacing** can be selected if **Pattern Background** is **Available**.

#### Update Base Values in the Color Settings Sheet

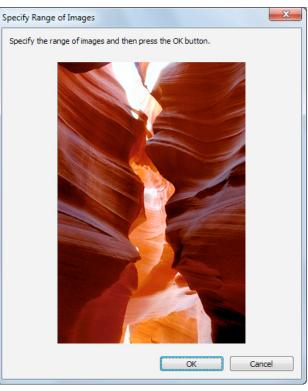

Select this check box and click the **Close** button to apply the setting values (standard values) of the image enclosed in the blue frame in the center of the preview area in the **Color Settings** sheet (color or monochrome).

#### • Print Conditions

Displays the paper type, print mode, and output profile configured in the main window. This makes it possible to check the details of each of the settings when printing the adjustment pattern without returning to the main window.

#### • Specify the Range of Images button

When this button is clicked, the **Specify the Range of Images** dialog box is displayed for specifying the range of images.

When you specify the range by using the mouse or other means and then click the **OK** button, the **Specify the Range of Images** dialog box closes and the specified image range is redisplayed as the adjustment pattern. If you click the **Cancel** button, the **Specify the Range of Images** dialog box closes even if a range is selected.

#### • Restore to Previous button

When this button is clicked, the settings are restored to the defaults when the **Adjustment pattern setting** dialog box was first displayed.

#### Close button

When this button is clicked, the setting values in the **Adjustment pattern setting** dialog box are saved and the dialog box is closed. These setting values are applied the next time the Print Plug-In for Photoshop/Digital Photo Professional is started. Furthermore, if you select the **Update Base Values in the Color Settings Sheet** check box and click the **Close** button, the setting values for the image enclosed in the blue frame in the preview area (central image) are applied to the settings in the **Color Settings** sheet (color or monochrome).

#### • Print Adjustment Pattern button

When this button is clicked, printing the adjustment pattern is executed. The **Adjustment pattern setting** dialog box does not close even after executing the printing.

The adjustment values are printed at the top of each image. If both the **Horizontal Axis** and **Vertical Axis** are configured, the adjustment value for the **Horizontal Axis** is displayed on the right and the adjustment value for the **Vertical Axis** is displayed on the left.

Each of the setting values for the paper type, print mode, and output profile as well as the adjustment values configured in the **Color Settings** sheet (color or monochrome) are printed at the bottom of the paper. However, the adjustment values for the **Curve** are not printed.

Windows Software

Print Plug-In for Photoshop / Digital Photo Professional

• The job name when printing the adjustment pattern is "Original Image Name + Pattern-Print". For example, the print job name for the image "ABC.jpg" is "ABC\_Pattern-Print.jpg".

# Paper Detailed Settings Dialog Box

This dialog box appears when you click the **Advanced Settings** button on the **Main** Sheet. You can set **Drying Time** and **Roll Paper Margin for Safety** by media type.

Paper Detailed Settings		×
Media Type:	Drying Time Between Pages:	Printer Default
Canon Premium Plain Paper 80	Between Scans:	Printer Default
Canon Coated Paper     Canon Heavyweight Coated Paper     Canon Matte Photo Paper     Colored Coated Paper	Roll Paper Margin for Safety Nea <u>r</u> End Margin:	Printer Default
Lightweight Coated Paper     Heavyweight Coated Paper     Photo Paper	C <u>u</u> t Speed:	Printer Default 🔻
Canon Glossy Photo Paper 170gsm     Canon Satin Photo Paper 170gsm     Canon Premium Glossy Paper 2 280     Canon PremiumSemi-GlossyPpr2 281	Calibration Value:	Printer Default
Canon PhotoPaper Pito Semi-Gloss     Canon Photo Paper Pro Platinum	Mirror	
	OK Cancel	Defaults <u>H</u> elp

#### Drying Time

#### **Between Pages**

This sets the wait time for the ink to dry between each completely printed sheet and the output of the sheet.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
None	The paper is ejected immediately after printing.
30sec. / 1min. / 3min. / 5min. / 10min. / 30min. / 60min.	The sheet is ejected when the specified time after printing has elapsed.

#### **Between Scans**

This sets the wait time between line scans during printing.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
None	The printing continues to the next line immediately after the last line.
1sec. / 3sec. / 5sec. / 7sec. / 9sec.	The printing continues to the next line after the set time.
	*For the media type that has problems, such as ink smears on the page or colors that seem un- even during borderless printing etc., increase the value for this setting.

# Roll Paper Margin for Safety

#### Near End Margin

This sets the length of the near end margin of the roll paper.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
5mm	Print at a standard size.
	*Select for Media Type that has no problem when printing with a standard size margin.
20mm	Select this when rubbing against the printhead occurs such as when using paper that tends to curl.

#### Cut Speed

This selects the auto cut speed.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
Fast	Select this setting if cutting with the <b>Standard</b> setting is not clean.
Standard	Select this setting when you are not experiencing problems.
Slow	This helps prevent adhesive from sticking to the cutter and keeps the cutter sharp if you select it when using adhesive paper.

#### Calibration Value

When calibration has been carried out on the printer, use this setting to choose whether or not to use the results.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
Use Value	The calibration results are used for printing.
Disregard Value	The calibration results are not used for printing. Select this option to avoid changes to image color tones during printing due to color calibration.

#### Mirror

Specify whether to print a mirror image, as needed. Select this option to print a version of the document or image with the left and right sides inverted.

#### Unidirectional Printing

Select this checkbox to prevent problems such as misaligned lines and improve the print quality. However, the printing speed becomes slower.

#### • High-Precision Text and Fine Lines

Print increasing ink impact accuracy, particularly for sharper text and fine lines. However, this takes more time than regular printing.

 When Highest (Max. No. of Passes) is selected as the print mode, High-Precision Text and Fine Lines cannot be selected.

# Set Configuration Dialog Box

This dialog box appears when you click the **Set Configuration** button on the **Main** Sheet. You can set the adjustment of image sharpness and image enlargement method.

Set Configuration		×
Sharpen:		
0 (0-500)	Ò	
Image Enlargement Method:	Nearest Neighbor	•
Close Plug-in After Printing		
Output Method		
Print		
🔘 Save in mail box

Name of data to be saved:	sol5027-24.psd	
Print after reception is com	plete	
Initialize all warning dialog boxe	s	
OK Cancel	Defaults Help	

#### Sharpen

Performs adjustment of the sharpness (outline) settings.

#### Image Enlargement Method

You can select the image enlargement method.

The following settings are available for the image enlargement method.

Setting	Details
Nearest Neighbor	Performs simple enlargement.
Bilinear	Performs line vector enlargement.
Bicubic	Adjust pixels with calculation of elements such as a color or brightness of neighboring pixels.

#### Close Plug-in After Printing

When you place a checkmark here, the plug-in closes after printing finishes.

• If printing does not finish correctly because it was canceled or an error occurred, the plug-in does not close.

# Output Method

You can select the output method.

The following settings are available for the output method.

Setting	Details
Print	Normal printing. The print job data is stored temporarily in the box as the job prints.
Save in mail box	Saves the print data in the mail box. If you select <b>Save in mail box</b> , you must specify <b>Name of data to be saved</b> .
Print after reception is complete	When you place a checkmark here, you can print after saving jobs in the temporary storage space. This cannot be used when <b>Save in mail box</b> is selected.

#### Initialize all warning dialog boxes

When this is checked, all of the warning dialog boxes that have been set to "Do not show this screen again" become displayed.

# ICC Conversion Options dialog box

This is displayed when an ICC profile is selected in the **Output Profile** list in the **Main** sheet and the **ICC Conversion Options** button is clicked. This allows you to configure detailed color matching related settings.

ICC Conversion Options		×
Conversion Engine:	OS Standard CMM	
Proof Options	Black Point Compensation	
Simulate Paper Colo	r	
√ Simulate Black Ink		
		_
OK Car	ncel Defaults Help	

#### Conversion Engine

Selects the conversion engine to use when converting colors.

Adobe CMM needs to be installed in order to use Adobe CMM. Refer to Using Adobe CMM P.290 for details on how to install Adobe CMM.

#### Black Point Compensation

Check this check box to perform black point compensation. Loss of gradation in dark areas can be improved by performing black point compensation.

This can be used if  $\ensuremath{\text{Adobe CMM}}$  is selected as the  $\ensuremath{\text{Conversion Engine}}.$ 

#### Proof Options

Configures settings related to printing press simulation.

The proof options consist of the following settings.

Setting	Details
Simulate Paper Color	Select this when performing paper color simulation. When this is on, <b>Simulate Black Ink</b> is auto- matically turned on and becomes grayed out.
Simulate Black Ink	Select this when performing simulation of black ink. In order to enable this setting, <b>Adobe CMM</b> needs to be selected under <b>Conversion Engine</b> .

This dialog box appears when you click the **Roll Paper Options** button on the **Page Setup** Sheet. You can set the roll paper width and perform the auto cut settings.

Roll Paper Options	
Roll Paper Width:	24-in. Roll (609.6mm) -
Automatic Cutting:	Available
No Spaces at	t Top or Bottom (Conserve Paper)
ок с	ancel Defaults Help

#### Roll Paper Width

This selects the width of the roll media set to the printer.

#### Automatic Cutting

You can set the printer to cut roll paper automatically or print a guideline for cutting. The following settings are available for automatic cutting.

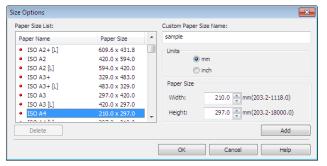

Setting	Details
Available	Each page is automatically cut after it is printed.
None	Each page is not cut after it is printed and printing continues without interruption.
Print Cut Guideline	A print cut guideline is printed after each page and printing continues without interruption.

#### No Spaces at Top or Bottom (Conserve Paper)

When you place a checkmark here, the print data is printed without margins.

# **Size Options Dialog Box**

This dialog box appears when you click the **Size Options** button on the **Page Setup** Sheet. You can select a media name, size and other settings.

#### Paper Size List

Displays all the standard sizes and custom media sizes.

#### Custom Paper Size Name

You can enter any name up to 63 characters.

#### • Units

278

You can select the units of measure to use when you define custom media size. Switching this setting resets the units of measure for the entire Plug-In.

#### Paper Size

Width

iPF9400

Enter the width of the media size.

#### Height

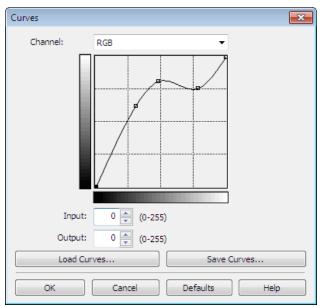

Enter the height of the media size.

#### Add button

Click the button to register the contents of the settings.

# **Curves Dialog Box**

This dialog box appears when you click the Curves button on the Color Settings Sheet. You can set Channel and other settings.

#### Channel

Select from among RGB, Red, Green, or Blue.

• Gray is displayed for monochrome printing and this selection cannot be changed.

#### Input

Enter an input value.

Note

 The allowed entry range is 0 to 255. Note 
• You can change the numbers by clicking either ▲ button or ▼ button.

# • Output

Enter an output value.

- The allowed entry range is 0 to 255.
- You can change the numbers by clicking either ▲ button or ▼ button.

#### - Load Curves button

Click the button to load stored data for a tone curve.

Click the button to stores the current tone curve settings.

# **Print History Details Dialog Box**

This dialog box appears when you click the **Details** button on the **Print History** Sheet. This controls print history. For more information about **Print History Details**, see "Utilize Print History." →P.299

• Up to 200 print history items can be displayed. All items above 200 are deleted.

Note • When you cannot print properly because you canceled the printing or an error occurred, appears 🗙 to the left of the print history number.

#### • Delete button

Click the button to delete the selected print history.

# Add button

Click the

Note

button to add the selected print history to preferences.

#### Favorites

280

The print history stored in print preferences displays in list format.

• You can change the order by selecting an item and dragging it to another place.

#### • Import button

Click the button to import print history saved as a file.

#### • Export button

Click the button to save print history as a file that is stored in print preferences.

#### • Delete button

Click the button to delete print history stored in print preferences.

#### Settings

Displays the print history settings selected from the **Print History** or **Favorites**.

Setting	Details
Main	When you select this the Main sheet settings are displayed.
Page Setup	When you select this the Page Setup sheet settings are displayed.
Color Settings	When you select this the Color Settings sheet settings are displayed.

# **Utilize Three Types of Previews**

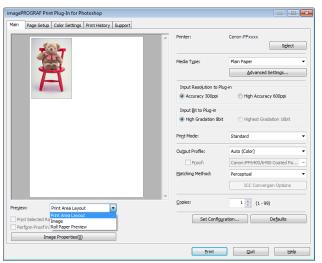

You can use Print Plug-In for Photoshop/Digital Photo Professional to check an image in three types of previews. The preview types are as follows.

- Check Image with Print Area Layout →P.281
- Check the original image with Image →P.282
- Check Image with Roll Paper Preview →P.282

# **Check Image with Print Area Layout**

Displays the print range and the area out of the print range in the layout matching the media size set in the print area layout.

Select Print Area Layout in Preview.

衫 • When the cursor on the preview is displayed as 🖑 on the preview, you can specify the print position by dragging the image.

Note • When the cursor is displayed as 🖑 on the preview, the below conditions on the Page Setup sheet have all been met.

- There is no checkmark in Borderless Printing.
- There is no checkmark in Enlarged/Reduced Printing or Scaling has been selected.

# Check the original image with Image

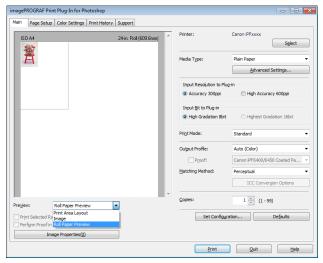

In the image preview you can check the entire image that you have input. Select **Image** in **Preview**.

Display the media size and roll paper information on the top in the layout printing on roll paper in Roll Paper Preview Select **Roll Paper Preview**.

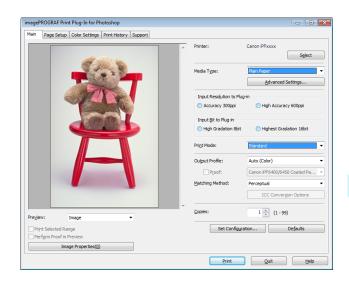

• To select Roll Paper Preview in Preview, select Roll Paper in Paper Source.

# Print with a Desired Picture Quality

You can specify and print at the resolution you desire.

Display the Main sheet.

Print Plug-In for Photoshop / Digital Photo Professiona

Select the media set to the printer in Media Type.

2

 Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

3 Choose either Accuracy 300ppi or High Accuracy 600ppi for the resolution to process images in Input Resolution to Plug-in.

 When you select High Accuracy 600ppi images are processed at a more accurate resolution. This setting results in the best print quality, but this takes more time to print than Accuracy 300ppi while also requiring more memory capacity.

High Accuracy 600ppi will not display with some Media Type settings.

4 Choose either **High Gradation 8bit** or **Highest Gradation 16bit** for the bit number when processing images in **Input Bit to Plug-in**.

When you select High Gradation 8bit, images are processed at 8 bit/channel (24 bit).

Note • When you select Highest Gradation 16bit, images are processed at 16bit/channel (48 bit).

Highest Gradation 16bit will not display with some Media Type or Input Resolution to Plug-in settings.

5 Select the mode to be printed when processing images in **Print Mode**.

• The settings that can be selected differ by Media Type,Input Resolution to Plug-in, and Input Bit to Plug-in selected.

Click the **Print** button.

Printing begins.

# Adjust the Colors and Print

You can adjust the colors to your liking and print images.

The explanation below is on 6 ways to adjust the colors using Print Plug-In for Photoshop/Digital Photo Professional.

- Adjust the Colors while Checking the Preview (for Color) →P.284
- Adjust the Colors while Checking the Preview (for Monochrome) →P.285
- Adjust the Colors by Color Matching →P.287
- Print High-Quality Adobe RGB16bit Images →P.288
- Prints monochrome photographs with high quality →P.289
- Using Adobe CMM →P.290

# Adjust the Colors while Checking the Preview (for Color)

You can adjust the colors while checking the adjustments in the preview. The following explanation is on the procedures for adjusting example image below.

- Low for Cyan
- High for Yellow
- Low for Saturation
- Warm Black for Gray Tone
- Enhance brightness for the curves

The above image adjustments are reflected in the before and after images below.

	Display	the	Color	Settings	sheet.

Drag the slide bar in the direction of **Low** in **Cyan**.

Drag the slide bar in the direction of **High** in **Yellow**.

284

3

- **4** Drag the slide bar in the direction of **Low** in **Saturation**.
  - 5 Drag the slide bar in the direction of **Warm Black** in **Gray Tone**.
    - You can change the numbers by inputting in numerical characters.
    - Note You can change the numbers by clicking either ▲ button or ▼ button.
  - 6 Click the **Curves** button then click near the center of the curve.
  - 7 Enter 120 in **Input** and 135 in **Output** then click the **OK** button.

8

# Click the Print button.

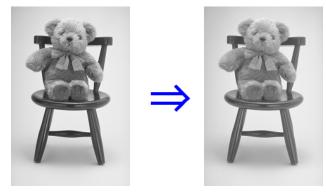

The adjustments are reflected in the image and printing begins.

# Adjust the Colors while Checking the Preview (for Monochrome)

You can adjust the colors while checking the adjustments in the preview. The following explanation is about the procedures for adjusting example image below.

- Low for Contrast
- Light for Highlight
- Light for Shadow
- Enhance brightness for the curves

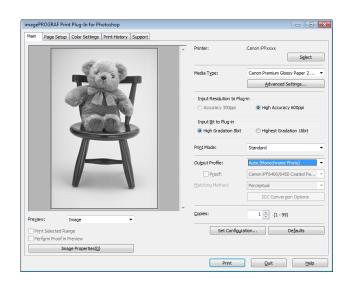

The unapplied and the applied images of the above image adjustments are as below.

2

Select Auto (Monochrome Photo) in Output Profile.

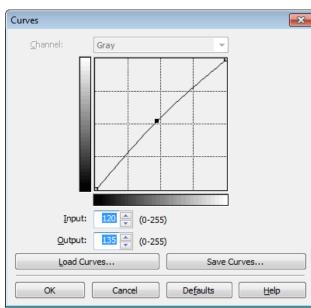

# **3** Open the **Color Settings** sheet.

Main Page	Setup Color Settings Print History Support

- In Contrast, drag the slide bar toward Low.
  In Highlight, drag the slide bar toward Light.
  In Shadow, drag the slide bar toward Light.
  You can change the numbers by inputting in numerical characters. Note
  You can change the numbers by clicking either ▲ button or ▼ button.
  - 7 Click the **Curves** button then click near the center of the curve.

Windows Software

Click the **Print** button.

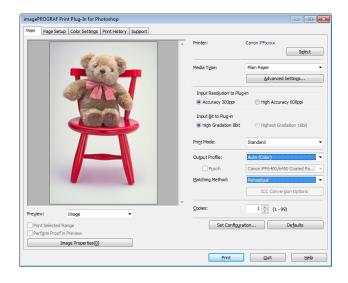

This applies the image adjustments and starts the print job.

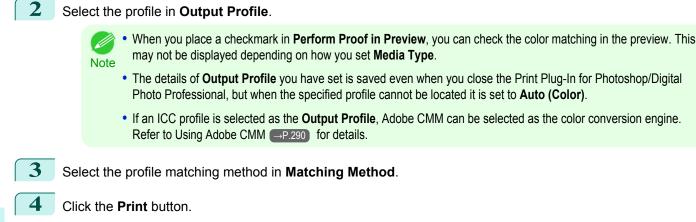

# Adjust the Colors by Color Matching

When you print a color image imported from a scanner or a digital camera, the image may appear different from the image on the screen. That is due to the differences in color on the screen and in the printer. In Print Plug-In for Photo-shop/Digital Photo Professional, you can get the color balance of the print product closer to the color balance displayed on the screen through performing ICC (International Color Consortium) color profile settings, matching method settings, and settings for the internal profile, which performs optimum color conversion in response to media and resolution settings.

Display the Main sheet.

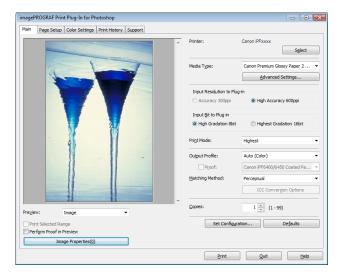

Printing begins with the output profile and matching method that you have set.

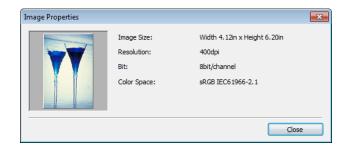

# Print High-Quality Adobe RGB16bit Images

This prints a high-quality Adobe RGB16bit image taken with a high-end digital camera. Print Plug-In for Photoshop/ Digital Photo Professional allows you to print high color gamut and high tone images, when the Adobe RGB16bit image data has been retouched in Photoshop, without compromising the level of tone in the image.

Select the Adobe RGB16bit image data in Photoshop and start Print Plug-In for Photoshop/Digital Photo Professional. (See "Starting from Photoshop.") →P.255

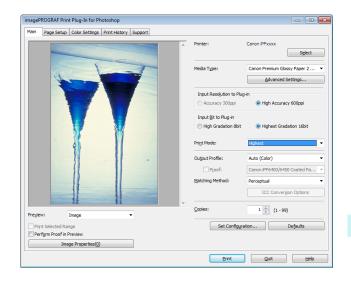

- 2 Click Image Properties button.
- 3 Check that Adobe RGB is displayed in Color Space, and 16bit/channel is displayed in Bit in the Image Properties dialog box, and click the Close button.

iPF9400

4 Display the Main sheet.

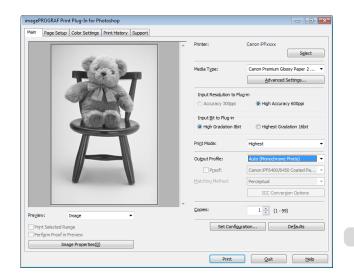

- 5 Select High Accuracy 600ppi in Input Resolution to Plug-in.
- 6 Select Highest Gradation 16bit in Input Bit to Plug-in.
- 7 Select the highest quality possible in **Print Mode**.
- 8 If required, adjust the colors using color matching.
- 9 Click the **Print** button.

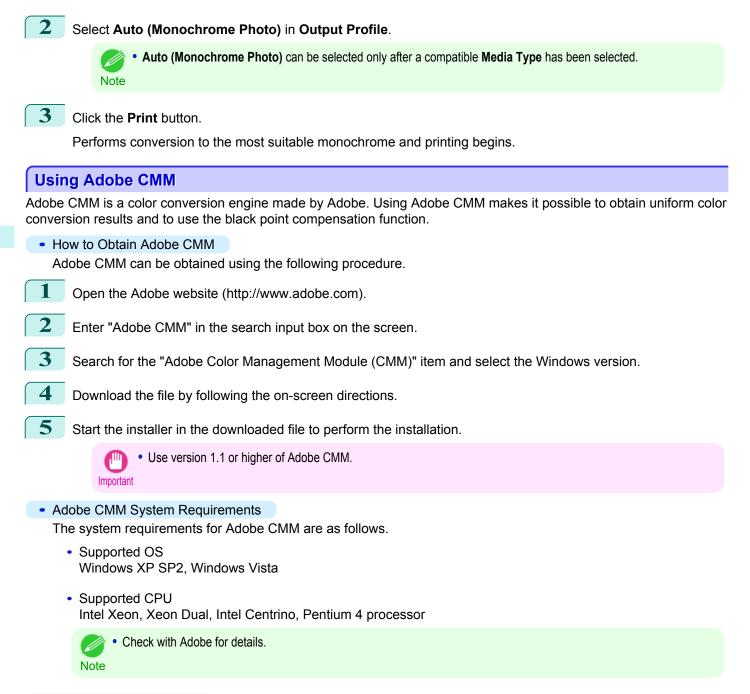

Printing of the Adobe RGB16bit image begins.

#### Prints monochrome photographs with high quality

Prints images captured with a scanner or digital camera in monochrome with high quality. Provides stable monochrome photo images without color casts and minimizes the influences of the difference of the light source.

Display the **Main** sheet.

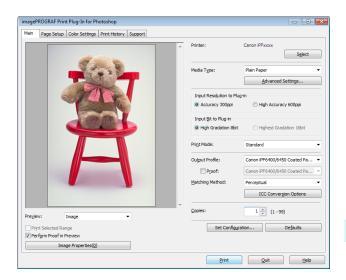

#### How to Use Adobe CMM

The procedure for using Adobe CMM is as follows.

Display the Main sheet.

- 2 Select one of the ICC profiles as the **Output Profile**.
- 3 Click the ICC Conversion Options button.
- 4 In the ICC Conversion Options dialog box, select Adobe CMM from Conversion Engine.

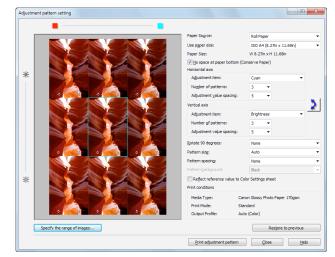

ICC Conversion Options	<b>×</b>
Conversion Engine:	Adobe CMM
	Black Point Compensation
Proof Options	
Simulate Paper Color	
🔽 Simulate Black Ink	
OK Cano	iel Defaults Help

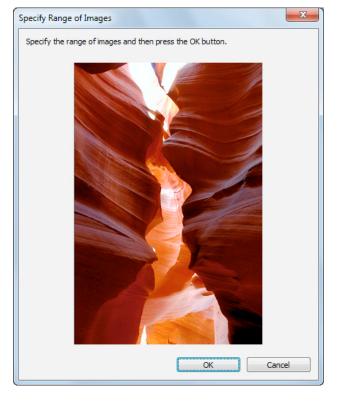

5 Click the **OK** button to close the **ICC Conversion Options** dialog box.

## Printing an Adjustment Pattern and Selecting Adjustment Values

Since you can print an adjustment pattern and select your preferred adjustment values while comparing the images, this allows you to conserve ink and paper, and save the time it takes to repeatedly check adjustment results. The procedure for displaying and printing an adjustment pattern is as follows.

Display the **Color Settings** sheet (color or monochrome) and set the adjustment values to use as the baseline values.

# 3 Set the Adjustment Item, Number of Patterns, and Adjustment Value Spacing for the Horizontal Axis and Vertical Axis.

If you want to check part of an image as the adjustment pattern, click the **Specify the Range of Images** button, select the range you want to check in the **Specify the Range of Images** dialog box, and then click the **OK** button.

- 4 Set Rotate 90 degrees, Pattern Size, Pattern Spacing, and Pattern Background as needed.
- 5 For the **Paper Source** setting, select how the paper to print on is to be supplied.
- **6** For the **Use Paper Size** setting, select the paper size to print on.
  - Click the **Print Adjustment Pattern** button. The adjustment pattern starts printing.
- 8 Check the image in the adjustment pattern that is closest to the customer image and click the corresponding image in the preview area.

2

- 9 If there are any other items that you want to adjust, select **Adjustment Item** and perform steps 7 and 8.
- 10 Once you have made the necessary adjustments, select the Update Base Values in the Color Settings Sheet check box and click the Close button. The previous adjustment values in the Color Settings sheet (color or monochrome) are updated.

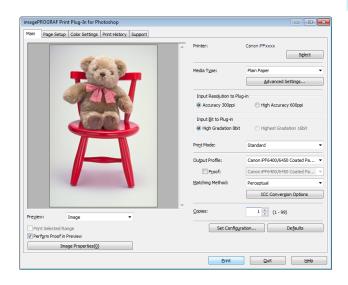

### **Perform Black Point Compensation**

Black point compensation that is equivalent to Photoshop can be performed using the following procedure. Use this to avoid saturation in the black areas of images.

 Adobe CMM needs to be installed in order to use black point compensation. Refer to Using Adobe CMM →P.290 for details on how to install Adobe CMM.

Display the Main sheet.

- 2 Select one of the ICC profiles as the **Output Profile**.
- 3 Click the ICC Conversion Options button to open the ICC Conversion Options dialog box.
- 4 Select Adobe CMM as the Conversion Engine.
- 5 Check the **Black Point Compensation** check box.

ICC Conversion Options	<b>—</b>
Conversion Engine:	Adobe CMM
Proof Options	
Simulate Black Ink OK Cance	tel Defaults Help

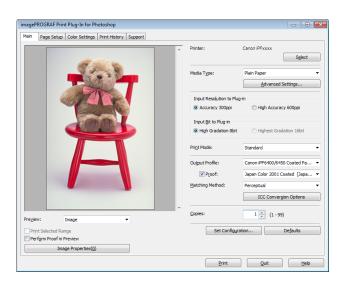

Click the **OK** button to close the **ICC Conversion Options** dialog box.

## **Perform Printing Press Simulation Print**

You can perform printing press simulation prints by specifying ICC profiles such as Japan Color or SWOP, and specifying an ICC profile for the printing press.

Display the Main sheet.

- 2 Select one of the ICC profiles as the Output Profile.
- 3 Check the **Proof** check box and select the profile for the printing press you want to target from the list on the right.
- 4 Click the ICC Conversion Options button to open the ICC Conversion Options dialog box.

ICC Conversion Options	<b>×</b>
Conversion Engine:	OS Standard CMM

OK Car	ncel Defaults Help

- Configure the Proof Options as needed.
  - The proof options are Simulate Paper Color and Simulate Black Ink. The settings that can be selected vary depending on the Conversion Engine settings. Note
- 6 Click the OK button to close the ICC Conversion Options dialog box.
- Click the Print button. Printing begins.

#### Enlarge/Reduce and Print 294

5

You can enlarge or reduce an image in Print Plug-In. Three methods to enlarge/reduce and print are as follows.

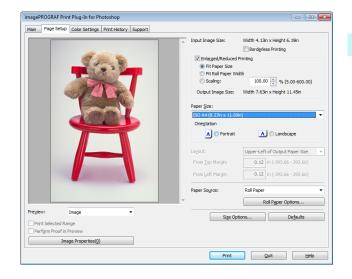

Enlarge/Reduce and Print Matching Output Media Size →P.295

- Enlarge/Reduce and Print Matching Width of Roll Paper →P.296
- Specify Scaling, Enlarge/Reduce and Print →P.297

## Enlarge/Reduce and Print Matching Output Media Size

By specifying the media type loaded in the printer, the image can be enlarged or reduced to fit the size of the image area of the media. This feature is useful when you need to print on the full width of Media that you have selected.

- When you need to print on the full width of roll media, see "Enlarge/Reduce and Print Matching Width of Roll Paper." →P.296
- Note When you do the procedure below to print on roll media, the print job will match the size of the output with the media selected with the **Paper Size** setting.
  - Display the Page Setup sheet.

2 Select the size of the media that you want to print in Paper Size. This is not displayed when a checkmark is placed in Borderless Printing. Note • This is not displayed when Fit Roll Paper Widthis set in Enlarged/Reduced Printing. 3 Select either Portrait or Landscape as the media orientation for the image in Orientation. When you select Portrait, the image on the media prints as it appears on the screen. Note • When you select Landscape, the image on the media prints rotated 90 degrees. 4 Click the Enlarged/Reduced Printing check box on. This is not displayed when a checkmark is placed in Borderless Printing. Note 5 Select Fit Paper Size. 6 Click the Print button. The image prints filling the entire output media surface.

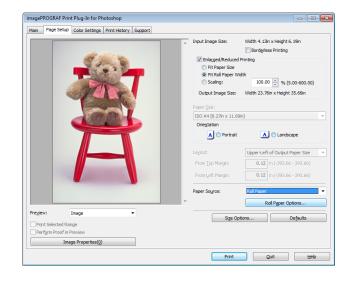

## Enlarge/Reduce and Print Matching Width of Roll Paper

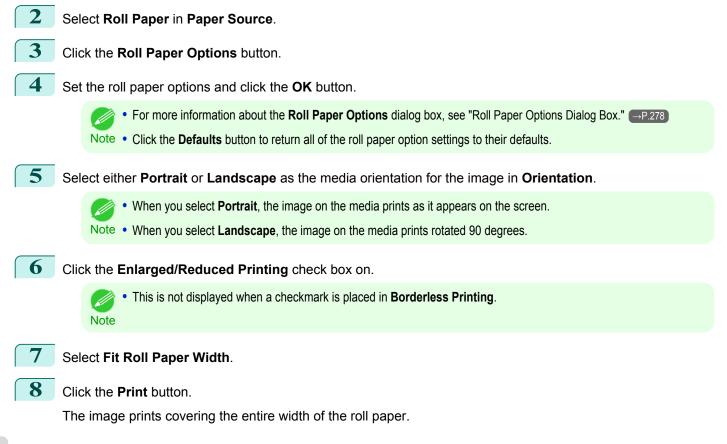

You can enlarge/reduce and print an image matching the width of the roll paper set in the printer. This is useful when you wish to print an image that covers the entire width of the roll paper.

• Printing will not occur properly when a print roll is not set to the printer.

Display the Page Setup sheet.

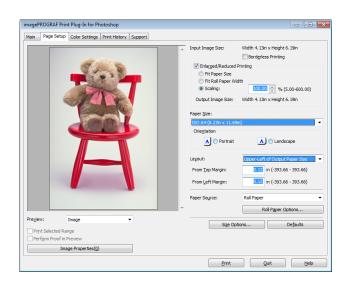

## Specify Scaling, Enlarge/Reduce and Print

You can specify scaling to enlarge/reduce an image and print. This is useful when you wish to print an image at a specific size.

2 Select the size of the media that you want to print in <b>Paper Size</b> .
<ul> <li>This is not displayed when a checkmark is placed in Borderless Printing.</li> <li>Fit Roll Paper Widthis set in Enlarged/Reduced Printing.</li> </ul>
3 Select either <b>Portrait</b> or <b>Landscape</b> as the media orientation for the image in <b>Orientation</b> .
• When you select <b>Portrait</b> , the image on the media prints as it appears on the screen.
Note • When you select Landscape, the image on the media prints rotated 90 degrees.
4 Click the Enlarged/Reduced Printing check box on.
<ul> <li>This is not displayed when a checkmark is placed in Borderless Printing.</li> <li>Note</li> </ul>
5 Select <b>Scaling</b> and input the scaling factor or drag the four corners of the image in the Preview display.
<ul> <li>You can specify scaling rate in intervals of 0.01%.</li> <li>Note</li> <li>You can specify a range between 5.00-600.00%.</li> </ul>
<ul> <li>The size of the width and height proportionally grow when the image is enlarged/reduced.</li> </ul>
<b>6</b> Either drag the image on the <b>Print Area Layout</b> preview, or set the print position <b>Layout</b> .
7 Click the <b>Print</b> button.
Printing begins at the set scaling rate.

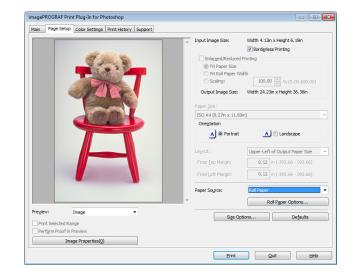

### **Print with No Borders**

You can use the borderless printing function to print without margins surrounding the image.

Note • To use the borderless printing function, the specified media must be set to the printer.

## 2 Select Roll Paper in Paper Source.

Click the **Borderless Printing** check box on.

• Select the width for roll paper set in the printer in **Roll Paper Width** in the **Specify Roll Paper Width** dialog box, and click **OK**.

Specify R	oll Paper Width	
1	Scaling the document to fit Select the roll paper width k	
	Roll Paper Width:	24-in. Roll (609.6mm)
		OK Cancel

3

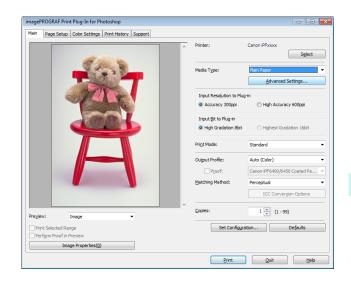

Click the **Print** button.

Borderless printing begins.

## **Customize Media Settings**

You can customize media settings.

Display the Main sheet.

Windows Software

Select the media type that you wish to customize in Media Type.

 Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results. Note

Perform the settings in the Paper Detailed Settings Dialog Box →P.274) and click the **OK** button.

## **Utilize Print History**

When you perform various settings and print in Print Plug-In for Photoshop/Digital Photo Professional, those settings are saved as print history. Also, you can export and import as files. You can store often-used print history under a specified name in print preferences.

2

4

You can save up to 200 print history items. All items over 200 are deleted in chronological order.

You can do the following things using print history.

- Confirm Print History Details →P.300
- Apply Print History to an Image →P.301
- Store Print History to Print Preferences →P.301
- Delete Print History →P.303
- Export Print History from Print Preferences →P.305
- Import Print History to Print Preferences →P.306
- Delete Print History from Print Preferences →P.308
- Set Information to Print with Image →P.309

## **Confirm Print History Details**

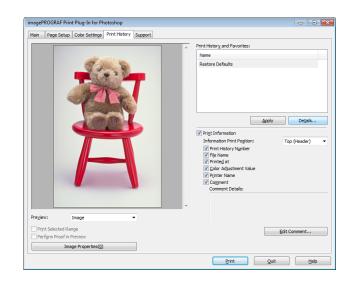

You can confirm the print history details.

Windows Software

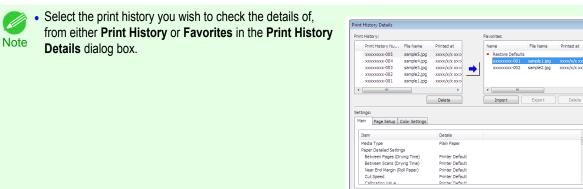

Print Plug-In for Photoshop / Digital Photo Professional

Display Print History sheet.

OK Cancel Help

## 2 Click the **Details** button.

3

Check the print history details in  $\ensuremath{\textbf{Settings}}$  , and click the  $\ensuremath{\textbf{OK}}$  button.

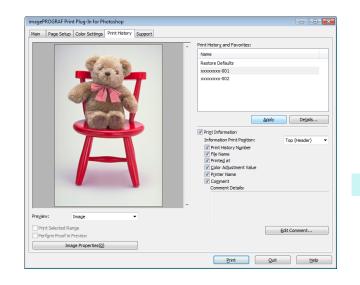

• You can display the print history details by switching the sheets.

## Apply Print History to an Image

You can use previous print history, and apply it to an image.

Display the **Print History** sheet.

- If required, check the print history details. (See "Confirm Print History Details.") —P.300
- Select the print history you wish to apply from **Print History and Favorites**, and click the **Apply** button.

## **Store Print History to Print Preferences**

You can store often-used print history to print preferences. Not only can you store the print history stored under a different name in print preferences, you can also find it with ease.

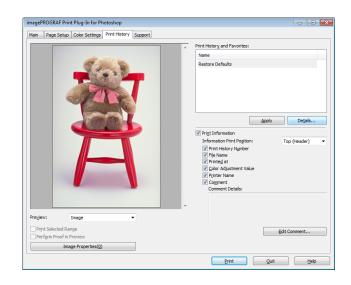

You can store up to 200 print history items to print preferences.

2

3

Display the **Print History** sheet.

Click the **Details** button.

301

Windows Software

3 Select the print history you wish to store in print preferences from **Print History** in the **Print History Details** dialog box, and check the print history details in **Settings**.

### Set Information to Print with Image

You can print information with an image that is related, such as the file name and the time and date.

• When you use the borderless printing function to print, the information will not be printed. (See "Print with No Borders.") →P.298 Note

- When the printed information is too long as does not fit on the media, a break will appear in the printed information.
- The information may print on the image data with some media sizes, enlargement rates and print position values.
- When Keep Media Size is set to On on the printer, a portion of bottom of the print data is not printed.

Display the Print History sheet.

- 2 Click the Print Information check box on.
- 3 Select the position where you wish to print the information in Information Print Position.
- 4 Click the information check box you wish to print on.

## 5 When you wish to edit the comment, click the **Edit Comment** button.

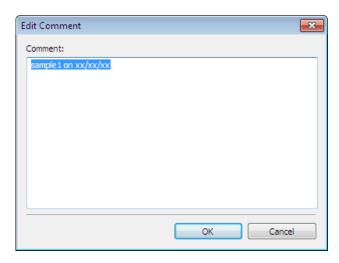

• When you do not wish to edit the comment, move to step 7.

6

Input the comment in the **Edit Comment** dialog box, and click **OK** button.

Click the **Print** button.

Comments are printed with images.

## Layout Plug-In for Photoshop

About the Layout Plug-In	311
Layout Plug-In Main Window	
Add Canvas Size dialog box	
Creating and Printing a Layout Image for Mounting on a Frame	

## About the Layout Plug-In

When printing a photo to mount on a frame, you can start the Layout Plug-In from Photoshop and create a layout image where the image extends to the sides of the frame.

The Layout Plug-In can be used with Photoshop CS5, Photoshop CS4, and Photoshop CS3.

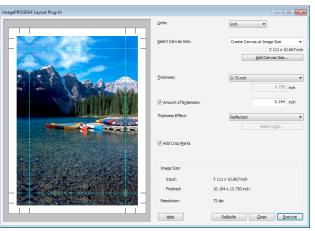

Note • Layout images created in the Layout Plug-In can be printed as-is from the Print Plug-In for Photoshop.

For details on the functionality of the Layout Plug-In, see "Layout Plug-In Main Window."  $\rightarrow$  P.311 For details on how to start and how to use the Layout Plug-In, see "Creating and Printing a Layout Image for Mounting on a Frame."  $\rightarrow$  P.314

## Layout Plug-In Main Window

This window is for creating a layout image for finishing an image extended around the sides of the frame when printing a photo for mounting on a frame.

You can check the details of the settings in the preview area on the left side of the Layout Plug-In Main Window.

#### Units

You can select the units from mm, inches, and pixels.

 Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

#### Select Canvas Size

Selects the canvas size. If **Create the Canvas at the Image Size** is selected, the image size is treated as the canvas size. It is recommended that you provide a canvas that matches the image size.

#### Add Canvas Size button

Click this button to display the **Add Canvas Size** dialog box and register a **Custom Canvas Size**. (See "Add Canvas Size dialog box.") →P.313

#### Thickness

Windows Software

Layout Plug-In for Photoshop

Specifies the thickness of the canvas (the width of the canvas sides). Although you can select from 0.75 inches (approx. 19 mm) and 1.5 inches (approx. 38 mm), you can also specify any arbitrary thickness.

 Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

#### Amount of Extension

Selecting this check box allows you to configure the amount of extension that protrudes past the canvas sides. This allows you to prevent white paper from appearing on the canvas sides when mounted. The larger the amount of extension, the larger the area hidden behind the back surface.

Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

#### Thickness Effect

You can select from the following canvas effects.

Image

Wraps the image to the canvas sides.

Soft Image

Performs Gaussian filtering on the image on the canvas sides.

Reflection

Reflects the image on the canvas sides.

Soft Reflection

Reflects the image on the canvas sides and performs Gaussian filtering.

White

Makes the canvas sides white.

Black

Makes the canvas sides black.

Custom Color

Makes the canvas sizes the specified color. The color is specified by clicking the Select Color button.

#### Add Crop Marks

When this check box is selected, crop marks are printed at the outer edges of the image as guides to the positions to fold the paper when mounting on a canvas.

#### Display Information

Displays the following information.

Input

Displays the original image size before creating the layout image.

#### Finished

Displays the image size of the entire layout image with the canvas sides, crop marks, and the amount of extension added to the input image size.

#### Resolution

Displays the resolution of the image. This is not changed from the resolution of the original image. If the image size is changed in the Layout Plug-In, the resolution is maintained the same as the original image, and resampling is performed using the Bicubic method.

If you do not want the number of pixels in the image to change (resample), select **Create the Canvas at the Image Size** in **Select Canvas Size** and select an option other than **Image** and **Soft Image** in **Thickness Effect**.

#### • Defaults button

Click this button to reset the setting values.

#### Close button

When this button is clicked, the Layout Plug-In exits and the current setting values are saved. When the Layout Plug-In is started the next time, the setting values from the previous time are used.

#### Execute button

When this button is clicked, the Print Plug-In for Photoshop starts. To print the created layout image, click the **Print** button in the Print Plug-In for Photoshop main window.

• When you close the Print Plug-In, the created layout image is discarded.

Importar

Note

• If the Print Plug-In for Photoshop for multiple different models is installed, a screen for selecting the model is displayed when you click the **Execute** button.

- When you close Print Plug-In for Photoshop main window after printing, the Layout Plug-In main window is displayed again.
- If the size of the layout image is larger than the paper size that can be printed by the printer, you should reduce the size of the layout image to the output paper size in advance before printing.

## Add Canvas Size dialog box

This dialog box is displayed when you click the **Add Canvas Size** button in the Layout Plug-In main window. It allows you to register and delete arbitrary canvas sizes (custom canvas sizes).

aper Size <u>L</u> ist:			Custom Canva	s Size Name	
Name	Size	*	Input Image S	Size	
Input Image Size	7.111 x 10.667		Units		
• 8" x 10"	8.000 x 10.000		0	<u>m</u> m	
9" x 12"	9.000 x 12.000	Ξ	0	inch	
11" x 14"	11.000 x 14.000				
16" x 20"	16.000 x 20.000		Size		
20" x 24"	20.000 x 24.000		Width:	7,111	(3.937 - 50.000)
20" x 30"	20.000 x 30.000				,
24" x 36"	24.000 x 36.000		Height:	10.667	(3.937 - 100.000)
30" x 40"	30.000 x 40.000	-			
<		F	Create the	image with a <u>f</u> ix	ed aspect ratio
Delete					Add
Delete					- Au

Click the Close button to close the Add Canvas Size dialog box.

#### Adding a Canvas Size

313

Specify the units for the width and height of the canvas size you are adding in Units.

Layout Plug-In for Photoshop

2 Enter the width and height of the canvas size you are adding in **Size**.

When you select a size displayed in the **Paper Size List**, the values are displayed in the **Width** and **Height** in the **Size** field. When **Input Image Size** is selected, the size of the input image is used as-is for the width and height of the canvas.

Selecting the **Create the Image with a Fixed Aspect Ratio** check box allows you to create a custom size at the same aspect ratio as the input image. For example, if you change the width, then the height also changes according to the aspect ratio of the input image.

#### Deleting a Canvas Size

Note

• Sizes that have a red circle in the Name cannot be deleted.

## Creating and Printing a Layout Image for Mounting on a Frame

The procedure for creating and printing a layout image for mounting on a frame is as follows.

- 1 Start Photoshop.
- 2 Open the image to lay out and edit the image in Photoshop as needed.
- 3 Select **imagePROGRAF Layout Plug-In** from **Automate** in the Photoshop **File** menu. Run the Layout Plug-In to display the Layout Plug-In Main Window.

imagePROGRAF Layout Plug-In		
	<u>U</u> nits:	inch •
	Select Canvas Size:	Create Canvas at Image Size - 7.111 x 10.667 inch Add Canvas Size
	Indoness:	0.75 inch •
	Amount of Extension:	0.194 inch
	Thickness Effect:	Reflection
	V Add Crop Marks	Select Cglor
and a second second second	Image Size:	
R. R. 18 - 1 - 22 - 17 - 22	Input:	7.111 x 10.667 inch
Start Track Start	Finished:	10.194 x 13.750 inch
	Resolution:	72 dpi
	Help	Defaults Qose Execute

 The Layout Plug-In can handle images with a width and height of less than 60,000 pixels. For images with a width or height of 60,000 pixels or more, either reduce the selection range or reduce the image through image processing before performing step 3.

314

User's Guide

4 Select the canvas size that matches the frame for mounting the image and create a layout image by adding effects such as frame side effects.

For details, see "Layout Plug-In Main Window." →P.311

The created layout image cannot be modified in Photoshop.

Important

5 Once you have finished creating the layout image, run the Print Plug-In for Photoshop and print on paper that is larger than the size of the layout image.

• When you click the **Close** button to close the Layout Plug-In, the created layout image is discarded.

- 6 Mount the printed layout image on the frame.
  - - Fully dry the printed paper before mounting it on the frame.
  - Important Take care when mounting on the frame. The ink may peel off if you touch the printed surface.

As you fold the printed paper along the frame, the folded areas may crack and reveal the paper underneath, depending on the media type. You can prevent the folded areas from splitting to some degree by using commercially available inkjet protection spray or liquid laminating agent for inkjets before folding.

## **Print Plug-In for Office features**

Print Plug-In for Office is a Plug-In that enables easy printing from Microsoft Office.

- It is displayed on the toolbar/ribbon, so it is easily accessible.
- It can be set by just selecting from the Wizard.
- Large-Format Printing custom size can also be set in the Wizard from Microsoft Word or Microsoft Power-Point.
- Custom size can be set automatically from Microsoft Excel.
- The layout can be checked before printing by starting the preview screen.

• 64 bit edition Windows OS operates only on WOW64 (32 bit emulator).

• The Print Plug-In for Office toolbar/ribbon might not be displayed in Microsoft Office after installing imagePROGRAF Print Plug-In for Office. For details, refer to When Print Plug-In for Office is not displayed -P.320.

- If you opened the Office document from Internet Explorer, the software will not run correctly.
- If you are editing an embedded object or link object, the software will not run correctly.
- If you added the imagePROGRAF Print Plug-In ribbon to the Microsoft Office 2007/2010 Quick Access toolbar, the software will not run correctly.

## Steps to install

Below are the steps to install Print Plug-In for Office.

You must log into Windows as an Administrator before the installation.

3

Insert "User Software CD-ROM" into the CD-ROM drive and start the installer.

• If the installer screen does not display, open the CD-ROM icon from **My Computer**, click **setup.exe**, and open the icon.

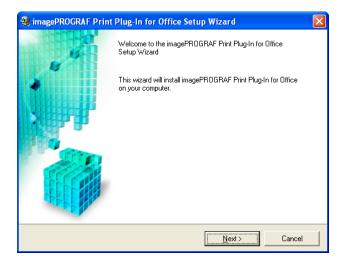

2 Click the

Click Install in imagePROGRAF Print Plug-In for Office.

• You cannot uninstall **Print Plug-In for Office** if an Office application is running. When a message appears, select **Cancel** and close all Office applications that are running.

## When Print Plug-In for Office is not displayed

Buttons such as **Start imagePROGRAF Print Plug-In** sometimes do not appear in the **Word**, **PowerPoint** and **Excel** Office applications, and the **Print Plug-In for Office** functions are not available.

In this event, re-install Print Plug-In for Office.

If you are using **Microsoft Office 2003** or later, you can also enable add-ins to display **Print Plug-In for Office**. See below for the procedure for re-installing the plug-in or enabling add-ins.

#### Re-installing Print Plug-In for Office

If a problem occurs, such as the system or an application terminating abnormally, the **Microsoft Office** application disables add-ins as a safety precaution.

In this event, you will need to re-install **Print Plug-In for Office** to display the **imagePROGRAF Print Plug-In** toolbar/ ribbon.

You cannot re-install **Print Plug-In for Office** once an Office application is running. When the message appears, select **Can-cel** and close the active Office application.

#### Re-install Print Plug-In for Office as follows:

2

320

Close **Microsoft Office** if it is open.

#### Install Print Plug-In for Office.

For information about instsalling, see "Steps to install." (-P.317)

#### Enabling Print Plug-In for Office for items disabled in Office applications

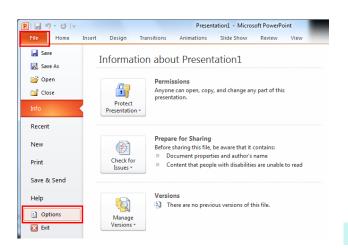

If a problem occurs, such as the system or an application terminating abnormally, the **Microsoft Office** application disables add-ins as a safety precaution.

In this event, you will need to restore the disabled add-ins in order to display the **imagePROGRAF Print Plug-In** toolbar/ribbon.

Use the procedure below to restore the add-ins disabled by Microsoft Office.

#### • For Microsoft Office 2010

#### Select **Options** from the **File** menu.

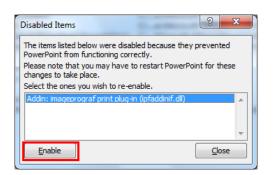

2 From the list on the left side of the **<application name> options** dialog box, select **Add-ins**.

3 Select **Disabled Items** in the **Manage** combo box and click the **Go** button.

	in is starting up.	

Item	Details
Center sheets and print areas	When this setting is off, printing is performed without changing the position. When this setting is on, printing is performed with the top, bottom, left, and right margins layed out equally. When this setting is off, printing is performed without changing the position. This function is only valid in <b>Microsoft Excel</b> .
Ensure image quality when creating page sizes	When this setting is on, documents are created at the maximum size. This re- duces the enlargement ratio during actual printing, which minimizes degradation of the quality of photos, etc. This function is only valid in [ <b>Microsoft PowerPoint</b> .
Correct the print area when analyzing	For data that cannot be processed with usual data analysis, the print area is corrected and then the data is processed. When data analysis fails, you may be able to print by turning on this checkbox. This function is only valid in <b>Microsoft Excel</b> .

For information on the Mac OS X printer driver settings, refer to the following topics.

• Main Pane →P.364

358

#### User's Guide

You can specify the media type, color processing, print quality, print preview, and other settings. Choose **Easy Settings** to specify basic print settings based on the printing application or **Advanced Settings** to complete more detailed settings as desired.

- Paper Detailed Settings Dialog Box →P.368
- View settings Dialog Box for the Printing Application →P.370
- Color Settings Pane: Color →P.373
- Object Adjustment dialog box: Color →P.374
- Matching pane →P.370
- Color Settings Pane: Monochrome →P.375
- Gray Adjustment Pane →P.376
- Page Setup Pane →P.378 You can specify the page size of the original, borderless printing, enlargement or reduction, the orientation, the paper size and source, and automatic cutting.
- Utility Pane →P.379
  You can specify settings related to maintenance for the Printhead and feed amount, as well as settings for Color
  imageRUNNER Enlargement Copy.
- Additional Settings Pane →P.380
   You can specify settings for how print jobs are sent to the printer.
- Support Pane →P.380
   You can view support information and the user's manual.

With the **imagePROGRAF Free Layout** feature, you can arrange originals from various source applications on a single page before printing. For details, see Free Layout  $\rightarrow P.410$ .

With the **imagePROGRAF Preview** feature, you can check the layout before printing and adjust layout or size settings while viewing a preview screen. For details, see Preview  $\rightarrow$  P.382.

With the **Color imageRUNNER Enlargement Copy** feature, you can automatically enlarge and print scanned originals from a **Color imageRUNNER**. For details, see Color imageRUNNER Enlargement Copy  $\rightarrow$  P.441.

Specify	Specifying Paper in the Printer Driver			
If you have replaced the paper, you must complete the following settings in the printer driver.				
1 Thi	s sets the <b>B Format for</b> and <b>C Paper Size</b> .			
	<ul> <li>The configuration method varies depending on the OS and application software you are using.</li> <li>If Page Setup is displayed in the application menu, the settings are configured by opening the Page Attributes dialog box from Page Setup.</li> </ul>	A Settings: Page Attributes   B Format For: IPFxxxx   C Paper Size: ISO A4   210 by 297 mm   D Orientation:   Image: Constant C		
	If it is not displayed, the settings are configured in the upper part of the printer driver displayed when you select <b>Print</b> from the application software menu.	A Printer: iPFxxxx Presets: Default Settings C Copies: 1 Pages: All F Paper Size: ISO A4 C Orientation: 1 Scale: 100 %		

- 2 Select the printer in the **A Printer** list.
- 3 Choose the original size in the **F** Paper Size list.
- 4 If you configured the settings using the Page Attributes dialog box, click FOK to close the dialog box, and then select **Print** from the application software menu.
- 5 Access the Main pane.

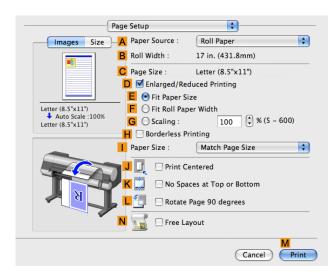

H Main		
Images Size A	Media Type :	Plain Paper 🔷

		G View set.
O	Print Preview	L Printer Information
		Cancel Print

**6** In the **A Media Type** list, select the type of paper that is loaded.

7

9

#### Access the Page Setup pane.

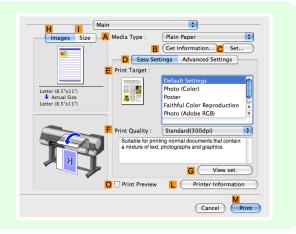

8 In the **A Paper Source** list, select how paper is supplied.

If you have selected **Cut Sheet** in **A Paper Source**, make sure the size as selected in **Page Setup** is displayed in **C Page Size**. If you have selected roll paper in **A Paper Source**, make sure the width of the loaded roll is displayed in **B Roll Width**.

If the width of the roll loaded in the printer is not shown in
 B Roll Width, click L Printer Information on the Main pane to update the printer information.

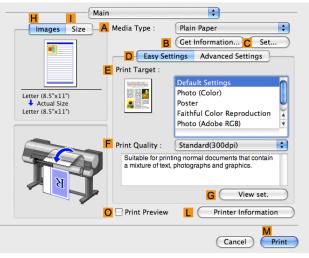

A variety of settings are available in the printer driver to suit different printing applications. For details on available printing conditions, see "Printer Driver Settings —P.358"

### **Confirming Print Settings**

There are two ways to confirm what printing conditions have been specified, as follows.

#### Checking a preview of the settings

A preview of the settings is displayed on the left side of the **Main**, **Page Setup**, **Utility**, and **Additional Settings** panes.By checking images and numerical values in the preview, you can confirm current settings for the page size, orientation, paper source, and so on.

Display Area	Information Displayed
Pane displayed when the <b>H Images</b> tab is clicked	On top, illustrations indicate the page size of the original, the paper size, orientation, layout, bor- derless printing selection, color mode, and other settings information. Under this, the page size, paper size, and method and percentage of enlargement or reduction is displayed.
Pane displayed when the Size tab is clicked	Paper size details are indicated numerically.
Pane with printer and paper illustrations	Illustrations indicate the paper source, orientation, borderless printing selection, and other set- tings information.

To confirm the Print Target specified in Easy Settings, click G View set. on the Main pane to display the View settings dialog box.

#### Checking a print preview

You can check an image of the original just as it will be printed. Confirming the image of print jobs beforehand helps prevent printing errors. For details on print previews, see "Checking the Layout in a Preview Before Printing →P.158)"

### Checking the Layout in a Preview Before Printing

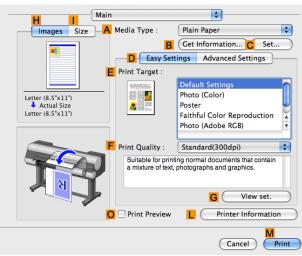

This topic describes how to check the layout before printing using the Canon imagePROGRAF Preview function.

Choose **Print** in the application menu.

Access the Main pane.

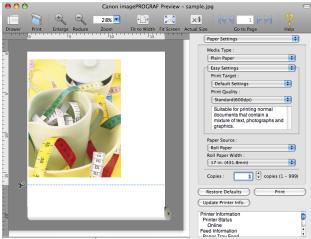

- Print
- Mac OS X Software Printer Driver

3 Select the **OPrint Preview** check box.

### 4 Click **M Print**.

5 The **Canon imagePROGRAF Preview** window is displayed.

Input Size 11.69 x 16.54 in. Output Size 17.00 x 16.54 in.

Check the layout and adjust settings in the Canon imagePROGRAF Preview window as desired.

Print from the Canon imagePROGRAF Preview menu.

• For details on imagePROGRAF Preview functions, refer to Preview -P.382 .

### **Using Favorites**

You can use the Presets function in Mac OS X for favorite-based printing.

Note

6

7

• In the printing dialog box, click **Save As** in the **Presets** list to save the current print settings. This is a standard feature of the operating system. For details, refer to the Mac OS documentation.

### Accessing the Printer Driver Dialog Box from Applications

In the application software, select **Print** from the **File** menu to display the dialog box for printing conditions.

2

 This dialog box includes basic printing options and enables you to choose the printer, specify the range of pages, number of copies, and so on.

#### Select the printer in the **Printer** list.

Printer	iPFxxxx ‡
Presets:	Default Settings 🗧 🗧
Copies:	1
Pages:	• All
	From: 1 to: 1

### Main Pane

The following settings are available on the Main pane. For details on settings items, refer to the printer driver help.

• On the Main pane, choose Easy Settings to specify basic print settings based on the print target, or switch to Advanced Settings to complete more detailed settings as desired.

### Common Items

#### • A Media Type

Select the paper type.

For information on the types of paper the printer supports, refer to the Paper Reference Guide. (See " Paper Reference Guide".)

#### B Get Information

Displays Paper Information on Printer. You can update the printer driver settings for the feed source, media type, and roll width by selecting the feed source.

Paper Information on Printer Dialog Box →P.367

#### • C Set

Displays Paper Detailed Settings. You can configure the printing settings to match the type of media, such as the ink drying time.

- Paper Detailed Settings Dialog Box →P.368
- O Print Preview

If you turn this on, imagePROGRAF Preview starts before printing. This allows you to check on-screen previews of documents before printing.

When Free Layout is selected on the Page Setup panel, Free Layout is disabled.

- Important
- Checking the Layout in a Preview Before Printing →P.158

#### Printer Information

Displays the **Printer Information** dialog box, which shows printer information such as ink levels and the calibration history.

Each of the **B** Get Information, **C** Set, and **L** Printer Information buttons may not be usable depending on the application type and OS version.

### Configuration using Easy Settings

Printer Driver

	Marchae Warrawa	Di-la Danas

		M

Main

#### • EPrint Target

Choose presets that match the type of document to be printed.

- Printing Photos and Images →P.37
- Printing Office Documents →P.48

#### • F Print Quality

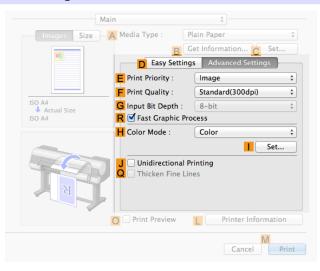

Choose the level of print quality.

#### • G View set.

Click to display the **View settings** dialog box, which enables you to confirm the settings for the selected item from the **E Print Target** list or change the order of items listed in **E Print Target**.

• View settings Dialog Box for the Printing Application →P.370

### Configuration using Advanced Settings

### • E Print Priority

366

Choose the graphic elements that you want to emphasize for printing.

• Giving Priority to Particular Graphic Elements and Colors for Printing →P.61

#### • F Print Quality

Choose the level of print quality.

• Giving Priority to Particular Graphic Elements and Colors for Printing →P.61

#### • G Input Bit Depth

Choose the levels of gradation in print data, either **8-bit** or **16-bit**. Optimal results when printing data with rich gradation are possible by choosing **16-bit**. For example, this option is particularly suited to printing images created after specifying 16 bits per channel in Photoshop.

#### • **R** Fast Graphic Process

Select this option to print faster than usual, when possible.

#### • H Color Mode

Choose the color mode.

Giving Priority to Particular Graphic Elements and Colors for Printing →P.61

#### • Set

Click to display the Color Settings dialog box for more advanced color settings.

• Adjusting the Color in the Printer Driver →P.54

#### • J Unidirectional Printing

Select this checkbox to prevent problems such as misaligned lines and improve the print quality. However, the printing speed becomes slower.

#### • **Q** Thicken Fine Lines

Activate this option to print fine lines more distinctly.

### **Paper Information on Printer Dialog Box**

On the **Paper Information on Printer** dialog box, you can obtain information on the paper in the printer and configure printer driver media type setting.

per Source	
per Source	
Der Source Cut Sheet Media Type :	Plain Paper
Cut Sheet	Plain Paper

• To display the **Paper Information on Printer** dialog box, on the **Main** pane, click **Get Information** by **Media Type**.(See "Main Pane P364")

#### • A Paper Source

Shows the **Paper Source** supported by the printer, as well as the type of paper loaded. To update the media type setting in the printer driver, select the desired **Paper Source** option and click **OK**.

### Paper Detailed Settings Dialog Box

The **Paper Detailed Settings** dialog box offers the following settings. For details on settings items, refer to the printer driver help.

ledia Type :	Plain Paper	
Drying Time		
Between Pages :	Printer Default	÷
Between Scans :	Printer Default	÷
Roll Paper Margin for Safety		
Near End Margin :	Printer Default	¢
Cut Speed :	Printer Default	¢
Automatic Cutting :	Printer Default	÷
Calibration Value :	Printer Default	¢
Mirror		
Extend print pass		

• To display the **Paper Detailed Settings** dialog box, on the **Main** pane, click **Set** by **Media Type**.(See "Main Pane —P.364")

### A Media Type

Note

The paper selected with **Media Type** of the **Main** panel is displayed.

For information on the types of paper the printer supports, refer to the Paper Reference Guide. (See " Paper Reference Guide".)

### B Drying Time

Specify the time that the printer waits for ink to dry, as needed. The Drying Time setting is only valid for rolls.

#### • C Between Pages

You can set the time to wait after printing 1 document page until ejecting the paper. Since waiting time is required for ink to dry before a roll is cut, you can deliver paper in the Output Stacker with the ink dried even if **Cutting Mode** is set to **Automatic**.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
None	Paper is ejected immediately after printing completes.
30 sec. / 1 min. / 3 min. / 5 min. / 10 min. / 30 min. / 60 min.	Paper is ejected when the set time elapses after printing completes.

#### D Between Scans

You can set the time to wait after printing 1 line on a page until printing the next line. Set this to avoid bleeding or color unevenness such as when bleeding occurs on a page or when color unevenness occurs during borderless printing.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
None	The next line is printed immediately after a line is printed.

Setting Item	Details
1 sec. / 3 sec. / 5 sec. / 7 sec. / 9 sec.	The next line is printed when the set time elapses after a line is printed.
	* Increase the time according to the occurrence condition of bleeding or unevenness.

### **E** Roll Paper Margin for Safety

You can specify the length of a margin on the leading edge of paper to ensure that paper susceptible to curling is held firmly against the Platen.

### • F Near End Margin

Specify the length of the Near End Margin (the leading edge margin) of the roll, as needed.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
5 mm (0.2 in)	The document is printed in the standard size.
	* Select this when you do not have any problems in printing.
20 mm (0.8 in)	Select this when rubbing against the printhead occurs such as when using paper that tends to curl.

### G Cut Speed

Select the speed of automatic cutting, as needed. You can adjust this setting if paper is not cut well when automatic cutting is used.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
High Speed	When the Standard setting does not result in a clean cut surface, select this.
Standard	Select this when you do not have any problems in automatic cutting.
Low Speed	This helps prevent adhesive from sticking to the cutter and keeps the cutter sharp if you select it when using adhesive paper.

### H Automatic Cutting

Set whether to perform roll cutting automatically or print a cut line. The following settings are available for automatic cutting.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
None	After printing completes, the roll is not cut per page, and the next page of data is printed successively.
Print Cut Guideline	After printing completes, a line is printed per page, and the next page of data is printed successively.

### Calibration Value

You can specify whether to apply the results of calibration performed on the printer to image processing.

Setting Item	Details
Printer Default	The setting of the control panel of the printer is applied.
Enabled	Print using the calibration results.
Disabled	Print without using the calibration results. Select this to avoid the changing of the color of images during printing by color calibration.

### J Mirror

Specify whether to print a mirror image, as needed. Select this option to print a version of the document or image with the left and right sides inverted.

#### K Extend print pass

Uneven printing that occurs when printing with **Highest** selected in **Print Quality** may be improved in some cases by selecting this check box. However, this also reduces the printing speed.

### View settings Dialog Box for the Printing Application

In the **View settings** dialog box, you can check details of the selected printing application.

Print Target :	B	Default Settings	
Default Settings Photo (Color) Photo (Monochrome) Poster Faithful Color Reproduct	c c	Details :	
Photo (Adobe RGB) Office Document	-	Parameter	Settings
Office Document		Print Priority	Image
		Print Quality	Standard(300dpi)
		Color Mode	Color
		Thicken Fine Lilnes	Off
		Color Adjustment : Br	0
		Color Adjustment : C	0
		Color Adjustment : Sa	0
		Object Adjustment	All
		Matching Method	Perceptual
	15	Color Space	sRGB

 To display the View settings dialog box, on the Main pane, click View settings by Print Target. (See "Main Pane -P.364") Note

#### • A Print Target

Shows all **Print Target** options (settings items for the printing application).

#### B Name

Identifies the item selected in **Print Target** by its name and an icon.

• C Details

Here, you can confirm detailed settings values for each item selected in the Print Target list.

### Matching pane

On the Matching pane, you can specify color matching to compensate for differences in the appearance of colors on various devices.

The Matching pane is not displayed when No color correction or Monochrome is selected in Color Mode.

370

 To display the Matching pane, on the Main pane click Color Settings by Color Mode in Advanced Settings, and then click the **Matching** tab. (See "Main Pane.")  $\rightarrow$  P.364)

### **Driver Matching Mode**

The following options are available when you select Driver Matching Mode in the A Matching Mode list.

olor Settings		
	Color Adjustment Matching	
Matching Mode :	Driver Matching Mode ICC Matching Mode	
Matching Method :	Monitor Matching	÷
Color Space :	sRGB	¢
Monitor White Point :	6500K	÷
Gamma :	2.2	;

#### A Matching Mode

Select the color matching mode to use, as desired.

Normally, select Driver Matching Mode. For color matching based on ICC profiles, select ICC Matching Mode depending on your color matching system.

#### • B Matching Method

Select the color matching method that suits the document to be printed. Various **B** Matching Method options are available depending on your selection in **A Matching Mode**.

#### • C Color Space

Select the applicable color space as desired.

#### • D Monitor White Point

Enter the color temperature set on the monitor. Displayed when the **B** Matching Method is set to Monitor Matching.

#### • E Gamma

You can adjust the gradation of intermediate tones in an image. 2.2 is normally selected. If you want a softer impression than 2.2, select 1.8. Printer Driver

### **ICC Matching Mode**

The following options are available when you select **ICC Matching Mode**, in the **A Matching Mode** list.

Calas Sattings	
Color Settings	
	Color Adjustment Matching
A Matching Mode :	Driver Matching Mode (Kyuanos) ICC Matching Mode
B Input Profile Settings :	sRGB v3.0 (Canon)
C Matching Method :	Perceptual \$
D Printer Profile Settings :	sRGB v3.0 (Canon)
Revert	Cancel OK

• To display the Matching pane, on the Main pane, click Color Settings by Color Mode in Advanced Settings, and then click the Matching tab. (See "Main Pane —P.364")

#### • A Matching Mode

Select the color matching mode to use, as desired.

#### • B Input Profile Settings

You can choose Input Profile.

Various options are available depending on your selected **A Matching Mode**.

#### • C Matching Method

Note

You can choose **C** Matching Method.

Various options are available depending on your selected **A Matching Mode**.

#### • D Printer Profile Settings

Specify the printer profile as desired.

We recommend that you select an ICC profile created using commercially available profile creation software in order to perform color management accurately on paper other than genuine Canon paper and feed confirmed paper. The created ICC profile needs to be saved in the following folder on the computer you are using. /user/(user name)/library/ColorSync/Profiles folder

• For details on settings items, see "Adjusting the Color in the Printer Driver." —P.54

### **Color Settings Pane: Color**

In general, make any needed adjustments to the color of documents in the application used to create them. However, if the color tone as printed is not as you expected, you can also adjust the color in the printer driver. If the color tone as printed is not as you expected, you can adjust it on the **Color Adjustment** pane.

Color Settings			
	Color Adjustment	Matching	
С	olor Balance		
D	Cyan :	Low	High
	0 🗘 (-30 - 30)	<b>—</b>

• To display the Color Adjustment pane, on the Main pane click Color Settings by Color Mode in Advanced Settings.(See "Main Pane -P.364")

• For details on settings items, see "Adjusting the Color in the Printer Driver -P.54"

#### • A Sample Type

Choose a sample image from Standard, Portrait, Landscape, or Graphics.

• **B** View Color Pattern

Select this checkbox to display the color pattern.

C Apply to Sample

Select this checkbox to apply the changed settings to the sample image.

#### • D Cyan / E Magenta / F Yellow

Correct color tones by adjusting the levels of each color.

G Gray Tone

Adjust the color tone of grays as desired. Choose Cool (tinged with blue) or Warm (tinged with red).

• H Brightness

Adjust the overall image brightness as desired. You can adjust the brightness if the printed document is lighter or darker than the original image (that is, the original photo that was scanned or the original graphic as it appears on the computer screen).

#### Contrast

Adjust the contrast of the darkest and lightest portions relative to each other, as desired. Increasing the **Contrast** makes images sharper, and reducing the **Contrast** softens images.

#### • J Saturation

Adjust the color intensity as desired. Increasing the **Saturation** setting makes colors more vivid, and reducing the **Saturation** makes colors more subdued.

#### • KObject Adjustment

Select this option to display the **Object Adjustment** dialog box, in which you can specify objects subject to color adjustment.

Object Adjustment dialog box: Color →P.374

### **Object Adjustment dialog box: Color**

In the **Object Adjustment** dialog box, you can specify what type of print jobs to apply color adjustment to. If an original comprises images, graphics, and text, you can specify which portion to apply color adjustment to.

To display the Object Adjustment dialog box, click Object Adjustment on the Color Adjustment panel.
 Note

#### • A Images

Select this option to apply color adjustment to image areas, such as photos.

#### • B Graphics

Select this option to apply color adjustment to graphics, such as lines and circles.

#### • C Text

Select this option to apply color adjustment to text.

### **Color Settings Pane: Monochrome**

On the Color Adjustment pane for monochrome printing, you can adjust the brightness and contrast.

Color Settings			
	Color Adjust	tment

B Graphics
Revert Cancel OK

Mac OS X Software

Printer Driver

 To display the Object Adjustment dialog box, click Object Adjustment on the Color Adjustment panel. Note

#### A Images

Select this option to apply color adjustment to image areas, such as photos.

• B Graphics

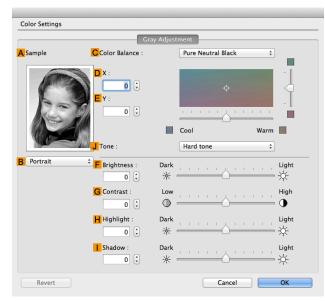

Select this option to apply color adjustment to graphics, such as lines and circles.

• C Text

Select this option to apply color adjustment to text.

### **Gray Adjustment Pane**

On the Gray Adjustment pane, you can adjust the color balance, brightness, contrast, and other image qualities.

• To display the Gray Adjustment pane, on the Main Pane —P.364, select Monochrome (Photo) by Color Mode in Advanced Settings, and then click Color Settings.

• Monochrome (Photo) is not available for all types of paper.

#### • A Sample

The image at left is updated to reflect any changes you make to setting items on the sheet, enabling you to check the results of adjustment.

#### • B Sample List

Select a sample image, as desired.

#### Color Balance

Click the list to select a color balance that suits the printing application.

### • **D**X / **E**Y

Adjust the color balance as you check the color tone in the adjustment area.

You can adjust the square area in the center by clicking or dragging it.

Drag the vertical or horizontal scroll bars for adjustment, as desired.

You can click the arrows by the DX (horizontal) and EY (vertical) boxes or enter the values directly.

#### • 🤳 Tone

You can adjust the brightness of intermediate tones in an image. Selecting **Hard tone** gives a hard impression with more definition. Selecting **Soft tone** gives a soft impression.

#### F Brightness

Adjust the overall image brightness as desired. You can adjust the brightness if the printed document is lighter or darker than the original image (that is, the original photo that was scanned or the original graphic as it appears on the computer screen).

#### • G Contrast

Adjust the contrast of the darkest and lightest portions relative to each other, as desired. Increasing the **Contrast** makes images sharper, and reducing the **Contrast** softens images.

#### • H Highlight

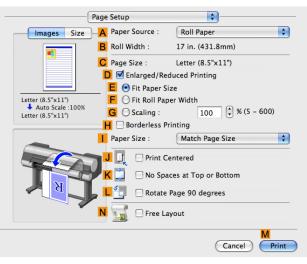

Adjust the brightness of the lightest portion.

Shadow

Adjust the brightness of the darkest portion.

## Page Setup Pane

The following settings are available on the **Page Setup** pane. For details on settings items, refer to the printer driver help.

### • A Paper Source

Choose how paper is supplied.

Options displayed in the list vary depending on the selection in **A Media Type** in the **Main** pane.

#### • B Roll Width

Displays the paper width of the roll loaded in the printer. **Unknown** is displayed if the printer cannot detect the roll paper width.

#### • C Page Size

Displays the size of the original, as specified in the page settings of the application. For details on page sizes available in the application. see "Paper Sizes  $\rightarrow$  P.522"

#### • D Enlarged/Reduced Printing

Select this checkbox to choose the following options.

- Resizing Originals to Match the Paper Size →P.68
- Resizing Originals to Fit the Roll Width →P.72
- Resizing Originals by Entering a Scaling Value →P.78

#### • E Fit Paper Size

Resizes the document image to match the paper size.

#### • F Fit Roll Paper Width

Resizes the document image to match the roll width.

#### • G Scaling

Resizes the document image based on a specified scaling value. Enter a value in a range of 5-600.

#### • H Borderless Printing

Borderless printing is available if roll paper is selected in the **A Paper Source** list. Activate this setting for borderless printing to match the size and width of the paper.

- Borderless Printing on Paper of Equivalent Size →P.95
- Borderless Printing by Resizing Originals to Fit the Roll Width →P.101
  - Borderless Printing at Actual Size →P.89

#### Paper Size

Choose the size of the paper you will print on. Click **Display all selections for Paper Size** to list available sizes. For details on available paper sizes, see "Paper Sizes —P.522"

#### J Print Centered

Select this checkbox to print document images in the center of the paper.

- Printing Originals Centered on Rolls →P.138
- Printing Originals Centered on Sheets →P.143

#### KNo Spaces at Top or Bottom

Select this checkbox to print the next image skipping blank areas above and below printable data in documents, which enables you to conserve the paper.

#### L Rotate Page 90 degrees

Select this checkbox to rotate the document image by 90 degrees before printing.

#### N Free Layout

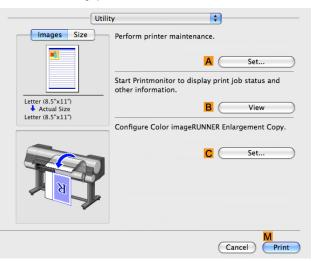

Select this checkbox to start **imagePROGRAF Free Layout** before printing. This allows you to print multiple documents next to each other.

• When Print Preview is selected on the Main panel, Print Preview is disabled.

- Important
- Printing Multiple Originals Next to Each Other →P.121

### **Utility Pane**

The following settings are available on the Utility pane.

#### • A Set

Click to display the **Printer Information** dialog box, which offers the following maintenance for the printer.

- Nozzle (ink ejecting outlet) cleaning
- Head alignment adjustment
- Feed amount adjustment

Mac OS X Software

#### • B View

Click to start **imagePROGRAF Printmonitor**, which enables you to view the status of print jobs.

#### C Set

Click to complete the settings for Color imageRUNNER Enlargement Copy (iR enlargement copy). For details, see Color imageRUNNER Enlargement Copy ( ).

### **Additional Settings Pane**

The following settings are available on the Additional Settings pane.

Ad	ditional Settings 🗧
Images Size	A Data Send Method :
<b>K</b>	Send Print Data Immediately to Printer
	• Send All Print Data as Batch to Printer
ISO A4	B Send job to :
Actual Size ISO A4	• Print
	Save in mail box
Ter se	C  Print after reception is complete
	Cancel Print

#### • A Data Send Method

Display the method of sending print jobs to the printer.

• B Send job to

You can configure the method for saving print jobs to the printer hard disk.

#### • C Print after reception is complete

You can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

### **Support Pane**

On the Support pane, you can view support information and the user's manual.

	Support
A	Support Information
	Accesses the Canon support webpage, where you can find the latest information on the printer and consumables, check for driver updates, and browse other information.
B	User Manual
	Displays the printer user's manual. This function requires the user's manual to be installed on your computer.
	C Settings
	D About
	(Cancel) Print

## **The Features of Preview**

The main features of Preview are as follows.

- While viewing this screen, you can adjust layout settings of a document created with application software.
- You can not only adjust layout settings but also your changes will be instantly applied on the preview screen, and you can print the preview screen as it is seen.

 The media type, image size, detailed media settings, and the printer settings can cause the actual print output to differ from the Preview settings.

### **Starting Preview**

Follow the procedure below to start the Preview.

- **1** Start the apllication software which you use.
- 2 From the application software's **File** menu, select the printer setup menu to open the **Print** dialog box.

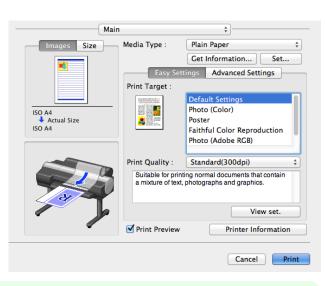

• Normally, select **Print** from the **File** menu.

Note

382 **Click Print Preview** in the **Main** panel to attach a checkmark.

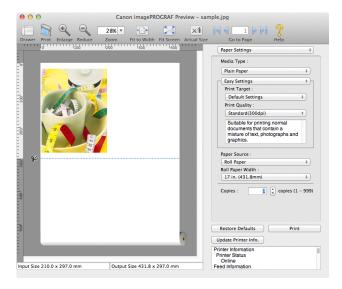

Click the **Print** button in the **Print** dialog box.

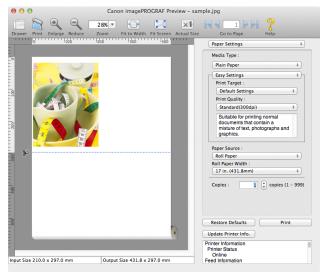

Preview main window is displayed.

Preview

### **Preview Main Window**

The Preview main window consists of the menu and tool bars, and preview, dialog, drawer and status area.

Mac OS X Software

You can use the View menu to show or hide the tool bar.

#### • Menu Bar

Note

This allows you to select menus required for operations.

🐔 imagePROGRAF Advanced Preview File Edit View Object Window Help

#### Tool Bar

This allows you to select tool buttons required for major operations.

### Preview Area

You can check the settings you made in this area.

### Dialog Area

This allows you to set the print conditions and perform a print job.

#### • Media Type

This allows you to select the media type.

 Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

#### Easy Settings / Advanced Settings

Two modes are available to provide the optimum print settings for jobs. The settings available on each mode are as follows.

- Easy Settings →P.389
- Advanced Settings →P.390

#### Paper Source

You can select the paper source.

The following settings are available for paper source.

Setting	Details
Cut Sheet	Select to print on the cut sheet.
Roll Paper	Select to print on roll paper.

#### Roll Paper Width

This selects the width of the roll media set to the printer.

• Available only if rolls are selected in **Paper Source**.

#### Copies

Mac OS X Software

Preview

You can input the number of print copies in numerical characters.

• The maximum value is 999.

• You can change the numbers by clicking either ▲ button or ▼ button.

#### • Restore Defaults Button

Click the button to reset to the setting when starting Preview.

#### Print Button

Click the button to begin printing.

#### • Update Printer Info. Button

Click the button to acquire printer information.

### **Easy Settings**

You can easily select the best settings for the print job by just selecting an item from the print target list that matches the content of the document.

Printer Information Printer Status Online Feed Information

### Print Target

You can easily select the best settings for the print job simply.

If you select each **Print Target** item the corresponding comment for that item is displayed below the list.

Setting	Details
Default Settings	Suitable for printing normal documents that contain a mixture of text, photographs, and graphics.
Photo (Color)	Suitable for printing photographic images captured with a digital camera.
Photo (Monochrome)	Suitable for optimized printing of monochrome photos.
Poster	The best setting for posters. Prints using vivid and high impact colors.
Faithful Color Reproduction	Prints by faithfully reproducing the colors of the original image.
Photo (Adobe RGB)	Achieves the best color when printing an image created with the Adobe RGB color space feature.
Office Document	Suitable for printing handouts as well as general office documents for which print clarity is key.

• The number of settings available for selection depends on the media type.

#### Print Quality

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Draft
Resolution	600dpi / 300dpi

• The availability of settings is determined by the media type and print priority selections.

Note • Printing time is longer and more ink is consumed with High than with Draft, however, print quality is higher.

• Printing time is shorter and less ink is consumed with Draft than with High, however, print quality is lower.

### **Advanced Settings**

Presents detailed settings for the print quality, the color mode, and other items so you can select the values for these settings yourself.

Print Priority

390

Select a print quality mode that is appropriate for the print job.

Setting	Details
Image	This mode achieves the best results for printing photographic images and illustrations.
Line Drawing	This mode is best for printing CAD drawings with fine lines or wall newssheet or other documents that contain large amounts of text. However, you may not achieve the quality you expect with printing photographs or other images with many filled areas. For these types of jobs, select <b>Image</b> .
Proof	This is a setting for enhancing the reproducibility of characters, illustrations, and photos with print proofing. However, this takes more time than regular printing.
Office Document	Prints common office documents, such as proposals, memos for distribution, etc., so they are easy to read.

• The number of settings available for selection depends on the media type.

#### • Print Quality

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Draft
Resolution	600dpi / 300dpi

• The availability of settings is determined by the media type and print priority selections.

Note • Printing time is longer and more ink is consumed with High than with Draft, however, print quality is higher.

• Printing time is shorter and less ink is consumed with **Draft** than with **High**, however, print quality is lower.

### **Output Settings Panel**

This panel appears when you select **Output Settings** in the dialog area.

#### • Enlarged/Reduced Printing

Select the method for enlarged/reduced printing.

The following settings are available for enlarged/reduced printing.

Details
Enlarges/reduces the whole page automatically to fit the media size selected for output. Select the media size to print from <b>Paper Size</b> .
Enlarges/reduces the whole page automatically to fit the width of the roll paper with the page width.
*Make sure that the width of the roll paper in the printer is set correctly for <b>Roll Paper Width</b> in the <b>Paper Settings</b> panel. *Displayed only if rolls are selected in <b>Paper Source</b> .
Enlarges/reduces the whole page by the scaling rate as specified. Input the scaling value in numerical characters. You can specify a range between 5 and 600%.
<ul> <li>*You can change the numbers by clicking either ▲ button or ▼ button.</li> <li>*Although Scaling can be set to make the image larger than the media size, the part that does not fit in the media cannot be printed.</li> <li>*This is not displayed when a checkmark is placed in Borderless Printing.</li> </ul>

#### Borderless Printing

You can print the media without margins on all sides when the roll paper with the specific width and the specific media type is used.

• Available only if rolls are selected in **Paper Source**.

Note • This is not displayed when a checkmark is placed in **Print Centered**.

#### • Paper Size

You can select the size of the print media.

This is not displayed when Fit Roll Paper Width is set in Enlarged/Reduced Printing.

#### Print Centered

You can print on the center of the media loaded in the printer. For more information about **Print Centered**, see "Print on the Center."  $\rightarrow$  P.406

• This is not displayed when a checkmark is placed in Borderless Printing.

#### • No Spaces at Top or Bottom

You can save paper on not to feed roll paper for the empty spaces when the print data contains spaces at the top or bottom.

For more information about No Spaces at Top or Bottom, see "Not Print Spaces at the Top/Bottom." (-P.406)

Available only if rolls are selected in Paper Source.

#### Rotate Page

Select the method for rotating page.

The following settings are available for rotating page.

Setting	Details
Rotate Right 90 Degrees	Rotates the portrait page right 90 degrees and print in landscape orientation. When the rotated page can fit in the width of roll paper, the page is rotated automatically, and when it can not fit in the width of roll paper, the page is not rotated.
Rotate Left 90 Degrees	Rotates the portrait page left 90 degrees and print in landscape orientation. When the rotated page can fit in the width of roll paper, the page is rotated automatically, and when it can not fit in the width of roll paper, the page is not rotated.
Rotate 180 degrees	Allows you to rotate the image 180 degrees from the vertical to the right.

#### Restore Defaults Button

Click the button to reset to the setting when starting Preview.

#### Print Button

Click the button to begin printing.

#### • Update Printer Info. Button

Click the button to acquire printer information.

#### Color Mode

You can select a color mode to suit the print job.

Setting	Details
Color	Enables color printing.
Monochrome (Photo)	Prints monochrome photo image data in a gray scale that is free of color casting (phenomenon of grays that appear tinted).
Monochrome	Disables color printing and converts image from continuous color to grayscaled monochrome.
No color correction	Prints without performing color matching in the printer driver. Select this when color matching is performed by the application such as Adobe Photoshop or when you want to print color charts using the profile creation tool.

• The availability of settings depends on the print priority and media type selections.

### Color Adjustment / Gray Adjustment / Matching

You can set the color adjustment and matching.

Mac OS X Software

Preview

- Color Adjustment →P.395
- Gray Adjustment →P.398
- Matching →P.399

You can select Gray Adjustment only after Monochrome (Photo) has been selected in Color Mode.

Note • Matching is not displayed if No color correction has been selected in Color Mode.

• Restore Defaults Button

Click the button to reset to the setting when starting Preview.

• Print Button

Click the button to begin printing.

#### • Update Printer Info. Button

Click the button to acquire printer information.

### **Color Adjustment**

You can set the color adjustment.

#### Adjusting Color

Normally colors should be adjusted in the software application, but if you see colors in the printout that do not match colors on the screen, you can perform color adjustments.

Select Color on Color Mode in the Color Settings panel.

### 2 Select Color Adjustment.

Color Settings

### • Matching Mode

You can select a matching mode to suit the print job.

Setting	Details
Driver Matching Mode →P.402	Enables printing of optimal color tones using a driver specific color profile. You should normally select this mode.
ICC Matching Mode →P.403	Enables color matching using ICC profiles. Select this if you want to print by specifying the input profile, printer profile, and matching method in detail. This allows you to use ICC profiles for digital cameras and scanners, ICC profiles created using the profile creation tool, etc.
ColorSync →P.404	Enables color matching by using the ColorSync function of Mac OS. Select this if you want to perform soft proofing using ColorSync before printing.

• You need to set each correction on the printer driver.

Note • ColorSync needs to be selected in the Color Matching panel of the driver in order to select ColorSync.

# Matching Method

You can select a matching method to suit the print job.

# Color Space

400

Select the color space.

### Gamma

You can adjust the gradation of intermediate tones in an image. **2.2** is normally selected. If you want a softer impression than **2.2**, select **1.8**.

### Input Profile

Select the input profile.

• You can select only after ICC Matching Mode has been selected in Matching Mode.

### Printer Profile

Select the printer profile.

• You can select only after ICC Matching Mode has been selected in Matching Mode.

### Soft Proof

When you place a checkmark here, ColorSync applies to the preview area.

• You can select only after **ColorSync** has been selected in **Matching Mode**.

2 Click the Matching Method list, and then select a setting.

Setting	Details
Auto	Automatically selects the best color matching method for each Image, Graphics, Text.
Perceptual	Color-matching optimized for printing typical photos attractively. Smooth gradation is a feature. This is also an easy-to-use mode when performing color adjustment using application software.
Saturation	Color-matching optimized for printing posters, etc., vividly.
Colorimetric	Color-matching optimized for printing image data with accurate colors in input color space. This is the easiest-to-use mode when you want to adjust the color and print. However, gradation may be lost for colors of wider range than the color reproduction range of the printer. Generally, this is also called relative colorimetric.
Perceptual (People, Dark Areas)	Color-matching optimized for printing subdued photos such as indoor shots of people or dark scenes. Along with preventing the gradation loss of dark areas, you can realize photos of people in warm tones.

Select Color Space for the print output.

Setting	Details	
sRGB	Uses color space for a standard monitor. This selection is ideal for most software applications.	

1

Setting	Details
Adobe RGB	Uses wide color space. Use this setting to print images created with Adobe RGB color space.

Note

Input the page number in numerical characters to display in the preview area.

You can change the numbers in the range of the page of the documents.

### **Print with No Borders**

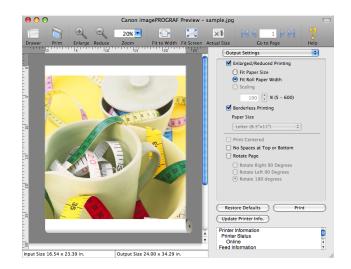

You can use the borderless printing function to print without margins surrounding the image.

- With some media borderless printing can be performed only between two edges.
- Note To use the borderless printing function, the specified media must be set to the printer.

- On the Output Settings Panel  $\rightarrow$  P.392, click the **Enlarged/Reduced Printing** check box on.
- 3 Select Fit Roll Paper Width.

4 Click the **Borderless Printing** check box on.

# 5 Click the **Print** button.

Borderless printing begins.

### **Print on the Center**

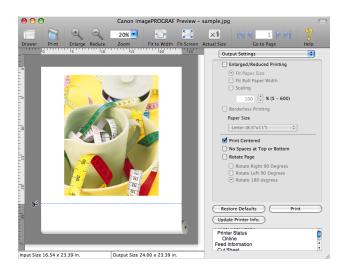

You can print on the center of the media loaded in the printer.

• This is not displayed when a checkmark is placed in Borderless Printing.

1 On the Center

On the Output Settings Panel →P.392 , click the **Print** Centered check box on.

2

406

Click the Print button.

Printing on the center begins.

### Not Print Spaces at the Top/Bottom

You can save paper on not to feed roll paper for the empty spaces when the print data contains spaces at the top or bottom.

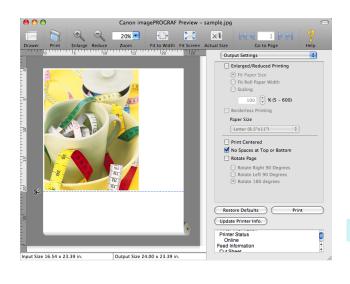

Note

iPF9400

3

1 On the Paper Settings Panel  $\rightarrow$  P.387, select **Roll Paper** in **Paper Source**.

2 On the Output Settings Panel →P.392), click the No Spaces at Top or Bottom check box on.

407

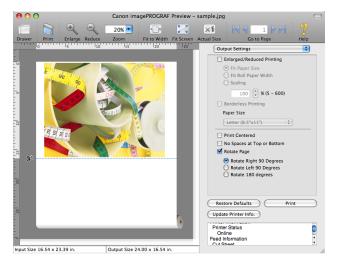

### Click the **Print** button.

Printing on the settings with no spaces at top or bottom begins.

### **Print Page Rotated 90 Degrees**

You can save paper by printing in landscape orientation on roll paper.

- On the Paper Settings Panel  $\rightarrow$  P.387, select **Roll Paper** in **Paper Source**.
- 2 On the Output Settings Panel  $\rightarrow$  P.392, click the **Rotate Page** check box on.
- 3 Select Rotate Right 90 Degrees or Rotate Left 90 Degrees.

4

Click the **Print** button.

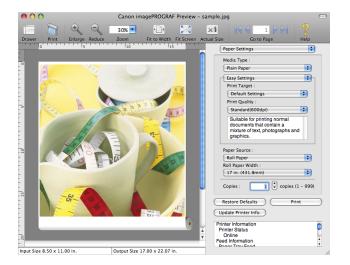

Printing on rotating 90 degrees begins.

# Display with Fitting to the Width of the Paper

In the preview area, you can display to the width of the paper.

ect **I Fit to Width** from the tool bar.

2 Fitting to the width of the paper, it is displayed.

# **Display with All**

Select 🗾

In the preview area, you can display all.

2

### • Media Type

This allows you to select the media type.

 Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

### • Easy Settings / Advanced Settings

Two modes are available to provide the optimum print settings for jobs. The settings available on each mode are as follows.

• Easy Settings →P.417

Advanced Settings →P.418

### • Paper Source

You can select the paper source.

The following settings are available for paper source.

Setting	Details
Cut Sheet	Select to print on the cut sheet.

Setting	Details
Roll Paper	Select to print on roll paper.

### Roll Paper Width

This selects the width of the roll media set to the printer.

• Available only if rolls are selected in **Paper Source**.

# Copies

You can input the number of print copies in numerical characters.

- The maximum value is 999.
- Note You can change the numbers by clicking either ▲ button or ▼ button.

# • Restore Defaults Button

Click the button to reset to the setting when starting Free Layout.

## Print Button

Click the button to begin printing.

### • Update Printer Info. Button

Click the button to acquire printer information.

# **Easy Settings**

You can easily select the best settings for the print job by just selecting an item from the print target list that matches the content of the document.

### • Print Target

You can easily select the best settings for the print job simply.

If you select each **Print Target** item the corresponding comment for that item is displayed below the list.

Setting	Details
Default Settings	Suitable for printing normal documents that contain a mixture of text, photographs, and graphics.
Photo (Color)	Suitable for printing photographic images captured with a digital camera.
Photo (Monochrome)	Suitable for optimized printing of monochrome photos.
Poster	The best setting for posters. Prints using vivid and high impact colors.
Faithful Color Reproduction	Prints by faithfully reproducing the colors of the original image.
Photo (Adobe RGB)	Achieves the best color when printing an image created with the Adobe RGB color space feature.
Office Document	Suitable for printing handouts as well as general office documents for which print clarity is key.

• The number of settings available for selection depends on the media type.

### Print Quality

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Draft
Resolution	600dpi / 300dpi

• The availability of settings is determined by the media type and print priority selections.

Note • Printing time is longer and more ink is consumed with High than with Draft, however, print quality is higher.

• Printing time is shorter and less ink is consumed with Draft than with High, however, print quality is lower.

# **Advanced Settings**

Presents detailed settings for the print priority, the print quality, and other items so you can select the values for these settings yourself.

# Print Priority

418

Select a print quality mode that is appropriate for the print job.

Free Layout

Setting	Details
Image	This mode achieves the best results for printing photographic images and illustrations.
Line Drawing	This mode is best for printing CAD drawings with fine lines or wall newssheet or other documents that contain large amounts of text. However, you may not achieve the quality you expect with printing photographs or other images with many filled areas. For these types of jobs, select <b>Image</b> .
Proof	This is a setting for enhancing the reproducibility of characters, illustrations, and photos with print proofing. However, this takes more time than regular printing.
Office Document	Prints common office documents, such as proposals, memos for distribution, etc., so they are easy to read.

• The number of settings available for selection depends on the media type.

### Print Quality

**•** • • •

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Draft
Resolution	600dpi / 300dpi

• The availability of settings is determined by the media type and print priority selections.

Note • Printing time is longer and more ink is consumed with High than with Draft, however, print quality is higher.

• Printing time is shorter and less ink is consumed with **Draft** than with **High**, however, print quality is lower.

### Color Mode

You can select a color mode to suit the print job.

Setting	Details
Color	Enables color printing.
Monochrome (Photo)	Prints monochrome photo image data in a gray scale that is free of color casting (phenomenon of grays that appear tinted).
Monochrome	Disables color printing and converts image from continuous color to grayscaled monochrome.
No color correction	Prints without performing color matching in the printer driver. Select this when color matching is performed by the application such as Adobe Photoshop or when you want to print color charts using the profile creation tool.

**Note** 

• The availability of settings depends on the print priority and media type selections.

# Color Adjustment / Gray Adjustment / Matching

You can set the color adjustment and matching.

Mac OS X Software

Free Layout

- Color Adjustment →P.421
- Gray Adjustment →P.424
- Matching →P.425

You can select Gray Adjustment only after Monochrome (Photo) has been selected in Color Mode.

Note • Matching is not displayed if No color correction has been selected in Color Mode.

• Restore Defaults Button

Click the button to reset to the setting when starting Free Layout.

• Print Button

Click the button to begin printing.

### • Update Printer Info. Button

Click the button to acquire printer information.

# **Color Adjustment**

You can set the color adjustment.

### Adjusting Color

Normally colors should be adjusted in the software application, but if you see colors in the printout that do not match colors on the screen, you can perform color adjustments.

Select Color on Color Mode in the Color Settings panel.

# 2 Select Color Adjustment.

Mac OS X Software

Free Layout

Drag each slider to the left or right to adjust.

Setting	Details	
Cyan	Adjusts the strength of colors to compensate the hues.	
Magenta	Adjusts the strength of colors to compensate the hues.	
Yellow	Adjusts the strength of colors to compensate the hues.	
Brightness	Adjusts the brightness of the entire image. When the results of the printout are brighter than the original images such as the original photo before scanning and graphics created on the display, or when you want to print in different degrees of brightness, use this feature.	
Contrast	Adjusts the relative brightness between the brightest and darkest portions of the image. *For soft gradation, decrease the contrast. For hard gradation, increase the contrast.	
Saturation	Adjusts the hues for vivid color or dark color.	
Gray Tone	Adjusts gray from cool black (bluish tones) to warm black (reddish tones).	

• You can also click the up or down arrow, or enter the number directly to increase or decrease the value.

### Adjusting Monochrome

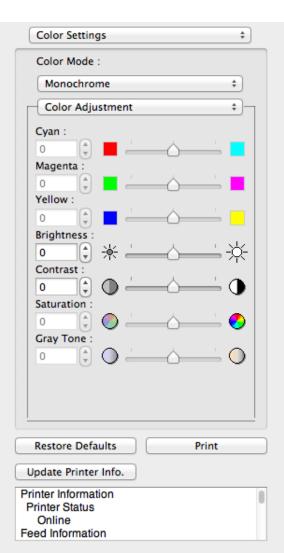

Use the monochrome setting to print monochrome images of color photographs captured with a scanner or digital camera or other color images.

Select Monochrome on Color Mode in the Color Settings panel.

Select Color Adjustment.

### 3

Drag each slider to the left or right to adjust.

Setting	Details	
Brightness	Adjusts the brightness of the entire image. When the results of the printout are brighter than the original images such as the original photo before scanning and graphics created on the display, or when you want to print in different degrees of brightness, use this feature.	
Contrast	Adjusts the relative brightness between the brightest and darkest portions of the image.	
	*For soft gradation, decrease the contrast. For hard gradation, increase the contrast.	

• You can also click the up or down arrow, or enter the number directly to increase or decrease the value.

# Gray Adjustment

You can set the gray adjustment.

### Adjusting Monochrome (Photo)

Sets monochrome printing for black-and-white photo image data captured with a scanner or digital camera.

Select Monochrome (Photo) on Color Mode in the Color Settings panel.

2

Select Gray Adjustment.

Color Settings

### • Matching Mode

You can select a matching mode to suit the print job.

Setting	Details
Driver Matching Mode →P.428	Enables printing of optimal color tones using a driver specific color profile. You should normally select this mode.
ICC Matching Mode →P.429	Enables color matching using ICC profiles. Select this if you want to print by specifying the input profile, printer profile, and matching method in detail. This allows you to use ICC profiles for digital cameras and scanners, ICC profiles created using the profile creation tool, etc.
ColorSync →P.430	Enables color matching by using the ColorSync function of Mac OS. Select this if you want to perform soft proofing using ColorSync before printing.

• You need to set each correction on the printer driver.

Note • ColorSync needs to be selected in the Color Matching panel of the driver in order to select ColorSync.

# Matching Method

You can select a matching method to suit the print job.

# Color Space

426

Select the color space.

### Gamma

You can adjust the gradation of intermediate tones in an image. **2.2** is normally selected. If you want a softer impression than **2.2**, select **1.8**.

### Input Profile

Select the input profile.

• You can select only after ICC Matching Mode has been selected in Matching Mode.

### Printer Profile

Select the printer profile.

• You can select only after ICC Matching Mode has been selected in Matching Mode.

### Soft Proof

When you place a checkmark here, ColorSync applies to the layout area.

• You can select only after **ColorSync** has been selected in **Matching Mode**.

Note

2 Click the Matching Method list, and then select a setting.

Setting	Details	
Auto	Automatically selects the best color matching method for each Image, Graphics, Text.	
Perceptual	Color-matching optimized for printing typical photos attractively. Smooth gradation is a feature. This is also an easy-to-use mode when performing color adjustment using application software.	
Saturation	Color-matching optimized for printing posters, etc., vividly.	
Colorimetric	Color-matching optimized for printing image data with accurate colors in input color space. The is the easiest-to-use mode when you want to adjust the color and print. However, gradation may be lost for colors of wider range than the color reproduction range of the printer. General this is also called relative colorimetric.	
Perceptual (People, Dark Areas)	Color-matching optimized for printing subdued photos such as indoor shots of people or dark scenes. Along with preventing the gradation loss of dark areas, you can realize photos of people in warm tones.	

Select Color Space for the print output.

Setting	Details
sRGB	Uses color space for a standard monitor. This selection is ideal for most software applications.

1

Setting	Details
Adobe RGB	Uses wide color space. Use this setting to print images created with Adobe RGB color space.

_	Print Object Frames	
	Object Frame Style :	Solid 🗘
_	Auto Arrange Spacing :	0.00 ( in. (0.00 - 3.94)
		Cancel OK

### Units

Set the unit for paper length, margins, and so on.

### Gridlines

You can input a grid line width value in numerical characters so that they serve as a guide to laying out objects.

• You can input between 10.0 and 200.0(mm) (between 0.39 and 7.87(inch)).

Note • You can change the numbers by clicking either ▲ button or ▼ button.

### Divisions

You can change the number of divisions of grid lines so that they serve as a guide to laying out objects.

You can input between 1 and 10.

• You can change the numbers by clicking either ▲ button or ▼ button.

### Grid Color

Select the grid line color.

### Print Object Frames

You can print the object border.

• If you do not want to print the object border, deselect the Print Object Frames check box.

### Object Frame Style

You can select the object frame style for printing.

The following settings are available for the object frame style.

Setting	Details
Solid Line	You can print the solid line as the frame style.
Dotted Line         You can print the dotted line as the frame style.	
Dashed Line         You can print the dashed line as the frame style.	

### Auto Arrange Spacing

Change the object-to-object spacing to be applied in the operation of laying out objects automatically.

• You can input between 0.0 and 100.0(mm) (between 0.00 and 3.94(inch)).

Note • You can change the numbers by clicking either ▲ button or ▼ button.

### Page Setup Dialog Box

This dialog box appears when you select **Page Setup** from the **File** menu. This dialog box provides selections for setting the media size, orientation and other important features.

	Page Setup	
Paper Orientation :	Paper Orientation :	
Vertical	U Horizontal	
Roll Paper Length : Auto Settings 708.66	in. (8.00 - 708.66)	
Order :	Upper Left to Right	
Paper Size :	Letter (8.5"x11")	
	Cancel OK	

### Paper Orientation

This selects the paper orientation.

The following settings are available for orientation.

Setting	Details
Vertical	Prints the image and text created with the application software in the orientation as it is.
Horizontal	Prints the image and text by rotating sideways 90 degrees from the orientation as specified in the application.

### Roll Paper Length

Set the length of one page to print on roll paper.

When you place a checkmark on **Auto Settings**, the one-page length to be printed on roll paper is automatically set so that the laid-out objects are printed on one page.

Available only if rolls are selected in Paper Source.

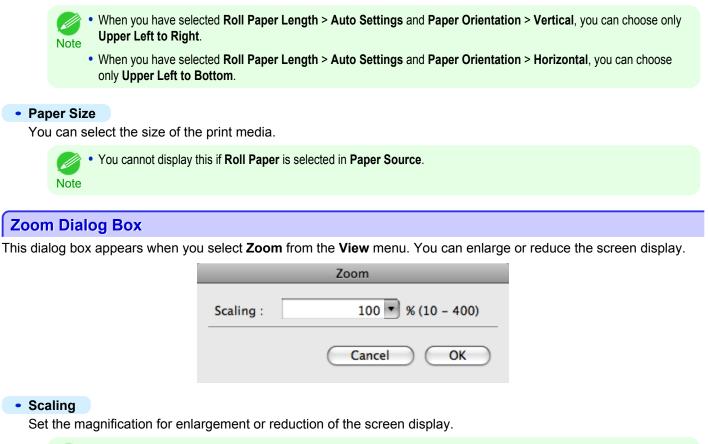

- You can input between 203.2 and 18000.0(mm) (between 8.00 and 708.66(inch)).
- You can change the numbers by clicking either ▲ button or ▼ button.

### • Order

Set the object layout order.

The following settings are available for order.

Setting	Details
Upper Left to Right	The objects are laid out from upper left to right.
Upper Left to Bottom	The objects are laid out from upper left to bottom.

You can input between 10 and 400.
You can change the numbers by clicking ▼ button.

# **Format Dialog Box**

This dialog box appears when you select **Format** from the **Object** menu after you select an object. You can rotate, enlarge, or reduce an object.

	Format
Rotate	
O Rotate Rig Rotate Le	-
Scaling : Object Size	100 🗘 % (25 - 400)
Height	11.69 in.
Width	8.28 in.
	Cancel OK

When the objects are not selected, you can not select Format.

Mac OS X Software

Free Layout

#### Rotate

When you place a checkmark here, you can select Rotate Right or Rotate Left.

Setting	Details
Rotate Right	Rotates the object 90 degrees clockwise.
Rotate Left	Rotates the object 90 degrees counterclockwise.

When several objects are selected, you cannot select Rotate.

#### Scaling

You can input the value for enlargement or reduction of the obeject in numerical characters.

- You can input between 25 and 400.
- You can change the numbers by clicking either ▲ button or ▼ button. Note

#### Object Size

You can confirm the object size.

When several objects are selected, you cannot display Object Size.

### Laying out a Multiple-File Document on One Page

You can lay out and print a multiple-file document on one page.

From the application software's **File** menu, select the printer setup menu to open the **Print** dialog box.

Normally, select **Print** from the **File** menu.

- 2 Click on Free Layout in the Page Setup panel to attach a checkmark.
- 3 In the Print dialog box, select the pages to print and the number of copies, and click the Print button. Free Layout starts, laying out the document created with application software in the layout area as an object.
- 4 Leaving Free Layout running, open other files with the application software and repeat the above steps.

### Laying out a Document Created with Multiple Application Programs on One Page

You can lay out and print a document created with multiple application programs on one page.

From the application software's **File** menu, select the printer setup menu to open the **Print** dialog box.

434

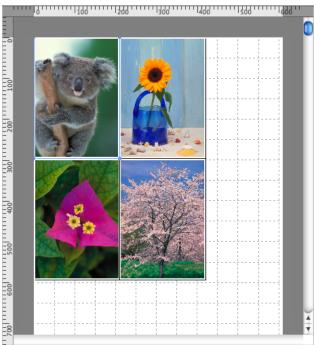

2

Click on Free Layout in the Page Setup panel to attach a checkmark.

- In the Print dialog box, select the pages to print and the number of copies, and click the Print button. Free Layout starts, laying out the document created with application software in the layout area as an object.
  - Leaving Free Layout running, open the files with other application software and repeat the above steps.

# Selecting an Object

#### When an object is selected, a select box (blue border) appears around the object.

- · To select an object, click that object.
- To select multiple successive objects, click them while holding down the shift key.
- To select multiple arbitrary objects, click them while holding down the command key.
- To select all objects, select Select All from the Edit menu.

# **Changing the Object Size**

You can change the object size by means of mouse operation or by specifying a scaling value.

• The vertical-to-horizontal ratio remains unchanged when the object is enlarged or reduced.

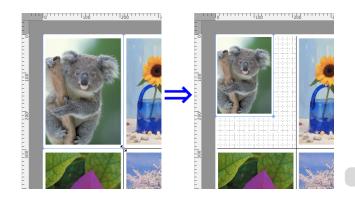

Resizing by means of mouse operation

Note

Note

- Select an object.
- 2 Place the pointer at a corner of the selection box around the object to show the arrow handle, and drag this handle to change the object size.

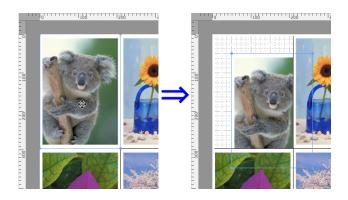

- **1** Select an object.
- 2 Open the Format Dialog Box  $\rightarrow$  P.433.
- **3** Use **Scaling** to set the magnification for enlargement or reduction. You either enter numbers directly.
  - You can input between 25 and 400.
  - Note You can change the numbers by clicking either ▲ button or ▼ button.
- 4 Click the **OK** button.

# Moving an Object

You can move the object position.

- Select an object.
- 2 Place the pointer inside the selection box of the object to show the crosshair handle, and drag it to move the object.

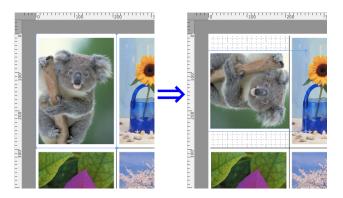

# **Rotating an Object**

You can rotate the object.

- Select an object.
- 2 Select Rotate Left or Rotate Right from the toolbar. Alternatively, you may click on the Rotate check box in the Format Dialog Box →P.433 then select Rotate Right or Rotate Left, and click the OK button.

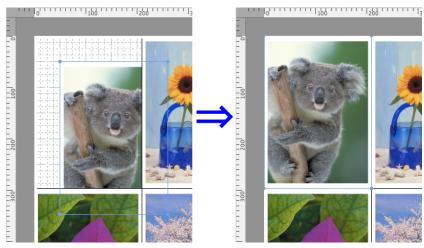

When several objects are selected, you cannot select Rotate.
 Note

# Laying out Objects Automatically

Click **Auto Arrange** in the tool bar. This automatically lays out objects. Alternatively, you may select **Auto Arrange Object** from the **Object** menu.

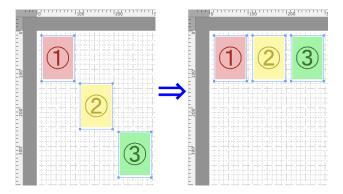

• The object layout order varies depending on the **Order** setting on the Page Setup Dialog Box —P.432 . Note

# **Aligning Objects**

You can align objects systematically.

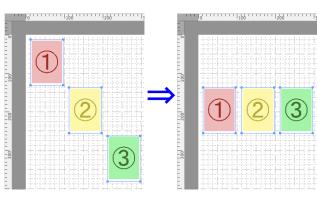

- **1** Select multiple objects.
  - 2 Select the align menu from the **Object** menu.
    - Align Top

Lays out the objects, justifying them to the top.

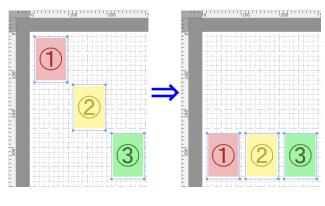

#### Center Vertically

Lays out the objects, justifying them to the vertical center.

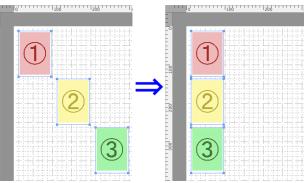

# Align Bottom

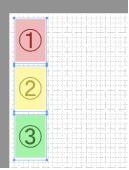

Lays out the objects, justifying them to the bottom.

### • Align Left

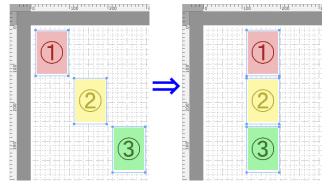

Lays out the objects, justifying them to the left.

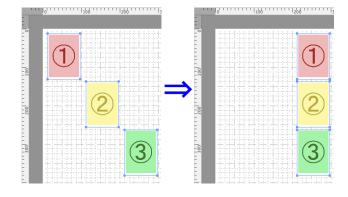

#### Center Horizontally

Lays out the objects, justifying them to the horizontal center.

#### Align Right

Lays out the objects, justifying them to the right.

# Changing the Object Overlapping Order

You can change the object overlapping order.

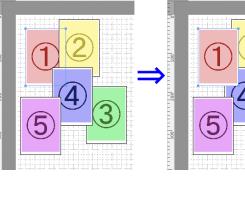

2

- Select an object.
- Select the overlapping order menu from the **Object** menu.

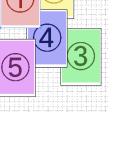

### Bring to Front

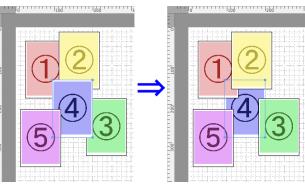

Moves the object to the frontmost position.

#### Send to Back

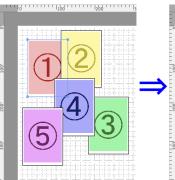

Moves the object to the backmost position.

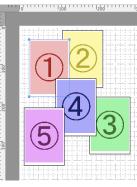

• Bring Forward

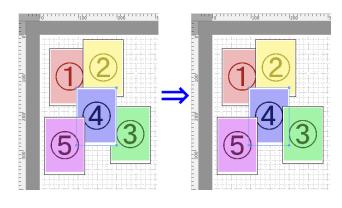

Moves the object one position to the front.

### Send Backward

Moves the object one position to the back.

# Pasting a Copied or Cut Object

Click **Copy** or **Cut** from the toolbar. Alternatively, you may select **Copy** or **Cut** from the **Edit** menu.

Click **Paste** from the toolbar. Alternatively, you may select **Paste** from the **Edit** menu.

1

2

• The copied or cut object is laid out at the end of the page.

Printing Enlargements of Scanned Originals from a Color imageRUNNER	456

# The Features of Color imageRUNNER Enlargement Copy

The main features of Color imageRUNNER Enlargement Copy are as follows.

- Allows the document scanned with the Color imageRUNNER to be automatically enlarged and printed.
- You can perform basic printer settings such as printer selection, media type and output profile selection, and matching methods, in addition to borderless printing and enlargement/reduction process without growing through the printer driver.

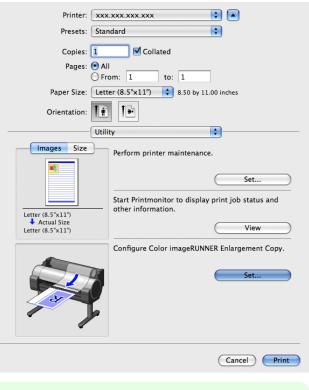

• The media type, image size, detailed media settings, and the printer settings can cause the actual print output to differ from the Color imageRUNNER Enlargement Copy settings.

# Starting Color imageRUNNER Enlargement Copy

Follow the procedure below to start the Color imageRUNNER Enlargement Copy.

Open the **Utility** panel of the **Print** dialog box.

• Your printer is depicted in the lower-left area of this screen. Note

2 Click the Set button in Configure Color imageRUN-NER Enlargement Copy. to open the Color image-RUNNER Enlargement Copy dialog box.

Name	Hot Folder	Destination	Folder Path

Add Edit	Add Destination Set and Edit Hot F ot Folder Constantly	older		
	constantly			Close

For the step to open the **Color imageRUNNER Enlargement Copy** dialog box, see "Starting Color imageRUNNER Enlargement Copy."  $\rightarrow$  P.442

#### • Delete files in the folder

From the Hot Folder list, select a hot folder and click the **Delete** button to delete only files in the hot folder.

#### • Delete the entire folder, as well as items in the list above

From the Hot Folder list, select a hot folder and click the **Delete** button to delete the hot folder.

• Delete Button

Select **Delete files in the folder** or **Delete the entire folder, as well as items in the list above** and click this button to delete the hot folder or only files in the hot folder.

Add Button

Click the button to open the **Destination Selection** dialog box so that you can add a hot folder.

Edit Button

From the Hot Folder list, select a hot folder and click this button to open the **Add/Edit Hot Folder** dialog box that allows you to edit the hot folder.

#### • Monitor Hot Folder Constantly

If the check box is selected, the Hot Folder is monitored from after the next login.

### **Hot Folder**

Hot folder refers to a folder used for Color imageRUNNER Enlargement Copy.

- When transferred to the PC's hot folder, the document data scanned with the Color imageRUNNER is printed in enlarged size from the printer according to the print conditions set in the hot folder.
- You can create a new hot folder, edit or delete an existing one, and set print conditions at will.

• You can create up to 10 hot folders.

#### • Easy Settings / Advanced Settings

Two modes are available to provide the optimum print settings for jobs. The settings available on each mode are as follows.

- Easy Settings →P.450
- Advanced Settings →P.451

### Media Type

This allows you to select the media type.

• Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

#### Paper Source

You can select the paper source.

The following settings are available for paper source.

Setting	Details
Cut Sheet	Select to print on the cut sheet.
Roll Paper	Select to print on roll paper.

#### Roll Paper Width

This selects the width of the roll media set to the printer.

• Available only if rolls are selected in Paper Source.

#### Automatic Cutting

You can set the printer to cut roll paper automatically or print a guideline for cutting. The following settings are available for automatic cutting.

Setting	Details
Printer Default	The value set on the printer operation panel takes priority.
None	Each page is not cut after it is printed and printing continues without interruption.
Print Cut Guideline	A print cut guideline is printed after each page and printing continues without interruption.

Available only if rolls are selected in Paper Source.

Note

#### Copies

You can input the number of print copies in numerical characters.

The maximum value is 999.

Note • You can change the numbers by clicking either ▲ button or ▼ button.

# **Easy Settings**

You can easily select the best settings for the print job by just selecting an item from the print target list that matches the content of the document.

ame :	Hot Fo	lder	
ot Folder :	Shared	l Folder	
P	aper Setti	ngs Output Settings Color Settings	
Media Type		Plain Paper	A V
Easy Settin	ngs		¢
Print Target	t:	Default Settings	÷
Print Qualit	<b>y</b> :	Standard(600dpi)	÷
		Suitable for printing normal documents that contain a mixture of text, photographs and graphics.	
Paper Sourc	:e :	Roll Paper	Å
Roll Paper V	Vidth :	17 in. (431.8mm)	A Y
	Cutting :	Printer Default	A V
Automatic (			

# Print Target

You can easily select the best settings for the print job simply.

If you select each Print Target item the corresponding comment for that item is displayed below the list.

Setting	Details
Default Settings	Suitable for printing normal documents that contain a mixture of text, photographs, and graphics.
Photo (Color)	Suitable for printing photographic images captured with a digital camera.
Photo (Monochrome)	Suitable for optimized printing of monochrome photos.
Poster	The best setting for posters. Prints using vivid and high impact colors.
Faithful Color Reproduction	Prints by faithfully reproducing the colors of the original image.
Office Document	Suitable for printing handouts as well as general office documents for which print clarity is key.

• The number of settings available for selection depends on the media type.

#### Print Quality

Note

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Fast
Resolution	600dpi / 300dpi

450

- The availability of settings is determined by the media type and print priority selections.
- Note Printing time is longer and more ink is consumed with High than with Fast, however, print quality is higher.
  - Printing time is shorter and less ink is consumed with Fast than with High, however, print quality is lower.

# **Advanced Settings**

Presents detailed settings for the print priority, the print quality, and other items so you can select the values for these settings yourself.

ie:		
Folder :		
Paper Se	ttings Output Settings Color Settings	
Media Type :	Plain Paper	Å
Advanced Setting	S	\$
Print Priority :	Image	¢
Print Priority : Print Quality :	Image Standard(600dpi)	\$
	Standard(600dpi)	
Print Quality :		\$

#### • Print Priority

Select a print quality mode that is appropriate for the print job.

Setting	Details
Image	This mode achieves the best results for printing photographic images and illustrations.
Line Drawing	This mode is best for printing CAD drawings with fine lines or wall newssheet or other documents that contain large amounts of text. However, you may not achieve the quality you expect with printing photographs or other images with many filled areas. For these types of jobs, select <b>Image</b> .
Proof	This is a setting for enhancing the reproducibility of characters, illustrations, and photos with print proofing. However, this takes more time than regular printing.
Office Document	Prints common office documents, such as proposals, memos for distribution, etc., so they are easy to read.

• The number of settings available for selection depends on the media type.

#### Print Quality

Note

Selecting print quality strikes a balance between the quality of the printed image and printing speed.

The level of the print quality and resolution settings are displayed in the following combinations.

Setting	Details
Print Quality	Highest / High / Standard / Fast
Resolution	600dpi / 300dpi

• The availability of settings is determined by the media type and print priority selections.

Note • Printing time is longer and more ink is consumed with High than with Fast, however, print quality is higher.

• Printing time is shorter and less ink is consumed with Fast than with High, however, print quality is lower.

	nt Centered Spaces at Top or I	Rottom	
	tate Page	Sottom	
	Rotate Right 90 De	egrees	
	Rotate Left 90 Deg	-	
		s	

### • Enlarged/Reduced Printing

Select the method for enlarged/reduced printing.

The following settings are available for enlarged/reduced printing.

Setting	Details
Fit Paper Size	Enlarges/reduces the whole page automatically to fit the media size selected for output. Select the media size to print from <b>Paper Size</b> .
Fit Roll Paper Width	Enlarges/reduces the whole page automatically to fit the width of the roll paper with the page width. *Make sure that the width of the roll paper in the printer is set correctly for <b>Roll Paper Width</b> in the <b>Paper Settings</b> panel.
	*Displayed only if rolls are selected in <b>Paper Source</b> .
Scaling	Enlarges/reduces the whole page by the scaling rate as specified. Input the scaling value in numerical characters. You can specify a range between 5 and 600%.
	*You can change the numbers by clicking either ▲ button or ▼ button. *Although Scaling can be set to make the image larger than the media size, the part that does not fit in the media cannot be printed. *This is not displayed when a checkmark is placed in <b>Borderless Printing</b> .

#### Borderless Printing

You can print the media without margins on all sides when the roll paper with the specific width and the specific media type is used.

• Available only if rolls are selected in **Paper Source**.

#### Paper Size

You can select the size of the print media.

452

• This is not displayed when Fit Roll Paper Width is set in Enlarged/Reduced Printing.

#### Print Centered

Select this feature to print the image in the center of a cut sheet or to print left and right margins evenly from the edges of roll paper.

 This feature is useful when you print the document enlarged or reduced with Scaling as well. When an image is scaled, it is always enlarged or reduced in reference to a starting point in the upper left corner of the page. If the image is reduced, the bottom and right margins are enlarged and the top and left margins remain unchanged. At that point, you can set all margins evenly with this feature.

#### No Spaces at Top or Bottom

You can set the printer to print without any empty area when the print data contains empty area at the top or bottom. Since the printer does not feed paper over the empty area, you can save paper.

Available only if rolls are selected in Paper Source.

#### Rotate Page

Select the method for rotating page.

The following settings are available for rotating page.

Setting	Details	
Rotate Right 90 Degrees	Rotates the portrait page right 90 degrees and print in landscape orientation. When the rotated page can fit in the width of roll paper, the page is rotated automatically, and when it can not fit in the width of roll paper, the page is not rotated.	
	*When <b>Fit Roll Paper Width</b> is selected under <b>Enlarged/Reduced Printing</b> , then the image is enlarged or reduced after rotating to fit the width of the roll paper.	
Rotate Left 90 Degrees	Rotates the portrait page left 90 degrees and print in landscape orientation. When the rotated page can fit in the width of roll paper, the page is rotated automatically, and when it can not fit in the width of roll paper, the page is not rotated.	
	*When <b>Fit Roll Paper Width</b> is selected under <b>Enlarged/Reduced Printing</b> , then the image is enlarged or reduced after rotating to fit the width of the roll paper.	
Rotate 180 degrees	Allows you to rotate the image 180 degrees from the vertical to the right.	

Available only if rolls are selected in Paper Source.

#### • Output Method Button

Click the button to open the **Output Method** dialog box. In this dialog box, you can specify the object output method.

# **Color Settings Panel**

ie :		
Folder :		
Paper Sett	tings Output Settings Color Settings

Input Profile :		
sRGB v3.0 (Canon)		\$
Printer Profile :		
sRGB v3.0 (Canon)		\$

# Color Mode

You can select a color mode to suit the print job.

Setting	Details
Color	Enables color printing.
Monochrome (Photo)	Prints monochrome photo image data in a gray scale that is free of color casting (phenomenon of grays that appear tinted).
Monochrome	Disables color printing and converts image from continuous color to grayscaled monochrome.

• The availability of settings depends on the print priority and media type selections.

#### • Matching Mode

Under Matching Mode, select the matching mode.

Setting	Details
Driver Matching Mode →P.455	Enables printing of optimal color tones using a driver specific color profile. You should normally select this mode.
ICC Matching Mode →P.456	Enables color matching using ICC profiles. Select this if you want to print by specifying the input profile, printer profile, and matching method in detail. This allows you to use ICC profiles for digital cameras and scanners, ICC profiles created using the profile creation tool, etc.
No Correction	No color matching is performed. Select this option when you want to perform color matching in the software application.

# **Driver Matching Mode**

Matching M	ethod : e : (Canon)			\$

# 2

# Click Matching Method list, and then select a setting.

Setting	Details
Auto	Automatically selects the best color matching method for each Image, Graphics, Text.
Perceptual	Color-matching optimized for printing typical photos attractively. Smooth gradation is a feature. This is also an easy-to-use mode when performing color adjustment using application software.
Saturation	Color-matching optimized for printing posters, etc., vividly.
Colorimetric	Color-matching optimized for printing image data with accurate colors in input color space. This is the easiest-to-use mode when you want to adjust the color and print. However, gradation may be lost for colors of wider range than the color reproduction range of the printer. Generally, this is also called relative colorimetric.
Perceptual (People, Dark Areas)	Color-matching optimized for printing subdued photos such as indoor shots of people or dark scenes. Along with preventing the gradation loss of dark areas, you can realize photos of people in warm tones.

# **ICC Matching Mode**

#### Under Matching Mode, select ICC Matching Mode.

### Click Matching Method list, and then select a setting.

Setting	Details
Perceptual	Color-matching optimized for printing typical photos attractively. Smooth gradation is a feature. This is also an easy-to-use mode when performing color adjustment using application software.
Saturation	Color-matching optimized for printing posters, etc., vividly.
Colorimetric	Color-matching optimized for printing image data with accurate colors in input color space. This is the easiest-to-use mode when you want to adjust the color and print. However, gradation may be lost for colors of wider range than the color reproduction range of the printer. Generally, this is also called relative colorimetric.
Colorimetric (No White-Point Cor- rection)	The processing method of color-matching is identical to <b>Colorimetric</b> . Use this when you want to further reproduce the target paper material color of the image data. Generally, this also is called absolute colorimetric.

Click the Input Profile list, and then select an input profile.

To match the color on the printing, select the input profile for Color imageRUNNER Enlargement Copy of the Color imageRUNNER type in use.

Click the **Printer Profile** list, and then select a printer profile.

# Printing Enlargements of Scanned Originals from a Color imageRUNNER

Scanned originals from a Color imageRUNNER can be enlarged and printed automatically. Originals you create by scanning with a Color imageRUNNER are transferred to a "hot folder" and printed automatically after enlargement according to printing conditions you specify for that folder.

This processing sequence is called the Color imageRUNNER Enlargement Copy function.

To use Color imageRUNNER Enlargement Copy, first complete these settings in the following order.

1. Register a hot folder on your computer.

Register a hot folder on your computer for storing scanned originals from the Color imageRUNNER and complete the settings for enlargement copy. For details, see "Creating a New Hot Folder." → P.444

2

3

4

 Complete the scanning settings on the Color imageRUNNER. Configure the Color imageRUNNER to send scanned originals to the hot folder.

After these settings are complete, you can print enlarged copies of scanned originals from the Color imageRUNNER.

Completing the scanning settings on the Color imageRUNNER.

Configure the Color imageRUNNER to send scanned originals to the hot folder. It is easy to send scanned originals to the hot folder if you assign the scanning settings and destination to a **Favorites** button on the Color imageRUNNER. For instructions on assigning scanning and sending settings to the **Favorites** button, refer to the Color imageRUNNER manual.

### Scanning the original and print an enlargement

Follow the steps below to scan an original on the Color imageRUNNER for enlarged printing on the printer. For detailed instructions, refer to the Color imageRUNNER manual.

- **1** Load the original on the platen glass or document feeder of the Color imageRUNNER.
- 2 Press **Send** to display the screen for transmission.
- **3** Press **Favorites**, and then press the **Favorites** button assigned to the hot folder.
- Press Start on the control panel. If you scan originals on the platen glass, after scanning all originals, press
   Done on the touch-panel display.
   Scanned originals are sent to the hot folder and automatically enlarged and printed following the conditions you

specified for the folder.

# Features of the Print Plug-In for Photoshop/Digital Photo Professional

The main features of the Print Plug-In for Photoshop/Digital Photo Professional are as follows.

- You can automatically detect the color space of Adobe RGB or sRGB-use images, etc., and automatically set optimal profiles. Thus, you can print without the trouble of configuring settings.
- You can modify image data directly in Photoshop and send the image data to the printer. This allows you to process not only 8-bit, but also 16-bit image data.
- By using the preview function for images based on real images, and the preview function for layouts based on image positioning by media size, you can use this software to make color adjustments and confirm print layout.
- You can perform basic printer settings such as printer selection, media type and output profile selection, and matching methods, in addition to borderless printing and enlargement/reduction process without growing through the printer driver.
- You can print an image with adjustment values such as the color balance, brightness, and contrast varying in steps and select your preferred adjustment values. (See "Adjustment pattern setting dialog box.") →P.476
- You can create and print a layout image for finishing by mounting in a frame with the image extended to the sides of the frame by using the Layout Plug-In that is installed at the same time as the Print Plug-In for Photoshop. (See "About the Layout Plug-In.") →P.516
- By using the print history management function, you can import past print settings parameters. Additionally, you can save preferences as a file.

The actual output may differ from the settings in Print Plug-In for Photoshop/Digital Photo Professional (the arrangement of the image in the layout preview, print start position, and paper size) depending on the media type, image size, paper detailed settings, and printer main unit settings.

• Loss of gradation in dark areas can be reduced by performing black point compensation.

• Adobe CMM is required in order to use the black point compensation function. Note

• You can perform a printer simulation print by specifying the printer profile.

# **Installation Procedures**

The procedures to install Print Plug-In for Photoshop/Digital Photo Professional are as follows.

- Note The Layout Plug-In is also installed when the Print Plug-In for Photoshop is installed.
- Insert the User Software CD-ROM into the CD-ROM drive to start the installer.
- Click on the **iPFxxxx PlugIn InstallerX** icon in the **Plug-in** folder in the User Software CD-ROM.

The iPFxxxx icon is the name of the printer you are using.

	Continue Quit

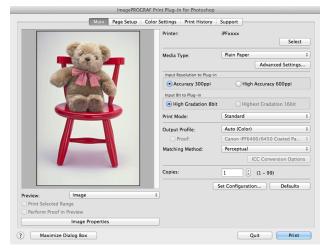

### **Starting from Photoshop**

Follow the procedure below to start the Print Plug-In for Photoshop from Photoshop.

- 1 Start Photoshop.
- 2 Open the image that you wish to print.
  - If required, select the print range.
    - Note

• Images for use with Print Plug-In for Photoshop are less than 60,000 pixels in width and height. Reduce the selection range or reduce the image with processing for images more than 60,000 pixels in width and height, and then attempt step 3.

4 Select **Export** (or **Data Export**) from the **File** menu and then select the output plug-in that matches your printer. The imagePROGRAF Print Plug-In for Photoshop window (known below as the Print Plug-In window) is displayed.

- When the color space of the input image is CMYK, it is changed to AdobeRGB for processing with Print Plug-In for Photoshop. Also, **Relative Colorimetric** is used for the matching method.
  - If the message below is displayed but the Print Plug-In window is not displayed, install the newest imagePROGRAF
    printer driver and then attempt step 3.

To install imagePROGRAF Print Plug-In, the latest version of the imagePROGRAF printer driver must be installed.

- If the following message is displayed, but the Print Plug-In window is not displayed, open only one Photoshop. When Photoshop is running in multiple windows, the plug-in may not start.
- If the message below is displayed but the Print Plug-In window is not displayed, convert the color space of the image to either RGB color, grayscale, or CMYK color and then attempt step 3.
   Set the color space of the image to either RGB color, grayscale, or CMYK color.

# **Starting from Digital Photo Professional**

Follow the procedure below to start the Print Plug-In for Digital Photo Professional from Digital Photo Professional.

1 Start Digital Photo Professional.

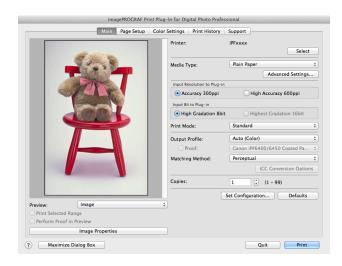

Open the RGB color image that you want to print.

If required, select the print range.

 Images for use with Print Plug-In for Digital Photo Professional are less than 6,000 pixels in width and height. Reduce the selection range or reduce the image with processing for images more than 6,000 pixels in width and height, and then attempt step 3. 4 Select **File** from the **Plug-in printing** menu and then select the output plug-in that matches your printer. The imagePROGRAF Print Plug-In for Digital Photo Professional window (hereinafter referred to as the Print Plug-In window) is displayed.

# Print Plug-In for Photoshop/Digital Photo Professional Main Window

The Print Plug-In main window consists of the sheet selection area, and the preview and button area.

#### Sheet Selection Area

The tabs used to switch between each sheet on the Print Plug-In window are displayed.

Preview: Image			
Image Properties			

When you select a tab, a sheet is displayed. The settings available on each sheet are as follows.

- Main Sheet →P.467
- Page Setup Sheet →P.470
- Color Settings Sheet (Color) →P.472
- Print History Sheet →P.474
- Support Sheet →P.475

#### Preview Area

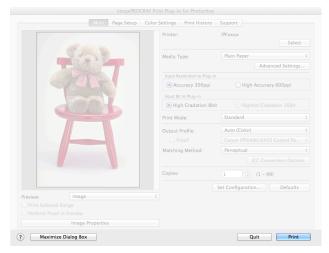

You can check the settings you made on the image in this area.

About the settings available on the preview area, see "Preview Area." -P.466

#### Button Area

This contains the buttons **Print**, **Quit**, **Help** and **Maximize Dialog Box** 

# • Print Button

Click this button to begin printing.

• Quit Button

Click this button to close the Print Plug-In window and return to application software.

Button

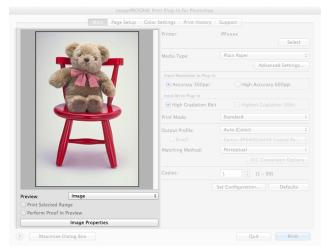

Click this button to display the Print Plug-In for Photoshop/Digital Photo Professional Help file.

#### Maximize Dialog Box button

When this button is clicked, the Print Plug-In main window is displayed enlarged to cover the entire display screen.

# **Preview Area**

You can check the settings you made on the image in this area.

#### Preview

Select the preview display method.

For more information about preview, see "Utilize Three Types of Previews." →P.486

Setting	Details
Print Area Layout	Displays the print range and the area out of the print range in the layout matching the <b>Paper Size</b> set. *You can change the image print position when you drag the image while the cursor is displayed
	as $\langle D \rangle$ .
Image	The entire image is displayed. *You can select the print range when you drag the image while the cursor is displayed as *When you click the image while the cursor is displayed as 🔍, the selected area is deselected.
Roll Paper Preview	Display the media size and roll paper information on the top in the layout printing on roll paper. *To select <b>Roll Paper Preview</b> , select <b>Roll Paper</b> in <b>Paper Source</b> .

### Print Selected Range

Place a checkmark here to only print the selected range.

• When you select **Preview** in the **Image**, then select a portion of the image on the preview display, this becomes valid.

#### Perform Proof in Preview

Place a checkmark here to simulate the colors of the output product in the preview.

•

- If Auto (Color) is selected under Output Profile, some media types are enabled.
- Note If ICC profile is selected under **Output Profile**, this is always enabled.
  - The actual color balance of the print product and the simulation product may differ with some environments and conditions. In addition, when you have selected an ICC Profile with **Output Profile** and it is not compatible with the printer or media that you are using, the color balance of the actual print product will differ.

#### • Image Properties button

When you click the button to open the **Image Properties** dialog box, where **Image Size**, **Resolution**, **Bit** and **Color Space** information of the image imported to Print Plug-In are displayed.

#### • Printer

The printer types are displayed.

#### Select button

Click this button to display the Select Printer dialog box.

When you click the **OK** button after selecting the printer in the **Select Printer** dialog box, you can change the printer that corresponds with Print Plug-In.

#### Media Type

This allows you to select the media type. For more information about, see "Customize Media Settings."  $\rightarrow$  P.505

Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

#### Advanced Settings button

Click the button to display the **Paper Detailed Settings** dialog box. For more information about the media detailed settings, see "Paper Detailed Settings Dialog Box." —P.480

#### Input Resolution to Plug-in

You can select the resolution to process the image with Print Plug-In. The following settings are available for resolution. Mac OS X Software

Print Plug-In for Photoshop / Digital Photo Professional

Setting	Details
Accuracy 300ppi	This processes images at an accurate resolution. This can control print speed and memory capacity.
High Accuracy 600ppi	This processes images at a more accurate resolution. This setting results in the best print quality, but this takes more time to print than <b>Accuracy 300ppi</b> while also requiring more memory capacity.
	*This may not be displayed depending on how you set Media Type

### Input Bit to Plug-in

You can select the bit number to process with Print Plug-In. The following settings are available for the input bit number.

Setting	Details
High Gradation 8bit	This processes images with at 8bit/channel (24 bit).
Highest Gradation 16bit	This processes images with at 16bit/channel (48 bit).
	*This may not be displayed depending on how you set <b>Media Type</b> and <b>Input Resolution to Plug-in</b> .

# • Print Mode

Selecting the printing mode strikes the balance between the quality of the printed image and printing speed. The following settings are available for the print mode.

Setting	Details
Highest	A setting for printing at the highest resolution when quality is most important. Printing takes longer and consumes more ink than in other modes, but this mode offers superior printing quality.
High	Choose this setting to print at high resolution when quality is most important. Printing takes longer and consumes more ink than in <b>Standard</b> or <b>Fast</b> modes, but this mode offers exceptional printing quality.
Standard	Choose this setting to print at standard resolution when quality and speed are both important. Printing takes less time than in <b>Highest</b> or <b>High</b> mode.
Fast	Choose this setting to print faster. Printing in fast mode can help you work more efficiently when checking layouts.
Highest (Max. No. of Passes)	If you are concerned about uneven colors in the print result of <b>Highest quality</b> , selecting this option may improve printing results. However, printing may take longer.

• The selectable fields may vary according to the Media Type, Input Resolution to Plug-in and Input Bit to Plug-in settings.

### • Output Profile

You can select the output profile.

The following settings are available for the output profile.

Setting	Details
Auto (Color)	Performs the optimum color conversion from the input image data color space information (sRGB, Adobe RGB), media settings etc. You should normally select these settings.
Auto (Monochrome Photo)	Performs the best color conversion to monochrome from the input image data color space infor- mation (sRGB, Adobe RGB), media settings etc.
None (No Color Correction)	You cannot perform color conversion with a plug-in. This is useful for creating an original ICC profile.
External ICC Profiles	This selects printer ICC profiles to be output to ICC profiles saved in the OS standard folder. Use the color space of the input data as well as the select ICC profile to perform color conversion.

Auto (Monochrome Photo) can only be selected for the corresponding media types.

#### Proof

Note

This is displayed when an ICC profile is selected as the **Output Profile**. When this is checked, you can perform printing press simulation prints. Refer to Perform Printing Press Simulation Print **P**.500 for details on printing press simulation prints.

#### Matching Method

You can select the processing method when performing color conversion. The following settings are available for the matching method.

Setting	Details
Perceptual	This converts the image to an image with natural color balance and gradation. This is useful for pictures.
Saturation	This converts the image to an image with heightened color saturation. The color balance of pic- tures and drawings may change.
Relative Colorimetric	This converts the image with emphasis on color balance before the conversion or on visual color balance. This is useful for pictures and drawings.

When the **Output Profile** you have set is **Auto (Monochrome Photo)** or **None (No Color Correction)**, you cannot select a matching method.

#### ICC Conversion Options button

This is displayed when an ICC profile is selected as the Output Profile.

When this button is clicked, the **ICC Conversion Options** dialog box is displayed allowing you to configure color conversion related settings.

Refer to ICC Conversion Options dialog box →P.482 for details on ICC Conversion Options.

#### Copies

You can input the number of print copies in numerical characters.

• The maximum value is 99.

You can change the numbers by clicking either ▲ or ▼.

#### • Set Configuration button

Clicking the button opens the **Set Configuration** dialog box that provides settings for the adjustment of image sharpness and image enlargement method.

For more information about Set Configuration, see "Set Configuration Dialog Box." -P.481

#### • Defaults button

Click the button to return all of the settings on the **Main** sheet to their defaults.

# Page Setup Sheet

You can use this sheet to set the size of the image to be printed, the media size, and whether to enlarge/reduce the image.

# Input Image Size

The size of the image imported to Print Plug-In is displayed.

#### Borderless Printing

When you place a checkmark here, the **Specify Roll Paper Width** dialog box is displayed and you can print an image without borders.

For more information about Borderless Printing, see "Print with No Borders." -P.504

Available only if rolls are selected in Paper Source.

#### Enlarged/Reduced Printing

When you place a checkmark here, you can print enlarged/reduced images.

When printing an enlarged/reduced image, select the method for enlargement/reduction. The image size sent to the printer is displayed matching the selected method in **Output Image Size**.

 Setting
 Details

 Fit Paper Size
 This automatically enlarges/reduces the entire image imported to Print Plug-In to match the export media size when printing.

 Fit Roll Paper Width
 This automatically enlarges/reduces the entire image imported to Print Plug-In to match the width of the roll paper with the width of the image when printing.

 \*Displayed only if rolls are selected in Paper Source.
 This enlarges/reduces the entire image by the specified scaling value. Input the scaling value in numerical characters. You can specify a range between 5-600%.

 \*You can change the numbers by clicking either ▲ or ▼.

The following settings are available for enlarged/reduced printing.

This is not displayed when a checkmark is placed in Borderless Printing.

470

# Output Image Size

Note

The output image size is displayed up to one place after the decimal point in millimeters.

• When Paper Size is smaller than Output Image Size, part of the image may not print.

#### • Paper Size

You can select the size of the print media.

Note

This is not displayed when a checkmark is placed in Borderless Printing.

Note • This is not displayed when Fit Roll Paper Width is set in Enlarged/Reduced Printing.

# Orientation

This selects the print orientation.

The following settings are available for orientation.

Setting	Details
Portrait	Prints the image on the media as it appears on the screen.
Landscape         Prints the image on the media rotated 90 degrees.	

#### Layout

You can select the print position of an image on the media. The following settings are available for layout.

#### Layout

0.111	Detelle		
Setting		Details	
Upper-Left of Output Paper Size	Prints the image with fittir	ng the top left of the active print area for Paper Size.	
Center of Output Paper Size	Prints the center of the im	Prints the center of the image on the center of the selected Paper Size.	
Specify Print Start Position	You can print with specifying the top and left printing start positions in <b>From Top Margin</b> and <b>From Left Margin</b> for <b>Paper Size</b> .		
	From Top Margin         Input the margin from the top of the media in numbers.           *You can input between -9999 and 9999 mm.		
	From Left Margin	Input the margin from the left of the media in numbers. *You can input between -9999 and 9999 mm.	

Select Print Area Layout or Image in Preview when you select Layout.
 Note

#### **Roll Paper Layout**

	Setting	Details
Upper-L	eft of Roll Paper	Prints the top left of Media Size on the top left of the selected roll paper.
Center o	of Roll Paper	Prints the center of Media Size on the center of the selected roll paper.

• Select Roll Paper Preview in Preview when you select Roll Paper Layout.

Note

# Paper Source

You can select the media source.

The following settings are available for media source.

Setting	Details
Roll Paper	Select to print on roll paper.

Setting	Details
Cut Sheet	Select to print on the cut sheet.

#### Roll Paper Options button

Click this button to open the **Roll Paper Options** dialog box, where you can set roll paper width and perform auto cut settings.

For more information about the roll paper options, see "Roll Paper Options Dialog Box." -P.483

#### Size Options

Click the Size Options button to open the **Size Options** dialog box and you can select a media name, size and other settings.

For more information about the size options, see "Size Options Dialog Box." →P.483

#### Defaults button

Click the button to return all of the settings on the Page Setup sheet to their defaults.

# **Color Settings Sheet (Color)**

You can use this sheet to adjust image Color, **Brightness**, **Contrast**, **Saturation**, and you can set the color balance of print product more to your liking.

Note

You can check a preview of the adjusted state for the following items.

Cyan / Magenta / Yellow, Gray Tone, Brightness, Contrast, Saturation, and Gray Tone Adjustment

#### Cyan / Magenta / Yellow

You can adjust the strength or weakness of a color by either inputting a numerical value or dragging the slide bar.

#### Gray Tone

You can adjust gray tone from cool black (cool tones) to warm black (red tones) by either inputting a numerical value or dragging the slide bar.

#### Brightness

You can adjust the brightness of the printed image without losing the brightest and darkest areas by either inputting a numerical value or dragging the slide bar.

#### Contrast

You can relatively adjust the brightness of the brightest and darkness areas by either inputting a numerical value or dragging the slide bar.

#### Saturation

You can adjust the saturation of vivid color balance to dark color balance by either inputting a numerical value or dragging the slide bar.

#### Adjustment pattern setting button

When this button is clicked, the **Adjustment pattern setting** dialog box is displayed. The **Adjustment pattern setting** dialog box allows you to print an adjustment pattern with adjustment values that vary in steps up and down, and to select your preferred adjustment values.

For details on Adjustment pattern setting, see "Adjustment pattern setting dialog box." -P.476

#### Curve button

Click the button to open the **Curve** dialog box then set the **Channel** and other settings. For more information about **Curve**, see "Curves Dialog Box."  $\rightarrow$  P.484

#### • Defaults button

Click the button to return all of the settings on the Color Settings sheet to their defaults.

# **Color Settings Sheet (Monochrome)**

This screen allows you to adjust settings such as the **Color Balance**, **Tone**, **Brightness**, and **Contrast** to configure the printing result to be closer to your expected tone and gradation.

This is displayed when Auto (Monochrome Photo) is selected in the Output Profile on the Main Sheet -P.467.

Allow you to select the color balance to suit your application.

#### • X / Y

Adjust the color balance as you check the color tone in the adjustment area.

You can adjust the square area in the center by clicking or dragging it.

Drag the vertical or horizontal scroll bars for adjustment, as desired.

You can click the arrows by the X (horizontal) and Y (vertical) boxes or enter the values directly.

#### Tone

You can adjust the brightness of intermediate tones in an image. Selecting **Hard tone** gives a hard impression with more definition. Selecting **Soft tone** gives a soft impression.

#### Brightness

You can adjust the brightness of the printed image without losing the brightest and darkest areas by either inputting a numerical value or dragging the slide bar.

#### Contrast

You can relatively adjust the brightness of the brightest and darkness areas by either inputting a numerical value or dragging the slide bar.

#### Highlight

Adjust the brightness of the lightest portion.

#### Shadow

Adjust the brightness of the darkest portion.

#### • Tint

Mac OS X Software

Print Plug-In for Photoshop / Digital Photo Professional

Fills in the white parts of the paper with a small amount of ink in order to reduce the difference in texture between highlights in the image and the white parts of the paper.

#### • Adjustment pattern setting button

When this button is clicked, the **Adjustment pattern setting** dialog box is displayed. The **Adjustment pattern setting** dialog box allows you to print an adjustment pattern with adjustment values that vary in steps up and down, and to select your preferred adjustment values.

For details on Adjustment pattern setting, see "Adjustment pattern setting dialog box." (-P.476)

#### • Curve button

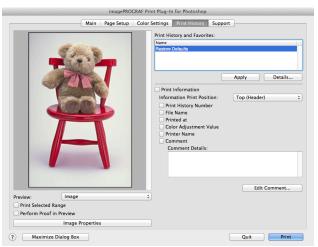

Click the button to open the **Curve** dialog box then set the **Channel** and other settings. For more information about **Curve**, see "Curves Dialog Box."  $\rightarrow$  P.484

#### • Defaults button

Click the button to return all of the settings on the Color Settings sheet to their defaults.

# **Print History Sheet**

You can use this sheet to apply settings history used in printing, and to print information, such as the image file name, with the image.

#### Print History and Favorites

This displays a list of print preferences.

Select **Restore Defaults** and click the **Apply** button to restore all settings to their initial settings.

You can check the 3 print preferences in the preview display.

User's Guide

### Apply button

iPF9400

When you click the button, the print setting content applies to the current image selected with **Print History and Favorites**.

#### • Details button

Click the Details button to open the **Print History Details** dialog box, where you can manage print history. For more information about the print history details, see "Print History Details Dialog Box."  $\rightarrow$  P.485

#### Print Information

When you place a checkmark here, you can print the file name and print time and date on the image. The following settings are available for the print position and content.

For more information about **Print Information**, see "Set Information to Print with Image." —P.514

Setting		Details	
Information Print Position	Selects the information	Selects the information print position.	
	Top (Header)	Information is printed on the top of the image.	
	Bottom (Footer)	Information is printed on the bottom of the image.

Print Plug-In for Photoshop / Digital Photo Professional

An Internet connection is needed to view the websites.

#### • User Manual button

Note

Click the button to display the printer manuals installed on the computer.

• You must have User Manual installed on your computer.

#### About button

Click the button to open the version information window of the Print Plug-In. Click the **OK** button in the version information window to return to the Print Plug-In window.

# Adjustment pattern setting dialog box

Displays the adjustment pattern by taking images with the adjustment values varying up and down in steps from the baseline adjustment values in the **Color Settings** sheet (color or monochrome). This allows you to print the adjustment pattern and select your preferred adjustment values while comparing the images.

Adjustment p		
	Paper Source:	Roll Paper
	Use Paper Size:	ISO A4 (210.0mm x 297.0mm)
	Paper Size: No Space at Paper Bottom Horizontal Axis	W 210.0mm x H 296.9mm (Conserve Paper)
	Adjustment Item:	Cyan ‡
	Number of Patterns:	3 \$
-5 -10 -5 0 -5 10	Adjustment Value Spacing:	10 ‡
	Vertical Axis	
	Adjustment Item:	Brightness ‡
	Number of Patterns:	3 ‡
	Adjustment Value Spacing:	5 \$
	Rotate 90 degrees:	None
	Pattern Size:	Auto
	Pattern Spacing:	None
	Pattern Background:	Black
	Update Base Values in the	Color Settings Sheet
	Print Conditions	
		on Glossy Photo Paper 170gsm ndard
	Output Profile: Aut	o (Color)
y the Range of Images		Restore to Previous

#### Preview Area

This area allows you to view adjustment pattern images side-by-side to check the state when changes to adjustment values are applied.

The adjustment values of the image enclosed in the blue frame in the center are used as the base values, with images arranged around this with the adjustment values varying in steps up and down from these base values. If you click any of the images, the adjustment pattern is redisplayed with the adjustment values from that image as the base values.

The adjustment values are displayed at the top of each image. If both the **Horizontal Axis** and **Vertical Axis** are configured, the adjustment value for the **Horizontal Axis** is displayed on the right and the adjustment value for the **Vertical Axis** is displayed on the left. If the image is so small that the adjustment values cannot be displayed, you can check the adjustment values by displaying the tool tip.

For images where the adjustment values are out of range, an adjustment pattern is not displayed and the message Out
of Range is displayed instead.

#### Paper Source

Selects the paper feed method for the paper to print the adjustment pattern on. You can split the usage between printing adjustment patterns on cut paper (manual feed) and printing work pieces on roll paper.

#### Use Paper Size

Selects the paper size to print the adjustment pattern on.

The adjustment pattern is printed so that it fits into the selected paper size.

• If the image size is large and **Dimensions** is selected in **Pattern Size**, the pattern display might not fit within the vertical direction of the paper size. In this case, select **Auto** in **Pattern Size**.

• The printed paper size is displayed in **Paper Size**.

#### Paper Size

Since the length in the vertical direction may differ between the **Use Paper Size** and actual printed material, this displays the actual output paper size.

#### • No Space at Paper Bottom (Conserve Paper)

If a margin appears at the bottom of the paper with the paper size selected in **Use Paper Size**, you can conserve paper by selecting this check box to print excluding the margin area. The state of the length in the vertical direction being shortened to conserve the margin area is reflected in the displayed **Paper Size**.

#### Horizontal Axis / Vertical Axis

Configures settings such as the items that change in steps and the number of patterns when multiple adjustment patterns are arranged horizontally or vertically.

#### Adjustment Item

Selects the items to change in steps.

For color, you can select **Cyan**, **Magenta**, **Yellow**, **Gray Tone**, **Brightness**, **Contrast**, or **Saturation**. For monochrome, you can select X **Color Balance**, Y **Color Balance**, **Tone**, **Brightness**, **Contrast**, **High-light**, **Shadow**, or **Tint**.

The icons for Horizontal Axis Adjustment Item are displayed above the preview area and the icons for Vertical Axis Adjustment Item are displayed on the left of the preview area.

None can only be selected for Vertical Axis in both color and monochrome.

#### Number of Patterns

You can select the number of images to display in the pattern in the horizontal or vertical direction from 3, 5, and 7. If the adjustment item is **Tone**, you can select 3 or 5. When **Tone** is selected as the adjustment value, -1 is **Soft tone**, 0 is **Middle tone**, 2 is **Medium-hard tone**, 3 is **Hard tone**, and 5 is **Strong-hard tone**.

#### Adjustment Value Spacing

You can select the interval of the variation in adjustment values between neighboring adjustment pattern images from the range of 1 to 10. The larger the value, the greater the differences between the states of the adjustment pattern images. Note that if the adjustment item is **Tone**, the **Adjustment Value Spacing** cannot be selected.

(Swap) button

Rearranges the adjustment pattern with the Horizontal Axis and Vertical Axis adjustment items swapped.

#### Rotate 90 degrees

Rotating the image may make it easier to conserve paper and compare images. Select **Per Image** to rotate each of the images in the adjustment pattern by 90 degrees. Select **Entire Image after layout** to rotate the entire adjustment pattern by 90 degrees. When **None** is selected, the image is not rotated.

#### Pattern Size

You can specify the size of the image when printing the adjustment pattern.

When **Auto** is selected, the image is enlarged or reduced to fit the adjustment pattern into the **Use Paper Size**. When **Dimensions** is selected, the image is printed at the input image size without enlarging or reducing. **Dimensions** cannot be selected when the paper feed method is **Manual**.

• If the input image size is large, check the **Paper Size** before starting printing because it may be larger than the actual printed material size.

- Select Dimensions in Pattern Size to print at the input image size without enlarging or reducing the images.
- Patterns that extend past the horizontal width of the paper are printed wrapped onto the next line.

#### Pattern Spacing

You can select **None** or **Available**. If **Available** is selected, you can insert a background between each image. The background color can be specified in **Pattern Background**.

#### Pattern Background

You can select the background color from White, Black, and Gray.

If it is difficult to compare the differences between neighboring adjustment pattern images, changing the background color may make it easier to compare. The **Pattern Spacing** can be selected if **Pattern Background** is **Available**.

#### • Update Base Values in the Color Settings Sheet

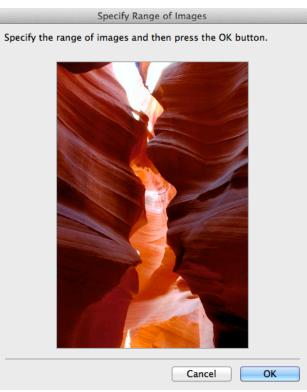

Select this check box and click the **Close** button to apply the setting values (standard values) of the image enclosed in the blue frame in the center of the preview area in the **Color Settings** panel (color or monochrome).

#### • Print Conditions

Displays the paper type, print mode, and output profile configured in the main window. This makes it possible to check the details of each of the settings when printing the adjustment pattern without returning to the main window.

#### • Specify the Range of Images button

When this button is clicked, the **Specify the Range of Images** dialog box is displayed for specifying the range of images.

When you specify the range by using the mouse or other means and then click the **OK** button, the **Specify the Range of Images** dialog box closes and the specified image range is redisplayed as the adjustment pattern. If you click the **Cancel** button, the **Specify the Range of Images** dialog box closes even if a range is selected.

• The selected range is cleared by clicking the image with a range selected.

#### Restore to Previous button

When this button is clicked, the settings are restored to the defaults when the **Adjustment pattern setting** dialog box was first displayed.

#### Close button

When this button is clicked, the setting values in the **Adjustment pattern setting** dialog box are saved and the dialog box is closed. These setting values are applied the next time the Print Plug-In for Photoshop/Digital Photo Professional is started. Furthermore, if you select the **Update Base Values in the Color Settings Sheet** check box and click the **Close** button, the setting values for the image enclosed in the blue frame in the preview area (central image) are applied to the settings in the **Color Settings** sheet (color or monochrome).

#### • Print Adjustment Pattern button

When this button is clicked, printing the adjustment pattern is executed. The **Adjustment pattern setting** dialog box does not close even after executing the printing.

The adjustment values are printed at the top of each image. If both the **Horizontal Axis** and **Vertical Axis** are configured, the adjustment value for the **Horizontal Axis** is displayed on the right and the adjustment value for the **Vertical Axis** is displayed on the left.

Each of the setting values for the paper type, print mode, and output profile as well as the adjustment values configured in the **Color Settings** sheet (color or monochrome) are printed at the bottom of the paper. However, the adjustment values for the **Curve** are not printed.

 The job name when printing the adjustment pattern is "Original Image Name + Pattern-Print". For example, the print job name for the image "ABC.jpg" is "ABC\_Pattern-Print.jpg".

#### • Maximize Dialog Box button

When this button is clicked, the **Adjustment pattern setting** dialog box is displayed enlarged to cover the entire display screen.

### Paper Detailed Settings Dialog Box

This dialog box appears when you click the **Advanced Settings** button on the **Main** Sheet. You can set **Drying Time** and **Roll Paper Margin for Safety** by media type.

# Roll Paper Margin for Safety

#### Near End Margin

This sets the length of the near end margin of the roll paper.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
5mm	Print at a standard size.
	*Select for Media Type that has no problem when printing with a standard size margin.
20mm	Select this when rubbing against the printhead occurs such as when using paper that tends to curl.

#### Cut Speed

This selects the auto cut speed.

Setting	Details
Printer Default	The settings of the printer operating panel are applied.
Fast	Select this setting if cutting with the Standard setting is not clean.
Standard	Select this setting when you are not experiencing problems.
Slow	This helps prevent adhesive from sticking to the cutter and keeps the cutter sharp if you select it when using adhesive paper.

#### Calibration Value

When calibration has been carried out on the printer, use this setting to choose whether or not to use the results.

Setting	Details	
Printer Default	The settings of the printer operating panel are applied.	
Use Value	The calibration results are used for printing.	

Setting	Details
Disregard Value	The calibration results are not used for printing. Select this option to avoid changes to image color tones during printing due to color calibration.

#### • Mirror

Specify whether to print a mirror image, as needed. Select this option to print a version of the document or image with the left and right sides inverted.

#### Unidirectional Printing

Select this checkbox to prevent problems such as misaligned lines and improve the print quality. However, the printing speed becomes slower.

#### • High-Precision Text and Fine Lines

Print increasing ink impact accuracy, particularly for sharper text and fine lines. However, this takes more time than regular printing.

• When Highest (Max. No. of Passes) is selected as the print mode, High-Precision Text and Fine Lines cannot be selected.

# **Set Configuration Dialog Box**

This dialog box appears when you click the **Set Configuration** button on the **Main** Sheet. You can set the adjustment of image sharpness and image enlargement method.

Set Cor	nfiguration	
Sharpen : 0 (0-500)		
Image Enlargement Method :	Nearest Neighbor	\$
<ul> <li>Perform printing in the backgroup</li> <li>Close Plug-in After Printing</li> </ul>	und	
Output Method		
O Print		
O Save in mail box		
Inbox No. :	1 (1-29)	
Name of data to be saved :		
Print after reception is comp	blete	
Initialize all warning dialog boxe	es	
Defa	ults Cancel O	K)

#### Sharpen

Performs adjustment of the sharpness (outline) settings.

#### Image Enlargement Method

You can select the image enlargement method.

The following settings are available for the image enlargement method.

Setting	Details	
Nearest Neighbor	Performs simple enlargement.	
Bilinear	Performs line vector enlargement.	481
Bicubic	Adjust pixels with calculation of elements such as a color or brightness of neighboring pixels.	

When you place a checkmark here, the plug-in performs printing with the Plug-In in the background.

### Close Plug-in After Printing

When you place a checkmark here, the plug-in closes after printing finishes.

• If printing does not finish correctly because it was canceled or an error occurred, the plug-in does not close.

#### Output Method

You can select the output method.

The following settings are available for the output method.

Setting	Details
Print	Normal printing. The print job data is stored temporarily in the box as the job prints.
Save in mail box	Saves the print data in the mail box. If you select <b>Save in mail box</b> , you must specify <b>Name of data to be saved</b> .
Print after reception is complete	When you place a checkmark here, you can print after saving jobs in the temporary storage space. This cannot be used when <b>Save in mail box</b> is selected.

#### • Initialize all warning dialog boxes

When this is checked, all of the warning dialog boxes that have been set to "Do not show this screen again" become displayed.

# ICC Conversion Options dialog box

This is displayed when an ICC profile is selected in the **Output Profile** list in the **Main** sheet and the **ICC Conversion Options** button is clicked. This allows you to configure detailed color matching related settings.

Conversion Engine:	OS Standard CMM 🛟
	Black Point Compensation
Proof Options	
Simulate Paper	Color

#### Conversion Engine

Selects the conversion engine to use when converting colors.

Adobe CMM needs to be installed in order to use **Adobe CMM**. Refer to Using Adobe CMM (-P.496) for details on how to install Adobe CMM.

#### Black Point Compensation

Check this check box to perform black point compensation. Loss of gradation in dark areas can be improved by performing black point compensation.

482

• This can be used if Adobe CMM is selected as the Conversion Engine.

### Proof Options

Configures settings related to printing press simulation.

The proof options consist of the following settings.

Setting	Details
Simulate Paper Color	Select this when performing paper color simulation.

# **Roll Paper Options Dialog Box**

This dialog box appears when you click the **Roll Paper Options** button on the **Page Setup** Sheet. You can set the roll paper width and perform the auto cut settings.

	Roll Paper Options
Roll Paper Width :	24-in. Roll (609.6mm)
Automatic Cutting :	Available
No Spaces a	at Top or Bottom (Conserve Paper)
0 De	faults Cancel OK

#### Roll Paper Width

This selects the width of the roll media set to the printer.

#### Automatic Cutting

You can set the printer to cut roll paper automatically or print a guideline for cutting. The following settings are available for automatic cutting.

Setting	Details
Available	Each page is automatically cut after it is printed.
None Each page is not cut after it is printed and printing continues without interruption.	
Print Cut Guideline	A print cut guideline is printed after each page and printing continues without interruption.

#### • No Spaces at Top or Bottom (Conserve Paper)

When you place a checkmark here, the print data is printed without margins.

# **Size Options Dialog Box**

This dialog box appears when you click the **Size Options** button on the **Page Setup** Sheet. You can select a media name, size and other settings.

		Size Options
Paper Size List :		Custom Paper Size Name :
Paper Name	Paper Size	sample
• 22"x34" (ANSI D)	22.00 x 34.00	Units

Delete		Add
0		Cancel OK

#### Paper Size List

Displays all the standard sizes and custom media sizes.

### Custom Paper Size Name

You can enter any name up to 63 characters.

#### Units

You can select the units of measure to use when you define custom media size. Switching this setting resets the units of measure for the entire Plug-In.

#### Paper Size

#### Width

Enter the width of the media size.

#### Height

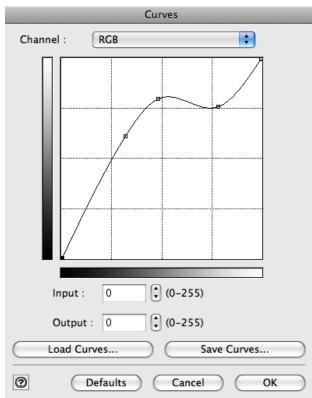

Enter the height of the media size.

#### Add button

Click the button to register the contents of the settings.

#### **Curves Dialog Box**

This dialog box appears when you click the **Curves** button on the **Color Settings** Sheet. You can set **Channel** and other settings.

#### Channel

Note

Select from among RGB, Red, Green, or Blue.

Gray is displayed for monochrome printing and this selection cannot be changed.

# 484

# Input

Enter an input value.

Mac OS X Software

The allowed entry range is 0 to 255.

Note • You can change the numbers by clicking either ▲ button or ▼ button.

#### Output

Enter an output value.

• The allowed entry range is 0 to 255.

#### • Load Curves button

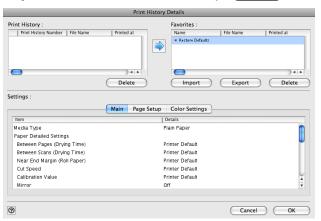

Click the button to load stored data for a tone curve.

#### • Save Curves button

Click the button to stores the current tone curve settings.

# **Print History Details Dialog Box**

This dialog box appears when you click the **Details** button on the **Print History** Sheet. This controls print history. For more information about **Print History Details**, see "Utilize Print History." →P.505

#### • Print History

Print History appears in list format.

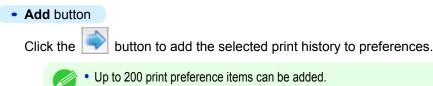

Display Items	Details	
Print History Number	Displays the print history number.	
File Name	Displays image file name.	
Printed at	Displays time and date of printing.	
Comment	Displays comment details.	

• Up to 200 print history items can be displayed. All items above 200 are deleted.

Note • When you cannot print properly because you canceled the printing or an error occurred, appears 🗙 to the left of the print history number.

#### • Delete button

Click the button to delete the selected print history.

#### Favorites

Note

The print history stored in print preferences displays in list format.

You can change the order by selecting an item and dragging it to another place.

Note

# • Import button

Click the button to import print history saved as a file.

#### • Export button

Click the button to save print history as a file that is stored in print preferences.

#### • Delete button

Click the button to delete print history stored in print preferences.

# **Adjust the Colors and Print**

You can adjust the colors to your liking and print images. The explanation below is on 5 ways to adjust the colors using Print Plug-In.

- Adjust the Colors while Checking the Preview (for Color) →P.489
- Adjust the Colors while Checking the Preview (for Monochrome) →P.491
- Adjust the Colors by Color Matching →P.493
- Print High-Quality Adobe RGB16bit Images →P.494
- Using Adobe CMM →P.496

# Adjust the Colors while Checking the Preview (for Color)

You can adjust the colors while checking the adjustments in the preview. The following explanation is on the procedures for adjusting example image below.

- Low for Cyan
- High for Yellow
- Low for Saturation
- Warm Black for Gray Tone
- Enhance brightness for the curves

#### The above image adjustments are reflected in the before and after images below.

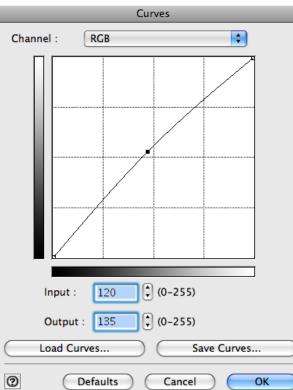

Display the Color Settings sheet.

	imagePRO	GRAF Print Plug-In for Photoshop	)	
	Main Page Setup	Color Settings Print History	Support	
Ĭ		Cyan: -20 ° (-30 - 30) Magenta: 0 ° (-30 - 30) Vellow: 20 ° (-30 - 30) Gray Tone: 20 ° (-30 - 30) Brightness: 0 ° (-30 - 30) Contrast: 0 ° (-30 - 30) Saturation: -20 ° (-30 - 30) Saturation: -20 ° (-30 - 30)	Low Low Cool Black Dark * Low Dark tow Cool Black	High High Warm Black Light High High Curves

Open the Color Settings sheet.

- In **Contrast**, drag the slide bar toward **Low**. 5 In Highlight, drag the slide bar toward Light.
- 6 In Shadow, drag the slide bar toward Light.
  - You can change the numbers by inputting in numerical characters.
  - Note You can change the numbers by clicking either ▲ button or ▼ button.
- 7 Click the **Curves** button then click near the center of the curve.

3

8

Enter 120 in Input and 135 in Output then click the OK button.

9

Click the **Print** button.

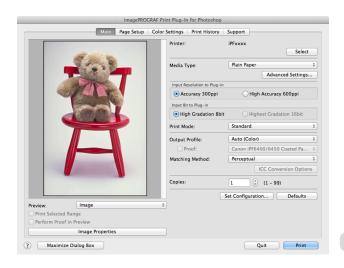

This applies the image adjustments and starts the print job.

# Adjust the Colors by Color Matching

When you print a color image imported from a scanner or a digital camera, the image may appear different from the image on the screen. That is due to the differences in color on the screen and in the printer. In Print Plug-In, you can get the color balance of the print product closer to the color balance displayed on the screen through performing ICC (International Color Consortium) color profile settings, matching method settings, and settings for the internal profile, which performs optimum color conversion in response to media and resolution settings.

Display the Main sheet.

Output : 135

Printing begins with the output profile and matching method that you have set.

# Print High-Quality Adobe RGB16bit Images

This prints a high-quality Adobe RGB16bit image taken with a high-end digital camera. Print Plug-In allows you to print high color gamut and high tone images, when the Adobe RGB16bit image data has been retouched in Photoshop, without compromising the level of tone in the image.

Select the Adobe RGB16bit image data in Photoshop and start Print Plug-In. (See "Starting from Photoshop.") →P.463

- 8 If required, adjust the colors using color matching.
  - For more information about the color matching, see "Adjust the Colors by Color Matching." —P.493 Note
  - Click the Print button.

Printing of the Adobe RGB16bit image begins.

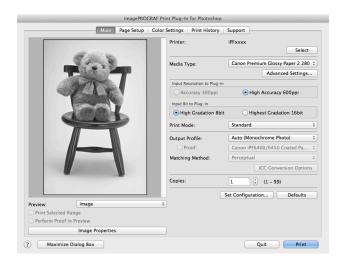

# Prints monochrome photographs with high quality

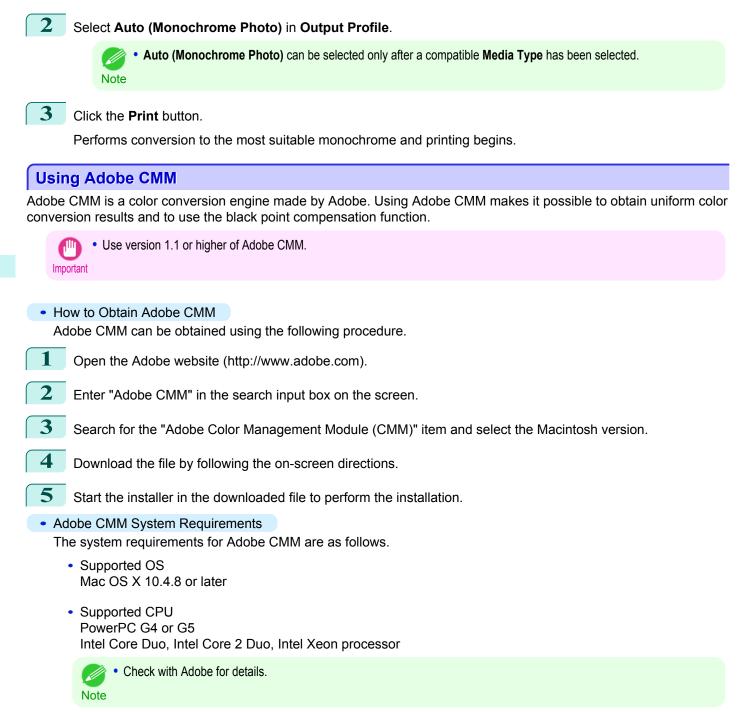

Prints images captured with a scanner or digital camera in monochrome with high quality. Provides stable monochrome photo images without color casts and minimizes the influences of the difference of the light source.

# Printing an Adjustment Pattern and Selecting Adjustment Values

Since you can print an adjustment pattern and select your preferred adjustment values while comparing the images, this allows you to conserve ink and paper, and save the time it takes to repeatedly check adjustment results. The procedure for displaying and printing an adjustment pattern is as follows.

Display the **Color Settings** sheet (color or monochrome) and set the adjustment values to use as the baseline values.

Mac OS X Software

# 2 Click the Adjustment pattern setting button to display the Adjustment pattern setting dialog box.

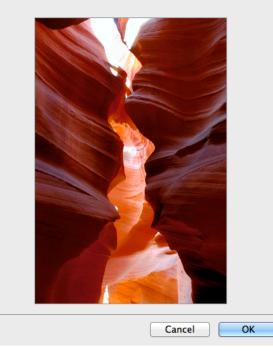

#### Set the Adjustment Item, Number of Patterns, and Adjustment Value Spacing for the Horizontal Axis and Vertical Axis.

If you want to check part of an image as the adjustment pattern, click the **Specify the Range of Images** button, select the range you want to check in the **Specify the Range of Images** dialog box, and then click the **OK** button.

Specify Range of Images

Specify the range of images and then press the OK button.

4	Set Rotate 90 degrees, Pattern Size, Pattern Spacing, and Pattern Background as needed.
5	For the <b>Paper Source</b> setting, select how the paper to print on is to be supplied.
6	For the Use Paper Size setting, select the paper size to print on.
7	Click the <b>Print Adjustment Pattern</b> button. The adjustment pattern starts printing.
Q	Obselv the impression the adjustment wattern that is also at to the suptomer impression and aligh the service and

Check the image in the adjustment pattern that is closest to the customer image and click the corresponding image in the preview area.

3

- 9 If there are any other items that you want to adjust, select **Adjustment Item** and perform steps 7 and 8.
- 10 Once you have made the necessary adjustments, select the Update Base Values in the Color Settings Sheet check box and click the Close button. The previous adjustment values in the Color Settings sheet (color or monochrome) are updated.

# **Perform Black Point Compensation**

Black point compensation that is equivalent to Photoshop can be performed using the following procedure. Use this to avoid saturation in the black areas of images.

- In order to make the black point compensation settings effective, close down and restart Photoshop or Digital Photo Professional.
  - Adobe CMM needs to be installed in order to use black point compensation. Refer to Using Adobe CMM →P.496 for details on how to install Adobe CMM.

Display the Main sheet.

- 2 Select one of the ICC profiles as the **Output Profile**.
- 3 Click the ICC Conversion Options button to open the ICC Conversion Options dialog box.
- 4 Select Adobe CMM as the Conversion Engine.
- 5 Check the Black Point Compensation check box.

5 Configure the **Proof Options** as needed.

- **6** Click the **OK** button to close the **ICC Conversion Options** dialog box.
  - Click the **Print** button. Printing begins.

# **Enlarge/Reduce and Print**

You can enlarge or reduce an image in Print Plug-In. Three methods to enlarge/reduce and print are as follows.

- Enlarge/Reduce and Print Matching Output Media Size →P.501
- Enlarge/Reduce and Print Matching Width of Roll Paper →P.501
- Specify Scaling, Enlarge/Reduce and Print →P.503

500

Mac OS X Software

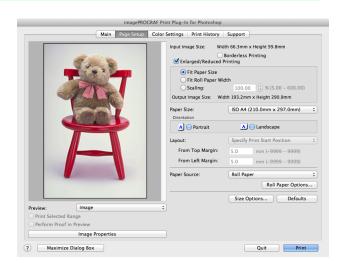

# Enlarge/Reduce and Print Matching Output Media Size

By specifying the media type loaded in the printer, the image can be enlarged or reduced to fit the size of the image area of the media. This feature is useful when you need to print on the full width of Media that you have selected.

• When you need to print on the full width of roll media, see "Enlarge/Reduce and Print Matching Width of Roll Paper." -P.501

2 Select the size of the media that you want to print in **Paper Size**.

This is not displayed when a checkmark is placed in Borderless Printing.

Note • This is not displayed when **Fit Roll Paper Width**is set in **Enlarged/Reduced Printing**.

3 Select either **Portrait** or **Landscape** as the media orientation for the image in **Orientation**.

• When you select **Portrait**, the image on the media prints as it appears on the screen.

Note • When you select Landscape, the image on the media prints rotated 90 degrees.

4 Click the Enlarged/Reduced Printing check box on.

This is not displayed when a checkmark is placed in Borderless Printing.

5 Select Fit Paper Size.

Note

Click the **Print** button.

The image prints filling the entire output media surface.

# Enlarge/Reduce and Print Matching Width of Roll Paper

You can enlarge/reduce and print an image matching the width of the roll paper set in the printer. This is useful when you wish to print an image that covers the entire width of the roll paper.

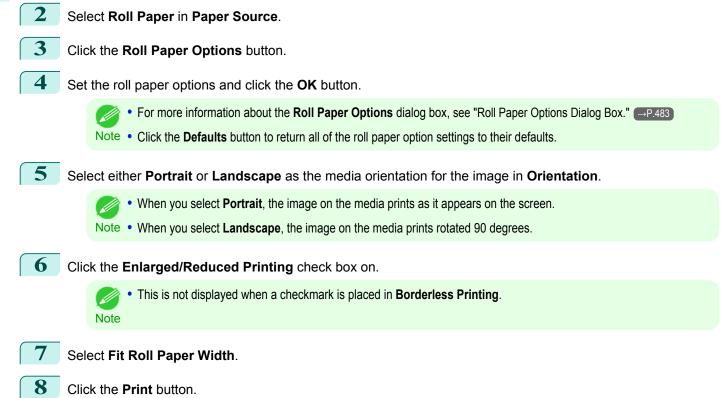

6

• Printing will not occur properly when a print roll is not set to the printer.

# Display the **Page Setup** sheet.

# Specify Scaling, Enlarge/Reduce and Print

You can specify scaling to enlarge/reduce an image and print. This is useful when you wish to print an image at a specific size.

	Maximize Dialog Box     Quit Print
2	Select the size of the media that you want to print in <b>Paper Size</b> .
	<ul> <li>This is not displayed when a checkmark is placed in Borderless Printing.</li> <li>Fit Roll Paper Widthis set in Enlarged/Reduced Printing.</li> </ul>
3	Select either <b>Portrait</b> or <b>Landscape</b> as the media orientation for the image in <b>Orientation</b> .
	<ul> <li>When you select <b>Portrait</b>, the image on the media prints as it appears on the screen.</li> <li>Note</li> <li>When you select <b>Landscape</b>, the image on the media prints rotated 90 degrees.</li> </ul>
4	Click the Enlarged/Reduced Printing check box on.
	• This is not displayed when a checkmark is placed in <b>Borderless Printing</b> . Note
5	Select Scaling and input the scaling factor or drag the four corners of the image in the Preview display.
	<ul> <li>You can specify scaling rate in intervals of 0.01%.</li> <li>You can specify a range between 5.00-600.00%.</li> </ul>
	<ul> <li>The size of the width and height proportionally grow when the image is enlarged/reduced.</li> </ul>
6	Either drag the image on the <b>Print Area Layout</b> preview, or set the print position <b>Layout</b> .
7	Click the <b>Print</b> button. Printing begins at the set scaling rate.

# **Print with No Borders**

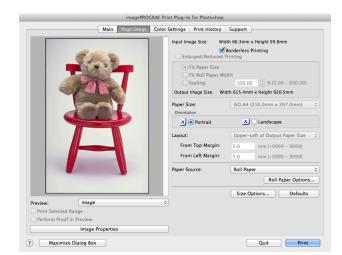

You can use the borderless printing function to print without margins surrounding the image.

Note • To use the borderless printing function, the specified media must be set to the printer.

Display the Page Setup sheet.

# 2 Select Roll Paper in Paper Source.

Click the Borderless Printing check box on.

• Select the width for roll paper set in the printer in **Roll Paper Width** in the **Specify Roll Paper Width** dialog box, and click **OK**.

Specify Roll Paper Width
Scaling the document to fit the roll paper width. Select the roll paper width loaded in the printer.
Roll Paper Width : 24-in. Roll (609.6mm)
Cancel OK

3

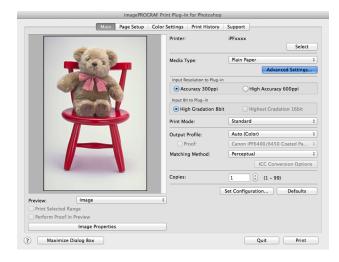

Click the **Print** button.

Borderless printing begins.

# **Customize Media Settings**

You can customize media settings.

Display the Main sheet.

Select the media type that you wish to customize in Media Type.

2

• Always select media type that is actually set in the printer. When the media you chose is different from the media set in the printer, you may not receive the desired print results.

- **3** Click the **Advanced Settings** button.
- 4 Perform the settings in the Paper Detailed Settings Dialog Box →P.480 and click the **OK** button.

## **Utilize Print History**

Note

When you perform various settings and print in Print Plug-In, those settings are saved as print history. Also, you can export and import as files. You can store often-used print history under a specified name in print preferences.

• You can save up to 200 print history items. All items over 200 are deleted in chronological order.

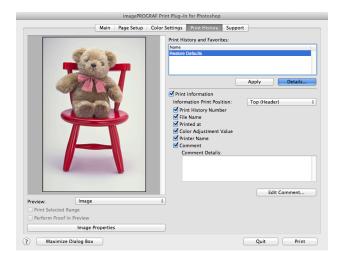

You can do the following things using print history.

- Confirm Print History Details →P.506
- Apply Print History to an Image →P.507
- Store Print History to Print Preferences →P.507
- Delete Print History →P.509
- Export Print History from Print Preferences →P.510
- Import Print History to Print Preferences →P.511
- Delete Print History from Print Preferences →P.513
- Set Information to Print with Image →P.514

# **Confirm Print History Details**

You can confirm the print history details.

## Click the Details button.

• Select the print history you wish to check the details of, from either **Print History** or **Favorites** in the **Print History Details** dialog box.

rint History :				Favorites :

# Set Information to Print with Image

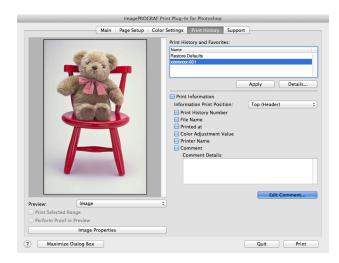

You can print information with an image that is related, such as the file name and the time and date.

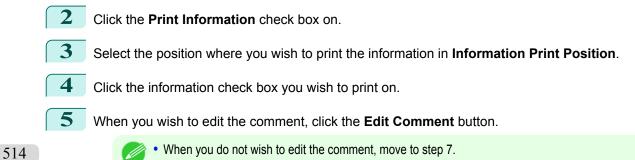

• When you use the borderless printing function to print, the information will not be printed. (See "Print with No Borders.")

- When the printed information is too long as does not fit on the media, a break will appear in the printed information.
- The information may print on the image data with some media sizes, enlargement rates and print position values.
- When Keep Media Size is set to On on the printer, a portion of bottom of the print data is not printed.

Display the **Print History** sheet.

Note

Input the comment in the **Edit Comment** dialog box, and click **OK** button.

# Layout Plug-In for Photoshop

About the Layout Plug-In	516
Layout Plug-In Main Window	
Add Canvas Size dialog box	
Creating and Printing a Layout Image for Mounting on a Frame	

# About the Layout Plug-In

When printing a photo to mount on a frame, you can start the Layout Plug-In from Photoshop and create a layout image where the image extends to the sides of the frame.

- The Layout Plug-In can be used with Photoshop CS5, Photoshop CS4, and Photoshop CS3.
- Note Layout images created in the Layout Plug-In can be printed as-is from the Print Plug-In for Photoshop.

For details on the functionality of the Layout Plug-In, see "Layout Plug-In Main Window."  $\rightarrow$  P.516 For details on how to start and how to use the Layout Plug-In, see "Creating and Printing a Layout Image for Mounting on a Frame."  $\rightarrow$  P.519

# Layout Plug-In Main Window

This window is for creating a layout image for finishing an image extended around the sides of the frame when printing a photo for mounting on a frame.

You can check the details of the settings in the preview area on the left side of the Layout Plug-In Main Window.

	? Defaults	

## Units

516

You can select the units from mm, inches, and pixels.

• Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

#### Select Canvas Size

Selects the canvas size. If **Create the Canvas at the Image Size** is selected, the image size is treated as the canvas size. It is recommended that you provide a canvas that matches the image size.

#### Add Canvas Size button

Click this button to display the Add Canvas Size dialog box and register a Custom Canvas Size. (See "Add Canvas Size dialog box.")  $\rightarrow$  P.518

#### Thickness

Specifies the thickness of the canvas (the width of the canvas sides). Although you can select from 0.75 inches (approx. 19 mm) and 1.5 inches (approx. 38 mm), you can also specify any arbitrary thickness.

• Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

### Amount of Extension

Selecting this check box allows you to configure the amount of extension that protrudes past the canvas sides. This allows you to prevent white paper from appearing on the canvas sides when mounted. The larger the amount of extension, the larger the area hidden behind the back surface.

Since values entered in mm or inches are first converted temporarily to pixels and then reconverted to mm or inches, values may be displayed that differ from the entered values.

#### Thickness Effect

You can select from the following canvas effects.

Image

Wraps the image to the canvas sides.

Soft Image

Performs Gaussian filtering on the image on the canvas sides.

Reflection

Reflects the image on the canvas sides.

Soft Reflection

Reflects the image on the canvas sides and performs Gaussian filtering.

White

Makes the canvas sides white.

Black

Makes the canvas sides black.

Custom Color

Makes the canvas sizes the specified color. The color is specified by clicking the **Select Color** button.

### Add Crop Marks

When this check box is selected, crop marks are printed at the outer edges of the image as guides to the positions to fold the paper when mounting on a canvas.

#### Display Information

Displays the following information.

Input

Displays the original image size before creating the layout image.

#### Finished

Displays the image size of the entire layout image with the canvas sides, crop marks, and the amount of extension added to the input image size.

### Resolution

Displays the resolution of the image. This is not changed from the resolution of the original image. If the image size is changed in the Layout Plug-In, the resolution is maintained the same as the original image, and resampling is performed using the Bicubic method.

If you do not want the number of pixels in the image to change (resample), select **Create the Canvas at the Image Size** in **Select Canvas Size** and select an option other than **Image** and **Soft Image** in **Thickness Effect**.

## Defaults button

Mac OS X Software

Layout Plug-In for Photoshop

Click this button to reset the setting values.

### Close button

When this button is clicked, the Layout Plug-In exits and the current setting values are saved. When the Layout Plug-In is started the next time, the setting values from the previous time are used.

### Execute button

When this button is clicked, the Print Plug-In for Photoshop starts. To print the created layout image, click the **Print** button in the Print Plug-In for Photoshop main window.

• When you close the Print Plug-In, the created layout image is discarded.

Note

• If the Print Plug-In for Photoshop for multiple different models is installed, a screen for selecting the model is displayed when you click the **Execute** button.

- When you close Print Plug-In for Photoshop main window after printing, the Layout Plug-In main window is displayed again.
- If the size of the layout image is larger than the paper size that can be printed by the printer, you should reduce the size of the layout image to the output paper size in advance before printing.

## Add Canvas Size dialog box

This dialog box is displayed when you click the **Add Canvas Size** button in the Layout Plug-In main window. It allows you to register and delete arbitrary canvas sizes (custom canvas sizes).

per Size List:		Custom Canvas Size Nan	ne	
lame	Size	Input Image Size		
<ul> <li>Input Image Size</li> </ul>	180.62 x 270.93	Units		
8" x 10"	203.20 x 254.00	onito		
9" x 12"	228.60 x 304.80	💿 mm		
11" x 14"	279.40 x 355.60	⊖ inch		
<ul> <li>16" x 20"</li> </ul>	406.40 x 508.00

<ul> <li>40" x 60"</li> </ul>	1016.00 x 1524.00	Create the image with	a fixed aspect ratio	
Delete				
• 40" x 60"	1016.00 x 1524.00	Create the image with	h a fixed aspect ratio	

Click the Close button to close the Add Canvas Size dialog box.

### Adding a Canvas Size

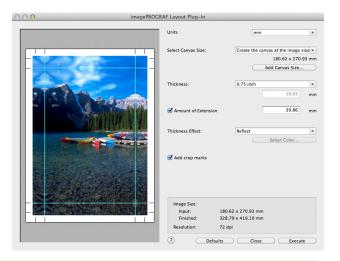

518

Specify the units for the width and height of the canvas size you are adding in Units.

2 Enter the width and height of the canvas size you are adding in Size. When you select a size displayed in the Paper Size List, the values are displayed in the Width and Height in the Size field. When Input Image Size is selected, the size of the input image is used as-is for the width and height of the canvas. Selecting the Create the Image with a Fixed Aspect Ratio check box allows you to create a custom size at the same aspect ratio as the input image. For example, if you change the width, then the height also changes according to the aspect ratio of the input image. 3 Enter the name of the canvas size to add in Custom Canvas Size Name. 4 Click the Add button. Deleting a Canvas Size Select the Custom Canvas Size Name you want to delete from the Paper Size List. Click the **Delete** button. • Sizes that have a red circle in the Name cannot be deleted. Note Creating and Printing a Layout Image for Mounting on a Frame

The procedure for creating and printing a layout image for mounting on a frame is as follows.

- 1 Start Photoshop.
- 2 Open the image to lay out and edit the image in Photoshop as needed.
- 3 Select **imagePROGRAF Layout Plug-In** from **Automate** in the Photoshop **File** menu. Run the Layout Plug-In to display the Layout Plug-In Main Window.

 The Layout Plug-In can handle images with a width and height of less than 60,000 pixels. For images with a width or height of 60,000 pixels or more, either reduce the selection range or reduce the image through image processing before performing step 3. 4 Select the canvas size that matches the frame for mounting the image and create a layout image by adding effects such as frame side effects.

For details, see "Layout Plug-In Main Window." →P.516

• The created layout image cannot be modified in Photoshop.

Important

Once you have finished creating the layout image, run the Print Plug-In for Photoshop and print on paper that is larger than the size of the layout image.

• When you click the **Close** button to close the Layout Plug-In, the created layout image is discarded.

- 6 Mount the printed layout image on the frame.
  - Fully dry the printed paper before mounting it on the frame.

Important • Take care when mounting on the frame. The ink may peel off if you touch the printed surface.

Note

5

 As you fold the printed paper along the frame, the folded areas may crack and reveal the paper underneath, depending on the media type. You can prevent the folded areas from splitting to some degree by using commercially available inkjet protection spray or liquid laminating agent for inkjets before folding.

Displaying the Paper Reference Guide Updating paper information	

# Types of Paper

The following types of paper are supported by the printer. For details on the paper supported by the printer, refer to the Paper Reference Guide. (See Paper Reference Guide.)

- Plain Paper
- Coated Paper
- Photo Paper
- Glossy Paper
- Proofing Paper
- CAD-dedicated Paper Etc.

The following content is described in the Paper Reference Guide.

- Types of paper
- Paper handling
- Paper product specifications
- Use precautions
- Setting of printer driver, control panel etc.

• For more information on how to use paper that is not listed in the Paper Reference Guide,see "Using Paper Other Than Genuine Paper and feed confirmed Paper." →P.525

• Paper Reference Guide display method

You can display the Paper Reference Guide from [imagePROGRAF Support Information]. (See "Displaying the Paper Reference Guide.") →P.527

## Method of Updating Supported Paper

Paper supported by the printer may be newly released on the imagePROGRAF website.

To use newly released paper, register the latest paper information on the printer with the Media Configuration Tool. (See "Updating paper information.")  $\rightarrow P.528$ 

 To install the Paper Reference Guide and register paper types applicable to your region on your printer even when not using the printer driver, install the Media Configuration Tool.

For information about the Media Configuration Tool, see Media Configuration Tool (Windows)  $\rightarrow$  P.582 or Media Configuration Tool (Macintosh)  $\rightarrow$  P.611 .

For details on non-standard paper sizes, see "Printing on Non-Standard Paper Sizes." —P.116

Note • Borderless printing is not supported on sheets.

## Using Paper Other Than Genuine Paper and feed confirmed Paper

When using this printer to print on paper other than genuine Canon paper and feed confirmed paper, use paper that meets the following conditions.

• Refer to Paper Reference Guide for details on genuine Canon paper and feed confirmed paper. (Refer to " Paper Reference Guide")

- Paper where the size is described in "Paper Sizes" (See "Paper Sizes.") →P.522
- Paper where the thickness is described in "Paper Thickness" in "Specifications" (See "Specifications.") →P.934
- Paper where bleeding and ink overflow does not occur when printing
- Paper that does not warp severely when loading the paper or printing

 If you use paper other than genuine Canon paper and feed confirmed paper, Canon provides absolutely no guarantees regarding print quality or paper feed properties. Refer to Paper Reference Guide for details on genuine Canon paper and feed confirmed paper. (Refer to " Paper Reference Guide")

After loading the paper in the printer, select the media type in the control panel and printer driver and then perform the printing. For the media type, you can select easily from existing settings or you can create and use settings for the paper you are using.

## Printing Using Existing Settings

You can print easily by selecting from existing settings provided in the printer control panel and printer driver. (See "Printing on Paper Other Than Genuine Paper and feed confirmed Paper Using Existing Settings.")  $\rightarrow$  P.525

## Printing Using Additional Settings

You can print by using the **Add Custom Paper** function in the Media Configuration Tool to create settings suitable for the paper other than genuine paper and feed confirmed paper you are using and adding these settings as a new media type to the printer control panel and printer driver. (See "Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type.")  $\rightarrow P.526$ 

## Printing on Paper Other Than Genuine Paper and feed confirmed Paper Using Existing Settings

You can easily print on paper other than genuine Canon paper and feed confirmed paper without making complicated settings by selecting existing settings provided in the printer control panel and printer driver depending on the media type you are using. The existing settings consist of general-purpose paper settings provided for each media type and special settings that allow you to select the amount of ink to use.

• The genuine Canon paper settings provided in the printer control panel and printer driver are optimized for genuine Canon paper. If these settings are selected for printing on paper other than genuine Canon paper, the ink may bleed or the printhead may rub against the paper. In order to easily print on paper other than genuine Canon paper and feed confirmed paper, we recommend that you select one of the following general-purpose paper settings or special settings.

Note • For details on how to select the media type in the control panel and printer driver, see "Types of Paper." -P.522

## **Choosing General-Purpose Paper Settings**

Since these settings anticipate a wide variety of paper other than genuine Canon paper and feed confirmed paper, these settings will make it difficult for bleeding ink and the printhead rubbing to occur. Refer to the following table for the relationships between the conditions of the paper other than genuine Canon paper and feed confirmed paper and the media type to select.

Туре	Approximate weight	Approximate thickness	Printer control panel	Printer driver
Plain Paper	70 g/m²	0.09 mm (0.0035 in.)	Plain Paper	Plain Paper
Coated Paper	90 g/m²	0.13 mm (0.0051 in.)	LW. Coated Paper	Lightweight Coated Paper
Coated Paper	170 g/m²	0.22 mm (0.0087 in.)	HW. Coated Paper	Heavyweight Coated Paper
Photo Paper	180 g/m²	0.18 mm (0.0071 in.)	LW. Photo Paper	Lightweight Photo Paper
Photo Paper	260 g/m²	0.26 mm (0.010 in.)	HW. Photo Paper	Heavyweight Photo Paper
Proof	80 g/m²	0.10 mm (0.0039 in.)	News Proof	Newsprint for Proofing
Art Paper	65 g/m²	0.15 mm (0.0059 in.)	JPN Paper Washi	Japanese Paper Washi
Art Paper	200 g/m²	0.35 mm (0.014 in.)	HW. Art Paper	Heavyweight Art Paper
Art Paper	300 g/m²	0.44 mm (0.017 in.)	Ex HW. Art Paper	Extra Heavyweight Art Paper
Sign/CAD Paper	470 g/m²	0.35 mm (0.014 in.)	Bannr Vinyl	Banner Vinyl
Sign/CAD Paper	300 g/m²	0.28 mm (0.011 in.)	Adhesive Vinyl	Adhesive Vinyl
Sign/CAD Paper	240 g/m²	0.18 mm (0.0071 in.)	Glossy Film	Glossy Film
Sign/CAD Paper	150 g/m²	0.11 mm (0.0043 in.)	CAD Clear Film	CAD Clear Film

### Selecting Special Settings

Special settings are provided that allow you to select the amount of ink used in steps. You can fix lackluster colors or bleeding ink by selecting special settings where the amount of ink used is suitable for the paper you are using. The special settings are organized as follows so that they can be used as follows depending on the type of black ink and the media type.

Type of special settings	Type of black ink	Example of applicable paper
"Special 1" to "Special 5"	BK (photo black)	Glossy paper, proofing paper
"Special 6" to "Special 10"	MBK (matte black)	Coated Paper, Matte Paper, Art Paper

"Special 1" and "Special 6" use the least amount of ink, with the amount of ink used increasing through 5 steps as the number increases up to "Special 5" and "Special 10" which use the greatest amount of ink. Although colors become more vivid as the amount of ink used increases, bleeding also occurs more easily. We recommend that you try in order starting from "Special 1" or "Special 6" while checking the state of the printing.

If you cannot obtain sufficiently good image quality by selecting the general-purpose settings or special settings, you can create settings as suitable for the paper you are using by using the "Add Custom Paper" function in the Media Configuration Tool.
 For details, see "Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type." (-P.526)

## Printing on Paper Other Than Genuine Paper and feed confirmed Paper by Adding a Media Type

The **Add Custom Paper** function in the Media Configuration Tool is provided as a method for improving print quality and feed properties over printing paper other than genuine Canon paper and feed confirmed paper using the generalpurpose settings. This can be expected to improve properties such as print quality because it allows you to configure settings such as the maximum amount of ink to use and the height of the printhead depending on the characteristics of the paper you are using. Furthermore, printing can be performed by adding the settings created using this function to the printer control panel and printer driver as a new media type.

For details on Media Configuration Tool, refer as follows.

- Media Configuration Tool (Windows) →P.582)
- Media Configuration Tool (Macintosh) → P.611

Handling and Use of Paper

- For details on how to select the added media type in the control panel, see "Changing the Type of Paper." →P.537
   Important For details on how to select the media type in the printer driver, refer to the following topics. Specifying Paper in the Printer Driver (Windows) →P.174
  - Specifying Paper in the Printer Driver (Mac OS X)  $\rightarrow$  P.360
  - We recommend that you use an ICC profile created using commercially available profile creation software in order to perform color management accurately on paper other than genuine Canon paper and feed confirmed paper. The created ICC profile can be registered to the printer driver and printed. For details, see "Matching Sheet (Windows)."
     —P.189

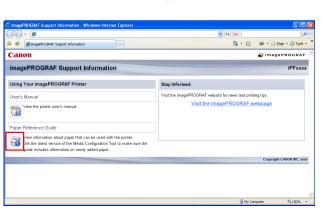

# **Displaying the Paper Reference Guide**

The Paper Reference Guide can be accessed from **imagePROGRAF Support Information**. Follow these instructions, as appropriate for your operating system.

- Windows
  - Double-click the iPFxxxx Support desktop icon. (iPFxxxx indicates the printer model.)

The imagePROGRAF Support Information window is displayed.

2. Click the Paper Reference Guide button.

## Updating paper information

As for paper information of the Paper Reference Guide, printer Control Panel, and printer driver, you can update it to the latest information by downloading and installing the latest version of **Media Information File** (Media Information File) from the imagePROGRAF website.

Download the latest **Media Information File** (Media Information File) after accessing the imagePROGRAF-dedicated site from **imagePROGRAF Support Information**. If you cannot download it, contact your Canon dealer. For details on **Media Information File** (Media Information File), refer as follows.

- Media Configuration Tool →P.582 (Windows)
- Media Configuration Tool →P.611 (Macintosh)

 When your version of Media Configuration Tool is older than the version released on the imagePROGRAF website, download and install the latest version of Media Configuration Tool before installing Media Information File. If you do not install the latest version of Media Configuration Tool before installing Media Information File, the latest paper information cannot be updated.

Feeding Roll Paper Manually Keeping Track of the Amount of Roll Paper Left Specifying the Ink Drying Time for Rolls	. 544
Specifying the Cutting Method for Rolls Cutting the Leading Edge of Roll Paper Automatically Reducing Dust from Cutting Rolls	. 552
Roll Holder Set	697

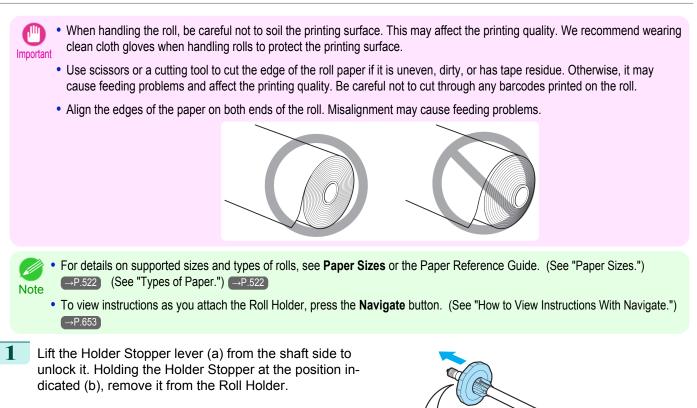

# Attaching the Roll Holder to Rolls

When printing on rolls, attach the Roll Holder to the roll. Rolls have a two- or three-inch paper core. Use the correct attachment for the paper core. The printer comes equipped with the 2-Inch Paper Core Attachment installed.

Using Rolls with a 2-inch Paper Core		Using Rolls with a 3-inch Paper Core	
Roll Holder Side	Holder Stopper Side	Roll Holder Side	Holder Stopper Side
No Attachment Needed	2-Inch Paper Core Attachment	3-Inch Paper Core Attachment #1	3-Inch Paper Core Attachment #2
	E C	R R R R R R R R R R R R R R R R R R R	

• Set the roll on a table or other flat surface so that it does not roll or fall. Rolls are heavy, and dropping a roll may cause injury.

b

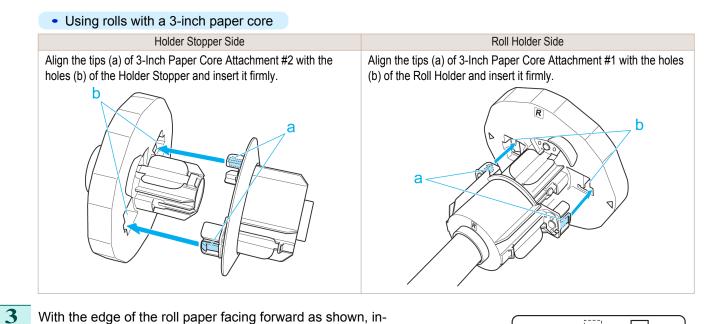

Insert the respective attachments for the roll paper core on the Roll Holder and Holder Stopper.

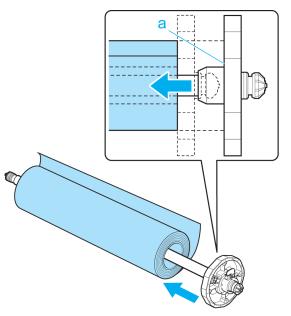

# Using rolls with a 2-inch paper core

	2
Holder Stopper Side	Roll Holder Side
Align the tips (a) of the 2-Inch Paper Core Attachment with the holes (b) of the Holder Stopper and insert it firmly.	No attachment is needed.

2

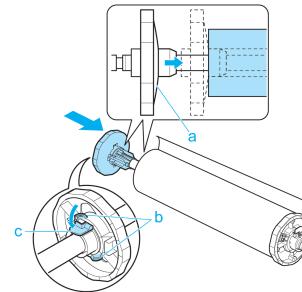

With the edge of the roll paper facing forward as shown, insert the Roll Holder from the right of the roll. Insert it firmly until the roll touches the flange (a) of the Roll Holder, leaving no gap.

Handling and Use of Paper

4 Insert the Holder Stopper from the left in the Roll Holder as shown. Holding it at the position shown (b), push it firmly in until the flange (a) of the Holder Stopper touches the roll. Lock the Holder Stopper lever (c) by pushing it down toward the shaft side.

# Loading Rolls in the Printer

Follow these steps to load rolls in the printer.

Important

 Always load rolls when the printer is on. If the printer is off when you load a roll, the paper may not be advanced correctly when you turn the printer on.

• Before loading a roll, confirm whether the inside of the Top Cover or the Ejection Guide is soiled. If soiled, we recommend cleaning in advance. (See "Cleaning Inside the Top Cover.") →P.861

Press the Load button.

Press ▲ or ▼ to select Load Roll Paper, and then press the OK button.

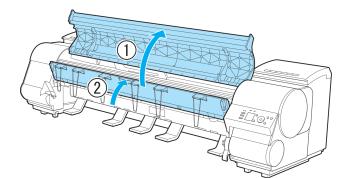

Handling rolls

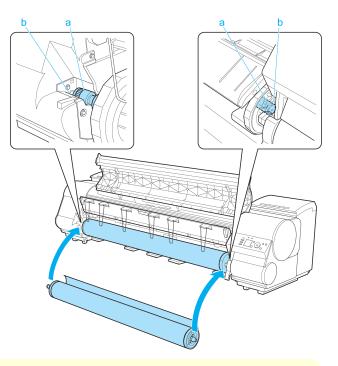

2

iPF9400

**3** Open the Top Cover and lift the Ejection Guide.

4 Holding the Roll Holder so that the side with the white gear faces the side of the Roll Holder Slot with a white gear, load the Roll Holder shaft (a) into the grooves (b) on both ends of the Roll Holder Slot, fully into the slot.

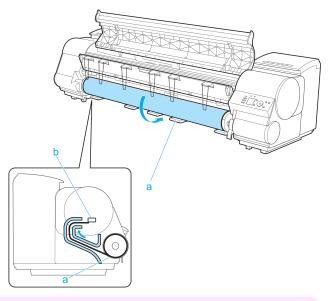

- Be careful not to drop the roll and hurt yourself when loading it.
- Caution Be careful not to pinch your fingers between the Roll Holder shaft (a) and the guide grooves (b) when loading rolls.

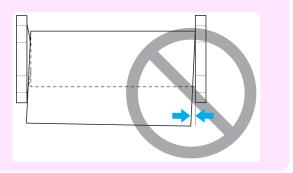

5

Pull out the roll evenly on both ends and insert it in the Paper Feed Slot (a). Advance the roll until it touches the Paper Retainer (b).

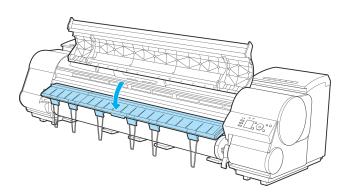

Once the roll reaches the Paper Retainer, it is automatically advanced over the Platen.

- When handling the roll, be careful not to soil the printing surface. Otherwise, it may affect printing quality. We recommend wearing clean cloth gloves when handling rolls to protect the printing surface.
  - If the paper is wrinkled or warped, straighten it out before loading it.
  - For paper that tends to curl, lift the Release Lever and manually pull the roll paper over the Platen.
  - Load paper straight so it is not fed askew.

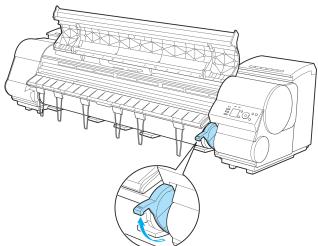

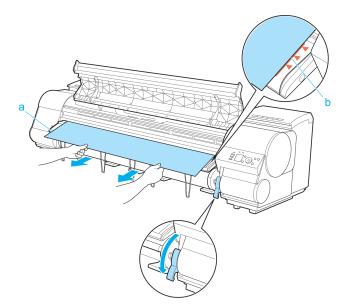

Lower the Ejection Guide.

6

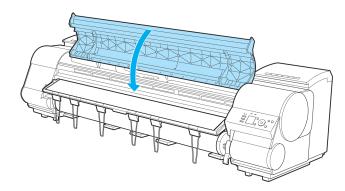

8 Hold the edge of the roll paper as you gently pull it evenly with both hands to the position of the Ejection Guide (a). Align the right side of the roll paper with the Paper Alignment Line (b), keeping this side parallel to the line, and then lower the Release Lever.

- Important
  - Do not omit steps 7 and 8. If paper cannot be advanced straight or if it wrinkles, it may jam or rub against the Printhead.
    - Do not force the roll paper into alignment with the paper alignment line (b). This may prevent the paper from being advanced straight.

You can adjust the strength of suction holding paper against the Platen when the Release Lever is released. If it is difficult to load paper, press the ▲ or ▼ button on the Control Panel to adjust the strength. Set suction stronger by pressing the ▲ button or weaker with the ▼ button. Three settings are available.

9 Close the Top Cover.

# 10 Once paper feeding starts, you will need to do the following, based on the ManageRemainRoll setting and the barcode printed on rolls. (See "Keeping Track of the Amount of Roll Paper Left.") $\rightarrow$ P.544

•	· ·		•		
ManageRemainRoll	Barcodes	Printer Op	eration After the Pap	ber is Fed	
Off	Printed	A menu for selection of the type of paper is shown on the Display Screen. Press $\blacktriangle$ or $\triangledown$ to select the type of paper, and then press the <b>OK</b> button.			
	Not printed				
On	Printed	The type and amount of paper left is auto There is no need to specify the type and			
	Not printed	A menu for selection of the type and length Press $\blacktriangle$ or $\blacktriangledown$ to select the type and length			

- Image: Provide the second second
- Note Adjusting the printhead alignment with the type of paper to be used in printing may enhance printing quality. (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798
  - When paper leading edge detection is set to **Off** for Manual, printing will start at the position at which the roll was set in procedure 8. Thus, the margin of the paper leading edge will enlarge. (See "Specifying the Cutting Method for Rolls.") →P.546

# **Changing the Type of Paper**

Follow these steps to change the type of paper specified on the printer after you have loaded paper. If you will continue using this type of paper later, selecting **Keep Paper Type > On** will save the time and effort of configuring the media type setting when you load the paper again. The current media type settings before you select **On** will be automatically selected at that time. (See "Using the Same Type of Paper Regularly.")  $\rightarrow$  P.538

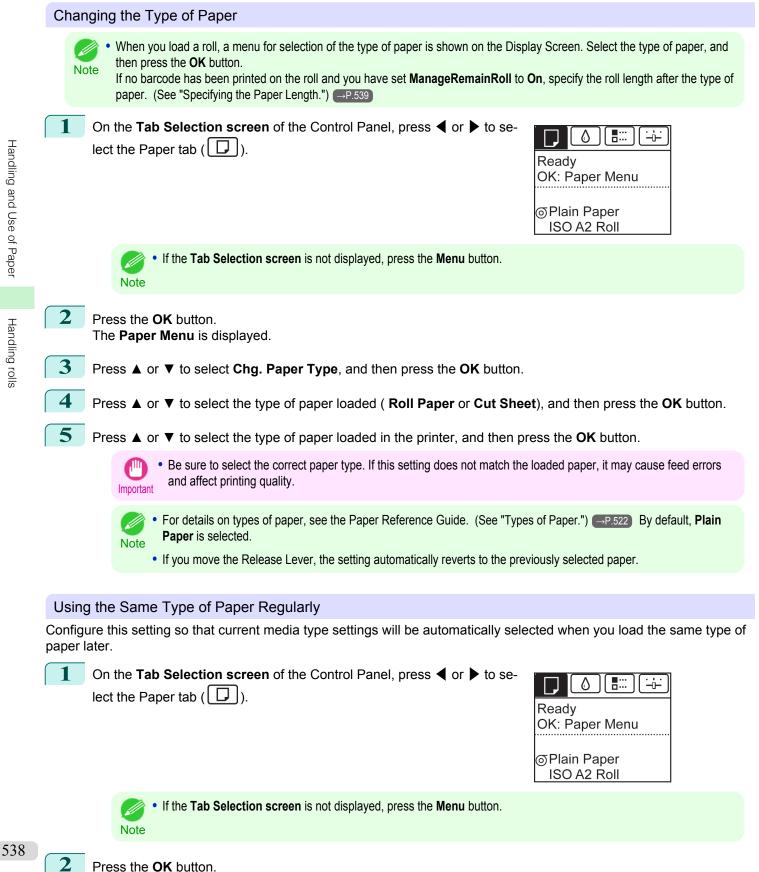

• For best printing results, the printer fine-tunes the print head height and the feed amount for each type of paper. Be sure to select the type of paper to use correctly before printing.

• Because the printer fine-tunes the feed amount for each type of paper, the margins and the size of printed images may vary depending on the type of paper used. If margins and the size of images are not as you expected, adjust the paper feed amount.

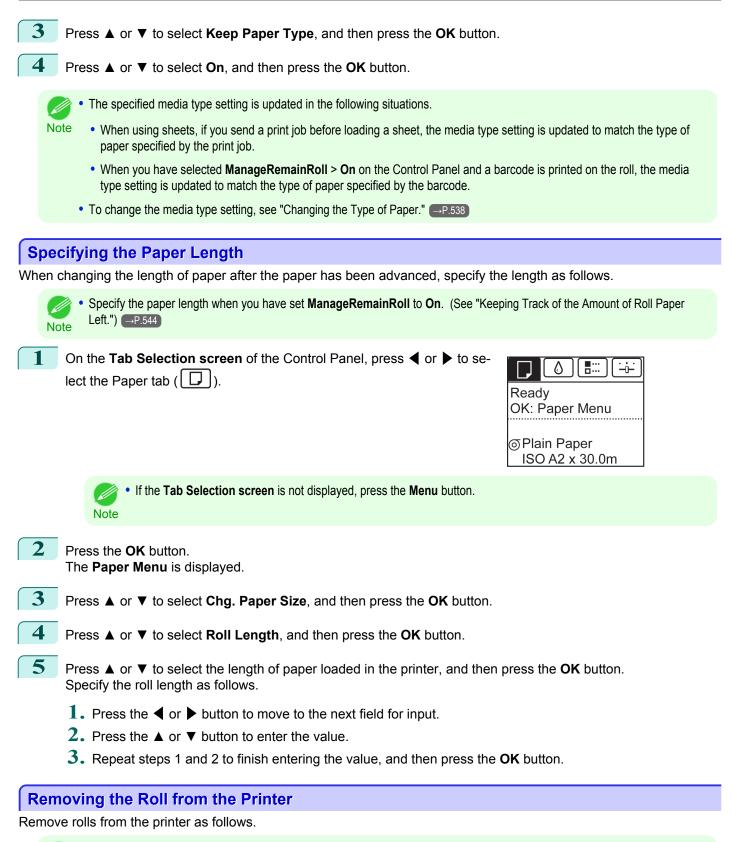

(See "Adjusting the Feed Amount.") →P.805

 Rolls and sheets have different printing areas, and sheets having a larger bottom margin than rolls. (See "Print Area.") →P.935

The Paper Menu is displayed.

Handling rolls

If you need to cut the roll, see "Specifying the Cutting Method for Rolls." →P.546

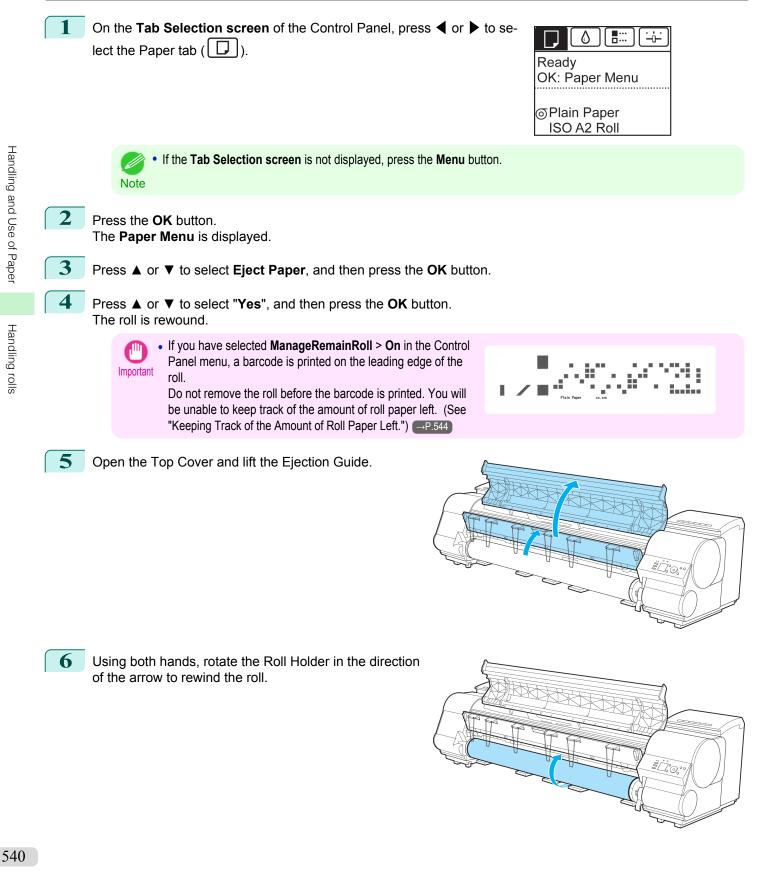

539

Handling and Use of Paper

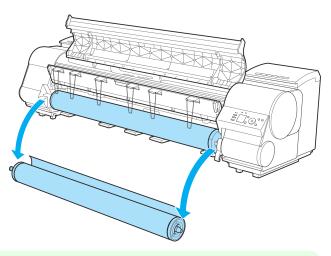

Handling rolls

User's Guide

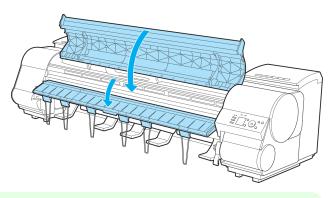

Holding the Roll Holder flange (a), remove the holder from the Roll Holder Slot.

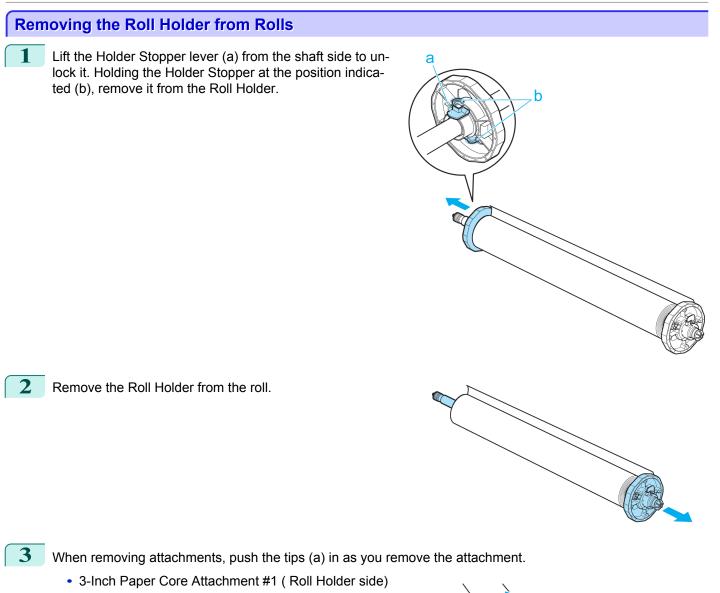

• For instructions on removing the Roll Holder from rolls, see "Removing the Roll Holder from Rolls." —P.542 Note

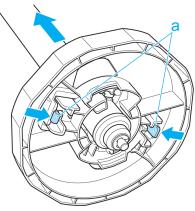

To load new paper in the printer at this point, see "Loading Rolls in the Printer." —P.533

Note • Clean inside the top cover before loading paper. (See "Cleaning Inside the Top Cover.") →P.861

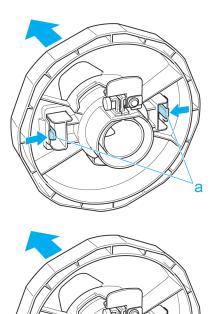

Handling and Use of Paper Handling rolls

dlina rolls

а

3-Inch Paper Core Attachment #2 (Holder Stopper side)

2-Inch Paper Core Attachment

 Store the roll in the original bag or box, away from high temperature, humidity, and direct sunlight. If paper is not stored properly, the printing surface may become scratched, which may affect the printing quality when you use it again.

## Feeding Roll Paper Manually

After a roll has been advanced, you can press the **Feed** button to feed or retract the roll with the ▲ and ▼ buttons.

2

Important

Press the Feed button.

Press the  $\blacktriangle$  or  $\blacktriangledown$  button to advance or retract the roll.

Press  $\blacktriangle$  to retract the roll manually.

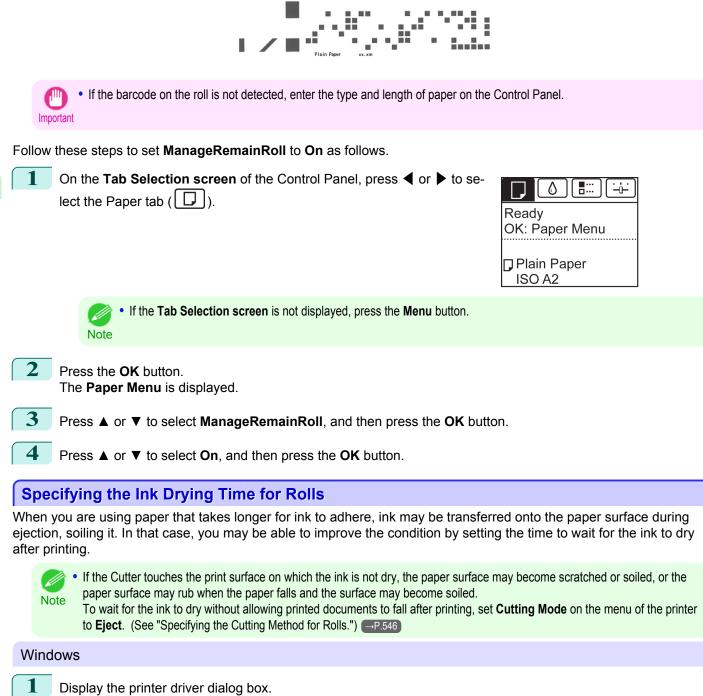

Press ▼ to advance the roll manually.

 If you hold down ▲ or ▼ for less than a second, the roll will move about 1 mm (0.04 in). If you hold down A or V for more than a second, the roll will move until you release the button. Release the button when the Note

Display Screen indicates "End of paper feed. Cannot feed paper more."

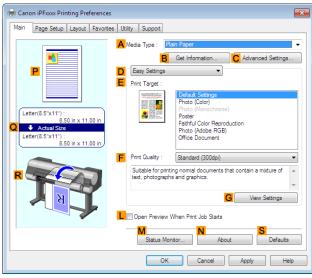

## Keeping Track of the Amount of Roll Paper Left

Setting **ManageRemainRoll** to **On** in the **Paper Menu** of the Control Panel will print a barcode with text on the roll when the roll is removed that identifies the type of paper and amount left. When **ManageRemainRoll** is **On** and you load rolls with printed barcodes, the type of paper and amount left are automatically detected after rolls are loaded. The barcode will be cut off after it has been read.

# Specifying the Cutting Method for Rolls

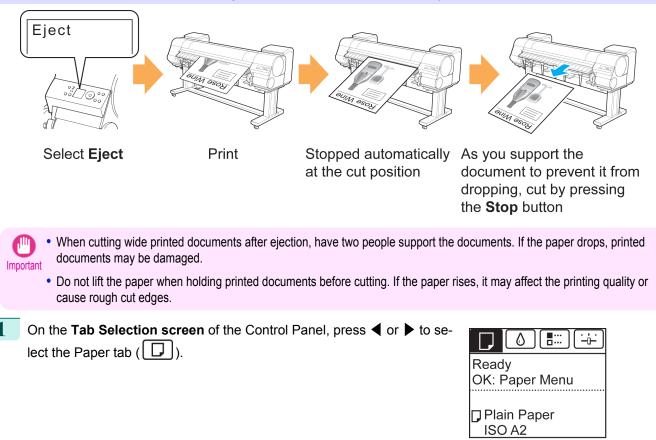

How rolls are cut after ejection varies depending on printer settings.

	Cutting Method	Printer	Setting	Dri	ver Setting
Automatic	The roll is automatically cut by the Cutter Unit following printer driver settings.	Media Menu > Pa-	Automatic	Auto Cut (See "Cut-	Yes
Eject	Select this to move the cutter by key operation and cut paper. Although there are cases with <b>Automatic</b> in which the paper falls and the paper surface is scratched when the paper rubs the Output Stacker, you can avoid damaging the paper with this method since you can cut by holding the paper with your hand so that the paper does not fall when cutting, Also, since you can cut while visually confirming the drying of the ink, you can avoid ejecting paper before the ink has dried. To cut the roll with the Cutter Unit, press the <b>Cut</b> but- ton.	<pre>per Details &gt; (Various Types of Paper) &gt; Cutting Mode</pre>	Eject	ting Roll Pa- per After Printing.") →P.167	Yes
Manual	Select this for paper that cannot be cut with the Cutter Unit and for paper of which the leading edge curls strongly and rubs the printhead. Use scissors to cut each document from the roll after printing. For continuous printing (if you will cut each page later), select <b>Auto Cut</b> > <b>Yes</b> or select <b>Print Cut</b> <b>Guideline</b> .	-	Manual		No Yes Print Cut Guideline
Paper Cut- ting	Choose this option if you want to cut pages by pressing Cutter Unit buttons for manual cutting after printing when <b>Auto Cut &gt; No</b> is selected or <b>Print Cut Guide-</b> <b>line</b> is selected in the printer driver. Otherwise choose this option if you want to cut the roll edge after loading a roll.	Cut button pressed	Yes	_	No Print Cut Guideline

- Automatic and Eject are valid only when you have selected **Auto Cut > Yes** in the printer driver.
- Note With Eject, printing does not resume after a series of jobs have been printed continuously until the roll is cut.
  - **Eject** is the preset selection in **Cutting Mode** for some types of paper. For this paper, we recommend keeping the preset cutting mode.
  - If documents printed using Automatic, Eject, or manual cutting are short, rolls are advanced a specific amount before cutting to prevent problems with cutting and paper ejection. This may create a wider bottom margin, in some cases.

### Cut rolls manually in the following cases:

### Eject (when the paper surface is being scratched / to wait for ink to dry)

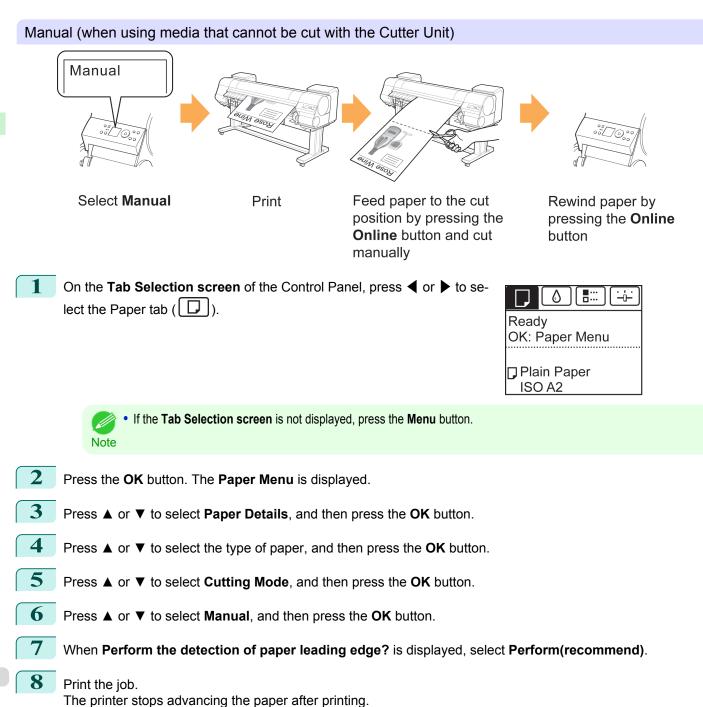

• If the **Tab Selection screen** is not displayed, press the **Menu** button. Note

- **2** Press the **OK** button. The **Paper Menu** is displayed.
- **3** Press  $\blacktriangle$  or  $\triangledown$  to select **Paper Details**, and then press the **OK** button.
- **4** Press  $\blacktriangle$  or  $\triangledown$  to select the type of paper, and then press the **OK** button.
- 5 Press ▲ or ▼ to select **Cutting Mode**, and then press the **OK** button.
- **6** Press  $\blacktriangle$  or  $\checkmark$  to select **Eject**, and then press the **OK** button.

## Print the job. When printing is finished, the printer will stop without cutting.

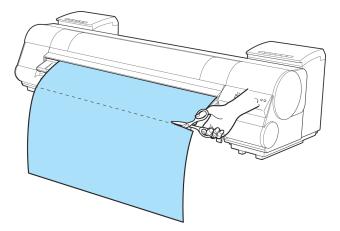

### Press the Feed button.

Roll paper is fed to the specified cut position and then automatically stopped.

10 Cut the roll paper manually with scissors or the like.

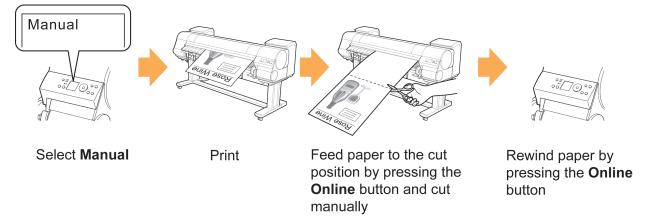

**11** Press the **OK** button.

After the roll is rewound, it stops automatically.

Manual (for paper of which the leading edge rubs the printhead)

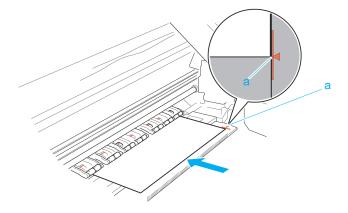

Handling rolls

1	On the <b>Tab Selection screen</b> of the Control Panel, press ◀ or ▶ to select the Paper tab (□).	Ready OK: Paper Menu Plain Paper ISO A2
	• If the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button. Note	
2	Press the <b>OK</b> button. The <b>Paper Menu</b> is displayed.	
3	Press ▲ or ▼ to select <b>Paper Details</b> , and then press the <b>OK</b> button.	
4	Press $\blacktriangle$ or $\checkmark$ to select the type of paper, and then press the <b>OK</b> button.	
5	Press ▲ or ▼ to select <b>Cutting Mode</b> , and then press the <b>OK</b> button.	
6	Press $\blacktriangle$ or $\blacksquare$ to select <b>Manual</b> , and then press the <b>OK</b> button.	
7	When Perform the detection of paper leading edge? is displayed, select	t Do not perform.
	<ul> <li>If you set the detection of paper leading edge to <b>Do not perform</b>, a margin leading edge when printing starts.</li> <li>When the detection of paper leading edge is set to <b>Do not perform</b>, printin was set for the first printing after replacing a roll. Thus, the margin of the part (See "Loading Rolls in the Printer.") -P.533</li> </ul>	g will start at the position at which the roll
8	Press the <b>Feed</b> button.	Massage

**9** Press  $\blacktriangle$  or  $\blacktriangledown$  to align the paper leading edge with the (a) position.

550

Handling and Use of Paper

Handling rolls

## **10** Print the job.

The printer stops advancing the paper after printing.

The printer can continue to receive print jobs from computers. If a print job is received and printed here, it can be
printed without the margin of about 10 cm being created at the paper leading edge.

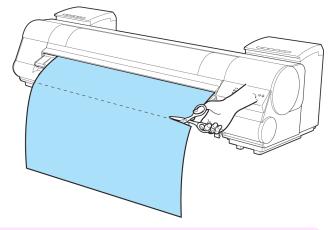

Press the Feed button.

Roll paper is fed to the specified cut position and then automatically stopped.

12 Cut the roll paper manually with scissors or the like.

• Cut at the dotted line printed on the paper. If you cut on the printer side of the dotted line, the paper leading edge may rub against the printhead and may deviate from the paper retainer.

**13** Press the **OK** button.

After the roll is rewound, it stops automatically.

# Paper cutting (to have the roll cut at your specified position)

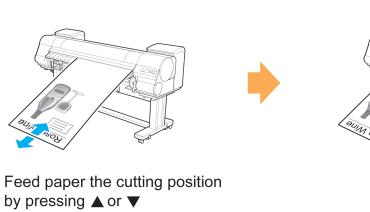

Press the ▼ button to advance the roll to the position

1

2

3

4

Paper Cutting

5

< (OK)

Press the Feed button.

for cutting.

Press ▲ or ▼ to select **Yes**, and then press the **OK** button. After the roll paper is cut, it is rewound automatically.

# Cutting the Leading Edge of Roll Paper Automatically

If the leading edge of the paper is cut crooked or is not cut straight when roll paper is loaded, it will not print correctly. If this happens, you can cut the leading edge of the paper straight when loading a paper roll by using Trim Edge First in the Control Panel menu.

o•• 🖓

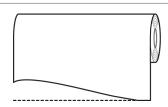

Trim Edge First offers the following options.

## Automatic

If the leading edge of the paper is cut crooked and is not cut straight when loading roll paper, cut the leading edge straight and eject the fragment of paper to prevent printing on the platen and soiling the printer.

552

 $(\mathbf{0})$ 

### • On (Preset Len)

The amount to cut from the leading edge of the paper varies depending on the media type, and is cut to a prescribed length. For more information on the prescribed length, see the leading edge precut length in the Paper Reference Guide. (See " Paper Reference Guide")

### On(Input Length)

The amount to cut from the leading edge of paper is specified in the control panel. The amount to cut from the leading edge can be specified in the range of lengths displayed in the control panel. The range of lengths differs between each media type.

### Manual

The amount to cut from the leading edge of the paper can be adjusted by pressing the  $\blacktriangle$  and  $\lor$  buttons. After making the adjustment, you can cut the paper by pressing the **Paper Cutting** button and selecting **Cut paper**.

After the paper has been cut, press Finish paper set.

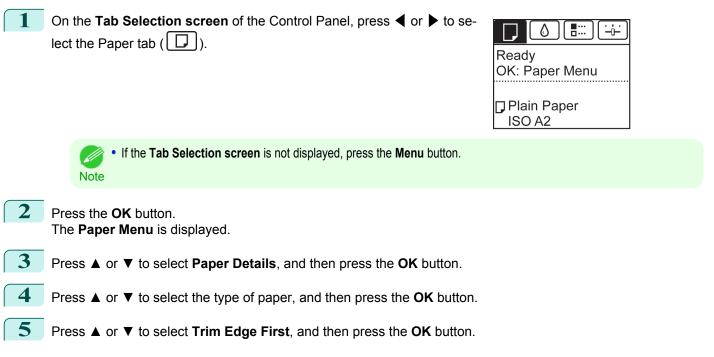

If you do not press Finish paper set after cutting the paper, you will not be able to print again.

Note

#### • Off

The edge is not cut and scraps are not removed.

Follow these steps to change the Trim Edge First setting.

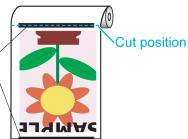

Press  $\blacktriangle$  or  $\triangledown$  to select the desired setting option, and then press the **OK** button. This setting takes effect the next time you load a roll.

## **Reducing Dust from Cutting Rolls**

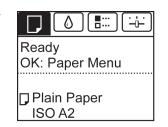

For media such as Backlit Film that are more likely to generate debris when cut, select **CutDustReduct**. > **On** in the **Paper Menu** of the Control Panel. This option reduces debris from cutting by printing black lines at the leading and trailing edges of documents. It may help prevent Printhead damage. You can specify for **CutDustReduct**. to be activated for particular types of paper.

Printed lines for reducing cutting dust

- Do not set **CutDustReduct.** to **On** for paper that wrinkles easily, such as **Plain Paper** or lightweight paper. This may impair cutting and cause paper jams.
  - Borderless printing is not available when CutDustReduct. is set to On. To use borderless printing, select CutDustReduct. > Off.

### Set CutDustReduct. to On as follows.

• If the Tab Selection screen is not displayed, press the Menu button. Note

- 2 Press the OK button. The Paper Menu is displayed.
- 3 Press ▲ or ▼ to select Paper Details, and then press the OK button.
- 4 Press ▲ or ▼ to select the type of paper loaded in the printer, and then press the **OK** button.
- Press  $\blacktriangle$  or  $\lor$  to select **CutDustReduct.**, and then press the **OK** button.
- **6** Press  $\blacktriangle$  or  $\checkmark$  to select **On**, and then press the **OK** button.

# Handling sheets

Loading Sheets in the Printer	555
Changing the Type of Paper Printing From a Desired Starting Point	
Removing Sheets	560
Clearing a Jammed Sheet	881

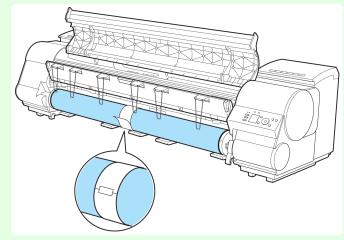

# Loading Sheets in the Printer

Follow these steps to load sheets in the printer.

- Paper that is wrinkled or warped may jam. If necessary, straighten the paper and reload it.
- Important Load the paper straight. Loading paper askew will cause an error.

• To prevent the roll from unwinding if you leave it loaded, wrap a sheet of paper around the roll and tape it.

- Before loading sheets, make sure the printer is clean inside the Top Cover and around the Ejection Guide. If these areas are dirty, we recommend cleaning them in advance. (See "Cleaning Inside the Top Cover.") →P.861
- Store unused paper in the original package, away from high temperature, humidity, and direct sunlight.

Select sheets as the paper source.

• If a print job was received

Sheets are automatically selected, and the media type and size specified by the print job are shown on the Display Screen.

Press  $\blacktriangle$  or  $\triangledown$  to select **Load Paper**, and then press the **OK** button.

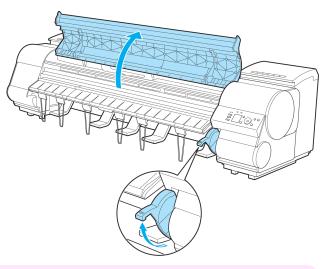

- If no print job was received
  - 1. Press the Load button.

2. Press ▲ or ▼ to select Load Cut Sheet, and then press the OK button.

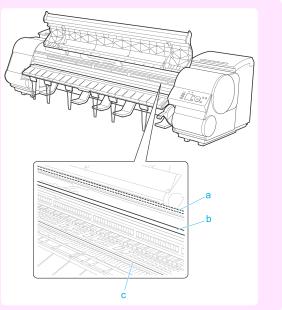

• If any paper has been advanced that will not be used, a message is shown requesting you to remove it. Press ▲ or ▼ to select "Yes", and then press the OK button. Remove the paper and go to the next step.

2 Lift the Release Lever and open the Top Cover.

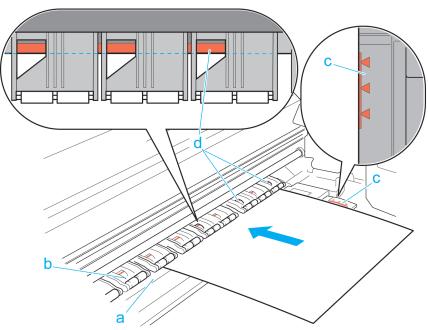

• Do not touch the Linear Scale (a), Carriage Shaft (b), or Fixed Blade (c). This may stain your hands and damage the printer.

3

With a sheet lengthwise and printing-side up, insert it between the Platen (a) and the Paper Retainer (b). Align the edges of the sheet as follows.

- 1. Align the sheet with the Paper Alignment Line (c) at right.
- 2. Align the inserted edge of the sheet with the leading edge of the Paper Alignment Line (d), as shown.

When inserted, sheets are automatically held by suction against the Platen.

• Load a sheet so that it is parallel to the Paper Alignment Line at right (c). Loading paper askew will cause an error.

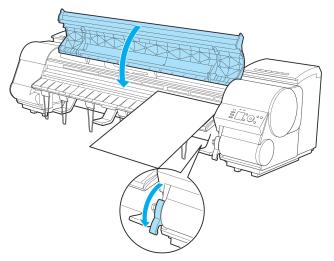

Important • Warped paper may rub against the Printhead. Straighten paper if it is warped before loading it.

You can adjust the strength of suction holding paper against the Platen when the Release Lever is up. If it is difficult to load paper, press the ▲ or ▼ button on the Control Panel to adjust the strength. Set suction stronger by pressing the ▲ button or weaker with the ▼ button. Three settings are available.
 However, even if you increase the suction, it may not be sufficient to hold some types of paper against the Platen well. In this case, use your hand to load the paper.

- Sheets are held in place by suction through holes on the Platen. Although the suction may produce a noise when paper is loaded in some positions, it does not indicate a problem. If the noise is distracting, try moving the paper over slightly to the left or right (up to 1 mm [0.039 in]) while keeping it parallel to the Paper Alignment Line.
- The suction remains on for about 30 seconds during loading. If you cannot finish loading a sheet during this time, pull the sheet away and reinsert it to start the suction again.

4 Lower the Release Lever and close the Top Cover.

- If a print job was received Pressing the **OK** button will advance the paper, and then printing will begin.
- If no print job was received

A menu for selection of the type of paper is shown on the Display Screen. Press ▲ or ▼ to select the type of paper, and then press the **OK** button. The printer now starts feeding the paper.

- For details on types of paper to select, see the Paper Reference Guide. (See "Types of Paper.") →P.522
- Note When using the Output Stacker, if you will print on large, stiff sheets, we recommend adjusting the Output Stacker into the lowest position to prevent printed sheets from being bent. (See "Using the Output Stacker.") →P.564

## **Printing From a Desired Starting Point**

Print on sheets from a desired starting point as follows.

### Set Width Detection to Off

Note

Press the **OK** button.

The Paper Menu is displayed.

2

4

558

On the Tab Selection screen of the Control Panel, press 4 or b to select the Paper tab ( $\square$ ).

If the Tab Selection screen is not displayed, press the Menu button.

Press ▲ or ▼ to select **Paper Details**, and then press the **OK** button.

ISO A2 Roll

**6** Press  $\blacktriangle$  or  $\checkmark$  to select **Off**, and then press the **OK** button.

Load paper in the desired position to start printing from

Follow these instructions to load paper at the desired starting position for printing when Width Detection is Off.

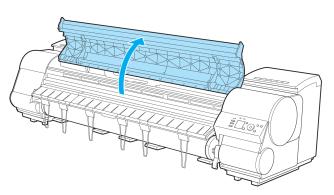

If you did not send a print job in advance, a menu for selection of the type of paper is displayed. Press  $\blacktriangle$  or  $\triangledown$  to select the type of paper, and then press the **OK** button.

If a print job was received before paper was advanced, the media type and size specified by the job are shown on the Display Screen.
These this even is not displayed. On the stars 0.

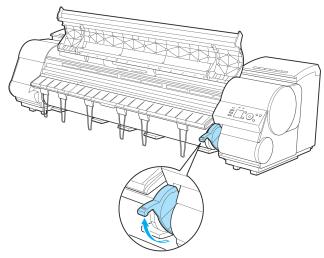

Thus, this screen is not displayed. Go to step 2.

- 2 "Width Detection OFF. OK to continue?" is now shown on the Display Screen. Press ▲ or ▼ to select "Leave OFF", and then press the OK button.
  - 3 After a menu for selection of the paper size is displayed, press ▲ or ▼ to select the paper size, and then press the **OK** button.
- 4 Open the Top Cover and check the position where paper is loaded.

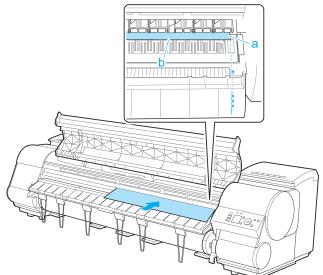

To start printing from the current position, close the Top Cover.

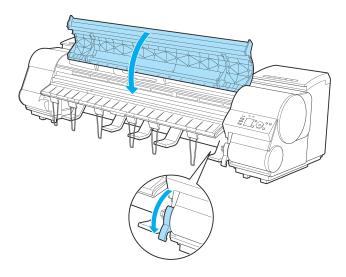

To reposition the paper, lift the Release Lever.

5 Keeping the right edge of the paper aligned with the extended line of the paper alignment line (a) on the right side of the printer and the position from which to start printing aligned with the groove (b) at the far end of the platen, load the paper.

Lower the Release Lever and close the Top Cover.

# **Removing Sheets**

Remove sheets from the printer as follows.

Ready OK: Paper Menu

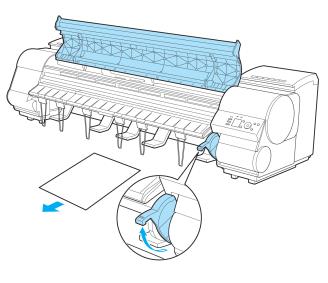

☐ Plain Paper ISO A2

• If the Tab Selection screen is not displayed, press the Menu button. Note

2 Press the **OK** button. The Paper Menu is displayed.

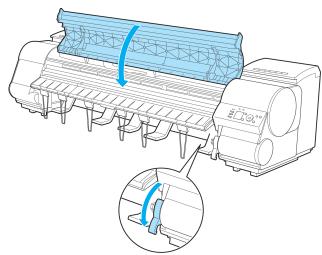

560

- 3 Press ▲ or ▼ to select **Eject Paper**, and then press the **OK** button.
- 4 Press  $\blacktriangle$  or  $\blacktriangledown$  to select "Yes", and then press the OK button. The paper is ejected from the front of the printer.
- 5 Open the Top Cover, lift the Release Lever, and remove the sheet.

6

Lower the Release Lever and close the Top Cover.

Handling sheets

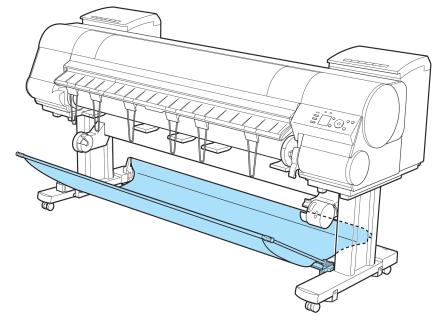

# **Output Stacker**

Output Stacker	562
Parts of the Output Stacker	563
Using the Output Stacker	564
Storing the Output Stacker	568

# **Output Stacker**

A cloth tray that catches ejected documents. (Optional)

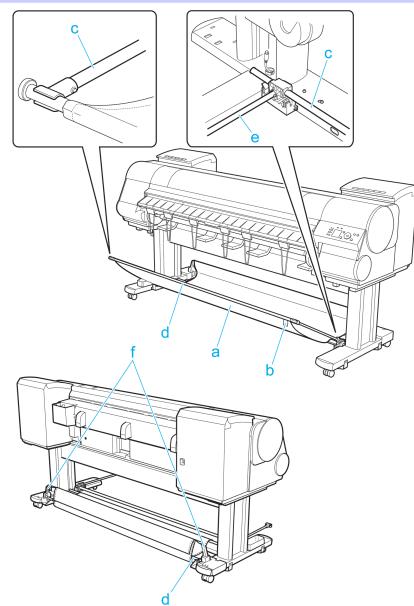

Output Stacker BU-01

• For more information on how to attach the Output Stacker, refer to the Setup Guide.

## Parts of the Output Stacker

#### a Output Stacker

A cloth tray that catches ejected documents.

**b** White tag

A point of reference for attaching the Output Stacker in the right direction.

**c** Basket Arm R and Basket Arm L

Holds the Basket Rod (tag side) attached to the Output Stacker. When the Output Stacker is not used, push it down and store it next to the Stand Leg.

d Basket Rod (tag side) and Basket Rod (cord side)

Holds the cloth Output Stacker securely in specific positions.

## e Basket Rod

Keeps Basket Arm R and Basket Arm L at the same angle.

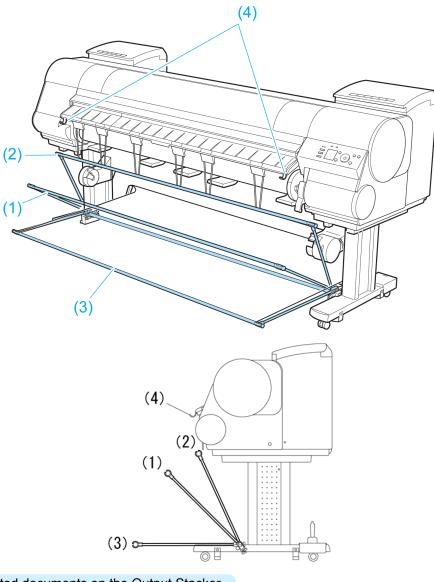

### f Rod Holder

Holds the middle of the Basket Rod (cord side).

Output Stacker

# Using the Output Stacker

The Output Stacker can be held at four positions, as shown.

- When storing printed documents on the Output Stacker Use position (1).
- When the Output Stacker is not used Use position (2).
- When the Media Take-up Unit is used, or when the Output Stacker is stored for long periods
   Lower it to position (3) for storage. (See "Storing the Output Stacker.") →P.568
   When using the Output Stacker again after storage, reattach the Basket Rod on the front of the Output Stacker to
   the tips of the left and right basket arms and pull it out completely.

• When printing on large, stiff sheets

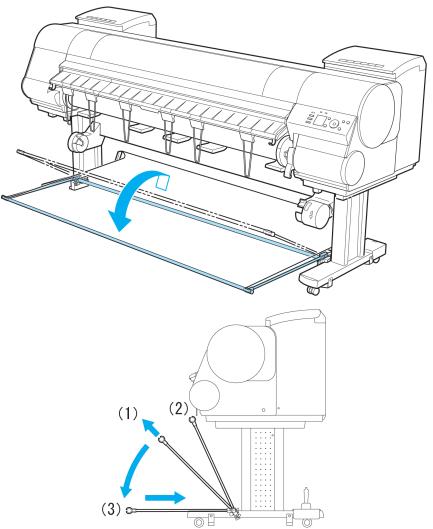

Use position (3).

564

Set it to position (4) when printing banners or when printing on delicate paper. (See "Using the output stacker for ejection in front.")  $\rightarrow$  P.565

- When storing printed documents on the Output Stacker, always use it in position (1). If you do not, printed documents may not be dropped into the Output Stacker, and the printed surface may become soiled.
  - The Output Stacker can hold one sheet. When printing multiple pages, remove each sheet after it is printed.
  - Before using the Output Stacker, remove the Rewind Spool. If you do not, it may prevent printed documents from being held correctly, and they may be scratched.
  - The Output Stacker can hold roll paper up to 84 inches (2133.6 mm) long. When printing longer documents, adjust the stacker of or ejection in front or use the Media Take-up Unit (option).

The Output Stacker locks into position if you lift it to position (1) or (2). To lower the Output Stacker, lift the front Basket Rod lightly to release the lock, and then lower the stacker.

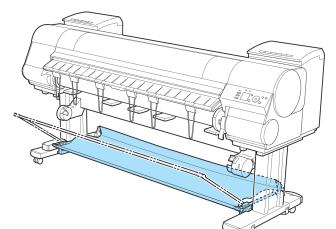

Using the output stacker for ejection in front

You can also set the stacker to the following position when printing banners or when printing on delicate paper.

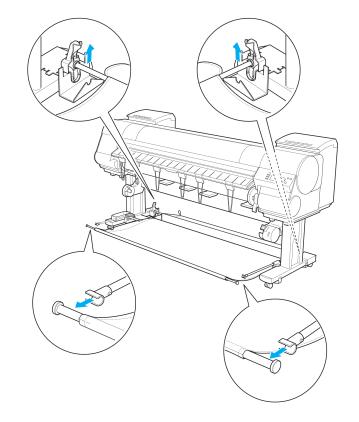

Output Stacker

- When using the stacker for ejection in front, always select **Cutting Mode** > **Eject**. Selecting **Automatic** may damage printed documents. (See "Specifying the Cutting Method for Rolls.")  $\rightarrow$  P.546
  - During ejection in the front of the printer, be especially careful when using delicate paper or paper that curls easily.
  - Depending on the type of paper, the edge may curl or bend during ejection. In this case, straighten out the paper. If the paper is curled or bent, it may damage printed documents.
  - Some types of paper may get caught between the Ejection Guide and Output Stacker during ejection. In this case, free the paper from where it is caught. If the paper is caught, it may damage printed documents.

Lift the Basket Rod gently to release the lock, lower the stacker toward the front, and push it back.

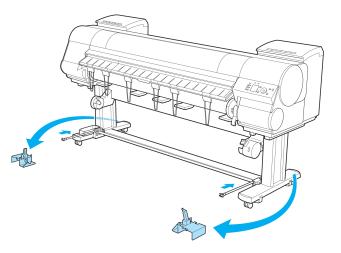

2 Remove the Output Stacker from the printer. Remove the front Basket Rod from the left and right basket arms, and remove the back Basket Rod and black cord from the Rod Holder.

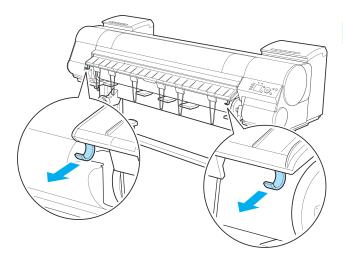

4

tion Guide.

3 Stow the left and right basket arms. Next, with the Rod Holder still attached, remove the Rod Holder Adapter and put it in front of the printer.

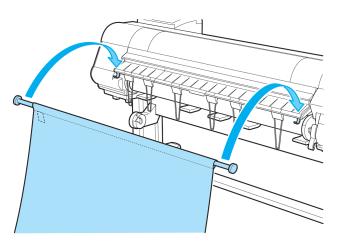

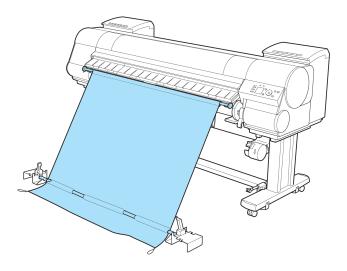

5

Attach the Basket Rod to the Basket Hooks so that the white tag of the Basket Cloth is on the left.

Pull out the left and right Basket Hooks from the Ejec-

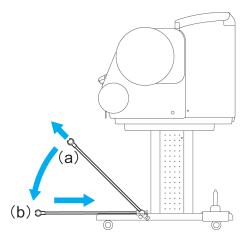

**6** Form the Basket Cloth into a sloping shape to make it taut, and attach the middle Basket Rod to the Rod Holder.

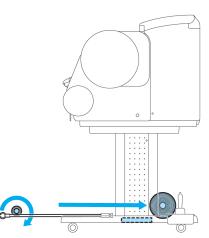

## Storing the Output Stacker

Stow the Output Stacker if you will use the Media Take-up Unit or if you will not use the Output Stacker for an extended period.

When the Output Stacker is in the position used when storing printed documents (a), lift the front Basket Rod gently to release the lock, lower the stacker toward the front (b), and push it all the way back.

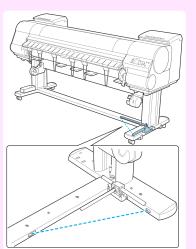

1

Handling and Use of Paper

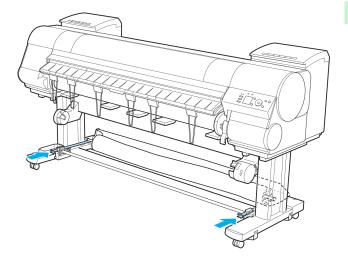

2 Remove the front Basket Rod from the left and right basket arms. Roll up the Basket Cloth and put it at the back of the Bottom Stand Stay. 3

Output Stacker

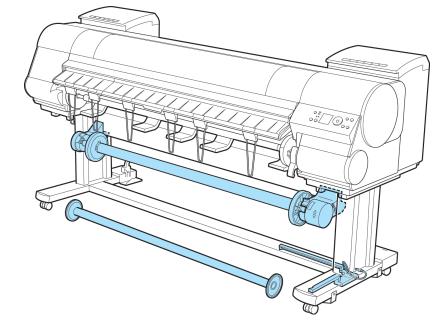

Push in the left and right basket arms toward the back all the way, until they stop.

Media Take-up Unit	570
Using the Media Take-up Unit	
Enabling Roll Take-Up Disabling Roll Take-Up	
Loading the Rewind Spool on the Media Take-up Unit	
Removing Printed Documents from the Media Take-up Unit	. 579

# Media Take-up Unit

Use the Media Take-up Unit to have documents that are printed on rolls rewound automatically after printing. This is convenient for large-format printing, or when printing large-volume jobs continuously.

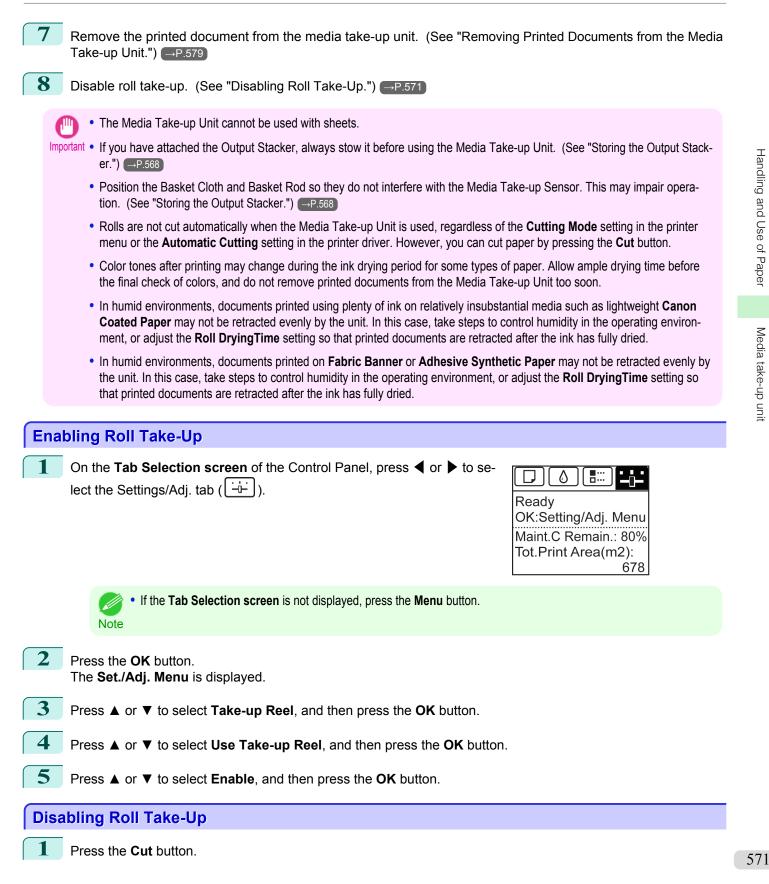

- For more information on how to attach the Media Take-up Unit, refer to the Setup Guide.
- Note For information on the types of paper compatible with the Media Take-up Unit, refer to the Paper Reference Guide. (See "Types of Paper.") →P.522
  - For Media Take-up Unit instructions, see "Using the Media Take-up Unit." →P.570

## Using the Media Take-up Unit

- Turn the printer on. (See "Turning the Printer On and Off.")  $\rightarrow$  P.21
- 2 Enable roll take-up. (See "Enabling Roll Take-Up.") →P.571
- 3 Load the rewind spool on the media take-up unit. (See "Loading the Rewind Spool on the Media Take-up Unit.") →P.572
- 570

- Turn on the Media Take-up Unit.
- 5 Print on the roll.
  - Turn off the Media Take-up Unit.

Media take-up unit

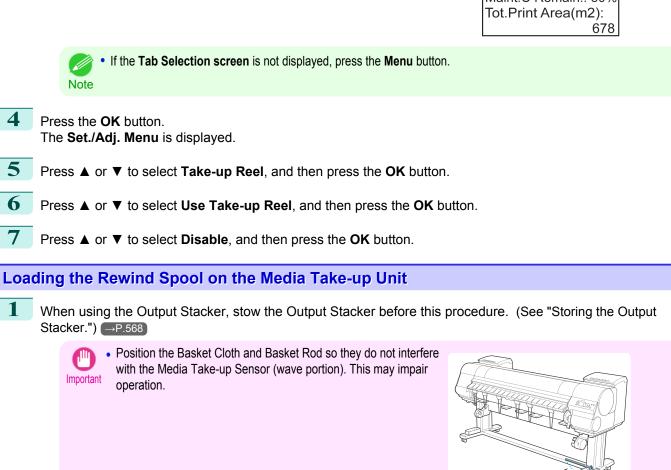

• The printer will also switch from take-up mode to regular mode if you lift the Release Lever and cut the roll with scissors instead of pressing the Cut button.

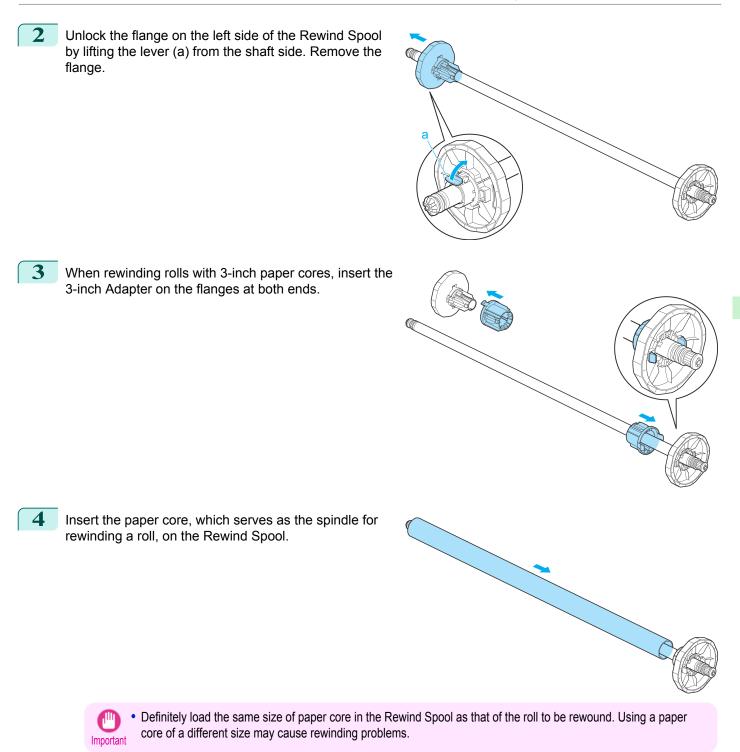

3 On the Tab Selection screen of the Control Panel, press 4 or b to select the Settings/Adj. tab (

OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2):

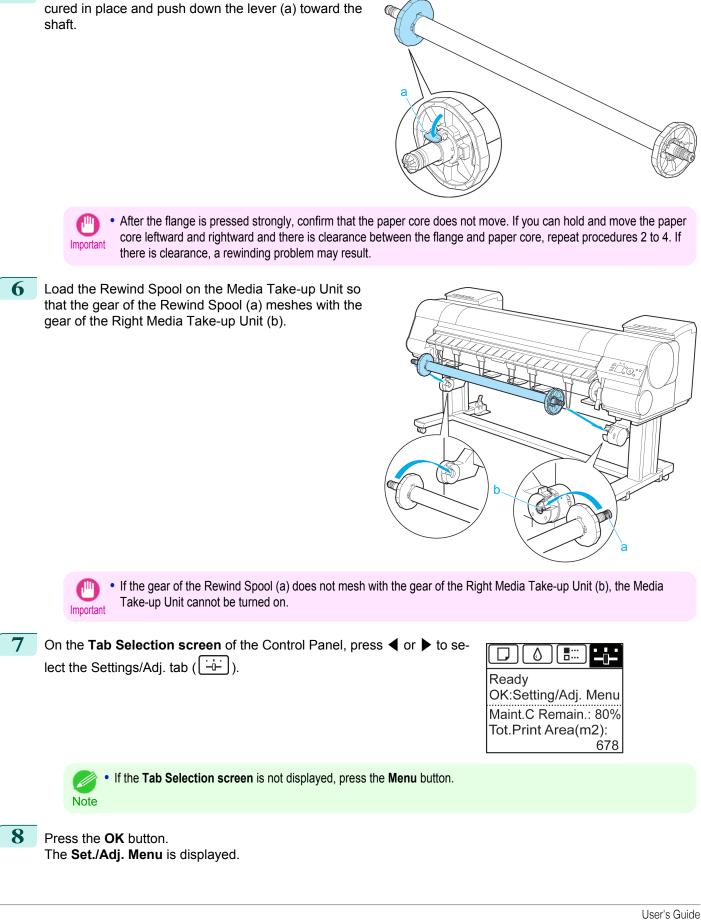

Push the flanges in firmly until the paper core is se-

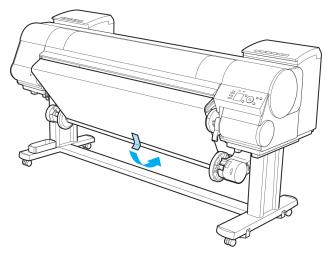

5

Handling and Use of Paper

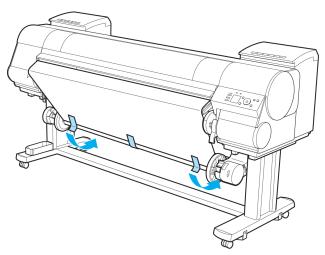

Media take-up unit

- 9 Press ▲ or ▼ to select Take-up Reel, and then press the OK button.
- **10** Press ▲ or ▼ to select **Auto Feed**, and then press the **OK** button. The roll is now advanced to the Media Take-up Unit.
- **11** Hold the roll paper by the middle of the leading edge and align the right edge with the right edge of the paper core of the Rewind Spool. With the left and right edges of the roll paper evenly taut, tape the middle to the paper core to fasten it.

**12** Making sure the roll paper is not slack, tape the left and right side of the leading edge to the paper core.

 When rewinding heavyweight paper, use strong adhesive tape to fasten it. Otherwise, a rewinding problem may result. **13** Press the ▼ button to make the roll a little slack.

14 On the Right Media Take-up Unit, pull the Rewind

to rewind the roll so that it is nearly taut.

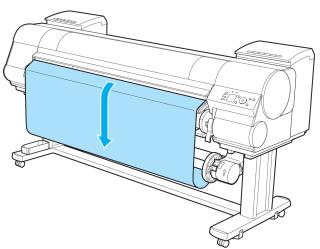

Mode Switch forward to turn it on. Press the ▼ button

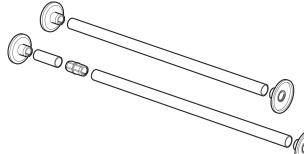

Umportant

- Rewind the paper so that the paper core makes at least two revolutions. If the paper is not rewound two full revolutions, repeat steps 13 and 14.
- Do not manually force the Rewind Spool or paper core to rotate them. This may damage them. To rewind or unwind rolls, press ▲ or ▼ on the Media Take-up Unit.

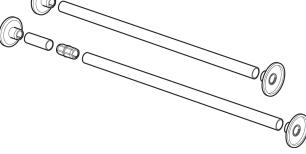

**16** Refer to the following table and securely insert the Weight Flange and Weight Joint suitable for the type and width of roll into the Weight Roll.

> The following list identifies Weight Roll and Weight Flange you can use. A Color Label is applied to each Weight Roll.

#### Weight Roll

Roll Width	Weight Roll to Use
B2 Width: 515.0 mm (20.3 in)	D
B1 Width: 728.0 mm (28.7 in)	A+E
B0 Width: 1,030.0 mm (40.6 in)	A+G
A1 Width: 594.0 mm (23.4 in)	E
A0 Width: 841.0 mm (33.1 in)	B+E
431.8 mm (17 in)	С
609.6 mm (24 in)	E
762.0 mm (30 in)	B+D
914.4 mm (36 in)	G
1,066.8 mm (42 in)	C+E
1,117.6 mm (44 in)	D+E
1270.0 mm (50 in)	D+F
1371.6 mm (54 in)	E+F
1524.0 mm (60 in)	E+G

Roll Type	Weight Flange to Use
Canon Premium Glossy Paper 2 280, Semi-Glossy Photo Paper, Canon Premium Glossy Paper 2 280, Heavy- weight SemiGlossy Photo Paper, Fine Art Photo, Fine Art Heavyweight Photo, Fine Art Textured, Canvas Matte, Canon Proofing Paper, Canon Coated Paper, Canon Heavyweight Coated Paper, Extra Heavyweight Coated Paper, Colored Coated Paper, Adhesive Synthetic Paper, Synthetic Paper, Backprint Film, Backlit Film, Canon Flame-Resistant Cloth, Fabric Banner, Thin Fabric Banner	Weight Flange 1 (*1)
Premium Matte Paper	Weight Flange 2

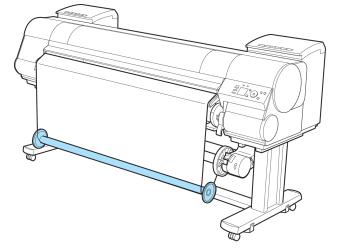

- \*1: If you cannot retract stiff paper well using Weight Flange 1 or if the diameter of the retracted paper is wider than the Rewind Spool, use Weight Flange 2. When using Weight Flange 2, adjust the paper feed amount by executing **Auto(GenuinePpr)** or **Auto(OtherPaper)**. (See "Automatic Banding Adjustment.") → P.806
  - 🍈 Do i
    - Do not use combinations other than those identified here.
  - Important Insert the Weight Flange and Weight Joint firmly on the Weight Roll.
    - Use identical Weight Flange on the left and right ends. Insert matching Weight Flanges (1 or 2) on both ends of the Weight Roll.

• Keep unused weight rolls, weight joints, and weight flanges handy by putting them in the box and putting the box under the Stand .

**17** Set the Weight Roll gently on top of the slack in the roll paper.

The media take-up unit is now ready for use. Printed rolls can now be rewound automatically.

- Always set the Weight Roll on the paper. Failure to do this may cause rewinding problems.
- Important When setting the Weight Roll on the paper, avoid touching the paper core and causing the wound roll to become misaligned on the left and right end. If it is misaligned on the left and right ends, a rewinding problem may result.

When the media take-up unit is in use, an icon indicating the take-up mode is shown on the Display Screen.

1

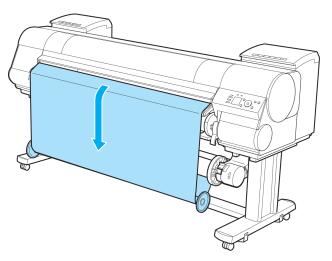

3

## Removing Printed Documents from the Media Take-up Unit

Press the Feed button.

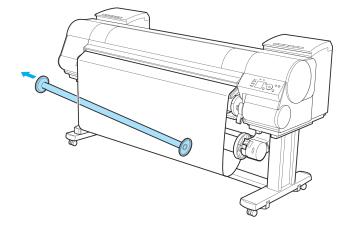

2 Hold down the ▼ button to advance the roll a little. To protect the paper that has been rewound, advance it an amount longer than the outer circumference.

Remove the Weight Roll from the roll paper.

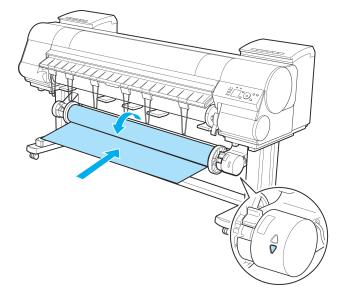

• Always hold the trailing edge of printed documents when cutting rolls. If you do not hold the documents, they may fall on the floor and the printed surface may become soiled.

Hold the trailing edge of the printed document and press the ▼ button on the Media Take-up Unit to rewind the printed document.

Apply adhesive tape to the rewound paper to hold it in place, if necessary.

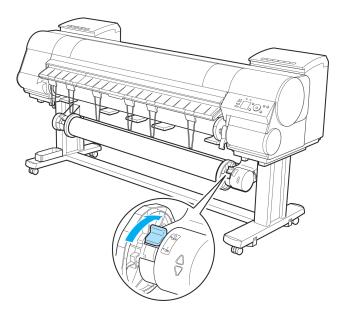

7

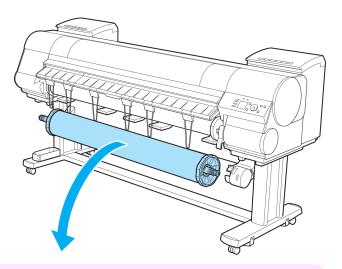

• Be careful not to scratch the printed surface.

Turn off the Media Take-up Unit by pushing in the Rewind Mode Switch.

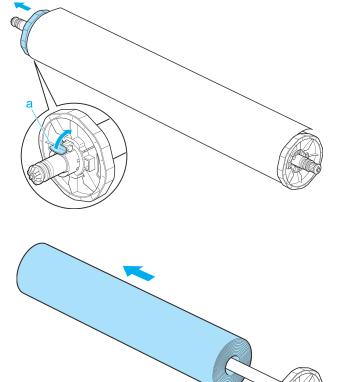

Remove the Rewind Spool from the Media Take-up Unit.

- Always turn off the Media Take-up Unit before removing the Rewind Spool. The Media Take-up Unit may be damaged if you do not turn it off first.
- Remove the Rewind Spool, pulling off both ends from the Media Take-up Unit at once. If you do not pull off both ends at once, the Media Take-up Unit may become damaged.
- Unlock the flange on the left side of the Rewind Spool by lifting the lever (a) from the shaft side. Remove the flange.

9

**10** Remove the entire paper core with the rewound printed documents from the Rewind Spool.

• You can leave the Rewind Spool on the Media Take-up Unit even when it is not used for rewinding rolls.

# Media Configuration Tool (Windows)

## The Features of Media Configuration Tool

In imagePROGRAF, the best printer settings for each paper are collected together in media information files in order to give the highest quality printing results. Settings for Canon genuine paper and Canon feed confirmed paper are provided by Canon in these media information files.

• Canon genuine paper and Canon feed confirmed paper are detailed in the Paper Reference Guide. Any other paper is called custom paper.

The Media Configuration Tool allows you to perform the following tasks.

- When supported paper has been newly added to the printer, you can add that media type to the printer control panel and printer driver by using the media information file provided by Canon.
- You can customize Canon genuine paper and feed confirmed paper media information files to create a media information file for custom paper (paper that is neither Canon genuine paper or feed confirmed paper), and add that media type to the printer control panel and printer driver.
   Furthermore, you can also import the created media information file into other computers and printers, and add media types to the printer drivers and printers of the computers where the data was imported.
- You can rearrange lists of the types of paper on the printer control panel and in printer driver dialog boxes and rename them, in addition to other functions.

• Normally, the Media Configuration Tool is installed and the media information is configured when you install the printer driver from the User Software CD-ROM. Use this software if you want to add new media information or edit existing media information.

• Administration of paper information using the Media Configuration Tool should be performed by the printer administrator.

Drivers Applicable with Media Configuration Tool

imagePROGRAF Printer Driver

## **Installation Procedures**

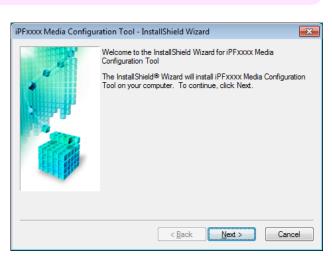

The Media Configuration Tool installation screen appears when you start the installation of a new version of the Media Configuration Tool. The installation procedure started from this screen is described below.

• If the printer driver is installed from the User Software CD-ROM, the Media Configuration Tool is also installed and the media information is also configured. Therefore, the following procedure does not normally need to be performed. To install the Media Configuration Tool without using the User Software CD-ROM, such as when you have downloaded a new version of the Media Configuration Tool from the Canon website, use the following procedure.

· You must be logged in as Administrator when installing software in Windows.

Start the Media Configuration Tool installer. Click the **Next** button.

2 The next screen presents selections for the country or area where the printer is used.

Select a country or territory then click the **Next** button.

• For the step to open the Media Configuration Tool main window, see "Starting Method." →P.585

Note

#### • Add Genuine Paper button

When this button is clicked, the **Edit Media Types** dialog box is displayed, which allows you to add media information files released by Canon to the printer control panel and printer driver. You can also change names, toggle between displaying and hiding, and delete added media types.

You can also change the display order of Canon genuine paper and custom paper.

Refer to Editing Media Type Information for Genuine Paper and Feed Confirmed Paper →P.586) for details on Add Genuine Paper.

#### Add and Edit Custom Paper button

When this button is clicked, the **Add and Edit Custom Paper** dialog box is displayed, which allows you to added custom paper to the printer control panel and printer driver.

Refer to Using Paper Other than Genuine Paper and Feed Confirmed Paper →P.597 for details on Add and Edit Custom Paper.

#### Link to Support Information button

Opens **imagePROGRAF Support Information**. You can check information such as the latest information for the product and software version upgrade information.

#### • Link to User Manual Button

Click this button to display the User's Guide. This function requires that the User's Guide be installed on your computer.

## Editing Media Type Information for Genuine Paper and Feed Confirmed Paper

To add genuine paper and feed confirmed paper to the printer control panel and printer driver and edit the media type information, click the **Add Genuine Paper** button in the Media Configuration Tool main window. Confirm the printer, where media type information is to be updated, to be displayed in **Printer** in the **Select Printer** dialog box, and then click the **Next** button.

	Connect to:	IP_xxx.xxx.xxx.xxx		
			Next >	Cancel

#### Communication with the printer begins.

• Do not attempt to print or turn the printer off while the program is communicating with the printer.

#### The Edit Media Types dialog box is displayed.

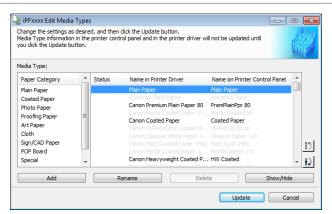

Important

• The printer cannot be changed after this.

Handling and Use of Paper

Media Configuration Tool (Windows

Paper that is displayed grayed out does not appear in the printer driver or printer panel.

#### Add Button

Note

To add genuine paper or feed confirmed paper to the printer control panel and printer driver, click this button. For details on the procedure for adding media types, see "Adding Media Types." →P.588

To add media types, download the media information file (.amf file) in advance from the Canon website.

#### • Rename Button

To change the name on the printer control panel and the name in the printer driver for genuine paper and feed confirmed paper, select the paper to change and click this button.

#### Delete Button

To delete added genuine paper and feed confirmed paper from the printer control panel and printer driver, select the paper to delete and click this button.

For details on the procedure for deleting added media types, see "Deleting Media Types You Have Added." →P.592

#### • Show/Hide Button

To change whether or not genuine paper or feed confirmed paper is displayed in the printer control panel and printer driver, select the paper to change and click this button.

For details on the procedure for changing whether or not to display media types, see "Switching Media Types Display Show/Hide." →P.594

To change the display order of a media type in the printer control panel and printer driver, select the paper to change and click this button.

For details on the procedure for changing the display order of media types, see "Changing the Display Order of Media Types." →P.595

The display order for custom paper can also be changed.

It may not be possible to deleting, showing/hiding, and changing the display order under some conditions.

Note • If a display name is displayed grayed out, that media type will not appear in the printer driver or printer panel.

### **Adding Media Types**

Media information files (.amf files) released by Canon are registered in the printer control panel and printer driver.

- Do not perform printing on the target printer while adding the media types.
- Important Reinstalling Media Configuration Tool after registering a media information file may delete the registered media information file.In this case, first download and install latest Media Configuration Tool, then download and register the required media information file.

Open the **Edit Media Types** dialog box, and then click the **Add** button.

#### Added Custom Paper

Added custom paper is displayed here.

Name in Printer Driver

Added custom paper is displayed in the printer driver using this name.

Name on Printer Control Panel

Added custom paper is displayed on the printer control panel using this name.

#### Standard Paper

Displays the paper selected as the standard paper when the custom paper was added.

#### Add Button

To add new custom paper to the printer control panel and printer driver, click this button. For details on the procedure for adding custom paper, see "Add Custom Paper."  $\rightarrow$  P.599

#### Edit Button

To change the settings of added custom paper, select the paper to edit and click this button. For details on the procedure for changing custom paper settings, see "Edit Custom Paper."  $\rightarrow$  P.606

#### • Delete Button

To delete added custom paper from the printer control panel and printer driver in your computer, select the paper to delete and click this button.

For details on the procedure for deleting custom paper, see "Delete Custom Paper." →P.605

#### • Import Button

To add custom paper to the printer control panel and printer driver by importing a Custom Media Information File saved in a folder, click this button.

For details on the procedure for importing a Custom Media Information File, see "Import Custom Media Information." →P.607

#### • Export Button

To export media information for added custom paper to a file, select the paper to export and click this button. For details on the procedure for exporting media information for custom paper, see "Export Custom Media Information."  $\rightarrow$  P.607

• When adding or editing custom paper, make the same changes on all of the other PCs that use the target printer. The changes can be made easily by creating a Custom Media Information File (.am1 file) using the custom paper export function and importing the file on the other PCs.

- When deleting custom paper, make the same changes on all of the other PCs that use the target printer.
- When using custom paper in another printer, always add the custom paper to that printer before use.

• Canon genuine paper and feed confirmed paper cannot be changed from this dialog box. Refer to "Editing Media Type Information for Genuine Paper and Feed Confirmed Paper" →P.586 .

 Changing the display order of media types displayed in the printer control panel and printer driver is performed from the Edit Media Types dialog box regardless of whether it is Canon genuine paper or custom paper. Refer to "Editing Media Type Information for Genuine Paper and Feed Confirmed Paper" (
 —P.586).

## **Compatible Paper**

#### Paper specifications

Refer to "Specifications" and "Paper" for specifications such as thickness and size of paper that can be added as custom paper (See "Specifications.") →P.934

#### Notes on the operating environment

In low humidity environments (below 40%), your printer may develop the following problems.

- Paper becomes curled or wrinkled.
- Paper and the printhead are more likely to touch each other, resulting in a scratched print surface or damaged printhead.
  - The cut printed matter sticks to the printer and will not fall down (film media).
  - Paper sticks to the printer, making its transfer impossible and preventing its normal ejection (film media).

• Uneven printing (film media)

In high humidity environments (over 60%), your printer may develop the following problems.

- Printed matter will not dry.
- Wavy paper surface
- Cut edges are ragged (fabric media).
- Margins remain due to borderless printing.

• Canon offers absolutely no guarantees regarding the print quality or paper feed properties of customer paper (paper that is not Canon genuine paper or Canon feed confirmed paper).

## Add Custom Paper

In order to add new custom paper to the printer control panel and printer driver, first select the media type to use as the basis from among the Canon genuine paper and feed confirmed paper. Add this as custom paper after making various changes to the standard paper as necessary.

2

Canon offers absolutely no guarantees regarding the print quality or paper feed properties of customer paper.

- Important For Canon genuine paper and Canon feed confirmed paper, print using the media type as recommended in the Paper Reference Guide. The print quality and feed properties are not guaranteed if you use Add Custom Paper in the Media Configuration Tool.
  - Do not execute printing on the target printer while adding custom paper.
  - When adding custom paper, check the specifications of paper that can be added using "Compatible Paper" (-P.598).
  - Custom paper added using the add custom paper function can only be used by the printer driver. It cannot be used by other software.

#### Open the Add and Edit Custom Paper dialog box.

Important

• For details on the procedure for opening the **Add and Edit Custom Paper** dialog box, see "Using Paper Other than Genuine Paper and Feed Confirmed Paper." →P.597

Click the Add button.

iPFxxxx Add and Edit Custor	n Paper		- • •

Configure the following settings as necessary, and then click the Next button.

Setting	Details
Automatic Cutting Settings	Configures the method for cutting roll paper when it is ejected after printing.

Setting	Details
Automatic Cutting Settings	• Automatic Cut :Roll paper is automatically cut by the cutter unit.
	• <b>Eject Cut</b> :When the <b>Cut</b> key is pressed on the printer control panel, the roll paper is cut by the cutter unit. Select this if you do not want the printed material to drop immediately after printing, such as to wait for the ink to dry.
	• User Cut :Cutting is not performed by the cutter unit. Cut the roll paper using scissors after each sheet. Select this for paper that cannot be cut by the cutter unit.
Drying Time	Specify the time that the printer waits for ink to dry, as needed.
	• Off :Ejects immediately after printing finishes.
	• 30 sec./1 min./3 min./5 min./10 min./30 min./60 min. :Ejects after the specified time has elapsed after printing finishes.
Borderless Printing	Configures whether or not to permit borderless printing.
	Permit : Borderless printing is permitted.
	• <b>Deny</b> : Borderless printing is denied.

Depending on the paper, there are types that cannot be cut by the cutter unit, and types that speed deterioration of the blade and cause damage to the cutter. For thick paper, hard paper, etc. do not use the cutter unit, and instead Important cut the roll paper using scissors, etc. after printing. In this case, select User Cut as the Automatic Cutting Settings.

- If borderless printing is performed on paper where the ink drying is poor, the cutter unit may leave scratches where it touches the printed surface, or may not cut correctly. In this kind of situation, configure the amount of time to wait for the ink to dry after printing using Drying Time. Alternatively, if the paper cannot be cut well by the cutter, set the Automatic Cutting Settings to User Cut and cut the roll paper using scissors, etc.
- Paper where borderless printing can be performed is limited by the media type and roll paper width. Refer to "Compatible Paper" →P.598 .
- For custom paper where there is a need to set the Automatic Cutting Settings to User Cut, set the Borderless Printing to Deny.

#### 10 The Step 5: Configure the amount of ink used dialog box is displayed.

The upper limit on the amount of ink used to print to the custom paper is set on this screen by selecting from among several levels.

First, click the **Test Print** button to perform a test print of each level.

on-screen directions. Once you have configured th	e ink usage, dick the Next button.

Medium-low
C Low
OK Cancel

- Select the optimal ink level by referring to the help.
- Note If you cannot obtain sufficiently high quality printing no matter which maximum ink usage level you select, use the Step 1: Select the standard paper dialog box to change the paper that is the basis of the custom paper to another paper.
  - Because this settings imposes an upper limit on the amount of ink used during printing, the printing result might not change even if the level is changed depending on the image.
  - The color tone cannot be configured using the Media Configuration Tool. Although the color tone may change when the maximum ink usage is changed, at this point you should select the optimal level by only focusing on bleeding and scraping of ink. If the color tone needs to be adjusted, provide an ICC color profile that matches the paper you are using, and select that ICC color profile in your software. For details on how to specify the ICC profile in the printer driver, see "Matching Sheet." —P.189
  - Depending on the maximum ink usage setting, some of the print qualities in the printer driver may become unselectable.

#### **13** Configure **Head Height** and **Vacuum Strength** as reguired and click the **Next** button.

Usually, these do not need to be set.

on-screen directions.	nount of ink that is used. Click the Test Print button and follow the e ink usage, click the Next button.	
Maximum ink usage Set Level:	Test Print	
Head Height:	Auto (xxxx)	
Vacuum Strength:	Auto (xxxx) 🔻	

- If you set the **Head Height** lower than the automatically set height in parentheses (), check that the printhead does not rub against the paper. (If the printhead rubs against the paper, there will be scratches in the printing results.) If the printhead rubs against the paper, this can cause damage to the printhead.
  - If you change the **Vacuum Strength**, check that the printhead is not rubbing against the paper. (If the printhead rubs against the paper, there will be scratches in the printing results.) If the printhead rubs against the paper, this can cause damage to the printhead.
  - For details on the Head Height and Vacuum Strength, refer to the help.

14	The Step 6: Confirm the settings dialog box is dis
	played.

Configure the settings of the custom paper, and then click the **Next** button.

ettings Details:

- The custom paper is added to the control panel of the printer and to the printer driver of the PC you are using.
  - When the custom paper is correctly added to the printer driver, the name of the added custom paper is displayed in the **Edit Media Types** dialog box that is opened by **Add Genuine Paper** in the Media Configuration Tool window.

## Warnings

Take note of the following warnings when added custom paper other than Canon genuine paper and feed confirmed paper to the printer driver and the printer itself.

#### About the Cutter

 Depending on the paper, there are types that cannot be cut by the cutter unit, and types that speed deterioration of the blade and cause damage to the cutter. For thick paper, hard paper, etc. do not use the cutter unit, and instead cut the roll paper using scissors, etc. after printing. In this case, select User Cut as the Automatic Cutting Settings in the Roll Paper Settings dialog box.

• If the cutter is damaged, contact your Canon dealer for assistance.

Note • For details on the methods for cutting roll paper, see "Specifying the Cutting Method for Rolls." -P.546

#### About the Printhead

- If the printhead rubs against the paper during printing, this may cause damage to the printhead. If the printhead is
  rubbing against the paper, configure the Vacuum Strength in the Step 5: Configure the amount of ink used
  dialog box as follows.
  - · For paper-based media such as Heavyweight Coated Paper: Set to Strong or Strongest
  - For film-based media such as CAD Tracing Paper: Set to Standard, Strong, or Strongest
  - · For thin paper of thickness 0.1mm or less: Set to Weakest

If the printhead still rubs even after changing the Vacuum Strength, set the Head Height to be higher in the Step 5: Configure the amount of ink used dialog box.

• For details on how to handle the printhead rubbing against the paper, see "Paper rubs against the printhead." —P.889

#### About Borderless Printing

When performing borderless printing on paper where the ink does not dry well, the cutter unit may leave scratches
where it touches the printed surface, or may not cut correctly. In this kind of situation, configure the amount of time
to wait for the ink to dry after printing using Drying Time in the Roll Paper Settings dialog box.
Alternatively, if the paper cannot be cut well by the cutter, set the Automatic Cutting Settings to User Cut in the
Roll Paper Settings dialog box, and cut the roll paper using scissors, etc.

#### About the Print Quality

- If the edges of images are blurry, set the Vacuum Strength to be weaker in the Step 5: Configure the amount of ink used dialog box.
- If lines are warped or scratched, set the **Head Height** to be lower in the **Step 5: Configure the amount of ink** used dialog box.
- If the amount of ink used is too much, wrinkles may appear and the ink may bleed in the printed material. Furthermore, if the amount of ink used is too little, color production may be poor and lines may become scratched. In this kind of situation, change the amount of ink used in the **Step 5: Configure the amount of ink used** dialog box.
- If horizontal bands with different color tone appear in the printed material, execute Paper Feed Adjustment in the Step 4: Paper feed adjustment dialog box. If you have already executed Paper Feed Adjustment, execute Adj. Fine Feed from the printer control panel and fine tune the amount of paper feed.

For details on Adj. Fine Feed, see "Fine-Tuning the Paper Feed Amount." —P.809

Note • If horizontal bands appear even after executing Adj. Fine Feed, refer to "Banding in different colors occurs" in "Troubleshooting". (See "Banding in different colors occurs.") →P.891

- If you cannot obtain sufficiently high print quality, change the maximum ink usage, or change the media type used as the basis for the custom paper in the **Step 1: Select the standard paper** dialog box.
- If there is no luster in printed material, set the paper used as the basis for the custom paper to a paper that uses photo ink as the Black ink.

The types of Black ink used are displayed on the right side of each media type in the **Step 1: Select the standard paper** dialog box.

For details on problems with printing quality, see "Problems with the printing quality." →P.888

#### About the Color Tone

- The color tone cannot be configured using the Media Configuration Tool. If the color tone needs to be adjusted, provide an ICC color profile that matches the paper you are using, and select that ICC color profile in your software. For details on how to specify the ICC color profile in the printer driver, see "Matching Sheet." →P.189
- Custom paper cannot be used with the ambient light adjustment function or Monitor Matching in Color-Matching Method.

## The Features of Media Configuration Tool

In imagePROGRAF, the best printer settings for each paper are collected together in media information files in order to give the highest quality printing results. Settings for Canon genuine paper and Canon feed confirmed paper are provided by Canon in these media information files.

• Canon genuine paper and Canon feed confirmed paper are detailed in the Paper Reference Guide. Any other paper is called custom paper.

The Media Configuration Tool allows you to perform the following tasks.

- When supported paper has been newly added to the printer, you can add that media type to the printer control panel and printer driver by using the media information file provided by Canon.
- You can customize Canon genuine paper and feed confirmed paper media information files to create a media information file for custom paper (paper that is neither Canon genuine paper or feed confirmed paper), and add that media type to the printer control panel and printer driver.
   Furthermore, you can also import the created media information file into other computers and printers, and add media types to the printer drivers and printers of the computers where the data was imported.
- You can rearrange lists of the types of paper on the printer control panel and in printer driver dialog boxes and rename them, in addition to other functions.

• Normally, the Media Configuration Tool is installed and the media information is configured when you install the printer driver from the User Software CD-ROM. Use this software if you want to add new media information or edit existing media information.

• Administration of paper information using the Media Configuration Tool should be performed by the printer administrator.

• For the step to open the Media Configuration Tool main window, see "Starting Method." -P.617

#### • Add Genuine Paper button

When this button is clicked, the **Edit Media Types** dialog box is displayed, which allows you to add media information files released by Canon to the printer control panel and printer driver. You can also change names, toggle between displaying and hiding, and delete added media types.

You can also change the display order of Canon genuine paper and custom paper.

Refer to Editing Media Type Information for Genuine Paper and Feed Confirmed Paper →P.619 for details on Add Genuine Paper.

#### Add and Edit Custom Paper button

When this button is clicked, the **Add and Edit Custom Paper** dialog box is displayed, which allows you to added custom paper to the printer control panel and printer driver.

Refer to Using Paper Other than Genuine Paper and Feed Confirmed Paper →P.630 for details on Add and Edit Custom Paper.

#### Link to Support Information button

Opens **imagePROGRAF Support Information**. You can check information such as the latest information for the product and software version upgrade information.

#### • Link to User Manual Button

Click this button to display the User's Guide. This function requires that the User's Guide be installed on your computer.

# Editing Media Type Information for Genuine Paper and Feed Confirmed Paper

To add genuine paper and feed confirmed paper to the printer control panel and printer driver and edit the media type information, click the **Add Genuine Paper** button in the Media Configuration Tool main window. Confirm the printer, where media type information is to be updated, to be displayed in **Printer** in the **Select Printer** dialog box, and then click the **Next** button.

O t the printer and click the N	iPFXXXX Select Printer lext button.	B
Printer:		
Canon iPFxxxx	\$	
Driver Details:	Canon iPFxxxx	
Connect to:	IP_xxx.xxx.xxx	
		Cancel Next >

Communication with the printer begins.

Important

• Do not attempt to print or turn the printer off while the program is communicating with the printer.

The Edit Media Types dialog box is displayed.

To change the name on the printer control panel and the name in the printer driver for genuine paper and feed confirmed paper, select the paper to change and click this button.

For details on the procedure for changing paper display names, see "Changing Media Names." 
—P.623

#### • Delete Button

To delete added genuine paper and feed confirmed paper from the printer control panel and printer driver, select the paper to delete and click this button.

For details on the procedure for deleting added media types, see "Deleting Media Types You Have Added." →P.625

#### • Show/Hide Button

To change whether or not genuine paper or feed confirmed paper is displayed in the printer control panel and printer driver, select the paper to change and click this button.

For details on the procedure for changing whether or not to display media types, see "Switching Media Types Display Show/Hide." (→P.627)

To change the display order of a media type in the printer control panel and printer driver, select the paper to change and click this button.

For details on the procedure for changing the display order of media types, see "Changing the Display Order of Media Types." →P.629

The display order for custom paper can also be changed.

When you update the media type information, perform the same update on all of the PCs that are using that printer. Important

Note • If a display name is displayed grayed out, that media type will not appear in the printer driver or printer panel.

#### Adding Media Types

Media information files (.amf files) released by Canon are registered in the printer control panel and printer driver.

Do not perform printing on the target printer while adding the media types.

Important • Reinstalling Media Configuration Tool after registering a media information file may delete the registered media information file.In this case, first download and install latest Media Configuration Tool, then download and register the required media information file.

 $\geq$ 

Open the **Edit Media Types** dialog box, and then click the **Add** button.

#### Added Custom Paper

Added custom paper is displayed here.

#### Name in Printer Driver

Added custom paper is displayed in the printer driver using this name.

#### • Name on Printer Control Panel Added custom paper is displayed on the printer control panel using this name.

#### Standard Paper

Displays the paper selected as the standard paper when the custom paper was added.

#### • Add Button

To add new custom paper to the printer control panel and printer driver, click this button. For details on the procedure for adding custom paper, see "Add Custom Paper."  $\rightarrow$  P.633

#### • Edit Button

To change the settings of added custom paper, select the paper to edit and click this button. For details on the procedure for changing custom paper settings, see "Edit Custom Paper."  $\rightarrow$  P.640

#### • Delete Button

To delete added custom paper from the printer control panel and printer driver in your computer, select the paper to delete and click this button.

For details on the procedure for deleting custom paper, see "Delete Custom Paper." →P.640

#### • Import Button

To add custom paper to the printer control panel and printer driver by importing a Custom Media Information File saved in a folder, click this button.

For details on the procedure for importing a Custom Media Information File, see "Import Custom Media Information." →P.642

#### • Export Button

To export media information for added custom paper to a file, select the paper to export and click this button. For details on the procedure for exporting media information for custom paper, see "Export Custom Media Information."  $\rightarrow$  P.641

- When deleting custom paper, make the same changes on all of the other PCs that use the target printer.
- When using custom paper in another printer, always add the custom paper to that printer before use.

- Canon genuine paper and feed confirmed paper cannot be changed from this dialog box. Refer to "Editing Media Type Information for Genuine Paper and Feed Confirmed Paper" →P.619.
- Changing the display order of media types displayed in the printer control panel and printer driver is performed from the Edit Media Types dialog box regardless of whether it is Canon genuine paper or custom paper. Refer to "Editing Media Type Information for Genuine Paper and Feed Confirmed Paper" (>P.619).

# **Compatible Paper**

#### Paper specifications

Refer to "Specifications" and "Paper" for specifications such as thickness and size of paper that can be added as custom paper (See "Specifications.") — P.934

#### Notes on the operating environment

In low humidity environments (below 40%), your printer may develop the following problems.

- Paper becomes curled or wrinkled.
- Paper and the printhead are more likely to touch each other, resulting in a scratched print surface or damaged printhead.
- The cut printed matter sticks to the printer and will not fall down (film media).
- Paper sticks to the printer, making its transfer impossible and preventing its normal ejection (film media).
- Uneven printing (film media)

In high humidity environments (over 60%), your printer may develop the following problems.

- Printed matter will not dry.
- Wavy paper surface
- Cut edges are ragged (fabric media).
- Margins remain due to borderless printing.

 Canon offers absolutely no guarantees regarding the print quality or paper feed properties of customer paper (paper that is not Canon genuine paper or Canon feed confirmed paper).

 $\geq$ 

## Add Custom Paper In order to add new custom paper to the printer control panel and printer driver, first select the media type to use as the basis from among the Canon genuine paper and feed confirmed paper. Add this as custom paper after making various changes to the standard paper as necessary. Canon offers absolutely no guarantees regarding the print quality or paper feed properties of customer paper. Important • For Canon genuine paper and Canon feed confirmed paper, print using the media type as recommended in the Paper Reference Guide. The print quality and feed properties are not guaranteed if you use Add Custom Paper in the Media Configuration Tool. Do not execute printing on the target printer while adding custom paper. Custom paper added using the add custom paper function can only be used by the printer driver. It cannot be used by other software. Open the Add and Edit Custom Paper dialog box. For details on the procedure for opening the Add and Edit Custom Paper dialog box, see "Using Paper Other than Genuine Paper and Feed Confirmed Paper." →P.630 Note 2 Click the Add button. O iPFXXXX Add and Edit Custom Paper Makes it possible to use custom paper (non-recommended paper) in the printer and printer dr Custom paper that has already been registered can also be edited here. 00

The Step 1: Select the standard paper dialog box is displayed. In Paper Category, select the category of media type to use as the basis of the custom paper you are adding.

Added Custom Paper:

you do not know the media	type, click the Assist button on the right.	Assist

The media type names of the Canon genuine paper and feed confirmed paper within the selected category are shown in **Media Type Name**. Select the media type to use as the basis of the custom paper, and click the **Next** button.

• If you do not know which media type to use as the basis of the custom paper, click the **Assist** button to open the **Media Type Selection Assistance** dialog box, and then set either the **Weight (grammage)** or the **Thickness**. The Media Configuration Tool automatically selects the appropriate paper from the selected paper category. Alternatively, select the media type called **General** from among the displayed **Media Type Name**.

- Depending on the selected category, there might not be a media type called General.
- Depending on the selected category, the Assist button may be disabled.

# The **Step 2: Set the custom paper name** dialog box is displayed.

Enter an arbitrary name to display in the printer control panel and printer driver, and then click the **Next** button.

tep 2] Set the custom paper name. ter the names to display in the printe	r driver and printer control panel.		
Name in Printer Driver:	xxxxxxxx		
Name on Control Panel:	XXXXXXXX		
Paper Name (English):	xxxxxxx		
	< Back	Cancel	Next >

- The characters that can be entered for **Name in Printer Driver** and **Name on Control Panel** are stated below. alphanumeric, space, "-", ".", "\_", "()", "+", "%", ",", "/"
  - For Name in Printer Driver up to 32 one Byte characters can be entered, and for Name on Control Panel up to 16 one Byte characters can be entered.
  - Paper Name (English) is used in keeping track of the amount of roll paper left, in status print, etc.

4

	iPFXXXX Roll Paper Settings	
e settings related to roll paper. each of the items.		đ
Automatic Cutting Settings:	Automatic Cut ‡	
Drying Time:	Off \$	
Borderless Printing:	Permit ‡	

#### Configure the following settings as necessary, and then click the **Next** button.

Setting	Details
Automatic Cutting Settings	Configures the method for cutting roll paper when it is ejected after printing.
	• Automatic Cut :Roll paper is automatically cut by the cutter unit.
	• Eject Cut :When the Cut key is pressed on the printer control panel, the roll paper is cut by the cutter unit. Select this if you do not want the printed material to drop immediately after printing, such as to wait for the ink to dry.
	• User Cut :Cutting is not performed by the cutter unit. Cut the roll paper using scissors after each sheet. Select this for paper that cannot be cut by the cutter unit.
Drying Time	Specify the time that the printer waits for ink to dry, as needed.
	• Off :Ejects immediately after printing finishes.
	• 30 sec./1 min./3 min./5 min./10 min./30 min./60 min. :Ejects after the specified time has elapsed after printing finishes.
Borderless Printing	Configures whether or not to permit borderless printing.
	• Permit : Borderless printing is permitted.
	• Deny : Borderless printing is denied.

• Depending on the paper, there are types that cannot be cut by the cutter unit, and types that speed deterioration of the blade and cause damage to the cutter. For thick paper, hard paper, etc. do not use the cutter unit, and instead cut the roll paper using scissors, etc. after printing. In this case, select **User Cut** as the **Automatic Cutting Settings**.

- If borderless printing is performed on paper where the ink drying is poor, the cutter unit may leave scratches where it touches the printed surface, or may not cut correctly. In this kind of situation, configure the amount of time to wait for the ink to dry after printing using **Drying Time**. Alternatively, if the paper cannot be cut well by the cutter, set the **Automatic Cutting Settings** to **User Cut** and cut the roll paper using scissors, etc.
- Paper where borderless printing can be performed is limited by the media type and roll paper width. Refer to "Compatible Paper" →P.632 .
- For custom paper where there is a need to set the Automatic Cutting Settings to User Cut, set the Borderless Printing to Deny.

# **10** The Step 5: Configure the amount of ink used dialog box is displayed.

The upper limit on the amount of ink used to print to the custom paper is set on this screen by selecting from among several levels.

First, click the **Test Print** button to perform a test print of each level.

Maximum ink usage	Test Print
Set Level:	Canon Standard Paper ÷
Head Height:	Auto ÷
Vacuum Strength:	Auto

• If a standard paper that does not display the **Name in Printer Driver** is selected in the screen in Step 5, you cannot perform test prints or configure the maximum amount of ink to use.

11 The Test Print Settings dialog box is displayed. Select the print priority and print quality of the test print using Print Priority and Print Quality. Set the level to test print using Maximum ink usage and the image to use using Image used in test print, and then click the Start Print button.

Te	st Print Settings	
Set the ink usage level (multiple c and print quality in the test print. Note: For the print priority and pr commonly used when actually pri	int quality, select settir	ng values that are
Print Priority:	Image	*

**12** Determine and set the ink level that is thought to give the best visual test print results with no bleeding or scraping of ink.

reen.	or head height settings on the nex
evel	
O Canon Standar	d Paper
OHigh	
O Medium-high	
Standard	
O Medium-low	

- - Select the optimal ink level by referring to the help.
- Note If you cannot obtain sufficiently high quality printing no matter which maximum ink usage level you select, use the Step 1: Select the standard paper dialog box to change the paper that is the basis of the custom paper to another paper.
  - Because this settings imposes an upper limit on the amount of ink used during printing, the printing result might not change even if the level is changed depending on the image.
  - The color tone cannot be configured using the Media Configuration Tool. Although the color tone may change when the maximum ink usage is changed, at this point you should select the optimal level by only focusing on bleeding and scraping of ink. If the color tone needs to be adjusted, provide an ICC color profile that matches the paper you are using, and select that ICC color profile in your software. For details on how to specify the ICC profile in the printer driver, see "Matching Sheet." →P.189
  - Depending on the maximum ink usage setting, some of the print gualities in the printer driver may become unselectable.

#### 13 Configure Head Height and Vacuum Strength as required and click the Next button.

Usually, these do not need to be set.

	XXXX Step 5: Configure the amount of ink used nk that is used. Click the Test Print button and follow the on- e, click the Next button.	
Maximum ink usage	Test Print	
Head Height:	Auto(xxxx) ‡	
Vacuum Strength:	Auto(xxxx)	
Help	Sack Cancel	Next >

- If you set the **Head Height** lower than the automatically set height in parentheses (), check that the printhead does not rub against the paper. (If the printhead rubs against the paper, there will be scratches in the printing results.) If the printhead rubs against the paper, this can cause damage to the printhead.
  - If you change the **Vacuum Strength**, check that the printhead is not rubbing against the paper. (If the printhead rubs against the paper, there will be scratches in the printing results.) If the printhead rubs against the paper, this can cause damage to the printhead.
  - For details on the Head Height and Vacuum Strength, refer to the help.

The **Step 6: Confirm the settings** dialog box is displayed.

Configure the settings of the custom paper, and then click the **Next** button.

p 6] Add the custom paper using the following settings.		di.

• You should normally select Update the printer control panel and printer driver. The custom paper is added to the control panel of the printer and to the printer driver of the PC you are using. Note

• When the custom paper is correctly added to the printer driver, the name of the added custom paper is displayed in the Edit Media Types dialog box that is opened by Add Genuine Paper in the Media Configuration Tool window.

## Warnings

Take note of the following warnings when added custom paper other than Canon genuine paper and feed confirmed paper to the printer driver and the printer itself.

#### About the Cutter

 Depending on the paper, there are types that cannot be cut by the cutter unit, and types that speed deterioration of the blade and cause damage to the cutter. For thick paper, hard paper, etc. do not use the cutter unit, and instead cut the roll paper using scissors, etc. after printing. In this case, select User Cut as the Automatic Cutting Settings in the Roll Paper Settings dialog box.

- If the cutter is damaged, contact your Canon dealer for assistance.
- Note For details on the methods for cutting roll paper, see "Specifying the Cutting Method for Rolls." →P.546

#### About the Printhead

- If the printhead rubs against the paper during printing, this may cause damage to the printhead. If the printhead is rubbing against the paper, configure the **Vacuum Strength** in the **Step 5: Configure the amount of ink used** dialog box as follows.
  - For paper-based media such as Heavyweight Coated Paper: Set to Strong or Strongest
  - For film-based media such as CAD Tracing Paper: Set to Standard, Strong, or Strongest
  - For thin paper of thickness 0.1mm or less: Set to Weakest
  - If the printhead still rubs even after changing the Vacuum Strength, set the Head Height to be higher in the Step 5: Config-Note ure the amount of ink used dialog box.
    - For details on how to handle the printhead rubbing against the paper, see "Paper rubs against the printhead." —P.889

#### About Borderless Printing

When performing borderless printing on paper where the ink does not dry well, the cutter unit may leave scratches
where it touches the printed surface, or may not cut correctly. In this kind of situation, configure the amount of time
to wait for the ink to dry after printing using Drying Time in the Roll Paper Settings dialog box.
Alternatively, if the paper cannot be cut well by the cutter, set the Automatic Cutting Settings to User Cut in the
Roll Paper Settings dialog box, and cut the roll paper using scissors, etc.

#### About the Print Quality

- If the edges of images are blurry, set the Vacuum Strength to be weaker in the Step 5: Configure the amount of ink used dialog box.
- If lines are warped or scratched, set the **Head Height** to be lower in the **Step 5: Configure the amount of ink** used dialog box.
- If the amount of ink used is too much, wrinkles may appear and the ink may bleed in the printed material. Furthermore, if the amount of ink used is too little, color production may be poor and lines may become scratched. In this kind of situation, change the amount of ink used in the **Step 5: Configure the amount of ink used** dialog box.
- If horizontal bands with different color tone appear in the printed material, execute Paper Feed Adjustment in the Step 4: Paper feed adjustment dialog box. If you have already executed Paper Feed Adjustment, execute Adj. Fine Feed from the printer control panel and fine tune the amount of paper feed.

- For details on Adj. Fine Feed, see "Fine-Tuning the Paper Feed Amount." →P.809
- Note If horizontal bands appear even after executing Adj. Fine Feed, refer to "Banding in different colors occurs" in "Troubleshooting". (See "Banding in different colors occurs.") →P.891

- If you cannot obtain sufficiently high print quality, change the maximum ink usage, or change the media type used as the basis for the custom paper in the **Step 1: Select the standard paper** dialog box.
- If there is no luster in printed material, set the paper used as the basis for the custom paper to a paper that uses photo ink as the Black ink.

The types of Black ink used are displayed on the right side of each media type in the **Step 1: Select the standard paper** dialog box.

#### About the Color Tone

- The color tone cannot be configured using the Media Configuration Tool. If the color tone needs to be adjusted, provide an ICC color profile that matches the paper you are using, and select that ICC color profile in your software. For details on how to specify the ICC color profile in the printer driver, see "Matching Sheet." 
   —P.189
- Custom paper cannot be used with the ambient light adjustment function or Monitor Matching in Color-Matching Method.

## Printer status and modes

Printer status is classified according to the following five modes.

Standby	The printer is ready to receive jobs sent from the computer. Jobs sent from the computer are printed immediate-
	ly.
Ready OK: Paper Menu	
⊚Plain Paper ISO A2 Roll	

Printing Paused	Printing is paused on the printer. Any jobs sent from the computer are held without being printed.
Offline OK: Job Menu	

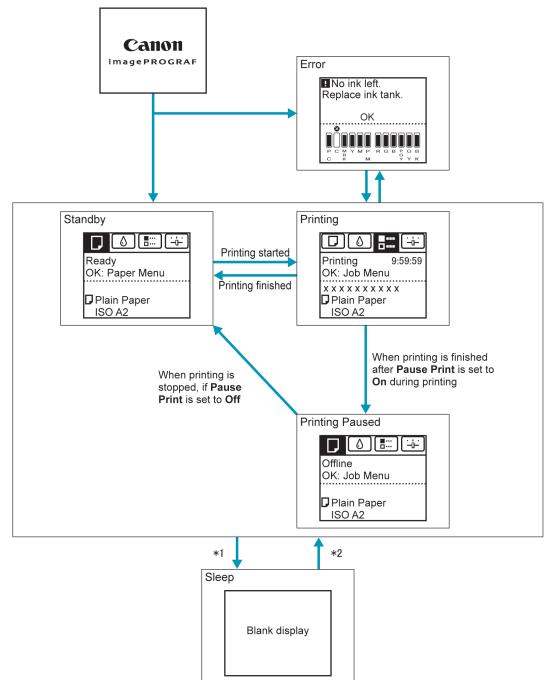

Printing Printing 9:59:59 OK: Job Menu	Printing is in progress on the printer. Jobs sent from the computer are printed after the current job. The time left until printing is finished is indicated in the upper-right corner of the screen. (Values exceeding 10 hours are not shown.)
x x x x x x x x x x x Plain Paper ISO A2	

Sleep	The printer is in power-saving mode. The printer automatically enters Sleep mode to conserve power when idle
Blank display	for a specific period (by default, five minutes), that is, if no print jobs are received or buttons are pressed while all covers are closed. You can specify the period before the printer enters <b>Sleep</b> mode in the <b>Sleep Timer</b> menu. (See "Menu Set- tings.") → P.667 After entering <b>Sleep</b> mode from <b>Standby</b> mode, the printer automatically recovers if print jobs are received, and the jobs are printed.

Error	The printer requires your attention. Any jobs sent from the computer cannot be processed. The tab related to
No ink left. Replace ink tank.	the error is displayed. For information about the display in the case of multiple errors, see "Display Transitions in Error Status."
ОК	
C K M Y K	

## **Display Transitions in Normal Status**

The display transitions while the printer is in the normal status (the status where no errors have occurred) are shown below.

- \*1: The printer automatically enters **Sleep** mode when idle for a specific period (by default, five minutes), that is, if no print jobs are received or buttons are pressed while all covers are closed. However, it does not enter **Sleep** mode while error messages are displayed or when a roll can be manually advanced by pressing the **Feed** button.
- \*2: When the printer is in **Sleep** mode, you can press any button except the **Power** button to recover from **Sleep** mode. **Sleep** mode is also terminated if a print job is received or a command is issued from RemoteUI.

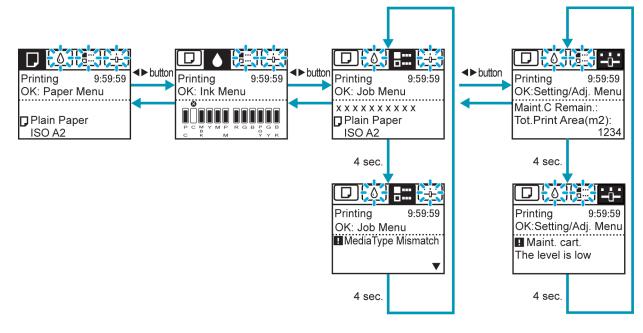

652

## **Display Transitions in Error Status**

The display transitions while an error has occurred on the printer are shown below.

Control Panel

If multiple errors have occurred, the tabs for errors that have occurred other than the currently displayed error are displayed flashing. You can move between the tabs to check the errors by pressing the  $\blacktriangleleft$  and  $\blacktriangleright$  keys. If multiple errors have occurred in the Job tab and Settings/Adj. tab, the error message switches every four seconds within each tab.

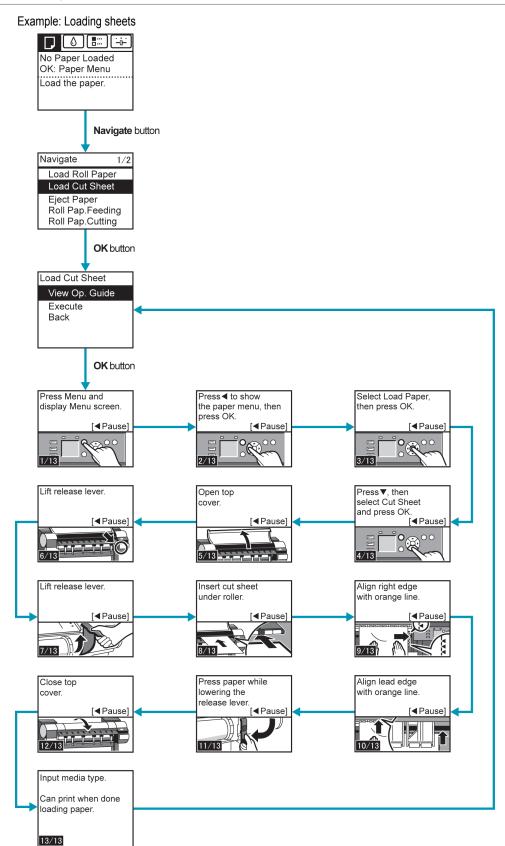

## How to View Instructions With Navigate

You can refer to instructions for loading paper, replacing ink tanks, and performing other operations on the printer control panel.

- Press the Navigate button.
- Press  $\blacktriangle$  or  $\triangledown$  to select the desired navigation menu.
- **3** Press  $\blacktriangle$  or  $\checkmark$  to select **View Op. Guide**, and then press the **OK** button. Instructions are now displayed.

Control Panel

## **Checking Instructions During Printer Operations**

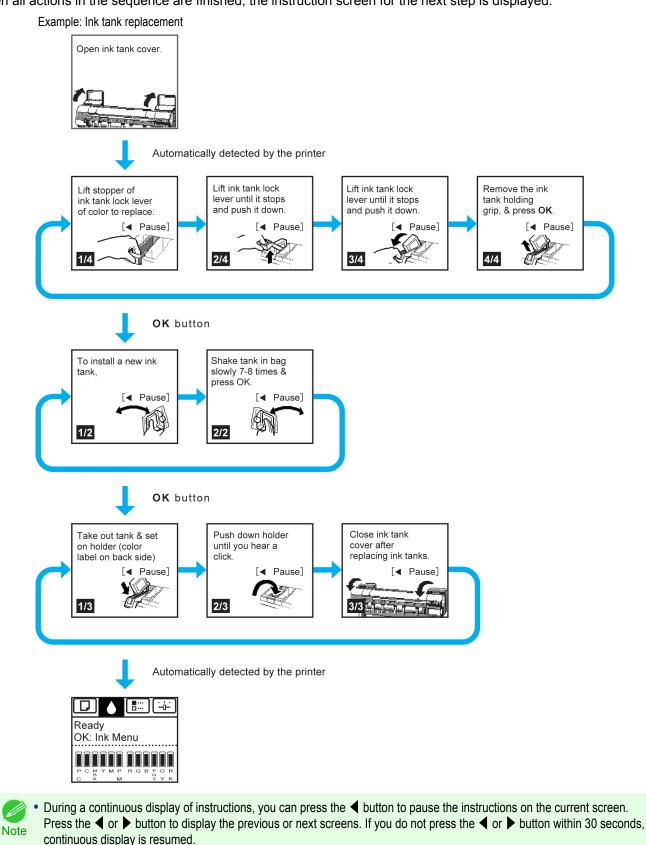

You can refer to instructions on the printer control panel when loading paper, replacing ink tanks, or performing other operations.

## How to view instructions

Once you complete an action described in the instructions, the printer detects the action and switches to the next instruction screen.

In the case of actions the printer cannot detect, instruction screens are switched every four seconds, and the sequence of operations is shown repeatedly.

#### When all actions in the sequence are finished, the instruction screen for the next step is displayed.

Press the **OK** button to display the instruction screen for the next step.

# Printer Menu

Printer Menu Operations	657
Menu Operations Menu Structure Menu Settings	661
Status Print Printing Interface Setting Reports	

## **Printer Menu Operations**

The printer menu is classified into regular menu items available when no print job is in progress and menu during printing items only available while printing is in progress.

- Regular menu operations →P.657
- Menu operations during printing →P.657

## Regular menu operations

To view available menus organized on tabs, select a tab on the **Tab Selection screen** and press the **OK** button.

• If the **Tab Selection screen** is not displayed, pressing **OK** will not display menus. Menus can be selected after you resolve the problem.

The following operations are available from the menu.

- Paper Menu
   Paper menu settings
- Ink Menu Ink menu operations
- Job Menu Menu operations to manage print jobs
- Set./Adj. Menu Menu operations for printer adjustment and maintenance

For a description of specific menu items available, see "Menu Settings."  $\rightarrow$  P.667 For instructions on selecting menu items, see "Menu Operations."  $\rightarrow$  P.658

• By default, menu settings apply to all print jobs. However, for settings that are also available in the printer driver, the values specified in the printer driver take priority.

## Menu operations during printing

During printing, only a limited set of menu items are displayed. Menu items that are not displayed during printing should be operated after printing has finished.

To display menus during printing, select a tab on the **Tab Selection screen** on the Control Panel, and then press the **OK** button.

The following operations are available from the menu during printing.

- Ink Menu Ink menu operations
- Job Menu

Menu operations to manage print jobs

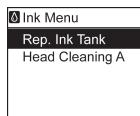

Set./Adj. Menu
 Fine-tuning paper feeding
 Display of printer-related information

For a description of specific menu items available, see "Menu Settings."  $\rightarrow$  P.667 For instructions on selecting menu items during printing, see "Menu Operations."  $\rightarrow$  P.658

## Menu Operations

To view available menus organized on tabs, select a tab on the **Tab Selection screen** and press the **OK** button. For details, see "Menu Settings." — P.667

• Menus (when the Ink tab is selected and the **OK** button is pressed)

If the Tab Selection screen is not displayed, press the Menu button.

Simply press buttons on the Control Panel to access menus on various tabs from the **Tab Selection screen** and set or execute **Menu** items.

The following section describes menu operations.

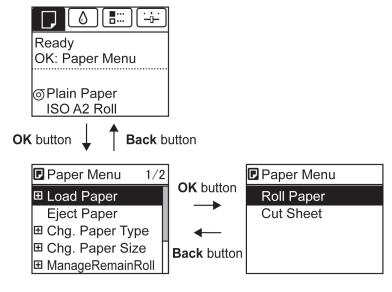

- Accessing menus →P.658
- Specifying menu items →P.659
- Specifying numerical values →P.660
- Executing menu commands →P.660

#### Accessing menus

Note

Printer menus are grouped by function.

Menus are displayed with the upper line selected. You can use the buttons on the Control Panel to access each menu.

• Press **Back** to access a higher menu in the menu list, and press **OK** to access a lower one. If not all menu items are displayed, hold down ▲ or ▼ to scroll through higher and lower menu items. Items you select are highlighted.

The scroll bar at right indicates the current position in the overall menu.

• Lower menus are available if 
 is displayed at left next to the second and subsequent rows. To access the lower menus, select the menu and press the OK button.

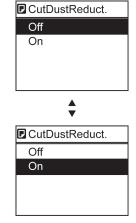

#### Specifying menu items

iPF9400

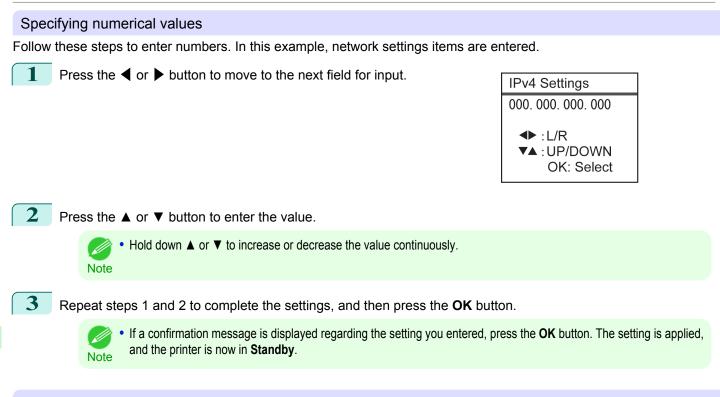

Menu items can be set as follows.

Press ▲ or ▼ to select the desired setting, and then press the **OK** button. After two seconds, the display reverts to the upper level menu.

• If a confirmation message is displayed regarding the setting you entered, press the **OK** button. The setting is applied, and the printer is now in **Standby**.

### Executing menu commands

Menu commands can be executed as follows.

Press  $\blacktriangle$  or  $\blacktriangledown$  to select the action to execute, and then press the **OK** button. The menu command is now executed.

Control Panel

## **Menu Structure**

The menu structure is shown categorized by tab. The \* on the right side of an item indicates the default value. The printer menu is classified into regular menu items available when no print job is in progress and menu during printing items only available while printing is in progress. see "Printer Menu Operations."  $\rightarrow$  P.657

Regular menu	Menu during printing			
Paper Menu	Not displayed

Control Panel

## Menu Settings

#### Menu items are as follows.

The printer menu is classified into regular menu items available when no print job is in progress and menu during printing items only available while printing is in progress. see "Printer Menu Operations." →P.657

Regular menu	Menu during printing
Paper Menu	Not displayed
Ink Menu	The same Ink Menu as normal is displayed.
Job Menu	The same Job Menu as normal is displayed.
Set./Adj. Menu	A limited Set./Adj. Menu containing the following items is displayed.
	Adj. Fine Feed (*1)
	Printer Info

\*1: Only displayed in the menu during printing. Not displayed in the regular menu.

For instructions on selecting menu items, see "Menu Operations."  $\rightarrow$  P.658 For details on the displayed menu hierarchy, see "Menu Structure."  $\rightarrow$  P.661

### Paper Menu

The **Paper Menu** is not displayed during printing.

	Setting Item		Description, Instructions
Load Paper			Select either sheets or rolls and load the paper.
Eject Paper			Choose this item before removing loaded paper.
Chg. Paper Type	(*1)		Change the type of paper loaded. (See "Changing the Type of Paper.") $\rightarrow$ P.537
Chg. Paper Size			Change the size of paper loaded. (See "Specifying the Paper Length.") $\rightarrow$ P.539 (See "Paper Sizes.") $\rightarrow$ P.522
ManageRemainRoll			Choose <b>On</b> to print a barcode at the end of a roll before you remove it. The printed barcode can be used in managing the amount of roll paper left. Choose <b>Off</b> if you prefer not to print the barcode. (See "Keeping Track of the Amount of Roll Paper Left.") →P.544
Paper Details	(The type of paper is displayed here.)	Head Height	Adjust the Printhead height. (See "Troubleshooting Paper Abrasion and Blurry Images.")
	(*1)	Skew Check Lv.	If you print on Japanese paper (washi) or other handmade paper that has an irregular width, choose <b>Loose</b> for a higher skew detection threshold, or choose <b>Off</b> to disable skew detection. However, if paper is loaded askew when detection is <b>Off</b> , note that paper jams or Platen soiling may occur.
			Specify whether or not to cut with the standard round-bladed cutter. If you choose <b>Automatic</b> , the roll will be cut automatically using the Cutter Unit, depending on the printer driver settings. Select <b>Eject</b> to prevent printed documents from falling immediately after printing such as when you wait for the ink to dry, etc. <b>Manual</b> prints lines at the cut position instead of cutting after printing. If you select <b>Manual</b> , the setting screen for detection of the paper leading edge is displayed. (See "Specifying the Cutting Method for Rolls.") —P.546
			Choose the cutting speed. The preset selection represents the optimal cutting speed for the type of paper. We recommend keeping the preset cutting speed. If you use adhesive paper, choosing <b>Slow</b> helps prevent adhesive from sticking to the cutter and keeps the cutter sharp.

Printer Menu

	Setting Item		Description, Instructions
	(The type of paper is displayed here.) (*1)	Trim Edge First	Selects whether or not to automatically cut the leading edge of the rol paper when roll paper is loaded. (See "Cutting the Leading Edge of Roll Paper Automatically.") —P.552
		CutDustReduct.	If you choose <b>On</b> , a line will be printed at the cut position when paper cutting is selected. This option reduces the amount of debris given of after cutting. It also helps prevent adhesive from sticking to the cutter and keeps the cutter sharp if you use adhesive paper. (See "Reducin Dust from Cutting Rolls.") —P.554
		VacuumStrngth	Specify the level of suction that holds paper against the Platen. (See "Adjusting the Vacuum Strength.") →P.811
		Roll Tension	Adjust the slack of the roll paper loaded in the printer. If there is slack in thin roll paper and the paper is becoming scratched or wrinkles or creases are occurring, set this to <b>High</b> to make it harder for slack to occur, and reduce the amount of scratches, etc. If you change the <b>Roll Tension</b> setting, We recommend that you per- form <b>Adj. Quality</b> . (See "Automatic Banding Adjustment.") —P.806
		Scan Wait Time	Specify the time to wait for the ink to dry between each scan (after the printhead finishes moving in one direction), in consideration of how quickly the ink dries. Also specify the applicable area for the ink dryin time. Select <b>Entire area</b> to apply the ink drying time after each scan or til the document is fully printed. Select <b>Leading edge</b> to apply the ink drying time after each scan only in the area 110–160 mm from the leading edge. (The applicable length varies depending on the <b>Print Quali</b> setting.) Note that printing will take longer if you specify the <b>Scan Wa Time</b> setting. In particular, when <b>Leading edge</b> is selected, colors may be uneven in the boundary between the areas with and without a dryin time.
		Roll DryingTime	Specify the time to wait for the ink to dry for each sheet.
		NearEnd RollMrgn	Specify the minimum margin at the leading edge of roll paper to ensubetter printing quality at the leading edge. Note that if you choose <b>5mm</b> , it may lower the printing quality at the leading edge and affect feeding accuracy. The printed surface may b scratched, and ink may adhere to the leading edge. It may also cause the Platen to become soiled.
		NearEnd Sht Mrgn	Specify a margin at the leading edge of sheets to ensure better printi quality at the leading edge. Note that if you choose <b>5mm</b> , it may lower the printing quality at the leading edge and affect feeding accuracy. The printed surface may be scratched, and ink may adhere to the leading edge.
		"BordlessOver- size"	Select the amount of oversize extension of the original during border- less printing. Normally, we recommend that you set this to <b>Standard</b> . If it is set to <b>"Little</b> ", although it will reduce soiling on the back surface white patches may remain on the printed surface.
		Width Detection	Specify this option to print inside boundaries or in other cases when specifying a particular starting position for printing. Paper width and skew are not detected if you select <b>Off</b> . If paper is lo ded askew, paper jams or Platen soiling may occur.
		Return Defaults	Choose <b>OK</b> to restore <b>Paper Details</b> to the default values.
Paper Details			Print the paper settings as specified in <b>Paper Details</b> .
Keep Paper Type			Select <b>On</b> when printing on a particular type of paper regularly. (See "Changing the Type of Paper.") $\rightarrow P.537$

\*1: For information on the types of paper the printer supports, refer to the Paper Reference Guide. (See Paper Reference Guide.) Types of paper in the printer driver and related software (as well as on the Control Panel) are updated when you install the printer driver from the User Software CD-ROM or if you update paper information with the Media Configuration Tool. (See "Updating paper information.")

## Ink Menu

Setting Item	Description, Instructions
Rep. Ink Tank	Replace the Ink Tank at this point. Follow the instructions displayed to complete the required procedure. (See "Replacing Ink Tanks.") $\rightarrow$ P.826
Head Cleaning A	Printhead cleaning options. (See "Cleaning the Printhead.") →P.839 Execute <b>Head Cleaning A</b> if printing is faint, oddly colored, or con- tains foreign substances.

### Job Menu

		Setting Item			Description, Instructions		
Print Job	rint Job Job List	(Choose a print job)	Delete		Delete the current job or queued jobs. (See "Managing the Job Queue (Deleting or Preempting Other Jobs).") →P.759		
			Preempt Jo	obs	Print the job first after the current print job is finished. (See "Manag- ing the Job Queue (Deleting or Preempting Other Jobs).") →P.759		
Stored	Mailbox	(Enter a	Job List	Print	Print the saved job.		
Job	List	password if one has		Delete	Delete the saved job.		
		been set.)	Print Job L	ist	Print a list of saved print jobs.		
Job Log	(Choose	Document I	Name		Indicates the document name of the selected print job.		
	from infor- mation	User Name			Indicates the name of the user who sent the print job.		
	about the	Page Count	t		Indicates the number of pages in the job.		
	last three	Job Status			Indicates the printing results.		
	print jobs.)	Print Start Time			Indicates when the print job was started.		
		Print End Time			Indicates when the print job was finished.		
	Print Time			Indicates the time required to print the job.			
		Output Img. Size			Indicates the image size in the print job.		
		Media Type			Indicates the type of paper in the print job.		
		Paper Consumed			Indicates the total amount of paper consumed.		
		Paper Length			Indicates the length of paper.		
		Paper Width			Indicates the width of paper.		
		Interface			Indicates the interface used for the print job.		
	Ink Consumed			Indicates a rough estimate of how much ink was consumed per job. (*1)			
		Print settings Head Height			A counter for maintenance purposes. Indicates job print settings.		
					A counter for maintenance purposes. Indicates the head height whe jobs wereprinted.		
		Temp./Humidity			A counter for maintenance purposes. Indicates the temperature and humiditywhen jobs were printed.		
		Adjustment	req.		A counter for maintenance purposes. Indicates adjustment condi- tions appliedto jobs.		

Setting Item	Description, Instructions
Print Job Log	Print a record of print jobs, including the paper type and size, amount of ink consumed, and so on. Ink consumption indicates a rough estimate of the amount of ink consumed per print job.(*1)
Pause Print	Choose <b>On</b> to stop printing.
HDD Information	Indicates the total hard disk capacity and the mail box free space.

\*1: A rough estimate of the amount of ink consumed per print job is displayed. Actual ink consumption may be different. The average margin of error for estimates calculated according to Canon measurement conditions for ink costs is ±15%. Canon does not guarantee the accuracy of these estimates. Estimates may vary depending on conditions of use. Calculation of these estimates does not include ink consumed when cleaning printheads by forceful ejection of ink.

## Set./Adj. Menu

Limited items are displayed during printing. The displayed items are indicated by annotations.

		Sett	ing Item	Description, Instructions
Test	Nozzle Ch	eck		Print a test pattern to check the nozzles.
Print	Status Pri	nt		Print information about the setting values and condition of the printer.
	Interface F	Print		Print interface settings information.
	Paper Deta	ails		Print the paper settings as specified in <b>Paper Details</b> .
	Print Job I	Log		Print a record of print jobs, including the paper type and size, amount of ink consumed, and so on. Ink consumption indicates a rough estimate of the amount of ink consumed per print job. (*1)
	Menu Map	)		Print the menu structure.
Adjust Printer	Head Posi. Adj.	Standard		An adjustment pattern is printed and the print position is auto- matically adjusted to fix misaligned printing. Select <b>Standard</b> if vertical lines in printed material are warped or colors are out of alignment. Select <b>Standard</b> also if the printing results are not improved by executing <b>Simple</b> . (See "Automatic Adjustment to Straighten Lines and Colors.") —P.798
		Simple		An adjustment pattern is printed and the print position is auto- matically adjusted to fix misaligned printing. <b>Simple</b> executes a simple adjustment in a short time. Select <b>Simple</b> when fre- quently adjusting the printhead, such as during daily mainte- nance. (See "Automatic Adjustment to Straighten Lines and Col ors.") <b>-P</b> .798
	Other		Initial adjustmt	Printhead position adjustment is executed during the initial set- up. If adjusting the printhead position has not been performed such as due to an error during initial setup or the state of the operating settings when replacing the printhead, select <b>Initial</b> <b>adjustmt</b> . (See "Adjustment When Installing the Printhead.") $\rightarrow$ P.802
			Manual	Input the setting values from the adjustment pattern printing re- sults and adjust the printing position to fix misaligned printing. Normally, select <b>Standard</b> . However, when printing on special paper, or if printing is not improved after <b>Standard</b> , try <b>Manual</b> (See "Manual Adjustment to Straighten Lines and Colors.") →P.800

		Settir	ng Item		Description, Instructions
Adjust Printer	Feed Pri- ority	Adj. Pri- ority	Automatic Print Qual	ity	Specify exact paper feeding, if desired. Normally, select Auto- matic. Choose Print Quality for attractive printing. Choosing Print Quality also makes banding less noticeable. Choose
		Print Lenç	Itn	<b>Print Length</b> if you prefer to feed the paper an exact amount. However, note that slight banding may occur in the direction or carriage scanning when <b>Print Length</b> is selected.	
		Adj. Quality	Auto(Gen	uinePpr)	Specify this mode with paper identified in the Paper Reference Guide.(See Paper Reference Guide.) The printer prints and reads a test pattern for automatic adjust ment of the feed amount. (See "Automatic Banding Adjust- ment.")
			Auto(OtherPaper)		Specify this mode with paper not in the Paper Reference Guide.(See Paper Reference Guide.) The printer prints and reads a test pattern for automatic adjust ment of the feed amount. Note that this function takes more time and consumes more ink than <b>Auto(GenuinePpr)</b> . (See "Automatic Banding Adjustment.") →P.806
			Manual		Use this mode with highly transparent media or other paper fo which <b>Auto(GenuinePpr)</b> or <b>Auto(OtherPaper)</b> cannot be used. Print a test pattern for adjustment of the feed amount based of the type of paper. (See "Manual Banding Adjustment.") —P.807
		Adjust Length	Adjust-	A:High	Print a test pattern for particular types of paper to compensate
	Length		Length ment- Print	B:Standard/Draft	for paper stretching or shrinkage, after which you enter the amount of adjustment. (See "Adjusting Line Length.") →P.810
			Change	A:High	Displayed when you have selected Feed Priority > Adj. Prior
	S		Settings	B:Standard/Draft	<ul> <li>ity &gt; Print Length.</li> <li>Adjustment relative to the amount of stretching or shrinkage of the current paper.</li> <li>Enter either the adjustment results from AdjustmentPrint or the discrepancy that you measured (as a percentage).</li> <li>For paper that tends to stretch, increase the feed amount by choosing a higher adjustment value. For paper that tends to shrink, decrease the feed amount by choosing a lower adjustment value. (See "Adjusting Line Length.") →P.810</li> </ul>
	Calibra- tion	Auto Adju	st		A test pattern for color calibration is printed and the adjustment values are adjusted automatically. (See "Corrects slight differences in how colors appear (color calibration).") →P.820
Calibrat		Calibratio	n Log		The <b>Date</b> , <b>Paper Type</b> , and <b>Adjustment Type</b> for which colo calibration was executed are displayed on the Display Screen where you can confirm them.
				Common calibration and unique calibration are the <b>Adjust-</b> <b>ment Type</b> of color calibration. When paper is set in the printer, the history of effective color calibration for the set paper is displayed. When paper is not set in the printer, the latest history among common calibration or unique calibration is displayed. Also, a hyphen (-) is displayed when there are no execution re sults. (See "Corrects slight differences in how colors appear (color ca ibration).") $\rightarrow$ P.820	

	<b>A</b> 117		ting Item		Description, Instructions		
Adjust Printer	Calibra- tion	Use Adj.	Value		<ul> <li>Choose Disabled &gt; OK if you prefer not to apply the color call bration adjustment value in print jobs. However, printer driver settings are given priority.</li> <li>Choose Enabled &gt; OK to apply the color calibration adjustment value in print jobs. However, printer driver settings are given priority.</li> </ul>		
		"Set Exe	c. Guide"		If you select <b>On</b> , a message is displayed on the control panel at the timing recommended for executing color calibration.		
		Return D	Defaults		Clear the color calibration adjustment value and the execution log.		
Mainte- nance	- Head Cleaning				Clean the Printhead. (See "Cleaning the Printhead.") →P.839 Choose Head Cleaning A if printing is faint, oddly colored, or contains foreign substances. Choose Head Cleaning B if no ink is printed at all, or if printing is not improved by Head Cleaning A.		
	Nozzle Ch	eck			Print a test pattern to check the nozzles.		
	displayed to complete the required pro the Printhead.") →P.840 Not displayed during a warning messa		Execute when replacing the Printhead. Follow the instructions displayed to complete the required procedure. (See "Replacin the Printhead.") →P.840 Not displayed during a warning message that the remaining Maintenance Cartridge capacity is low.				
	Repl. mair	Repl. maint cart			Execute when replacing the Maintenance Cartridge. Follow the instructions displayed to complete the required procedure. (See "Replacing the Maintenance Cartridge.") →P.852		
	Head In-	Printhea	d L		Indicates information about the printhead.		
	fo	Printhea	d R		]		
	Repl. S. C	leaner			Replace the Shaft Cleaner. Follow the instructions displayed complete the required procedure. (See "Replacing the Mainte nance Cartridge.") → P.852		
	Change C	utter			Replace the Cutter Unit. Follow the instructions displayed to complete the required procedure. (See "Replacing the Cutter Unit.") Once you replace the Cutter Unit, you can also reset the cut counter.		
Interface Setup	EOP Time	r			Specify the timeout period before cancellation of print jobs the cannot be received by the printer.		
	TCP/IP	IPv4	IPv4 Mode	)	Choose whether the printer IP address is configured automat cally or a static IP address is entered manually.		
			Protocol	DHCP	Specify the protocol used to configure the IP address automa		
				BOOTP	cally.		
				RARP			
			IPv4 Set-	IP Address	Specify the printer network information when using a static IP		
			tings	Subnet Mask	address. Enter the IP address assigned to the printer, as well as the ne		
				Default G/W	work subnet mask and default gateway. The value that was automatically configured is displayed if yo have set <b>IPv4 Mode</b> to <b>Automatic</b> .		
			DNS Set- tings	DNS Dync update	Specify whether DNS server registration is updated automati- cally.		
				Pri. DNS SrvAddr	Specify the DNS server address.		

		Setti	ng Item			Description, Instructions
nterface	TCP/IP	IPv4	DNS Set-	Sec. DNS	SrvAddr	Specify the DNS server address.
Setup			tings	DNS Host Name		Specify the DNS host name.
				DNS Doma	ain Name	Specify the DNS domain name.
		IPv6	IPv6 Supp	IPv6 Support		Specify whether to connect via IPv6.
			IPv6 StlessAddrs			Specify whether a IPv6 stateless address is used.
			DHCPv6			Specify whether DHCPv6 settings are used.
			DNS Set- tings	DNS Dync up-	Statefull Addr	Specify whether DNS server registration is updated automatically.
				date	Stateless Addr	
					Pri. DNS S	SrvAddr
				Sec. DNS	SrvAddr	
				DNS Host	Name	Specify the DNS host name.
				DNS Doma	ain Name	Specify the DNS domain name.
	NetWare	NetWare				Specify the NetWare protocol. To apply your changes, choose <b>Register Setting</b> .
	Frame Type				Specify the frame type to use.	
		Print Serv	/ice			Choose the print service.
	AppleTalk				Specify whether to use the AppleTalk protocol. To apply your changes, choose <b>Register Setting</b> .	
Ethernet Au Driver		Auto Detect				Specify the communication method. To apply your changes, choose <b>Register Setting</b> . Choose <b>On</b> for automatic configuration of the LAN communication protocol. Choose <b>Off</b> to use settings values of <b>Comm.Mode</b> and <b>Ethernet Type</b> .
		Comm.Mode				Choose the LAN communication method.
		Ethernet Type				Choose the LAN transfer rate.
		Spanning	Tree			Choose whether spanning-tree packets are supported over th LAN.
		MAC Add	ress			Indicates the MAC address.
	Interface F	Print				Print interface settings information.
	Return De	faults				Choose <b>OK</b> to restore <b>Interface Setup</b> settings to the default values.
System	Sleep Tim	er				Specify the period before the printer enters sleep mode.
Setup	Shut Down Timer Buzzer Contrast Adj.					Sets the time until the printer turns off automatically. If no operations are performed on the printer for the duration of the time set in <b>Shut Down Timer</b> after entering Sleep mode, the printer automatically turns off.
						Choose <b>On</b> for the buzzer to sound once for warnings and three times for errors.
					Adjust the Display Screen contrast level.	
	Date &	Date				Set the current date.
	Time	Time				Set the current time. Available only if the <b>Date</b> setting is specified.
	Date Form	at				Specify the date format.
	Language					Specify the language used on the Display Screen.

	Setting Item	Description, Instructions
/stem Time Zo etup	ne	Specify the time zone. Time zone options indicate a main city in this time zone and the difference from Greenwich Mean Time.
Length	Jnit	Choose the display unit for length. Change the unit displayed for the remaining amount of roll paper, <b>Tot.Print Area</b> , and so on.
Detect N	lismatch	Specify printing behavior if the type and size of paper specified in the printer menu does not match the type and size in the printer driver. Choose <b>Pause</b> to have printing paused under these circum- stances. Choose <b>Warning</b> to continue printing after notifica- tion. Choose <b>None</b> to continue printing without notification. Choose <b>Hold Job</b> to store jobs with mismatched types and sizes of paper on the printer hard disk, in a print queue await- ing processing. (See "Using the Printer Hard Disk.") —P.754
Paper Size Ba- sis	Sht Selection 1	If sheet size detection is activated, choose whether <b>ISO A3+</b> or <b>13"x19"(Super B)</b> is applied when a sheet of an intermediate size is detected.
	Sht Selection 2	If sheet size detection is activated, choose whether <b>ISO B1</b> or <b>28"x40" (ANSI F)</b> is applied when a sheet of an intermediate size is detected.
	per Size	Choose <b>On</b> to use the paper size setting as the basis for print- ing instead of other settings. The margin setting of the printer menu will be used instead of the margin setting of the printer driver if the latter is smaller, which may prevent text or images in the margin from being printed. SAMPLE Choose <b>Off</b> to give priority to margin settings. The larger value is used if the margin specified in the printer driver does not match the margin in the printer menu. SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE SAMPLE
Rep.P.h	ead Print	Choose <b>On</b> to have the printer automatically execute the <b>Ad-vanced Adj</b> . operations after you replace the Printhead. (See "Automatic Adjustment to Straighten Lines and Colors.") $\rightarrow$ P.798
Nozzle (	Check	In <b>Frequency</b> , specify the timing for automatic checks of noz- zle clogging. Choose <b>Standard</b> to have the printer adjust the timing for checks based on the frequency of nozzle use. Choose <b>1 page</b> to check once per page.

		Setting Item	Description, Instructions
System Setup	Nozzle Ch	eck	Select <b>Warning</b> > <b>On</b> to display warnings if the nozzles clog during printing.
	CarriageS	canWdth	Specify the scan width of the carriage during printing. Select <b>Automatic</b> for movement equivalent to the width of paper loaded. Selecting <b>Fixed</b> will reduce any soiling on the back of the paper, although printing may take a little longer.
	Use Remo	teUI	Choosing <b>Off</b> prohibits access from RemoteUI. Settings can only be configured from the control panel.
	Reset Pap	rSetngs	Restores settings that you have changed with Media Configu- ration Tool to the default values.
	Erase HDD Da- ta	High Speed	Erases file management data for print job data stored on the printer's hard disk. (See "Erasing Data on the Printer's Hard Disk.") $\rightarrow$ P.695
		Secure High Spd.	Overwrites the entire hard disk with random data. (See "Erasing Data on the Printer's Hard Disk.") $\rightarrow$ P.695
		Secure	Overwrites the entire hard disk with 00, FF, and random data (one time each). Verification is performed to check if the data was correctly written. (See "Erasing Data on the Printer's Hard Disk.")
	Output	Print	Select the printing method for jobs received from software oth
	Method	Print (Auto Del)	er than the printer driver. When using the printer driver, config ure settings on the printer.
		Save: Box XX	To print as usual, select <b>Print</b> . Selecting <b>Print (Auto Del)</b> will print the job and then delete the data from the printer's hard disk. Selecting <b>Save: Box 01</b> will only save the print job in the box, without printing it.
	Print After	Recv	A setting for jobs received from software other than the printer driver. When using the printer driver, configure settings on the printer. Select <b>On</b> to print the job after it has been saved.
	Common	Box Set.	Select <b>Print (Auto Del)</b> to print without saving jobs in the box shared among multiple users.
	Show Job	Log	Selecting <b>Off</b> prevents display of the log in <b>Job Menu</b> > <b>Job</b> <b>Log</b> . Additionally, the log is not printed if you choose <b>Job</b> <b>Menu</b> > <b>Print Job Log</b> . Note that because job logs are not co lected, the Status Monitor accounting functions will not work correctly.
Take-up	Use Take-	up Reel	Selecting Enable allows use of the Media Take-up Unit.
Reel	Auto Feed		Available only if <b>Use Take-up Reel</b> is already set to <b>Enable</b> . Rolls are automatically advanced to the position for attachment to the Rewind Spool.
	Skip Take	-Up Err	Available only if <b>Use Take-up Reel</b> is already set to <b>Enable</b> . Choose <b>On</b> to continue with printing even if an error occurs with the Media Take-up Unit. Choose <b>Off</b> to pause printing if a take-up error occurs.
Prep.MovePrinter			When transferring the printer to another location, choose the level of transfer and follow the instructions on the screen. (Se "Preparing to Transfer the Printer.") →P.865 Not displayed during a warning message that the remaining Maintenance Cartridge capacity is low.
Admin. Menu	Change P	assword	The password that can be entered is a number from 0 to 9999999.

		Setting Item	Description, Instructions
Admin. Menu	Change Password		<ul> <li>The restriction states and main items are shown below. For more specific information on restricted items, see "Menu Structure." →P.661</li> <li>Viewing and configuration by administrators only Change Password Init.Admin.Pswd Etc.</li> <li>Viewing and configuration by administrators, and only</li> </ul>
			viewing by other users Date & Time Time Zone Use RemoteUI Etc.
	Init.Admin.Pswd		Choose <b>OK</b> to restore the <b>Admin. Menu</b> password to the default values.
Adj. Fine Feed (*2)(*3)			Displayed when you have selected <b>Feed Priority &gt; Adj. Prior-</b> ity > Automatic or Print Quality. Fine-tune the feed amount manually.
Printer Info (*2)	Paper Info		Indicates the current paper size, type, and related printer set- tings.
	Ink Info		Indicates ink levels and maintenance cartridge capacity.
	Head In-	Printhead L	Indicates information about the printhead.
	fo	Printhead R	
	System Info		Indicates the firmware version, serial number, and interface in- formation.
	Error Log		Indicates the most recent error messages (up to five).
	LING LOG		

\*1: A rough estimate of how much ink was consumed per job is displayed. Actual ink consumption may be different. The average margin of error for estimates calculated according to Canon measurement conditions for ink costs is ±15%. Canon does not guarantee the accuracy of these estimates. Estimates may vary depending on conditions of use. Calculation of these estimates does not include ink consumed when cleaning printheads by forceful ejection of ink.

\*2: Displayed as the menu during printing while printing is in progress.

\*3: Not displayed in the regular menu.

# Status Print

You can print a **Status Print** report indicating the current status of the printer. With **Status Print**, information is printed regarding the printer firmware version, various settings, and the status of consumables.

## Printing Status Print reports

When using sheets, load paper of A4/Letter size. You will need at least four sheets. The required sheet quantity varies depending on the execution log quantity of unique calibration.

2	On the <b>Tab Selection screen</b> of the Control Panel, press ◀ or ▶ to select Settings/Adj. tab ( .).	Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678
	• If the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button. Note	
3	Press the <b>OK</b> button. The <b>Set./Adj. Menu</b> is displayed.	
4	Press $\blacktriangle$ or $\blacksquare$ to select <b>Test Print</b> , and then press the <b>OK</b> button.	
5	Press ▲ or ▼ to select Status Print, and then press the OK button.	

## Checking the information in Status Print reports

The following information is included in **Status Print** reports.

Canon imagePROGRAF iPFxxxx Status Print	Printer model
Firm	Firmware version
Boot	Boot ROM version
MIT(DBF)	MIT database format version
MIT(DB)	MIT database version
S/N	Printer serial number
Date	Indicates when the status print report was printed.

Paper Menu	J	Information on the loaded paper.
	Paper Type	
	Roll Media	
	Cut Sheet	
	ManageRemainRoll	
	Keep Paper Type	

Job Menu			Job-related information.
	Job Log HDD Information		A counter for maintenance purposes. Various information about previous jobs.
			Indicates the total hard disk capacity and the mail box free space.
		Total capacity	
	Box free space		

Set./Adj. Menu			Settings and adjustment information.
System Setup		dr	Printer system settings, as well as settings regarding warnings and errors.
	Sleep Timer		
		Shut Down Timer	

	Buzzer			Printer system settings, as well as settings regarding
	Contrast Adj.			warnings and errors.
	Date Format			
				_
	Language Time Zone			-
				_

# Front

#### a Top Cover

Open this cover to install the Printhead, load paper, and remove any jammed paper from inside the printer as needed. (See "Top Cover (Inside).") -P.687

## **b** Cutter Groove

Paper is cut (using the cutter or manually with scissors) over this groove.

#### c Ejection Guide

Guides printed documents as they are ejected. Raise the guide when loading a roll.

#### d Roll Holder Slot

684

Slide the Roll Holder into this slot.

# e Roll Holder

Load the roll on this holder.

- **f** Ejection Support Prevents printed documents from winding around the Roll Holder or being drawn into the Paper Feed Slot.
- g Paper Feed Slot When loading a roll, insert the edge of the roll paper here.
- h Holder Stopper

Secure rolls on the Roll Holder with this part.

i Ink Tank Cover

Open this cover to replace an Ink Tank. (See "Ink Tank Cover (Inside).") →P.689

j Control Panel

Use this panel to operate the printer and check the printer status. (See "Control Panel.") →P.648

k Release Lever

Releases the Paper Retainer. Lift this lever toward the front of the printer when loading paper.

Maintenance Cartridge

Absorbs ink used for maintenance purposes such as head cleaning. (Replace the cartridge when it is full.)

m Carrying Handles

When carrying the printer, have six people hold it by these handles under both sides.

n Maintenance Cartridge Cover

Open this cover to replace the Maintenance Cartridge.

Stand

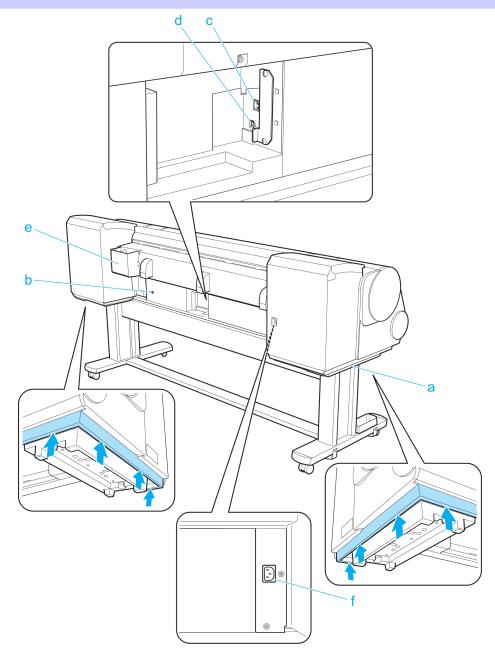

A stand that holds the printer. Equipped with casters to facilitate moving it. (See "Stand.") — P.690

- p Media Take-up Unit
   Automatically winds documents printed on rolls. (See "Media Take-up Unit.") →P.691
- **q** Accessory Box

Stores printer accessories.

# Back

## a Carrying Handles

When carrying the printer, have six people hold it by these handles under both sides.

## **b** Media Take-up Unit Power Inlet

Connect the power cord of the Media Take-up Unit here.

# c Ethernet Port

Connect an Ethernet cable to this port.

# d USB Port

Connect a USB cable to this port. It supports Hi-Speed USB.

## e Manual Pocket

Store printer manuals in this pocket.

# **f** Power Supply Connector

Connect the power cord to this connector.

# Top Cover (Inside) h а d e g

# a Top Cover Roller

Prevents paper from rising when ejected.

# **b** Paper Alignment Line

Align paper with this line when loading it.

## c Carriage

Moves the Printhead. The carriage serves a key role in printing. (See "Carriage.") P.688

#### d Carriage Shaft

The Carriage slides along this shaft.

#### e Paper Retainer

Important in supplying the paper. This retainer holds paper as it is fed.

#### f Platen

The Printhead moves across the platen to print. Vacuum holes on the platen hold paper in place.

#### g Borderless Printing Ink Grooves

For catching ink outside the edges of paper during borderless printing.

#### h Cleaning Brush

When cleaning inside the printer under the Top Cover, use this brush to sweep away paper dust on the Platen. Also use the brush to move the blue Switch on the Platen.

#### i Fixed Blade

The Cutter Unit passes over this rail to cut paper.

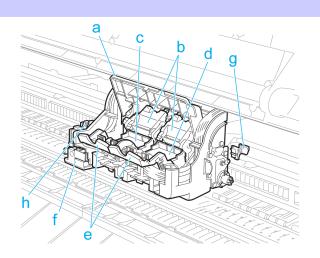

#### j Linear Scale

The linear scale serves a key role in detecting the Carriage position. Be careful not to touch this part when cleaning inside the Top Cover or clearing paper jams.

#### k Switch

Set the switch to the side opposite ● if the edges of printed images are blurred. Set the switch to the ● side before borderless printing. (See "Setting the Blue Switch on the Platen.") →P.893

# Carriage

a Carriage Cover Protects the Carriage.

- **b** Printhead Fixer Cover Holds the Printhead in place.
- c Printhead L

The printhead is equipped with ink nozzles. The carriage serves a key role in printing.

d Printhead R

The printhead is equipped with ink nozzles. The carriage serves a key role in printing.

e Printhead Fixer Lever

Locks the Printhead Fixer Cover.

688

Printer Parts

Printer parts

# f Cutter Unit

A round-bladed cutter for automatic paper cutting. Retracted when not in use.

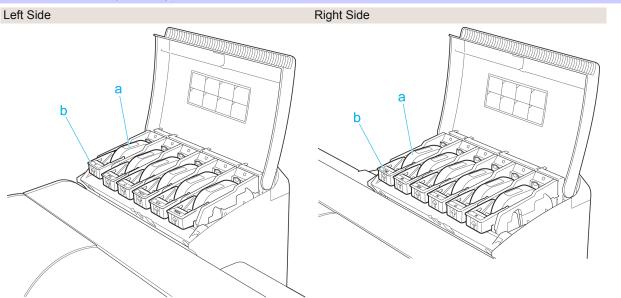

# g Shaft Cleaner

Prevents the Carriage Shaft from becoming dirty.

## h Cutter Unit Detachment Lever

Used when replacing the Cutter Unit.

# Ink Tank Cover (Inside)

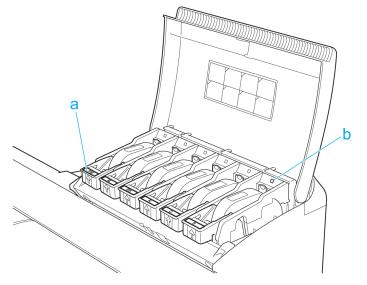

\*1: Note: The figure shows the printer as loaded with 700 ml (23.7 fl oz) lnk Tank.

# a Ink tanks

Cartridges of ink in various colors.

## b Ink Tank Lock Lever

A lever that locks the lnk Tank in place and protects it. Lift and lower the lever when replacing an lnk Tank. To open it, lift the stopper of the lever until it stops, and then push it down toward the front. To close it, push it down until it clicks into place.

a Ink Color Label

Load an Ink Tank that matches the color and name on this label.

**b** Ink Lamp (Red)

Indicates the state of the Ink Tank as follows when the Ink Tank Cover is opened.

On

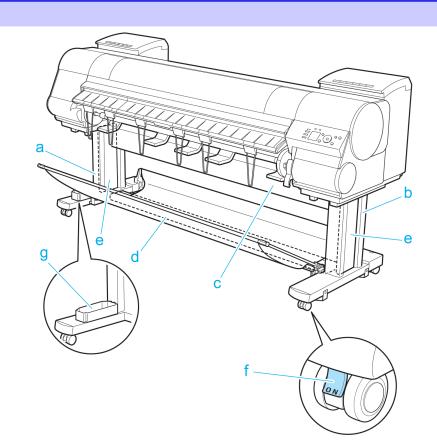

The Ink Tank is installed correctly.

• Off

No Ink Tank is installed, or the ink level detection function is disabled.

- Flashing Slowly Not much ink is left.
- Flashing Rapidly Ink tank is empty.

Stand

# a Stand L

The left leg of the Stand.

b Stand R

The right leg of the Stand.

**c** Top Stand Stay

Supports Stand L and Stand R. Attach the optional Media Take-up Unit to this part.

## d Bottom Stand Stay

Supports Stand L and Stand R.

## e Leg Covers

Covers for Stand L and Stand R.

#### f Stopper

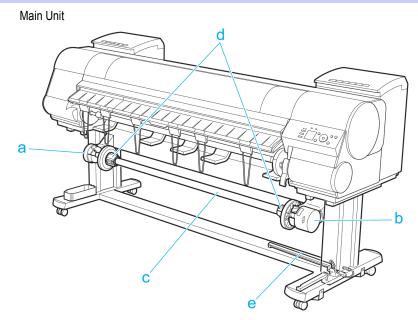

Locks the Stand casters.

Always release the Stopper before moving the printer. Moving the printer while the Stopper is locked may scratch the casters or the floor.

## g Accessory Pocket

Stores printer accessories.

# Media Take-up Unit

# a Left Media Take-up Unit

Load the Rewind Spool here.

# **b** Right Media Take-up Unit

Load the Rewind Spool here. Includes the Media Take-up Unit **Power** button,  $\blacktriangle$  and  $\checkmark$  buttons to advance or rewind paper, and a power cord.

c Rewind Spool

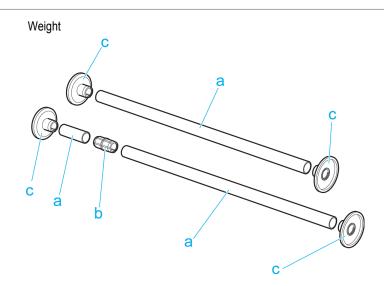

Winds documents printed on rolls.

d 3-inch Adapter

When rewinding rolls with 3-inch paper cores, attach the adapter to the Rewind Spool.

# e Media Take-up Sensor

A sensor for automatically rewinding rolls.

#### a Weight Roll (7)

Weights required when rewinding rolls. Use one roll or combine two (with a Weight Joint), depending on the roll width.

## **b** Weight Joint

Fastens two Weight Roll.

#### **c** Weight Flange (2 Sets)

Attached to the ends of Weight Roll to adjust the weight. Use Weight Flange 1 or Weight Flange 2, depending on the type of paper. (See "Loading the Rewind Spool on the Media Take-up Unit.")  $\rightarrow$  P.572

# Hard Disk

Printer Hard Disk Operations	693
Checking the Free Hard Disk Space Erasing Data on the Printer's Hard Disk	

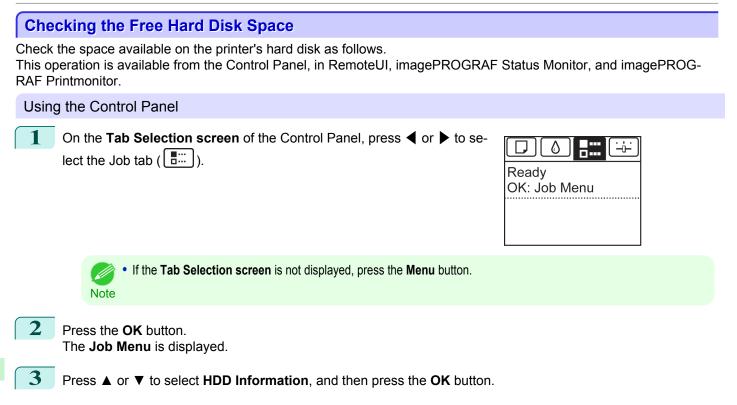

# **Printer Hard Disk Operations**

Printer hard disk operations are available from the following programs and interfaces.

- Printer driver
- imagePROGRAF Print Plug-In
- imagePROGRAF Status Monitor
- imagePROGRAF Printmonitor
- RemoteUI
- Control Panel

#### The hard disk operations available through each interface are as follows.

Ope	ration	<ul> <li>Printer driver</li> <li>imagePROGRAF Print Plug-In</li> </ul>	<ul> <li>imagePROGRAF Status Monitor</li> <li>imagePROGRAF Print- monitor</li> </ul>	RemoteUI	Control Panel

# Erasing Data on the Printer's Hard Disk

When erasing all data on the hard disk, choose from the following three options. This operation is only available from the Control Panel.

Erasure Method	Details	
High Speed	Erases file management data for print job data stored on the printer's hard disk. Choose this method for relative- ly fast erasure. Because only the file management data is erased, the print job data itself is not erased. Note that it may be possible to read this data using commercial data recovery software.	

Erasure Method	Details		
Secure High Spd.	Overwrites the entire hard disk with random data. No verification is performed to check if the data was correctly written. Choose this method to erase highly confidential data. Note that it may be possible to read the overwritten data using specialized data recovery tools.		
Secure	Overwrites the entire hard disk with 00, FF, and random data (one time each). Verification is performed to chec if the data was correctly written. Choose this method to erase especially confidential data. It is virtually impossi- ble to recover the overwritten data. Conforms to the DoD5220.22-M standard of the U.S. Department of De- fense.		
Important In this case • Erase HDD	secure method of preventing data recovery, we recommend physical e, the hard disk can no longer be used. <b>D Data</b> is not available if there is a job queue. <i>y</i> , print jobs are not processed during execution of <b>Erase HDD Data</b> .	ly or magnetically destroying the hard disk

Network Setting

# **Network Environment**

# **Network Environment**

# System requirements

The system requirements, which vary depending on your network, are as follows.

- Printing over a TCP/IP network (when using IPv4)
  - Compatible operating systems
    - Windows XP
    - Windows Server 2003
    - Windows Vista
    - Windows Server 2008
    - Windows 7
    - Windows Server 2003 x64
    - Windows Vista x64
    - Windows Server 2008 x64
    - Windows 7 x64
    - Mac OS X v10.2.8 or later
    - Unix (Solaris 9)
    - Unix (Red Hat 9)

#### Printing over a TCP/IP network (when using IPv6)

- Compatible operating systems
  - Windows Vista
  - Windows Server 2008
  - Windows 7
  - Windows Vista x64
  - Windows Server 2008 x64
  - Windows 7 x64
  - Mac OS X v10.3.9 or later

Note

When using IPv6, you must specify IPv6 on the Control Panel or in RemoteUI. For instructions, "Configuring TCP/IPv6 Network Settings" → P.708 or see "Configuring the Printer's TCP/IP Network Settings With RemoteUI." → P.709

- The imagePROGRAF printer driver is supported in Mac OS X v10.5.8 or later.
- The imagePROGRAF printer driver is not compatible with Unix.

#### • Printing over an AppleTalk network

- Compatible operating systems
  - Mac OS X v10.2.8–10.4
  - The printer cannot be used over a LocalTalk network.
  - Note Compatible with EtherTalk Phase 2.
    - The imagePROGRAF printer driver is not compatible with AppleTalk.

### • Printing over a NetWare network

- Compatible servers
  - Novell NetWare 4.2/5.1/6.0
  - Compatible clients

Windows XP (Professional)

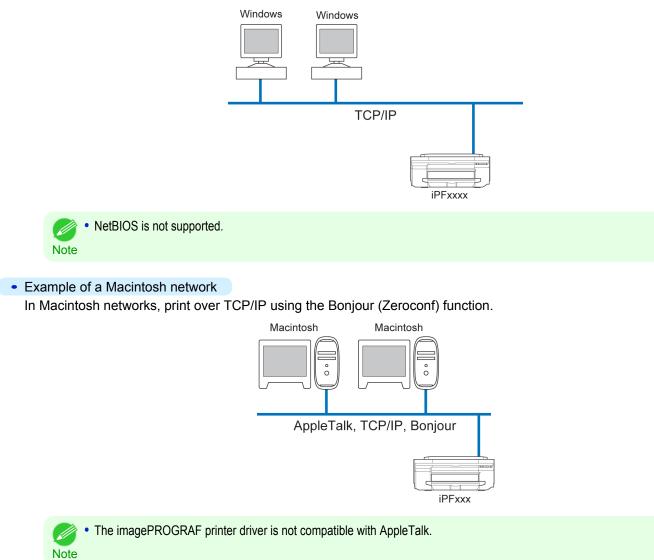

In NetWare 6.0, iPrint is not supported.

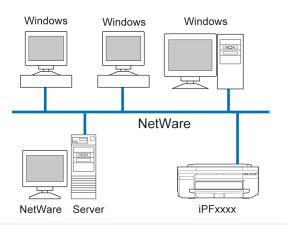

## Network Environment

After confirming what type of network environment you will connect the printer to, set up the printer and computers as needed. For the specifications of the network interface, see "Specifications." 
-P.934

#### • Example of a Windows network

In Windows networks, print over TCP/IP.

• Even if there is a NetWare server in your network environment, you can use it in conjunction with TCP/IP or AppleTalk. In this case, complete the settings for each protocol you will use.

# Using RemoteUI

# Using RemoteUI

RemoteUI is software with which you can access the printer via the network from your Web browser to confirm the printer status, operate jobs, and configure the settings. Since the software (Web server) for using RemoteUI is built in the printer, preparing software other than a Web browser is unnecessary. You can use RemoteUI if an imagePROG-RAF printer on a network is connected to your computer. If you start your Web browser and specify the IP address of the printer, the RemoteUI screen is displayed, and you can use RemoteUI.

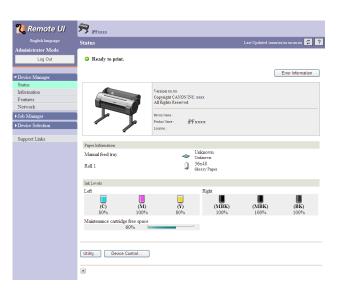

# What You Can Do With RemoteUI

With RemoteUI, you can access the printer via a network, configure network settings, and display the current status of the printer, various types of information, the processing status of jobs, etc.

# Starting RemoteUI

Start RemoteUI by the following operations.

- 1
- Start your Web browser.
- 2 Enter the following URL in Address or Location. http://printer IP address or name/ Example: http://xxx.xxx.xxx/
- 3 The Rei
  - The RemoteUI screen is displayed.

The screen slightly differs depending on the model of printer.

# Configuring the Network With RemoteUI

For details on configuring printer settings for networks, refer to the following topics.

- Configuring the Printer's TCP/IP Network Settings With RemoteUI → P.709
- Configuring the Printer's AppleTalk Network Settings →P.724
- Configuring the Printer's NetWare Network Settings With RemoteUI →P.717
- Specifying Printer-Related Information →P.726

- This cannot be used connected via a proxy server. In environments where a proxy server is used, add the printer's IP address to **Exceptions** (addresses accessed without a proxy server) in the web browser proxy server settings. (Settings may vary depending on the network environment.)
- Enable JavaScript and cookies in the web browser.
- If you access RemoteUI with the printer name instead of its IP address, make sure the DNS settings are correctly configured.
- Depending on the network environment, you may not be able to start RemoteUI.
- Confirm whether System Setup > Use RemoteUI is set to On on the Control Panel of the printer.

 RemoteUI also offers many other features. You can display the ink levels, check error messages and other status information, and cancel print jobs.

- By factory default, the English screen is displayed. To change the display language, select the desired language under Language before logging on in administrator mode.
- If you login in Administrator Mode, you can configure to use the Jumbo Frame function in the **Network** page. However, this function might not be able to be used depending on the network environment.

# **Initial Settings**

Configuring the IP Address on the Printer Configuring the IP Address Using imagePROGRAF Device Setup Utility Configuring the IP Address Using the Printer Control Panel Configuring the IP Address Using ARP and PING Commands	730 705
Configuring TCP/IPv6 Network Settings	708
Configuring the Printer Driver Destination (Windows) Configuring the Printer Driver Destination (Mac OS X)	
Configuring the Printer's TCP/IP Network Settings With RemoteUI	709

# Configuring the IP Address on the Printer

You must configure the printer's IP address before using the printer in a TCP/IP network.

The printer's IP address is configured automatically when you install the printer driver following the instructions in the Setup Guide.

Configure the IP address by using imagePROGRAF Device Setup Utility, the printer Control Panel, or ARP or PING commands, if the IP address is changed, or if you change the printer connection mode to a network connection. For details on configuring the IP address, refer to the following topics.

- Configuring the IP Address Using imagePROGRAF Device Setup Utility →P.730 (Windows)
- Configuring the IP Address Using the Printer Control Panel →P.705
- Configuring the IP Address Using ARP and PING Commands →P.706

If you use a DHCP server for automatic assignment of the printer's IP address, printing may no longer be possible after the
printer is turned off and on. This is because an IP address different from before has been assigned. Thus, when using DHCP
server functions, consult your network administrator and configure the settings in one of the following ways.

Configure the setting for dynamic DNS updating

In the printer menu, either set **DNS Dync update** to **On**, or activate the setting **Enable DNS Dynamic Update** in RemoteUI.

(See "Menu Settings.") →P.667

(See "Configuring the Printer's TCP/IP Network Settings With RemoteUI.") →P.709

Configure the setting for assignment of the same IP address each time the printer starts up

We recommend configuring the printer's IP address even if you will use the printer in networks other than TCP/IP networks. Configuring the printer's IP address enables you to use RemoteUI to configure the network settings and manage the printer with a web browser.

For details on RemoteUI, see "Using RemoteUI." →P.703

# Configuring the IP Address Using the Printer Control Panel

This topic describes how to configure the printer's IP address on the Control Panel.

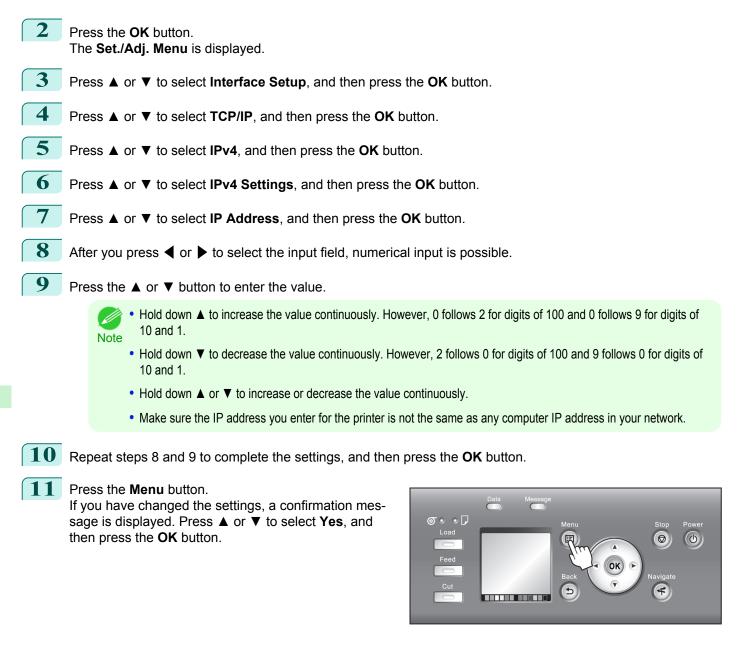

On the **Tab Selection screen** of the Control Panel, press **◀** or **▶** to select the Settings/Adj. tab ( <u>--</u>).

If the Tab Selection screen is not displayed, press the Menu button.

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

Note

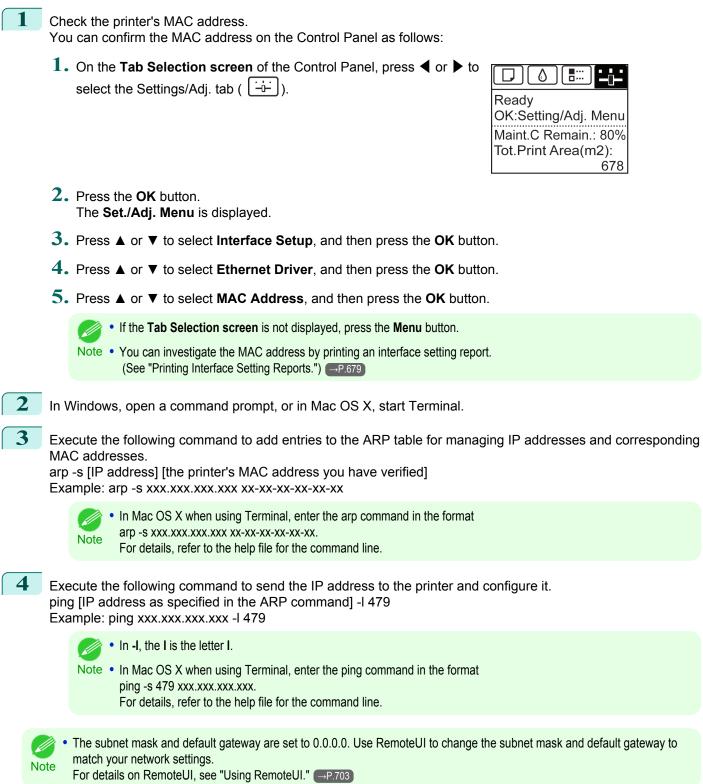

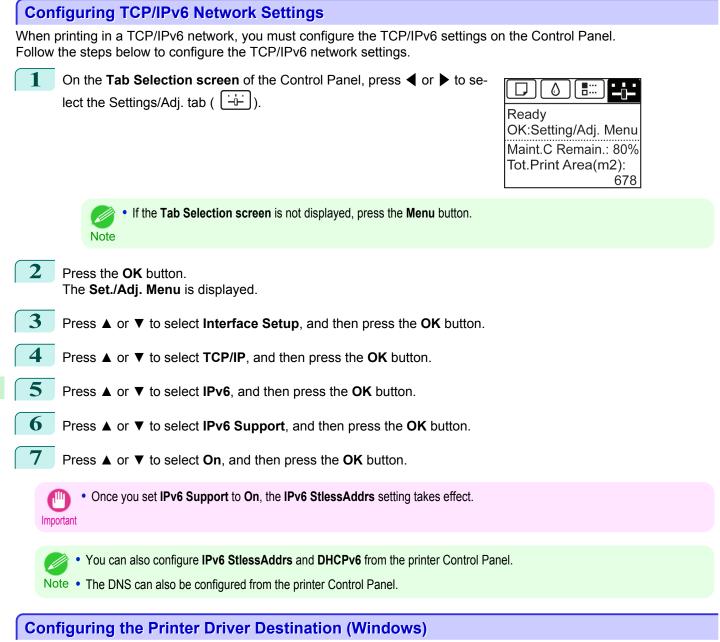

- Be sure to complete step 11. This will activate the values you have entered.
- Important If an error message is displayed, check the settings and correct any invalid values.
  - You can also specify the subnet mask and default gateway on the Control Panel.
- Note The DNS can also be configured from the printer Control Panel.

# Configuring the IP Address Using ARP and PING Commands

This topic describes how to configure the IP address using ARP and PING commands.

To use the ARP and PING commands, you will need to know the printer's MAC address. You can confirm the MAC address on the Control Panel.

This topic describes how to specify the printer driver destination if the printer's IP address is changed, or if you will use the printer over a network connection instead of via USB connection.

The procedure described below is the configuration based on the LPR or Raw protocol using the standard TCP/IP port in Windows (**Standard TCP/IP Port**).

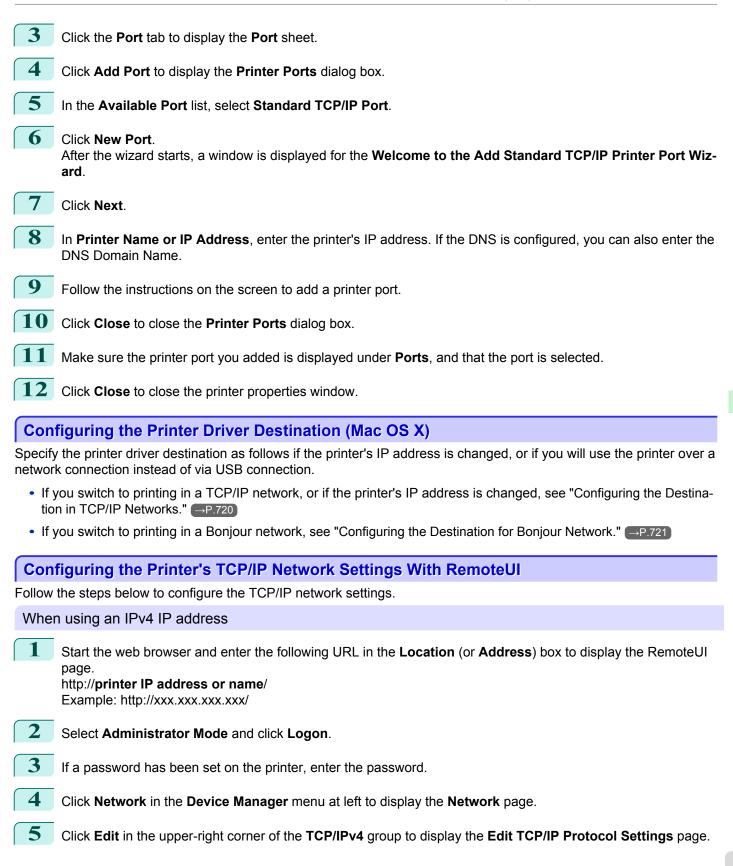

2

This section describes the procedure in Windows 7.

708

Open the Devices and Printers window.

Right-click the icon of this printer and choose **Printer Properties** to open the printer properties window.

Network Setting

Initial Settings

# 6 Refer to the TCP/IP Settings Items table to complete the settings.

TCP/IP Settings Items

Item	Details	Default Setting
Use DHCP	Activate this setting to use DHCP for configuring the IP address.	Off
Use BOOTP	Activate this setting to use BOOTP for configuring the IP address.	Off
Use RARP	Activate this setting to use RARP for configuring the IP address.	Off
Enable DNS Dynamic Update	Activate this setting to perform DNS server registration automatically.	Off
Use Zeroconf Function	Activate this setting to use Bonjour.	On
IP Address	Specify the printer's IP address.	0.0.0.0
Subnet Mask	Specify the printer's subnet mask.	0.0.0.0
Gateway Address	Specify the printer's default gateway.	0.0.0.0
LPD Printing	Activate this setting to use LDP Printing.	On
IPP Printing	Activate this setting to use IPP Printing.	On
IPP Printer URI	Specify the URI of the printer used for IPP printing using up to 252 characters.	printer
RAW Printing	Activate this setting to use Raw Printing.	On
RAW Mode Bi-direc- tion	Activate this setting to use Raw mode bidirectional communication.	Off
FTP Printing	Activate this setting to use FTP Printing.	On
Use Discovery	Activate this setting to use SLP Discovery function.	On
Scope	Enter the SLP search range.	default
SMTP Server Address	Specify the SMTP server's IP address. You can also specify the SMTP server domain name, if desired.	0.0.0.0
Primary DNS Server Address	Specify the IP address of the primary DNS server.	0.0.0.0
Secondary DNS Server Address	Specify the IP address of the secondary DNS server.	0.0.0.0
DNS Host Name	Specify the printer host name, up to 63 characters (1–63 characters). Use single- byte letters, numbers, and - (hyphens). Do not use numbers or - for the first char- acter or - for the last character.	NB-18GBipxxxxx
DNS Domain Name	Specify the printer domain name, up to 63 characters. Use single-byte letters, numbers, - (hyphens), and . (periods). Do not use numbers, -, or . for the first character, or - or . for the last character.	blank
Multicast DNS Service Name	Specify the printer's Multicast DNS service name. (1–63 characters) This name will be displayed when Bonjour functions are used.	Canon iPFxxxx (xxxxxx)

# Click **OK** to display the **Network** page.

- If you specify to configure the IP address using DHCP, BOOTP, or RARP, there must be a server that supports such protocol running in the network.
- If you specify to configure the IP address using DHCP, BOOTP, or RARP, the IP address obtained by this method is used first. If you cannot obtain the IP address, the address specified in **IP Address** is used.
- It takes up to two minutes to determine whether DHCP, BOOTP, or RARP are available. We recommend clearing check boxes
  of options you will not use.
- If you are using a DNS server, select Enable DNS Dynamic Update and enter the IP Address for DNS servers and DNS domain name in Primary DNS Server Address, Secondary DNS Server Address and DNS Domain Name, respectively.

710

7

Note

#### When using an IPv6 IP address 1 Start the web browser and enter the following URL in the Location (or Address) box to display the RemoteUI page. http://printer IP address or name/ Example: http://xxx.xxx.xxx.xxx/ 2 Select Administrator Mode and click Logon. 3 If a password has been set on the printer, enter the password. 4 Click **Network** in the **Device Manager** menu at left to display the **Network** page. 5 Click Edit in the upper-right corner of the TCP/IPv6 group to display the Edit TCP/IPv6 Protocol Settings page. 6 Refer to the TCP/IPv6 Settings Items table to complete the settings. TCP/IPv6 Settings Items Item Details Default Setting Use IPv6 Activate to enable IPv6. Off Use DHCPv6 Off Activate when using a DHCPv6 server to acquire the IP address

Use a stateless address Use a manual address		Activate when using a DHCPV6 server to acquire the IP address.	ΟΠ
		Activate when using an IPv6-compatible router to acquire the IP address.	On Off
		Activate when configuring the IP address manually.	
	IP Address	Enter the printer's IP address.	::
	Prefix Length	Enter the IP address prefix length.	0
	Default Router Address	Enter the default router address.	::
	Prefix Length	Enter the prefix length of the default router address.	0
Primary DN	NS Server Address	Specify the IP address of the primary DNS server.	::
Secondary	DNS Server Address	Specify the IP address of the secondary DNS server.	
Use the same host name and domain name as IPv4		Activate when using the same DNS host and domain names as for IPv4.	Off
	DNS Host Name	Specify the printer host name, up to 63 characters (1–63 characters). Use single-byte letters, numbers, and - (hyphens). Do not use numbers or - for the first character or - for the last character.	NB-18GBip6xxxxx
	DNS Domain Name	Specify the printer domain name, up to 63 characters. Use single- byte letters, numbers, - (hyphens), and . (periods). Do not use num- bers, -, or . for the first character, or - or . for the last character.	blank
Perform dynamic updating of stateful addresses		Activate this setting to automatically register the stateful address with the DNS server.	Off
Dynamically update the stateless ad- dress Dynamically update the manual ad- dress		Activate this setting to automatically register the stateless address with the DNS server.	Off
		Activate this setting to automatically register the manual address with the DNS server.	Off

Click **OK** to display the **Network** page.

• If you are using a DNS server, select **Enable DNS Dynamic Update** and enter the IP Address for DNS servers and DNS domain name in **Primary DNS Server Address**, **Secondary DNS Server Address** and **DNS Domain Name**, respectively.

Specifying the Printer's Frame Type	712
Specifying NetWare Print Services	715
Configuring the Printer's NetWare Network Settings With RemoteUI	717

# Configuring NetWare Network Settings

To print over a NetWare network, configure the network environment as follows.

To configure network settings, you must be logged in with administrative rights such as Administrator account. We recommend that your network administrator configure the network settings.

1

• This section describes the procedure in Windows 7.

For instructions, see "Specifying the Printer's Frame Type." →P.712
Specify the NetWare print services, including the print server and queue. For instructions, see "Specifying NetWare Print Services." →P.715
Specify NetWare protocol details besides the frame type. For details on how to configure the settings, see "Configuring the Printer's NetWare Network Settings With Re-

Specify the Ethernet frame type for communication between the printer and computers.

moteUI."  $\rightarrow$  P.717

After you have completed the steps above, configure each computer for printing over the NetWare network.

# 4 Connect to the NetWare network.

Install NetWare client software on each computer to be used for printing over the network, and log in to the NetWare server or tree. For instructions on connection, refer to the NetWare and operating system documentation.

# 5 Install the printer driver.

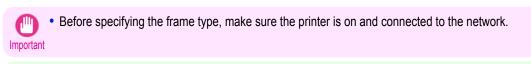

Follow the instructions of your network administrator to install the printer driver on each computer to be used for printing. When installing the printer driver, choose **Network Printer** as the printer destination, and then choose the print queue created from the NetWare print service settings.

- **6** Follow these steps to configure the printer port. This step is not necessary if you specified the printer destination during installation of the printer driver.
  - **1.** Open the **Devices and Printers** window.
  - 2. Right-click the icon of this printer and choose **Printer Properties** to open the printer properties window.
  - **3.** Click the **Port** (or **Advanced**) tab to display the **Port** (or **Advanced**) sheet.
  - **4.** As the destination port, specify the print queue created by configuring the NetWare print service settings.

# Specifying the Printer's Frame Type

To enable communication between the printer and computers on your network, specify the Ethernet frame type in your NetWare environment. Follow the steps below to specify the frame type by using imagePROGRAF Device Setup Utility or the printer Control

Panel.

- You can specify the frame type by using RemoteUI if the printer's IP address is configured.
- Note For instructions on installing imagePROGRAF Device Setup Utility, see "Installing imagePROGRAF Device Setup Utility." →P.730.

Specifying the frame type using imagePROGRAF Device Setup Utility

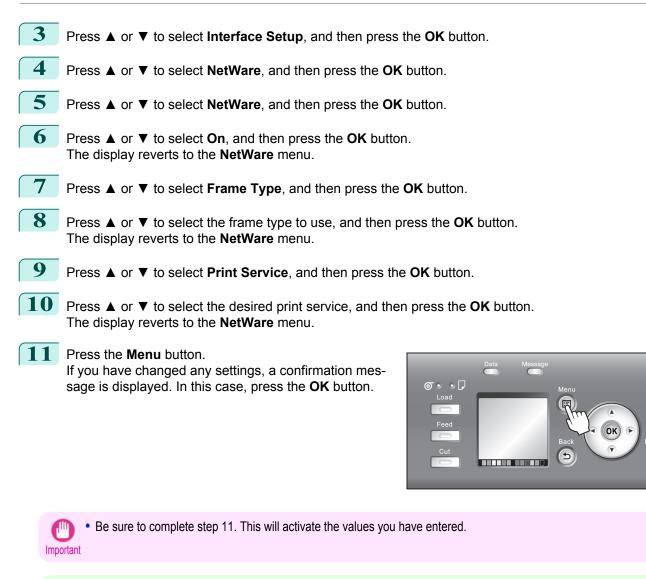

- 1
- Start imagePROGRAF Device Setup Utility.

Yew Opt	tion Help						
	Device Name	Status	Product Name	Location	IP Address	Setting IP Address	MAC Address
IPv4 IPv6	iPExcox	Usable				Manual	

- 2 In the list of printers, select the printer to configure.
- 3 Choose **Protocol Settings** from the **Printer** menu.
- 4 Click the **NetWare** tab and select the frame type in the **NetWare Frame Type** list.

Protocol Settings
Set the protocol information for the network interface board, then click Set.

• If an error message is displayed, check the settings and correct any invalid values.

Note • To cancel this process, press the **Back** button.

# **Specifying NetWare Print Services**

Before printing in a NetWare network, you must configure print services such as print servers, print queues, and so on. You can configure the print service settings from a computer using any of the following Novell software provided with NetWare.

NWADMIN

PCONSOLE

• If you use NWADMIN to configure the print service settings, Novell Client (the Novell NetWare client software) must be instal-Important

• NetWare networking is unsupported in Windows Vista, Windows Server 2008 and Windows 7.

This topic gives instructions for configuring NetWare print services. The order of this procedure may vary depending on the environment.

715

(0)

\*

# Choosing the type of print services

Before completing print service settings, choose the type of print service. Refer to the following descriptions as needed.

 In NetWare 5.1 or 6.0, NDPS may also be used as the print service. If you use NDPS, use the Novell printer gateway included with NetWare. For details on configuring NDPS, refer to the NetWare documentation.

- NDS (Novell Directory Service) and bindery NDS and bindery are both supported. Use the mode that is compatible with your network environment.
- Queue server mode and remote printer mode Queue server mode and remote printer mode are both supported.
  - Queue server mode

When using queue server mode, all print server functions are supported, so there is no need for other print server software or hardware. In NDS queue server mode (NDS PServer), the NDS print server is used for printing. In bindery queue server mode (Bindery PServer), the bindery print server is used for printing. Note that if you use queue server mode, a NetWare user license is required for each network interface.

Remote printer mode

In remote printer mode, the printer is controlled by the NetWare print server. Thus, a NetWare print server is required. In NDS remote printer mode (NPrinter), the NDS print server is used for printing, and in bindery remote printer mode (RPrinter), the bindery print server is used for printing.

# Using NWADMIN or PCONSOLE to set up the print server

Use NWADMIN to set up the print server if NDS queue server mode or remote printer mode is used.

- Log into NetWare as Administrator or with equivalent rights, and then start NWADMIN.
- 2 Run Quick Setup.
  - 1. Choose Print Services Quick Setup in the Tools menu.
  - 2. Enter a desired name in **Print Server Name**. To use an existing print server, click the button at right and choose the name from the list.
  - **3.** Enter a desired printer name in **Name**.
  - 4. To use the printer in queue server mode, choose Other/Unknown in Type. To use the printer in remote printer mode, choose Parallel in Type, click Communications, and set Ports to LPT1 and Connection Type to Manual Load.
  - 5. Enter a desired queue name in Name.
  - **6.** In **Volume**, enter the volume object (that is, the object representing the physical volume on the network) where the print queue will be created. Click the button at right to choose from a list.
  - 7. Complete other settings as needed and click **OK**.

 The print server name will be required when configuring the printer's protocol settings. Write down the print server name for future reference.

• When running Quick Setup, the printer is assigned printer number 0. When using the printer in queue server mode, do not change the printer number from 0.

## Set a password.

3

- 1. Right-click the print server created in step 2 and choose Details.
- 2. Click Change Password to open the password input dialog box. Enter the password.
- **3.** Click **OK** to close the password input dialog box.

- 4. Click OK or Cancel to close the details dialog box.
- 4 To use the printer in remote printer mode, start the print server. To use the NetWare file server as the print server, enter LOAD PSERVER.NLM at the file server and press the Enter key.

• This procedure is not required when using queue server mode.

Use PCONSOLE to set up the print server if bindery queue server mode or remote printer mode is used.

- 1 Log into NetWare as Admin and start PCONSOLE.
- 2 Switch to bindery mode.
- 3 If the print server has not been created, create it.
  - 1. In Available Options, select Quick Setup, and press the Enter key.
  - 2. Enter the name of the new print server, the new printer, and the queue.

• The print server name will be required when configuring the printer's protocol settings. Write down the print server name for future reference.

- **4** Specify the printer type.
  - 1. To use the printer in queue server mode, choose Other/Unknown in Type. To use remote printer mode, set Printer Type to Parallel and Position to Manual Load.
  - 2. Press the Esc key.
  - **3.** After the confirmation message is displayed, choose **Yes** and press the Enter key.
- 5 Set a password.
  - ${f 1}_{f \cdot}$  In Available Options, select Print Servers and press the Enter key.
  - 2. Select the print server created in step 2 and press the Enter key.
  - **3.** Select **Password**, and press the Enter key to display the password input dialog box.
  - **4.** Enter the password and press the Enter key.

For details on RemoteUI, see "Using RemoteUI." →P.703

- **6** Press the Esc key several times to display the dialog box for confirming that PCONSOLE is finished.
  - Click Yes to exit PCONSOLE.

# Configuring the Printer's NetWare Network Settings With RemoteUI

Follow the steps below to configure NetWare protocol settings other than the frame type by using RemoteUI.

1 Start the web browser and enter the following URL in the Location (or Address) box to display the RemoteUI page. http://printer IP address or name/ Example: http://xxx.xxx.xxx.xxx/ 2 Select Administrator Mode and click Logon. 3 If a password has been set on the printer, enter the password. 4 Click Network in the Device Manager menu at left to display the Network page. 5 Click Edit in the upper-right corner of the NetWare group to display the Edit NetWare Protocol Settings page. 6 Refer to the NetWare Settings Items table to complete the settings. NetWare Settings Items Default Set-Item Details ting Frame Type Specify the type of frame to use in NetWare. Disabled

	Print Server Name	Specify the name of a NetWare print server. (0–47 characters)	-	
	Print Server Pass- word	Set a password for the print server. (0–20 characters)	-	
	Polling Interval	Specify the interval to confirm jobs. (1–15 seconds)	5	
RPrinter	Print Server Name	Specify the name of a NetWare print server. (0–47 characters)	-	
	Printer Number	Specify the number of the printer connected to the NetWare print server. (0-15)	0	
NDS PServer	Tree Name	Specify the name of an NDS tree that has a NetWare print server. (0–32 characters)	-	
	Context Name	Specify the name of a context that has a NetWare print server. (0–255 characters)	-	
	Print Server Name	Specify the name of a NetWare print server. (0–64 characters)	-	

7

	Item	Details	Default Set- ting
NDS PServer	Print Server Pass- word	Set a password for the print server. (0–20 characters)	_
	Polling Interval	Specify the interval to confirm jobs. (1–255 seconds)	5
NPrinter	Print Server Name	Specify the name of a NetWare print server. (0–47 characters)	_
	Printer Number	Specify the number of the printer connected to the NetWare print server. (0-254)	0

Complete the following settings based on the selected service.

- If you have selected Bindery PServer: Queue Server Mode (Using a Bindery Print Server)
  - **1.** In **File Server Name**, enter the file server name.
  - 2. In **Print Server Name**, enter the name of the print server created in "Specifying NetWare Print Services →P.715 ."
  - In Print Server Password, enter the password of the print server created in "Specifying NetWare Print Services →P.715."
  - 4. In Polling Interval, specify the interval at which the printer checks the NetWare print queue.
- If you have selected RPrinter: Remote Printer Mode (Using a Bindery Print Server)
  - 1. In **Print Server Name**, enter the advertising name of the print server created in "Specifying NetWare Print Services →P.715 ."
  - 2. In **Printer Number**, enter the same printer number specified in "Specifying NetWare Print Services →P.715 ."
- If you have selected NDS PServer: Queue Server Mode (Using an NDS Print Server)
  - **1.** In **Tree Name** and **Context Name**, enter the tree and context name of the print server.
  - 2. In **Print Server Name**, enter the name of the print server created in "Specifying NetWare Print Services →P.715 ."
  - 3. In **Print Server Password**, enter the password of the print server created in "Specifying NetWare Print Services →P.715."
  - **4.** In **Polling Interval**, specify the interval at which the printer checks the NetWare print queue.
- If you have selected NPrinter: Remote Printer Mode (Using a NDS Print Server)
  - 1. In **Print Server Name**, enter the advertising name of the print server created in "Specifying NetWare Print Services →P.715 ." Usually, the advertising name is the same as the name of the print server.
  - 2. In **Printer Number**, enter the same printer number specified in "Specifying NetWare Print Services →P.715 ."
- 8 Click **OK** to display the **Network** page.

12	Press ▲ or ▼ to enable or disable spanning tree support, and then press the <b>OK</b> button. The display reverts to the <b>Ethernet Driver</b> menu.
13	Press the <b>Menu</b> button. After the confirmation message is displayed, press the <b>OK</b> button. The new settings will take effect after the printer restarts.

727

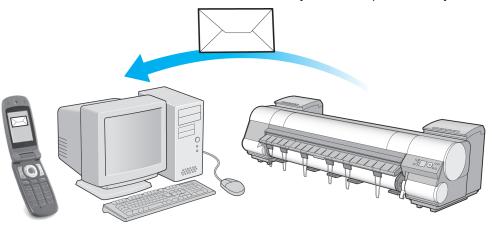

Network Setting

Other Settings

	Communication can also be configured on the Network page in RemoteUI
Note	

# **Email Notification When Printing is Finished or Errors Occur**

The printer can notify you of the printer status by email. Even when you are away from the printer, you can know when printing is finished or if errors occur. Receive notification via email on your mobile phone or at your computer.

Use the imagePROGRAF Status Monitor (Windows) function to set up email recipients and message timing. Besides being informed of finished print jobs or errors, you can also complete settings for email notification when service is needed or it's time to replace consumables. For detailed instructions, see "Specifying Printer-Related Information." —P.726

• For details on email notification using imagePROGRAF Status Monitor (in Windows), refer to the imagePROGRAF Status Monitor help.

• Mail server authentication is only supported with imagePROGRAF Status Monitor.

# **Initializing the Network Settings**

Use RemoteUI to restore the network settings to the default values as follows.

Important

 Initializing the network settings will also restore the default value of the printer's IP address. As a result, the RemoteUI page cannot be displayed in the web browser after this procedure.

- For instructions on reconfiguring the IP address, see "Configuring the IP Address on the Printer." (-P.705)
- For details on RemoteUI, see "Using RemoteUI." →P.703

Start the web browser and enter the following URL in the **Location** (or **Address**) box to display the RemoteUI page.

http://printer IP address or name/ Example: http://xxx.xxx.xxx/

2 Select Administrator Mode and click Logon.

728

1

If a password has been set on the printer, enter the password.

Click Reset to Default settings in the lower-right corner of the Network Interface group.

After confirming the message, click **OK** to restore the network settings to the default values.

• You can also use imagePROGRAF Device Setup Utility or the Control Panel to restore the default network settings.

# Device Setup Utility (Windows)

imagePROGRAF Device Setup Utility	730
Installing imagePROGRAF Device Setup Utility	730
Configuring the IP Address Using imagePROGRAF Device Setup Utility	730

# imagePROGRAF Device Setup Utility

imagePROGRAF Device Setup Utility is a utility to establish communication between the printer and your computer by completing relevant settings. After the printer is installed, for example, you can use imagePROGRAF Device Setup Utility to complete the network settings initially.

	GRAF Device Setup Option Help	othity						
Printer	Device Name	Status	Product Name	Location	IP Address	Setting IP Address	MAC Address	
到 IPv4 到 IPv6	iPExecx	Usable	iPExporx	XXXXX	2000.2000.2000.2000	Manual	X0CXX20X20CXX20X	

- Starting imagePROGRAF Device Setup Utility will show a list of printers found on the network. In this list, select the printer (specifically, the printer's MAC address) that you want to set up, and then configure the basic settings from your computer, such as the printer's IP address and the network frame type.
- You can see which printers are online in the network by checking the printer list. Communication between your computer and these printers is possible.
  - We recommend that your network or printer administrator complete the setup work using imagePROGRAF Device Setup Utility.
    - For details, refer to the imagePROGRAF Device Setup Utility help.

## Installing imagePROGRAF Device Setup Utility

Install imagePROGRAF Device Setup Utility from the User Software CD-ROM provided with the printer as follows:

- Insert the User Software CD-ROM in the CD-ROM drive.
- 2 On the Setup Menu window, click Install Individual Software.
- 3 Click Install in imagePROGRAF Device Setup Utility.
- **4** Follow the instructions on the screen to proceed with the installation.

# Configuring the IP Address Using imagePROGRAF Device Setup Utility

On a computer running Windows, you can use imagePROGRAF Device Setup Utility provided with the printer to configure the printer's IP address. This topic describes how to configure the IP address using imagePROGRAF Device Setup Utility.

To configure network settings, you must be logged in with administrative rights such as Administrator account. We recommend that your network administrator configure the network settings.

For instructions on installing imagePROGRAF Device Setup Utility, see "Installing imagePROGRAF Device Setup Utility." (→P.730)

#### When specifying an IPv4 IP address

# The Features of imagePROGRAF Status Monitor

imagePROGRAF Status Monitor is a utility for checking the printer status and managing print jobs. Two screens are available in imagePROGRAF Status Monitor : **Printer List** shows a list of printers, and **Status Monitor** shows details for each printer.

- You can view a list of the printers for which printer drivers have been installed on your computer, printers connected to your computer, and printers found on the network.
- If a printer error occurs, you can investigate the corrective action immediately.
- Printer status can be checked in real time on a computer monitor.
- Displays the ink level of every color in the printer. An icon and warning message will notify you when ink levels are low.
- The type of paper loaded in each media source is identified. You can also check to see if paper has run out.
- This way, the utility enables you to check printer information and take care of printer maintenance for optimal printing results.
- You can also set up automatic email notification of any printer problems or errors to email addresses you designate in advance.

- You can check the status of the hard disk and the documents saved on the hard disk.
- You can use the Accounting Manager to collect the print job logs for the printers and check information such as the printing costs.

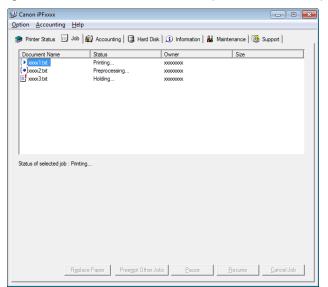

For details of the Accounting Manager, see Accounting Manager -P.740

# For details, refer to the imagePROGRAF Status Monitor help.

# Job Management Using imagePROGRAF Status Monitor

You can use the **Job** sheet in imagePROGRAF Status Monitor for operations such as pausing and canceling print jobs.

#### • Preempting Other Jobs

If you select a print job and click the Preempt Other Jobs button, the selected job is printed ahead of the job that currently precedes it in the print queue.

#### Pausing/Resuming Print Jobs

Selecting a print job and clicking the **Pause** button pauses printing of the selected job. To resume printing of a paused print job, select the print job and click the **Resume** button.

Once all the print data for a print job has been sent to the printer, the job can no longer be paused/resumed.

Canceling Print Jobs

Selecting a print job and clicking the Cancel Job button cancels printing of the selected job.

You cannot cancel other users' print jobs.

#### Printing Held Jobs

Printing of the job with a Status of Holding is paused because the paper specified by the driver does not match the paper currently loaded in the printer.

Use the procedure below to print the held job.

Select the held job and click the **Replace Paper** button.

Print Job Management

• To continue printing without changing the paper in the printer, select the held job and click Continue to print button.

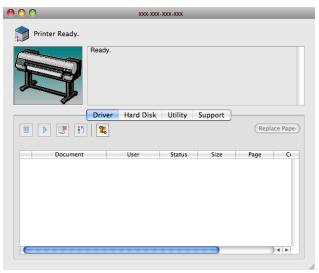

Note • The printing behavior when the paper specified by the driver does not match the paper currently loaded in the printer can be changed by using **Detect Mismatch** in the operation panel menu. Refer to Menu Settings →P.667 for details.

# Printmonitor (Mac OS X)

The Features of imagePROGRAF Printmonitor	737
Job Management Using imagePROGRAF Printmonitor	

# The Features of imagePROGRAF Printmonitor

imagePROGRAF Printmonitor is a utility for checking the printer status and managing print jobs.

- Printer status can be checked in real time on a computer monitor.
- You can check the status of print jobs, cancel jobs, and manage them as needed.
- If a printer error occurs, you can investigate the corrective action immediately.
- You can also set up automatic email notification of any printer problems or errors to email addresses you designate in advance.
- You can check the status of the hard disk and the documents saved on the hard disk.

• If the status of the desired printer is not shown in imagePROGRAF Printmonitor, select the printer again as follows.

- 1. Make sure the printer is on and connected to the network or to a local port.
- 2. In the Printer menu, select the name of the desired printer. After the printer is detected, the printer status is shown.
- 3. If information about the printer is not shown in step 2, choose Search Printer in the Printer menu. Printer names listed in the Printer menu are updated with the printers that are now detected.
- 4. In the Printer menu, select the name of the desired printer. After the printer is detected, the printer status is shown.

Note

# **Accounting Manager**

The Accounting Manager stores the printer's print job logs so that you can use the information for checking printing costs, etc.

The benefits of using the Accounting Manager are outlined below.

- Print Job Log Collection This allows you to check which documents were printed from each printer, who printed them and when.
- Calculation of the Total Pages Used and the Total Cost This allows you to use the collected print job logs to calculate totals for items such as the number of pages printed, the amount of paper used and the printing costs incurred.
- Regular Data Acquisition for Print Jobs Job logs can be automatically collected periodically.
- Exporting Print Job Data This allows you to export collected print job data as a CSV file.

• The Accounting Manager in Status Monitor displays approximate estimates of the amount of paper consumed and the ink consumed per job. Canon cannot guarantee the accuracy of these estimates. These estimates will also vary depending on the conditions of printer use.

- Print job log collection is not performed when Set./Adj. Menu -> Printer Info -> Show Job Log of the control panel is Off. However,
  - even if Show Job Log is set to Off, regularly acquired jobs that already have been retrieved at that time are displayed.
  - When Show Job Log has been set to On again, all jobs within the printer at that time are displayed.

## Launching the Accounting Manager

The procedure for launching the Accounting Manager is shown below.

#### **Job List Area**

The job items and details that can be displayed in the job list area are as follows.

• No.

The job serial number.

Job Cost

The cost of printing.

If the ink and paper unit costs are not set, \*\*\*\* is displayed.

Note

#### Document Name

This is the name of the printed document.

#### Printing Results

**OK** is displayed when the print process was executed, and **Cancel** is displayed if the print process was not executed.

## • Media Type

This is the type of paper used in printing.

#### • Output Image Size

The size of the image used for printing.

• If the job has multiple pages, the size of the last page is displayed.

#### • Paper Consumed

The area of paper used for printing.

• The Paper Consumed may differ from the product of Paper Width and Paper Length.

#### • Paper Width

The width of paper used for printing.

• If the job has multiple pages, the width of the last page is displayed.

#### Paper Length

The length of paper used for printing.

#### Ink Consumed

The amount of ink used for printing.

#### Owner

The sender of the job.

#### • Print Job Start Time / Print Time

The time when printing started and the time taken to print.

#### Number of Pages

The number of pages printed.

#### Roll Paper Width

The width of roll paper used for printing.

Paper Cost

The cost of paper used for printing.

• If the paper unit cost is not set, \*\*\*\* is displayed.

#### Total Ink Cost

The total value of the cost of ink used for printing.

• If the ink unit cost is not set, \*\*\*\* is displayed.

#### • Total of Other Costs

The total value of costs other than paper and ink.

Ink Cost Details

The cost of each ink color.

#### Ink Consumption Details

The amount of each color of ink used.

#### **Accounting Manager Basic Procedures**

The first time you use the Accounting Manager, use the following procedures to configure the settings.

Configure unit costs, including the costs of ink and paper. For details of the unit cost settings, see Configuring Unit Costs in Accounting Manager →P.745.

#### 2 Set options such as the units displayed. For details of the unit settings, see Configuring Units and Display Settings in Accounting Manager →P.749.

3 If you are using Regular Data Acquisition, configure the Regular Data Acquisition settings. For details of the Regular Data Acquisition settings, see Automatically Acquiring Print Job Logs at Regular Intervals →P.749.

Specify the jobs to be listed.

This displays the required print job logs and lists the details.

# **Configuring Unit Costs in Accounting Manager**

Select **Unit Costs** in the **Settings** menu to open the **Unit Costs** dialog box. Configure the unit cost settings in this dialog box.

• When you select a job and then open the **Unit Costs** dialog box, items with unit costs that have not yet been configured for that job are shown highlighted.

- Setting the Unit Cost for Ink →P.745
- Setting the Unit Cost for Paper →P.746)
- Setting the Unit Cost for Items Other Than Ink and Paper →P.748

# Setting the Unit Cost for Ink

Open the Ink sheet. Set the unit cost for ink in this sheet.

Area Display Format:	m² •	
	OK Cancel Help	

#### Date Display Format

Use this option to select the display format for dates. "YYYY" indicates the year, "MM" the month and "DD" the day.

#### Currency Unit

Enter the currency unit. Enter a text string up to 3 characters long.

#### 1000 Separator

Use this option to select the symbol used as a separator in numbers. The symbol is inserted every 3 digits.

#### Decimal Symbol

Use this option to select the symbol used as a decimal point.

#### Ink Consumed

Use this option to select the unit used for ink consumption.

Paper Width

Use this to select the unit used for paper width.

• Paper Length

Use this to select the unit used for paper length.

Area Display Format

Use this to select the unit used for paper area.

#### Automatically Acquiring Print Job Logs at Regular Intervals

This feature collects print job logs from the printer at regular intervals and saves the logs on your computer.

Select Acquire print job logs regularly.

Click the **OK** button to close the dialog box.

 Print job log collection is not performed when Set./Adj. Menu -> Printer Info -> Show Job Log of the control panel is Off. However, even if Show Job Log is set to Off, regularly acquired jobs that already have been retrieved at that time are displayed.

Immediately after you configure Regular Data Acquisition, no print jobs are displayed. Wait a few moments and then select Refresh in the View menu to display the print jobs. Note

• A maximum of 10,000 records are saved in a print job log. If this number is exceeded, jobs are deleted from the log starting from the oldest record. To save old data, it is recommended that you export the data as a CSV file. For details of how to export print job logs as CSV files, see Exporting Print Job Data as a CSV File → P.750.

# **Canceling Regular Print Job Log Acquisition**

You can use this procedure to cancel the regular acquisition of print job logs from printers.

- Select Regular Data Acquisition in the Settings menu.
- Uncheck the Acquire print job logs regularly option.
- 3 Click the **OK** button to close the dialog box.

# Switching Between Displaying Jobs on Printer and Regularly Acquired Jobs

The print job logs displayed by the Status Monitor Accounting Manager contain two types of job: Jobs on Printer and Regularly Acquired Jobs.

You can select whether to display Jobs on Printer or Regularly Acquired Jobs in the Listed Job Selection Area on the left side of the window.

#### Jobs on Printer

This shows a list of the print jobs currently held on printers.

You can change the number of jobs displayed per page using the Print Jobs Shown Per Page setting in the View menu or the toolbar.

You can skip to a particular page using the **Go to** option in the **View** menu or the toolbar.

- For printers with built-in hard disks, you can view up to 500 print jobs per printer.
- Note For printers without built-in hard disks, you can view up to 32 print jobs per printer. However, only 10 jobs can be displayed if the printer is switched off.

#### Regularly Acquired Jobs

This shows a list of regularly acquired print jobs.

To view all the jobs in a set period, specify the period using Calculate Total for Period and then Starting Date (or Starting Day of Week or Starting Month) in the View menu or the toolbar.

For example, to view monthly job logs starting on the 1st of each month, set Calculate Total for Period to Monthly and set Starting Date to 1.

• Up to 10,000 regularly acquired jobs are displayed for each printer.

# Exporting Print Job Data as a CSV File

You can export the collected print job data in the form of a CSV file by selecting Export Job Cost Data in the File menu.

750

You can also select Export Job Cost Data using the icon in the toolbar.

#### Selected Jobs

Exports the data for the selected print jobs in the job list as a CSV file.

Note

You can select multiple jobs by holding down the Shift key or Ctrl key as you click the job names.

#### Listed Jobs

Exports the data for the print jobs currently displayed in the list as a CSV file.

# **Displaying Job Properties or Period Properties**

You can display the **Job properties** dialog box or **Period Properties** dialog box to check detailed cost information and other items.

The **Job properties** dialog box displays detailed information about the selected job.

The Period Properties dialog box displays detailed information within the Regularly Acquired Jobs period.

#### • Displaying the **Job properties** Dialog Box

Select a job from the job list, and then select **Show Job Properties** from **Job properties** in the **File** menu. You can also select multiple jobs at once.

• You can also display the dialog box by selecting a job, right-clicking it, and then selecting **Show Job Properties**, or by using the icon in the toolbar.

#### • Displaying the Period Properties Dialog Box

Select a period from the **Regularly Acquired Jobs** list, and then select **Show Period Properties** from **Job properties** in the **File** menu. You can also select multiple periods at once.

• You can also display the dialog box by selecting and right-clicking a period and then selecting **Show Period Properties**, or by using the icon in the toolbar.

#### Job tab

Displays detailed information about the selected job. You can display detailed information about each job by selecting the corresponding **Document Name**.

Owner tab

You can display detailed information about each owner by selecting the corresponding **Owner**.

• Copy button

Click this button to copy the displayed text information to the clipboard.

## Showing, Saving and Loading Selected Unit Cost Data

#### Show Unit Cost Data

Select **Show Unit Cost Data** in the **File** menu to open the **Unit Cost Data** dialog box. This lists the unit costs for items such as the selected ink and paper.

You can copy text-based information in this dialog box to the clipboard by clicking the **Copy** button.

#### Save Unit Cost Data

Select a destination folder using **Save Unit Cost Data** in the **File** menu. The unit cost data for items such as the selected ink and paper is saved as a file.

#### Load Unit Cost Data

Selecting Load Unit Cost Data in the File menu loads saved unit cost data.

## Showing the Total Amount of Ink and Paper Consumed

Select **Show Ink and Paper Consumed** in the **File** menu to open the **Show Ink and Paper Consumed** dialog box. This lists the total amounts of ink and paper consumed by the printer so far.

You can copy text-based information in this dialog box to the clipboard by clicking the **Copy** button.

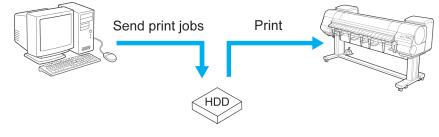

• Up to 7 types of media are listed in order of the amount consumed. The total consumption for other media types is shown as **Other**.

Saving Print Jobs on the Printer Hard Disk Managing the Job Queue (Deleting or Preempting Other Jobs) Managing Pending Jobs (Printing or Deleting Jobs on Hold)	759
Printing Saved Jobs Deleting Saved Jobs Moving Saved Jobs	768

# **Using the Printer Hard Disk**

The printer can save print jobs on the built-in hard disk. Using print jobs stored on the printer enables you to print the jobs again as needed without using a computer.

Save print jobs

Saving print jobs offers the following benefits.

# • Save the time spent using a computer

When you send a print job to the printer, you can save it on the printer after printing or simply save it on the printer without printing it yet. Saved print jobs can be printed in the required quantity later without the need to use a computer again.

## • Simplify reprinting, if any errors occur

If errors occur in the middle of printing (as when paper runs out), you can resume printing after clearing the error without resending the print job from a computer.

## • Streamline printing work

Without using a computer, you can select print jobs and print in the desired quantity. You can also select multiple print jobs to print during the same period. This enables unattended operation at night, for example.

# Output Method

To save print jobs on the printer's hard disk, configure the printer driver. In Windows, this is set using the **Output Method** dialog box. In Mac OS X, this is set using the **Additional Settings** pane.

# Print

Save print jobs on the printer's hard disk after printing.

## Save in mail box

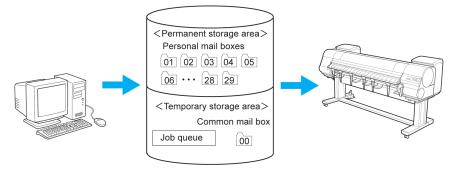

Save print jobs on the printer's hard disk.

## Print after reception is complete

This option is available in combination with **Print**. You can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

# Storage destination

The storage area on the printer's hard disk is divided into a temporary storage area and a permanent storage area. The temporary storage area stores print jobs in the job queue or shared mailbox. The permanent storage area stores jobs in personal boxes.

#### Job queue

The job queue refers to print jobs that are being processed by the printer (saved, received, prepared for processing, printed, deleted, or held). Up to 64 jobs can be stored in the temporary storage area.

When the job queue is full, additional jobs sent from a computer are treated as "standby" jobs, to be processed when possible.

However, if all queued jobs are simply being held, the oldest job is deleted and the print job sent from the computer is processed.

#### Shared mailbox

Jobs for which you have specified **Print** in **Output Method** (in Windows) or **Send job to** (in Mac OS X) are saved in the shared mailbox and classified as saved jobs.

There is one shared mailbox, numbered **00**. A password cannot be set for the shared mailbox.

Up to 100 print jobs can be saved here, but they will be deleted one after another starting with the oldest job in the following situations.

- If there are more than 100 jobs queued and saved in the shared mailbox combined
- If no more temporary storage space is available when jobs for which you have selected Print in Output Method (in Windows) or Send job to (in Mac OS X) are received
- If there is not enough space in the temporary or permanent storage area when jobs for which you have selected **Save in mail box** in **Output Method** (in Windows) or **Send job to** (in Mac OS X) are received

#### Personal boxes

Jobs are classified as saved jobs and saved in personal boxes in the following situations.

- · When a saved job stored in the shared mailbox is moved to a personal box
- When you have selected **Save in mail box** as the option in **Output Method** (in Windows) or **Send job to** (in Mac OS X)

There are 29 personal boxes, numbered **01** to **29**. You can specify a name and password for each personal box. Up to 100 print jobs can be saved in all personal boxes combined.

# Make your selection in **Output Method**.

#### Print

Save print jobs on the printer's hard disk after printing.

#### Save in mail box

Save print jobs on the printer's hard disk.

If you choose Save in mail box, also specify the destination personal box in the Mail box list.

#### • Print after reception is complete

This option is available in combination with **Print**. You can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

Click Acquire Mail Box Name to display personal box names in the Mail box list, as acquired from the printer.
 Note

4 In Name of data to be saved, specify how to name saved print jobs.

- To use the file name, choose Use file name.
- Otherwise choose Enter name and enter a name in Name.

5 Click **OK** to close the **Output Method** dialog box.

# 1. In **Document title**, enter a name to identify saved print jobs.

• If printed from Free Layout or Preview, the Document title is saved under the name imagePROGRAF. Note

- 2. Select the personal box number in the Mail box list.
- 3. Click OK to close the Destination dialog box.

### • Print after reception is complete

This option is available in combination with Print. You can prevent degradation of print quality that occurs when receiving a print job is interrupted and printing is aborted in the middle.

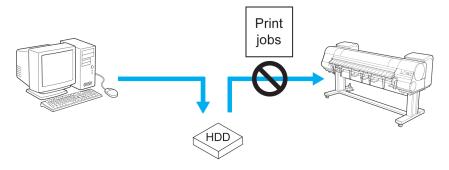

# Managing the Job Queue (Deleting or Preempting Other Jobs)

Print jobs being processed by the printer are collectively called the job queue. You can delete or preempt jobs in the job queue as needed.

These operations are available from the Control Panel or in RemoteUI, imagePROGRAF Status Monitor, and image-PROGRAF Printmonitor.

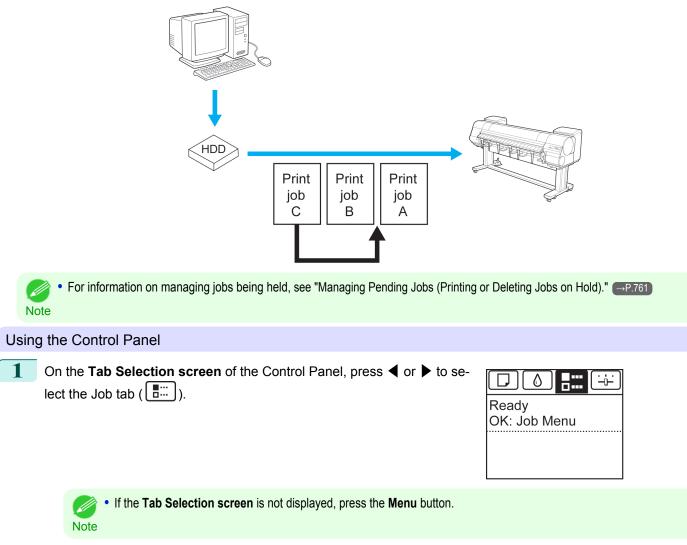

#### Delete

Note that only jobs that are not currently being deleted can be deleted from the job queue.

### Preempting other jobs

You can preempt other jobs by printing jobs that are currently being received or prepared for processing first.

Press the **OK** button. The **Job Menu** is displayed.

2

3 Manage the job queue as needed.

- Deleting jobs
  - **1.** Press  $\blacktriangle$  or  $\blacktriangledown$  to select **Print Job**, and then press the **OK** button.
  - 2. Press ▲ or ▼ to select the print job to delete, and then press the OK button.
  - 3. Press ▲ or ▼ to select **Delete**, and then press the **OK** button.
- Preempting other jobs
  - **1.** Press  $\blacktriangle$  or  $\blacktriangledown$  to select **Print Job**, and then press the **OK** button.
  - **2.** Press  $\blacktriangle$  or  $\blacksquare$  to select the job to print first, and then press the **OK** button.
  - **3.** Press  $\blacktriangle$  or  $\blacktriangledown$  to select **Preempt Jobs**, and then press the **OK** button.

# Using RemoteUI

Manage jobs as needed on the **Print Job** page. For details, refer to the RemoteUI help.

# Managing Pending Jobs (Printing or Deleting Jobs on Hold)

If the type or size of paper loaded does not match the settings in the print job received when you have set **Detect Mismatch** to **Hold Job** in the Control Panel menu, the print job is held on the printer as a pending job in the job queue. Manage held jobs such as these as follows.

These operations are available from the Control Panel or in RemoteUI, imagePROGRAF Status Monitor, and image-PROGRAF Printmonitor.

 To print held jobs, replace the loaded paper with the paper specified in the print job. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555

### Using the Control Panel

1 On the **Tab Selection screen** of the Control Panel, press **◄** or **▶** to select the Job tab ( ....).

"There are held jobs." is displayed if jobs are being held.

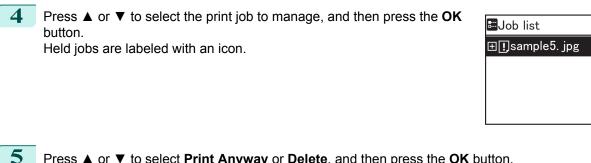

• If the **Tab Selection screen** is not displayed, press the **Menu** button. Note

3

Press the **OK** button. The **Job Menu** menu is displayed.

Press ▲ or ▼ to select **Print Job**, and then press the **OK** button.

Press ▲ or ▼ to select **Print Anyway** or **Delete**, and then press the **OK** button.

- If you choose Print Anyway Press ▲ or ▼ to select **Yes** or **No**, and then press the **OK** button.
- If you choose Delete Press ▲ or ▼ to select **Yes** or **No**, and then press the **OK** button.

# Saving Print Jobs Sent from Sources Other than the Printer Driver

To save print jobs sent from software or systems other than the printer driver or applications provided with the printer, complete the **Output Method** and **Print After Recv** settings in the Control Panel menu.

• Contact the software or system developer for information about support for this printer function.

# Specifying Output Method

In Output Method, specify how to manage jobs, regarding printing and saving them.

• Print

Note

Save print jobs automatically at the same time they are printed. (This is the default format.)

- **Print (Auto Del)** Save print jobs temporarily at the same time they are printed and delete them after printing.
- Save: Box 01 (Here, the number represents a box number) Save print jobs on the printer.

On the **Tab Selection screen** of the Control Panel, press  $\blacktriangleleft$  or  $\triangleright$  to select the Settings/Adj. tab (--).

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

• If the Tab Selection screen is not displayed, press the Menu button.

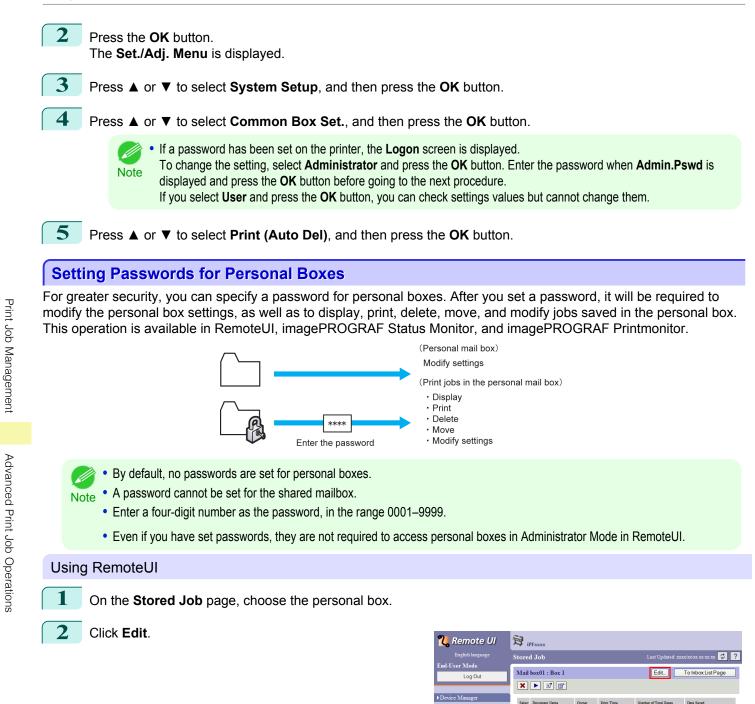

2

Press the **OK** button. The **Set./Adj. Menu** is displayed.

3	Press ▲ or ▼ to select <b>System Setup</b> , and then press the <b>OK</b> button.	
4	Press $\blacktriangle$ or $\blacksquare$ to select <b>Output Method</b> , and then press the <b>OK</b> button.	
5	Press ▲ or ▼ to select <b>Print</b> , <b>Print (Auto Del)</b> , or <b>Save: Box 01</b> . Follow these steps only when you select <b>Save: Box 01</b> .	
6	Press $\blacktriangle$ or $\blacksquare$ to select the box, and then press the <b>OK</b> button.	
Spec	ify Print After Recv	
	e print jobs on the hard disk before printing, specify <b>Print After Recv</b> . g will start when <b>Print After Recv</b> is set to <b>On</b> , even if you have selected <b>S</b> a	ave: Box 01 in Output Method.
1	On the <b>Tab Selection screen</b> of the Control Panel, press ◀ or ▶ to select the Settings/Adj. tab ().	Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678
	• If the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button. Note	
2	Press the <b>OK</b> button. The <b>Set./Adj. Menu</b> is displayed.	
3	Press ▲ or ▼ to select System Setup, and then press the OK button.	
4	Press ▲ or ▼ to select <b>Print After Recv</b> , and then press the <b>OK</b> button.	
5	Press ▲ or ▼ to select <b>On</b> or <b>Off</b> , and then press the <b>OK</b> button.	
Prin	ting Without Saving Jobs in the Common Box	
OS X) When in the	ent from a computer for which you have selected <b>Print</b> in <b>Output Method</b> (in the printer driver are saved in the shared mailbox. # Adjustment for high-precision printing

# **Enhancing Printing Quality**

With some types of paper and under some conditions, adjusting the printer as follows with the paper to be used can enhance printing quality when printing fine lines/text or photos.

Two adjustment options are available: standard adjustment (with the Printhead height set to Automatic) and supplemental adjustment (used if standard adjustment is not effective).

 Ideal temperature and humidity during adjustment and for printing in general when the Printhead height is set to Automatic are 20-30°C and 30-60%. Under other environmental conditions, adjustment may not enhance printing quality.

# Standard Adjustment

Perform standard adjustment with the Printhead height set to Automatic.

- Load paper in the printer.
  - Attaching the Roll Holder to Rolls →P.530
  - Loading Rolls in the Printer  $\rightarrow P.533$

2 On the **Tab Selection screen** of the Control Panel, press **◀** or **▶** to select the Settings/Adj. tab ([----]).

If the Tab Selection screen is not displayed, press the Menu button.

- 3 Press the OK button. The Set./Adj. Menu is displayed.
- 4 Press ▲ or ▼ to select Adjust Printer, and then press the OK button.
- 5 Press ▲ or ▼ to select **Head Posi. Adj.**, and then press the **OK** button.
- 6 Press ▲ or ▼ to select **Standard**, and then press the **OK** button.

A test pattern is printed for adjustment. This process will take about 13 minutes.

If standard adjustment does not enhance printing quality, next try supplemental adjustment, which may be helpful.

### Supplemental Adjustment

Perform supplemental adjustment with the Printhead height set to **Super Low**.

 Printing with Head Height set to Super Low may enhance printing quality, but it may also cause paper to rub against or become caught on the Printhead, which may cause paper jams or soiling on printed documents.

We recommend that additional adjustment be executed using paper matching the following criteria. Type: Glossy or semi-glossy photo paper, or proofing paper (in either case, roll paper only) Thickness/weight: 300 µm or less, or 300 g/m<sup>2</sup> or less Width: 420.0 mm (16.54 in.) or more

### Execute Standard in Head Posi. Adj..

• If paper rubs against the Printhead or becomes jammed during Printhead height adjustment, try selecting a higher level in **Head Height** and performing **Standard** again.

# Adjusting the Printhead

Adjusting the Printhead	798
Automatic Adjustment to Straighten Lines and Colors	798
Manual Adjustment to Straighten Lines and Colors	800
Adjustment When Installing the Printhead	
Troubleshooting Paper Abrasion and Blurry Images	

# Adjusting the Printhead

If printed documents are affected by the following problems, try adjusting the printhead.

### Printed vertical lines are warped or colors are out of alignment

Execute Head Posi. Adj. in the Control Panel menu to adjust the printhead position.

- Normally, execute Standard.
   (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798
- When printing on special paper, or if printing is not improved after Standard, try Manual. (See "Manual Adjustment to Straighten Lines and Colors.") →P.800

- In the next case, execute Initial adjustmt. (See "Adjustment When Installing the Printhead.") →P.802
  - If adjusting the printhead position has not been performed such as due to an error during initial setup
  - If **Rep.P.head Print** in the Control Panel menu is set to **Off** and adjusting the printhead position has not been performed when replacing the printhead
- Paper rubs against the printhead, or image edges are blurred
   Selecting Head Height in the Control Panel menu and changing the printhead height may improve the situation. (See "Troubleshooting Paper Abrasion and Blurry Images.") —P.803

# Automatic Adjustment to Straighten Lines and Colors

If vertical lines in printed documents are warped or colors are out of alignment, execute **Head Posi. Adj.** The printer will print and read a test pattern, and the Printhead position will be adjusted automatically. There are two modes for automatic Printhead adjustment: **Standard** and **Simple**.

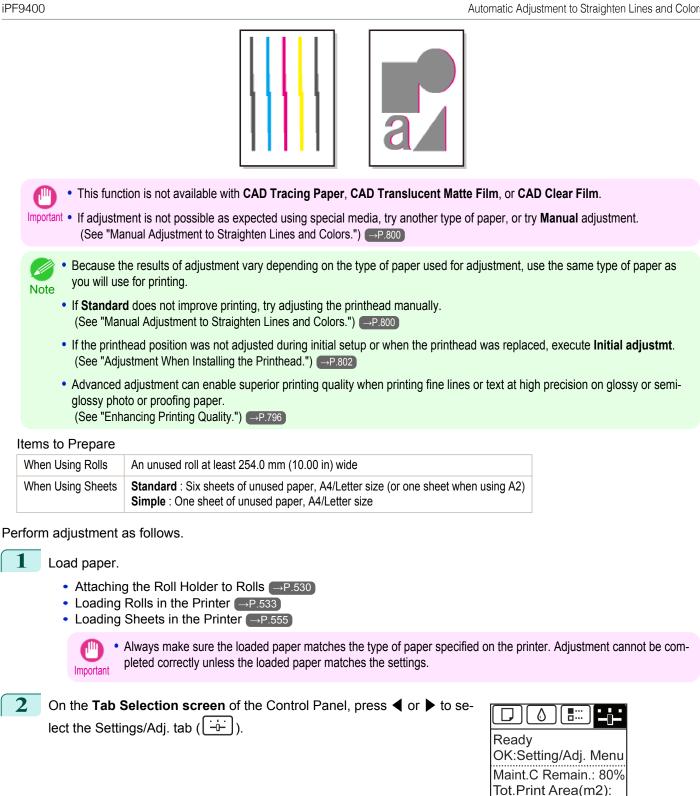

#### Standard

Execute if vertical lines in printed material are warped or colors are out of alignment. Furthermore, if **Simple** does not improve printing, try **Standard**.

#### Simple

Executes simple adjustment in a short time.

Execute this when frequently adjusting the printhead, such as during daily inspection.

Press the **OK** button. The Set./Adj. Menu is displayed.

Adjustments for Better Print Quality

Adjusting the Printhead

- 4 Press ▲ or ▼ to select Adjust Printer, and then press the OK button.
  - Press ▲ or ▼ to select Head Posi. Adj., and then press the OK button.
- 6 Press ▲ or ▼ to select Standard or Simple, and then press the OK button. A test pattern is printed for adjustment. Adjustment is now finished if you have printed on a roll.
- 7 If you are printing on cut sheets, a confirmation message is displayed on the Display Screen asking you whether to continue printing.

Press the **OK** button and follow the instructions on the Display Screen.

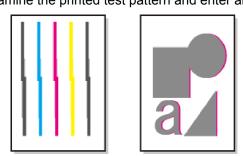

### Manual Adjustment to Straighten Lines and Colors

If printed vertical lines are warped or colors are out of alignment, execute Head Posi. Adj. to adjust the Printhead alignment.

#### Normally, execute Standard.

(See "Automatic Adjustment to Straighten Lines and Colors.") →P.798

However, when printing on special paper, or if printing is not improved after Standard, try Manual. Manual adjustment requires you to examine the printed test pattern and enter an adjustment value.

We recommend using the type of paper you use most often for adjustment.

Note • If the printhead position was not adjusted during initial setup or when the printhead was replaced, execute Initial adjustmt. (See "Adjustment When Installing the Printhead.") →P.802

#### Items to Prepare

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide
When Using Sheets	Three sheets of unused paper, A4/Letter size (or one sheet when using A2) $% \left( A^{\prime}\right) =0$

#### Perform adjustment as follows.

Load paper.

1

- Attaching the Roll Holder to Rolls →P.530
- Loading Rolls in the Printer →P.533
- Loading Sheets in the Printer →P.555

 Always make sure the loaded paper matches the type of paper specified on the printer. Adjustment cannot be completed correctly unless the loaded paper matches the settings.

2	On the <b>Tab Selection screen</b> of the Control Panel, press ◀ or ▶ to select the Settings/Adj. tab ().	Ready OK:Setting/Ad Maint.C Rema Tot.Print Area	lj. Menu in.: 80%
	• If the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button. Note		
3	Press the <b>OK</b> button. The <b>Set./Adj. Menu</b> is displayed.		
4	Press $\blacktriangle$ or $\blacksquare$ to select <b>Adjust Printer</b> , and then press the <b>OK</b> button.		
5	Press ▲ or ▼ to select <b>Head Posi. Adj.</b> , and then press the <b>OK</b> button.		
6	Press ▲ or ▼ to select <b>Other</b> , and then press the <b>OK</b> button.		
7	Press ▲ or ▼ to select <b>Manual</b> , and then press the <b>OK</b> button. A test pattern is printed for adjustment.		
	• Manual may be unavailable in some cases, even if it is displayed in the me If so, execute Standard once. (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798	enu.	
8	Press $\blacktriangle$ or $\blacksquare$ to select <b>D</b> , and then press the <b>OK</b> button.		
9	Press $\blacktriangle$ or $\blacksquare$ to select <b>D-1</b> , and then press the <b>OK</b> button.		
10	Examine adjustment test pattern <b>D-1</b> and determine the number with straight lines.		X
	• If two patterns seem equally good and you cannot decide which one is bet For example, choose 11 if you cannot decide whether pattern 10 or 12 is b		mediate value.
11	Press $\blacktriangle$ or $\blacksquare$ to select the pattern number you have decided, and then pr	ress the <b>OK</b> butt	on.
12	Repeat steps 8–10 to specify the adjustment value for <b>D-1</b> to <b>D-36</b> .		

Note that **D-6**, **D-18**, and **D-30** cannot be configured.

**13** Press the **Back** button.

**14** Press ▲ or ▼ to select **Register Setting**, and then press the **OK** button.

**15** Press ▲ or ▼ to select **Yes**, and then press the **OK** button. The adjustment value is now registered, and adjustment is complete.

# **Adjustment When Installing the Printhead**

Printhead position adjustment is executed when the printhead is first installed. This adjustment should be executed in the following situations.

- · If adjusting the printhead position has not been performed such as due to an error during initial setup
- If Rep.P.head Print in the Control Panel menu is set to Off and adjusting the printhead position has not been performed when replacing the printhead

• We recommend that the same paper as the paper included with the printer is used for this adjustment.

#### Items to Prepare

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide
When Using Sheets	Seven sheets of unused paper, A4/Letter size (or one sheet when using A2)

#### Perform adjustment as follows.

- Load paper.
  - Attaching the Roll Holder to Rolls →P.530
  - Loading Rolls in the Printer →P.533
  - Loading Sheets in the Printer →P.555

 Always make sure the loaded paper matches the type of paper specified on the printer. Adjustment cannot be completed correctly unless the loaded paper matches the settings.

2 On the Tab Selection screen of the Control Panel, press ◀ or ▶ to select the Settings/Adj. tab ( ----).

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

3 Press the OK button. The Set./Adj. Menu is displayed.

4

h

802

Press ▲ or ▼ to select Adjust Printer, and then press the OK button.

5 Press ▲ or ▼ to select Head Posi. Adj., and then press the OK button.

Press ▲ or ▼ to select **Other**, and then press the **OK** button.

# 7 Press ▲ or ▼ to select **Initial adjustmt**, and then press the **OK** button. A test pattern is printed for adjustment. Adjustment is now finished if you have printed on a roll.

8

If you are printing on sheets, a confirmation message is displayed requesting you to continue printing. Press the **OK** button and follow the instructions.

Note

# **Troubleshooting Paper Abrasion and Blurry Images**

The Printhead height setting affects printing quality.

Specifying a low Printhead height makes images clearer and enhances printing quality but may cause paper to rub against the Printhead.

On the other hand, specifying a high Printhead height will prevent paper from rubbing against the Printhead but may reduce the printing quality.

Paper rubb Important	bing against or becoming caught on the Printhead may jam or result in pr	inted documents that are soiled.
Note (See "Pape (See "The e	wer the printhead, depending on the nature of the problem. er rubs against the printhead.") $\rightarrow$ P.889 edges of the paper are dirty.") $\rightarrow$ P.889 e edges are blurred or white banding occurs.") $\rightarrow$ P.893	
1 On the Tab Solution	election screen of the Control Panel, press ◀ or ▶ to ser r tab (□).	Image: Constraint of the second s
Note • If t	the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button.	
Press the OK The Paper Me	button. <b>enu</b> is displayed.	
	to select <b>Paper Details</b> , and then press the <b>OK</b> button.	
4 Press ▲ or ▼	to select the type of paper, and then press the <b>OK</b> button.	
Note pro Note the	then <b>Head Height</b> is set to <b>Automatic</b> , the setting value selected for the revious print job is displayed (to the right of <b>Automatic</b> ) once you select e type of paper currently supplied. owever, the value is cleared when the printer is turned off or the paper replaced.	Head Height ½ ✓ Auto(Low) Highest High Standard Low
5 Press ▲ or ▼	' to select <b>Head Height</b> , and then press the <b>OK</b> button.	

Press  $\blacktriangle$  or  $\checkmark$  to select the desired setting value, and then press the **OK** button.

- Using Automatic will ensure that the printer adjusts the Printhead height to the optimal level before printing, accounting for the ambient temperature and humidity. When a setting other than Automatic is used, that value will always be applied.
  - Depending on the type of paper, some setting values may not be available.

# Adjusting the feed amount

Adjusting the Feed Amount	805
Selecting a Feed Amount Adjustment Method	805
Automatic Banding Adjustment	
Manual Banding Adjustment	807
Fine-Tuning the Paper Feed Amount	809
Adjusting Line Length	
Adjusting the Vacuum Strength	811

# **Adjusting the Feed Amount**

If printed documents are affected by the following problems, try adjusting the feed amount.

- Banding in different colors
- · Line length is not accurate in the direction paper is fed

To adjust the feed amount, do the following, in this order.

- Depending on the issue, adjust **Adj. Priority** to suit the particular type of paper. (See "Selecting a Feed Amount Adjustment Method.")  $\rightarrow$  P.805
- 2 Execute Adj. Quality or Adjust Length, depending on the selection in Adj. Priority. (See "Automatic Banding Adjustment.") →P.806 (See "Manual Banding Adjustment.") →P.807 (See "Adjusting Line Length.") →P.810
- 3 After executing **Adj. Quality**, execute **Adj. Fine Feed** for further adjustment as needed. (See "Fine-Tuning the Paper Feed Amount.") →P.809

Selecting a Feed Amount Adjustment Method

There are two methods of adjusting the paper feed amount, **Print Quality** and **Print Length**, either of which will be applied during printing.

Since the method that is applied during printing is determined from the value of the **Adj. Priority** setting, configure the **Adj. Priority** to match the print target.

- Print Quality : Adjusts the feed amount to reduce banding across the sheet in printed documents.
   Adj. Quality settings are applied. When Adj. Fine Feed is executed, the Adj. Fine Feed settings are applied in addition to the Adj. Quality settings.
- **Print Length** : Adjusts the feed amount for better accuracy of lines in printed documents. The settings of **A:High** or **B:Standard/Draft** in **Adjust Length** are applied.
- Automatic : Print Quality or Print Length is selected, depending on Print Priority as selected in the printer driver at the time of printing.

• Either A:High or B:Standard/Draft in the Adjust Length menu is applied, depending on printer driver settings at the time of printing.

Follow these steps to configure the settings.

1

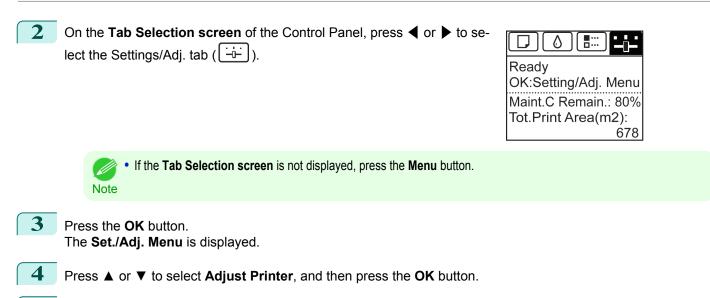

Note

Load the paper.

- Attaching the Roll Holder to Rolls →P.530
- Loading Rolls in the Printer →P.533
- Loading Sheets in the Printer →P.555

Adjustments for Better Print Quality

Adjusting the feed amount

- 5 Press ▲ or ▼ to select Feed Priority, and then press the OK button.
- Press  $\blacktriangle$  or  $\blacksquare$  to select Adj. Priority, and then press the OK button.
- **7** Press  $\blacktriangle$  or  $\blacksquare$  to select Automatic, Print Quality, or Print Length, and then press the OK button.

# **Automatic Banding Adjustment**

If printed images are affected by banding in different colors across the sheet, execute **Adj. Quality** for automatic adjustment of the paper feed amount.

There are two modes of automatic adjustment to correct banding: **Auto(GenuinePpr)** and **Auto(OtherPaper)**. In either mode, the printer prints and reads a test pattern for automatic adjustment of the feed amount.

### Auto(GenuinePpr)

Use this mode with paper identified in the Paper Reference Guide. (See "Types of Paper.")  $\rightarrow$  P.522

#### Auto(OtherPaper)

Use this mode with paper not in the Paper Reference Guide, or if **Auto(GenuinePpr)** does not eliminate banding. (See "Types of Paper.")  $\rightarrow$  P.522

 Adjustment is not possible with Auto(GenuinePpr) and Auto(OtherPaper) when using highly transparent media. In this case, use Manual adjustment.
 (See "Manual Banding Adjustment.") (-P.807)

- Note Always check the Adj. Priority values before using Auto(GenuinePpr) or Auto(OtherPaper). (See "Selecting a Feed Amount Adjustment Method.") →P.805
  - If additional fine-tuning is necessary after Auto(GenuinePpr) and Auto(OtherPaper), execute Adj. Fine Feed. (See "Fine-Tuning the Paper Feed Amount.") →P.809
  - Use Adjust Length to ensure that lines in CAD drawings are printed at exactly the right length. (See "Adjusting Line Length.") →P.810
  - This may take some time, depending on the type of paper.

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide	
When Using Sheets	Auto(GenuinePpr) : One sheet of unused paper, A4/Letter size Auto(OtherPaper) : Two sheets of unused paper, A4/Letter size (or one sh	heet when using A2)

3 Press the OK The Set./Adj	K button. <b>. Menu</b> is displayed.	
4 Press ▲ or ▼	to select <b>Adjust Printer</b> , and then press the <b>OK</b> button.	
5 Press ▲ or <b>▼</b>	to select <b>Feed Priority</b> , and then press the <b>OK</b> button.	
6 Press ▲ or ♥	to select <b>Adj. Quality</b> , and then press the <b>OK</b> button.	
A test pattern	to select Auto(GenuinePpr) or Auto(OtherPaper), and the is printed for adjustment. Is now finished if you have printed on a roll or a sheet of A2 since	
the Display S	nting on sheets smaller than A2 size for <b>Auto(OtherPaper)</b> , acreen requesting you to continue printing. If button and follow the instructions on the Display Screen.	a confirmation message is shown o

If printed images are affected by banding in different colors, execute **Adj. Quality** for adjustment of the paper feed amount.

Use **Manual** adjustment with highly transparent media or other paper for which **Auto(GenuinePpr)** or **Auto(OtherPaper)** cannot be used.

(See "Automatic Banding Adjustment.") →P.806)

Manual adjustment requires you to enter an adjustment value after a test pattern is printed.

- We recommend executing the adjustment if you have changed the paper type or paper size.
- Note Always check the **Adj. Priority** values before using **Manual** adjustment. (See "Selecting a Feed Amount Adjustment Method.") →P.805
  - If additional fine-tuning is necessary after Manual adjustment, use Adj. Fine Feed (See "Fine-Tuning the Paper Feed Amount.") →P.809
  - Use Adjust Length to ensure that lines in CAD drawings are printed at exactly the right length. (See "Adjusting Line Length.") →P.810

#### Paper to Prepare

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide
When Using Sheets	Two sheets of unused paper of at least A4/Letter size

#### Perform adjustment as follows.

```
Load the paper.
```

- Attaching the Roll Holder to Rolls →P.530
- Loading Rolls in the Printer  $\rightarrow$  P.533
- Loading Sheets in the Printer  $\rightarrow$  P.555

• Important

 Always make sure the loaded paper matches the type of paper specified. Adjustment cannot be completed correctly unless the loaded paper matches the settings.

OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

• If the Tab Selection screen is not displayed, press the Menu button.

3 Press the **OK** button.

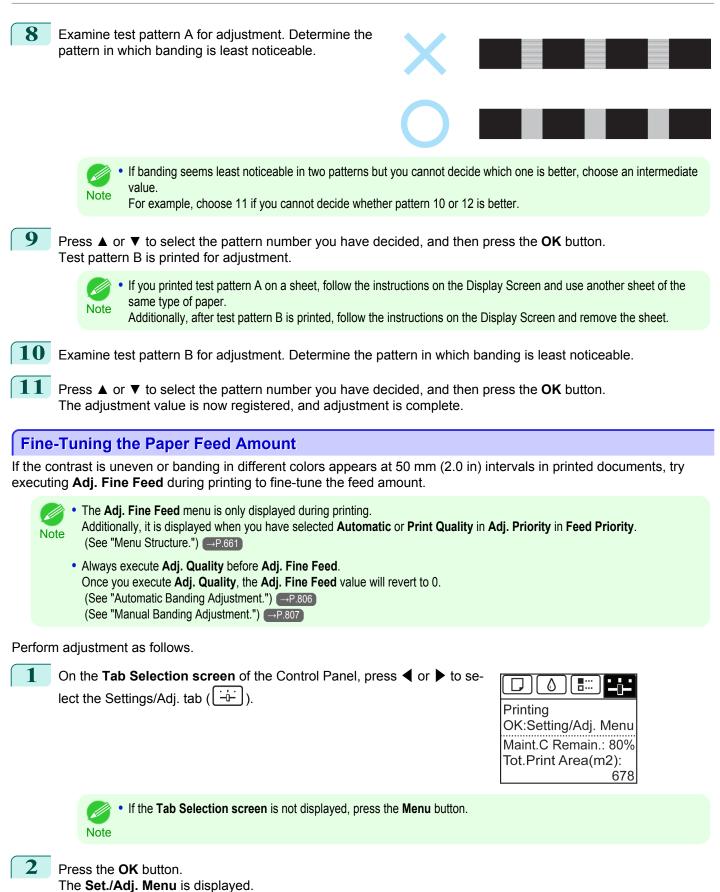

Note

The Set./Adj. Menu is displayed.

- 4 Press ▲ or ▼ to select Adjust Printer, and then press the OK button.
  - Press ▲ or ▼ to select **Feed Priority**, and then press the **OK** button.
- 6 Press ▲ or ▼ to select Adj. Quality, and then press the OK button.

Press ▲ or ▼ to select **Manual**, and then press the **OK** button. Test pattern A is printed for manual adjustment.

• When printing on sheets, follow the instructions on the Display Screen and remove the sheet.

- 3 Press ▲ or ▼ to select Adj. Fine Feed, and then press the OK button.
- 4 Press ▲ or ▼ to select a setting value in the range -5 to 5, and then press the OK button. At this time, if banding in dark colors appears, select a setting value in the range 1 to 5, and if banding in light colors appears, select a setting value in the range -1 to -5.

# **Adjusting Line Length**

To ensure that lines in CAD drawings are printed at exactly the right length, use **Adjust Length** to adjust the amount that paper is advanced.

There are two options in Adjust Length : AdjustmentPrint and Change Settings.

AdjustmentPrint

After a test pattern is printed, you will measure the discrepancy based on the results of printing.

Change Settings

No test pattern is printed. Instead, you will measure a document already printed to determine the discrepancy.

Additionally, two modes are available in both **AdjustmentPrint** and **Change Settings** : **A:High** or **B:Standard/Draft**. Choose the mode that suits your particular printing application.

• A:High

This setting is applied when **Highest quality** or **High** is selected in **Print Quality** in the printer driver.

• B:Standard/Draft

This setting is applied when Standard or Fast is selected in Print Quality in the printer driver.

- We recommend executing the adjustment if you have changed the paper type or paper size.
- Note Always check the Adj. Priority values before using Adjust Length. (See "Selecting a Feed Amount Adjustment Method.") →P.805

#### Paper to Prepare

When Using Rolls	<ul><li>An unused roll at least 254.0 mm (10.00 in) wide</li><li>High-precision ruler</li></ul>
When Using Sheets	<ul><li>One sheet of unused paper of at least A4/Letter size</li><li>High-precision ruler</li></ul>

Perform adjustment as follows.

# Load the paper.

- Attaching the Roll Holder to Rolls →P.530
- Loading Rolls in the Printer →P.533
- Loading Sheets in the Printer →P.555

 Always make sure the loaded paper matches the type of paper specified. Adjustment cannot be completed correctly unless the loaded paper matches the settings.

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

- Press  $\blacktriangle$  or  $\checkmark$  to select vacuum stringth, and then press the OK button.
- **6** Press  $\blacktriangle$  or  $\checkmark$  to select the desired setting value, and then press the **OK** button.

# **Printing Images to Match Monitor Colors**

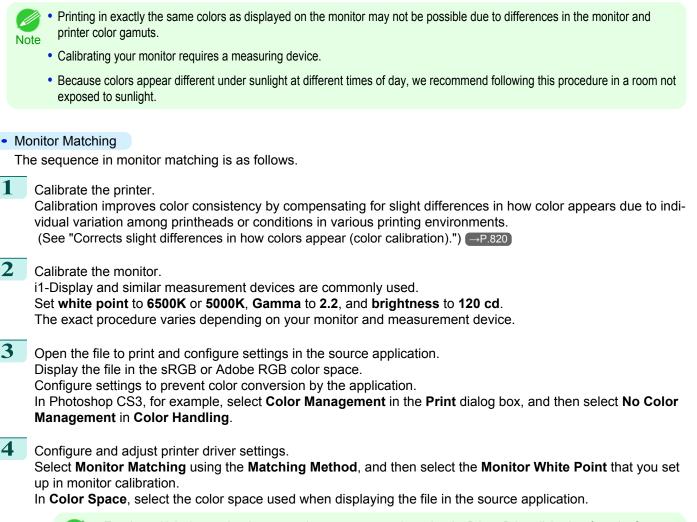

Adjusting the colors printed so that they more closely match the colors displayed on the monitor is called "monitor matching." Using this mode requires adjustment or configuration of the settings of your monitor, the source application, the file for printing, and the printer driver.

Printed Colors Match Monitor Colors

• Monitor matching may not be applied, or these settings may not be configurable or adjustable, depending on your monitor and the source application.

 To print multiple times using the same value, we recommend opening the Printer Driver dialog box from the System menu and configuring the appropriate settings. (See "Accessing the Printer Driver Dialog Box from the Operating System Menu (Windows).") -P.181

For instructions on configuring printer driver settings for monitor matching, refer to the following topic, as appropriate for your computer and operating system.

- Printing Images to Match Monitor Colors (Windows) P.815
- Printing Images to Match Monitor Colors (Mac OS X) →P.817

# Printing Images to Match Monitor Colors (Windows)

By calibrating your monitor and configuring settings in the source application in advance, you can complete settings to print in colors that are as close as possible to the colors displayed on the monitor.

Before using this feature, you must calibrate the monitor and configure settings in the source application. (See "Printing Images to Match Monitor Colors —P.814")

1

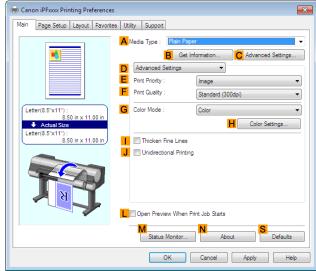

Choose **Print** in the application menu.

Select the printer in the dialog box, and then display the printer driver dialog box. (See "Accessing the Printer Driver Dialog Box from Applications →P.179")

# **Color Calibration**

Corrects slight differences in how colors appear (color calibration)	820
Paper that can be used in Color Calibration	

# Corrects slight differences in how colors appear (color calibration)

### What is Color Calibration?

Color calibration improves color consistency by compensating for slight differences in how color appears when printing due to individual variations or aging among the printers.

Executing color calibration will print a test pattern, which will be read automatically by a sensor built in the printer. By this operation, a calibration adjustment value reflecting the print result of the test pattern is set automatically.

 When executing color calibration, keep the temperature and humidity conditions the same each time for better color consistency.

If you execute color calibration under various conditions of temperature and humidity, correct adjustment may not be possible.

 Before color calibration, ensure the printer is not exposed to direct sunlight or other strong sources of light. If the printer is exposed to strong sources of light, correct adjustment may not be possible.

### **Recommend Timing for Color Calibration**

We recommend color calibration in the following situations.

- After initial printer installation
- After Printhead replacement
- If colors seem different from before, despite using the same printing environment, under the same conditions
- To ensure uniform colors when printing on multiple printers (however, be sure to use the same version of firmware and printer driver, under the same settings)
- When the Execution Guide is displayed (Specifying Execution Guide →P.821)

#### **Executing Color Calibration**

#### • Prepare the printer

1 You can confirm whether the paper to be loaded can be used in color calibration. (See "Paper that can be used in Color Calibration.")  $\rightarrow$  P.822

#### 2 Load the paper.

- (See "Attaching the Roll Holder to Rolls.")  $\rightarrow$  P.530 (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
- Executing Color Calibration
  - On the **Tab Selection screen** of the Control Panel, press **4** or **b** to select [----] (Settings/Adj. tab).

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

	• If the <b>Tab Selection screen</b> is not displayed, press the <b>Menu</b> button. Note
2	Press the <b>OK</b> button. <b>Set./Adj. Menu</b> is displayed.
3	Press ▲ or ▼ to select Adjust Printer, and then press the OK button.
4	Press ▲ or ▼ to select <b>Calibration</b> , and then press the <b>OK</b> button.
5	Press ▲ or ▼ to select <b>Auto Adjust</b> , and then press the <b>OK</b> button. After the environment measurements and paper are confirmed, and color calibration is executed, the calibra- tion adjustment value is set automatically.

### Applying the Calibration Adjustment Values During Printing

The application of the calibration adjustment value when printing can be set in the printer driver or on the menu of the Control Panel.

However, when the setting value of the printer driver and the setting value of the Control Panel differ, the setting of the printer driver is prioritized.

How to apply	How to operate
Configure on the printer driver menu. (Windows)	Configure <b>Calibration Value</b> . (See "Paper Detailed Settings Dialog Box (Windows).") →P.185
Configure on the printer driver menu. (Mac OS X)	Configure <b>Calibration Value</b> . (See "Paper Detailed Settings Dialog Box (Mac OS X).") →P.368
Configure on the menu of the Control Panel.	From <b>Set./Adj. Menu</b> , select <b>Adjust Printer &gt; Calibration &gt; Use Adj. Value</b> . (See "Menu Settings.") $\rightarrow$ P.667

• After executing color calibration, you can also adjust colors as desired in the printer driver. (See "Adjusting the Color in the Printer Driver.") →P.54

# Checking Color Calibration Execution Logs

You can confirm information of color calibration such as the execution date and executed paper type by the following method.

How to check	How to operate
Confirm it on the Control Panel of the printer.	From <b>Set./Adj. Menu</b> , select <b>Adjust Printer</b> > <b>Calibration</b> > <b>Calibration Log</b> . (See "Menu Settings.") → P.667
Print information about the printer.	From <b>Set./Adj. Menu</b> , select <b>Test Print</b> > <b>Status Print</b> . (See "Status Print.") →P.676
Confirm with imagePROGRAF Status Monitor. (Windows)	On the <b>Information</b> sheet of imagePROGRAF Status Monitor, click the <b>View Calibration</b> <b>Log</b> button. (See "The Features of imagePROGRAF Status Monitor.") →P.734
Confirm this in the <b>Printer Information</b> dialog box of the printer driver. (Mac OS X)	In the <b>Printer Information</b> dialog box, click the <b>Information</b> tab, and click the <b>View Calibration Log</b> button. (See "Main Pane (Mac OS X).") —P.364

#### Specifying Execution Guide

Execution Guide is a function in which a guide is displayed on the Control Panel, imagePROGRAF Status Monitor (Windows), imagePROGRAF Printmonitor (Macintosh), or RemoteUI when you execute color calibration.

821

Note

If you enable this function, an Execution Guide is displayed in the following cases.

- When a new Printhead has been installed
- When a certain amount of printing has been executed after color calibration is executed
- When the data of color calibration has been initialized

To enable the function, set **"Set Exec. Guide**" to **On** on the menu of the Control Panel. (See "Menu Settings.") →P.667

# Paper that can be used in Color Calibration

#### Recommended Environment for Use of Paper

Since the recommended use environment varies according to the paper type, use within the recommended environment range suiting the paper type.

For details, refer to the Paper Reference Guide.

#### Paper Type and Adjustment Type

- In color calibration, you can use any of the following paper types. Also, the adjustment type of color calibration is decided according to the paper type. (Adjustment Types of Color Calibration →P.823)
- The media types shown in the table are the names that are displayed in the printer Control Panel.

D	Country or Region of Use selected when the printer driver was in- stalled

Papar Tuno	Country or Region of Use selected when the printer driver was in- stalled			Adjustment Type
Paper Type	Japan, Asia, Oce- ania	EU	North or South America	Adjustment Type
FneArt HW Photo	Available	Available	Available	Common calibration

Note

If the paper you are using is not specified in media type, execute color calibration using the paper where the adjustment type is Common calibration, then you can set the calibration adjustment values for the paper you are using.

- The settings for each media type can be changed using Media Configuration Tool. Not available media types can be displayed in the Control Panel by changing the settings. (See "Switching Media Types Display Show/Hide (Windows).") →P.594 (See "Switching Media Types Display Show/Hide (Mac OS X).") →P.627
- For details on the paper that can be used when **PhotoProPlat adj** is selected as the paper type, refer to the Paper Reference Guide.

# Paper Sizes that can be Used in Color Calibration

Paper sizes that can be used in color calibration differ for sheets and rolls. For details, refer to the Paper Reference Guide.

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide (however, a roll at least 406.4 mm (16.00 in) wide depending on the paper type)
When Using Sheets	One sheet of unused paper of at least A4/Letter size (however, one sheet of unused paper of at least A2 size depending on the paper type)

# Registration and Confirmation of Paper Information

#### • To Register Paper Information on the Printer

When using newly released paper, paper information must be registered on the printer and the printer driver. Download the new version of **Media Information File** from the Canon website and install it.

(See "Types of Paper.") →P.522

#### • To Confirm the Paper Information Registered on the Printer

When confirming the paper information registered on the printer, select **Paper Details** on the Control Panel menu, and print the detailed information of the paper.

(See "Menu Settings.") →P.667

• To restore the default settings, set **Reset PaprSetngs** to **Yes** in **System Setup** in the Control Panel menu.

Because paper information added or modified by the Media Configuration Tool is deleted, if you have calibrated the printer using paper with information added by the Media Configuration Tool, color calibration executed this way can no longer be applied to any type of paper.

If you wish to apply calibration results, prepare calibration-compatible paper that was in the original settings and perform calibration again.

# Adjustment Types of Color Calibration

Color calibration has two adjustment types, Common calibration and Unique calibration, with one of these selected when color calibration is executed.

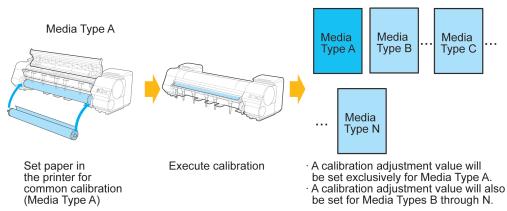

The selected adjustment type is determined from the media type that color calibration is executed on.

### Common calibration

Common calibration is a feature that allows you to use multiple media types easily in a short time because it is not necessary to execute color calibration on each media type.

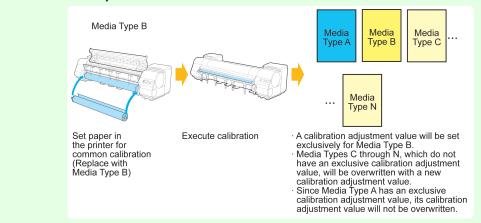

If color calibration is executed on paper categorized as Common calibration, dedicated calibration adjustment values are set on the media type that Common calibration was executed on.

Furthermore, calibration adjustment values are set on all print qualities for all media types where color calibration has not been executed.

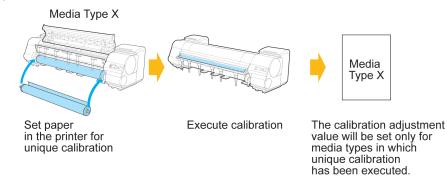

Note

• The calibration adjustment values are not overwritten for media types where color calibration has been executed once and dedicated calibration adjustment values have been set.

#### Unique calibration

If color calibration is executed on paper categorized as Unique calibration, calibration adjustment values are set only for the media type that the color calibration was executed on.

• Even if paper categorized as Unique calibration is used, if the media type has yet to execute color calibration even once and does not have any dedicated calibration adjustment values, the calibration adjustment values are overwritten when Common calibration is executed.

	Blue	PFI-706 B		
	Gray	PFI-706 GY		
	Photo gray	PFI-706 PGY		

For instructions on Ink Tank replacement, see "Replacing Ink Tanks." →P.826

Note • The provided Starter Ink Tanks contain 330 ml (11.2 fl oz) each.

# **Replacing Ink Tanks**

### Compatible ink tanks

For information on compatible ink tanks, see "Ink Tanks." →P.826 Replacement ink tanks in 330 ml (11.2 fl oz) and 700 ml (23.7 fl oz) capacities are supported.

Note • E

Depending on the color, you can also use an ink tank with a different capacity.

### Precautions when handling ink tanks

Take the following precautions when handling ink tanks.

- For safety, keep ink tanks out of the reach of children.
- Caution If ink is accidentally ingested, contact a physician immediately.

• There may be ink around the ink supply section of ink tanks you removed. Handle ink tanks carefully during replacement. The ink may stain clothing.

- Do not install used ink tanks in another model of printer.
   This will prevent correct ink level detection, which may damage the printer or cause other problems.
- We recommend using up an Ink Tank in the course of printing within six months after breaking the seal. Printing quality may be affected if you use older ink tanks.
- Do not leave the printer without ink tanks installed for extended periods (a month or more). Residual ink may become clogged inside the printer and affect printing quality.

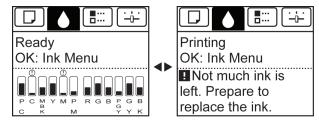

#### How to replace an Ink Tank

- **1.** Confirm the message.  $\rightarrow$  P.827
- 2. Access the menu for Ink Tank replacement. →P.828 (Otherwise, open the Ink Tank Cover.)
- **3.** Remove the lnk Tank.
  - 330 ml ink tanks →P.828
  - 700 ml ink tanks  $\rightarrow$  P.830
- 4. Load the new lnk Tank.
  - 330 ml ink tanks →P.831
  - 700 ml ink tanks →P.833

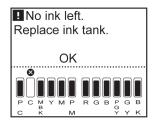

#### Confirm the message

When the ink level becomes low, a message is displayed on the Display Screen.

According to the message, replace the ink tank or prepare a new ink tank. (See "When to Replace Ink Tanks.") →P.837

If a message requests you to replace an Ink Tank, press the **OK** button. In this case, you can skip the step **Access the menu for ink tank replacement.** Follow the instructions in **Remove the ink tanks**.

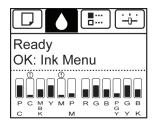

• Do not remove an Ink Tank during initialization immediately after turning on the printer, or during printhead cleaning. Ink may leak out.

#### Access the menu for Ink Tank replacement

On the **Tab Selection screen** of the Control Panel, press  $\blacktriangleleft$  or  $\blacktriangleright$  to select the lnk tab ( ).

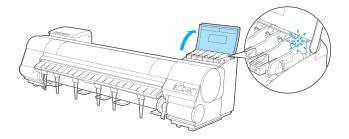

• If the Tab Selection screen is not displayed, press the Menu button. Note

- 2 Press the **OK** button. The **Ink Menu** is displayed.
- **3** Press ▲ or ▼ to select **Rep. Ink Tank**, and then press the **OK** button. Instructions are displayed on the Display Screen.

Remove the Ink Tank (330 ml)

 Open the Ink Tank Cover of the tank for replacement and check the Ink Lamp. The Ink Lamp flashes quickly if there is no ink left.

• Avoid hitting the printer when replacing an Ink Tank. Handle the printer gently when replacing tanks. Jolting the printer during printing may deteriorate print quality.

2 Lift the stopper (a) of the Ink Tank Lock Lever for the color to replace. Lift the Ink Tank Lock Lever until it stops, and then push it down to the front.

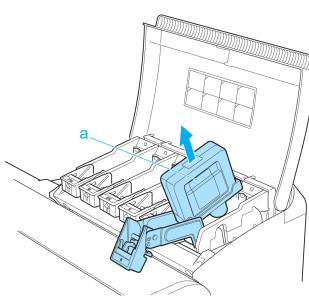

Push the Ink Tank Lock Lever down until it locks.

Note • Make sure the Ink Tank Lock Lever does not return to the original position.

Ink Tank in a plastic bag and seal it.

Dispose of used ink tanks according to local regulations.

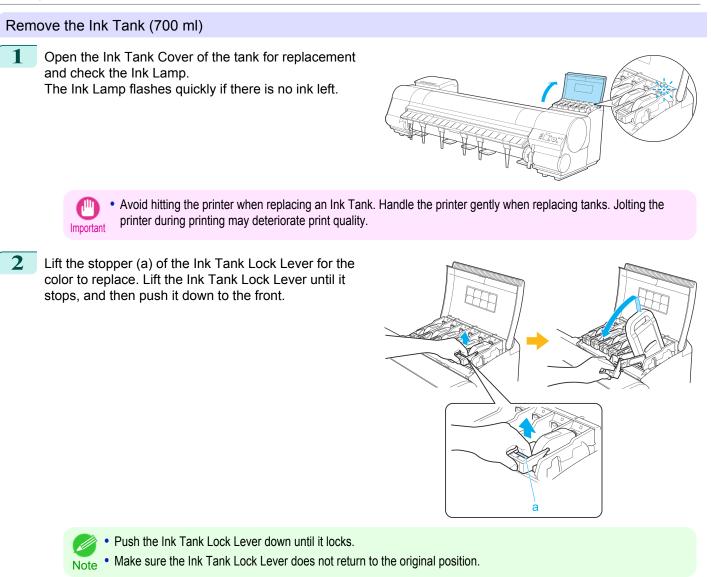

• If there is still ink in the Ink Tank you removed, store it with the ink holes (a) facing up. Otherwise, ink may leak and cause stains. Put the removed

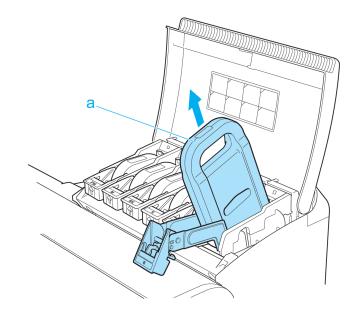

829

Important

Note

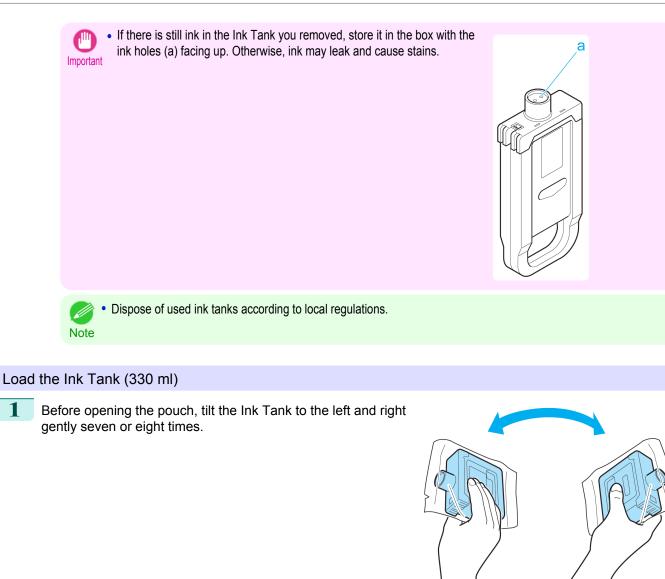

Hold the Ink Tank by the handle (a) and remove it. Press the **OK** button.

Ink Tanks

3

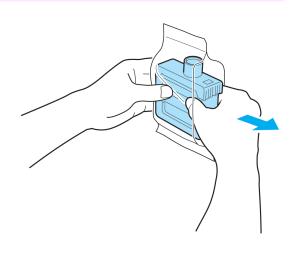

Maintenance and Consumables

• Do not remove and agitate ink tanks that have already been installed in the printer. Ink may leak out. Important • If you do not agitate the Ink Tank, the ink may settle, which may affect printing quality.

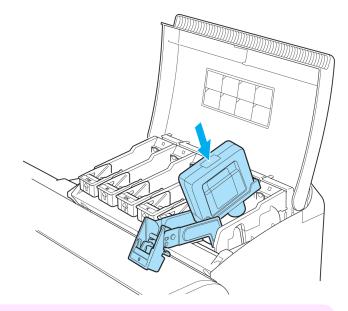

• Never touch the ink holes or electrical contacts. This may cause stains, damage the lnk Tank, and affect printing quality.

Press the **OK** button and insert the Ink Tank into the holder facing as shown, with the ink holes down.

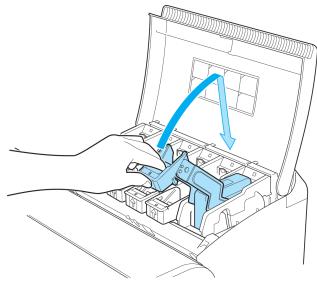

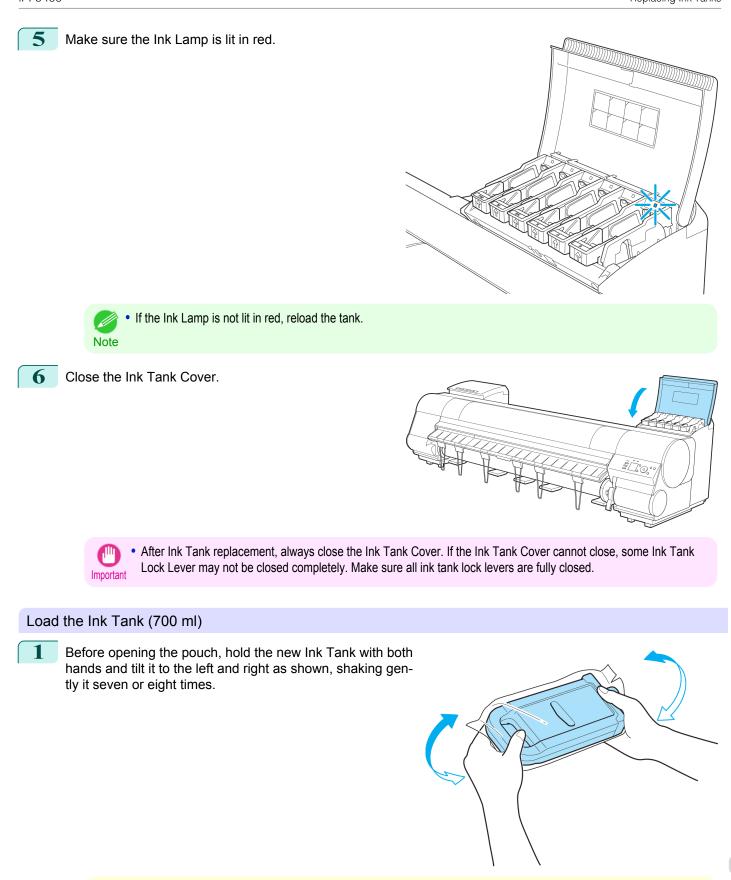

• Ink tanks cannot be loaded in the holder if the color or orientation is incorrect.

If the Ink Tank does not fit in the holder, do not force it into the holder. Make sure the color of the Ink Tank Lock Lever matches the color of the Ink Tank, and check the orientation of the Ink Tank before reloading it.

Lift the Ink Tank Lock Lever until it stops, and then push it down until it clicks into place.

 700 ml ink tanks are heavy, so use your whole arm to agitate it instead of just your wrist. If you agitate it using just your wrist, you may injure your wrist. 833

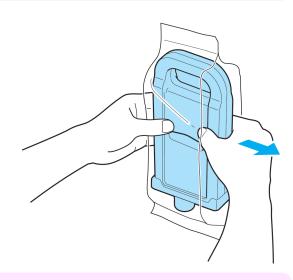

1

Caution

Important • If you do not agitate the Ink Tank, the ink may settle, which may affect printing quality.

 Never touch the ink holes or electrical contacts. This may cause stains, damage the Ink Tank, and affect printing quality.

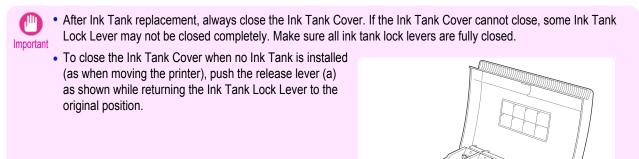

**3** Press the **OK** button and insert the Ink Tank into the holder facing as shown, with the ink holes down.

- Ink tanks cannot be loaded in the holder if the color or orientation is incorrect.
- If the Ink Tank does not fit in the holder, do not force it into the holder. Make sure the color of the Ink Tank Lock Lever matches the color of the Ink Tank, and check the orientation of the Ink Tank before reloading it.

a

### **Checking Ink Tank Levels**

On the Display Screen, you can check how much ink is left in the ink tanks.

To check remaining lnk Tank levels, access the **Tab Selection screen** on the Control Panel and press  $\triangleleft$  or  $\triangleright$  to select the lnk tab ( $\bigcirc$ ).

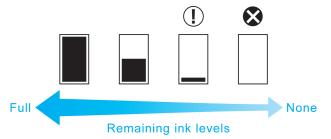

Maintenance and Consumables Ink Tanks

- If the Tab Selection screen is not displayed, press the Menu button.
- Note If an error has occurred and the Tab Selection screen cannot be displayed, display Ink Info as follows.
  - 1. Press the **OK** button to display **Printer Info**.
  - 2. Press the  $\blacktriangle$  or  $\blacktriangledown$  button to select **Ink Info**.
  - 3. Press the OK button.

The remaining ink levels shown on the Display Screen correspond to the inks identified by the Color Label on the bottom of the Display Screen.

These symbols may be displayed above the ink level: ! if ink is low, **x** if no ink is left, and ? if you have deactivated ink level detection.

The remaining ink level is indicated as shown below.

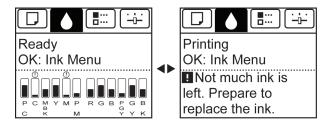

If the Display Screen indicates to replace the Ink Tank, replace the Ink Tank. If a message is displayed indicating to check the remaining ink levels, or after tasks that consume a lot of ink such as large-format printing or head cleaning, check the remaining levels and replace Ink Tank as needed. (See "Replacing Ink Tanks.")  $\rightarrow$  P.826

### When to Replace Ink Tanks

Replace or prepare to replace ink tanks in the following situations.

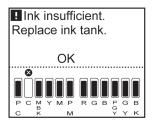

If a message for checking the ink is shown on the Display Screen

When there is little ink left, the **Message Lamp** is lit and "**Not much ink is left.**" is shown on the Display Screen. You can continue to print, but prepare to replace the Ink Tank. (See "Checking Ink Tank Levels.")  $\rightarrow$  P.836

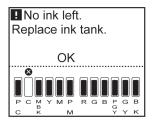

### Before print jobs and maintenance that consume a lot of ink

If little ink is left, there may not be enough for large-format printing, head cleaning, and maintenance, which require a lot of ink. Replace or prepare to replace the Ink Tank.

If a message for ink replacement is shown on the Display Screen

When ink runs out, the **Message Lamp** flashes, a message regarding lnk Tank replacement is shown on the Display Screen, and printing is disabled. Replace the lnk Tank at this point.

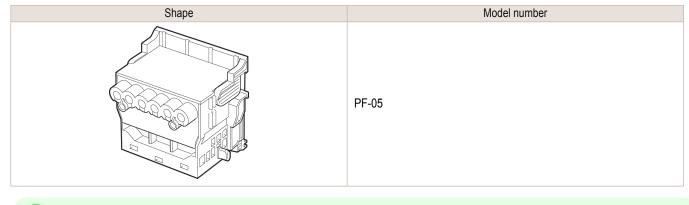

# Printheads

Printhead	38
Checking for Nozzle Clogging       8.         Cleaning the Printhead       8.         Replacing the Printhead       8.	339

# Printhead

#### When purchasing, check the Model number.

For instructions on replacing the Printhead, see "Replacing the Printhead." —P.840

### **Checking for Nozzle Clogging**

If printing is faint or affected by banding in different colors, make sure the Printhead nozzles are clear by printing a test pattern to check the nozzles.

Note

• Nozzles are periodically checked to ensure they are clear. Configure the settings on the Control Panel menu in Nozzle Check. (See "Menu Settings.") → P.667

### Paper to Prepare

When Using Rolls	An unused roll at least 254.0 mm (10.00 in) wide
When Using Sheets	One sheet of unused paper of at least A4/Letter size

Load paper.

Note

- Loading Rolls in the Printer  $\rightarrow$  P.533
- Loading Sheets in the Printer →P.555

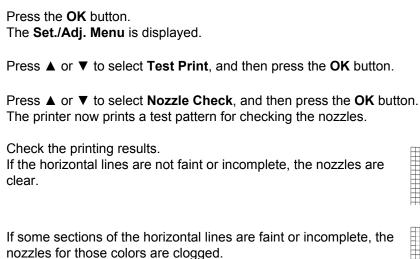

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

If the Tab Selection screen is not displayed, press the Menu button.

4

5

6

hose colors are clogged.

If horizontal lines are faint or incomplete, follow the steps below and check again for nozzle clogging.

- 1. Clean the Printhead. (See "Cleaning the Printhead.")  $\rightarrow$  P.839
- 2. Print a test pattern to check the nozzles.

• If you repeat these steps several times but the horizontal lines are still faint or incomplete, contact your Canon dealer.

# **Cleaning the Printhead**

If printing is faint, cleaning the Printhead may improve results. Choose one of two Printhead cleaning modes (**Head Cleaning A** or **Head Cleaning B**), depending on the problem to resolve.

Head Cleaning A

Use this mode if printing is faint or contains foreign substances. This method of cleaning consumes the least amount of ink.

It takes about four minutes to complete.

Head Cleaning B

Use this mode if no ink is ejected at all, or if **Head Cleaning A** does not solve the problem. It takes about five minutes to complete.

• Do not remove the Maintenance Cartridge or ink tanks during either **Head Cleaning A** or **Head Cleaning B**. Ink may leak or an error may occur.

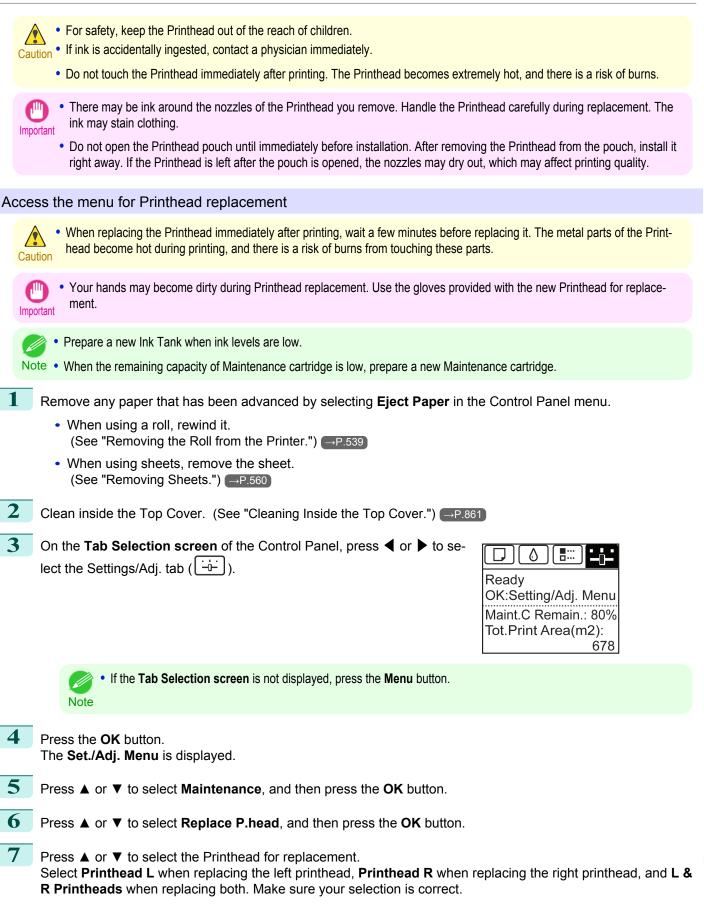

• If printing does not improve even if you execute **Head Cleaning B**, try repeating **Head Cleaning B** once or twice. If this still does not improve printing, the Printhead may have reached the end of its useful life. Contact your Canon dealer for assistance.

Nozzles are periodically checked to ensure they are clear. Configure the settings on the Control Panel menu in **Nozzle Check**. (See "Menu Settings.") →P.667

Perform cleaning as follows.

	1	On the <b>Tab Selection screen</b> of the Control Panel, press ◀ or ▶ to select the Settings/Adj. tab (). Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678
		<ul> <li>If the Tab Selection screen is not displayed, press the Menu button.</li> <li>Note</li> </ul>
	2	Press the <b>OK</b> button. The <b>Set./Adj. Menu</b> is displayed.
	3	Press ▲ or ▼ to select <b>Maintenance</b> , and then press the <b>OK</b> button.
	4	Press ▲ or ▼ to select <b>Head Cleaning</b> , and then press the <b>OK</b> button.
	5	Press ▲ or ▼ to select <b>Head Cleaning A</b> or <b>Head Cleaning B</b> , and then press the <b>OK</b> button. Head cleaning is now executed.
	6	Print a test pattern to check the nozzles, and determine whether cleaning has cleared the nozzles. (See "Checking for Nozzle Clogging.") →P.838
	Rep	placing the Printhead

	• If Ri	
	• If Re Com	eplace the Printhead as directed.
)	• If R Com For inf	aplace the Printhead as directed.

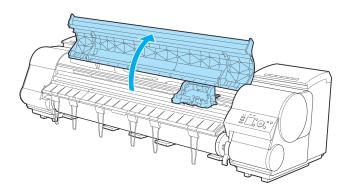

# 8 Press the **OK** button.

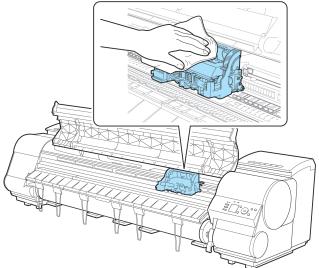

Ink begins being drawn in. When it finishes, instructions are displayed on the Display Screen. It takes about three minutes for ink to be drawn into the system.

#### Replace the Printhead

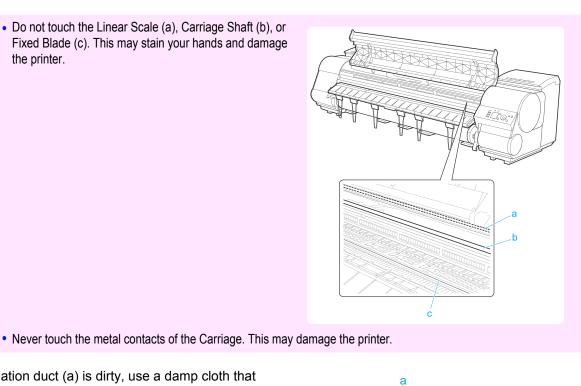

Open the Top Cover.

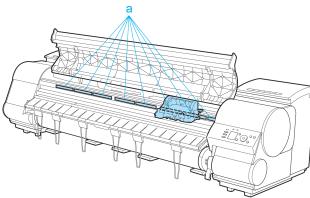

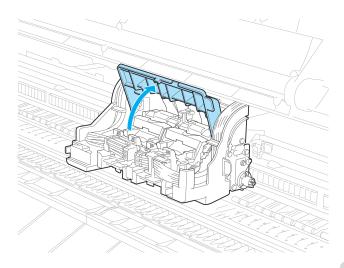

Important

3 If the ventilation duct (a) is dirty, use a damp cloth that you have wrung out completely to wipe it clean. If the Carriage is obscuring the ventilation duct, move the Carriage manually before cleaning the duct.

Pull up the Carriage Cover to open it completely.

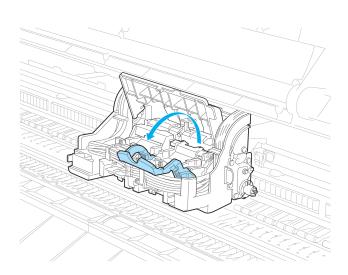

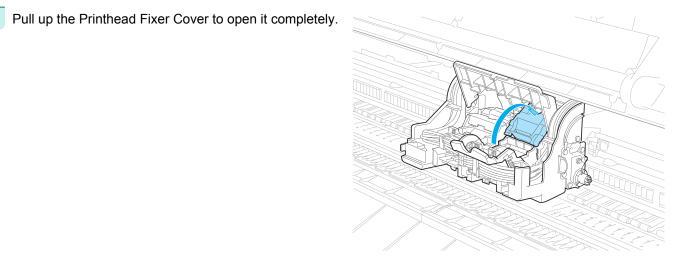

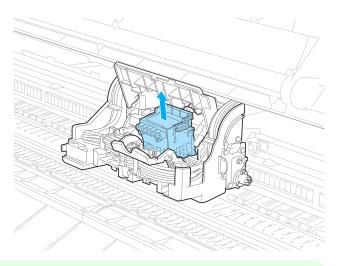

Pull the Printhead Fixer Lever forward all the way to open it completely.

Remove the Printhead and press the **OK** button.

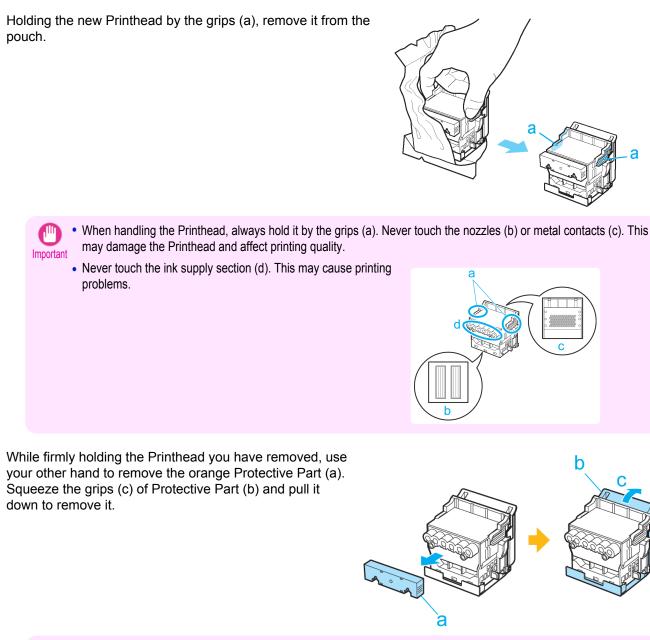

Dispose of the used Printhead in accordance with local regulations.

9

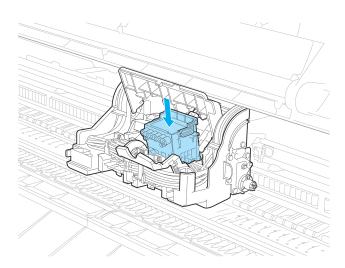

- The inside surface of the Protective Part (a) and Protective Part (b) is coated with ink to protect the nozzles. Be careful not to touch these surfaces when removing the caps.
  - The Printhead contains ink to protect the nozzles. We recommend removing Protective Part (b) as you hold it over the Printhead package or safely out of the way to avoid spilling ink and staining your clothes or the surrounding area. If ink accidentally spills, wipe off the ink with a dry cloth.
  - If you need to put a Printhead somewhere temporarily before installation, do not keep the nozzles and metal contacts facing down. If the nozzles or metal contacts are damaged, it may affect the printing quality.
  - Do not reattach the Protective Part or protective material. Dispose of these materials in accordance with local regulations.

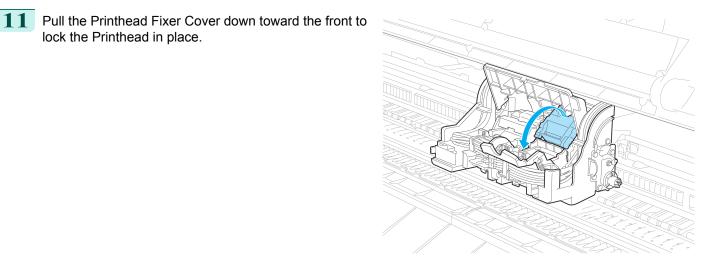

**10** With the nozzles facing down and the metal contacts toward the back, tilt the Printhead slightly forward and insert it into the Carriage. Carefully push the printhead firmly into the Carriage, ensuring that the nozzles and metal contacts do not touch the carriage.

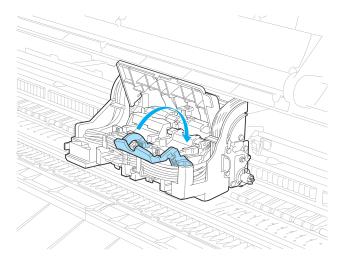

Push the Printhead Fixer Lever toward the back of the

lock the Printhead in place.

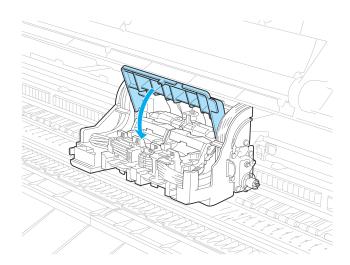

printer until it clicks.

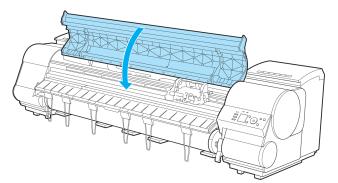

12

**14** Close the Top Cover. Ink now fills the system. It takes about 13 minutes for ink to fill the system.

**13** Push the Carriage Cover down toward the front.

While ink is being filled, definitely do not remove the Ink Tank or Maintenance Cartridge. Ink may leak out. Important

The procedure is now finished if you have set Rep.P.head Print to Off in the Control Panel menu. In this case, execute Initial adjustmt in Head Posi. Adj. in the Control Panel menu. (See "Adjustment When Installing the Printhead.") →P.802

15 Feed paper by following the instructions on the Display Screen. After the paper has advanced, Initial adjustmt in Head Posi. Adj. is executed automatically.

When printing fine lines or text at high precision on glossy or semi-glossy photo or proofing paper, set the optimal Printhead height before aligning the printhead. (See "Enhancing Printing Quality.") →P.796

# **Cutter Unit**

Cutter Unit	. 848
Replacing the Cutter Unit	

# **Cutter Unit**

### When purchasing, check the Model number.

✓ • For instructions on Cutter Unit replacement, see "Replacing the Cutter Unit." →P.848 Note

# **Replacing the Cutter Unit**

### **Compatible Cutter Units**

For information on compatible cutter units, see "Cutter Unit." →P.848

### Access the menu for cutter unit replacement

1 On the **Tab Selection screen** of the Control Panel, press **◀** or **▶** to select the Settings/Adj. tab ( <u>-</u><u>-</u>).

Ready OK:Setting/Adj. Menu Maint.C Remain.: 80% Tot.Print Area(m2): 678

• If the **Tab Selection screen** is not displayed, press the **Menu** button. Note

2 Press the OK button. The Set./Adj. Menu is displayed.

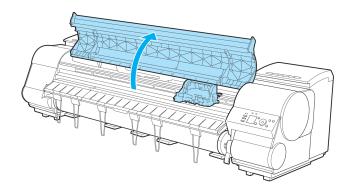

3 Press ▲ or ▼ to select Maintenance, and then press the OK button.

Press ▲ or ▼ to select **Change Cutter**, and then press the **OK** button. The Carriage moves. When it finishes moving, instructions are displayed on the Display Screen.

• If you do not respond within two minutes, cutter cleaner replacement is canceled. In this case, repeat the procedure.

### Replacing the Cutter Unit

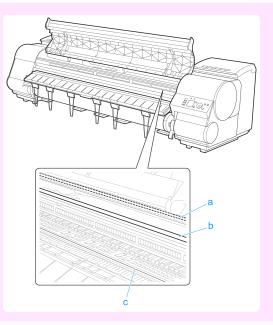

Open the Top Cover.

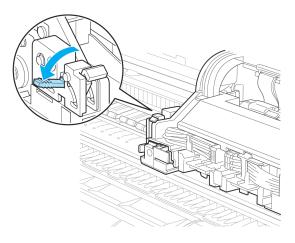

2 If the Cutter Unit or Carriage Cover is dirty, use a damp cloth that you have wrung out completely to wipe it clean.

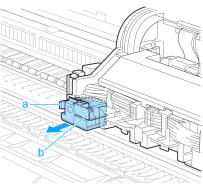

• Do not touch the Linear Scale (a), Carriage Shaft (b), or Fixed Blade (c). This may stain your hands and damage the printer.

3 Push the Cutter Unit Detachment Lever to the left to unlock it.

• Never touch any part of the Cutter Unit except the Lock Lever (a) and grip (b). This may stain your hands or cause injury. Additionally, this may damage the printer.

Do not disassemble the Cutter Unit. Touching the blade may cause injury.

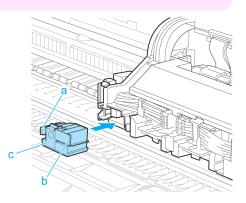

Dispose of the used Cutter Unit in accordance with local regulations.

Holding the new Cutter Unit by the Lock Lever (a) and grip (b), insert it on the Carriage until it clicks into place (c).

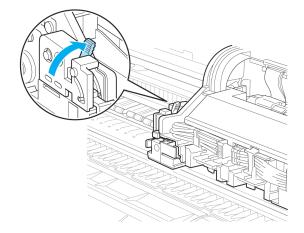

• After installing the Cutter Unit, hold it only by the grip (b) and pull the Cutter Unit forward to make sure it does not come off. It may damage the printer if the Cutter Unit comes off.

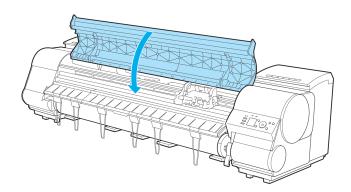

Lift the Cutter Unit Detachment Lever to lock it.

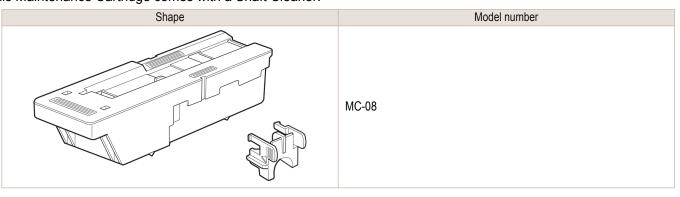

- 8 A confirmation message is displayed about the Cutter Unit lock. Press ▲ or ▼ to select "**Yes**", and then press the **OK** button.
- 9 The Carriage is moved, and a confirmation message is displayed about resetting the cut count. To reset the cut counter, press ▲ or ▼ to select **Yes**, and then press the **OK** button.

# Maintenance Cartridge

Checking the Remaining Maintenance Cartridge Capacity	
When to Replace the Maintenance Cartridge	859

# Maintenance Cartridge

#### When purchasing, check the Model number. This Maintenance Cartridge comes with a Shaft Cleaner.

# **Replacing the Maintenance Cartridge**

### Compatible maintenance cartridges

For information on compatible maintenance cartridges, see "Maintenance Cartridge." -P.852

### Precautions when handling the Maintenance Cartridge

Take the following precautions when handling the Maintenance Cartridge.

- For safety, keep the Maintenance Cartridge out of the reach of children.
- Caution If ink is accidentally ingested, contact a physician immediately.

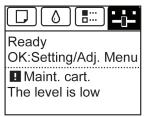

- Do not remove the Maintenance Cartridge except to replace it. Ink may leak out.
- Important To prevent ink from leaking from a used Maintenance Cartridge, avoid dropping the cartridge or storing it at an angle. Otherwise, ink may leak and cause stains.
  - Ink adheres to the top of the Maintenance Cartridge after it has been used. Handle the Maintenance Cartridge carefully during replacement. The ink may stain clothing.

#### iPF9400

### Confirm the message

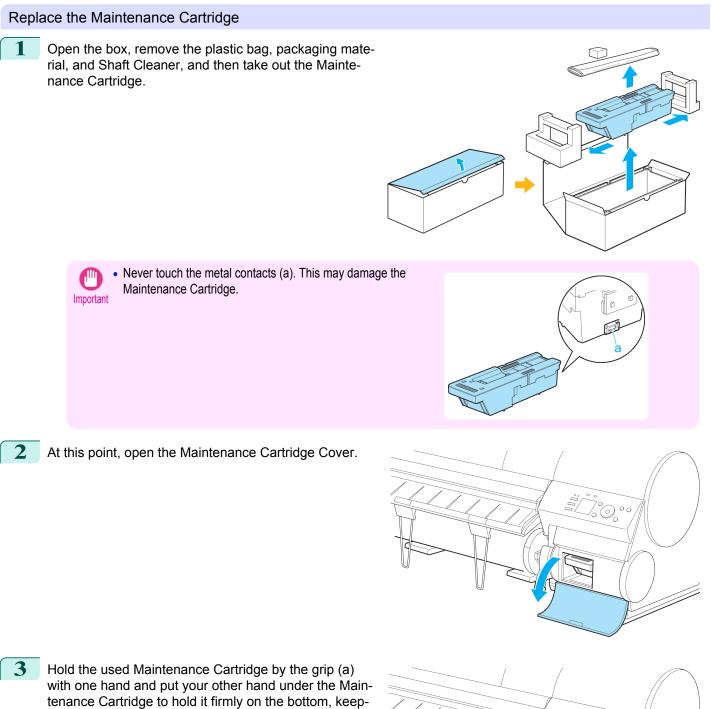

When the Maintenance Cartridge is almost empty, a message is shown on the Display Screen. According to the message, replace the Maintenance Cartridge or prepare a new Maintenance Cartridge. (See "When to Replace the Maintenance Cartridge.") -P.359

If a message is displayed requesting Maintenance Cartridge replacement, you can skip the step Access the menu for Maintenance Cartridge replacement. Follow the instructions in Replace the Maintenance Cartridge.

Maintenance and Consumables

ing it level as you pull it out.

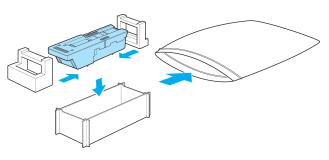

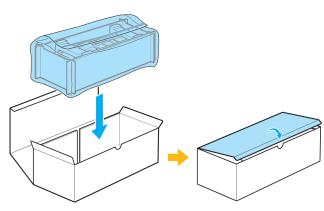

6

• Used maintenance cartridges are heavy. Always grasp the cartridge firmly and keep the cartridge level during removal and storage. If you drop a used Maintenance Cartridge or store it at an angle, ink may leak and cause stains.

• The remaining Maintenance Cartridge capacity is recorded on each printer. Do not install a used Maintenance Cartridge in another printer.

4 Attach the packaging material to the used Maintenance Cartridge and put it in the box. Keep it level as you put it in the plastic bag. Expel excess air from the plastic bag and seal the zipper.

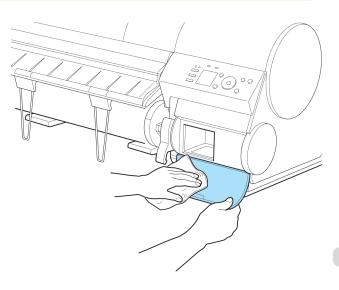

Confirm the Maintenance Cartridge is right-side up, put it in the box, and store it so that it stays level.

• Always put the used Maintenance Cartridge back in the box and store the box on a flat surface. Otherwise, ink may leak and cause stains.

• In accordance with active and ongoing environmental programs, Canon supports recycling of used maintenance cartridges. Follow the instructions provided with the new Maintenance Cartridge that describe how to process the used Maintenance Cartridge.

Wipe away any soiling on the Maintenance Cartridge Cover.

Important

all the way in.

7

8

9

Replacing the Shaft Cleaner

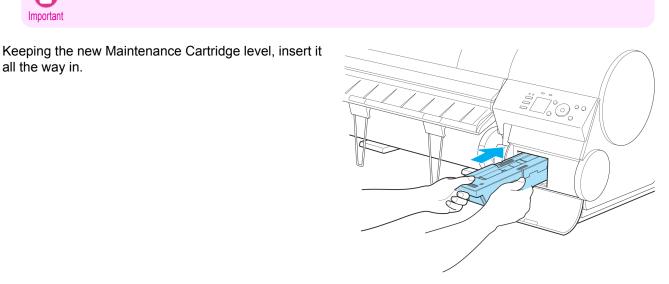

ment Maintenance Cartridge.

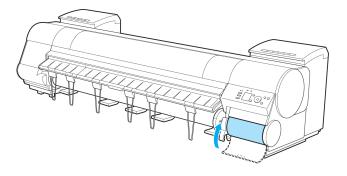

Press the **OK** button. The printer now initializes the Maintenance Cartridge. Next, replace the Shaft Cleaner.

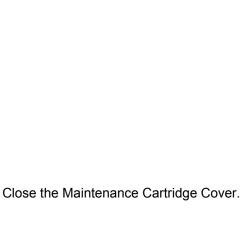

Replace the Shaft Cleaner when you replace the Maintenance Cartridge. New Shaft Cleaner is included with replace-

User's Guide

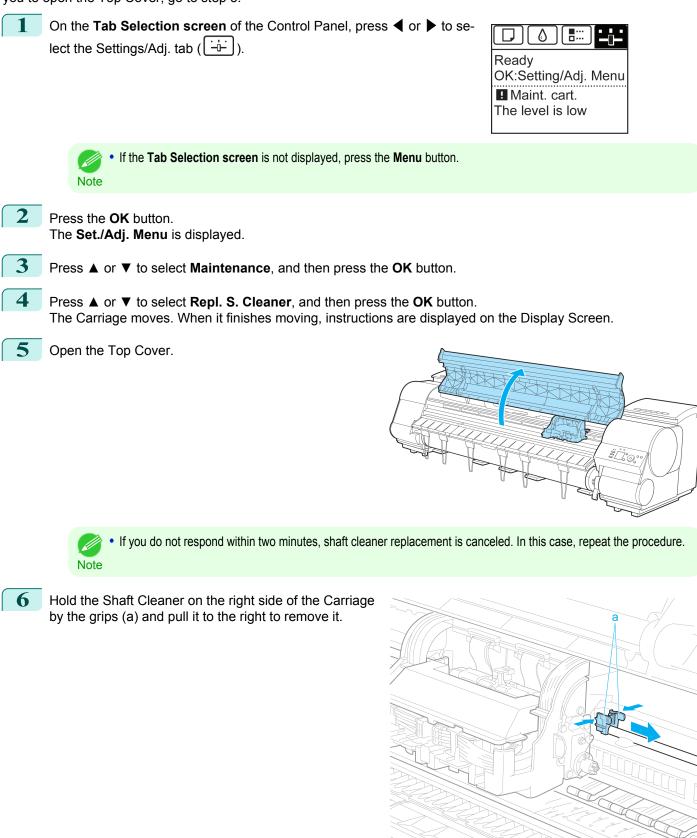

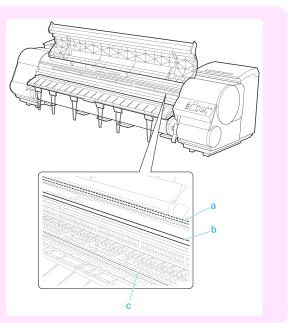

· Support the Maintenance Cartridge Cover from underneath as you wipe it.

After you execute **Repl. maint cart** and replace the Maintenance Cartridge, a message will appear on the Display Screen requesting you to replace the Shaft Cleaner. Select **Yes** and press the **OK** button. When a message requests you to open the Top Cover, go to step 5.

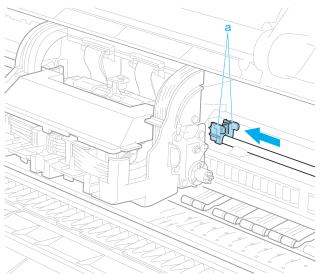

• Do not touch the Linear Scale (a), Carriage Shaft (b), or Fixed Blade (c). This may stain your hands and damage the printer.

7 Holding the new Shaft Cleaner by the grips (a), attach it to the Carriage.

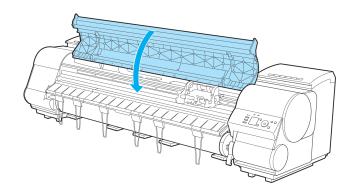

8

Be sure to put the used Shaft Cleaner in the small box before putting it in the larger box with the used Maintenance Cartridge for disposal. Note

# Close the Top Cover.

The Carriage moves back into position.

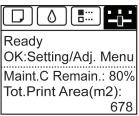

# Checking the Remaining Maintenance Cartridge Capacity

The Maintenance Cartridge absorbs excess ink from borderless printing, printhead cleaning, and other processes. You can confirm the remaining capacity of the Maintenance Cartridge by checking the Maintenance Cartridge capacity shown on the Display Screen.

To check remaining Maintenance Cartridge capacity, access the **Tab Selection screen** on the Control Panel and

press  $\blacktriangleleft$  or  $\blacktriangleright$  to select the Settings/Adj. tab ((--)).

If the Tab Selection screen is not displayed, press the Menu button.

If the Display Screen indicates to replace the Maintenance Cartridge, replace the Maintenance Cartridge. If a message is displayed indicating to check the remaining capacity of the Maintenance Cartridge, or before tasks that deplete much of the capacity such as head cleaning or preparations to move the printer, check the remaining Maintenance Cartridge

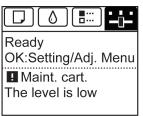

### When to Replace the Maintenance Cartridge

Replace or prepare to replace the Maintenance Cartridge in the following situations.

If a message for checking the Maintenance Cartridge is shown on the Display Screen

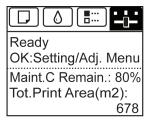

When the Maintenance Cartridge is almost full, the **Message Lamp** is lit and "**The level is low**" is shown on the Display Screen. You can continue to print, but check the remaining Maintenance Cartridge capacity and prepare to replace the Maintenance Cartridge with a new one. (See "Checking the Remaining Maintenance Cartridge Capacity.")

capacity and prepare a new Maintenance Cartridge as needed. (See "Replacing the Maintenance Cartridge.") — P.852

### When much of the Maintenance Cartridge capacity is depleted

Printhead cleaning, Printhead replacement, and preparations to transfer the printer deplete much of the Maintenance Cartridge capacity. (In particular, preparing to move the printer depletes a lot of the capacity.) Check the remaining Maintenance Cartridge capacity before this maintenance and replace the Maintenance Cartridge if necessary.

Note

### If a message for the Maintenance Cartridge replacement is shown on the Display Screen

When the Maintenance Cartridge is almost empty, the **Message Lamp** lights, a message to replace the Maintenance Cartridge is displayed on the Display Screen, and you cannot print. Replace the Maintenance Cartridge with a new one.

Maintenance cartridge full.	
Replace the maintenance cartridge.	

# **Cleaning the Printer**

Cleaning the Printer Exterior Cleaning Inside the Top Cover	
Cleaning the Printhead	839

### **Cleaning the Printer Exterior**

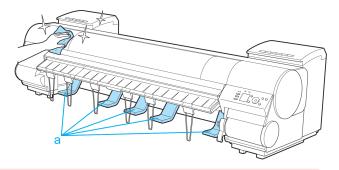

Clean the printer regularly to maintain better printing quality and help prevent problems. About once a month, clean the printer exterior.

- Turn the printer off. (See "Turning the Printer On and Off.") →P.21
- 2 Unplug the power cord from the outlet.

 Always turn off the printer and unplug the power cord before cleaning or maintenance. Accidentally leaving the printer on poses a risk of injury if you touch moving parts inside the printer.

3 Using a damp cloth that you have wrung out completely, wipe away any dirt or paper dust from the Paper Feed Slot (a), power cord plug, and so on. Dry these parts with a dry cloth.

• Never use flammable solvents such as alcohol, benzene, or thinner. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

• If the Ejection Guide is dirty, it may soil the edge of the paper when the paper is cut. We recommend cleaning the Ejection Guide even if it does not appear dirty, because it may actually be covered with paper dust.

Plug the power cord into the outlet.

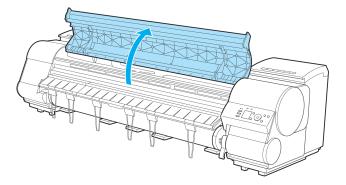

# **Cleaning Inside the Top Cover**

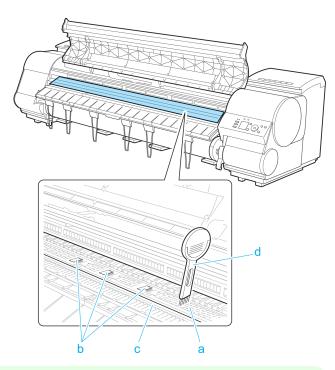

Clean inside the Top Cover to maintain better printing quality and help prevent problems. Also clean inside the Top Cover in the following situations to ensure optimal operation.

- If the printed surface or the underside of paper is dirty after printing
- After you have used up a roll
- After borderless printing
- After printing on small paper
- After printing on paper that generates a lot of cutting debris
- If you have replaced the roll
- After printing on paper that generates a lot of paper dust
- If the message "Blue platen switch is dirty." is displayed

- If the Platen inside the Top Cover becomes dirty, it may soil the underside of paper. We recommend cleaning the Platen after borderless printing or printing on small paper.
  - If the Ejection Guide is dirty, it may soil the edge of the paper when the paper is cut. We recommend cleaning the Ejection Guide even if it does not appear dirty, because it may actually be covered with paper dust.

Open the Top Cover.

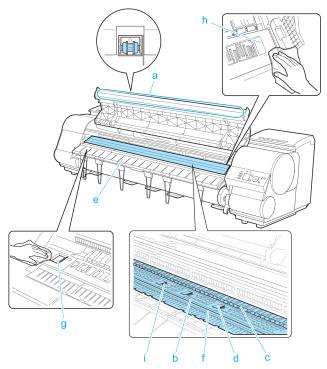

If paper dust has accumulated in the Vacuum holes (a) on the Platen, in the Borderless Printing Ink Grooves (b), or on the cutter guide (c), use the Cleaning Brush (d, provided with the printer) to wipe it away.

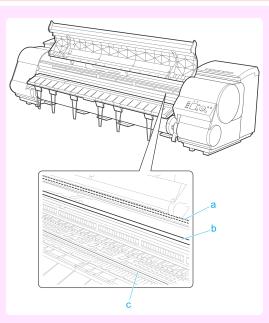

If the Cleaning Brush is dirty, rinse it in water.

**3** Using a damp cloth that you have wrung out completely, wipe inside the Top Cover to clean it. Wipe away any ink residue and paper dust (debris from cutting) on the Top Cover Roller (a), all over the Platen (b), on the Paper Retainer (c), the Borderless Printing Ink Grooves (d), the Ejection Guide (e), the cutter guide (f), around the ink suction holes at left (g), around the Borderless Printing Ink Grooves at right (h), on the blue Switch (i), and so on.

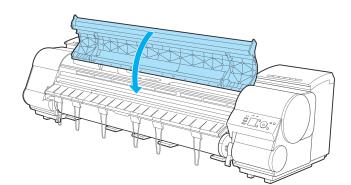

• Never use flammable solvents such as alcohol, benzene, or thinner. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

• Do not touch the Linear Scale (a), Carriage Shaft (b), or Fixed Blade (c). This may stain your hands and damage the printer.

- Do not use a dry cloth to wipe inside the Top Cover. This may create a static charge, which may attract dust and affect the printing quality.
- Do not touch the clear sheet on the side of the Top Cover Roller. This may damage the roller.

### **Other Maintenance**

Preparing to Transfer the Printer	865
Updating the Firmware	871

### Preparing to Transfer the Printer

To protect the internal parts in transit, always follow these steps before transferring the printer to a new location. Refer to the Setup Guide for details on packing the printer and installing it after transfer.

Be sure to contact your Canon dealer before transferring the printer to a new location. Ink may leak and damage the printer if you do not prepare the printer correctly and it is tipped or stood on end in transit.

• Depending on the state of the printer, part replacement may be necessary when preparing to transfer the printer (that is, when you execute the printer menu item to prepare for transfer).

- Ink must be drawn into the Maintenance Cartridge before Level 2 or Level 3 printer transfer, as described in the following table. Prepare the Maintenance Cartridge in advance.
- Always follow the instructions of the service representative when transferring the printer under Level 3 conditions.

Level	Shipping Method (Example)	Permitted Angle of Inclination	Amount of Ink to Dispose of	Required Mainte- nance Car- tridges(*1)
1	By truck	Lengthwise: 0–30°	0	0(*2)
		Rotation: 0–10°		
2	By plane	All directions: 0–30°	Approx. 600 ml (20.3 fl oz)	1 or 2

	Level	Shipping Method (Example)		Permitted Angle of Inclination		Amount of Ink to Dispose of	Required Mainte- nance Car- tridges(*1)

Other Maintenance

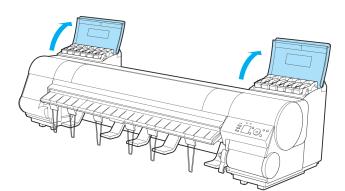

When the preparation is finished, instructions are displayed on the Display Screen. Remove the ink tanks before packing the printer. (See "Removing Ink Tanks.")  $\longrightarrow$  P.867

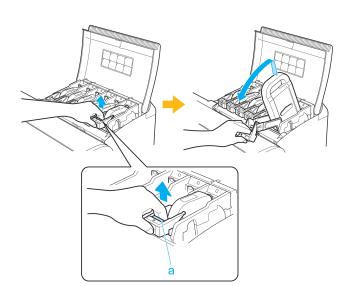

• If consumables must be replaced, the message "Consumables must be replaced. Call for service." is shown on the Display Screen and preparation is not possible. If this message is displayed, press the OK button and contact your Canon dealer for assistance.

#### **Removing Ink Tanks**

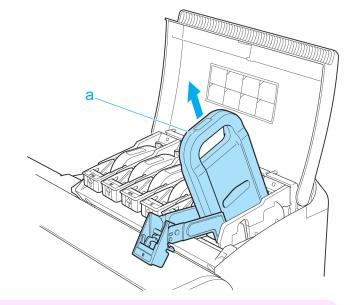

1 Open the left and right ink tank covers.

2 Lift the stopper (a) of the Ink Tank Lock Lever (a). Lift the Ink Tank Lock Lever until it stops, and then push it down to the front.

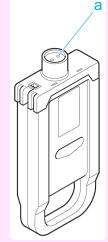

• Store the lnk Tank you removed in the box with the ink holes (a) facing up. Otherwise, ink may leak and cause stains.

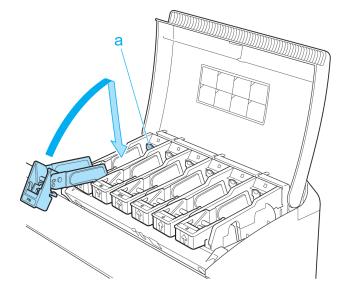

Other Maintenance

5

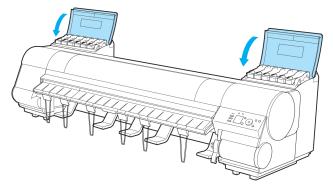

4 Repeat steps 2 and 3 to remove all ink tanks.

Push down the release lever (a) as shown as you gently return all ink tank lock levers to the original position.

Close the Ink Tank Cover. At this point, ink is drawn out from inside the tubes.

• Do not remove the Maintenance Cartridge except when the message for replacing it is displayed. If you remove the Maintenance Cartridge while ink is being drawn out, the ink may leak out.

7 When the process is finished, "Preparations for moving the printer finished. Turn the power off" is displayed.

When this happens, replace the Maintenance Cartridge currently being used with a new Maintenance Cartridge.

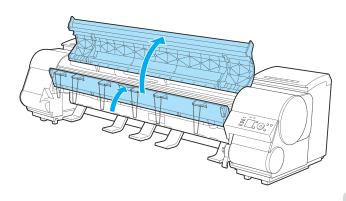

8 Press the **Power** button and turn off the printer.

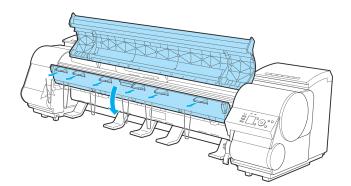

# Pack the printer 1 Disconnect the printer power cord and interface cable, as well as the Media Take-up Unit Power Inlet. Important • Turn the power off and then disconnect the power cord. It may damage the printer if you unplug it before it is off and transfer it in that state. If you accidentally unplug the printer, plug it in again, reinstall the ink tanks, and follow this

2 Open the Top Cover and lift the Ejection Guide.

procedure again.

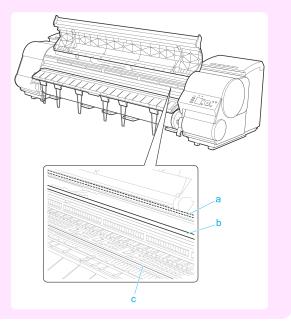

3 Remove the six Ejection Supports and lower the Ejection Guide.

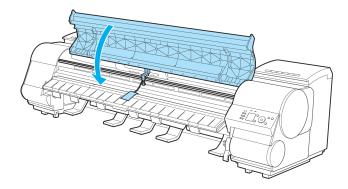

- 4 Grasp the Belt, insert it between the Belt Stopper, and affix the Belt Stopper with a hex screw at the position indicated.

- Here, the Belt Stopper is the one that was removed and stored after initial installation. Neglecting to attach the Belt Stopper may damage the printer.
  - Do not touch the Linear Scale (a), Carriage Shaft (b), or Fixed Blade (c). This may stain your hands and damage the printer.

Close the Top Cover.

- **6** Tape down printer covers to secure them, in the reverse order of tape removal during installation.
- 7 If the Output Stacker is installed, reverse the installation procedure to remove the Output Stacker.
- 8 Remove the Stand by reversing the installation procedure, when it was attached to the printer.
- 9 Disassemble and repackage the Stand by following the installation procedure (with six people lifting the printer) in reverse.

 Do not use the procedure for rotated installation (installing by rotating the printer). This may damage the printer. For details, see Setup Guide.

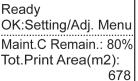

**10** Repack the Roll Holder, Holder Stopper, and printer in shipping materials, and then package them in a shipping box.

#### **Updating the Firmware**

Note

Update the printer firmware to take advantage of new and improved printer functions.

Confirming the firmware version

2 Press the OK button. The Set /Adi Menu i

3

The Set./Adj. Menu is displayed.

- Press ▲ or ▼ to select **Printer Info**, and then press the **OK** button.
- Press ▲ or ▼ to select System Info, and then press the OK button. The firmware version is displayed.

#### Updating the Firmware

To obtain the latest firmware, visit the Canon website. If the firmware available online is newer than the installed firmware, update the printer firmware. For details on downloading and updating the firmware, visit the Canon website.

### **Frequently Asked Questions**

### Frequently Asked Questions

This section presents frequently asked questions and answers. To view more detailed explanations, click the hyperlinks in the answer column.

Question	Answer
I want to easily create ver- tical or horizontal banners.	You can print originals that are in landscape (or portrait) orientation automatically enlarged to fit the roll width. This is an easy way to create vertical or horizontal banners. (See "Printing Vertical or Horizontal Banners (Large-Format Printing).") —P.108
Does this printer support sub-ink tank system?	This printer supports sub-ink tank system. Even if an ink tank becomes empty during printing, since a certain amount of ink always is stored in a sub-ink tank, you can replace the ink tank while printing. (See "Replacing Ink Tanks.") →P.826
I want to know how to con- figure roll cutting.	You can select the cutting method by the setting of the printer driver and the setting of the printer. To cut rolls automatically after printing, set <b>Cutting Mode</b> of the printer to <b>Automatic</b> and <b>Automatic Cutting</b> of the printer driver to <b>Yes</b> . When using paper for which ink adhesion takes time or the print surface is easily scratched, we recommend that you set the <b>Cutting Mode</b> setting of the printer to <b>Eject</b> . (See "Specifying the Cutting Method for Rolls.") —P.546 (See "Cutting Roll Paper After Printing.") —P.167
I want to configure so that the roll is cut automatically after waiting for the ink to dry.	In the printer driver, you can set the time for waiting until the ink dries. Also, you can set likewise on the printer. (See "Specifying the Ink Drying Time for Rolls.") →P.544 (See "Menu Structure.") →P.661
How do I print without bor- ders?	When printing on rolls, you can perform borderless printing by configuring the printer driver. (when printing on cut sheets, you cannot perform borderless printing) (See "Borderless Printing on Paper of Equivalent Size.") →P.95 (See "Borderless Printing by Resizing Originals to Fit the Roll Width.") →P.101 (See "Borderless Printing at Actual Size.") →P.89
I want to know the paper types that can be used in this printer.	Concerning the paper that can be used in this printer, refer to the imagePROGRAF home page or the Paper Reference Guide. (See "Types of Paper.")
The paper type that I want to print is not displayed on the Display Screen.	When using newly released paper, paper information must be registered on the printer and the printer driver. Download the new version of <b>Media Information File</b> from the imagePROGRAF website and install it. (See "Types of Paper.") —P.522
What type of function is color calibration?	Color calibration improves color consistency by compensating for slight differences in how color appears when printing due to individual variations or aging among the printers. We recommend color calibration in the following situations.
	After initial printer installation
	After Printhead replacement
	<ul> <li>When you sense a change of color compared to previously</li> </ul>
	<ul> <li>To print with colors aligned from multiple printers</li> </ul>
	When the execution guide is displayed
	(See "Corrects slight differences in how colors appear (color calibration).") →P.820
Can I perform duplex printing?	This printer cannot perform duplex printing. If you use the <b>Folded Duplex</b> function in the Free Layout of Windows software, you can print two pages one- sided, fold them at the center and suspend them to substitute for duplex printing. (See "Prints using Folded Duplex (Windows).") →P.239
I want to perform enlarge- ment printing.	With the printer driver, you can specify the ratio matching the document with the paper size and width and perform enlargement printing or reduction printing. (See "Resizing Originals to Match the Paper Size.") →P.68

Question	Answer
I want to perform enlarge-	(See "Resizing Originals to Fit the Roll Width.") →P.72
ment printing.	(See "Resizing Originals by Entering a Scaling Value.") →P.78

### **Problems Regarding Paper**

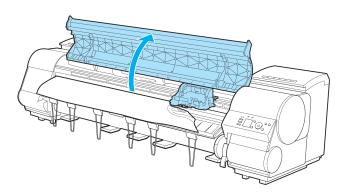

Clearing Jammed Roll Paper Clearing a Jammed Sheet	878 . 881
Roll paper cannot be inserted into the paper feed slot Cannot load sheets	
Paper is not cut straight Paper is not cut	884 884
The media take-up unit continues rotating	. 884
The size of clear film cannot be detected	885
Margins are wide	. 885
When printing on thin roll paper, the printed surface becomes scratched	885

### **Clearing Jammed Roll Paper**

If roll paper jams, follow the steps below to remove jams.

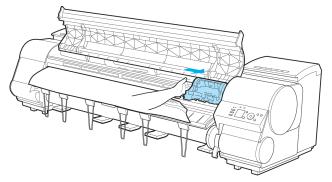

Turn the printer off. (See "Turning the Printer On and Off.") →P.21

2 Open the Top Cover.

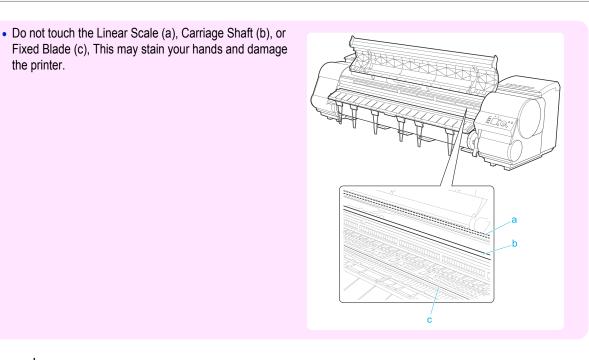

If the Carriage is out, move the Carriage out of the way, away from the paper.

If you push the Carriage to the left edge, the blade of the Cutter Unit will be lowered in preparation to cut the paper.
 Be careful not to pinch your fingers between the Carriage and Platen if you have pushed the Carriage to the left edge or if a paper jam occurs during cutting.

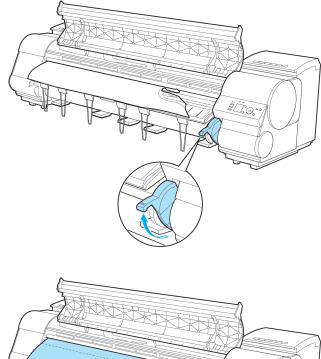

4

Lift the Release Lever.

Important

the printer.

5 Holding the paper on both sides, pull the jammed portion out toward the front. Use scissors or a cutting tool to cut away the printed or wrinkled portion.

Troubleshooting

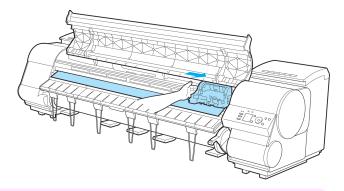

Problems Regarding Paper

• When cutting paper, be careful to avoid injury or damage to the printer.

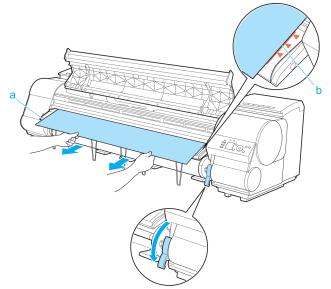

If the Carriage is on the left, move the Carriage to the right until it stops.

• Always move the Carriage to the right side. If the Carriage is on the left, a Carriage error may occur when you turn on the printer.

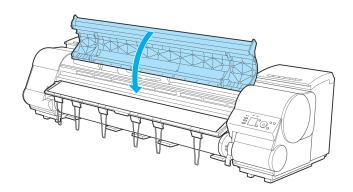

7 Hold the edge of the roll paper in the middle as you gently pull it evenly to the position of the Ejection Guide (a). Align the right side of the roll paper with the Paper Alignment Line (b), keeping this side parallel to the line, and then lower the Release Lever.

 Do not force the roll paper into alignment with the Paper Alignment Line (b). This may prevent the paper from being advanced straight.

8 Close the Top Cover.

**9** Turn the printer on. (See "Turning the Printer On and Off.")  $\rightarrow$  P.21 The roll is advanced and the printer is ready to print.

 For a neater edge, press the Cut button, select Yes, and cut the edge. (See "Specifying the Cutting Method for Rolls.") →P.546

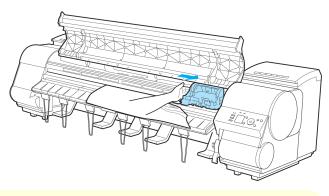

#### **Clearing a Jammed Sheet**

If a sheet jams, follow the steps below to remove it.

- Turn the printer off. (See "Turning the Printer On and Off.") →P.21
- 2 Open the Top Cover.

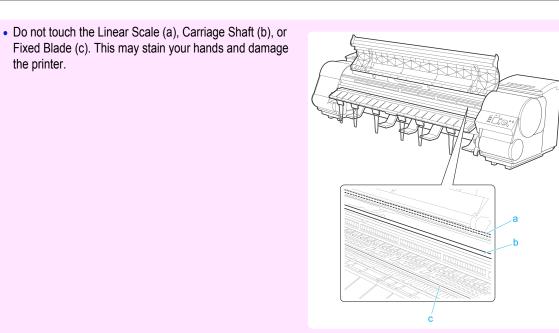

3 If the Carriage is out, move the Carriage out of the way, away from the paper.

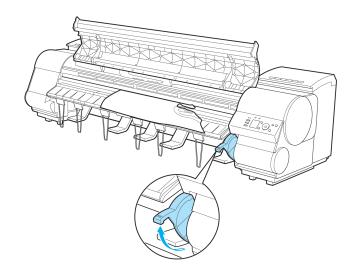

• If you push the Carriage to the left edge, the blade of the Cutter Unit will be lowered in preparation to cut the paper. Be careful not to pinch your fingers between the Carriage and Platen if you have pushed the Carriage to the left edge or if a paper jam occurs during cutting. Important

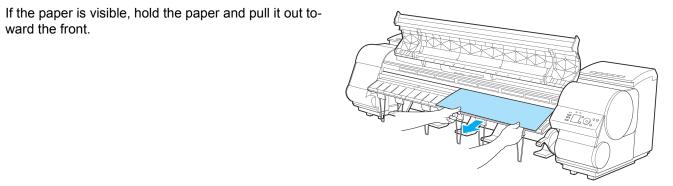

the printer.

ward the front.

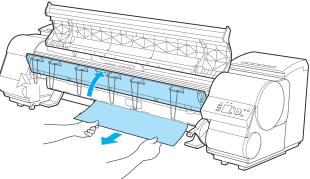

5

Troubleshooting

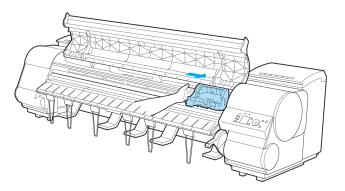

**6** If the paper is not visible, lift the Ejection Guide, remove the Roll Holder, and clear the paper jam from below.

After removing the paper, make sure there are no other scraps of paper in the printer, and then lower the Ejection Guide.

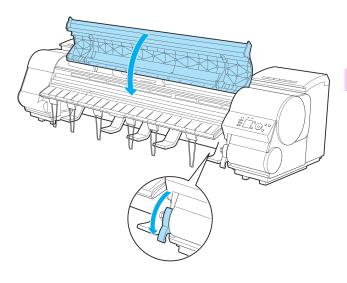

If the Carriage is on the left, move the Carriage to the right until it stops.

Important

• Always move the Carriage to the right side. If the Carriage is on the left, a Carriage error may occur when you turn on the printer.

8 Lower the Release Lever and close the Top Cover.

Turn the printer on. (See "Turning the Printer On and Off.")  $\rightarrow$  P.21)

#### Roll paper cannot be inserted into the paper feed slot

Cause	Corrective Action
The roll paper is warped.	Straighten out curls and reload the roll.
Paper is jammed by the paper feed slot.	Remove the jammed paper. (See "Clearing Jammed Roll Paper.") →P.878 (See "Clearing a Jammed Sheet.") →P.881

#### Cause The paper source selection is incorrect.

Corrective Action Press the Load button and select the paper source.

### **Cannot load sheets**

Cause	Corrective Action
The paper source selection is incorrect.	Press the Load button and select the paper source.

### Paper is not cut straight

<b>0</b>	
Cause	Corrective Action
The paper is bent or curled at the cut position.	Straighten out any curling by the edges of the paper.
Paper rises by the ends of the cut position before it is cut.	Reload the paper correctly.
You are using paper that cannot be cut with the Cutter Unit.	Specify <b>Manual</b> in <b>Cutting Mode</b> in the Control Panel menu and use scissors or a cutting tool to cut the roll after printing. (See "Specifying the Cutting Method for Rolls.") →P.546
The Cutter Unit is not installed correctly.	Reinstall the Cutter Unit correctly. (See "Replacing the Cutter Unit.") →P.848
The Cutter Unit blade is worn out.	Replace the Cutter Unit. (See "Replacing the Cutter Unit.") →P.848
<b>Cut Speed</b> is not configured correctly in the Control Panel menu.	Change the <b>Cut Speed</b> setting in the Control Panel menu. (See "Menu Structure.") →P.661
During cutting, printed documents fall out at an angle.	In the Control Panel menu, set <b>Cutting Mode</b> to <b>Eject</b> . Hold documents after printing as they are cut. (See "Specifying the Cutting Method for Rolls.") →P.546

### Paper is not cut

Cause	Corrective Action	
In the printer driver, <b>No</b> or <b>Print Cut Guide-</b> <b>line</b> is specified in <b>Automatic Cutting</b> .	Specify <b>Yes</b> in <b>Automatic Cutting</b> in the printer driver. (See "Page Setup Sheet (Windows).") →P.195 (See "Paper Detailed Settings Dialog Box (Mac OS X).") →P.368	
In the Control Panel menu, <b>Cutting Mode</b> is set to <b>Eject</b> or <b>Manual</b> .	If the <b>Cutting Mode</b> is <b>Eject</b> , press the <b>Cut</b> button to cut the paper. If the <b>Cutting Mode</b> is <b>Manual</b> , cut rolls with scissors or the like. (See "Specifying the Cutting Method for Rolls.") →P.546	
The Cutter Unit is not installed.	Install the Cutter Unit. (See "Replacing the Cutter Unit.") →P.848	
Rolls are not cut when you are using the Me- dia Take-up Unit.	Either cut the roll paper by pressing the <b>Cut</b> button or lift the Release Lever and cut the roll with scissors. (See "Removing Printed Documents from the Media Take-up Unit.") →P.579	

### The media take-up unit continues rotating

Cause	Corrective Action
There is a foreign object in the path of the Media Take-up Sensor (indicated by a dotted line).	Remove the foreign object from the Media Take-up Sensor path. Arrange the Basket Cloth and Basket Rod so they do not interfere with the Media Take-up Sensor.

Cause	Corrective Action
	Remove the foreign object from the Media Take-up Sensor path. Arrange the Basket Cloth and Basket Rod so they do not interfere with the Media Take-up Sensor.
The Media Take-up Sensor cord is not connected to the Right Media Take-up Unit correctly.	<ol> <li>Reconnect the Media Take-up Sensor cord as follows.</li> <li>Turn the printer off.</li> <li>Disconnect the Media Take-up Sensor cord from the Right Media Take-up Unit and reconnect it firmly, all the way in.</li> <li>Turn the printer on.</li> <li>(See "Using the Media Take-up Unit.") →P.570</li> <li>If the Media Take-up Unit continues rotating, contact your Canon dealer for assistance.</li> </ol>

-	The size of clear film cannot be detected	
	Cause	Corrective Action
	The Platen is soiled with ink or other substances.	Open the Top Cover and clean the entire Platen. (See "Cleaning Inside the Top Cover.") →P.861

### Margins are wide

Cause	Corrective Action
Rolls are advanced a specific amount before cutting to prevent problems with cutting and paper ejection.	This operation is normal.

### When printing on thin roll paper, the printed surface becomes scratched

Cause		Corrective Action
The roll paper has sagged during printi		II Tension to High in the Control Panel menu.
the surface of the paper and causing w in the paper.		Menu Settings.") → P.667 hange the <b>Roll Tension</b> setting, We recommend that you perform <b>Adj. Quali</b> -
	ty.	
	(See "/	Automatic Banding Adjustment.")

### Printing does not start

The Data lamp on the Control Panel does not light up The printer does not respond even if print jobs are sent	
Ink Filling is displayed The display screen indicates Agitating	

### The Data lamp on the Control Panel does not light up

Cause	Corrective Action
The printer is not on.	Make sure the power cord is securely plugged in, all the way. Press the <b>Power</b> button to turn on the printer.
The target printer was not selected when printing.	In Windows, select the printer by clicking <b>Select Printer</b> or <b>Printer</b> in the printing dialog box and try printing again.
	In Mac OS X, open the dialog box of the printer driver, select the printer from the list of <b>Printer</b> , and try printing again.
The print job is paused.	In Windows, restart the print job as follows.
	1. Select the printer icon in the Printers and Faxes (or Printers) window.
	2. Clear Pause Printing in the File menu to restart the print job.
	In Mac OS X, restart the print job as follows.
	1. Click Print & Fax. (This is identified as Printer Setup Utility or Print Center in other versions of Mac OS X.)
	2. Select the printer, and then Resume Printer (or Start Jobs) in the Printers menu to restart the print job.

### The printer does not respond even if print jobs are sent

Cause	Corrective Action
In the Control Panel menu, <b>Pause Print</b> is <b>On</b> .	Set <b>Pause Print</b> to <b>Off</b> . (See "Pausing Printing.") →P.33
You have selected <b>Save in mail box</b> in <b>Output Method</b> on the printer.	Print the job saved on the printer's hard disk. (See "Printing Saved Jobs.") →P.763
Print jobs are pending.	Manage the jobs on hold and print as needed. (See "Managing Pending Jobs (Printing or Deleting Jobs on Hold).") →P.761

### Ink Filling.. is displayed

Cause	Corrective Action
The printer was forced off during operation.	Wait until the system has been filled with ink. This process may take about nine minutes.

### The display screen indicates Agitating...

Cause	Corrective Action
Ink agitation is in pro- gress.	Please wait until ink agitation is finished. The time for agitation varies depending on how long the printer was off. (Between about a minute and a half to twenty minutes.)

### The printer stops during a print job

An error message is shown on the Display Screen	887
The printer ejects blank, unprinted paper	887

### An error message is shown on the Display Screen

Cause	Corrective Action
An error message is displayed during printing.	Check the error message and take action as necessary. (See "Error Messages.")
The last portion of roll paper was used during a print job, and paper could not be advanced because the trailing edge is taped to the roll.	Remove the used roll and insert a new roll. (See "Removing the Roll from the Printer.") $\rightarrow$ P.539 (See "Removing the Roll Holder from Rolls.") $\rightarrow$ P.542 (See "Loading and Printing on Rolls.") $\rightarrow$ P.22

### The printer ejects blank, unprinted paper

Cause	Corrective Action
The leading edge of the roll paper was cut to straighten it.	The leading edge of rolls may be cut to straighten it if <b>Trim Edge First</b> is set to a value other than <b>Off</b> in the Control Panel menu. (See "Cutting the Leading Edge of Roll Paper Automatically.") →P.552
The Printhead nozzles are clogged.	Print a test pattern to check the nozzles and make sure the Printhead is in good condition for print- ing. (See "Checking for Nozzle Clogging.") →P.838
A print job was received from an incompatible printer driver.	Use the correct imagePROGRAF printer driver for the printer and try printing again.
The printer is damaged.	Contact your Canon dealer for assistance.

# Problems with the printing quality

Printing is faint       8         Paper rubs against the printhead       8         The edges of the paper are dirty       8         The surface of the paper is dirty       8         The back side of the paper is dirty       8         Immediately after borderless printing, the trailing edge margin is soiled during regular printing       8	389 389 390 390
Printed colors are inaccurate       8         Banding in different colors occurs       8         Colors in printed images are uneven       8         Image edges are blurred or white banding occurs       8         Setting the Blue Switch on the Platen       8         The contrast becomes uneven during printing       8	891 892 893 893
The length of printed images is inaccurate in the feeding direction       8         Images are printed crooked       8         Documents are printed in monochrome       8	397
Line thickness is not uniform	
Borders appear in borderless printing	398

### Printing is faint

Cause	Corrective Action
You may be printing on the wrong side of the paper.	Print on the printing surface.
The Printhead nozzles are clogged.	Print a test pattern to check the nozzles and see if they are clogged. (See "Checking for Nozzle Clogging.") →P.838
Because the printer was left without ink tanks installed for some time, ink has be- come clogged in the ink supply system.	After the ink tanks have been installed for 24 hours, run <b>Head Cleaning B</b> from the Control Panel. (See "Cleaning the Printhead.") —P.839
Paper is jammed inside the Top Cover.	Follow the steps below to remove the jammed piece of paper inside the Top Cover.
	1. Open the Top Cover and make sure the Carriage is not over the Platen.
	<ol> <li>Remove any scraps of paper inside the Top Cover. (See "Clearing Jammed Roll Paper.") →P.878 (See "Clearing a Jammed Sheet.") →P.881</li> </ol>
	3. Close the Top Cover.
The ink was not dry when paper was cut.	Specify a longer drying period in the Control Panel menu, in <b>Paper Details &gt; Roll DryingTime</b> . (See "Menu Settings.") →P.667
Printing may be faint if <b>Print Quality</b> in <b>Advanced Settings</b> in the printer driver is set to <b>Standard</b> or <b>Fast</b> .	In Advanced Settings of the printer driver, choose Highest quality or High in Print Quality. Printing in Fast or Standard mode is faster and consumes less ink than in Highest quality or High modes, but the printing quality is lower. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") —P.61
You are printing on paper that tends to generate dust when cut.	In the Control Panel menu, set <b>CutDustReduct.</b> in <b>Paper Details</b> to <b>On</b> . (See "Reducing Dust from Cutting Rolls.") →P.554

#### Paper rubs against the printhead Corrective Action Cause The type of paper specified in the printer Load paper of the same type as you have specified in the printer driver. driver does not match the type loaded in (See "Loading Rolls in the Printer.") $\rightarrow P.533$ the printer. (See "Loading Sheets in the Printer.") →P.555 Make sure the same type of paper is specified in the printer driver as you have loaded in the printer. Press the Stop button and stop printing. Change the type of paper in the printer driver and try printing again. Paper has been loaded incorrectly, caus-Reload the paper. ing it to wrinkle. ### Banding in different colors occurs

Cause	Corrective Action
The paper feed amount is out of adjustment.	Adjust the feed amount. (See "Adjusting the Feed Amount.") →P.805
Printing does not proceed smoothly because print jobs are interrupted during transmission.	Exit other applications and cancel other print jobs.

Cause	Corrective Action
In the Control Panel menu, <b>Adj. Priority</b> is set to <b>Print Length</b> .	Setting <b>Adj. Priority</b> to <b>Print Quality</b> in the Control Panel menu and adjusting the feed amount may improve results. (See "Adjusting the Feed Amount.") →P.805
The Printhead is out of alignment.	Adjust the Printhead alignment. (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798
The Printhead nozzles are clogged.	Print a test pattern to check the nozzles and see if they are clogged. (See "Checking for Nozzle Clogging.") →P.838
Streaks may occur if you set the <b>Print Quali-</b> <b>ty</b> too low.	Choose a higher level of <b>Print Quality</b> in the <b>Advanced Settings</b> of the printer driver and try printing again. Printing in <b>Fast</b> or <b>Standard</b> mode is faster and consumes less ink than in <b>Highest quality</b> or <b>High</b> modes, but the printing quality is lower. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") →P.61
The type of paper specified in the printer driver does not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.
	1. Press the <b>Stop</b> button and stop printing.
	2. Change the type of paper in the printer driver and try printing again.

### Colors in printed images are uneven

Cause	Corrective Action
Line Drawing/Text is selected when printing images in many solid colors.	In <b>Print Priority</b> in the <b>Advanced Settings</b> of the printer driver, choose <b>Image</b> .
You are printing on paper that curls easily.	Printed colors may appear uneven on the leading edge of paper that is susceptible to curling. Select a stronger level in <b>VacuumStrngth</b> in the Control Panel menu to increase suction against the paper, or specify a leading margin of 20 mm (0.79 in) or more. (See "Adjusting the Vacuum Strength.") $\rightarrow$ P.811
Printed colors may be uneven if you set the <b>Print Quality</b> too low.	Choose a higher level of <b>Print Quality</b> in the <b>Advanced Settings</b> of the printer driver. Printing in <b>Fast</b> or <b>Standard</b> mode is faster and consumes less ink than in <b>Highest quality</b> or <b>High</b> modes, but the printing quality is lower. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") —P.61
Color may be uneven between dark and light image areas.	Select Unidirectional Printing in the Advanced Settings of the printer driver.
When borderless printing is used, the edge of the paper is cut during printing. Thus, ink density may be slightly uneven at the leading edges.	Specify <b>No</b> in <b>Auto Cut</b> in the printer driver before printing. In this case, the paper can be prin ted without borders on the left and right sides only. Cut the printed document ejected from the printer, and then use scissors or a cutting tool to cut away the edges on the top and bottom.
	Choose a higher level of <b>Print Quality</b> in the <b>Advanced Settings</b> of the printer driver. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") —P.61
The Printhead is out of alignment.	Adjust the Printhead alignment. (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798
Allowing printed documents to dry on top of each other may cause uneven colors.	To avoid uneven colors, we recommend drying each sheet separately.
Density may be uneven if you use Glossy Paper or <b>Canon Coated Paper</b> .	In Advanced Settings of the printer driver, choose Highest quality or High in Print Quality.
The type of paper specified in the printer driver does not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.

Cause	Corrective Action
The type of paper specified in the printer driv- er does not match the type loaded in the printer.	<ol> <li>Press the Stop button and stop printing.</li> <li>Change the type of paper in the printer driver and try printing again.</li> </ol>
Scan Wait Time > Area in the Control Panel menu is set to Leading edge.	When <b>Scan Wait Time &gt; Area</b> is set to <b>Leading edge</b> , colors may be uneven 110–160 mm from the leading edge. (The position varies depending on the <b>Print Quality</b> setting.) In this case, select <b>Scan Wait Time &gt; Area &gt; Entire area</b> . However, note that printing will now take longer. (See "Menu Settings.") →P.667

### Image edges are blurred or white banding occurs

Cause	Corrective Action
The Platen suction is too strong.	In the Control Panel menu, reduce the level of <b>VacuumStrngth</b> . (See "Adjusting the Vacuum Strength.") →P.811
	Close the blue Switch on the platen so that it matches the paper size. (See "Setting the Blue Switch on the Platen.") $\rightarrow$ P.893
Incorrect Printhead alignment value.	When printing fine lines or text at high precision on glossy or semi-glossy photo or proofing paper, set the optimal Printhead height before aligning the printhead. (See "Enhancing Printing Quality.")
	In the Control Panel menu, set <b>Head Height</b> to a lower height. (See "Troubleshooting Paper Abrasion and Blurry Images.") →P.803
The type of paper specified in the print- er driver does not match the type loa- ded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.")
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.
	1. Press the <b>Stop</b> button and stop printing.
	2. Change the type of paper in the printer driver and try printing again.

### Setting the Blue Switch on the Platen

If printed documents exhibit the following symptoms, adjust the setting of the blue Switch on the Platen.

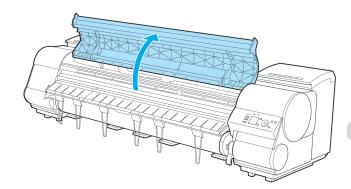

- Image edges are blurred
- Image edges are affected by white banding

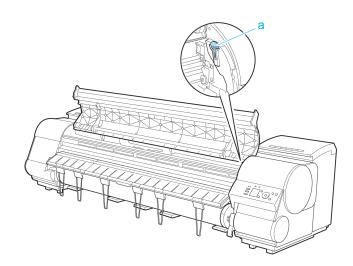

• Always set the blue Switch on the Platen to the • side for borderless printing. Printing quality may be affected if the Switch is incorrectly set.

1 Remov

- Remove any loaded paper that will not be used.
  - Rolls (See "Removing the Roll from the Printer.") →P.539
     Shoot (See "Bernoving Shoots ") D.569
  - Sheet (See "Removing Sheets.") →P.560
- Open the Top Cover.

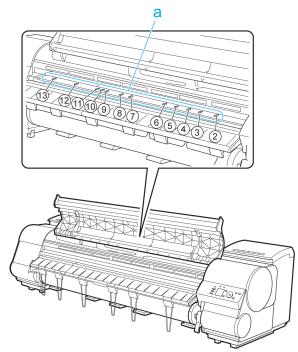

- **4** Using the back of the Cleaning Brush, move the first Switch to the side opposite •.

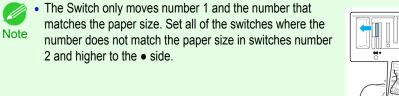

5 Refer to the following table to confirm the number on the Platen (a) that corresponds to the size of paper for printing.

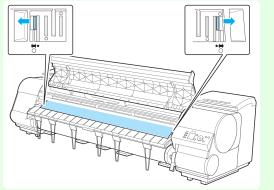

Number	Dimensions
2	254.0 mm (10.00 in)
3	355.6 mm (14.00 in)
4	431.8 mm (17.00 in)
5	515.0 mm (JIS B2 or B3)
6	594.0 mm (ISO A1 or A2) or 609.6 mm (24.00 in)
7	841.0 mm (ISO A0 or A1)
8	914.4 mm (36.00 in)
9	1030.0 mm (JIS B0 or B1)
10	1066.8 mm (42.00 in)
11	1117.6 mm (44.00 in)
12	1270.0 mm (50.00 in)
13	1524.0 mm (60.00 in)

**6** Using the back of the Cleaning Brush, move the Switch to the side opposite •, corresponding to the size of the paper for printing.

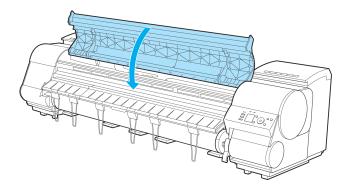

In this case, note that you will move the switch in the opposite direction from the direction in step 4.

Close the Top Cover.

7

Cause	Corrective Action
The paper feed amount is out of adjustment.	Adjust the feed amount. (See "Adjusting the Feed Amount.") →P.805
he type of paper specified in the printer driver oes not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.
	1. Press the <b>Stop</b> button and stop printing.
	2. Change the type of paper in the printer driver and try printing again.

### The length of printed images is inaccurate in the feeding direction

Cause	Corrective Action
In the Control Panel menu, <b>Adj. Priority</b> is set to <b>Print Quality</b> .	Set Adj. Priority to Print Length in the Control Panel menu, and then execute Adjust Length. (See "Adjusting the Feed Amount.") →P.805
The type of paper specified in the printer driver does not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.

Cause	Corrective Action
	1. Press the <b>Stop</b> button and stop printing.
does not match the type loaded in the printer.	2. Change the type of paper in the printer driver and try printing again.

Images are printed crooked		
Cause	Corrective Action	
In the Control Panel menu, Skew Check Lv. is set to Loose or Off	In the Control Panel menu, set <b>Skew Check Lv.</b> to <b>Standard</b> . (See "Menu Settings.") →P.667	
In the Control Panel menu, Width Detection is set to Off.	Set <b>Width Detection</b> to <b>On</b> in the Control Panel menu. (See "Menu Settings.") →P.667	
Roll paper is loaded askew.	If there is a gap between the roll paper and roll holder, reload the roll. (See "Attaching the Roll Holder to Rolls.") →P.530 (See "Loading Rolls in the Printer.") →P.533	

### Documents are printed in monochrome

Cause	Corrective Action
In the Advanced Settings of the printer driver, Mono- chrome or Monochrome (Photo), is specified in Col- or Mode.	In the <b>Advanced Settings</b> of the printer driver, specify <b>Color</b> in <b>Color Mode</b> and try printing again.
The Printhead nozzles are clogged.	Print a test pattern to check the color ink nozzles and see if they are clogged. Checking for Nozzle Clogging $\rightarrow$ P.838

### Line thickness is not uniform

Cause	Corrective Action
In the <b>Special Settings</b> dialog box of the Windows printer driver, <b>Fast Graphic Process</b> is selected.	Access the printer driver <b>Properties</b> dialog box from <b>Print</b> in the <b>File</b> menu of the source applica- tion, and follow these steps to print.
Flocess is selected.	1. Clear the option Open Preview When Print Job Starts on the Main sheet.
	2. Clear the option Page Layout on the Layout sheet.
	3. Click the Special Settings button on the Layout sheet to display the Special Settings dialog box, and then clear the option Fast Graphic Process.
The blue Switch on the platen is set in- correctly.	Move the Switch numbered corresponding to the size of paper for printing opposite to the ● position. (See "Setting the Blue Switch on the Platen.") →P.893
The type of paper specified in the printer driver does not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer. <b>1.</b> Press the <b>Stop</b> button and stop printing.
	<ol> <li>Change the type of paper in the printer driver and try printing again.</li> </ol>
Incorrect Printhead alignment value.	When printing fine lines or text at high precision on glossy or semi-glossy photo or proofing paper, set the optimal Printhead height before aligning the printhead. (See "Enhancing Printing Quality.") →P.796
	In the Control Panel menu, use a lower <b>Head Height</b> setting. (See "Troubleshooting Paper Abrasion and Blurry Images.") —P.803
Depending on the type of paper, the thickness of printed lines may be noticeably inconsistent.	Specify <b>Proof</b> in <b>Print Priority</b> in the printer driver. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") →P.61

### Lines or colors are misaligned

Cause	Corrective Action
The Printhead is not being aligned correct- ly.	Adjust the Printhead alignment. (See "Automatic Adjustment to Straighten Lines and Colors.") →P.798 (See "Manual Adjustment to Straighten Lines and Colors.") →P.800
	When printing fine lines or text at high precision on glossy or semi-glossy photo or proofing paper, set the optimal Printhead height before aligning the printhead. (See "Enhancing Printing Quality.") →P.796
	In the Control Panel menu, use a lower <b>Head Height</b> setting. (See "Troubleshooting Paper Abrasion and Blurry Images.") →P.803
The type of paper specified in the printer driver does not match the type loaded in the printer.	Load paper of the same type as you have specified in the printer driver. (See "Loading Rolls in the Printer.")
	Make sure the same type of paper is specified in the printer driver as you have loaded in the printer.
	1. Press the <b>Stop</b> button and stop printing.
	2. Change the type of paper in the printer driver and try printing again.
Depending on the type of paper, printed lines may be noticeably misaligned.	Specify <b>Proof</b> in <b>Print Priority</b> in the printer driver. (See "Giving Priority to Particular Graphic Elements and Colors for Printing.") →P.61

### Borders appear in borderless printing

Cause	Corrective Action
If borderless printing was performed at the actual size, paper wider than the page size was selected.	When performing borderless printing at the actual size, use roll paper with the same width as the width of the page size. (See "Borderless Printing at Actual Size.")
The printing image data has margins.	Check that the printing image data does not have any objects like crop marks and transparent objects.
Margins are configured in the application software you are using.	Check that no margins are configured in the application software you are using.
"BordlessOversize" is set to "Little" in the Control Panel menu.	Set <b>"BordlessOversize</b> " to <b>Standard</b> in the Control Panel menu. (See "Menu Settings.") →P.667

### Cannot print over a network

Cannot connect the printer to the network	899
Cannot print over a TCP/IP network Cannot print over a NetWare network Cannot print over AppleTalk or Bonjour networks	899

### Cannot connect the printer to the network

Cause	Corrective Action		
The Ethernet cable is not connected cor- rectly to the printer's Ethernet port.	<ol> <li>Make sure the printer is connected to the network with the correct Ethernet cable, and then turn the printer on. For instructions on connecting the cable, refer to the Setup Guide.</li> <li>Make sure the Link indicator is lit. The top and bottom indicators are lit if the printer is connected via 1000Base-T. The bottom indicator is green if the printer is connected via 100BASE-TX, and the top indicator is orange if connected via 10BASE-T. If the Link indicator is not lit, check the following points.</li> <li>Make sure the hub is on.</li> <li>Make sure the end of the Ethernet cable is connected correctly. Insert the Ethernet cable until it clicks and locks in place.</li> <li>Make sure there is no problem with the Ethernet cable. If there is any problem, replace the Ethernet cable.</li> <li>Check the communication mode with the hub. Although the printer normally detects the hub communication mode and transmission rate automatically (in auto negotiation mode), sometimes the hub settings cannot be detected. In this case, configure the connection method manually, specifying the communication mode in use.</li> </ol>		
	(See "Configuring the Communication Mode Manually.") →P.727		

### Cannot print over a TCP/IP network

Cause	Corrective Action
The printer's IP address is not configured correctly.	Make sure the printer's IP address is configured correctly. (See "Configuring the IP Address Using imagePROGRAF Device Setup Utility.") →P.730 (See "Configuring the IP Address Using the Printer Control Panel.") →P.705
The printer's TCP/IP network settings are not config- ured correctly.	Make sure the printer's TCP/IP network settings are configured correctly. (See "Configuring the Printer's TCP/IP Network Settings With RemoteUI.") →P.709
The computer you are trying to print from is not con- figured correctly.	Make sure the computer's TCP/IP network settings are configured correctly. (See "Configuring the Printer Driver Destination (Windows).") →P.708 (See "Configuring the Destination in TCP/IP Networks (Mac OS X).") →P.720

### Cannot print over a NetWare network

Cause	Corrective Action
The printer's NetWare settings are not configured correctly.	Make sure the printer's NetWare settings are configured correctly. In particular, make sure a valid frame type is selected. For details, see "Configuring the Printer's NetWare Network Settings With RemoteUI." —P.717
The computer you are trying to print from is not configured correct-ly.	Make sure the computer's NetWare settings are configured correctly. For details, see "Configuring NetWare Network Settings." →P.712
The NetWare server and services are not configured correctly.	Check the following points.  1. Make sure the NetWare file server is running.

899

User's Guide

Cause	Corrective Action
The NetWare server and services are not configured correctly.	<ol> <li>Make sure there is enough free disk space on the NetWare file server. Insufficient disk space may prevent you from processing large print jobs.</li> </ol>
	<b>3.</b> Start NWADMIN or PCONSOLE and confirm that the print service is configured correctly and the print queue is available.
	4. If data transmission to a printer on another subnet fails, deactivate NCP burst mode in that printer's network protocol settings.
	5. If the printer is used in queue server mode, specify Other/Unknown as the printer type.
The printer was turned off and on when not disconnected from the server.	Leave the printer off for at least 30 seconds, and then restore power.

### Cannot print over AppleTalk or Bonjour networks

Cause	Corrective Action
The AppleTalk protocol is not ena- bled on the printer.	Activate AppleTalk on the printer. (See "Configuring the Printer's AppleTalk Network Settings.") →P.724
The computer you are trying to print from is not configured correctly.	Make sure the computer's AppleTalk settings are configured correctly. (See "Configuring the Destination for AppleTalk Networks (Mac OS X).") $\rightarrow$ P.723 (See "Configuring the Destination for Bonjour Network (Mac OS X).") $\rightarrow$ P.721
The computer and printer are not on the same network.	Due to the nature of Bonjour, you cannot print if the printer is on another network behind a router. Make sure the computer and printer are on the same network. For information about network settings, ask your network administrator.

## The printer does not go on

Cause	Corrective Action
The printer is unplugged.	Plug the power cord into the outlet, and then turn on the printer.
The specified voltage is not supplied.	Check the voltage of the outlet and breaker. (See "Specifications.") →P.934

## The printer takes time to start up

Cause	Corrective Action
The printer may have shut down incorrectly last time. This may happen af-	Please wait a while, because it may take several minutes to fin-
ter power outages or if the printer is unplugged before it is turned off.	ish checking the hard disk.
In this case, the next time power is restored, the printer's hard disk is	If an error message is displayed after the hard disk check, follow
checked, and startup may take some time.	the instructions indicated to resolve the problem.

## If the Printer Makes a Strange Sound

Cause	Corrective Action
The printer	The following sounds do not indicate a problem with the printer.
makes a sound during opera- tion.	<ul> <li>There is a sound of suction from the Platen.</li> <li>To prevent paper from rising, paper is held against the Platen by suction from Vacuum holes under it.</li> </ul>
	<ul> <li>Roll paper makes a fluttering sound during printing. There may be a fluttering sound when large paper is advanced.</li> </ul>
	<ul> <li>You suddenly hear the sound of cleaning operations. At regular intervals, for printer maintenance, cleaning operations will begin automatically, even if the printer is in Sleep mode.</li> </ul>
	<ul> <li>You suddenly hear the sound of ink agitation. At regular intervals, to ensure optimal printing quality, the ink is agitated automatically, even if the printer is in Sleep mode. Ink agitation takes about a minute and a half. The ink is also agitated automatically under the following conditions. Note that other operations are not possible while Agitating is displayed on the control panel.</li> </ul>
	<ul> <li>After the printer is turned on</li> <li>After data transmission</li> </ul>
	After ink tank replacement
	In other cases, contact your Canon dealer.

## Messages advising to check the maintenance cartridge are not cleared

Cause	Corrective Action	903
The printer has not detected the new Maintenance Car- tridge that was used to replace the old one.	Remove the new Maintenance Cartridge you have just installed and insert it again firmly. (See "Replacing the Maintenance Cartridge.") →P.852	

### The printer consumes a lot of ink

Cause	Corrective Action
Many full-page color images are printed.	In print jobs such as photos, images are filled with color. This consumes a lot of ink. This does not indi- cate a problem with the printer.
Head Cleaning B in the Control Panel menu is executed frequently.	<b>Head Cleaning B</b> in the Control Panel menu consumes a lot of ink. This does not indicate a problem with the printer. Unless the printer has been moved or stored for a long period or you are troubleshooting Printhead problems, we recommend not performing <b>Head Cleaning B</b> , to the extent possible.
You have just finished initial installa- tion, when more ink is consumed to fill the system.	After initial installation or at the first-time use after transfer, ink flows into the system between the lnk Tank and Printhead, which may cause the ink level indicators to drop to 80%. This does not indicate a problem with the printer.
The Printhead nozzles are clogged.	Check for nozzle clogging. (See "Checking for Nozzle Clogging.") →P.838

#### **Ink Level Detection**

Ink level detection will be deactivated if you load ink tanks once emptied.

#### Ink level detection

Ink tanks specified for this printer feature an ink level detection function to prevent the ink from running out during printing, which prevents printer damage. (See "Ink Tanks.") →P.826

This function will not work correctly if you use refill ink tanks. As a result, printing stops. Thus, before using refill ink tanks, you must cancel the ink level detection.

Printing with the ink level detection canceled may lead to printer damage and printing problems. Canon Inc. is not liable for any damage that may occur as a result of refilling ink.

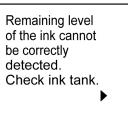

After ink level detection has been released, this function cannot be reactivated for currently loaded lnk Tank. To use ink level
detection again, replace the lnk Tank with new ones specified for use with the printer.

Repeatedly removing and inserting an Ink Tank may damage the connection between the Ink Tank and the printer, which
may cause ink leakage from the Ink Tank and damage the printer.

#### Releasing ink level detection

1 On the Display Screen, a message indicates that the ink level cannot be detected. After checking the message, press the ▶ button.

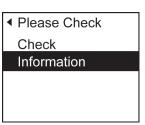

ſ

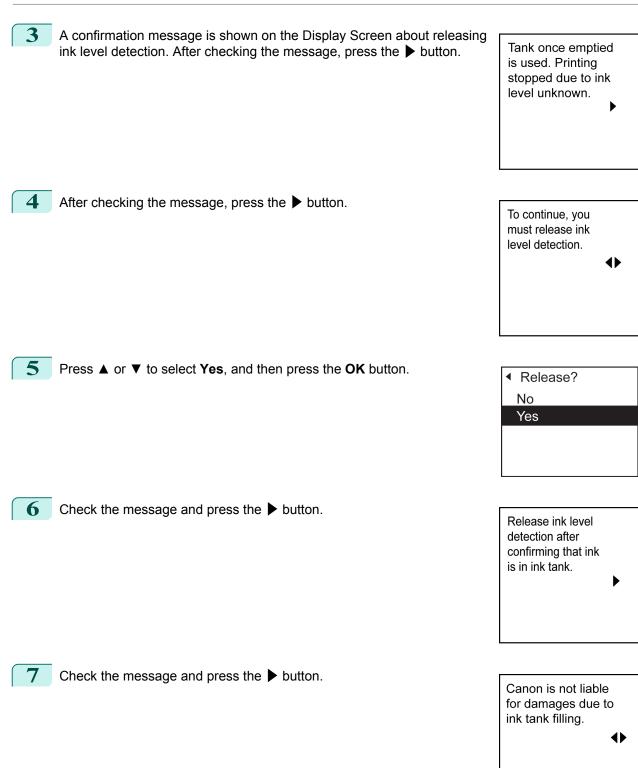

2

Troubleshooting

Other problems

Press  $\blacktriangle$  or  $\blacktriangledown$  to select **Information**, and then press the **OK** button.

8	Press ▲ or ▼ to select <b>Yes</b> , and then press the <b>OK</b> button.	<ul> <li>Agree?</li> <li>No</li> <li>Yes</li> </ul>
9	A confirmation message about updating ink information is shown on the Display Screen. After checking the message, press the ▶ button.	Release ink level detection. Perform after use of ink tank was registered?

**10** Press  $\blacktriangle$  or  $\checkmark$  to select **Yes**, and then press the **OK** button.

Ink level detection is now released.

 Agree? No Yes iPF9400

## Paper mismatch

Cause	Corrective Action
You tried to print a test pattern for printer adjustment on several sheets, but sheets of different types or sizes of paper were used.	When printing a test pattern for adjustment, use sheets of the same size and type of paper, in the required quantity. Press ▲ or ▼ to select <b>Change Paper</b> , press the <b>OK</b> button, and replace the paper. (See "Loading and Printing on Sheets.") →P.25 The printer now starts printing the test pattern.
	Press ▲ or ▼ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.

## MediaType Mismatch

Cause	Corrective Action
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Pause</b> , the type of paper loaded does not	Follow these steps to ensure the paper type matches on the printer and in the printer driver.
match the type specified in the printer driver.	<b>1.</b> Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.
	2. Change the paper type setting in the printer driver to the type loaded in the printer and try printing again.
	Follow these steps to ensure the paper type matches on the printer and in the printer driver.

Cause	Corrective Action	
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Pause</b> , the type of paper loaded does not match the type specified in the printer driver.	<ol> <li>Press ▲ or ▼ to select Change Paper, and then press the OK button.</li> <li>Replace the loaded paper with paper of the type and size you have specified in the printer driver.         (See "Loading and Printing on Rolls.") →P.22         (See "Loading and Printing on Sheets.") →P.25</li> </ol>	
	Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing. However, note that this error may cause paper jams and affect the printing quality.	
You tried to print a test pattern for printer adjustment on several sheets, but sheets of different types of paper were used.	<ul> <li>required quantity. Replace the paper as follows and perform adjustment again.</li> <li>1. Lift the Release Lever and stop printing.</li> <li>2. Replace the paper. (See "Loading and Printing on Sheets.") →P.25</li> </ul>	
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Warning</b> , the type of paper loaded does not match the type specified in the printer driver.	<ol> <li>Execute adjustment again from the control panel menu.</li> <li>You can continue to print, but note that this error may cause problems in the printing results.</li> </ol>	

		• •	
Ine	paper	is too	small.

Cause	Corrective Action
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Pause</b> or <b>Hold Job</b> , paper smaller than the size	Press $\blacktriangle$ or $\lor$ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing. However, note that this error may cause paper jams and affect the printing quality.
specified in the printer driver is loaded.	Adjust the paper size setting in the printer driver to match the size loaded in the printer as follows.
	1. Press ▲ or ▼ to select Stop Printing, and then press the OK button.
	2. Change the paper size setting in the printer driver to the size loaded in the printer and try printing again.
	Replace the loaded paper with paper of a size that matches the size setting in the printer driver as follows.
	1. Press ▲ or ▼ to select Change Paper, and then press the OK button to stop print- ing.
	<ul> <li>2. Replace the loaded paper to match the settings in the printer driver and try printing again.</li> <li>(See "Loading and Printing on Rolls.") →P.22</li> <li>(See "Loading and Printing on Sheets.") →P.25</li> </ul>
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Warning</b> , paper smaller than the size specified in the printer driver is loaded.	You can continue to print, but note that this error may cause problems in the printing results.

## The paper is too small.

## "Replace paper with A4/LTR (vertical) or larger"

Cause	Corrective Action
The loaded paper is too small.	Replace the paper with paper of A4/Letter (vertical) size or larger as follows.
(When you have attempted to print a test print sheet or other printer status information.)	<ol> <li>Press ▲ or ▼ to select Change Paper, press the OK button, and remove the paper. (See "Removing Sheets.") →P.560</li> </ol>
	<ol> <li>Switch to paper A4/Letter (vertical) or larger. (See "Loading and Printing on Sheets.") →P.25</li> </ol>

Cause	Corrective Action
The loaded paper is too small.	The printer will resume printing.
(When you have attempted to print a test print sheet or other printer status information.)	Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.

## "Replace roll with 10 in. wide or larger roll."

Cause	Corrective Action
The loaded paper is too small. (When you have attempted to print a test print sheet or other print- er status information.)	<ul> <li>Replace the roll with a roll 10 inches in width or larger as follows.</li> <li>1. Press ▲ or ▼ to select Change Paper, and then press the OK button. (See "Removing the Roll from the Printer.") →P.539</li> </ul>
	<ul> <li>(See "Removing the Roll Holder from Rolls.") →P.539</li> <li>(See "Removing the Roll Holder from Rolls.") →P.542</li> <li>2. Replace the roll with a roll 10 inches wide or larger.</li> </ul>
	(See "Attaching the Roll Holder to Rolls.") $\rightarrow$ P.530 (See "Loading Rolls in the Printer.") $\rightarrow$ P.533
	The printer will resume printing. Press ▲ or ▼ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.

PaprWidth Mismatch		
Cause	Corrective Action	
When <b>Detect Mismatch</b> in the Control Panel menu is set to <b>Pause</b> or <b>Hold Job</b> , the width of the loaded roll does not match the width specified in <b>Fit Roll Paper Width</b> in the print- er driver.	Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing. However, note that this error may cause paper jams and affect the printing quality.	
	Press $\blacktriangle$ or $\blacksquare$ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.	
	Follow these steps to replace the roll to match the width specified in the printer driver.	
	<ol> <li>Press ▲ or ▼ to select Change Paper, and then press the OK button. (See "Removing the Roll from the Printer.") →P.539 (See "Removing the Roll Holder from Rolls.") →P.542</li> </ol>	
	<ol> <li>Replace with paper of the width configured in the printer driver. (See "Attaching the Roll Holder to Rolls.") →P.530 (See "Loading Rolls in the Printer.") →P.533 The printer now starts printing the print job.</li> </ol>	
	Make sure the roll width selected in the dialog box displayed when you select <b>Fit Roll Paper Width</b> in the printer driver matches the width of the roll loaded in the printer, and then try printing again.	

## Paper size not detected.

Cause	Corrective Action
Paper has been loaded askew, or warped paper has been loaded.	Lift up the Release Lever and reload the paper. (See "Loading Rolls in the Printer.") →P.533 (See "Loading Sheets in the Printer.") →P.555
	If "Not finished printing. Finish printing re- maining jobs?" is displayed on the Display Screen, press the <b>OK</b> button. Printing will resume, starting from the page on which the error occurred.

Cause	Corrective Action
	If this error recurs after you reload the roll, re- move the Roll Holder from the printer, push the roll firmly in until it touches the Roll Holder flange, and reload the Roll Holder in the print- er. (See "Attaching the Roll Holder to Rolls.") →P.530
Because the Platen is soiled with ink or other substances, the size of the clear film cannot be detected.	t Open the Top Cover and clean the entire Plat- en. (See "Cleaning Inside the Top Cover.") →P.861

## Insufficient paper for job

Cause	Corrective Action
The printer has received a print job longer than the amount of roll paper left when ManageR- emainRoll in the Control Panel menu is On.	Press ▲ or ▼ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing. When using the Media Take-up Unit, press ▲ or ▼ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing. However, the roll paper may run out during the print job and you may not be able to print all of the document.
	Press ▲ or ▼ to select Change Paper, and then press the OK button. Change the Paper Source of the printer driver, or replace the roll with a roll that has enough paper for the print job, and then printt. When using the Media Take-up Unit, press ▲ or ▼ to select Stop Printing, and then press the OK button to stop printing. Remove the printed document from the Media Take-up Unit, replace the roll with a roll that has enough paper for the print job, and then try printing again. (See "Removing the Roll from the Printer.") →P.539 (See "Loading Rolls in the Printer.") →P.533 (See "Removing Printed Documents from the Media Take-up Unit.") →P.579
	Press ▲ or ▼ to select <b>Stop Printing</b> or press the <b>Stop</b> button to stop printing.

## This paper cannot be used as size is not supported.

Cause	Corrective Action	913
Paper that is too large for the printer has been loaded.	Lift the Release Lever and load paper of the correct size. (See "Paper Sizes.") →P.522	

Cause	Corrective Action
Paper that is too small for the printer has been loaded.	Lift the Release Lever and load paper of the correct size. (See "Paper Sizes.") $\rightarrow$ P.522
Paper has been loaded that is too small to print the test pattern for printhead adjustment or nozzle checking.	Lift the Release Lever and load unused paper A4/Letter (vertical) or larger. More than one sheet may be required depending on the adjustment.

# Roll printing is selected.

·		
	Cause	Corrective Action
You hav roll is loa	re attempted to print on a roll, but no aded.	Press ▲ or ▼ to select Load Roll Paper, and then press the OK button. Load the roll, and then print. (See "Attaching the Roll Holder to Rolls.") →P.530 (See "Loading Rolls in the Printer.") →P.533
		Press ▲ or ▼ and select <b>Stop Printing</b> or press the <b>Stop</b> button to stop printing.

## Roll printing is selected, but sheets are loaded.

Cause	Corrective Action
A print job for rolls was received when a sheet is loaded.	Follow these steps to load and print on a roll.
	<ol> <li>Press ▲ or ▼ to select Eject Paper, press the OK button, and remove the sheet. (See "Removing Sheets.") →P.560</li> </ol>
	<ol> <li>Load a new roll.</li> <li>(See "Loading Rolls in the Printer.") →P.533</li> <li>The printer now starts printing the print job.</li> </ol>
	Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Stop Printing</b> , and then press the <b>OK</b> button.

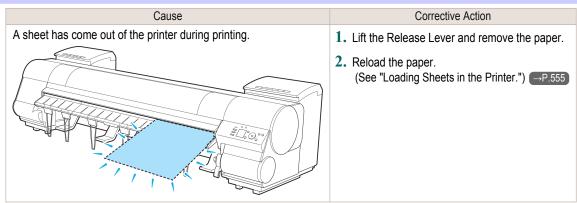

# The roll is empty.

Cause	Corrective Action
The roll is empty.	Follow these steps to replace the used roll with a new roll of the same type and size.
	<ol> <li>Lift the Release Lever and remove the roll. (See "Removing the Roll from the Printer.") →P.539 (See "Removing the Roll Holder from Rolls.") →P.542</li> </ol>
	2. Load the new roll. (See "Attaching the Roll Holder to Rolls.") →P.530 (See "Loading Rolls in the Printer.") →P.533
	<ol> <li>If no barcode was printed on the roll, specify the type of paper. (See "Changing the Type of Paper.") →P.537</li> </ol>
	<ul> <li>When you have selected ManageRemainRoll &gt; On in the control panel menu and a barcode is no printed on the roll, also specify the paper length.</li> <li>(See "Specifying the Paper Length.") →P.539</li> </ul>
	<ol> <li>If "Not finished printing. Finish printing remaining jobs?" is shown on the Display Screen, prest the OK button.</li> <li>Printing will resume, starting from the page on which the error occurred.</li> </ol>
<ul> <li>There is remaining roll paper, but because it could not be advanced, it could not be detected.</li> <li>If the trailing edge of the paper is taped to the roll paper core</li> </ul>	The paper was not advanced because the trailing edge is taped to the roll paper core. Remove the used roll paper and insert a new roll paper. (See "Removing the Roll from the Printer.") →P.539 (See "Removing the Roll Holder from Rolls.") →P.542 (See "Loading and Printing on Rolls.") →P.22
There is remaining roll paper, but be- cause it could not be advanced, it could not be detected.	The paper was not advanced because the unused portion of the roll paper is heavy and is placing a burden on the printer. It may be helpful to change the printing mode, which will change the paper feed timing.

#### Cause

• If the unused portion of the roll paper is heavy and is placing a burden on the printer

#### No sheets.

## Sheet printing is selected.

Cause	Corrective Action
You have attempted to print on a sheet, but no sheet is loaded.	Press ▲ or ▼ to select <b>Load Paper</b> , and then press the <b>OK</b> button. Load a sheet, and then print. (See "Loading and Printing on Sheets.") →P.25
	Press $\blacktriangle$ or $\blacktriangledown$ and select <b>Stop Printing</b> or press the <b>Stop</b> button to stop printing.

**Corrective Action** 

Choose a higher level of Print Quality in the Advanced Settings of the printer driver.

(See "Giving Priority to Particular Graphic Elements and Colors for Printing.") —P.61

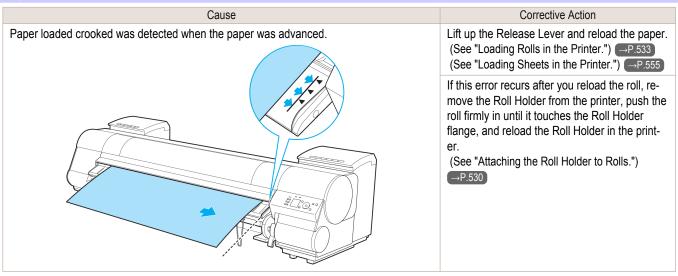

## Regular printing is selected, but a roll is loaded.

Cause	Corrective Action
A print job for printing on sheets was sent when a roll is loaded.	<ol> <li>Press ▲ or ▼ to select Remove Roll Paper, and then press the OK button to stop printing.</li> <li>After removing the roll, load and print on a sheet of the type and size of paper you have specified in the printer driver.         (See "Removing the Roll from the Printer.") →P.539         (See "Loading and Printing on Sheets.") →P.25</li> </ol>
	Press ▲ or ▼ to select Stop Printing, and then press the OK button to stop printing.
You are using a roll with the Media Take-up Unit, but a print job requir- ing sheets was sent.	<ol> <li>Press the OK button to stop printing.</li> <li>After removing the roll, load and print on a sheet of the type and size of paper you have specified in the printer driver.         (See "Removing Printed Documents from the Media Take-up Unit.") -P.579         (See "Loading and Printing on Sheets.") -P.25     </li> </ol>

#### Paper jam.

1			
	Cause	Corrective Action	
	A paper jam occurred in the printer during printing.	<ol> <li>Lift the Release Lever and remove the jammed paper. (See "Clearing Jammed Roll Paper.") →P.878 (See "Clearing a Jammed Sheet.") →P.881</li> </ol>	
		<ul> <li>Load the paper.</li> <li>(See "Loading Rolls in the Printer.") →P.533</li> <li>(See "Loading Sheets in the Printer.") →P.555</li> </ul>	
		3. If "Not finished printing. Finish printing remaining jobs?" is shown on the Display Screen, press the OK button. Printing will resume, starting from the page on which the error occurred.	

## Paper loaded askew.

• To disable this message (if it is displayed repeatedly despite reloading paper, for example), choose Off or Loose in the Skew Check Lv. setting of the printer menu. However, this may cause jams and printing problems because paper may be Important askew when printed. Also, the Platen may become soiled, which may soil the back of the next document when it is printed.

### **Cannot detect papr**

n<sup>in</sup>

Cause	Corrective Action
The printer could not detect the paper.	Reload the paper as follows.
	1. Remove the paper and press the $\mathbf{OK}$ button.
	<ol> <li>Reload the paper.</li> <li>(See "Loading Sheets in the Printer.") →P.555</li> <li>(See "Loading Rolls in the Printer.") →P.533</li> </ol>

#### Cannot feed paper.

Cause	Corrective Action
Paper could not be ad- vanced correctly dur- ing feeding.	<ol> <li>Lift the Release Lever and remove the jammed paper. (See "Clearing Jammed Roll Paper.") →P.878 (See "Clearing a Jammed Sheet.") →P.881</li> </ol>
	2. Load paper.
	3. Lower the Release Lever.
	4. If "Not finished printing. Finish printing remaining jobs?" is shown on the Display Screen, press the OK button. Printing will resume, starting from the page on which the error occurred.
	(See "Loading Rolls in the Printer.") $\rightarrow$ P.533 (See "Loading Sheets in the Printer.") $\rightarrow$ P.555

#### Cannot cut this paper.

Cause	Corrective Action
There are sheets left on the Ejec- tion Guide.	<ol> <li>Lift the Release Lever and remove the paper.</li> <li>Load paper.</li> <li>Lower the Release Lever.</li> </ol>

Cause	Corrective Action	
There are sheets left on the Ejec- tion Guide.	<ul> <li>4. If "Not finished printing. Finish printing remaining jobs?" is shown on the Display Screen, press the OK button.</li> <li>Printing will resume, starting from the page on which the error occurred.</li> <li>(See "Loading Rolls in the Printer.") →P.533</li> </ul>	
There is a foreign object by the	1. Lift the Top Cover and remove the foreign object.	
Output Tray, obstructing the Cut- ter Unit.	<ol> <li>If "Not finished printing. Finish printing remaining jobs?" is shown on the Display Screen, press the OK button.</li> <li>Printing will resume, starting from the page on which the error occurred.</li> </ol>	
You are not using the printer un- der the recommended environ- mental conditions for the paper.	Use the printer only where the recommended environmental conditions for the paper are met. Note that various environmental conditions are recommended for various types of paper. For details on the recommended environmental conditions, see the Paper Reference Guide. (See Paper Reference Guide.)	
You are using paper that is not compatible with automatic cut- ting.	<ol> <li>Specify Manual as the cutting method and use scissors or a cutting tool to cut the roll. (See "Specifying the Cutting Method for Rolls.") →P.546 For information about paper that is compatible with automatic cutting, see the Paper Reference Guide. (See Paper Reference Guide.)</li> <li>Lift the Release Lever and remove the paper.</li> </ol>	
In other cases, the Cutter Unit may be damaged.	Contact your Canon dealer for assistance.	

## End of paper feed.

Cause	Corrective Action
Although an attempt was made to advance the paper manually, it reached the limit position that can be advanced.	Canceling manual advancing. (See "Feeding Roll Paper Manually.") →P.543
Paper can be retracted only up to 17 mm (0.7 in) when using the Media Take-up Unit.	Canceling manual advancing.

### Rel lever is in wrong position.

Cause	Corrective Action	
The Release Lever is up.	Lower the Release Lever.	
If the error occurs again, turn off the printer and wait a while before restoring power.		

## **Rewinding error.**

<b>.</b>	
Cause	Corrective Action
There is some foreign object near the Media Take-up Unit sensor and the roll cannot be detected.	Remove the foreign object near the sensor.
The Media Take-up Unit sensor is soiled and the roll cannot be detec- ted.	Wipe the sensor with a dry cloth to clean it.
The roll is out of range of detection by the Media Take-up Unit sensor.	Reload the roll. Press the <b>OK</b> button to clear the error. (See "Loading Rolls in the Printer.") →P.533 (See "Loading the Rewind Spool on the Media Take-up Unit.") →P.572
A paper jam has occurred and the roll cannot be rewound.	Remove the paper from the Media Take-up Unit. Press the <b>OK</b> button to clear the error.
The Media Take-up Unit sensor is damaged.	Contact your Canon dealer for assistance.

\*1: Printing will stop momentarily if an error involving the Media Take-up Unit occurs. If you prefer printing not to stop, set **Skip Take-Up Err** to **On**. However, note that this error may cause paper jams and affect the printing quality.

Ν	Media take-up unit ready.			
	Cause	Corrective Action		
	The <b>Take-up Reel</b> setting in the printer <b>Set./Adj. Menu</b> was changed from <b>Enable</b> to <b>Disable</b> , but a print job was received before the roll was removed.	Press ▲ or ▼ to select <b>Stop Printing</b> , and then press the <b>OK</b> button to stop printing. The mode switches from take-up mode to regular mode after you change the <b>Take-up Reel</b> setting in the <b>Set./Adj. Menu</b> from <b>Enable</b> to <b>Disable</b> and lift the Release Lever to remove a roll, or after you execute <b>Paper Cutting</b> .		
		Press $\blacktriangle$ or $\blacktriangledown$ to select <b>Print</b> , and then press the <b>OK</b> button to resume printing.		

Turn on the media take-up unit.

### GARO Wxxxx (x represents a number)

Cause	Corrective Action	
There is a problem with the print job.	Try printing again, using the correct printer driver.	
	It is also possible to continue printing in this state. However, you may not be able to obtain the desired printing results.	

## ERROR Exxx-xxxx (x represents a letter or number)

Cause	Corrective Action
An error requiring service may have occurred.	Write down the error code and message, turn off the printer, and contact your Canon dealer for assistance.
Call for service.	
OK: Printer Info.	

#### Hardware error. xxxxxxxxxxxx (x represents a letter or number)

Cause	Corrective Action
The last portion of roll paper was used during a print job. The paper was not advanced because the trailing edge is taped to the roll.	Turn off the printer and remove the roll from the printer before re- storing power.
Fastening tape or the Belt Stopper has not been removed inside the Top Cover.	Turn off the printer, open the Top Cover and remove the tape or the Belt Stopper before restoring power.
An error requiring service may have occurred.  Hardware error. xxxxxxxxxxxxxx Turn off printer, wait, then turn on again. OK: Printer Info.	Turn off the printer and wait at least three seconds before restoring the power. If the message is displayed again, write down the error code and message, turn off the printer, and contact your Canon dealer for as- sistance.

Top cover is open.	
Cause	Corrective Action
The printer has detected that the Top Cover is open.	Open the Top Cover fully, remove any foreign objects, and close the Top Cover again.
	If the error occurs again, turn off the printer and wait a while before restoring power.

## Prepare for parts replacement.

Cause	Corrective Action	
It is almost time to replace consumables for which service is required.	If <b>"Parts replacement time has passed."</b> is displayed, you can continue to use the printer for some time. Contact your Canon dealer for assistance.	

Parts replacement time has passed.	
Cause	Corrective Action
It is past the recommended time to replace consumables for which service is required.	Contact your Canon dealer for assistance.

## Unknown file.

Cause	Corrective Action
Data sent to keep the printer up to date (such as paper information) is in the wrong format.	Check the data. Turn off the printer and wait a while before restoring power, and then resend the data.
You have uploaded firmware for a different model.	Check the firmware version. Turn off the printer and wait a while before restoring power, and then resend the firmware.
	If the message is displayed again, contact your Canon dealer for assistance.

## Calibration There is a problem with the multi-sensor.

Cause	Corrective Action	
The performance of a sensor inside the printer may be impaired.	Press the <b>OK</b> button and cancel calibration. Contact your Canon dealer for assistance.	

### Multi-sensor error

Cause	Corrective Action
Direct sunlight or strong lighting may be shining on the printer and causing the sensor to malfunction.	Take steps to ensure the printer is not used when exposed to direct sunlight or strong lighting.
The performance of a sensor inside the printer may be impaired.	Turn off the printer and wait at least three seconds before restoring the power. If the message is displayed again, contact your Canon dealer for assistance.

# **Printer Specifications**

Specifications	. 934
Print Area	. 935

### **Specifications**

The following values may vary depending on the operating environment.

#### Printer

Power supply		100–240 V AC (50/60 Hz)		
Power consumption	During operation	190 W max.		
		100–120 V: 5 W max.		
		220-240 V: 6 W max.		
	Off	0.5 W max. (*1)		
Operating noise (*2)	Sound pressure level	During operation	Approx. 52 dB (A)	
		Standby	35 dB (A) max.	
	Audio power level (during operation	ration) Approx. 6.8 bels		
Operating environment	Temperature	15–30°C (59–86°F)		
	Humidity	10–80%, non-condensing		
Dimensions (W $\times$ D $\times$ H)	Printer and Stand (including Roll Holder and Media Take-up Unit)	2,299 × 766 × 1,144 mm (90.5 × 30.2 × 45.0 in)		
Weight	Printer and Stand (including Roll Holder and Media Take-up Unit) (not including Printhead and Ink Tank)	Approx. 164 kg (361.6 lb)		
Space for installation (W × D × H)	Printer and Stand	2,699 × 1,466 × 1,500 mm (106.3 × 57.7 × 59.1 in)		
Applicable standards	International Energy Star Program (worldwide), Law on Promoting Green Purchasing (Japan), GPN, RoHS directive, IT Eco Declaration (Europe), WEEE, U.S. presidential directives, J-MOSS (Green Mark), Chinese RoHS, ErP Lot6 (Europe)			

\*1: The printer uses a trace amount of power even when turned off. To stop all power consumption, turn off the printer and unplug the power cord.

\*2: Calculation based on ISO 7779. Operating conditions: On the Main sheet of the printer driver, Media Type > Canon Glossy Photo Paper HG 170, Advanced Settings > Print Priority > Image, and Print Quality > Standard.

#### Printing performance

Print method	Bubblejet
Maximum resolution	2400 dpi horizontally (*1) × 1200 dpi vertically
Printhead	PF-05 ×2
Number of nozzles	2,560 per color

\*1: Prints with a minimum 1/2400 inch dot pitch between ink droplets.

Specifications

#### Memory and hard disk

Memory	640 MB		
Hard disk capacity	sity 250 GB		
	Personal mail boxes (Permanent storage area)	140 GB	
Print job storage capacity	Common Box	100 jobs	
	Personal Boxes	100 jobs	

#### Interface

Hi-Speed USB	Format	Internal port
	Mode	Full-speed (12 Mbps), high-speed (480 Mbps), bulk transfer
	Connector	Series B (4-pin)
Gigabit Ethernet	Format	Internal port
	Specification	IEEE 802.3 10Base-T, IEEE 802.3u 100Base-TX/Auto-Negotiation, IEEE 802.3ab 1000Base-T/Auto-Negotiation, IEEE 802.3x Full Duplex
	Protocols	IPX/SPX (Netware 3.2 (J), 4.1 (J), 4.11 (J), 4.2 (J), 5.0 (J), 5.1 (J), 6.0 (J) ), SNMP (Canon-MIB compatible), HTTP, TCP/IP, AppleTalk

#### Ink

#### For information on the ink the printer supports, see "Ink Tanks." →P.826

#### Paper

For information on the types of paper the printer supports, refer to the Paper Reference Guide. (See Paper Reference Guide.)

Paper width	Rolls	254–1,524 mm (10–60 in)
	Sheets	203.2–1,524 mm (8–60 in)
Minimum paper length		203.2 mm (8.0 in)
Maximum printable length (*1)	Rolls	18 m (19.7 yd)
	Sheets	1,600 mm (63.0 in)
Thickness	Rolls	0.07–0.8 mm (0.0028–0.031 in)
	Sheets	0.07–0.8 mm (0.0028–0.031 in)
Roll maximum outer diameter		150 mm (6 in) or shorter
Supported paper core inner diameter		2 inches / 3 inches
Print area For details, see "Print Area." (→P.935)		→P.935

\*1: Varies depending on the operating system or application.

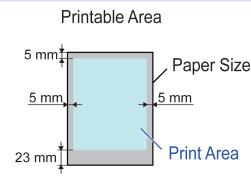

### **Print Area**

A margin required by the printer is added with respect to the size of paper loaded in the printer. Except in borderless printing, the actual printing area corresponds to the paper size minus the space for this margin.

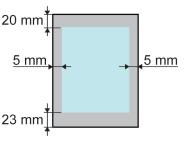

Printable Area: The area that can be printed.
 There is no margin (that is, a margin of 0 mm) during borderless printing on rolls.
 Recommended Print Area: We recommend printing within this area.
 To print so that your original matches the print area exactly, use an oversized paper size that includes the required margin. (See "Printing on Oversize Paper.") (IP 84)

	Margins of Printable Area		Margins of Recommended Print Area		rint Area	
	Top Edge	Bottom Edge	Sides	Top Edge	Bottom Edge	Sides
Sheets	5 mm (0.20 in)	23 mm (0.91 in)	5 mm (0.20 in)	20 mm (0.79 in)	23 mm (0.91 in)	5 mm (0.20 in)
Rolls	0/5 mm (0/0.20 in)	0/5 mm (0/0.20 in)	0/5 mm (0/0.20 in)	20 mm (0.79 in)	5 mm (0.20 in)	5 mm (0.20 in)

Sheets

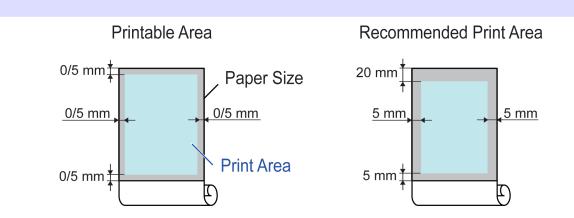

#### • Printable Area:

A margin of 5 mm (0.20 in) on top, 23 mm (0.91 in) on bottom, and 5 mm (0.20 in) on left and right sides is required.

#### • Recommended Print Area:

A margin of 20 mm (0.79 in) on top, 23 mm (0.91 in) on bottom, and 5 mm (0.20 in) on left and right sides is required.

#### Printable Area:

A margin of 5 mm (0.20 in) on all sides is required. During borderless printing, the margin on all sides is 0 mm. For information on paper compatible with borderless printing, see the Paper Reference Guide. (See "Types of Paper.")

#### • Recommended Print Area:

A margin of 20 mm (0.79 in) on top, 5 mm (0.20 in) on bottom, and 5 mm (0.20 in) on left and right sides is required.

# **Safety Precautions**

Safety Precautions	938
Legal Notices	940

#### Safety Precautions

Follow the warnings and precautions below to use the printer safely. Do not perform any operations or procedures other than as described in this manual. Doing so may result in unexpected accidents and can cause a fire or electrical shocks.

#### Printer location

• Do not set up the printer in any location exposed to alcohol, thinner, or other volatile liquids. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

Never install the printer on an unstable or vibrating surface. If it falls over, this could cause personal injury.

- Caution Never set up the printer in a location that is exposed to high humidity or large amounts of dust, or exposed to direct sunlight, high temperature, or open flame. This could cause a fire or electrical shock. Use the printer location in an environment where temperature and humidity are within the ranges of 15 °C to 30 °C (59 °F to 86 °F) and 10 to 80% RH (with no condensation).
  - Never place the printer on a heavy wool or shag carpet. The fibers may enter the printer and cause a fire.
  - Keep the area around the power outlet clear of items so that you can disconnect the power cable immediately if the printer starts operating abnormally. In the event of a printer malfunction, remove the power cable from the outlet as soon as possible to prevent fire and electrical shocks.
  - Do not install the printer near sources of strong electromagnetic fields, whether equipment that generates such fields or places where such fields occur. This could damage the printer or cause malfunction.

#### Power Supply

- Never handle the power cable with wet hands. Doing so may cause electrical shock.
- Warning Insert the power cable securely and completely into the power source. If the power cable is not inserted completely, this could cause a fire or electrical shock.
  - Do not use any power cable other than the one provided. This could cause a fire or electrical shock. Never use the power cable with any other electrical device.
  - Never cut the power cable or attempt to modify it, and never stretch it or bend it forcefully. Never place a heavy object on the power cable. Damaged sections of the power cable could cause a short circuit and may cause a fire or electrical shock.
  - Never connect the power cable to a power strip or any power source shared by other electrical devices. This could cause a fire or electrical shock.
  - Never knot the power cable or wrap it around itself. This could cause a fire or electrical shock.
  - Periodically disconnect the power cable and use a dry cloth to wipe away dust that has collected on the plug and the area around the power outlet. Leaving the power cable plugged in and not cleaned for a long period, especially in an area subject to dust, oil, and humidity, could cause the insulation material to deteriorate and lead to a fire.

- Always grip the plug to remove the power cable from the power outlet. Pulling on the power cable could damage the cable and lead to a fire or electrical shock.
- Never use an extension cord. This could cause a fire or electrical shock.
- Never use any power source other than 100–120 / 220–240 V AC. This could cause a fire or electrical shock. The printer operating conditions are described below. Use the printer under the following conditions.
   Power supply voltage: 100–120 / 220–240 V AC
   Power supply frequency: 50/60 Hz

#### In an Emergency

• If the printer emits smoke or strange odors, continuing to use the printer may cause a fire or electrical shock. Switch the printer off immediately and remove the power plug from the power outlet. Contact the nearest service center.

#### Cleaning the Printer

• For cleaning, use a cloth dampened in water. Never use flammable solvents such as alcohol, benzene, or thinner. If these substances come into contact with electrical components inside the printer, there is a risk of fire or electrical shock.

Always disconnect the power cable from the outlet before cleaning the printer. If the printer is switched on accidentally, moving parts inside the printer may cause personal injuries.

#### Pacemakers

• This printer generates a low-level magnetic field. Anyone wearing a pacemaker who experiences discomfort while working around the printer should leave the area. Consult a physician before continuing to work around the printer.

#### Moving the Printer

Caution • When moving the printer, firmly grasp the Carrying Handles under each side. The printer may be unsteady if you hold it at other positions, which poses a risk of injury from dropping the printer.

#### Printhead, Ink Tanks, and Maintenance Cartridge

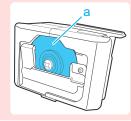

• Always store consumables in a safe location out of the reach of small children. If a child licks or ingests ink accidentally, seek medical assistance immediately.

- If ink accidentally gets in your eyes, immediately rinse with water.
   If ink gets on your skin, immediately clean it off with soap and water.
   If irritation persists in your eyes or on your skin, contact a physician immediately.
- Avoid dropping or shaking printheads, ink tanks, and maintenance cartridges. Spilled ink can stain clothing and the work area.
- Never touch the electrical contacts of the Printhead after printing. The contacts become extremely hot and can cause minor burns.

#### Other

- Never disassemble the printer or attempt repairs. There are high voltage parts inside the printer that can cause a fire or electrical shock.
- Never use flammable sprays around the printer. The gas of flammable sprays can cause a fire or electrical shock, if it contacts high voltage points inside the printer.
- After removing the Cutter Unit, never touch the cutting edge (a). This could cause personal injury.

- Never insert your hand into the printer while it is printing. Moving parts inside the printer can cause injuries.
- To prevent a fire hazard or dangerous electric shock, if a foreign object falls into or a liquid spills into the printer, press the Power button immediately to switch the printer off, unplug the printer power cable from the outlet, and then call for service. If you continue to use the printer, this could cause a fire or electrical shock.
- Important

 Connect the interface cable correctly. To avoid damage, before connection make sure that the shape of the cable connector matches the connection point on the printer.

- During printing, turn on the ventilation system in the room.
- We recommend ensuring ample space for installation.

Legal Notices	
FCC Regulations (U.S.A)	
Canon Large Format Printer	iPF9400

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Use of shielded cable is required to comply with Class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the manual. If such changes or modifications should be made, you could be required to stop operation of the equipment. Canon U.S.A. Inc. One Canon Plaza, Lake Success, NY 11042, U.S.A.

Tel No. 516-328-5600

#### For CA, USA Only

Included battery contains Perchlorate Material - special handling may apply. See http://www.dtsc.ca.gov/hazardouswaste/perchlorate/ for detail.

#### Trademarks

- Canon, the Canon logo, and imagePROGRAF are trademarks or registered trademarks of CANON INC.
- Microsoft and Windows are trademarks of Microsoft Corporation, registered in the U.S. and other countries.
- Macintosh is trademark of Apple Inc., registered in the U.S. and other countries.

Appendix

• Other company and product names in this manual are trademarks or registered trademarks of their respective owners.

#### Copyright

• Unauthorized reproduction of this user manual in whole or part is prohibited.

#### Legal Notice

- It is illegal to reproduce currency, bills, negotiable securities and other documents prohibited by law. Reproduction of such items may be subject to criminal prosecution.
- It is illegal to reproduce legal certificates, licenses, travel tickets, and certain public and private documents prohibited from reproduction by law. Reproduction of such items may be subject to criminal prosecution.
- Please note that intellectual property protected by copyright may not be reproduced without the express permission of the copyright holder except for personal or household use under limited circumstances.

#### **About This User Manual**

#### Symbols

The following symbols are used in this user manual to indicate safety information and explanations on restrictions or precautions in use.

	Warning	Indicates warning items for which operating error poses a risk of death or serious injury. To ensure safe use, always follow these warnings.
	Caution	Indicates caution items for which operating error poses a risk of injury. To ensure safe use, always follow these cau- tions.
0	Important	Indicates important information and restrictions that definitely are to be followed during operation. Be sure to read this information to prevent troubles, malfunctions, or damage to equipment or property by operating errors.
	Note	Indicates helpful reference information and supplemental information on particular topics.

#### • Button names and user interface elements

Key and button names on the control panel and user interface elements in software (such as menus and buttons) are indicated as follows in this user manual.

Control panel buttons	Example: Press the <b>OK</b> button.
Control panel messages	Example: Head Cleaning is displayed.
Software interface items (menus and buttons)	Example: Click <b>OK</b> .
Keyboard keys	Example: Press the Tab key.

Appendix

Manuals for this printer

#### Cross-reference

Other pages or manuals that provide related information are indicated as follows in this user manual.

Cross-reference in the same user manual	Example: see "Turning the Printer On and Off." $\rightarrow$ P.21 Click the link to jump to the corresponding page.
Cross-reference in related manuals	Example: See the Paper Reference Guide.
Other cross-reference	Example: See the printer driver help.

#### • Figures and software screens

- Figures in this user manual may be different from the actual appearance of the printer in some cases.
- Screens depicted in this user manual for the printer driver or other software may be different from the actual screens because of subsequent updates.

#### May we request

- The information in this user manual is subject to change without notice.
- We strive to ensure accuracy of information in this user manual, but if you notice errors or omissions, please contact us.

## Disposal of the product

#### WEEE Directive

European Union (and EEA) only.

These symbols indicate that this product is not to be disposed of with your household waste, according to the WEEE Directive (2002/96/EC), the Battery Directive (2006/66/EC) and/or your national laws implementing those Directives. This product should be handed over to a designated collection point, e.g., on an authorized one-for-one basis when you buy a new similar product or to an authorized collection site for recycling waste electrical and electronic equipment (EEE) and batteries and accumulators. Improper handling of this type of waste could have a possible impact on the environment and human health due to potentially hazardous substances that are generally associated with EEE. Your cooperation in the correct disposal of this product will contribute to the effective usage of natural resources. For more information about the recycling of this product, please contact your local city office, waste authority, approved scheme or your household waste disposal service or visit <u>www.canon-europe.com/environment</u>.

(EEA: Norway, Iceland and Liechtenstein)

Uitsluitend bestemd voor de Europese Unie (en EER).

Met deze symbolen wordt aangegeven dat dit product in overeenstemming met de AEEA-richtlijn (2002/96/EC), de richtlijn 2006/66/EC betreffende batterijen en accu's en/of de plaatselijk geldende wetgeving waarin deze richtlijnen zijn geïmplementeerd, niet bij het normale huisvuil mag worden weggegooid. Dit product dient te worden ingeleverd bij een hiervoor aangewezen inzamelpunt, bijv. door dit in te leveren bij een hiertoe erkend verkooppunt bij aankoop van een gelijksoortig product, of bij een officiële inzameldienst voor de recycling van elektrische en elektronische apparatuur (EEA) en batterijen en accu's. Door de potentiële gevaarlijke stoffen die gewoonlijk gepaard gaan met EEA, kan onjuiste verwerking van dit type afval mogelijk nadelige gevolgen hebben voor het milieu en de menselijke gezondheid. Uw medewerking bij het op juiste wijze weggooien van dit product draagt bij tot effectief gebruik van natuurlijke bronnen. Voor verdere informatie over recycling van dit product kunt u contact opnemen met uw plaatselijke gemeente, afvaldienst, officiële dienst voor klein chemisch afval of afvalstortplaats, of kunt u terecht op www.canon-europe.com/environment.

(EER: Noorwegen, IJsland en Liechtenstein)

Endast för EU (och EEA).

De här symbolerna anger att produkten inte får slängas i hushållssoporna enligt WEEE-direktivet (2002/96/EG), batteridirektivet (2006/66/EG) och/eller nationell lagstiftning som implementerar dessa direktiv. Produkten ska lämnas in på en där för anvisad insamlingsplats, t.ex. hos handlare som är auktoriserade att byta in varor då nya, liknande köps (en mot en) eller på en återvinningsstation auktoriserad att hantera elektrisk och elektronisk utrustning (EE-utrustning) samt batterier och ackumulatorer. Olämplig hantering av avfall av den här typen kan ha negativ inverkan på miljön och människors hälsa på grund av de potentiellt farliga ämnen som vanligen återfinns i elektrisk och elektronisk utrustning av produkten bidrar till effektiv användning av naturresurserna. Om du vill ha mer information om var du kan lämna in den här produkten, kontakta ditt lokala kommunkontor, berörd myndighet eller företag för avfallshantering eller besök <u>www.canon-europe.com/environment</u>.

(EEA: Norge, Island och Liechtenstein)

Appendix

#### Pouze Evropská unie (a EHP)

Tento symbol znamená, že podle směrnice o OEEZ (2002/96/ES), směrnice o bateriích (2006/66/ES) a/nebo podle vnitrostátních právních prováděcích předpisů k těmto směrnicím nemá být tento výrobek likvidován s odpadem z domácností. Tento výrobek má být vrácen do určeného sběrného místa, např. v rámci autorizovaného systému odběru jednoho výrobku za jeden nově prodaný podobný výrobek, nebo do autorizovaného sběrného místa pro recyklaci odpadních elektrických a elektronických zařízení (OEEZ) a baterií a akumulátorů. Nevhodné nakládání s tímto druhem odpadu by mohlo mít negativní dopad na životní prostředí a lidské zdraví, protože elektrická a elektronická zařízení zpravidla obsahují potenciálně nebezpečné látky.Vaše spolupráce na správné likvidaci tohoto výrobku napomůže efektivnímu využívání přírodních zdrojů. Chcete-li získat podrobné informace týkající se recyklace tohoto výrobku, obraťte se prosím na místní úřad, orgán pro nakládání s odpady, schválený systém nakládání s odpady či společnost zajišťující likvidaci domovního odpadu nebo navštivte webové stránky www.canon-europe.com/environment.

(EHP: Norsko, Island a Lichtenštejnsko)

#### Gjelder kun EU (og EØS).

Disse symbolene indikerer at dette produktet ikke skal kastes sammen med husholdningsavfall, i henhold til WEEE-direktivet (2002/96/EF), batteridirektivet (2006/66/EF) og/eller nasjonal lov som har implementert disse direktivene. Produktet må leveres til et dertil egnet innsamlingspunkt, det vil si på en autorisert en-til-en-basis når en kjøper et nytt lignende produkt, eller til et autorisert innsamlingssted for resirkulering av avfall fra elektrisk og elektronisk utstyr (EE-utstyr) og batterier og akkumulatorer. Feil håndtering av denne typen avfall kan være miljø- og helseskadelig på grunn av potensielt skadelige stoffer som ofte brukes i EE-utstyr. Din innsats for korrekt avhending av produktet vil bidra til effektiv bruk av naturressurser. Du kan få mer informasjon om resirkulering av dette produktet ved å kontakte lokale myndigheter, avfallsadministrasjonen, et godkjent program eller husholdningens renovasjonsselskap, eller gå til www.canon-europe.com/environment.

(EØS: Norge, Island og Liechtenstein)

#### Len Európska únia (a EHP)

Tieto symboly označujú, že podľa smernice o odpade z elektrických a elektronických zariadení (OEEZ) 2002/96/ES, smernice o batériách (2006/66/ES) a/alebo podľa vnútroštátnych právnych predpisov zahŕňajúcich tieto smernice sa tento produkt nesmie likvidovať spolu s domácim odpadom. Tento produkt je potrebné odovzdať do určenej zberne, napr. prostredníctvom výmeny za kúpu nového podobného produktu, alebo do autorizovaného zberného miesta na recykláciu odpadu z elektrických a elektronických zariadení (EEZ) a batérií a akumulátorov. Nesprávna manipulácia s takýmto typom odpadu môže mať negatívny vplyv na životné prostredie a ľudské zdravie, pretože elektrické a elektronické zariadenia obsahujú potenciálne nebezpečné látky. Vašou spoluprácou na správnej likvidácii tohto produktu prispejete k účinnému využívaniu prírodných zdrojov. Ďalšie informácie o recyklácii tohto produktu získate od svojho miestneho úradu, úradu zodpovedného za odpadu zo schváleného plánu o OEEZ alebo od spoločnosti zaisťujúcej likvidáciu domáceho odpadu alebo na webovej stránke www.canon-europe.com/environment.

(EHP: Nórsko, Írsko a Lichtenštajnsko)

Solo per l'Unione Europea e lo Spazio Economico Europeo.

Questi simboli indicano che il prodotto non può essere smaltito con i rifiuti domestici, ai sensi della Direttiva RAEE (2002/96/CE), della Direttiva sulle Batterie (2006/66/CE) e/o delle leggi nazionali che attuano tali Direttive. Il prodotto deve essere conferito a punto di raccolta designato, ad esempio il riciclaggio di rifiuti di apparecchiature elettriche ed elettroniche (RAEE) nonché di batterie e accumulatori. Un trattamento improprio di questo tipo di rifiuti può avere conseguenze negative sull'ambiente e sulla salute umana a causa delle sostanze potenzialmente nocive solitamente contenute in tali rifiuti. La collaborazione dell'utente per il corretto smaltimento di questo prodotto contribuirà a un utilizzo efficace delle risorse naturali ed eviterà di incorrere in sanzioni amministrative ai sensi dell'art. 50 e successivi del Decreto Legislativo n. 22/97.Per ulteriori informazioni sul riciclaggio di questo prodotto, contattare le autorità locali, l'ente responsabile della raccolta dei rifiuti, un rivenditore autorizzato o il servizio di raccolta dei rifiuti domestici, oppure visitare il sito <u>www.canon-europe.com/environment</u>.

(Spazio Economico Europeo: Norvegia, Islanda e Liechtenstein)

Appendix

Disposal of the product

Samo za Evropsko unijo (in Evropski gospodarski prostor).

TI simboli pomenijo, da tega izdelka skladno z Direktivo OEEO (2002/96/ES), Direktivo 2006/66/ES in/ali nacionalno zakonodajo, ki uvaja ti direktivi, ne smete odlagati z nesortiranimi gospodinjskimi odpadki. Ta izdelek je treba odnesti na izbrano zbirno mesto, t. j. pooblaščeno trgovino, kjer ob nakupu novega (podobnega) izdelka vrnete starega, ali na pooblaščeno zbirno mesto za ponovno uporabo odpadne električne in elektronske opreme (EEO) ter baterij in akumulatorjev. Neustrezno ravnanje s to vrsto odpadkov lahko negativno vpliva na okolje in človeško zdravje zaradi potencialno nevarnih snovi, ki so pogosto povezane z EEO. Vaše sodelovanje pri pravilnem odlaganju tega izdelka predstavlja pomemben prispevek k smotrni izrabi naravnih virov. Za več informacij o ponovni uporabi tega izdelka se obrnite na lokalen mestni urad, pristojno službo za odpadke, predstavnika pooblaščenega programa za obdelavo ali na lokalno komunalo. Lahko pa tudi obiščete odpadkov našo spletno stran www.canon-europe.com/environment.

(Evropski gospodarski prostor: Norveška, Islandija in Lihtenštajn)

Kizárólag az Európai Unió (valamint az EEA) részére.

Ezek a szimbólumok azt jelzik, hogy a termék hulladékkezelése a háztartási hulladéktól különválasztva, a WEEE - elektromos és elektronikus berendezések hulladékairól szóló (2002/96/EK) irányelvnek és, az elemekről és akkumulátorokról, valamint a hulladékelemekről és -akkumulátorokról szóló (2006/66/EK) irányelvnek megfelelően, és/vagy ezen irányelveknek megfelelő helyi előírások szerint történik. Ezen terméket az arra kijelölt gyűjtőhelyre kell juttatni, pl., hasonló termék vásárlásakor a régi becserélésére vonatkozó hivatalos program keretében, vagy az elektromos és elektronikus berendezések (EEE) hulladékainak gyűjtésére, valamint a hulladékelemek és hulladékakkumulátorok gyűjtésére kijelölt hivatalos gyűjtőhelyre. Az ilyen jellegű hulladékok nem előírásszerű kezelése az elektromos és elektronikus berendezésekhez (EEE) általánosan kapcsolható potenciálisan veszélyes anyagok révén hatással lehet a környezetre és az egészségre. Ezen termék megfelelő módon történő eltávolításával Ön is hozzájárul a természeti források hatékony használatához. A termék újrahasznosítását illetően informálódjon a helyi polgármesteri hivatalnál, a helyi közterület-fenntartó vállalatnál, a hivatalos hulladéklerakó telephelyen, vagy a háztartási hulladék begyűjtését végző szolgáltatónál, illetve látogasson el a www.canon-europe.com/environment internetes oldalra.

Apenas para a União Europeia (e AEE)

Estes símbolos indicam que este produto não deve ser eliminado juntamente com o seu lixo doméstico, segundo a Directiva REEE de 2002/96/CE, a Directiva de Baterias (2006/66/CE) e / ou a sua legislação nacional que transponha estas Directivas. Este produto deve ser entregue num ponto de recolha designado, por exemplo num local autorizado de troca quando compra um equipamento novo idêntico, ou num local de recolha autorizado para reciclar equipamento eléctrico e electrónico (EEE) em fim de vida, bem como pilhas e baterias. O tratamento inadequado deste tipo de resíduos pode ter um impacto negativo no ambiente e na saúde humana, devido a substâncias potencialmente perigosas que estão associadas com equipamentos do tipo EEE. A sua cooperação no tratamento correcto deste produto irá contribuir para a utilização mais eficaz dos recursos naturais. Para obter mais informações acerca de como reciclar este produto, por favor contacte as suas autoridades locais responsáveis pela matéria, serviço de recolha aprovado para pilhas e baterias ou serviço de recolha de resíduos sólidos domésticos da sua municipalidade, ou visite www.canon-europe.com/environment.

Üksnes Euroopa Liit (ja Euroopa Majanduspiirkond).

Antud sümbolid viitavad sellele, et vastavalt WEEE direktiivile (2002/96/EÜ), patareide direktiivile (2006/66/EÜ) ja/või nimetatud direktiive rakendavatele riiklikele õigusaktidele ei või seda toodet visata ära koos majapidamisjäätmetega. Antud toode tuleb anda vastavasse kogumispunkti, nt üks ühe vastu, kui ostad uue sarnase toote, või vastavasse elektri- ja elektroonikaseadmete jäätmete ning patareide ja akude ümbertöötlemiseks mõeldud kogumispunkti. Antud liiki prügi vale käitlemine võib kahjustada keskkonda ja inimeste tervist elektri- ja elektroonikajäätmetes tavaliselt leiduvate potentsiaalselt ohtlike ainete tõttu. Antud toote ettenähtud nõuete kohase kõrvaldamisega aitate efektiivselt kasutada loodusvarasid. Täiendava teabe saamiseks antud toote ringlussevõtu kohta võtke ühendust kohaliku linnavalitsusega, jäätmekäitlejaga, lubatud skeemiga või majapidamisjäätmete prügilateenistusega või külastage Interneti-lehekülge <u>www.canon-europe.com/environment</u>.

(Euroopa Majanduspiirkond: Norra, Island ja Liechtenstein)

Paredzēts tikai Eiropas Savienības valstīm (un EVA).

Šie simboli norāda, ka atbilstoši ES direktīvai par izlietotu elektrisku un elektronisku aparatūru (2002/96/EK), direktīvai par baterijām un akumulatoriem (2006/66/EK) un vietējai likumdošanai no šī produkta nedrīkst atbrīvoties, izmetot to kopā ar sadzīves atkritumiem. Šis produkts ir jānodod piemērotā savākšanas punktā, piemēram, autorizētā veikalā, kur iegādājaties līdzīgu jaunu produktu un veco atstājat vietā, vai autorizētā dienestā, kas nodarbojas ar izlietotas elektriskās un elektroniskās aparatūras (waste electrical and electronic equipment — WEEE) otrreizēju pārstrādi. Nepareizi apejoties ar šāda veida izlietotu aparatūru, var apdraudēt vidi un cilvēka veselību potenciāli bīstamu vielu dēļ, kas parasti ietilpst elektriskajā un elektroniskajā aparatūrā lietotajos sakausējumos. Turklāt pareiza atbrīvošanās no šī produkta sekmē racionālu dabas resursu izlietojumu. Lai saņemtu plašāku informāciju par vietām, kur izlietotu aparatūru var nodot otrreizējai pārstrādei, sazinieties ar vietējās pašvaldības pārstāvjiem, dienestu, kas atbild par atkritumu savākšanu, pilnvarotu WEEE struktūru vai iestādi, kas veic atkritumiem atbrīvošanos no sadzīves vai apmeklējiet tīmekla vietni www.canon-europe.com/environment.

(Eiropas Ekonomiskā zona: Norvēģija, Īslande un Lihtenšteina).

Tik Europos Sąjungai (ir Europos Ekonominei Zonai)

Šie simboliai reiškia, kad šio gaminio negalima išmesti į buitines atliekas, kaip reikalauja WEEE Direktyva (2002/96/EB) ir Baterijų Direktyva (2006/66/EB) ir (ar) jūsų šalies nacionaliniai įstatymai, kuriais šios Direktyvos yra įgyvendinamos. Šį gaminį reikia pristatyti į specialų surinkimo punktą, pavyzdžiui, mainais, kai jūs perkate naują panašų gaminį arba į specialią surinkimo vietą, kuri perdirba elektrinės ir elektroninės įrangos atliekas bei naudotas baterijas ir akumuliatorius. Dėl netinkamo šio tipo atliekų tvarkymo gali nukentėti aplinka bei iškyla grėsmė žmogaus sveikatai dėl potencialai kenksmingų medžiagų, iš esmės susijusių su elektrine ir elektronine įranga. Bendradarbiaudami teisingai utilizuojant šiuos gaminius, jūs padėsite efektyviai naudoti gamtinius išteklius. Daugiau informacijos apie gaminio perdirbimą jums gali suteikti vietinis biuras, atliekų tvarkymo bendrovė, sertifikuoti organai ar buitinių atliekų surinkimo įmonės. Be to, aplankykite interneto svetainę <u>www.canon-europe.com/environment</u>.

(Europos Ekonominė Zona: Norvegija, Islandija ir Lichtenšteinas)

Union européenne (et Espace économique européen) uniquement.

Ces symboles indiquent que ce produit ne doit pas être mis au rebut avec les ordures ménagères, comme le spécifient la Directive européenne DEEE (2002/96/EC), la Directive européenne relative à l'élimination des piles et des accumulateurs usagés (2006/66/EC) et les lois en vigueur dans votre pays, appliquant ces directives. Ce produit doit être confié à un point de collecte désigné, par exemple, chaque fois que vous achetez un produit similaire neuf, ou à un point de collecte agréé pour le recyclage équipements électriques ou électroniques (EEE) et des piles et accumulateurs. Le traitement inapproprié de ce type de déchet risque d'avoir des répercussions sur l'environnement et la santé humaine, du fait de la présence de substances potentiellement dangereuses généralement associées aux équipements électriques ou électroniques. Votre coopération envers la mise au rebut correcte de ce produit contribuera à l'utilisation efficace des ressources naturelles. Pour de plus amples informations sur le recyclage de ce produit, veuillez contacter vos services municipaux, votre éco-organisme ou les autorités locales. Vous pouvez également vous rendre sur le site <u>www.canon-europe.com/environment</u>.

(Espace économique européen : Norvège, Islande et Liechtenstein)

Appendix

Disposal of the product

Tylko kraje Unii Europejskiej (i Europejskiego Obszaru Gospodarczego).

Te symbole oznaczają, że produkt należy wyrzucać oddzielnie od odpadów domowych, zgodnie z dyrektywą WEEE w sprawie zużytego sprzętu elektrycznego i elektronicznego (2002/96/EC) lub dyrektywą w sprawie baterii (2006/66/EC) i/lub przepisami krajowymi, wdrażającymi te dyrektywy. Zużyty sprzęt powinien zostać przekazany do punktu zbiórki sprzętu (EEE), a w przypadku zakupu nowego na zasadzie wymiany jeden do jednego przy zakupie podobnego co do rodzaju produktu. Użytkownicy baterii i akumulatorów mają obowiązek korzystać z dostępnego programu zwrotu, recyklingu i utylizacji baterii i akumulatorów. Niewłaściwe postępowanie z tego typu odpadami może mieć wpływ na środowisko i zdrowie ludzi ze względu na substancje potencjalnie niebezpieczne ogólnie związane ze zużytym sprzętem elektrycznym i elektronicznym. Państwa współpraca w zakresie właściwej utylizacji tego produktu przyczyni się do efektywnego wykorzystania zasobów naturalnych. W celu uzyskania informacji o sposobie recyklingu tego produktu prosimy o kontakt z właściwym urzędem miejskim lub zakładem gospodarki komunalnej lub zapraszamy na stronę <u>www.canon-europe.com/environment</u>.

(Europejski Obszar Gospodarczy: Norwegia, Islandia i Liechtenstein)

Gælder kun i EU (og EØS).

Disse symboler betyder, at produktet ikke må bortskaffes sammen med husholdningsaffald i henhold til WEEE-direktivet (2002/96/EF), batteridirektivet (2006/66/EF) og/eller den lokale lovgivning, som disse direktiver er gennemført i. Produktet skal afleveres på et godkendt indsamlingssted, f.eks. i overensstemmelse med en godkendt én-for-én-procedure, når du indkøber et nyt tilsvarende produkt, eller på et godkendt indsamlingssted for genanvendeligt affald fra elektrisk og elektronisk udstyr samt for batterier og akkumulatorer. Forkert håndtering af denne type affald kan muligvis få negative konsekvenser for miljøet og menneskers helbred på grund af de potentielt sundhedsskadelige substanser, der generelt associeres med elektrisk og elektronisk udstyr. Når du foretager korrekt bortskaffelse af produktet, bidrager dette også til effektiv brug af naturressourcerne. Kontakt din kommune, den lokale affaldsmyndighed, forvalterne af en godkendt affaldsordning eller det lokale affaldsanlæg, eller besøg <u>www.canon-europe.com/environment</u> for at få flere oplysninger om genbrug af dette produkt.

#### Vain EU- ja EEA-alueelle.

Nämä tunnukset osoittavat, että sähkö- ja elektroniikkalaiteromua koskeva direktiivi (WEEE-direktiivi, 2002/96/EY), paristoista ja akuista annettu direktiivi (2006/66/EY) sekä kansallinen lainsäädäntö kieltävät tuotteen hävittämisen talousjätteen mukana. Tuote on vietävä asianmukaiseen keräyspisteeseen, esimerkiksi kodinkoneliikkeeseen uutta vastaavaa tuotetta ostettaessa tai viralliseen sähkö- ja elektroniikkalaiteromun tai paristojen ja akkujen keräyspisteeseen. Sähkö- ja elektroniikkalaiteromun virheellinen käsittely voi vahingoittaa ympäristöä ja ihmisten terveyttä, koska laitteet saattavat sisältää ympäristölle ja terveydelle haitallisia aineita. Tuotteen asianmukainen hävittäminen säästää samalla ota yhteys kunnan luonnonvaroja. Jos haluat lisätietoja tämän tuotteen kierrätyksestä, jätehuoltoviranomaisiin tai käyttämääsi jätehuoltoyhtiöön tai käv osoitteessa www.canon-europe.com/environment.

(EEA-maat: Norja, Islanti ja Liechtenstein)

Samo za Europsku uniju (i Europski gospodarski prostor).

Oznaka pokazuje da se baterije i akumulatori, korišteni u ovom proizvodu, odlažu odvojeno od kućnog otpada, u skladu s direktivom 2002/96/ EZ-a ("Direktiva") i lokalnim zahtjevima koji primjenjuju te Direktive. Ovaj bi proizvod trebao biti prenesen do određene točke sakupljanja, npr. na neku dozvoljenu bazu u omjeru 1:1 kada kupite novi sličan proizvod, ili na ovlašteno mjesto za sakupljanje istrošene električne i elektronske opreme, (waste electrical and electronic equipment – EEE) baterija i akumulatora. Neodgovarajuće rukovanje ovim tipom otpada može utjecati na okoliš i ljudsko zdravlje zbog potencijalno opasnih supstanci koje se najčešće nalaze uz EEE. Vaša suradnja u pravilnom zbrinjavanju ovog proizvoda doprinijet će efikasnoj uporabi prirodnih resursa. Za više informacija o recikliranju ovog proizvoda, molimo vas da kontaktirate svoj lokalni gradski ured, lokalne vlasti, pogledate odobrenu shemu, kontaktirajte vašu komunalnu službu za uklanjanje radioaktivnog otpada ili posjetite www.canon-europe.com/environment.

Diese Symbole weisen darauf hin, dass dieses Produkt gemäß WEEE-Richtlinie 2002/96/EG (Richtlinie über Elektro- und Elektronik-Altgeräte), Batterien-Richtlinie (2006/66/EG) und/oder nationalen Gesetzen zur Umsetzung dieser Richtlinien nicht über den Hausmüll entsorgt werden darf. Dieses Produkt muss bei einer dafür vorgesehenen Sammelstelle abgegeben werden. Dies kann z. B. durch Rückgabe beim Kauf eines neuen ähnlichen Produkts oder durch Abgabe bei einer autorisierten Sammelstelle für die Wiederaufbereitung von Elektro- und Elektronik-Altgeräten sowie Batterien und Akkumulatoren geschehen. Der unsachgemäße Umgang mit Altgeräten kann aufgrund potenziell gefährlicher Stoffe, die häufig in Elektro- und Elektronik-Altgeräte enthalten sind, negative Auswirkungen auf die Umwelt und die menschliche Gesundheit haben. Durch Ihre Mitarbeit bei der sachgemäßen Entsorgung dieses Produkts tragen Sie zu einer effektiven Nutzung natürlicher Ressourcen bei. Um weitere Informationen über die Wiederverwertung dieses Produkts zu erhalten, wenden Sie sich an Ihre Stadtverwaltung, den öffentlich-rechtlichen Entsorgungsträger, eine autorisierte Stelle für die Entsorgung von Elektro- und Elektronik-Altgeräten Stelle für die Entsorgung von Elektro- und Elektrone Müllabfuhr oder besuchen Sie <u>www.canon-europe.com/environment</u>.

(EWR: Norwegen, Island und Liechtenstein)

Только для Европейского Союза (Европейской экономической зоны).

Эти символы указывают, что данный продукт не должен утилизироваться вместе с хозяйственно-бытовыми отходами в соответствии с Директивой WEEE (2002/96/EC), Директивой об аккумуляторах 2006/66/EC и/или законами Вашей страны, осуществляющими данные Директивы. Данное изделие доолжно быть передано в предназначенный для этого пункт сбора, напрмер, на основе авторизованного обмена «один к одному», когда Вы покупаете подобное новое изделие, или в авторизованное место сбора отходов электрического и электронного оборудования, батарей и аккумуляторов для переработки. Неправильное обращение с отходами подобного типа может иметь влияние на окружающую среду и здоровье человека из-за потенциально опасных для здоровья веществ, которые, как правило, тесно связаны с электрическим и электронным оборудованием. Ваше сотрудничество в области правильной утилизации данного изделия вносит вклад в рациональное использование природных ресурсов. Чтобы узнать больше информации о переработке отходов батарей и аккумуляторов, пожалуйста, обратитесь в местную городскую администрацию, орган по работе с отходами или предприятие по утилизации отходов, или зайдите на <u>www.canon-europe.com/environment</u>.

(Европейская экономическая зона: Норвегия, Исландия и Лихтенштейн)

Només per a la Unió Europea (i EEA)

Aquests símbols indican que aquest producte no s'ha de llençar amb les escombraries de la llar, d'acord amb la RAEE (2002/96/EC), la Directiva relativa a piles i acumuladors (2006/66/EC) i la legislació nacional que implementi aquestes directives. Aquest producte s'hauria de lliurar en un dels punts de recollida designats, com per exemple, intercanviant un per un en comprar un producte similar o lliurant-lo en un lloc de recollida autoritzat per al reciclatge de residus d'aparells elèctrics i electrònics (EEE) i piles i acumuladors. La manipulació inadequada d'aquest tipus de residus podria tenir un impacte negatiu en l'entorn i en la salut humana, a causa de les substàncies potencialment perilloses que normalment estan associades a l'EEE. La vostra cooperació a l'hora de rebutjar correctament aquest producte contribuirà a la utilització efectiva dels recursos naturals. Els usuaris tenen dret a retornar les bateries o els acumuladors usats sense cap càrrec. El preu de venda de les bateries i els acumuladors inclou el cost de la gestió ambiental dels residus i, sota cap circumstància, l'import d'aquest cost s'especificarà per separat en aquest fullet o en la factura que es lliuri a l'usuari final. Per a més informació sobre el reciclatge d'aquest producte, contacteu amb l'oficina municipal, les autoritats encarregades dels residus, el pla de residus homologat o el servei de recollida d'escombraries domèstiques de la vostra localitat o visiteu www.canon-europe.com/environment.

(EEA: Noruega, Islàndia i Liechtenstein)

Doar pentru Uniunea Europeană (și EEA).

Aceste simboluri indică faptul că acest produs nu trebuie evacuat împreună cu deşeurile menajere, în conformitate cu Directiva WEEE (2002/96/EC), Directiva referitoare la baterii (2006/66/EC) şi/sau legile dvs. naționale ce implementează aceste Directive. Acest produs trebuie înmânat punctului de colectare adecvat, ex: printr-un schimb autorizat unu la unu atunci când cumpărați un produs nou similar sau la un sit de colecție autorizat pentru reciclarea reziduurilor de echipament electric şi electronic (EEE) şi baterii şi acumulatori. Administrarea neadecvată a acestui tip de deşeuri, ar putea avea un impact asupra mediului şi asupra sănătății umane datorită substanțelor cu potențial de risc care sunt în general asociate cu EEE. Cooperarea dvs. în direcția evacuării corecte a acestui produs va contribui la o utilizare eficientă a resurelor naturale. Pentru mai multe informații despre reciclarea acestui produs, vă rugăm să contactați biroul dvs. local, autoritățile responsabile cu deşeurile, schema aprobată sau serviciul dvs. responsabil cu deşeurile menajere sau vizitați-ne la <u>www.canon-europe.com/environment</u>.

(EEA: Norvegia, Islanda, Lichtenstein)

#### Yalnızca Avrupa Birliği (ve AEA).

Bu simgeler, WEEE Direktifi (2002/96/AT), Pil Direktifi (2006/66/AT) ve/veya bu Direktifleri uygulamaya koyan ulusal kanunlarınız uyarınca bu ürünün evsel atıklarınızla birlikte atılmaması gerektiğini gösterir. Bu ürün örneğin, benzer bir yeni ürün aldığınızda yetkili bir değiştirme esaslı toplama noktası veya elektrikli ve elektronik cihazlar (EEE) ile pil ve akü geri dönüşümü için yetkili bir toplama merkezi gibi belirlenmiş bir toplama noktasına götürülmelidir. Bu gibi atıkların gerektiği şekilde işlem görmemesi genel olarak EEE ile bağlantılı olan tehlikeli olabilecek maddeler nedeniyle çevre ve insan sağlığı üzerinde olumsuz etkiye yol açabilir. Bu ürünün düzgün şekilde atılması için işbirliği yapmanız doğal kaynakların verimli şekilde kullanımına katkıda bulunacaktır. Bu ürünün geri dönüşümü hakkında daha fazla bilgi için lütfen belediyeniz, atık merkeziniz, onaylı atık programı veya çöp toplama servisine başvurun ya da www.canon-europe.com/environment adresini ziyaret edin.

(AEA: Norveç, İzlanda ve Lihtenştayn)

Тільки для Європейського Союзу (та Європейської економічної зони).

Ці символи вказують, що даний продукт не повинен утилізуватися разом з господарчо-побутовими відходами згідно Директиви WEEE (2002/96/EC), Директиви про батареї 2006/66/EC та/або законів Вашої країни, що реалізують ці Директиви. Даний виріб повинно бути передано до призначенного приймального пункту, наприклад, на базі авторизованого обміну «один до одного», якщо Ви купуєте подібний новий продукт, або до авторизованого місця збору відходів електричного та електронного обладнання, батарей та акумуляторів для подальшої переробки. Невідповідне обходження з подібними відходами може завдавати впливу на оточуюче середовище і здоров'я людини через присутність потенційно небезпечних речовин, які загалом тісно пов'язані з електричним та електронним обладнанням. Ваша співпраця щодо відповідної утилізації даного виробу робить внесок у раціональне використання природніх ресурсів. Будь ласка, зверніться до місцевої адміністрації, органу по роботі з відходами або підприємства по утилізації відходів, щоб дізнатися більше про переробку даного виробу, або зверніться на <u>www.canon-europe.com/environment</u>.

(Європейська економічни зона: Норвегія, Ісландія та Ліхтенштейн)

#### Само за Европейския съюз (и ЕИП).

Тези символи указват, че този продукт не може да се изхвърля заедно с боклука от вашето домакинство, според Директивата ИУЕЕО (2002/96/EC), Директивата за батерии (2006/66/EC) и/или вашите национални закони, които изпълняват тези Директиви. Този продукт трябва да бъде предаден в обозначен събирателен пункт, т.е. в одобрена база, когато купувате нов подобен продукт или в одобрен събирателен пункт за рециклиране на отпадъци от електрическо и електронно оборудване (EEO), батерии и акумулаторни батерии. Неправилното третиране на този вид отпадъци може да има потенциален вреден ефект върху околната среда и човешкото здраве, поради възможните опасни вещества, с които обикновено се свързва EEO. Вашето съдействие за правилното изхвърляне на този продукт ще допринесе за ефективната употреба на естествените ресурси. За повече информация относно рециклирането на този продукт, моля свържете се с вашия местен офис, с органа, който отговаря за отпадъчните продукти, одобрената програма или учреждението по изхвърляне на боклука на вашето домакинство, или посетете www.canon-europe.com/environment.

(ЕИП: Норвегия, Исландия и Лихтенщайн)
