MC-6785-V1.10

Uninstalling the On-Screen Manuals

Follow the procedure below to uninstall all of the installed on-screen manuals from your computer.

Before uninstalling the on-screen manuals, exit all on-screen manuals that are opening.

1. From the **Go** menu of Finder, choose **Applications**
2. Double-click the **Canon Utilities** folder and then the **IJ Manual** folder
3. Delete the on-screen manual

Drag the folder with the name of your model to the Trash.

Note

- If the desktop contains an icon of the on-screen manual, drag it to the Trash.

You Can Do the Following

Useful Software

Let's create various artworks by using images and videos
You can also print by performing simple operations

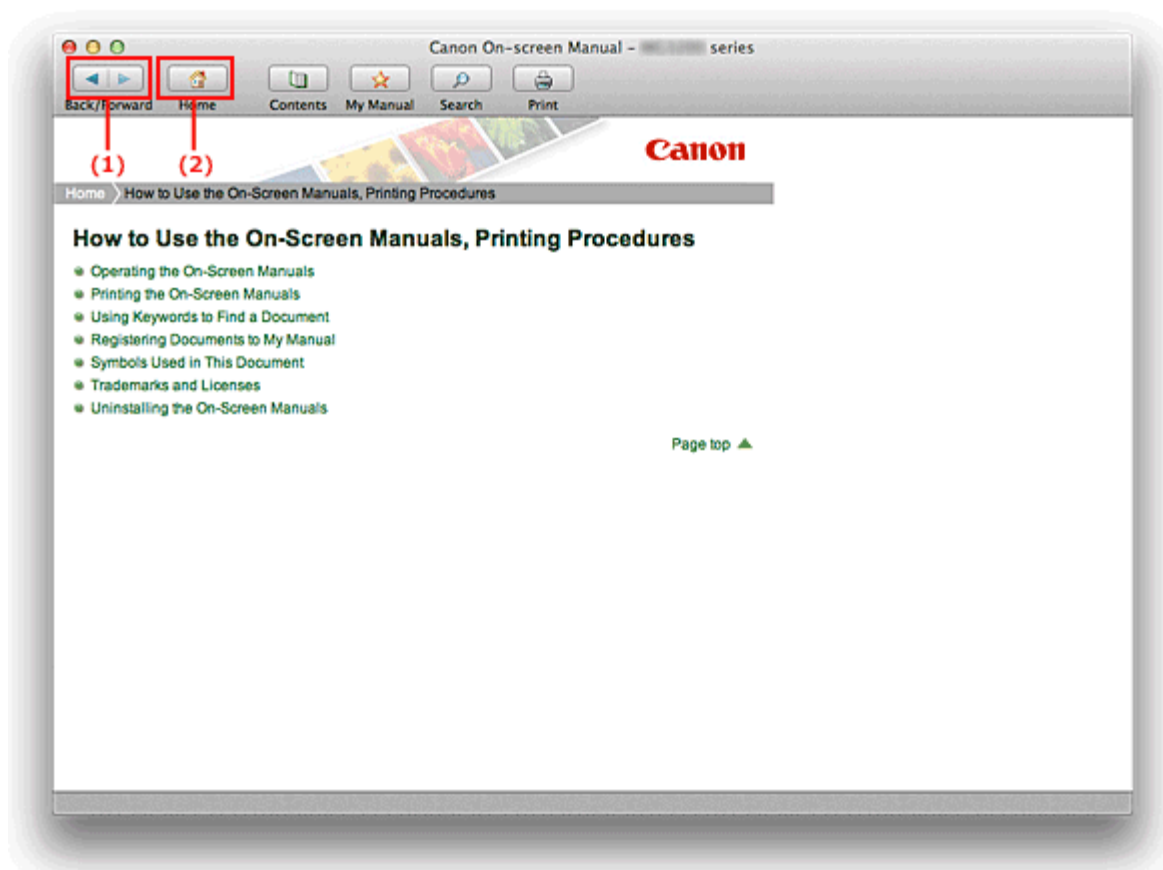

How to Use the On-Screen Manuals, Printing Procedures

- [Operating the On-Screen Manuals](#)
- [Printing the On-Screen Manuals](#)

- [Registering Documents to My Manual](#)
- [Symbols Used in This Document](#)
- [Trademarks and Licenses](#)
- [Uninstalling the On-Screen Manuals](#)

[Page top](#) ▲

Operating the On-Screen Manuals

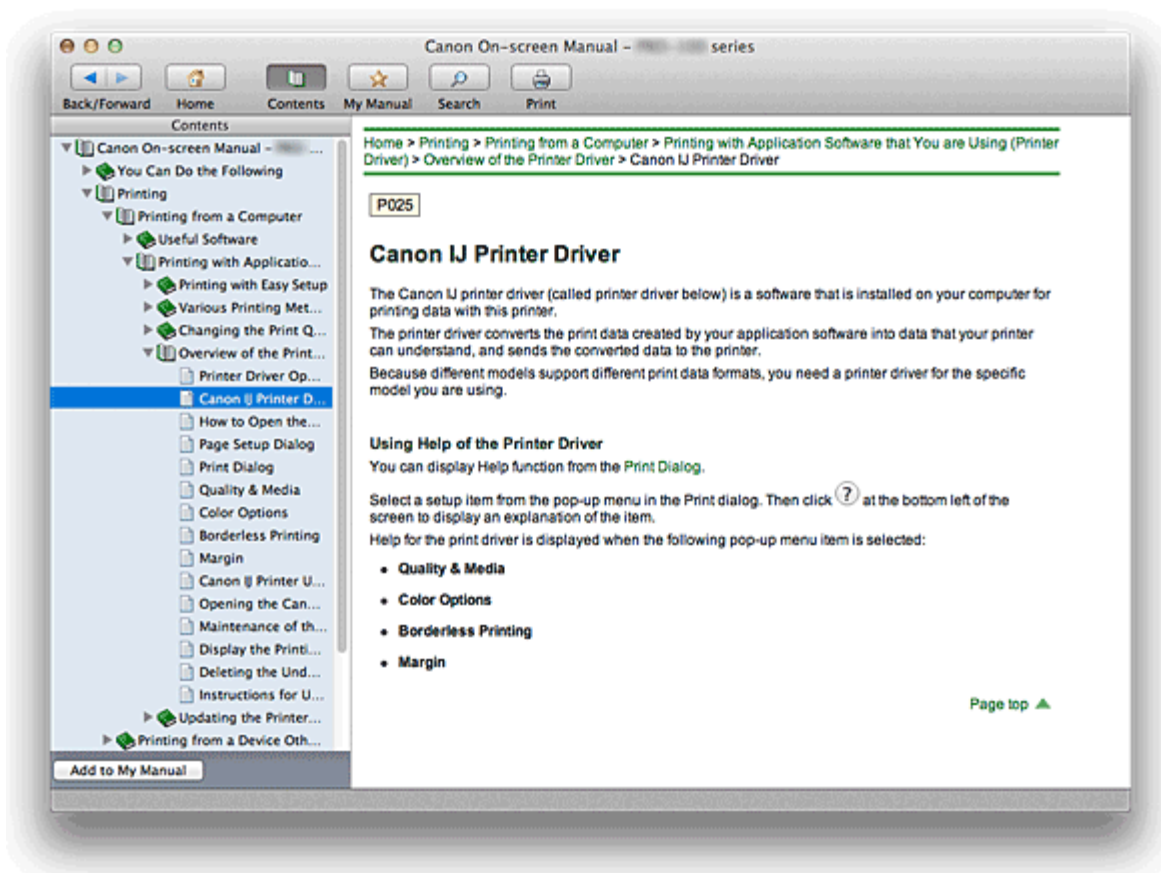

On-screen manuals operation

(1) Click  **Back/Forward** to return to the previously displayed explanation window or to advance the explanation window that was redisplayed.

(2) Click  **Home** to display the top page of the on-screen manual in the explanation window.

Content window operation

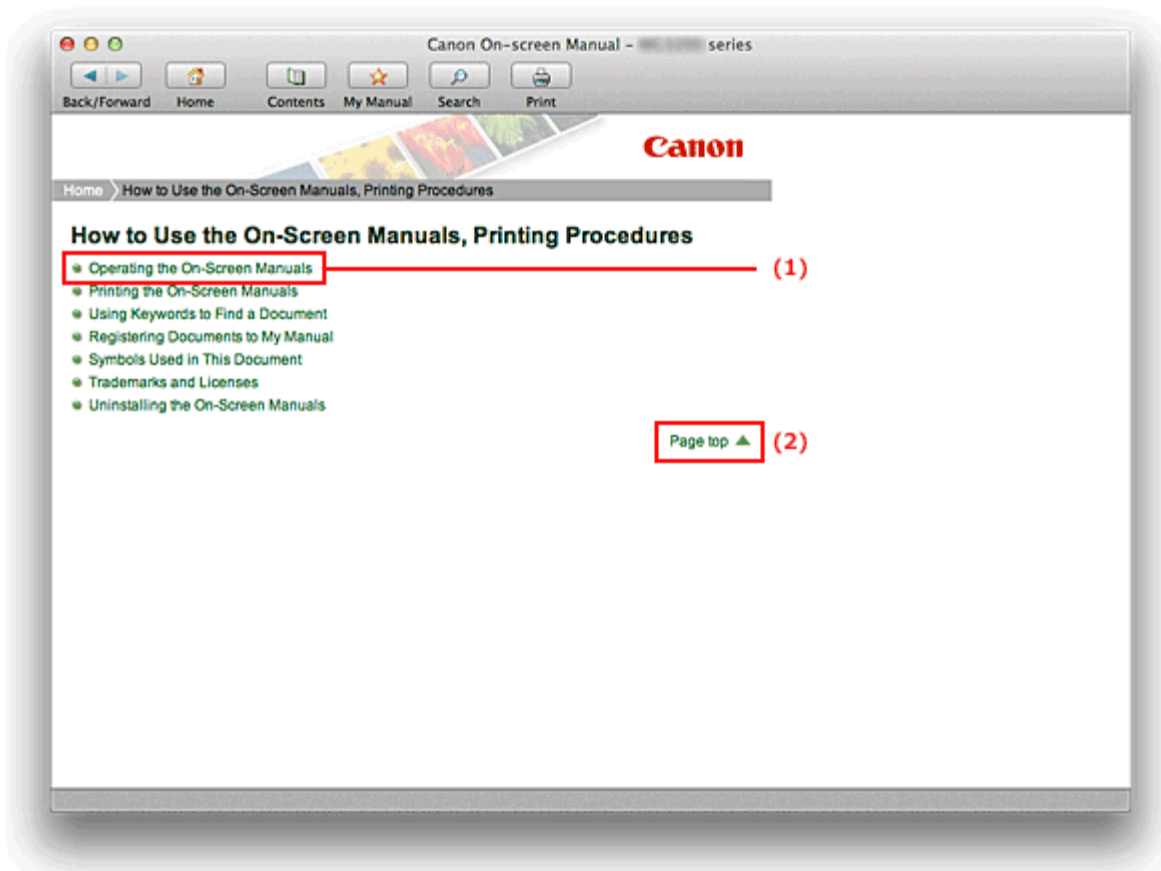

When you click a document title displayed in the contents pane found to the left of the on-screen manual, the documents of that title are displayed in the explanation window on the right side.

When you click ► found to the left of , the document titles found in the lower hierarchies are displayed.

Note

- Click  **Contents** to close or display the contents pane.

Explanation Window

(1) Click the green characters to jump to the corresponding document.

(2) The cursor jumps to the top of this document.

Window Used in Operation Explanation

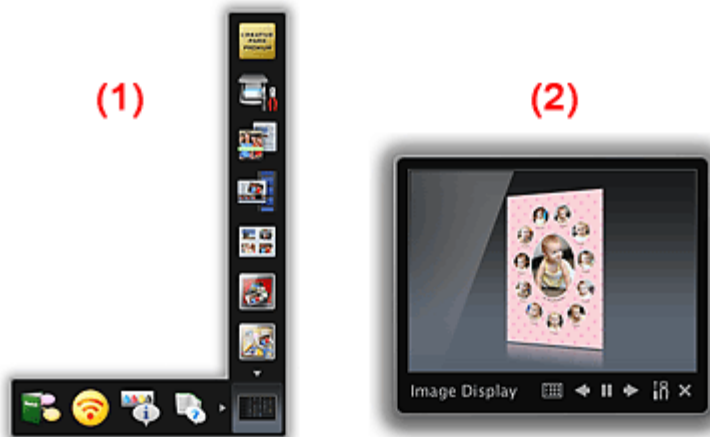

This on-screen manual describes with a window displayed when the Mac OS X v10.7 is used.

Page top ▲

Test Print

This printer is now ready for printing.

Quick Menu for smooth access to Canon's web service and to various functions for photo printing and video printing.

(1) Shortcut Menu

(2) Image Display

To start Quick Menu, click the icon found in Dock.

*If Quick Menu is installed and the shortcut icon is not registered into Dock, an icon will not be displayed.

When you click the  (CREATIVE PARK PREMIUM) icon on the shortcut menu, My Image Garden opens. You can then download artworks of famous artists and print them for various uses.

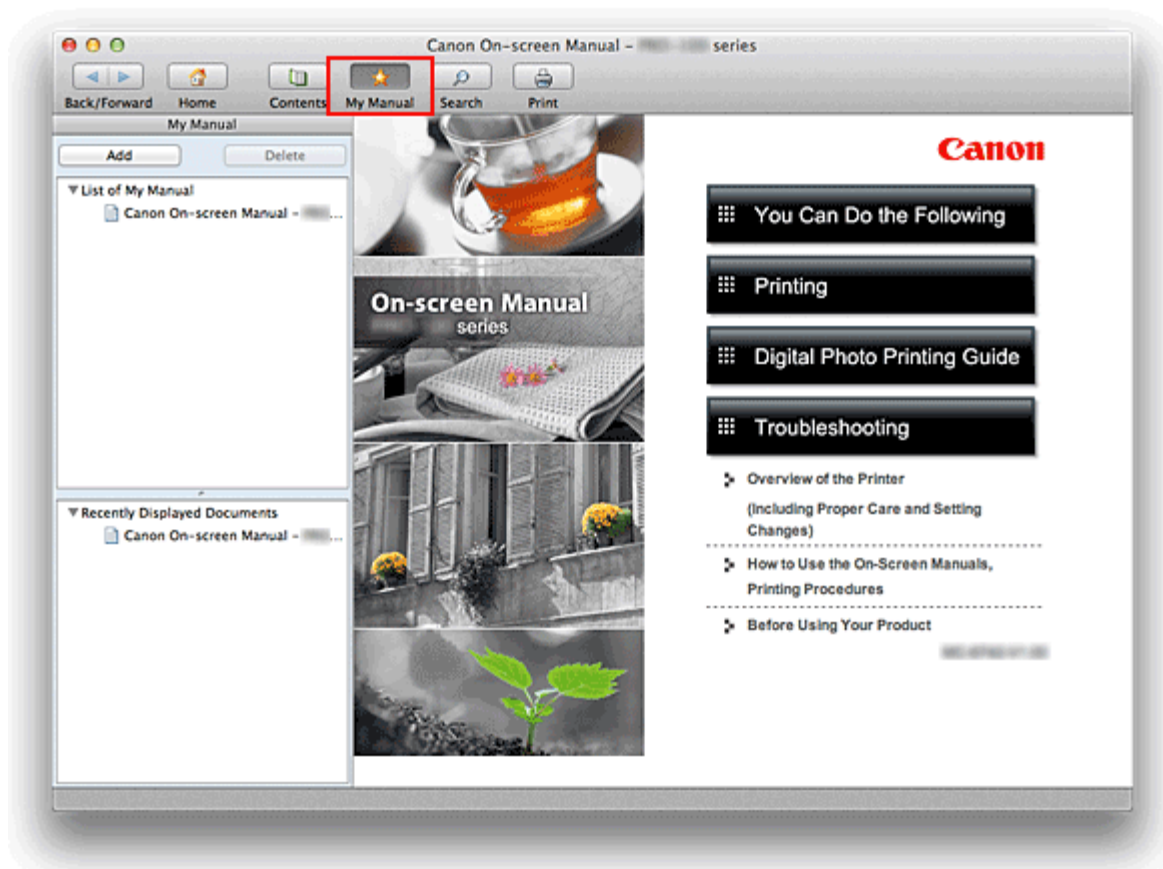

*CREATIVE PARK PREMIUM is a premium content service available exclusively to customers who use genuine Canon ink for all colors. To use this service, you must have My Image Garden installed on your computer.

When My Image Garden is installed, Image Display also opens.

Image Display displays a slide show of artwork images that were created automatically by the recommended artwork functions of My Image Garden, as well as other images saved on your computer.

Registering Documents to My Manual

Register frequently read documents as My Manual documents so that you can refer to those documents easily at any time.

1. Display the document

Display the document to be added to My Manual.

2. Click **My Manual**

The My Manual pane is displayed to the left of the on-screen manual.

Note

- Click  **My Manual** to close or display the My Manual pane.

3. Register the document to My Manual

Click **Add**.

The title of the currently displayed document is added to **List of My Manual**.

Note

- You can also add documents to My Manual by the following methods. If you add a document to My Manual, a  mark is displayed in the document icons in the contents pane.
 - From the **Recently Displayed Documents** list, double-click the document title that you want to add to My Manual or select the document title and press the Return key or Enter key to display the title, and then click **Add**.
 - Click  **Contents**, and while holding down the Control key, click a document title

displayed in the contents pane or click the explanation window. Then click **Add to My Manual** displayed in the shortcut menu.

- In the contents pane, select the document title that you want to add to My Manual, and then click **Add to My Manual** at the bottom left of the contents pane.
-

4. Display My Manual

When you double-click a document title displayed in **List of My Manual** or select a document title and press the Return key or Enter key, that document is displayed in the explanation window.

Note

- To delete a document from **List of My Manual**, select that document title from the list, and then click **Delete** (or press Delete key).

Printing the On-Screen Manuals

Click  **Print** to display the print pane to the left of the on-screen manual.

Note

- Click  **Print** to close or display the print pane.

The following four methods of printing are available:

- [Print Current Document](#)
- [Print Selected Documents](#)
- [Print My Manual](#)
- [Print All Documents](#)

Print Current Document

You can print the currently displayed document.

1. From **Select Target**, select **Current Document**

The title of the currently displayed document is displayed in the **Documents to Be Printed** list.

Note

- By selecting **Print linked documents**, you can also print documents that are linked to the current document. The linked documents are added to the **Documents to Be Printed** list.
- Click **Print Preview** to display and check what the print results will look like before you actually print the document.

2. Click **Start Printing**

A message confirming the number of print pages is displayed.

After you confirm the number of pages to be printed, and click **Yes**, a print dialog is displayed.

3. Execute print

Specify the necessary items, and click **Print**.

The documents that are currently displayed are printed.

Print Selected Documents

You can select and print the documents that you want to print.

1. From **Select Target**, select **Selected Documents**

The titles of all documents are displayed in the **Documents to Be Printed** list.

2. Select the documents to be printed

From the **Documents to Be Printed** list, select and check the title check boxes of the documents to be printed.

Note

- When you select the **Automatically select documents in lower hierarchies.** check box, the check boxes of all document titles found in the lower hierarchies are selected.
- Click **Select All** to select the check boxes of all document titles.
Click **Clear All** to clear the check boxes of all document titles.
- Click **Print Preview** to display and check what the print results will look like before you actually print the document.

3. Click **Start Printing**

A message confirming the number of print pages is displayed.

After you confirm the number of pages to be printed, and click **Yes**, a print dialog is displayed.

4. Execute print

Specify the necessary items, and click **Print**.

All documents with selected check boxes are printed.

Print My Manual

You can select and print documents registered in My Manual.

For details about My Manual, see "[Registering Documents to My Manual.](#)"

1. From **Select Target**, select **My Manual**

The titles of the documents that have been registered to My Manual are displayed in the **Documents to Be Printed** list.

2. Select the documents to be printed

From the **Documents to Be Printed** list, select and check the title check boxes of the documents to be printed.

Note

- Click **Select All** to select the check boxes of all document titles.

Click **Clear All** to clear the check boxes of all document titles.

- Click **Print Preview** to display and check what the print results will look like before you actually print the document.
-

3. Click **Start Printing**

A message confirming the number of print pages is displayed.

After you confirm the number of pages to be printed, and click **Yes**, a print dialog is displayed.

4. Execute print

Specify the necessary items, and click **Print**.

All documents with selected check boxes are printed.

Print All Documents

You can print all documents of the on-screen manual.

1. From **Select Target**, select **All Documents**

The titles of all documents are displayed in the **Documents to Be Printed** list, and the check boxes are automatically selected.

Note

- When you uncheck the check box of a document title, that document is not printed.
 - Click **Select All** to select the check boxes of all document titles.
Click **Clear All** to clear the check boxes of all document titles.
 - Click **Print Preview** to display and check what the print results will look like before you actually print the document.
-

2. Click **Start Printing**

A message confirming the number of print pages is displayed.

After you confirm the number of pages to be printed, and click **Yes**, a print dialog is displayed.

3. Execute print

Specify the necessary items, and click **Print**.

All documents are printed.

Important

- A large amount of paper is necessary to print all documents. Before printing, be sure to check the number of print pages displayed in the message.

SUCH DAMAGE.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement,

then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 1. You must give any other recipients of the Work or Derivative Works a copy of this License; and
 2. You must cause any modified files to carry prominent notices stating that You changed the files; and
 3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Using Keywords to Find a Document

You can enter a keyword to search for a target document.

All documents in the currently displayed on-screen manual are searched.

1. Click **Search**

The search pane is displayed to the left of the on-screen manual.

Note

- Click  **Search** to close or display the search pane.

2. Enter a keyword

In **Keyword**, enter a keyword for the item to be checked.

When you want to enter multiple keywords, insert a space between the keywords.

Note

- You can enter up to 10 search keywords or up to 255 characters.
- Uppercase and lowercase are not distinguished.
- The program can also search for keywords that contain spaces.
- A convenient way of quickly finding a document to be read is to enter keywords as described below.
 - To learn how to operate a function you are using:
Enter names such as the menu name displayed on the computer (for example, Contrast).
 - To find an explanation of the operation for a specific purpose:
Enter function + item to be printed (for example, print photo).

3. Click **Start Searching**

The search is started, and the titles of documents containing the keyword are displayed in the search results list.

When you execute a search by entering multiple keywords, the search results are displayed as shown below.

Documents Containing Perfect Match

Documents containing the entire search character string (including spaces) exactly as entered (perfect match)

Documents Containing All Keywords

Documents containing all keywords that were entered

Documents Containing Any Keyword

Documents containing at least one of the keywords that were entered

4. Display the document that you want to read

From the search results list, double-click the title of the document you want to read or select the title and press the Return key or Enter key.

When the documents of that title are displayed, the keywords found on those documents are highlighted.

Note

- The search history remains when you modify the keyword entry and perform search multiple times. To delete the search history, click  located at the left of **Keyword**, and select **Clear History**, which is displayed.

Useful Functions Available on the Machine

The following useful functions are available on the machine.

Enjoy even more pleasant photography experience by utilizing various functions.

- Print Photos Easily
- Download Content Materials
- Print without a Computer

Print Photos Easily Using an Application

- **Organize Images Easily**

In My Image Garden, you can register the names of people and events to photos.

You can organize photos easily as you can display them not only by folder but also by calendar, event and person. This also allows you to find the target photos easily when you search for them later on.

<Calendar View>

<People View>

- **Display Recommended Items in Slide Shows**

Based on the information registered to photos, Quick Menu automatically selects the photos on your computer and creates recommended items such as collages and cards. The created items appear in slide shows.

If there is an item you like, you can easily print it in just two steps.

STEP1 In Image Display of Quick Menu, select the item you want to print.

STEP2 Print the item with My Image Garden.

- **Place Photos Automatically**

Delightful items are created easily as the selected photos are placed automatically according to the theme.

- **Other Various Functions**

My Image Garden has many other useful functions.
See *My Image Garden Guide* for details.

Download a Variety of Content Materials

- **CREATIVE PARK**

A "printing materials site" where you can download all the printing materials for free.
Various types of content such as seasonal cards and paper crafts that can be made by assembling paper parts are provided.
It is easily accessible from Quick Menu.

- **CREATIVE PARK PREMIUM**

A service where customers using models that support PREMIUM Contents can download exclusive printing materials.
PREMIUM Contents can be downloaded easily via My Image Garden. Downloaded PREMIUM Contents can be printed directly with My Image Garden.
To print downloaded PREMIUM Contents, make sure that genuine Canon ink tanks/ink cartridges are installed for all colors on a supported printer.

- The designs of PREMIUM Contents provided in this page are subject to change without prior notice.
-

Print Easily without a Computer

You can directly print files saved on smartphones without using a computer.

- **Print Easily from a Smartphone**

Use Easy-PhotoPrint (for iPhone/Android) to easily print photos saved on a smartphone wirelessly.

You can also receive scanned data (PDF or JPEG) directly on a smartphone without using a computer.

Easy-PhotoPrint can be downloaded from App Store and Google Play.

Note

- See the corresponding page of *On-screen Manual* for details on each function.
-

Page top ▲

A001

Useful Software

The following useful software can be used with the machine.

- [My Image Garden](#)
- [Print Studio Pro](#)
- [Quick Menu](#)

My Image Garden

My Image Garden is an application that allows you to utilize photos taken with digital cameras and other images saved on your computer, in many ways for various purposes. You can organize a vast number of images easily, or create collages, cards and other items from your favorite photos and print them. Moreover, you can perform various scans with one click.

➤ [My Image Garden Guide](#)

Print Studio Pro

Print Studio Pro is a plug-in that makes professional photo printing easier and more convenient.

In addition to printing bordered photos and borderless photos, you can perform various printing tasks such as index printing, grayscale printing and printing using ICC profiles. You can also adjust the margins or add text.

Quick Menu

Quick Menu is software that allows you to easily start the applications and manuals supplied with the machine, or quickly access online product information. In addition, with simultaneously installed Image Display, you can enjoy patterns of collages and other items created automatically by the item recommendation function of My Image Garden as well as slide shows of images saved on a computer.

Note

- By default, Quick Menu starts automatically when you start up the computer.
- From the **Go** menu of **Finder**, select **Applications**, then double-click the **Canon Utilities** folder, **Quick Menu** folder, then **Canon Quick Menu** icon to start Quick Menu.
- If Image Display does not appear even when Quick Menu is started, click the  (Start Image Display) icon. If My Image Garden is not installed, the application will be downloaded and installed. Internet connection is required to download the software. Internet connection fees apply.
- The computer must be connected to the Internet to access the website for useful information, etc. Internet connection fees apply.
- See Help of Quick Menu for details on Quick Menu.
To display Help, control-click Quick Menu and select **Help** from the displayed menu.
- To use the item recommendation function of My Image Garden, you need to register information beforehand. See the My Image Garden manual for details.

A002

Useful Software

The following useful software can be used with the machine.

- My Image Garden
- Print Studio Pro
- Quick Menu

My Image Garden

My Image Garden is an application that allows you to utilize photos taken with digital cameras and other images saved on your computer, in many ways for various purposes. You can organize a vast number of images easily, or create collages, cards and other items from your favorite photos and print them. Moreover, you can perform various scans with one click.

➡ [My Image Garden Guide](#)

Print Studio Pro

Print Studio Pro is a plug-in that makes professional photo printing easier and more convenient.

In addition to printing bordered photos and borderless photos, you can perform various printing tasks such as index printing, grayscale printing and printing using ICC profiles. You can also adjust the margins or add text.

Quick Menu

Quick Menu is software that allows you to easily start the applications and manuals supplied with the machine, or quickly access online product information. In addition, with simultaneously installed Image Display, you can enjoy patterns of collages and other items created automatically by the item recommendation function of My Image Garden as well as slide shows of images saved on a computer.

Note

- By default, Quick Menu starts automatically when you start up the computer.
- From the **Go** menu of **Finder**, select **Applications**, then double-click the **Canon Utilities** folder, **Quick Menu** folder, then **Canon Quick Menu** icon to start Quick Menu.
- If Image Display does not appear even when Quick Menu is started, click the  (Start Image Display) icon. If My Image Garden is not installed, the application will be downloaded and installed. Internet connection is required to download the software. Internet connection fees apply.
- The computer must be connected to the Internet to access the website for useful information, etc. Internet connection fees apply.
- See Help of Quick Menu for details on Quick Menu.
To display Help, control-click Quick Menu and select **Help** from the displayed menu.
- To use the item recommendation function of My Image Garden, you need to register information beforehand. See the My Image Garden manual for details.

Useful Information about Ink

How is ink used for various purposes other than printing?

Ink may be used for purposes other than printing. Ink is not only used for printing, but also for cleaning the print head to maintain the optimal printing quality.

The printer has the function to automatically clean the ink jet nozzles to prevent clogging. In the cleaning procedure, ink is pumped out from the nozzles. Used ink for nozzle cleaning is limited to a small amount.

Does black-and-white printing use color ink?

Black-and-white printing may use ink other than black ink depending on the type of printing paper or the settings of the printer driver. So, color ink is consumed even when printing in black-and-white.

The ink lamp indicates when ink is running low

The ink lamp flashes to indicate that the ink is running low.

➡ [Checking the Ink Status with the Ink Lamps](#)

Note

- The printer uses pigment ink. Due to the nature of the pigment ink, the ink on the printed surface may be removed when being rubbed or scratched.

Key Points to Successful Printing

Check the printer status before printing!

- Is the print head OK?

If a print head nozzle is clogged, print will be faint and papers will be wasted. Print the nozzle check pattern to check the print head.

➡ [Maintenance Procedure](#)

- Is the inside of the printer smeared with ink?

After printing large quantities of paper or performing borderless printing, the area where papers go through may get smeared with ink. Clean the inside of your printer with Bottom Plate Cleaning.

➡ [Cleaning Inside the Printer](#)

Check how to load the paper correctly!

- Is the paper loaded in the correct orientation?

To load paper in the rear tray or manual feed tray, load paper WITH THE PRINT SIDE FACING YOU.

➡ [Loading Paper](#)

(A)

(B)

(A) rear tray

(B) manual feed tray

- Is the paper loaded in the proper paper source?

Load paper either in the rear tray or in the manual feed tray, depending on the size or thickness of paper.

(C)

(D)

(C) Load two or more sheets of paper at a time.

(D) Load one sheet of large size paper, such as 14" x 17" (36 x 43 cm), or thick paper at a time.

- Is the paper curled?

The curled paper causes paper jam. Flatten the curled paper, then reload it.

➡ "Load the paper after correcting its curl." in [Paper Is Smudged/Printed Surface Is Scratched](#)

[Page top ▲](#)

Be Sure to Make Paper Settings after Loading Paper

If the media type setting is not the one for the loaded paper, printing results may not be satisfactory. After loading paper, be sure to select the appropriate media type setting for the loaded paper.

➡ [Print Results Not Satisfactory](#)

There are various types of paper: paper with special coating on the surface for printing photos with optimal quality and paper suitable for documents.

Each media type has specific preset settings, such as how ink is used and sprayed, distance from nozzles, etc., so that you can print on that type with optimal image quality.

This allows you to print with the settings best suited for the loaded media type just by selecting that media type.

[Page top](#) ▲

Canceling a Print Job

Never press the ON button!

If you press the **ON** button while printing is in progress, the print data sent from the computer queues in the printer and you may not be able to continue to print.

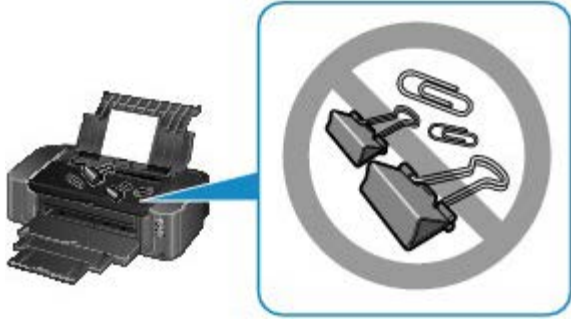

Press the **RESUME/CANCEL** button to cancel printing.

[Page top ▲](#)

Printer Handling Precautions

Do not place any object on the top cover!

Do not place any object on the top cover. It will fall into the rear tray when the top cover is opened and cause the printer to malfunction. Also, place the printer where objects will not fall on it.

[Page top](#) ▲

Key to Enjoying Consistent Printing Quality

The key to printing with the optimal printing quality is to prevent the print head from drying or clogging. Always observe the following rules for optimal printing quality.

Never disconnect the power plug until the power is turned off!

If you press the **ON** button to turn off the power, the printer caps the print head (nozzles) automatically to prevent from drying. If you disconnect the power plug from the wall outlet before the **POWER** lamp is turned off, the print head will not be capped properly and this will cause drying or clogging.

When disconnecting the power plug, make sure that the **POWER** lamp is not lit.

➡ Notice for Unplugging the Power Cord

Print periodically!

Just as the tip of a felt pen becomes dry and unusable if it has not been used for a long time, even if it is capped, the print head too, may become dried or clogged if the printer has not been used for a long time. We recommend you to use the printer at least once a month.

Ink is mixed at fixed intervals.

The printer is set to automatically mix the ink to maintain optimal printing quality. Therefore, printing on a regular basis helps keep the ink in good condition. If the printer is not used for an extended period of time, the printer will automatically mix the ink when the power is turned on.

However, if the function of automatic ink mixing is disabled or the colors on the printout become uneven, mix the ink manually.

➡ Maintaining the Ink Quality

Note

- Depending on the type of paper, ink may blur if you trace the printed area with a highlight pen or paint-stick, or bleed if water or sweat comes in contact with the printed area.

Precautions for Safe Transport of the Printer

When relocating the printer, make sure of the following.

Important

When sending the printer for repair

- Pack the printer in a sturdy box so that it is placed with its bottom facing down, using sufficient protective material to ensure safe transport.
- With the print head and ink tank left installed in the printer, press the **ON** button to turn off the power. This allows the printer to automatically cap the print head, thus preventing it from drying.
- After packing, do not tilt the box containing the printer or turn it on its side or upside down. Doing so may cause the ink to leak during transport and cause damage to the printer.
- When a shipping agent is handling transport of the printer, have its box marked "THIS SIDE UP" to keep the printer with its bottom facing down. Mark also with "FRAGILE" or "HANDLE WITH CARE".

1. Turn the printer off.
2. Confirm that the **POWER** lamp is off and unplug the printer.

➡ Notice for Unplugging the Power Cord

Important

- Do not unplug the printer while the **POWER** lamp is lit or flashing white, as it may cause malfunction or damage to the printer, making the printer unable to print.

3. Retract the output tray extension, then close the paper output tray and the paper support gently.
4. Disconnect the printer cable from the computer and from the printer, then disconnect the power plug from the printer.
5. Use adhesive tape to secure all the covers on the printer to keep them from opening during transportation. Then pack the printer in the plastic bag.
6. Attach the protective material to the printer when packing the printer in the box.

Important

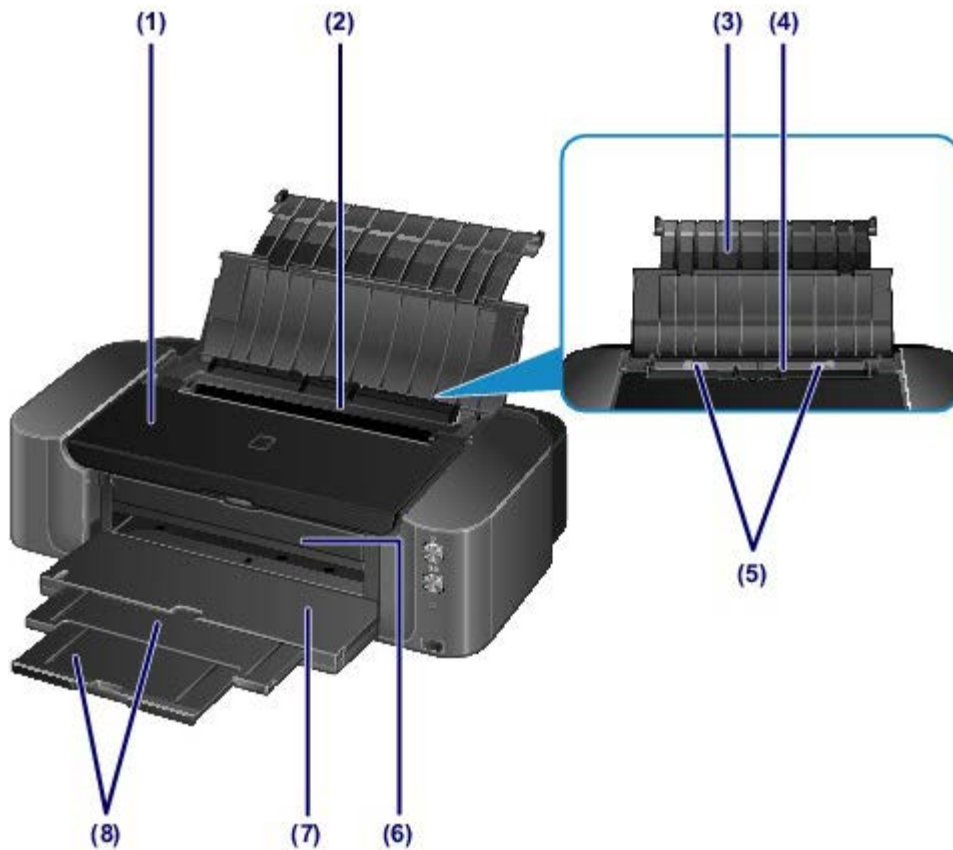

- When setting up the printer, always carry it with two people.

Main Components

- Front View
- Rear View
- Inside View

C001

Front View

(1) top cover

Open to replace an ink tank, check the ink lamp, or remove jammed paper inside the printer.

(2) feed slot cover

Prevents anything from falling into the feed slot.

Open it to slide the paper guides, and close it before printing.

(3) paper support

Open to load paper in the rear tray.

(4) rear tray

Load various sizes or types of paper which you can use on the printer. Two or more sheets of the same size and type of paper can be loaded at the same time, and fed automatically one sheet at a time.

➡ Loading Paper in the Rear Tray

(5) paper guides

Slide to align with both sides of the paper stack.

(6) inner cover

Open by pulling it out to attach the disc tray. Use when printing onto a printable disc. Keep closed for normal operation.

(7) paper output tray

Printed paper is ejected. Open it before printing.

(8) output tray extension

Pull out to support paper. Pull it out before printing.

* All buttons and lamps are shown lit in the above illustration for explanatory purposes.

(9) POWER lamp

Lights white after flashing when the power is turned on.

Note

POWER and Alarm lamps

- You can check the status of the printer by the **POWER** and **Alarm** lamps.
- **POWER** lamp is off: The power is off.
- **POWER** lamp lights white: The printer is ready to print.
- **POWER** lamp flashes white: The printer is getting ready to print, or printing is in progress.
- **Alarm** lamp flashes orange: An error has occurred and the printer is not ready to print.
- ➡ "Alarm Lamp Flashes Orange" in [Alarm Lamp Flashes Orange](#)
- **POWER** lamp flashes white and **Alarm** lamp flashes orange alternately: An error that requires contacting the service center may have occurred.
- ➡ "POWER Lamp Flashes and Alarm Lamp Flashes Orange Alternately" in [Alarm Lamp Flashes Orange](#)

(10) ON button

Press to turn the power on or off.

➡ [Turning the Printer On and Off](#)

(11) Alarm lamp

Lights or flashes orange when an error occurs, such as paper-out or ink-out.

(12) RESUME/CANCEL button

Press to cancel a print job in progress. You can press this button to release from printer error status and resume printing, after the printer problem is resolved.

(13) Wi-Fi button/Wi-Fi lamp

Hold down to automatically set up the wireless LAN connection.

Lights or flashes blue to indicate the wireless LAN status.

Lights:

Wireless LAN connection is enabled.

Flashes:

Printing over wireless LAN. While setting up the wireless LAN, the number of flashes indicates setup status.

(14) direct print port

Connect a PictBridge compliant device such as a digital camera to print directly.

➡ [Printing from a Device Other Than a Computer](#)

Warning

- Do not connect any equipment other than PictBridge compliant devices to the direct print port of the printer. This may cause fire, electric shock, or damage to the printer.
-

Important

- Do not touch the metal casing.
 - Do not use the USB cable longer than 10 feet (3 meters) to connect any PictBridge compliant device to the printer since it may affect the operation of other peripheral devices.
-

(15) disc tray storage compartment

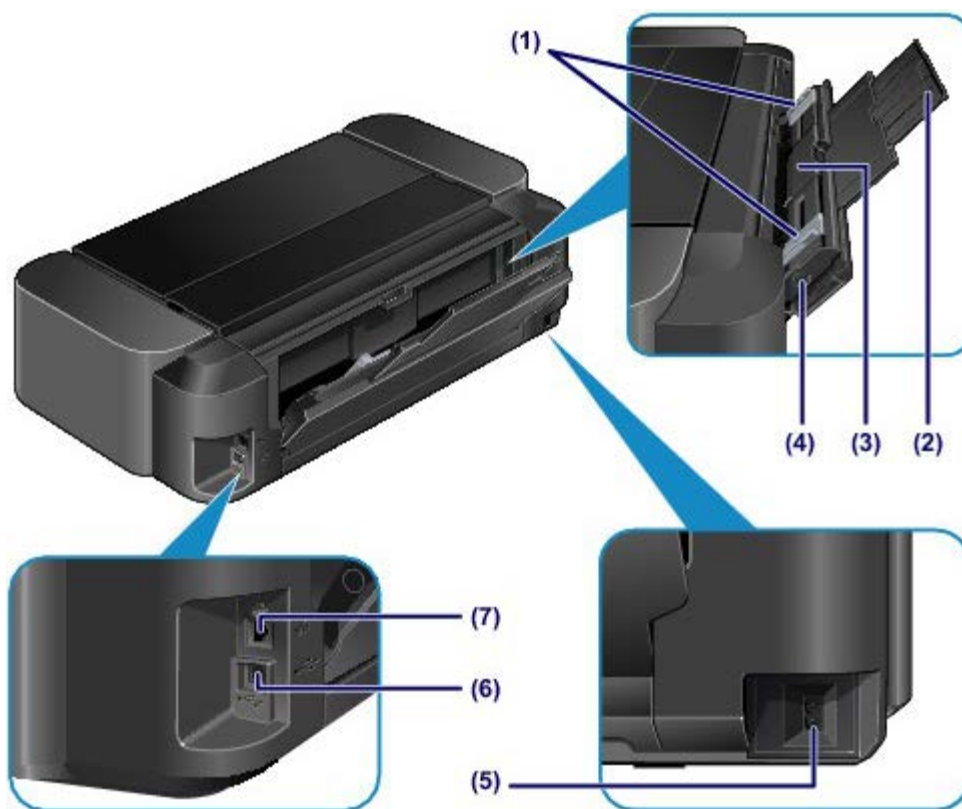

The disc tray supplied with the printer can be stored here.

➡ Storing the disc tray

Page top ▲

C002

Rear View

(1) paper guides

Slide to align with both sides of the paper stack.

(2) paper support

Open and pull out to load paper in the manual feed tray.

(3) manual feed tray

Load a sheet of large size paper, such as 14" x 17" (36 x 43 cm) paper, or thick paper.

➡ [Loading Paper in the Manual Feed Tray](#)

➡ [Media Types You Can Use](#)

(4) Paper Jam Clearing button

Press this button to remove paper jammed in the manual feed tray.

➡ [Paper Jams](#)

(5) power cord connector

Plug in the supplied power cord.

(6) USB port

Plug in the USB cable to connect the printer with a computer.

(7) wired LAN connector

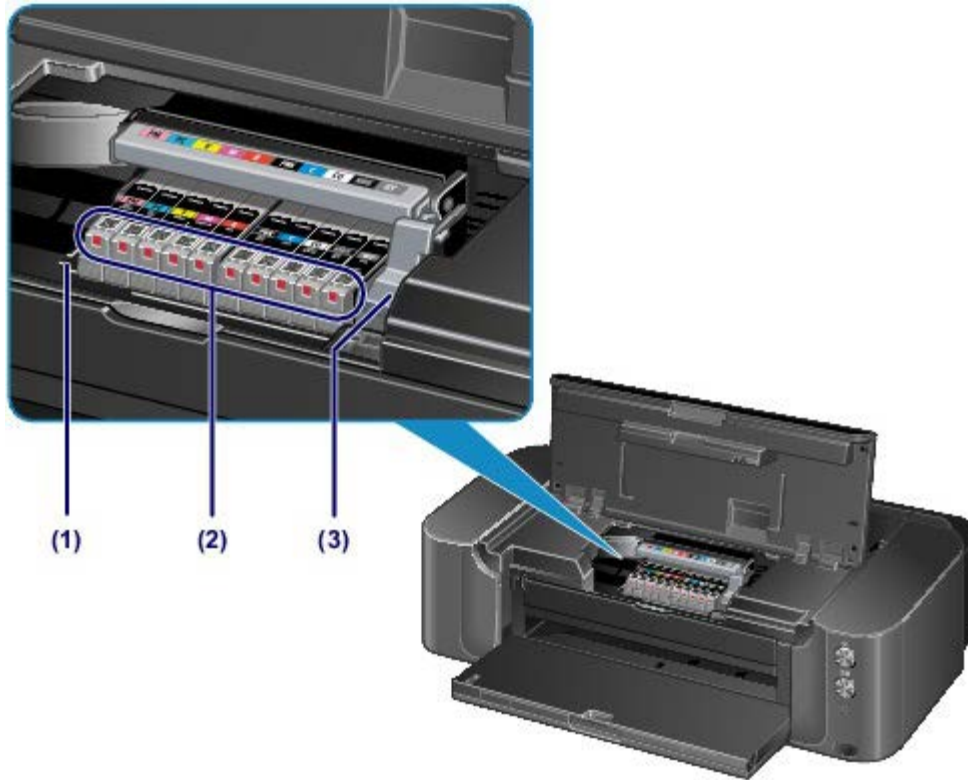

Plug in the LAN cable to connect the printer to a LAN.

▶ Important

- Do not touch the metal casing.
- Do not plug in or unplug the USB cable or LAN cable while printing.

C011

Inside View

(1) print head holder

Install the print head.

- [Turning the Printer On and Off](#)
- [Notice for the Power Plug/Power Cord](#)
- [Notice for Unplugging the Power Cord](#)

[Page top ▲](#)

D015

Confirming that the Power Is On

The **POWER** lamp is lit white when the printer is turned on.

Note

- It may take a while for the printer to start printing immediately after you turn on the printer.

D016

Turning the Printer On and Off

Turning on the printer

1. Press the **ON** button to turn on the printer.

The **POWER** lamp flashes and then remains lit white.

➡ Confirming that the Power Is On

Note

- It may take a while for the printer to start printing immediately after you turn on the printer.
- When the power is turned on, the printer may start mixing the ink to maintain optimal ink quality (about 30 seconds to 3 minutes).
 - ➡ Ink is mixed at fixed intervals.
- If the **Alarm** lamp flashes orange, see [Alarm Lamp Flashes Orange](#).

Turning off the printer

1. Press the **ON** button to turn off the printer.

When the **POWER** lamp stops flashing, the printer is turned off.

Important

- When you unplug the power cord after turning off the printer, be sure to confirm that the **POWER** lamp is off.
 - ➡ Notice for Unplugging the Power Cord

Note

Auto power off feature

- You can set the printer to automatically turn off when no print jobs are sent to the printer for a certain interval. This is the default setting.

For details on how to change the auto power off setting, see below.

[➡ Managing the Printer Power](#)

Page top ▲

D017

Notice for the Power Plug/Power Cord

Unplug the power cord once a month to confirm that the power plug/power cord does not have anything unusual described below.

- The power plug/power cord is hot.
- The power plug/power cord is rusty.
- The power plug/power cord is bent.
- The power plug/power cord is worn.
- The power plug/power cord is split.

Caution

- If you find anything unusual with the power plug/power cord described above, unplug the power cord and call for service. Using the printer with one of the unusual conditions above may cause a fire or an electric shock.

➡ [Notice for Unplugging the Power Cord](#)

C102

Aligning the Print Head

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

Note

- You can also adjust the print head position using the computer.
➡ [Aligning the Print Head Position from Your Computer](#)
- If the remaining ink level is low, the print head alignment sheet will not be printed correctly. Replace the ink tank whose ink is low.
➡ [Replacing an Ink Tank](#)

You need to prepare: two sheets of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Load two sheets of A4 or Letter-sized plain paper in the rear tray.

Important

- The manual feed tray is not available for the print head alignment procedure. Be sure to load paper in the rear tray.

3. Open the paper output tray gently, then pull out the output tray extension.

Important

- If the inner cover is open, close it.

4. Hold down the **RESUME/CANCEL** button until the **POWER** lamp flashes white four times, then release it immediately.

The print head alignment sheet will be printed and the print head position will be adjusted automatically.

Do not perform any other operations until the printer completes the printing of the print head alignment sheet. This takes about 5 to 6 minutes.

Note

- If the automatic adjustment of the print head position has failed, the **Alarm** lamp flashes.
➡ "Eleven flashes:" in [Alarm Lamp Flashes Orange](#)
- If the print results are still not satisfactory after adjusting the print head position as described above, adjust the print head position manually from the computer.
➡ [Aligning the Print Head Position Manually from Your Computer](#)

Legal Limitations on Use of Your Product and Use of Images

It may be unlawful to print the following documents.

The list provided is non-exhaustive. When in doubt, check with a legal representative in your jurisdiction.

- Paper money
- Money orders
- Certificates of deposit
- Postage stamps (canceled or uncanceled)
- Identifying badges or insignias
- Selective service or draft papers
- Checks or drafts issued by governmental agencies
- Motor vehicle licenses and certificates of title
- Traveler's checks
- Food stamps
- Passports
- Immigration papers
- Internal revenue stamps (canceled or uncanceled)
- Bonds or other certificates of indebtedness
- Stock certificates
- Copyrighted works/works of art without permission of copyright owner

C014

Paper Sources to Load Paper

The printer has two paper sources for feeding paper, the rear tray and manual feed tray.

The paper source used depends on the page size and media type.

➡ [Media Types You Can Use](#)

Note

- When printing, select the correct page size, media type, and paper source. If you select the wrong page size or media type, the printer may not print with the proper print quality. For details on how to load paper in each paper source, see below.

➡ [Loading Paper in the Rear Tray](#)

➡ [Loading Paper in the Manual Feed Tray](#)

Loading Two or More Sheets of Paper in the rear tray

When printing on paper from the sizes 4" x 6" (10 x 15 cm) to 10" x 12" (25 x 30 cm) or A3+, load them in the rear tray. Two or more sheets of the same size and media type can be loaded at a time, allowing you to print continuously. (Some page sizes or media types can be loaded only one sheet at a time.)

Select a page size, media type, paper source, etc. in the printer driver setting when printing.

Loading One Sheet of Large Size Paper or Thick Paper in the manual feed tray

When printing on large size paper such as 14" x 17" (36 x 43 cm) paper, or thick paper such as art paper, load it in the manual feed tray.

Select a page size, media type, paper source, etc. in the printer driver setting when printing.

The manual feed tray does not accept plain paper. When printing on plain paper, load it in the rear tray.

[Page top ▲](#)

C021

Loading Paper in the Rear Tray

You can load A3+, A3, B4, A4, B5, A5, Letter, Legal, 11" x 17" (279.4 x 431.8 mm), 4" x 6" (10 x 15 cm), 5" x 7" (13 x 18 cm), 8" x 10" (20 x 25 cm), and 10" x 12" (25 x 30 cm) sizes of paper in the rear tray.

Important

- If you cut plain paper into small size such as 4" x 6" (10 x 15 cm) or 5" x 7" (13 x 18 cm) to perform trial print, it can cause paper jams.

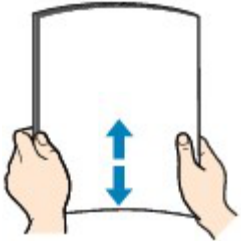

Note

- We recommend Canon genuine photo paper for printing photos.
For details on the Canon genuine paper, see [Media Types You Can Use](#).
- You can use general copy paper.
For the page size and paper weight you can use for this printer, see [Media Types You Can Use](#).

1. Prepare paper.

Align the edges of paper. If paper is curled, flatten it.

Note

- Align the edges of paper neatly before loading. Loading paper without aligning the edges may cause paper jams.
- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.
For details on how to flatten curled paper, see "Load the paper after correcting its curl." in [Paper Is Smudged/Printed Surface Is Scratched](#).
- When using Photo Paper Plus Semi-gloss SG-201, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

2. Load paper.

(1) Open the paper support of the rear tray.

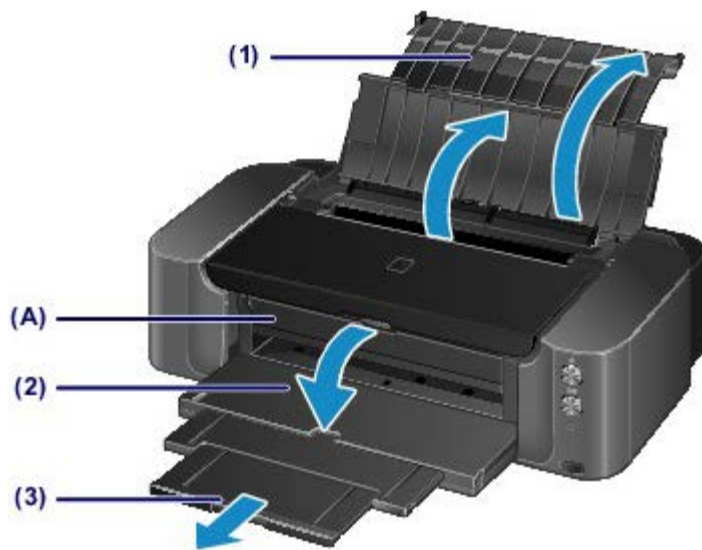

(2) Open the paper output tray gently.

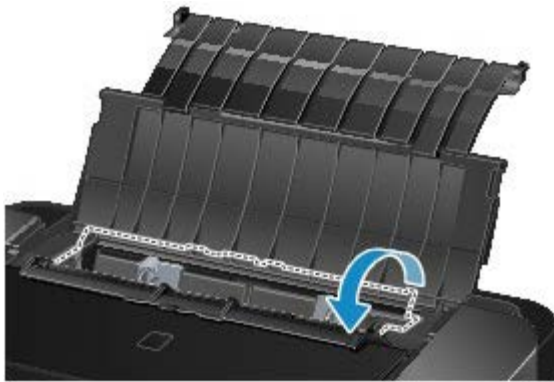

Important

- If the inner cover (A) is open, close it.

(3) Pull out the output tray extension.

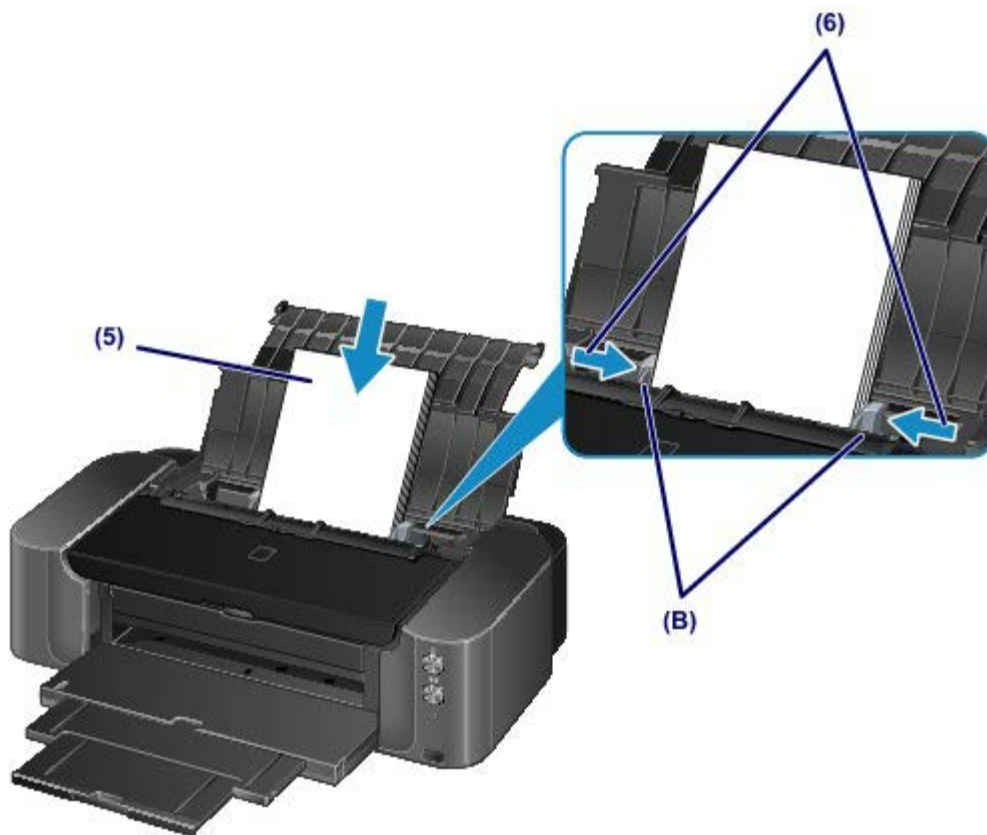

(4) Open the feed slot cover.

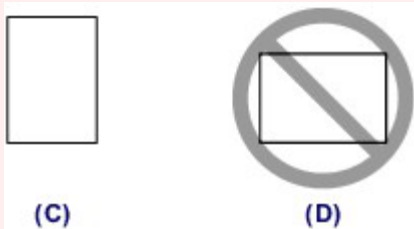

(5) Slide the paper guides (B) to open them, and load the paper in the center of the rear tray WITH THE PRINT SIDE FACING YOU.

(6) Slide the paper guides (B) to align them with both sides of the paper stack.
Do not slide the paper guides too hard against the paper. The paper may not be fed properly.

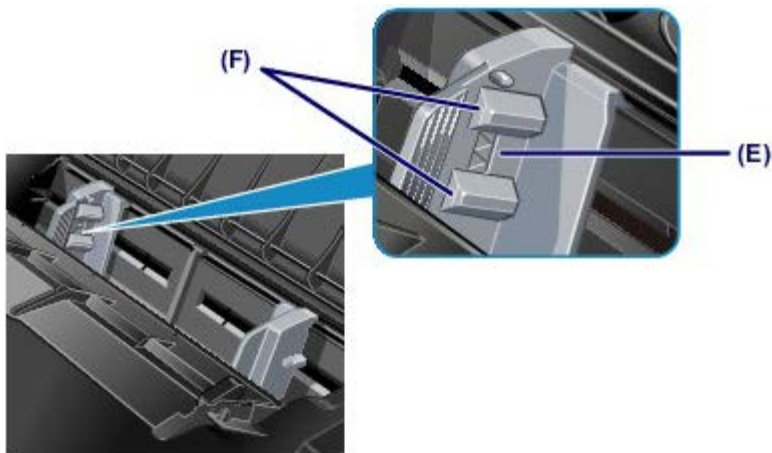

Important

- Always load paper in the portrait orientation (C). Loading paper in the landscape orientation (D) can cause paper jams.

Note

- Do not load sheets of paper higher than the load limit mark (E).
- The raised parts (F) on the paper guides retract depending on the size of the loaded paper. Do not push these parts down with your finger.

(7) Close the feed slot cover gently.

Note

- If the feed slot cover is open, paper cannot be fed. Be sure to close the feed slot cover.

Note

After loading paper

- Select the rear tray for the paper source and the size and type of the loaded paper on the print settings screen of the printer driver.

C022

Loading Paper in the Manual Feed Tray

You can load A3+, A3, B4, A4, Letter, Legal, 11" x 17" (279.4 x 431.8 mm), 8" x 10" (20 x 25 cm), 10" x 12" (25 x 30 cm), and 14" x 17" (36 x 43 cm) sizes of paper in the manual feed tray.

Note

- We recommend Canon genuine photo paper for printing photos.
For details on the Canon genuine paper, see [Media Types You Can Use](#).
- The manual feed tray does not accept plain paper. When printing on plain paper, load it in the rear tray.
- When printing on paper other than 14" x 17" (36 x 43 cm) size from a PictBridge compliant device, load paper in the rear tray.
➡ [Printing from a Device Other Than a Computer](#)

1. Prepare paper.

If paper is curled, flatten it.

Note

- If paper is curled, hold the curled corners and gently bend them in the opposite direction until the paper becomes completely flat.
For details on how to flatten curled paper, see "Load the paper after correcting its curl." in [Paper Is Smudged/Printed Surface Is Scratched](#).
- When using Photo Paper Plus Semi-gloss SG-201, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

2. Load paper.

(1) Open the paper support of the manual feed tray, and pull it out.

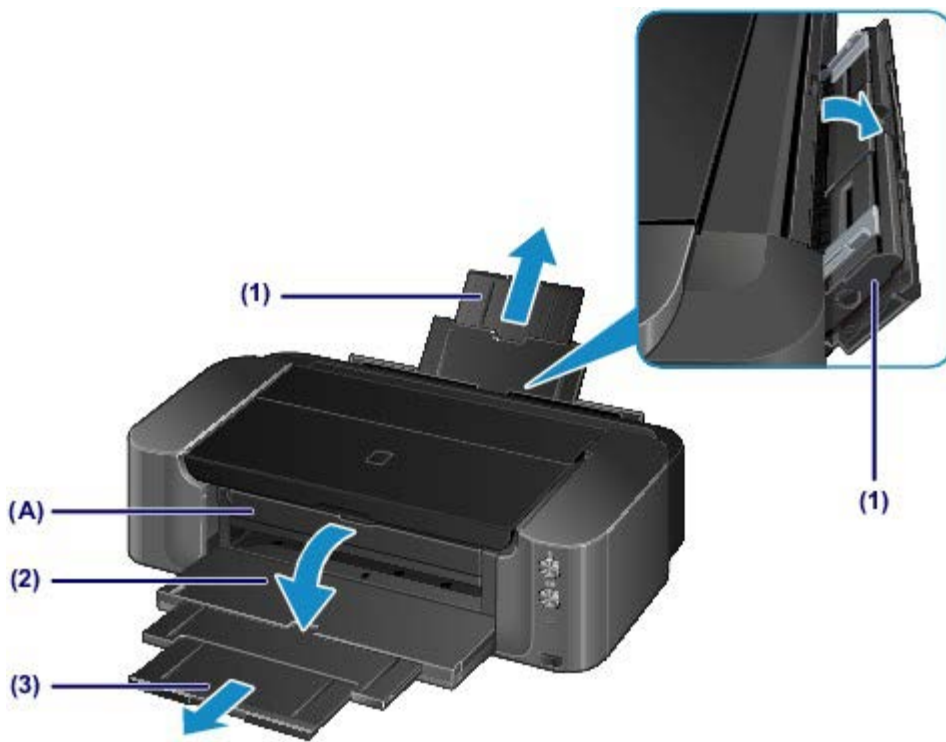

(2) Open the paper output tray gently.

Important

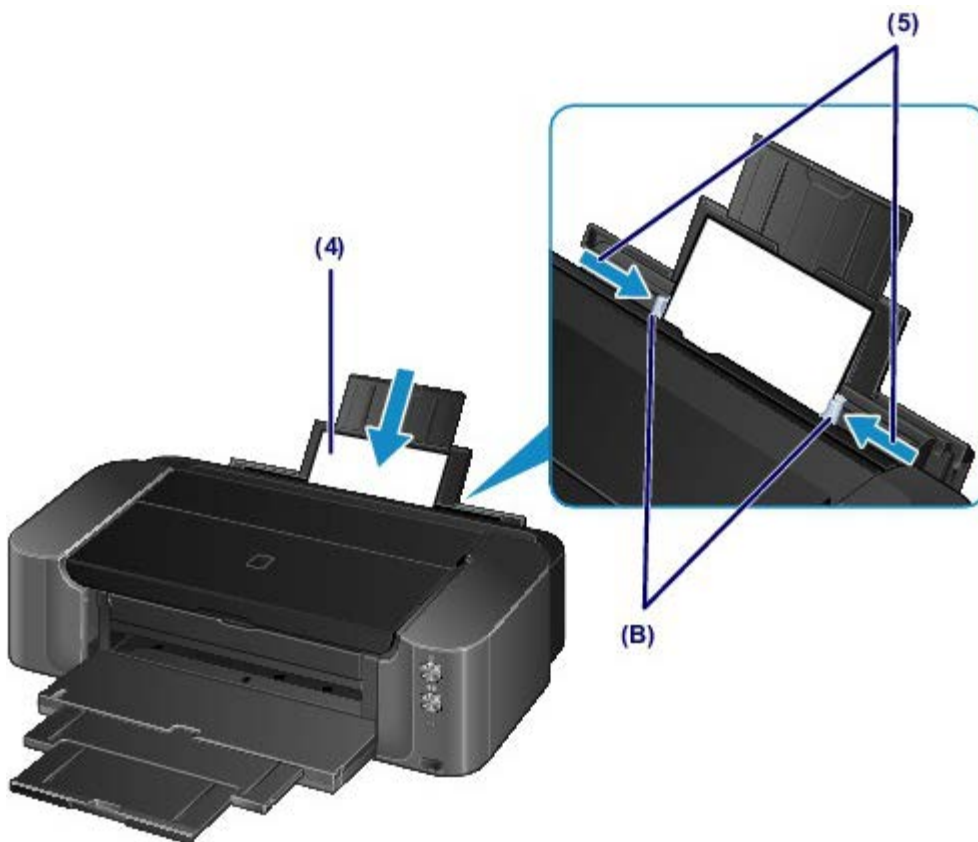

- If the inner cover (A) is open, close it.

(3) Pull out the output tray extension.

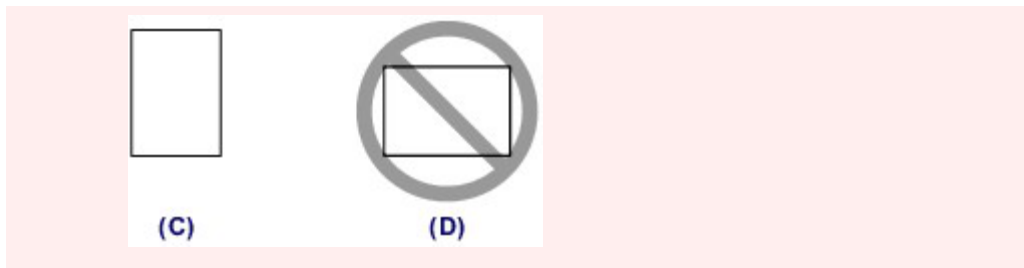

(4) Slide the paper guides (B) to open them, and load ONLY ONE SHEET OF PAPER in the center of the manual feed tray WITH THE PRINT SIDE FACING YOU.

(5) Slide the paper guides (B) to align them with both sides of the paper. Do not slide the paper guides too hard against the paper. The paper may not be fed properly.

Important

- Always load paper in the portrait orientation (C). Loading paper in the landscape orientation (D) can cause paper jams.

(6) Check if the paper is set properly in the manual feed tray.

Make sure that the paper is set firmly against the bottom of the manual feed tray and against the paper guides by slightly jiggling the paper up and down.

Note

After loading paper

- Select the manual feed tray for the paper source and the size and type of the loaded paper on the print settings screen of the printer driver.

To print continuously

- To continue printing from the manual feed tray, wait until printing is completed, then load the next sheet.

C024

Media Types You Can Use

Choose paper suitable for printing, for the best print results. Canon provides you various types of paper to enhance the fun of printing, such as stickers as well as papers for photo or document. We recommend the use of Canon genuine paper for printing your important photos.

Media Types

Commercially available papers

- Plain Paper (including recycled paper)^{*1}

Canon genuine papers

The Model Number of Canon genuine paper is shown in brackets. Refer to the instruction manual supplied with the paper for detailed information on the printable side and notes on handling paper. For information on the page sizes available for each Canon genuine paper, visit our website.

Note

- You may not be able to purchase some Canon genuine papers depending on the country or region of purchase. Paper is not sold in the US by Model Number. Purchase paper by name.

Paper for printing photos:

- Photo Paper Pro Platinum <PT-101>
- Photo Paper Plus Glossy II <PP-201>
- Photo Paper Pro Luster <LU-101>
- Photo Paper Plus Semi-gloss <SG-201>
- Matte Photo Paper <MP-101>^{*2}
- Fine Art Paper "Museum Etching" <FA-ME1>^{*2 *3}

Paper for creating your own prints:

- Photo Stickers <PS-101>^{*2}

*1 100% recycled paper can be used.

*2 This paper can be used only when printing from your computer.

*3 You cannot print in the top and bottom 1.18 inch (30 mm) margins of the paper (in the printing direction).

For details on the printing area, see [Sizes for Art Paper](#).

When using art paper, see [Before Printing on Art Paper](#).

➡ [Paper Load Limit](#)

➡ [Setting the Media Type with the Printer Driver](#)

Note

- You can print onto a printable disc using the disc tray supplied with the printer.
 - ➡ [Placing a Printable Disc](#)
- When printing photos saved on a PictBridge compliant device, you must specify the page size and media type.
 - ➡ [Printing from a Device Other Than a Computer](#)
- You can use non-Canon genuine specialty paper.
For details, visit our website.

Page Sizes

You can use the following page sizes.

 **Note**

- You can load the page sizes as follows.
 - rear tray: A3+, A3, B4, A4, B5, A5, Letter, Legal, 11" x 17" (279.4 x 431.8 mm), 4" x 6" (10 x 15 cm), 5" x 7" (13 x 18 cm), 8" x 10" (20 x 25 cm), 10" x 12" (25 x 30 cm)
 - manual feed tray: A3+, A3, B4, A4, Letter, Legal, 11" x 17" (279.4 x 431.8 mm), 8" x 10" (20 x 25 cm), 10" x 12" (25 x 30 cm), and 14" x 17" (36 x 43 cm)
-

Standard sizes:

- | | |
|--------------------------------|--------------------------|
| ● Letter | ● Legal |
| ● 11" x 17" (279.4 x 431.8 mm) | ● A5 |
| ● A4 | ● A3 |
| ● A3+ | ● B5 |
| ● B4 | ● 4" x 6" (10 x 15 cm) |
| ● 5" x 7" (13 x 18 cm) | ● 8" x 10" (20 x 25 cm) |
| ● 10" x 12" (25 x 30 cm) | ● 14" x 17" (36 x 43 cm) |

Non-standard sizes:

You can print on non-standard size paper within the following ranges.

- rear tray
 - Minimum size: 3.50 x 5.00 inches (89.0 x 127.0 mm)
 - Maximum size: 12.95 x 26.61 inches (329.0 x 676.0 mm)
- manual feed tray
 - Minimum size: 8.00 x 10.00 inches (203.2 x 254.0 mm)
 - Maximum size: 14.00 x 23.00 inches (355.6 x 584.2 mm)

Paper Weight / Thickness

You can use paper in the following weight ranges.

- rear tray: From 17 to 28 lb (64 to 105 g /m²) (plain paper except for Canon genuine paper)
 - * You can use non-Canon genuine specialty paper that is up to 53 lb (200 g /m²).
 - Do not use heavier or lighter paper (except for Canon genuine paper), as it could jam in the printer.
- manual feed tray: From 4 to 23.6 mil (0.1 to 0.6 mm) (up to 93 lb (350 g /m²))
 - Do not use paper thicker or heavier than this, as it could jam in the printer.

C031

Paper Load Limit

Commercially Available Papers

Media Name	Rear Tray	Manual Feed Tray	Paper Output Tray
Plain Paper (including recycled paper) ^{*1}	Approx. 150 sheets (14" x 17" (36 x 43 cm) is not available.)	N/A ^{*2}	Approx. 50 sheets

Canon Genuine Papers

Note

- We recommend that you remove the previously printed sheet from the paper output tray before continuously printing to avoid blurs and discoloration.

Paper for printing photos:

Media Name <Model No.>	Rear Tray	Manual Feed Tray
Photo Paper Pro Platinum <PT-101> ^{*3}	1 sheet: A3+ 10 sheets: A3, A4, Letter, and 8" x 10" (20 x 25 cm) 20 sheets: 4" x 6" (10 x 15 cm)	1 sheet: A3+, A3, A4, Letter, and 8" x 10" (20 x 25 cm)
Photo Paper Plus Glossy II <PP-201> ^{*3}	1 sheet: A3+ 10 sheets: A3, A4, Letter, 5" x 7" (13 x 18 cm), and 8" x 10" (20 x 25 cm) 20 sheets: 4" x 6" (10 x 15 cm)	1 sheet: A3+, A3, A4, Letter, and 8" x 10" (20 x 25 cm)
Photo Paper Pro Luster <LU-101> ^{*3}	1 sheet: A3+ 10 sheets: A3, A4, and Letter	1 sheet: A3+, A3, A4, and Letter
Photo Paper Plus Semi-gloss <SG-201> ^{*3}	1 sheet: A3+ and 10" x 12" (25 x 30 cm) 10 sheets: A3, A4, Letter, 5" x 7" (13 x 18 cm), and 8" x 10" (20 x 25 cm) 20 sheets: 4" x 6" (10 x 15 cm)	1 sheet: A3+, A3, A4, Letter, 8" x 10" (20 x 25 cm), 10" x 12" (25 x 30 cm), and 14" x 17" (36 x 43 cm)
Matte Photo Paper <MP-101>	1 sheet: A3+ 10 sheets: A3, A4, and Letter 20 sheets: 4" x 6" (10 x 15 cm)	1 sheet: A3+, A3, A4, and Letter
Fine Art Paper "Museum Etching" <FA-ME1>	N/A ^{*4}	1 sheet

Paper for creating your own prints:

Media Name <Model No.>	Rear Tray	Manual Feed Tray
Photo Stickers <PS-101>	1 sheet	N/A ^{*2}

*1 Proper feeding of paper may not be possible at the maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature or humidity). In such cases, reduce the number of paper you load at a time to less than half.

*2 Feeding paper from the manual feed tray can damage the printer. Always load in the rear tray.

*3 When loading paper in stacks, the print side may become marked as it is fed or paper may not feed properly. In this case, load one sheet at a time.

*4 Feeding paper from the rear tray can damage the printer. Always load in the manual feed tray.

Note

- When using non-Canon art paper, load one sheet at a time in the rear tray or manual feed tray.
-

Media Types You Cannot Use

Do not use the following types of paper. Using such paper will cause not only unsatisfactory results, but also the printer to jam or malfunction.

- Folded, curled, or wrinkled paper
- Damp paper
- Paper that is too thin
 - rear tray: Less than 17 lb (64 g /m²)
 - manual feed tray: Less than 4 mil (0.1 mm)
- Paper that is too thick
 - rear tray: More than 28 lb (105 g /m²) (plain paper except for Canon genuine paper)
 - * However, you can use non-Canon genuine specialty paper that is up to 53 lb (200 g /m²).
 - manual feed tray: More than 23.6 mil (0.6 mm) in thickness or more than 93 lb (350 g /m²) in weight
- Paper thinner than a postcard, including plain paper or notepad paper cut to a small size (when printing on paper smaller than A5)
- Picture postcards
- Postcards affixed with photos or stickers
- Envelopes
- Any type of paper with holes
- Paper that is not rectangular
- Paper bound with staples or glue
- Paper with adhesives
- Paper decorated with glitter, etc.
- Do not use the following types of Canon genuine paper.
 - Glossy Photo Paper "Everyday Use" <GP-501>
 - Photo Paper Glossy <GP-502>
 - High Resolution Paper <HR-101N>
 - T-Shirt Transfers <TR-301>

Handling Paper

- Be careful not to rub or scratch the surfaces of any types of paper when handling.
- Hold the paper as closely as possible to its edges and try not to touch the printing surface. The print quality may be degraded if the printing surface is smudged with sweat or oil that comes from your hands.
- Do not touch the printed surface until the ink is dried. Even when the ink is dried, be careful not to touch the printed surface as much as possible when handling. Due to the nature of the pigment ink, the ink on the printed surface may be removed when being rubbed or scratched.
- Take out only the necessary number of paper from the package, just before printing.
- To avoid curling, when you do not print, put unused paper back into the package and keep it on a level surface. And also, store it avoiding heat, humidity, and direct sunlight.

[Page top ▲](#)

C042

Before Printing on Art Paper

When using art paper, dust is liable to be generated. It is therefore recommended that paper dust be removed on art paper just before printing.

You will need a soft hair brush (or similar brush used to clean office automation equipment).

The wider the brush, the more effective it will be.

OK - soft brush made from material such as polypropylene, polyethylene, horse hair or goat hair.

► Important

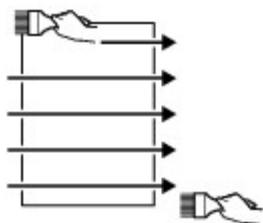

- Be sure not to use brushes as shown below. The printing surface may be damaged.

Not OK - brush made from hard material, cloth or washcloth, sticky and abrasive materials.

Paper dust removal procedure:

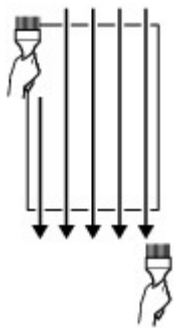

1. Check that the brush is not wet and free from dust or dirt.
2. Brush the overall printing surface carefully in one direction.

► Important

- Be sure to brush all the way across the paper; do not start brushing at the middle or stop halfway.
- Be careful not to touch the printing surface as much as possible.

3. To complete the removal of paper dust, brush the paper in the other direction from top to bottom.

[Page top ▲](#)

Printing Area

- Printing Area
- Other Sizes than Letter or Legal
- Letter, Legal
- Sizes for Art Paper
- Printable Discs

C051

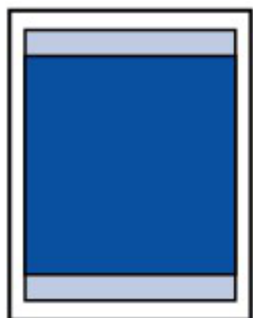

Printing Area

To ensure the best print quality, the printer allows a margin along each edge of media. The actual printable area will be the area inside these margins.

Recommended printing area  : Canon recommends that you print within this area.

Printable area  : The area where it is possible to print.

However, printing in this area can affect the print quality or the paper feed precision.

Note

Borderless Printing

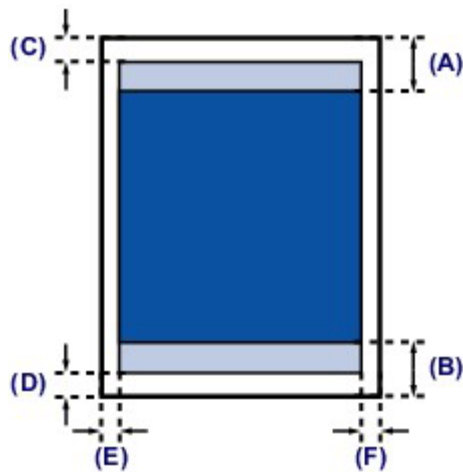

- By selecting Borderless Printing option, you can make prints with no margins.
 - When performing Borderless Printing, slight cropping may occur at the edges since the printed image is enlarged to fill the whole page.
 - For Borderless Printing, use the following paper:
 - Photo Paper Pro Platinum <PT-101>
 - Photo Paper Plus Glossy II <PP-201>
 - Photo Paper Pro Luster <LU-101>
 - Photo Paper Plus Semi-gloss <SG-201>
 - Matte Photo Paper <MP-101>*
- * This paper can be used only when printing from your computer.
- Performing Borderless Printing on any other type of paper may substantially reduce printing quality and/or result in printouts with altered color hues.
- Borderless Printing is not available for legal, 11" x 17" (279.4 x 431.8 mm), A5, B5, or B4 sized paper, plain paper, or art paper.
 - Depending on the type of paper, Borderless Printing may reduce the print quality at the top and bottom edges of the paper or cause these parts to become smudged.

C052

Other Sizes than Letter or Legal

Size	Printable Area (width x height)
A5*	5.56 x 7.95 inches (141.2 x 202.0 mm)
A4	8.00 x 11.38 inches (203.2 x 289.0 mm)
A3	11.43 x 16.22 inches (290.2 x 412.0 mm)
A3+	12.69 x 18.70 inches (322.2 x 475.0 mm)
B5*	6.90 x 9.80 inches (175.2 x 249.0 mm)
B4*	9.85 x 14.02 inches (250.2 x 356.0 mm)
4" x 6" (10 x 15 cm)	3.73 x 5.69 inches (94.8 x 144.4 mm)
5" x 7" (13 x 18 cm)	4.73 x 6.69 inches (120.2 x 169.8 mm)
8" x 10" (20 x 25 cm)	7.73 x 9.69 inches (196.4 x 246.0 mm)
10" x 12" (25 x 30 cm)	9.73 x 11.69 inches (247.2 x 296.8 mm)
11" x 17" (279.4 x 431.8 mm)*	10.73 x 16.69 inches (272.6 x 423.8 mm)
14" x 17" (36 x 43 cm)	13.73 x 16.69 inches (348.8 x 423.8 mm)

* This page size can be used only when printing from your computer.

 Recommended printing area

(A) 1.46 inches (37.0 mm)

(B) 1.46 inches (37.0 mm)

 Printable area

(C) 0.12 inches (3.0 mm)

(D) 0.20 inches (5.0 mm)

(E) 0.13 inches (3.4 mm)

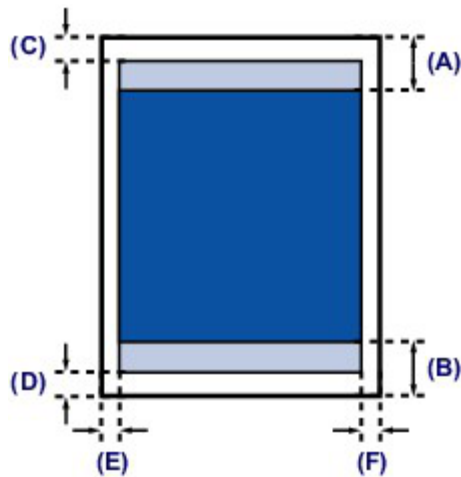

(F) 0.13 inches (3.4 mm)

C053

Letter, Legal

Size	Printable Area (width x height)
Letter	8.00 x 10.69 inches (203.2 x 271.4 mm)
Legal*	8.00 x 13.69 inches (203.2 x 347.6 mm)

* This page size can be used only when printing from your computer.

 Recommended printing area

- (A) 1.46 inches (37.0 mm)
- (B) 1.46 inches (37.0mm)

 Printable area

- (C) 0.12 inches (3.0 mm)
- (D) 0.20 inches (5.0 mm)
- (E) 0.25 inches (6.4 mm)
- (F) 0.25 inches (6.3 mm)

C054

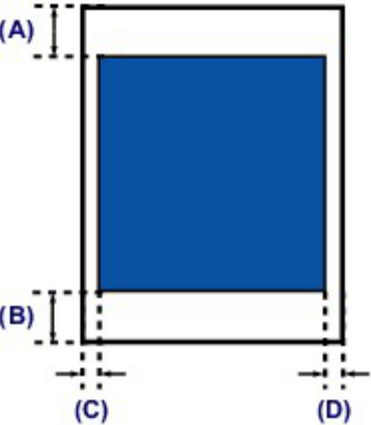

Sizes for Art Paper

When using art paper or non-Canon genuine specialty paper, printing is not done in a 1.18 inch (30 mm) margin along the top and bottom edges. A limit is set to prevent printing along a 1.18 inch (30 mm) margin on the top and bottom edges when a page size for art paper is selected in the printer driver. We recommend checking the printing area in the preview screen before printing.

A4, A3, A3+

Size	Recommended Printing Area (width x height)
A4 (art paper, 1.18 inch (30 mm) margin)*	8.00 x 9.33 inches (203.2 x 237.0 mm)
A3 (art paper, 1.18 inch (30 mm) margin)*	11.43 x 14.17 inches (290.2 x 360.0 mm)
A3+ (art paper, 1.18 inch (30 mm) margin)*	12.69 x 16.65 inches (322.2 x 423.0 mm)

* This page size can be used only when printing from your computer.

 Recommended printing area

- (A) 1.18 inches (30.0 mm)
- (B) 1.18 inches (30.0 mm)
- (C) 0.13 inches (3.4 mm)
- (D) 0.13 inches (3.4 mm)

Letter

Size	Recommended Printing Area (width x height)
Letter (art paper, 1.18 inch (30 mm) margin)*	8.00 x 8.64 inches (203.2 x 219.4 mm)

* This page size can be used only when printing from your computer.

 Recommended printing area

(A) 1.18 inches (30.0 mm)

(B) 1.18 inches (30.0 mm)

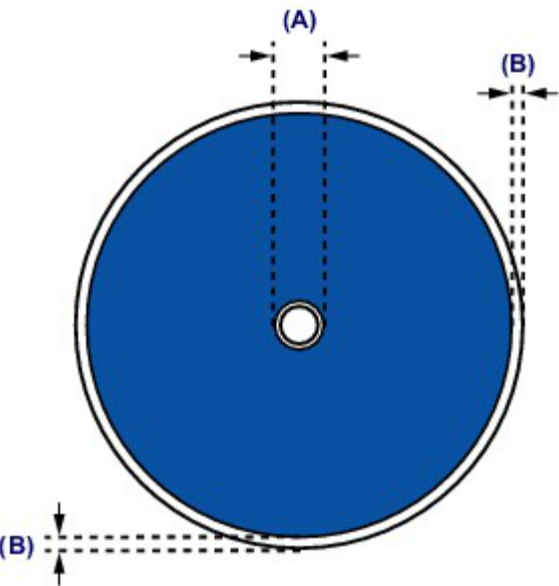

(C) 0.25 inches (6.4 mm)

(D) 0.25 inches (6.3 mm)

C061

Printable Discs

The printing area of the printable disc is from 0.67 inches (17 mm) of the internal diameter to 0.04 inches (1 mm) from the external diameter of the printing surface.

 Recommended printing area

(A) 0.67 inches (17.0 mm)

(B) 0.04 inches (1.0 mm)

Placing a Printable Disc

- [Cautions When Printing on a Printable Disc](#)
- [Before Placing a Printable Disc](#)
- [Placing a Printable Disc](#)
- [Removing a Printable Disc](#)

[Page top ▲](#)

D011

Cautions When Printing on a Printable Disc

- Be sure to use the disc tray supplied with this printer. It has a "K" on the upper side.
- Do not print on printable discs that are not compatible with inkjet printing. The ink will not dry and may cause problems with the disc itself or devices which the disc is loaded onto.
- Do not print on the printable discs' recording surface. Doing so will make data recorded on discs unreadable.
- Hold the printable discs by their edges. Do not touch either the label surface (printing surface) or recording surface.
- Remove any dirt from the disc tray before placing printable discs on the disc tray. Loading discs in a dirty disc tray may scratch the recording surface of the discs.
- After printing, allow the printing surface of the disc to dry naturally. Do not use hairdryers or expose the disc to direct sunlight to dry the ink. Do not touch the printing surface until the ink has dried.
- Do not attach the disc tray while the printer is in operation.
- Do not remove the disc tray while printing on printable discs. Doing so may damage the printer, the disc tray, or the disc.
- Do not get dirt or scratches on the reflectors of the disc tray. The printer may not be able to recognize loading of the printable disc, or printing may become misaligned. If the reflectors on the disc tray become dirty, wipe the reflector clean with a soft and dry cloth, taking care not to scratch the plate.
- The disc tray may become dirty if software other than My Image Garden is used.
- Always close the inner cover after printing on printable discs.

[Page top ▲](#)

D012

Before Placing a Printable Disc

The following items are needed to print onto the printable disc:

- disc tray (supplied with the printer)

* Use the disc tray with "K" on the surface.

The disc tray can be stored in the disc tray storage compartment in the bottom center of the printer.

➡ [Storing the disc tray](#)

- 4.72 inches (12 cm) printable disc

Obtain a printable disc with a label surface compatible with inkjet printing.

Note

- A "printable disc" differs from regular disc (BD/DVD/CD, etc.) in that its label surface has been specially processed to be printed on by an inkjet printer.

D013

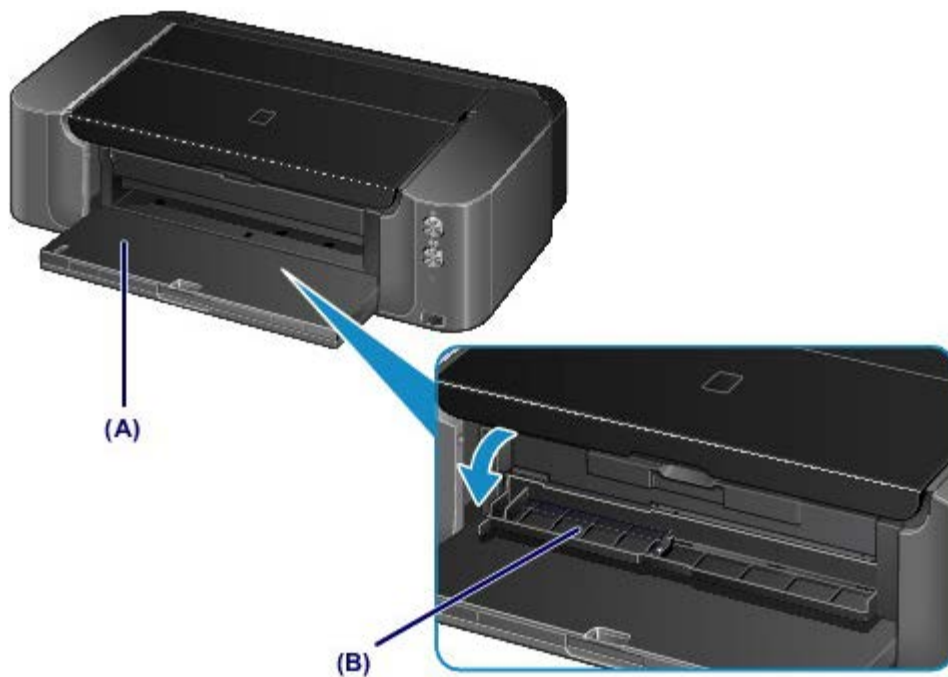

Placing a Printable Disc

To print onto a printable disc, place it on the disc tray supplied with the printer, then insert it into the printer.

Important

- Do not attach the disc tray until the message asking you to load the printable disc is displayed. Doing so can damage the printer.
- Remove any paper in the manual feed tray.

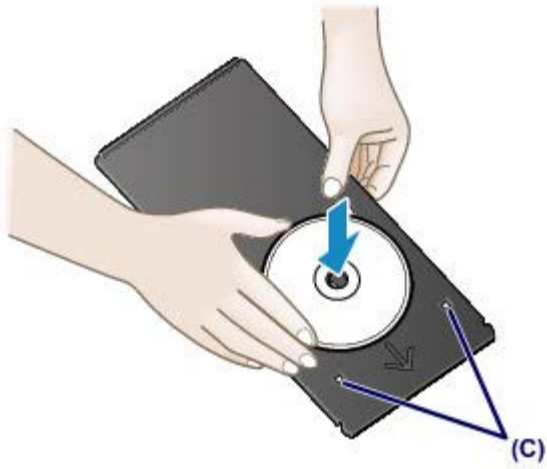

1. Open the paper output tray **(A)** gently.
2. When the message asking you to load the printable disc is displayed, open the inner cover **(B)**.

3. Place the printable disc with the printable surface facing up.

Important

- Make sure that there is no dirt on the disc tray before placing a printable disc on the disc tray.
- When placing a printable disc on the disc tray, do not touch the printing surface of the disc or the reflectors **(C)** on the disc tray.

4. Attach the disc tray to the printer.

 **Important**

- Do not attach the disc tray while the printer is operating (the **POWER** lamp is flashing white).

 **Note**

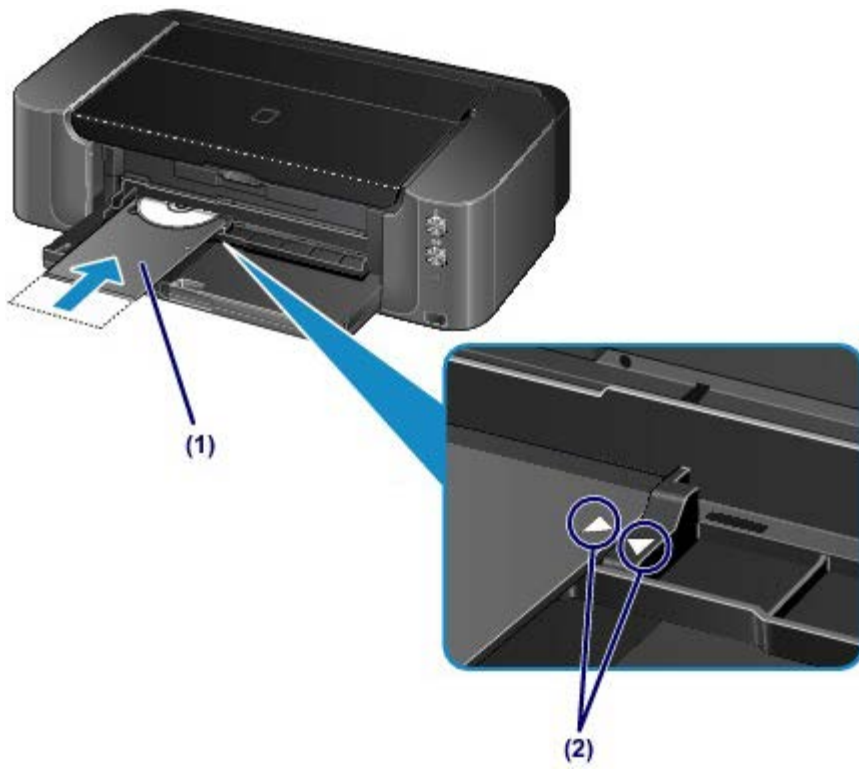

- The disc tray may be ejected during preparation by the printer for printing. Wait until the **POWER** lamp stays lit after flashing, then follow the on-screen instructions to attach the disc tray.

(1) Place the disc tray on the inner cover.

(2) Insert the disc tray straight until the arrow (◀) on the inner cover is almost aligned with the arrow (▶) on the disc tray.

 **Important**

- Do not insert the disc tray beyond the arrow (◀) on the inner cover.

D014

Removing a Printable Disc

1. Pull out the disc tray.

2. Close the inner cover.

Important

- If the inner cover is opened, you cannot print on paper as it will not feed properly. Make sure that the inner cover is closed.

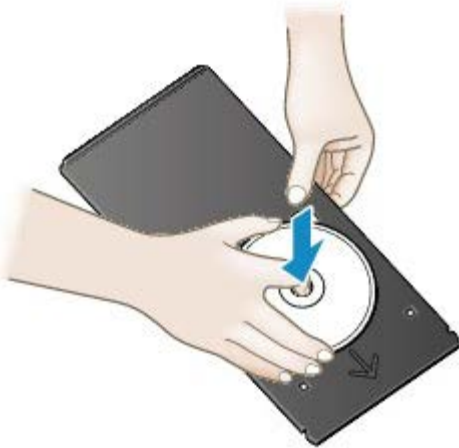

3. Remove the printable disc from the disc tray.

Important

- Do not touch the printing surface when removing the disc from the disc tray.

 **Note**

- Dry the printing surface sufficiently before removing the disc. If you see printing on the disc tray or the transparent parts on inner or outer diameter of the printable disc, wipe them off after the printing surface has dried.
-

Storing the disc tray

When not using the disc tray, insert it straight into the disc tray storage compartment in the bottom center of the printer.

Important

- If the disc tray is bent, it may become unusable. Always keep it on a flat place.

C093

Replacing an Ink Tank

When remaining ink cautions or errors occur, the **Alarm** lamp will flash orange to inform you of the error. Count the number of flashes and take appropriate action.

➡ Alarm Lamp Flashes Orange

Important

- Prepare a new ink tank before you start replacing one.
- Replace the ink tank quickly so as not to leave the printer without an ink tank.
- The printer may be damaged if it is left without an ink tank, causing a problem such as clogging due to dried ink.

Note

- For information on the compatible ink tank, refer to the printed manual: *Getting Started*.
- If print results become faint or white streaks appear despite sufficient ink levels, see [Maintenance Procedure](#).

Replacing Procedure

When you need to replace an ink tank, follow the procedure below.

Important

Handling ink

- Use a new ink tank for replacement. Installing a used ink tank may cause the nozzles to clog. Furthermore, with such an ink tank, the printer will not be able to inform you when to replace the ink tank properly.
- Once an ink tank has been installed, do not remove it from the printer and leave it out in the open. This will cause the ink tank to dry out, and the printer may not operate properly when it is reinstalled. To maintain optimal printing quality, use an ink tank within six months of first use.

Note

- Color ink may be consumed even when printing a black-and-white document or when black-and-white printing is specified. Every ink is also consumed in the standard cleaning and deep cleaning of the print head, which may be necessary to maintain the performance of the printer. When an ink tank is out of ink, replace it immediately with a new one.

➡ Useful Information about Ink

1. Make sure that the power is turned on, and open the paper output tray gently.
2. Open the top cover, then press the **RESUME/CANCEL** button **(A)**.
The print head holder moves to the replacement position.

Caution

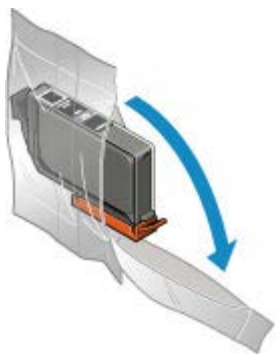

- Do not hold the print head holder to stop or move it forcibly. Do not touch the print head holder until it stops completely.

Important

- Do not place any object on the top cover. It will fall into the rear tray when the top cover is opened and cause the printer to malfunction.
- Do not touch the metallic parts or other parts inside the printer.
- If more than 10 minutes elapse after the **RESUME/CANCEL** button is pressed, the print head holder moves to the right. In this case, close and reopen the top cover, then press the **RESUME/CANCEL** button.

3. Prepare a new ink tank.

(1) Take a new ink tank out of its package.

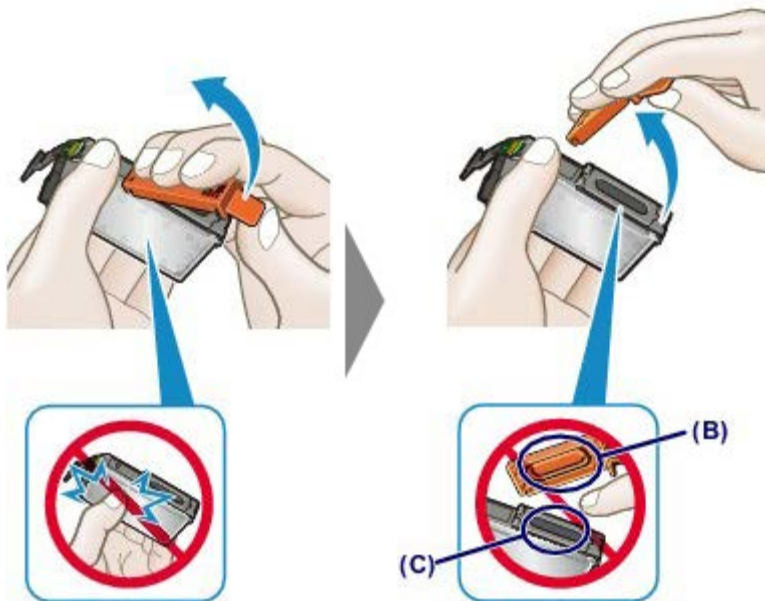

Important

- Handle an ink tank carefully. Do not drop or apply excessive pressure to it.

(2) Remove the orange protective cap (B) from the bottom of the ink tank as indicated in the figure below.

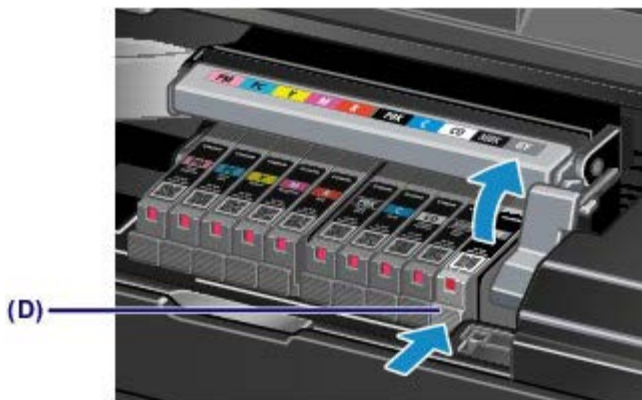

Important

- Do not push the sides of the ink tank. If you push the sides of the ink tank, ink may splash.
- Do not touch the inside of the orange protective cap (B) or the open ink port (C). The ink may stain your hands if you touch them.
- Do not reattach the protective cap (B) once you have removed it. Discard it according to the local laws and regulations regarding disposal of consumables.

4. Remove the ink tank with the lamp flashing fast.

Push the tab (D) and lift the ink tank to remove.

Important

- Do not touch other parts besides the ink tanks.
- Handle the ink tank carefully to avoid staining of clothing or the surrounding area.
- Discard the empty ink tank according to the local laws and regulations regarding disposal of consumables.

Note

- Do not remove two or more ink tanks at the same time. Be sure to replace ink tanks one by one when replacing two or more ink tanks.
- For details on ink lamp flashing speed, see [Checking the Ink Status with the Ink Lamps](#).

5. Install the new ink tank.

- (1) Insert the front end of the ink tank into the print head at a slant.
Make sure that the position of the ink tank matches the label.

- (2) Press on the top of the ink tank until the ink tank snaps firmly into place.
Make sure that the ink lamp lights up red.

▶ Important

- You cannot print if the ink tank is installed in the wrong position. Be sure to install the ink tank in the correct position according to the label on the print head holder.
- You cannot print unless all the ink tanks are installed. Be sure to install all the ink tanks.

6. Close the top cover.

The printer will automatically start mixing the ink.

Wait until the **POWER** lamp stays lit after flashing and the printer stops making operating noise (it takes up to about 2 minutes or less).

📖 Note

- If the **Alarm** lamp still flashes orange after the top cover is closed, take appropriate action.
➡ [Alarm Lamp Flashes Orange](#)
- When you start printing after replacing the ink tank, the printer starts cleaning the print head automatically. Do not perform any other operations until the printer completes the cleaning of the print head. While cleaning is in progress, the **POWER** lamp is flashing white.
- If the print head is out of alignment, as indicated by misaligned printed ruled lines or similar symptoms, adjust the print head position.
➡ [Aligning the Print Head](#)

Checking the Ink Status

- [Checking the Ink Status with the Ink Lamps](#)

You can also check the ink status on the computer screen.

- [Checking the Ink Status from Your Computer](#)

[Page top ▲](#)

C096

Checking the Ink Status with the Ink Lamps

1. Make sure that the power is turned on, and open the paper output tray gently.
2. Open the top cover, then press the **RESUME/CANCEL** button.
➡ Replacing Procedure
3. Check the ink lamp.

Close the top cover after checking the ink lamp status.

➡ Replacing Procedure

- The ink lamp is on.
The ink tank is correctly installed.
- The ink lamp is flashing.
Flashing slowly (at around 3-second intervals)

Ink tank is running low. Prepare a new ink tank.

Note

- When printing on A3 size or larger paper, ink may run out during printing. This may cause blurred print results or horizontal white streaks.

Flashing fast (at around 1-second intervals)

- The ink tank is installed in the wrong position.

Or

- Printer detected ink out condition.

Make sure that the ink tank is installed in the correct position as indicated by the label on the print head holder. If the position is correct but the lamp flashes, there has been an error and the printer cannot print. Check the **Alarm** lamp on the printer.

➡ Alarm Lamp Flashes Orange

- The ink lamp is off.

The ink tank is not installed properly or the function for detecting the remaining ink level is disabled. If the ink tank is not firmly in place, make sure that the orange protective cap has been removed from the bottom of the ink tank, then press on the top of the ink tank until the ink tank clicks into place.

If the ink lamp is still off after reinstalling the ink tank, there has been an error and the printer cannot print. Check the **Alarm** lamp on the printer.

➡ [Alarm Lamp Flashes Orange](#)

Note

- You can also check the ink status on the computer screen.

- [Examining the Nozzle Check Pattern](#)
- [Cleaning the Print Head](#)
- [Aligning the Print Head](#)

[Page top](#) ▲

C097

Maintenance Procedure

If print results are blurred or colors are not printed correctly, the print head nozzle is probably clogged. Follow the procedure below to print the nozzle check pattern, check the print head nozzle condition, then clean the print head.

If printed ruled lines are misaligned or print results are otherwise unsatisfactory, aligning the print head may improve print quality.

Important

- Do not rinse or wipe the print head and ink tank. This can cause trouble with the print head and ink tank.

Note

Before performing maintenance

- Open the top cover and make sure that the lamp on the ink tank is lit red. If the lamp is flashing or off, take appropriate action.
 - ➡ [Checking the Ink Status with the Ink Lamps](#)
- If print results are uneven, the ink quality maintenance with the printer driver may improve print quality.
 - ➡ [Maintaining the Ink Quality](#)
- Increasing the print quality in the printer driver settings may improve the print result.

From the computer

➡ [Aligning the Print Head Position from Your Computer](#)

Page top ▲

C098

Printing the Nozzle Check Pattern

Print the nozzle check pattern to determine whether the ink ejects properly from the print head nozzle.

Note

- You can also print the nozzle check pattern using the computer.
➡ [Use Your Computer to Print a Nozzle Check Pattern](#)
- If the remaining ink level is low, the nozzle check pattern will not be printed correctly. Replace the ink tank whose ink is low.
➡ [Replacing an Ink Tank](#)

You need to prepare: a sheet of A4 or Letter-sized plain paper

1. Make sure that the power is turned on.
2. Make sure that one or more sheets of A4 or Letter-sized plain paper are loaded in the rear tray.

Important

- The manual feed tray is not available for the nozzle check pattern print. Be sure to load paper in the rear tray.

3. Open the paper output tray gently, then pull out the output tray extension.

Important

- If the inner cover is open, close it.

4. Hold down the **RESUME/CANCEL** button until the **POWER** lamp flashes white twice, then release it immediately.

The nozzle check pattern will be printed.

Do not perform any other operations until the printer completes the printing of the nozzle check pattern.

5. Examine the nozzle check pattern.

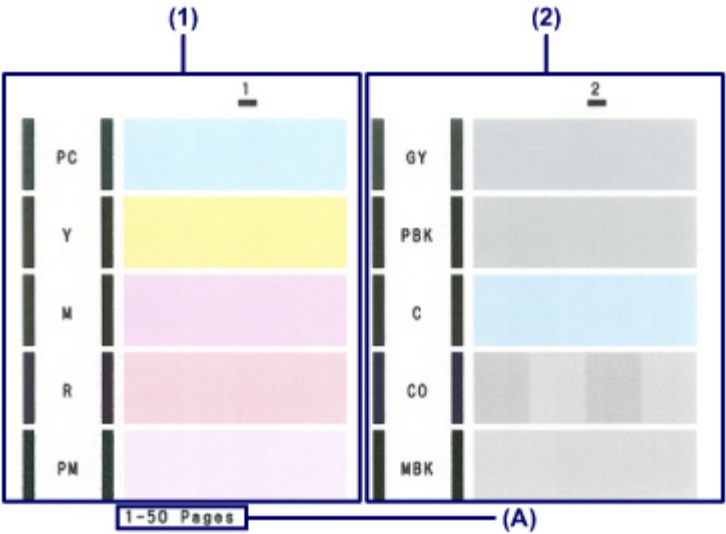

➡ [Examining the Nozzle Check Pattern](#)

C099

Examining the Nozzle Check Pattern

Examine the nozzle check pattern, and clean the print head if necessary.

1. Check if there are horizontal streaks in the pattern (1) and pattern (2).

(A) Number of sheets printed so far

If there are horizontal streaks in the pattern (1):

Cleaning the nozzles of the ink group 1 (PC, Y, M, R, or PM) is required.

Select the ink group to clean using the computer.

➡ [Cleaning the Print Heads from Your Computer](#)

(B) Good

(C) Bad (horizontal streaks are present)

If there are horizontal streaks in the pattern (2):

Cleaning the nozzles of the ink group 2 (GY, PBK, C, CO, or MBK) is required.

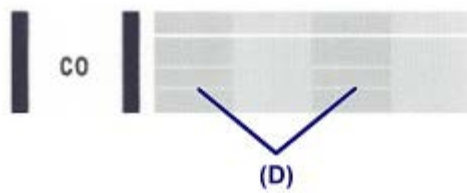

Select the ink group to clean using the computer.

➡ [Cleaning the Print Heads from Your Computer](#)

Note

- Because CO ink is colorless, its pattern is printed over the MBK ink pattern. Check for horizontal streaks (D) in the dark gray bands of the pattern.

If there are horizontal streaks in both the pattern (1) and pattern (2):

Cleaning the nozzles of all ink colors is required.

From the printer

➡ [Cleaning the Print Head](#)

From the computer

➡ [Cleaning the Print Heads from Your Computer](#)

Note

- The total number of sheets printed so far is shown in increments of 50 sheets on the printout of the nozzle check pattern.

[Page top](#) ▲

C100

Cleaning the Print Head

Clean the print head if horizontal streaks are present in the printed nozzle check pattern. Cleaning unclogs the nozzles and restores the print head condition. Cleaning the print head consumes ink, so clean the print head only when necessary.

Note

- You can also clean the print head using the computer. When using the computer, select the ink group to clean, then start cleaning.
 - ➡ [Cleaning the Print Heads from Your Computer](#)
- When cleaning the print head using the button on the printer, the nozzles of all ink colors are cleaned.

1. Make sure that the power is turned on.

2. Hold down the **RESUME/CANCEL** button until the **POWER** lamp flashes white once, then release it immediately.

The printer starts cleaning the print head.

When the **POWER** lamp is lit white after flashing, the cleaning will be complete.

Do not perform any other operations until the printer completes the cleaning of the print head. This takes about 2 to 3 minutes.

Print the nozzle check pattern to check the print head condition after cleaning.

From the printer

➡ [Printing the Nozzle Check Pattern](#)

From the computer

➡ [Use Your Computer to Print a Nozzle Check Pattern](#)

Note

- If the problem is not resolved after cleaning the print head twice, clean the print head deeply from the computer.
 - ➡ [Cleaning the Print Heads from Your Computer](#)

Cleaning the Printer

- Cleaning the Exterior of the Printer
- Cleaning the Paper Feed Roller
- Cleaning the Protrusions inside the Printer

Page top ▲

C150

Cleaning the Exterior of the Printer

Be sure to use a soft and dry cloth such as eyeglasses cleaning cloth and wipe off dirt on the surface gently. Smooth out wrinkles on the cloth if necessary before cleaning.

Important

- Be sure to turn off the power and disconnect the power plug before cleaning the printer.
- Do not use tissue paper, paper towels, rough-textured cloth, or similar materials for cleaning so as not to scratch the surface. Paper tissue powder or fine threads may remain inside the printer and cause problems such as print head blockage and poor printing results. Be sure to use a soft and dry cloth.
- Never use volatile liquids such as thinners, benzene, acetone, or any other chemical cleaner to clean the printer, as this may cause a malfunction or damage the surface of the printer.

[Page top](#) ▲

C153

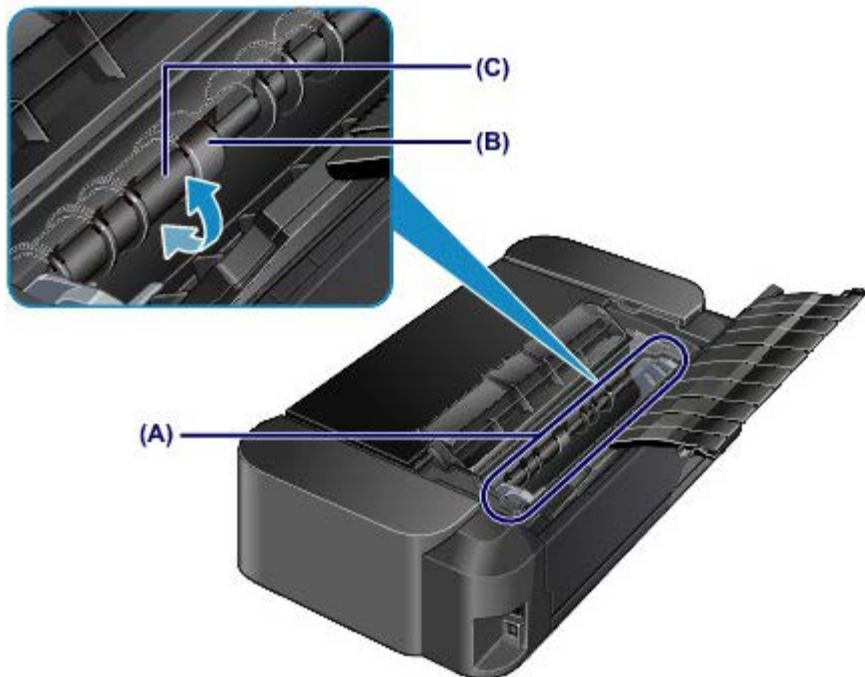

Cleaning the Paper Feed Roller

If the paper feed roller is dirty or paper powder is attached to it, paper may not be fed properly.

In this case, clean the paper feed roller. Cleaning will wear out the paper feed roller, so perform this only when necessary.

➡ Cleaning the Paper Feed Rollers from Your Computer

If the problem is not resolved after cleaning the paper feed roller from the computer, turn off the power, disconnect the power plug, then wipe the paper feed roller parts (the large paper feed roller in the center and three rollers on each side of it) **(A)** located in the rear tray with a moistened cotton swab or the like. Do not touch the paper feed roller **(B)** with your fingers. Wipe the paper feed roller parts with a cotton swab while turning the shaft **(C)** with your fingers.

After cleaning the paper feed roller parts with a cotton swab, turn on the power and perform the cleaning from the computer again.

➡ Cleaning the Paper Feed Rollers from Your Computer

If the problem is not resolved after cleaning the paper feed roller as described above, contact the service center.

C155

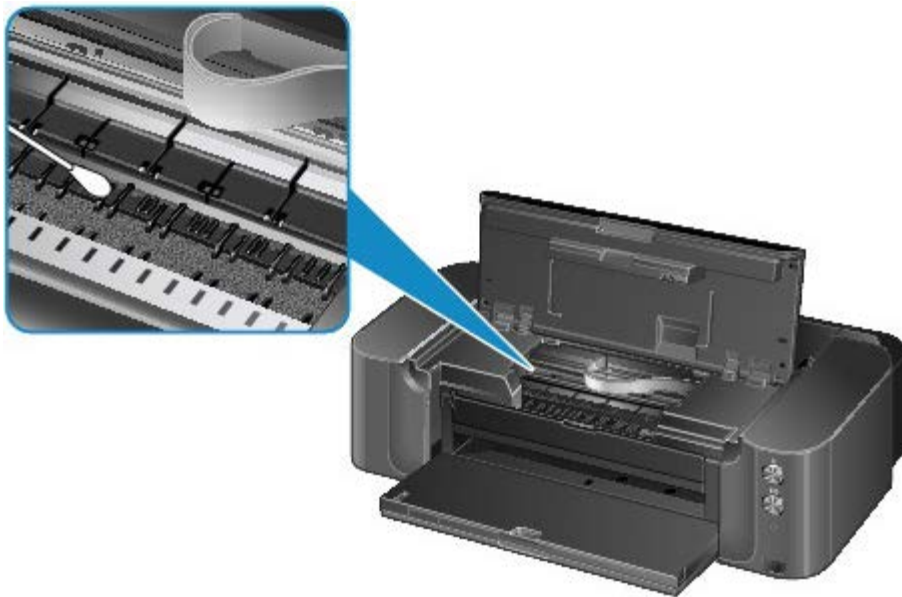

Cleaning the Protrusions inside the Printer

Important

- Be sure to turn off the power and disconnect the power plug before cleaning the printer.

You need to prepare: cotton swab

If the protrusions inside the printer are stained, wipe off any ink from the protrusions using a cotton swab or the like.

D018

Notice for Unplugging the Power Cord

To unplug the power cord, follow the procedure below.

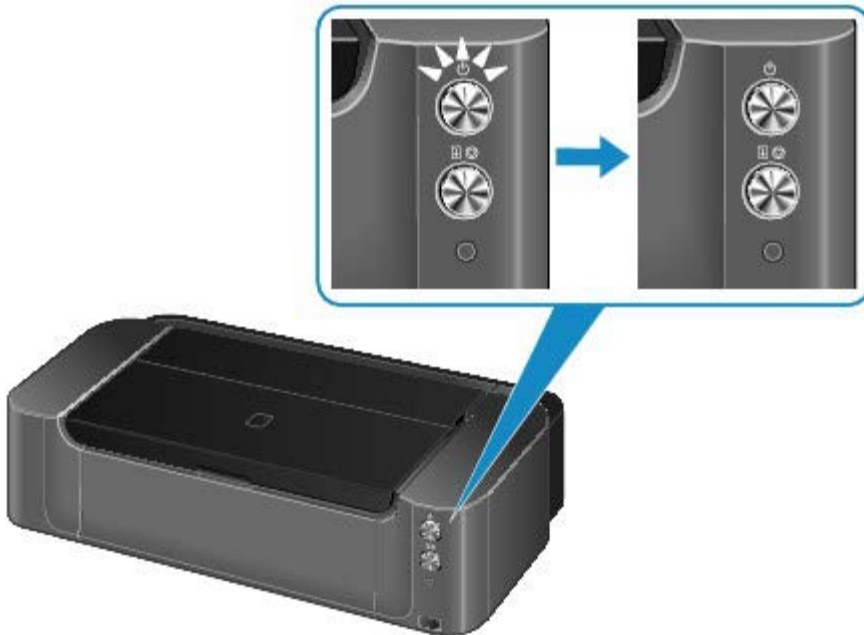

Important

- When you unplug the power cord, press the **ON** button, then confirm that the **POWER** lamp is off. Unplugging the power cord while the **POWER** lamp is lit or flashing may cause drying or clogging of the print head and print quality may be reduced.

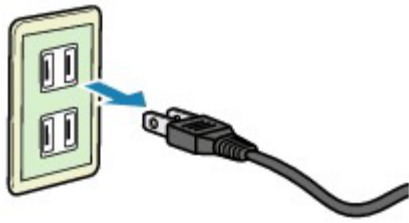

1. Press the **ON** button to turn the printer off.

2. Confirm that the **POWER** lamp is off.

3. Unplug the power cord.

The specification of the power cord differs depending on the country or region of use.

[Page top ▲](#)

Specifications

General Specifications

Printing resolution (dpi)	4800 (horizontal) X 2400 (vertical)
Interface	USB Port: Hi-Speed USB *1 Direct Print Port: PictBridge LAN Port: Wired LAN: 100BASE-TX/10BASE-T Wireless LAN: IEEE802.11n/IEEE802.11g/IEEE802.11b *2 *1 A computer that complies with Hi-Speed USB standard is required. Since the Hi-Speed USB interface is fully upwardly compatible with USB 1.1, it can be used at USB 1.1. *2 Setup possible through WPS (Wi-Fi Protected Setup) or WCN (Windows Connect Now).
Print width	Manual Feed Tray: 13.7 inches/348.8 mm (for Borderless Printing: 14 inches/356 mm) Rear Tray: 12.7 inches/322.2 mm (for Borderless Printing: 13 inches/329 mm)
Operating environment	Temperature: 5 to 35 °C (41 to 95 °F) Humidity: 10 to 90 % RH (no condensation)
Storage environment	Temperature: 0 to 40 °C (32 to 104 °F) Humidity: 5 to 95 % RH (no condensation)
Power supply	AC 100-240 V, 50/60 Hz
Power consumption	Printing: Approx. 17 W *1 Standby (minimum): Approx. 2.3 W *1*2 OFF: Approx. 0.3 W *1 Wireless LAN is active. *2 The wait time for standby cannot be changed.
External dimensions	Approx. 27.2 (W) X 15.2 (D) X 8.5 (H) inches Approx. 689 (W) X 385 (D) X 215 (H) mm * With the Paper Support and Paper Output Tray retracted.
Weight	Approx. 20.0 kg (Approx. 43.9 lb) * With the Print Head and ink tanks installed.
Print Head/Ink	Total 7680 nozzles (PM/PC/Y/M/R/PBK/C/CO/MBK/GY each 768 nozzles)

Network Specifications

Communication protocol	TCP/IP
Wired LAN	Supported Standards: IEEE802.3u (100BASE-TX)/IEEE802.3 (10BASE-T) Transfer speed: 10 M/100 Mbps (auto switching)

Wireless LAN	<p>Supported Standards: IEEE802.11n/IEEE802.11g/IEEE802.11b</p> <p>Frequency bandwidth: 2.4 GHz</p> <p>Channel: 1-11 or 1-13</p> <p>* Frequency bandwidth and available channels differ depending on country or region.</p> <p>Transfer speed (Standard value):</p> <p>IEEE802.11n: max. 150 Mbps</p> <p>IEEE802.11g: max. 54 Mbps</p> <p>IEEE802.11b: max. 11 Mbps</p> <p>* These values are a theoretical maximum transmission speed between the printer and an equivalent network device, and do not indicate the actual transmission speed obtained.</p> <p>Communication distance: Indoors 164 feet/50 m</p> <p>* Effective range varies depending on the installation environment and location.</p> <p>Security:</p> <p>WEP (64/128 bits)</p> <p>WPA-PSK (TKIP/AES)</p> <p>WPA2-PSK (TKIP/AES)</p> <p>Setup:</p> <p>WPS (Push button configuration/PIN code method)</p> <p>WCN (WCN-NET)</p> <p>Other Features: Administration password</p>
---------------------	---

Minimum System Requirements

Conform to the operating system's requirements when higher than those given here.

Windows

Operating System Processor RAM	<p>Windows 7, Windows 7 SP1</p> <p>1 GHz or faster 32-bit (x86) or 64-bit (x64) processor</p> <p>1 GB (32-bit)/2 GB (64-bit)</p> <p>Windows Vista SP1, Vista SP2</p> <p>1 GHz processor</p> <p>512 MB</p> <p>Windows XP SP3 32-bit only</p> <p>300 MHz processor</p> <p>128 MB</p>
Browser	Internet Explorer 6 or later
Hard Disk Space	<p>3 GB</p> <p>Note: For bundled software installation.</p> <p>The necessary amount of hard disk space may be changed without notice.</p>
CD-ROM Drive	Required
Display	SVGA 800 X 600

Mac OS

Operating System Processor RAM	<p>Mac OS X v10.7</p> <p>Intel Core 2 Duo, Core i3, Core i5, Core i7, or Xeon processor</p> <p>2 GB</p>
---	---

	Mac OS X v10.6 Intel processor 1 GB Mac OS X v10.5.8 Intel processor 512 MB
Browser	Safari 3 or later
Hard Disk Space	1.5 GB Note: For bundled software installation. The necessary amount of hard disk space may be changed without notice.
CD-ROM Drive	Required
Display	XGA 1024 X 768

- A computer with a CD-ROM drive is required to setup the Wi-Fi connection if the push button method is not used.
- Windows: Operation can only be guaranteed on a computer with Windows 7, Windows Vista or Windows XP pre-installed.
- Windows: Uninstall software bundled with the Canon inkjet printer before upgrading from Windows Vista to Windows 7, then install the bundled software again.
- Windows: Internet Explorer 7, 8 or 9 is required to install Easy-WebPrint EX.
Easy-WebPrint EX for Internet Explorer 9 can be downloaded from the Canon web site.
Microsoft .NET Framework 4 Client Profile must be installed to use Easy-WebPrint EX in Internet Explorer 9.
- Windows: Some functions may not be available with Windows Media Center.
- Windows: .NET Framework 4 must be installed to use the following applications:
 - My Image Garden
 - Quick Menu
 - Easy-WebPrint EX
 - Print Studio Pro
- Windows: XPS Essentials Pack is required to print with My Image Garden or Print Studio Pro on Windows XP.
- Mac OS: Hard Disk must be formatted as Mac OS Extended (Journaled) or Mac OS Extended.
- Mac OS: After upgrading from Mac OS X v10.6 to Mac OS X v10.7, install software bundled with the Canon inkjet printer.
- Mac OS: For Mac OS, an internet connection is required during My Image Garden installation.
- Print Studio Pro is a software plug-in for the following software:
 - Canon Digital Photo Professional Ver. 3.12 or later
 - Adobe Photoshop CS4, CS5, CS5.1
 - Adobe Photoshop Elements 8, 9, 10
 - Adobe Photoshop Lightroom 2.7, 3

Specifications are subject to change without notice.

Lesson 1 Digital Printing Workflow

Digital Printing Workflow

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Digital Printing Workflow

B001

Lesson 1 Digital Printing Workflow

Print and Transform Photos into Works of Art

By printing and transforming photos into works of art, you can convey rich impressions that cannot be represented on a monitor. In addition, you can enjoy various forms of representation such as framing, photo collection and gift for friends.

Recommended Workflow Employing Print Studio Pro

By using Print Studio Pro, you can print images developed/corrected in "Digital Photo Professional" (RAW image editing software provided by Canon), Adobe Photoshop, Adobe Photoshop Elements or Adobe Photoshop Lightroom easily and in high quality.

1. Shoot.

→ 1. Checking the Camera Settings for Shooting

2. Develop/Correct.

→ 2. Developing/Correcting Images on the Monitor

3. Print.

→ 3. Printing with Print Studio Pro

Color Spaces and Color Modes Recommended by Canon

Color spaces and color modes recommended by Canon vary depending on the file format of the image to be printed and whether the printing is in color or black and white. You can obtain even higher quality print results by printing with the following settings.

	File Format	Recommended Color Space	Color Mode Recommended for Print Studio Pro
Color Printing	RAW format	Adobe RGB	Use ICC Profile (Rendering Intent: Perceptual)
	JPEG format	sRGB	PRO Mode
Black and White Printing	RAW format	sRGB	-

See "[About Color Spaces](#)" for details on color spaces.

See "[Lesson 3 Utilizing Print Studio Pro](#)" for details on the Print Studio Pro's color modes.

Lesson 1 Digital Printing Workflow

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Digital Printing Workflow > Advantages of Using Print Studio Pro

B002

Advantages of Using Print Studio Pro

■ No need to set up the printer driver

You can print easily by simply operating Print Studio Pro.

■ Ability to print with the same settings from various image editing software programs

Whether printing from Digital Photo Professional, Photoshop, Photoshop Elements or Lightroom, you can print with the same settings in Print Studio Pro.

■ Maximization of the printer's performance

- Supports input data of 1200 ppi
You can send image data up to the resolution supported by the printer to the printer driver without reducing it.
(This function may not be available depending on the paper to be used and print quality.)
- Sends 16-bits-per-channel image data to the printer driver
You can send 16-bits-per-channel image data without degrading it.

■ Automatic integration with image editing software

- Retains the image's color space automatically
You can print without considering the color space since it is automatically retained from the image editing software and converted to the appropriate color space as needed.
- 16-bits-per-channel image data can also be obtained
You can use developed data as is without degrading it.

■ Easy development, correction and printing while viewing on the monitor

- Displays preview based on the monitor profile
You can display in correct color tones even on Adobe RGB monitors since the monitor profile can be set.
- Printing using PRO Mode or ICC profiles (rendering intent: Perceptual)
You can print images close to the source images easily since the characteristics of the data displayed on the monitor will be reflected in the print results correctly.

■ Easy print settings via My Settings registration

Since you can register a group of settings such as the printer, paper, layout and color management, you can easily make settings by simply loading the registered group of settings when printing.

■ Ability to perform various printing tasks

- Printing in various layouts
- Pattern Print

Photo information printing

- Printing on various media types and paper sizes

Lesson 1

Digital Printing Workflow

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Digital Printing Workflow > 1. Checking the Camera Settings for Shooting

B003

1. Checking the Camera Settings for Shooting

Print results are affected by camera settings, file format, etc. Check the following so that you can print photos as you wish.

See the manual of your product for the checking procedure.

Check the File Format

Although it is common to compress and save in JPEG format on compact digital cameras, you can save in RAW format on digital single-lens reflex cameras and some other cameras.

It is recommended that you save in RAW format which prevents degradation of image quality after shooting and allows you to correct the white balance and other parameters.

See "[RAW Images and JPEG Images](#)" for details on file formats of photos.

Check the Color Space

A "color space" refers to the range of colors that can be represented by a digital camera, computer monitor or printer. Although supported color spaces vary by device, "sRGB" and "Adobe RGB" can be used as common color spaces. Many digital single-lens reflex cameras allow you to switch between these two types of color space. Match the color space of the camera to the color space supported by your monitor and printer.

See "[About Color Spaces](#)" for details on color spaces.

Note

For photos shot in RAW format, you can change the color space in the image editing software to be used for their development.

Check the Number of Pixels

Set the number of pixels before shooting, by considering the purpose of printing (the use), the paper size and the quality level of the final print.

See "[Numbers of Pixels and Print Sizes](#)" for details on the number of pixels.

Check the Compression Rate

You can change the compression rate when saving in JPEG format. Increasing the compression rate reduces the file size; however, noise caused by tonal variation tends to appear.

Lesson 1

Digital Printing Workflow

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Digital Printing Workflow > 2. Developing/Correcting Images on the Monitor

B004

2. Developing/Correcting Images on the Monitor

Develop/correct images using image editing software to make them closer to what you want while viewing the images on the monitor.

Preparation

It is recommended that you use a color-managed monitor.

Set the monitor as follows.

- Color temperature: D50 (5000 K)
- Luminance: 120 cd/m²
- Gamma: 2.2

For ambient lighting, it is recommended that you use D50 fluorescent lamps designed for color evaluation (color temperature: 5000 K, high color rendering properties).

Refer to "[Lesson 2 Color Management Basics](#)" for details on color management.

Tip

When the Values Above Cannot Be Set on the Monitor

Color tones will differ between the monitor and printed materials; print with no correction, then apply correction while viewing the printed material.

Steps

The following describes the steps for developing RAW format data. Although some image editing software may be able to correct even JPEG format data, the image quality will be lower than RAW format data since JPEG format data is compressed. Therefore, applying correction may degrade gradations and other elements.

1. Start the image editing software to be used.
2. Open the image you want to print.

Note

The settings of the image editing software will be applied to the image's color

space. Change the color space according to the file format of the image to be used and purpose of use.

3. Develop/correct the photo to make it closer to what you want.

■ White Balance/Color Temperature

Before correction

After correction

■ Picture Style (for Digital Photo Professional only)

You can easily make images closer to what you want by simply selecting a matching style such as portrait or landscape.

■ Brightness

Before correction

After correction

■ Contrast

Before correction

After correction

Digital Printing Workflow

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Digital Printing Workflow > 3. Printing with Print Studio Pro

B005

3. Printing with Print Studio Pro

When development/correction is completed, print with Print Studio Pro.

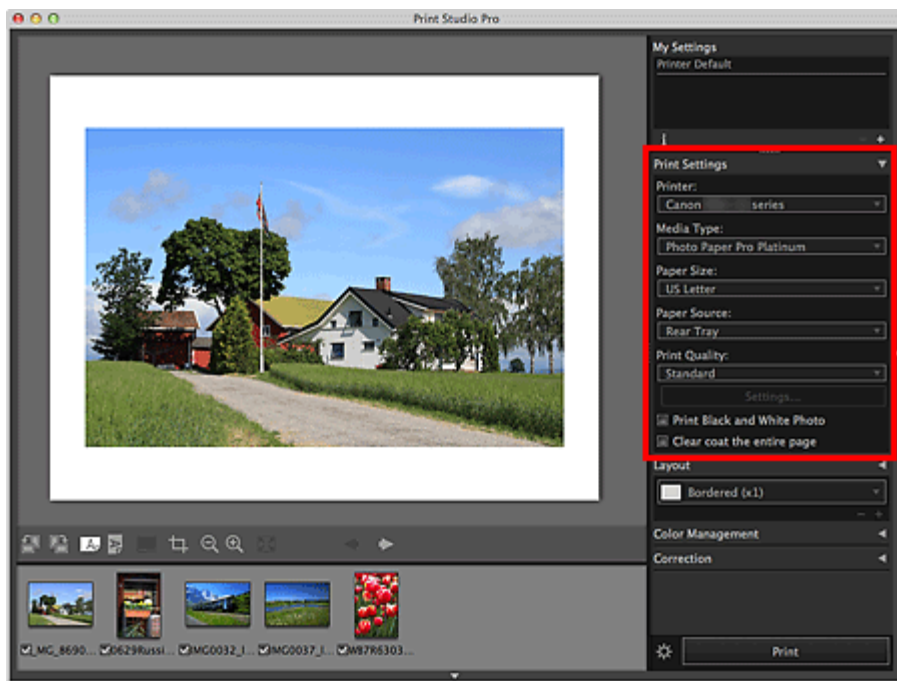

Steps

1. Start Print Studio Pro.

From the **File** menu, select as follows.

- **Digital Photo Professional**
Select **Plug-in printing** > **Print with Print Studio Pro**.
 - **Photoshop**
Select **Automate** > **Canon Print Studio Pro....**
 - **Photoshop Elements**
Select **Automation Tools** > **Canon Print Studio Pro....**
 - **Lightroom**
Select **Plug-in Extras** > **Canon Print Studio Pro....**
- Print Studio Pro starts.

2. Select the printer and paper to be used.

3. Specify the layout, then click Print.

Printing starts.

If the print result is not satisfactory, repeat the correction and printing steps.

Tip

Pattern Print Function of Print Studio Pro

Prints a pattern with slightly varying colors on a sheet of paper. This is convenient when searching for a print result that is closer to what you want.

Refer to "[Color Adjustment in Color Printing](#)" for details on Pattern Print.

Note

Print Studio Pro allows you to make various settings before printing.

See "[Lesson 3 Utilizing Print Studio Pro](#)" for details.

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics

B006

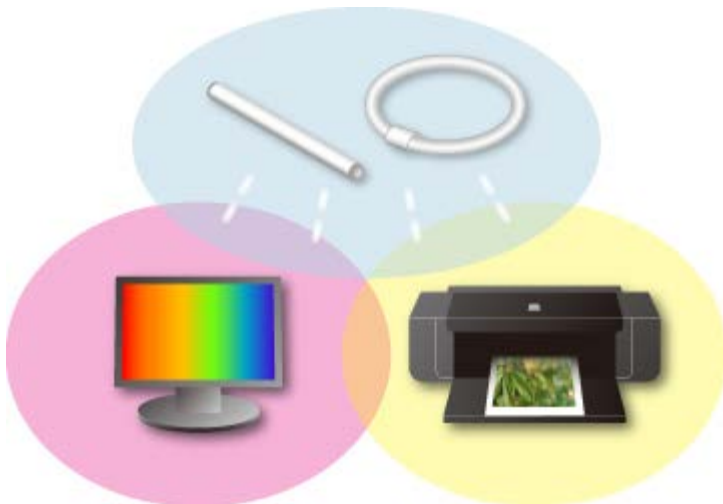

Lesson 2 Color Management Basics

Knowledge of color management is essential to creating rewarding works of art. The following describes the basic knowledge and process flow of color management.

The Purpose of Color Management

Even if you prepare arrays of expensive digital devices, it is not easy to create a work of art as you wish when the color tones produced by each device are different. To create a rewarding work of art, it is necessary to adjust the environment so that the image data can be displayed on the monitor in an appropriate color tone, and then be printed in the color tone as seen on the monitor.

This management of the color tone is called color management. Color tones of photos are affected not only by digital device settings and application settings but also by ambient light and many other things. Such factors need to be managed comprehensively in color management.

Basic Knowledge and Processes of Color Management

When performing color management, knowledge of color spaces is important. See the following page for color spaces.

➔ [About Color Spaces](#)

The actual processes of color management are explained next.

See the following pages for the processes.

- ➔ [Ambient Light Adjustment](#)
- ➔ [Manual Monitor Adjustment](#)

Color Management Using ICC Profiles

To perform more accurate color management, use ICC profiles.
See the following pages for color management using ICC profiles.

- ➔ [Color Management Using ICC Profiles](#)
 - ➔ [About ICC Profiles](#)
 - ➔ [Monitor Adjustment Using a Measuring Instrument](#)
 - ➔ [Color Management of the Printer](#)

Tip

ICC Profiles in Print Studio Pro

Print Studio Pro is designed to allow you to print in light of color management without specifically considering ICC profiles.

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > About Color Spaces

B007

About Color Spaces

What Is Color Space?

A color space is a range of colors that can be represented; each device has its own color space. For example, when the same image is displayed on two types of monitor, the color tones may appear different from each other. One cause of this is the difference in color spaces. Since the appearance varies by color space, it is important to consider color spaces when performing color management.

sRGB and Adobe RGB

While the color space varies by device, you cannot unify color tones under the use of different color spaces.

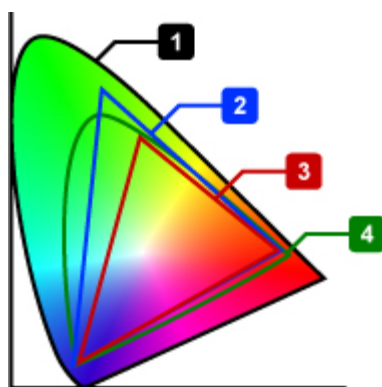

sRGB and Adobe RGB are color spaces designed to enable communication between devices in a unified color space. The graph below shows the color spaces of sRGB and Adobe RGB.

1 Visible region

2 Adobe RGB

3 sRGB

4 Printer

Each color space has the following characteristics.

	sRGB	Adobe RGB
Overview	An international standard established by the International Electrotechnical Commission (IEC)	A definition of color space proposed by Adobe Systems Incorporated
Characteristic	Widely used in general	The color space that can be

		represented is wider than sRGB
Advantage	Easy to handle since it is the range of colors that can be reproduced on many devices	Wide range of reproducible colors; vivid color reproducibility is especially high
Disadvantage	Narrower range of reproducible colors compared to Adobe RGB	The number of devices that can reproduce the wide color space is small

Tip

The Printer's Color Space

Canon PRO series inkjet printers can print in a color space wider than sRGB.

By using Adobe RGB, you can perform vivid printing in a wider color space, maximizing the printer's performance.

Color Space Settings in Print Studio Pro

Print Studio Pro automatically retains the color space set in the image editing software and converts it to an appropriate color space as needed. Therefore, color management can be performed without considering the color space.

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > Ambient Light Adjustment

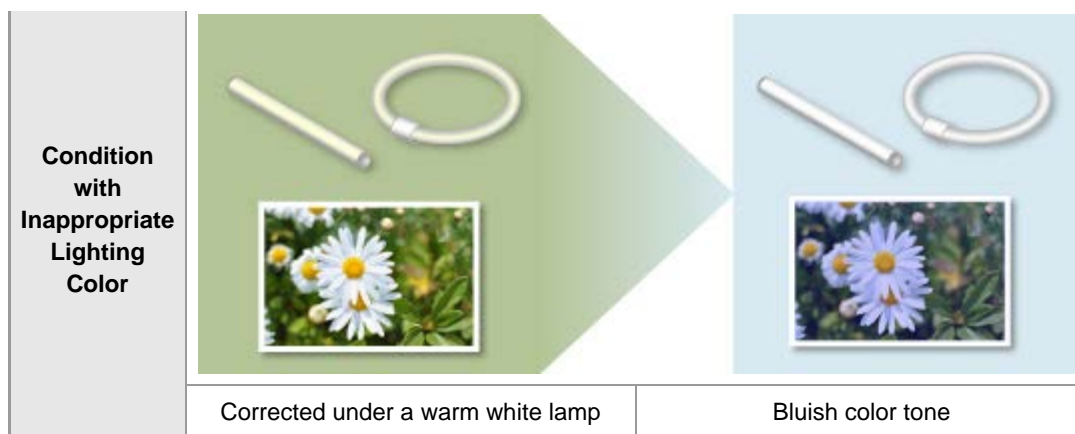

B008

Ambient Light Adjustment

When looking at monitors and printed materials, ambient light significantly affects their color appearances.

For this reason, selection of the fluorescent lamp (ambient light) to light the room is very important when performing color management.

	Lighting Condition during Correction	Color Tone when Viewed under Appropriate Lighting
Appropriate Lighting Condition		
	Corrected under appropriate lighting condition	Appropriate color tone
Condition with Inappropriate Lighting Brightness		
	Corrected under dark condition	Color intensity is low

Points to Remember when Setting the Ambient Light

Consider the following points when selecting fluorescent lamps suitable for viewing photos.

- Color Temperature
- Color Rendering Properties
- Brightness

Color Temperature

Color temperature, stated in kelvin (K), is a unit to indicate whether the color tone belongs to warm colors or cool colors. Values around 5000 to 6000 K indicate white; the lower values indicate warm colors, and the higher values indicate cool colors.

Commercially available fluorescent lamps can be broadly classified into five types depending on their color temperature.

	Warm White	White	Cool White	Neutral White	Daylight
Color Temperature	3000 K	3500 K	4200 K	5000 K	6500 K

Generally, neutral white lamps are recommended for the environment to view photos.

Difference in Appearance by Color Temperature

Neutral White	Daylight	Warm White
Appropriate color tone	Bluish color tone	Yellowish color tone

Color Rendering Properties

Color rendering properties, stated in the general color rendering index (CRI Ra), are the unit to indicate the reproducibility of the color tone. The maximum value for Ra is 100; the higher the color rendering

properties, the more faithful color tones can be seen.

When performing color management, it is appropriate to use high color rendering type fluorescent lamps (color rendering properties: Ra 90 or higher) or triphosphor fluorescent lamps.

Lighting Brightness

The lighting affects photos whether it is too bright or too dark.

Generally, about 500 lx (lux) is recommended when performing color management.

Ambient Light Recommended by Canon

- D50 fluorescent lamps designed for color evaluation (color temperature: 5000 K, high color rendering properties)
- Brightness when viewing printed materials: 500 lx \pm 125 lx

Tip

Fluorescent Lamps Used at the Professional's Work Site

At the professional's work site, fluorescent lamps designed for color evaluation with high color rendering properties (D50, color temperature: 5000 K, color rendering index: 90 or higher) are mostly used. If they are not available, the neutral type fluorescent lamps can be substituted for them.

Notes on Ambient Light

- **Mixed light**
Even if you put much effort on fluorescent lamps, color temperature and color rendering properties will be affected if light from a different light source such as indirect lighting is mixed.
- **The location to place photos**
When photos are placed on a colored mat, the color of the mat may show through the photos affecting their color tones.
- **Outside light**
The sunlight from windows affects the color tones of photos since it changes with time. Outside light should be blocked by curtains or the like.
- **Colorful posters, stationery, etc.**
Reflected light may affect the color tones of photos.

Using a Desk Lamp as a Fill Light

If changing the lighting of the whole room to fluorescent lamps designed for color evaluation is not an option, you can see accurate color tones by using a fluorescent desk lamp.

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > Manual Monitor Adjustment

B009

Manual Monitor Adjustment

In most cases, color temperature, brightness, etc. of a newly purchased monitor are not adjusted. If the color tone of a photo is adjusted on an unadjusted monitor, the color tone displayed on the monitor will differ from that of the printed photo. To avoid such trouble, monitor adjustment is required.

There are two main methods for monitor adjustment. One is manual adjustment; the other is adjustment using a measuring instrument.

The following explains the manual adjustment.

Use the monitor's adjustment function for manual adjustment.

Items that can be adjusted and adjustment methods vary by model. For details, refer to the monitor's manual or contact the manufacturer.

1. Gamma

Changing the value changes saturation (contrast) accordingly. The standard for Mac OS is 2.2.

2. Color Temperature

In the setting for specifying the monitor's white point, values around D50 (5000 K) to D65 (6500 K) are generally recommended in terms of color management.

The color tones of the printed photos will be affected by the color temperature of ambient light.

Therefore, the monitor's color temperature needs to be set according to the color temperature of the ambient light.

When using a neutral fluorescent lamp or D50 fluorescent lamp designed for color evaluation, set the monitor's color temperature to around 5000 K (kelvin).

3. Brightness

It is also called luminance, brilliance, etc., depending on the manufacturer.

Generally, around 120 cd (candelas) is recommended. 120 cd is equivalent to the brightness of approximately 100 W (watts).

Monitor Setting Values Recommended by Canon

Gamma: 2.2

Color temperature: D50 (5000 K)

Luminance: 120 cd/m²

For even higher adjustment accuracy, make adjustments using a measuring instrument.

See "[Monitor Adjustment Using a Measuring Instrument](#)" for details on adjustments.

Tip

Notes on the Environment for Monitor Installation

- **Monitor hood**

When light shines on the display directly, contrast decreases affecting the color tone. By installing a monitor hood, influence of outside light can be reduced. While purchasing a universal hood is an option, a self-made hood is also effective enough.

- **Desktop background**

When a colored background such as an image is used for the desktop, it may affect your sense of color. It is recommended that you set the background to gray on monitors for viewing images.

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > Color Management Using ICC Profiles

B010

Color Management Using ICC Profiles

Each digital device such as a printer or monitor has its own "personality" in representing color tones. Therefore, in order to correctly communicate the image's color tone from a camera to a monitor and then to a printer, each device's "personality" needs to be communicated together.

Concept of a Profile

Without a profile (strong reddish tone)

Profile

With a profile (becomes closer to the original image)

Order to adjust the red tone

The data which describes this "personality" is the profile. By communicating data using profiles, more accurate color management can be performed.

The profile used in the color management system is the ICC profile. See the following page for ICC profiles.

➔ [About ICC Profiles](#)

By creating a custom ICC profile for each of your devices, more accurate color management can be made. See the following pages for how to create ICC profiles.

➔ [Monitor Adjustment Using a Measuring Instrument](#)

➔ [Color Management of the Printer](#)

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > About ICC Profiles

B011

About ICC Profiles

What Is an ICC Profile?

Among profiles, the ICC profile is the standard and used in the color management system complied with ICC (International Color Consortium). There are ICC profiles for a monitor, printer, etc. and they are used to convert each device's unique colors to a common color space. By correctly setting ICC profiles, representation and printing in a common color space can be made possible.

Digital Camera	Input	Conversion	Output	Monitor
		A common color space		
Load a photo	Load the image's ICC profile		Load the monitor's ICC profile	Display the image

ICC profiles can be obtained from the DVD/CD-ROM supplied with the monitor or printer, or from the manufacturer's website. In addition, you can create custom profiles by using a measuring instrument and application.

ICC Profiles for Monitors

Monitor ICC profiles are provided depending on the model.
Contact the corresponding manufacturer for how to obtain them and how to install them.

How to Obtain and Install ICC Profiles for Printing

Canon provides ICC profiles for genuine Canon paper and third party paper*. The ICC profiles are provided after being adjusted and checked one by one so that the print result suitable for each type of paper can be obtained.

*Check the Canon website for the types of third party paper that are available at Canon.

The ICC profiles for genuine Canon paper will be installed with the printer driver. The ICC profiles for paper other than genuine Canon paper can be downloaded from the Canon website. Download and install the profiles you need.

Installation Steps

1. Copy the ICC profile you want to use to the following folder.

From the **Go** menu of **Finder**, select **Computer**, then browse to your HD > **Library** > **ColorSync**, then copy to the **Profile(s)** folder.

Note

- Copy to the above folder to allow all users of the computer to use the installed ICC profile.
- It can also be used by copying to a private **Library** > **ColorSync** > **Profile(s)** folder. In that case, only that user can use it.
- When copying ICC profiles, you may be required to enter a user name and password. In that case, enter the name and password of the user with administrator privileges. See the manual of Mac OS for details on administrator users.

Canon ICC Profile Labels

When you need to specify an ICC profile, specify the ICC profile for the paper to print on. The ICC profiles provided by Canon appear as follows.

Canon XXXXX <GL><PP> 1/2 Photo Paper Plus Glossy&Gold

(1) (2) (3)

(1) Printer model name

(2) Print quality

This corresponds to the **Custom** slider of **Print Quality** in the printer driver and application. The lower the number, the finer the quality.

(3) Media type

Paper names appear as follows.

The following is an example. Supported media types vary depending on your printer.

Paper Name	ICC Profile Label
Photo Paper Pro Platinum	Photo Paper Pro Platinum
Photo Paper Plus Glossy II	Photo Paper Plus Glossy&Gold

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > Monitor Adjustment Using a Measuring Instrument

B012

Monitor Adjustment Using a Measuring Instrument

Monitor adjustment using a measuring instrument adjusts the monitor's setting values automatically with a calibration tool, and adjusts the color tone by creating an ICC profile for the monitor.

Although the items to be adjusted are the same as those of manual adjustment, more accurate adjustments can be made. In addition, by setting the created ICC profile on the computer, you can display accurate color tones.

Note

A commercial measuring instrument and a calibration tool to create ICC profiles by using the measuring instrument are required.

Advantages of Performing Monitor Calibration

■ Accurate retouch

Enables the subtle adjustments of color tones and brightness of the work of art.

■ Accurate color management

No printing for adjustment will be needed since you can print in the same color tones as seen on the monitor, thus saving ink, paper, print time, etc.

■ Reduces the changes in monitor's color reproduction

By periodically creating and using an ICC profile with a calibration tool, changes in monitor's color reproduction can be reduced.

Measurement methods vary depending on your calibration tool. See the manual of the calibration tool for details.

Monitor Setting Values Recommended by Canon

The monitor's gamma, color temperature and brightness may need to be set manually during calibration. In that case, by setting as follows, as recommended by Canon, whiteness of the paper and that on the monitor can be made closer.

Gamma: 2.2

Color temperature: D50 (5000 K)

Luminance: 120 cd/m²

Tip

When Choosing a Monitor

To perform adjustments using a calibration tool, it is required to use a monitor that supports calibration.

In addition, when displaying Adobe RGB images, it is recommended that you use a monitor that supports Adobe RGB.

Monitor Profile

Depending on your monitor, an ICC profile may be supplied with it.

Adjustment can be made by using such; however, when you want to perform more accurate adjustments, it is recommended that you create a profile using a calibration tool.

In Print Studio Pro

Print Studio Pro automatically detects the monitor's ICC profile and displays the preview.

Therefore, when an incorrect profile is set, the image in preview will not be displayed in correct colors. Profiles can also be set manually.

Lesson 2

Color Management Basics

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Color Management Basics > Color Management of the Printer

B013

Color Management of the Printer

Color management has been correctly performed for a newly purchased printer, and it is adjusted to produce appropriate print results. However, due to a large amount of output or long periods of use, there may be substantial transition from the newly purchased state. In that case, by performing calibration of the printer using Color Management Tool Pro, you can make it closer to the newly purchased state. In addition, even when you are using a printer that cannot be calibrated, you can print in a way suitable for the current state by creating an ICC profile.

Printer Calibration and ICC Profile Creation

Printer Calibration

This is the function for reducing changes in the color reproduction due to an environmental change or lapse of time, and for reducing differences in the color reproduction between one printer and another when using more than one printer. When you perform calibration with any of genuine Canon paper, it will be applied to the printer output on other paper as well.

ICC Profile Creation

ICC profiles can be created individually for the paper to be used. As for the printer that has transitioned from the newly purchased state, you can make the print result closer to that originally intended by creating an ICC profile suitable for the printer's current state.

About Color Management Tool Pro

Color Management Tool Pro is a Canon application that offers a printer calibration function and ICC profile creation function.

Although ICC profiles can be created in applications supplied with measuring instruments, you can create ICC profiles more suitable for your Canon printer using Color Management Tool Pro.

Note

- Color Management Tool Pro can be downloaded by accessing our website via the Internet.
- To use Color Management Tool Pro, a commercial measuring instrument is required. See Help of Color Management Tool Pro for supported measuring instruments.

Printer Calibration Function

For some Canon printers, printer calibration can be performed by using Color Management Tool Pro. The flow of printer calibration is as follows.

1. Print a chart.

Specify print settings according to the printer and paper to be used, then print a chart.

2. Calibrate the measuring instrument.

Prepare a measuring instrument.

3. Enter print settings.

Enter the print settings described in the printed chart.

4. Measure the chart.

5. Calibrate the printer.

Calibrate the printer based on the measured data.

ICC Profile Creation Function

In Color Management Tool Pro, users can create custom printer ICC profiles. The flow of ICC profile creation is as follows.

1. Print a chart.

Specify print settings according to the printer and paper to be used, then print a chart.

2. Calibrate the measuring instrument.

Prepare a measuring instrument.

3. Enter print settings.

Enter the print settings described in the printed chart.

4. Measure the chart.

5. Create an ICC profile.

Create an ICC profile from the measured data.

See Help of Color Management Tool Pro for details on the operation procedure.

Lesson 3 Utilizing Print Studio Pro

Print Studio Pro is a plug-in for Digital Photo Professional, Photoshop, Photoshop Elements and Lightroom. As shown in the figure below, it helps facilitate the creation of artworks by using a different function for each objective.

The following introduces some of the convenient functions of Print Studio Pro.

Print Studio Pro

Color management items that can be selected may vary depending on your printer.

Color Management in Print Studio Pro

A different color mode is provided for each objective. You can print in high quality more easily by simply selecting a color mode according to the objective.

🟡 When you want to print with an impression close to that on the monitor

➡ Printing with an Impression Close to That on the Monitor

🟢 When you want to print according to the characteristics of the paper to be used

➡ Printing Using ICC Profiles

🟣 When you want to perform black and white printing

➡ Black and White Printing

- ➔ [Adding Text to Works of Art](#)

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Printing with an Impression Close to That on the Monitor

B015

Printing with an Impression Close to That on the Monitor

In Print Studio Pro, you can print with an impression close to that on the monitor by correctly reflecting the characteristics of the data displayed on the monitor.

You do not need to make test prints or adjustments repeatedly since you can develop/correct photos while previewing the print results on the monitor.

Monitor Settings and Ambient Light Recommended by Canon

When using this function, it is recommended that you set the monitor and ambient light as follows.

- **Monitor**

Color temperature: D50 (5000 K)

Luminance: 120 cd/m²

Gamma: 2.2

- **Ambient light**

D50 fluorescent lamps designed for color evaluation (color temperature: 5000 K, high color rendering properties)

Brightness when viewing printed materials: 500 lx ± 125 lx

Select a color mode according to the color space of the image to be printed. Canon recommends the following combinations.

Color Space	Color Mode
Adobe RGB	Use ICC Profile (Rendering Intent: Perceptual)
sRGB	PRO Mode

Note

When **PRO Mode** is selected for images whose color space is other than sRGB, Print Studio Pro converts it to an appropriate color space automatically.

Tip

When Printing JPEG Format Images

Most of images shot in JPEG format are in the sRGB color space. It is recommended that you avoid making corrections and other edits in image editing software as much as possible and print in **PRO Mode**.

See *Print Studio Pro Guide* for details on the operation procedure.

 Page top

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Printing Using ICC Profiles

B016

Printing Using ICC Profiles

In Print Studio Pro, you can print by specifying an ICC profile easily.

By using ICC profiles, you can utilize the printer's color space and print in a wider gamut. In addition, you can obtain high quality print results since printing tailored to the paper to be used is performed.

You need to specify the ICC profile according to the paper to be used since an ICC profile is provided for each type of paper; however, ICC profiles will be set automatically when using genuine Canon paper. When using third party paper, you can download ICC profiles from the Canon website. Download and install the ICC profile for the paper to be used, then specify it in Print Studio Pro.

Check the Canon website for the types of third party paper for which Canon provides ICC profiles.

When printing using ICC profiles, print results are affected by the selected rendering intent. Select a rendering intent according to the objective.

Perceptual: Prints by utilizing the color space that can be reproduced on the printer.

Select this when you want to print with an impression close to that on the monitor since the characteristics of the data displayed on the monitor will be reflected correctly. See "[Printing with an Impression Close to That on the Monitor](#)" for details.

Relative Colorimetric: Converts the image to the printer's color space in a way that the image's colors that are within the color gamut of the printer are reproduced to the nearest level. Select this when you want to print in colors that are close to the original image.

In addition, when using a Canon PRO/Pro series inkjet printer, you can obtain similar print results on any model by printing with **Relative Colorimetric** selected. Select this when you want to print in color tones close to those of the results printed on other Canon PRO/Pro series inkjet printers.

See "[Color Management Using ICC Profiles](#)" for details on ICC profiles.

See *Print Studio Pro Guide* for details on the operation procedure.

Tip

About Color Management Module (CMM)

A color management module (CMM) is a component that converts colors of a device such as a monitor or printer by using the device's profile.

To switch the color management module (CMM) in Print Studio Pro, select the color management module (CMM) you want to use from **Color Matching Method** in the Settings area (Color Management).

- **Color Matching Method** can be set only when **Use ICC Profile** is selected for **Color Mode**. Select **Adobe CMM** when you want to print in the same color tones as when printing directly

from Photoshop or other products of Adobe Systems Incorporated.

- To use **Adobe CMM**, you need to install "Adobe Color Management Module (CMM)."

Download from the Adobe Systems Incorporated website. There are some restrictions on the usage environment; see the Adobe Systems Incorporated website for details.

- **Adobe CMM** can be selected only when using 32-bit OS.

- ICC profiles provided by Canon are designed to allow you to obtain appropriate print results when not using black point compensation. Therefore, it is recommended that you deselect the **Use black point compensation** checkbox of **Color Management** when printing.

When Printing Directly from Photoshop

You can also print by specifying the ICC profile even when printing directly from Photoshop.

In Color Management of Photoshop, select **Photoshop Manages Colors**, then specify a profile according to the paper to print on in Printer Profile.

- Deselect the **Black Point Compensation** checkbox.

Select **Color Matching** from the Print dialog pop-up menu, then select **ColorSync**.

- Options other than **ColorSync** may not be selectable depending on your application.

When Printing from Applications in which ICC Profiles Cannot be Set

When printing from applications in which ICC profiles cannot be set, you can specify an ICC profile in the printer driver.

Select **Color Matching** from the Print dialog pop-up menu, then select **ColorSync**.

- When **Profile** can be set, it is recommended that you select **Automatic**.

When the selected **Profile** is neither **Automatic** nor a profile for the media, you cannot print in the correct colors.

Next >

▲ Page top

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Color Adjustment in Color Printing

B017

Color Adjustment in Color Printing

In Print Studio Pro, you can adjust color tones for printing.

Correct colors of each image in image editing software. After printing the corrected images, if the colors displayed on the monitor and those of the printed materials are different, make fine adjustments in Print Studio Pro.

Registering specified settings is convenient since you will not need to make fine adjustments each time.

All photos are redder than expected when printed

Adjust the color tones to turn the photos into what you expected

See *Print Studio Pro Guide* for details on the adjustment procedure.

Pattern Print

By using the Pattern Print function, you can view multiple images with varying color tones at one time. Thumbnails with slightly varying brightness, color tone and contrast values are printed side by side, and the setting values appear below the thumbnails; you can perform precise color adjustment by entering the values of the selected thumbnail. You can avoid the problem that the color tone of the print result is different from what you want since you can make adjustments while viewing the actual color tones to be printed.

See *Print Studio Pro Guide* for details on the operation procedure.

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Black and White Printing

B018

Black and White Printing

In Print Studio Pro, you can easily print black and white photos in high quality by selecting the **Print Black and White Photo** checkbox.

On Canon PRO series inkjet printers, you can perform black and white printing suitable for black and white photos. When the **Print Black and White Photo** checkbox is selected, a stable gray balance is achieved since more gray ink and black ink are used compared to color printing, and you can print black and white photos with rich gradation and little color shift.

Printing Black and White Photos in Black and White

Print photos shot in black and white or images converted to black and white in image editing software, in black and white, in Print Studio Pro.

Steps

1. Prepare a black and white photo.

Prepare a photo shot in black and white or an image converted to black and white in image editing software.

Tip

Adjusting Black and White Photos

It is recommended that you use image editing software to make adjustments (conversion of data to black and white, brightness adjustment, etc.) other than black and white color tone adjustment.

Black and White Printing on Canon PRO Series Inkjet Printers

The black and white printing on Canon PRO series inkjet printers is suitable for printing data whose color space is sRGB. Gradation will be printed smoothly

when the color space is set to sRGB at the time of RAW development.

2. Open the image in **Print Studio Pro**, then select the **Print Black and White Photo** checkbox.
3. Adjust the colors of the photo according to how you want it to look.
→ [Color Adjustment in Black and White Printing](#)
4. Print.

Note

In **Print Studio Pro**, when the **Print Black and White Photo** checkbox is selected, images are converted to black and white data suitable for Canon PRO series inkjet printers to perform highly accurate color adjustment. Therefore, the color tones of images cannot be retained. When you want to adjust tones such as Warm Tone and Cool Tone or color tones, adjust them after selecting the **Print Black and White Photo** checkbox in **Print Studio Pro**.

Printing Color Photos in Black and White

In **Print Studio Pro**, you can print color photos in black and white without turning them into black and white in image editing software.

Select the **Print Black and White Photo** checkbox and print.

Printing Monotone Photos

By printing as color photos, you can print images whose colors have been adjusted to a monotone color such as sepia or red in image editing software while retaining the adjusted color tones.

Sepia

Blue

Purple

Green

Steps

1. Open the image in **Print Studio Pro**, then deselect the **Print Black and White Photo** checkbox.
2. Print.

◀ Back

Next ▶

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

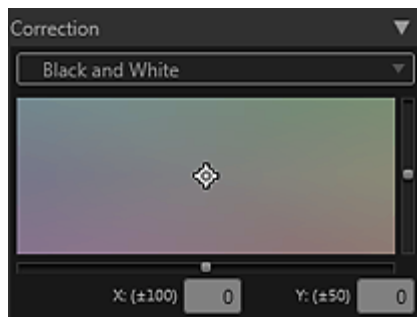

Digital Photo Printing Guide > Utilizing Print Studio Pro > Color Adjustment in Black and White Printing

B019

Color Adjustment in Black and White Printing

Color tones in black and white printing are delicate. In Print Studio Pro, you can finely adjust color tones for black and white printing. Produce subtle color tones by combining with color adjustment of the image editing software. In addition, you can print with the same settings repeatedly since the specified settings can be registered.

Besides selecting **Cool Tone**, **Black and White** or **Warm Tone**, you can finely adjust colors. In addition, in order to find the color tone you want, you can utilize Pattern Print to view images with slightly varying color tones at one time.

Before adjustment

Reddish

Bluish

See *Print Studio Pro Guide* for details on the operation procedure.

Tip

Color Tones Suitable for Photos

Even for black and white photos, the impression changes with the color tone. To transform a black and white photo into the work of art you wish, the color tone needs to be adjusted

according to how you want the work to look.

Example:

Photos of people: Select a warm color such as Warm Tone for a warm finish.

Photos of buildings: Select a cool color such as Cool Tone for a clean finish.

< Back

Next >

▲ Page top

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

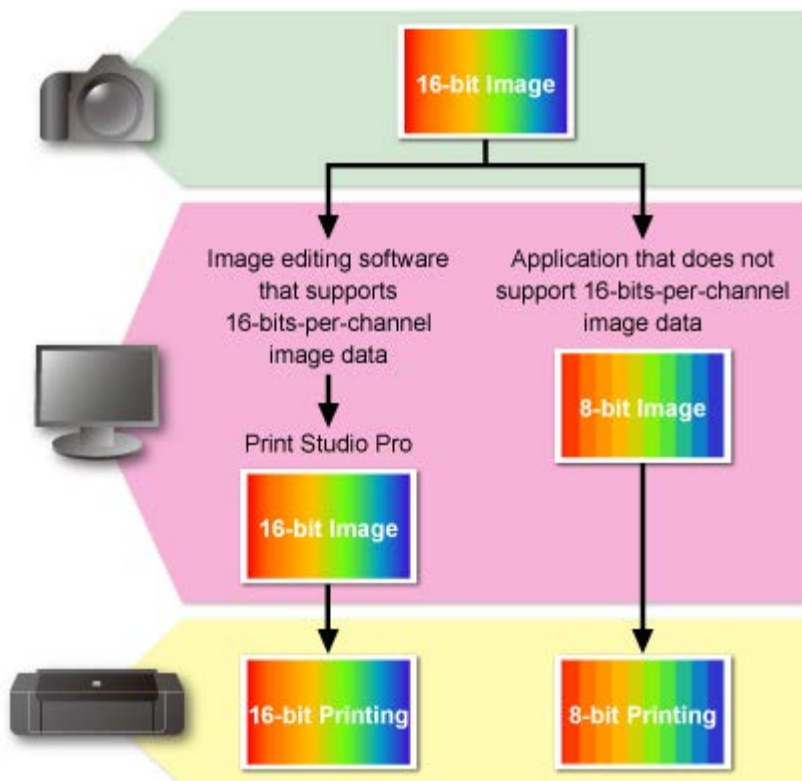

Digital Photo Printing Guide > Utilizing Print Studio Pro > 16-bit Printing

B050

16-bit Printing

Since Print Studio Pro supports 16-bits-per-channel image data, you can receive the data as is from image editing software without degrading it, and print High Dynamic Range images (full 16-bit workflow).

When performing color adjustment in image editing software, adjusting in 16 bits per channel reduces degradation of image quality due to banding (gradient stepping). In addition, printing High Dynamic Range images (full 16-bit workflow) produces smoother gradations compared to printing 8-bits-per-channel images.

Note

Even when the shot photo is 8-bits-per-channel image data, the color adjustment performed in Print Studio Pro is processed in 16 bits per channel; therefore, you can print with smooth

gradations by printing it as a High Dynamic Range image.

See *Print Studio Pro Guide* for details on the operation procedure.

Tip

1200 ppi Input Supported

When using a printer that supports 1200 ppi input, you can send image data to the printer driver without reducing it. (This function may not be available depending on the paper to be used and print quality.)

< Back

Next >

▲ Page top

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Clear Coating Print

B051

Clear Coating Print

Clear Coating Print is a function that adjusts glossiness by applying the Chroma Optimizer (CO) ink to the printed surface.

When Clear Coating Print is performed, surface irregularities due to pigment ink use will be evened and glossiness variation will be reduced. This prevents unnecessary light reflection, improving the intensity of the printed material.

In the Clear Coating Print function of Print Studio Pro, you can specify the area to which the Chroma Optimizer (CO) ink is applied.

Note

- This function is available on the printers that support the Chroma Optimizer (CO) ink.
- This function is available only when the selected media type is glossy paper.

■ Examples of Areas for Application

Shaded area: The area to which the Chroma Optimizer (CO) ink is applied

Original image

When the **Clear coat the entire page** checkbox is selected

When the **Clear coat the entire page** checkbox is not selected

Note

When the **Clear coat the entire page** checkbox is not selected, the ink is not applied to the white areas in the image as well; therefore, areas with and without the Chroma Optimizer (CO) ink applied will coexist in the image, which may cause awkwardness. In that case, it is recommended that you apply the Chroma Optimizer (CO) ink to the entire print area.

See *Print Studio Pro Guide* for details on the operation procedure.

Lesson 3

Utilizing Print Studio Pro

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Utilizing Print Studio Pro > Adjusting Margins

B052

Adjusting Margins

In Print Studio Pro, you can set margins. Wider margins give a softer impression.

It is inevitable that paper degrades with time. Since paper degrades from its edges, you can reduce degradation of photos by adding margins. Margins are also used when you want to sign the work of art or when framing it.

You can adjust margins by entering values directly or by specifying the image size. You can also create even margins at the top and bottom or on the left and right by using the alignment function.

See *Print Studio Pro Guide* for details on the operation procedure.

▲ [Page top](#)

Lesson 4

Techniques for Specific Objectives

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

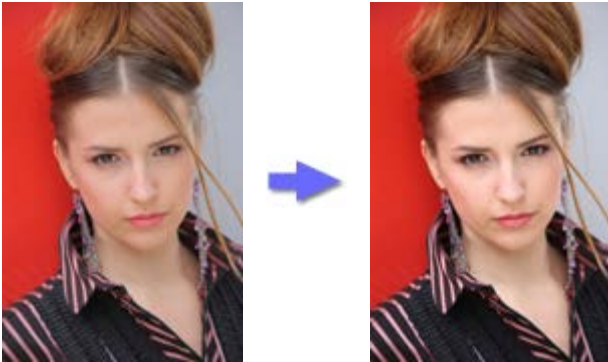

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Printing People's Skin Beautifully

A522

Printing People's Skin Beautifully

People's skin colors often attract attention when viewed in photos, and human eyes are very sensitive. Therefore, adjustments need to be made carefully since even a slight change in the color tone affects the outcome of works of art. Make skin colors smooth by adjusting brightness and contrast.

Point for Shooting: "Considering White Balance"

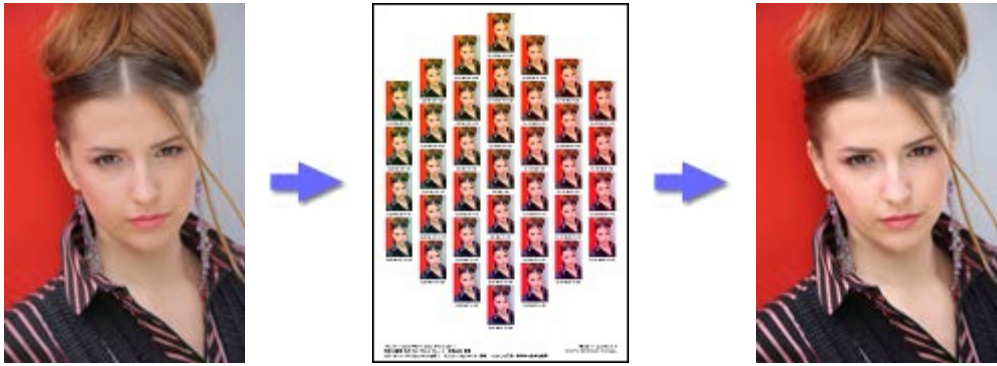

Incorrect white balance affects the skin color. It is convenient to shoot a color chart together with the subject, which makes it easier to identify the original white and gray. By shooting in RAW format, you can correct white balance upon development.

Point for Development/Correction: "Avoid Increasing Contrast and Sharpness Too Much"

Adjust contrast and sharpness while focusing on the skin, not the entire image. Decreasing contrast reduces small wrinkles, pores, etc. and the skin can be rendered smooth. Adjust sharpness so as not to lose smoothness of the skin.

Point for Printing: "Fine Adjustments Utilizing Pattern Print"

If the print result is not satisfactory even after correction, by using the Pattern Print function of Print Studio Pro, you can view multiple images with slightly varying color tones at one time, and can perform fine color adjustment accurately.

See ["Color Adjustment in Color Printing"](#) for details on color adjustment.

Next >

Lesson 4

Techniques for Specific Objectives

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Printing Flowers in Vivid Colors

A523

Printing Flowers in Vivid Colors

It is desirable that photos of beautiful flowers convey natural vivid colors to their viewers. This will provide a three-dimensional feel with the flowers while bringing out vividness of their colors by utilizing the printer's color space.

Point for Shooting: "Shoot Clear, Non-blurry Photos"

Be careful with camera shake when shooting close-ups. If the printed image looks unclear, check that the photo is not blurry.

Point for Development/Correction 1: "Use the Adobe RGB Color Space"

You can utilize the printer's color space since the Adobe RGB is a wider color space than sRGB.

By shooting in RAW format, you can select a color space when developing/correcting. When changing the color space, remember to change the image editing software's working color space.

When shooting in JPEG format, set the camera's color space to Adobe RGB beforehand.

See ["About Color Spaces"](#) for details on color spaces.

Point for Development/Correction 2: "Avoid Increasing Contrast and Sharpness Too Much"

Gradation is important for macro photos (close-up photos). When you correct contrast or sharpness, be careful not to lose the smooth gradation by increasing it too much.

Point for Printing 1: "Print Using ICC Profiles"

By specifying an ICC profile in Print Studio Pro, you can fully utilize the printer's color space.

See ["Printing Using ICC Profiles"](#) for printing using ICC profiles.

Point for Printing 2: "Select Glossy Paper"

Select glossy paper when you want to represent vivid color tones.

When printed on glossy paper

When printed on matte paper

Tip

Matte paper is suitable for soft photos.

See "[Media Types](#)" for details on media types.

Lesson 4

Techniques for Specific Objectives

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Printing the Blue of the Sea in Vivid Hues

A524

Printing the Blue of the Sea in Vivid Hues

The blue of the sea, a mixture of complex colors, is one of the color tones that are difficult to reproduce. You can bring out the vivid blue of the sea by combining the settings of image editing software and Print Studio Pro, and by utilizing the printer's color space.

Point for Development/Correction 1: "Use the Adobe RGB Color Space"

You can utilize the printer's color space since the cyan channel of the Adobe RGB color space is wider than that of sRGB.

By shooting in RAW format, you can select a color space when developing/correcting. When changing the color space, remember to change the image editing software's working color space.

When shooting in JPEG format, set the camera's color space to Adobe RGB beforehand.

See "[About Color Spaces](#)" for details on color spaces.

Point for Development/Correction 2: "Adjust Saturation"

By adjusting saturation using image editing software, you can emphasize vividness. Increase saturation while looking at not only the color of the sea but also the entire image so as not to lose the gradation.

Point for Printing: "Print Using ICC Profiles"

By specifying an ICC profile in Print Studio Pro, you can fully utilize the printer's color space.

See "[Printing Using ICC Profiles](#)" for printing using ICC profiles.

< Back

Next >

Lesson 4

Techniques for Specific Objectives

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Being Particular about Color Tones of Black and White Photos

A525

Being Particular about Color Tones of Black and White Photos

To transform a black and white photo into a high quality work of art, perfect the color by adjusting it to how you want the work to look, and by considering how you want it to be seen.

Point for Development/Correction: "Adjust Brightness"

Convert color photos to black and white using image editing software. Since black and white photos lack color, the impression of the work of art changes with brightness. Correct brightness to make it closer to what you want.

Point for Printing 1 "Determine the Color Tone"

Even black and white photos have various color tones. Color tone adjustment according to how you want the work of art to look is as an important factor as it is for color photos. When performing black and white printing in Print Studio Pro, you can select from the following three color tones.

Cool Tone	Neutral Tone	Warm Tone
A cool bluish color tone; effective when you want to give a stylish, sharp impression	A color tone that looks like an achromatic color	A warm yellowish color tone; effective when you want to convey a subtle sense of familiarity
		

Point for Printing 2 "Perfect the Color"

Make the color tone of the work of art closer to what you want. In Print Studio Pro, you can create subtle colors since fine adjustments are possible aside from color tone selection. By additionally using the Pattern Print function, you can perform accurate color adjustment while checking the print result.

See "[Color Adjustment in Black and White Printing](#)" for details on color adjustment.

Point for Printing 3 "Color Adjustment According to Paper"

When you perform color adjustment according to the paper to be used, the work of art will be more delightful.

- **Photo Paper Plus Semi-gloss**

One of the points to remember is to adjust colors so that the gradation is represented properly.

- **Fine Art Paper "Museum Etching"**

There is also a technique to adjust the color so that the texture of paper shows through by deliberately creating blocked-up shadows in part of the photo.

Lesson 4

Techniques for Specific Objectives

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Producing Creative Layouts

A530

Producing Creative Layouts

As for works of art displayed at a museum or gallery, the photos are wonderful in themselves, but their layouts (size, margins, frames, etc.) are also well considered. Be creative with the layout as well, since the impression of the same printed photo will differ completely depending on the layout.

Point for Development/Correction: "Cropping"

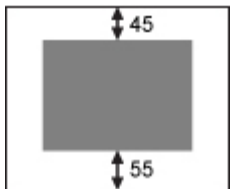

Cropping is also one of the important points for creating works of art as you wish. If there is something unnecessary shot into the edge of the photo, you can cut it off using image editing software after shooting. Digital Photo Professional also has a function for adjusting angles for cropping, which is convenient to adjust angles of photos containing the horizon, skyline, etc. However, note that extensive cropping may reduce the number of pixels and may consequently degrade the image quality of printed materials.

See "[Numbers of Pixels and Print Sizes](#)" for the number of pixels.

Point for Printing 1 "Differentiate Top and Bottom Margins"

When a photo is framed, it appears shifted downward even if it is centered; set the bottom margin of the photo slightly wider than the top margin to make it look centered in the frame. Adjust the margins so that the top to bottom ratio is around 45 to 55.

See "[Adjusting Margins](#)" for details on margin adjustment.

Point for Printing 2 "Try Making the Margins Black"

Some works of art may stand out more with black margins. In addition, this is effective when you want to change the atmosphere easily.

When margins are white

When margins are black

See "[Printing Margins in Black](#)" for details on the setting to make margins black.

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Techniques for Specific Objectives > Using Appropriate Paper

A531

Using Appropriate Paper

Paper also greatly affects the impression of the work of art. Paper differs in texture and whiteness besides being glossy, matte, etc. By selecting paper suitable for the atmosphere of the work of art, you can make the work of art closer to what you want.

Point 1 "Insist on Paper Texture"

Besides glossy paper, there are many types of paper with different texture such as art paper and matte paper. By simply changing the paper to be used, the impression of the printed material changes even for the same photo. Try various types of paper.

Point 2 "Insist on the Whiteness of Paper"

When comparing various types of paper, you will find that "whiteness" varies by paper. Since highlights in a photo are affected by the "whiteness" of paper, the impression of the photo will differ completely depending on the paper type even when the photo is printed with the same settings. By focusing on the "whiteness" when selecting paper, you can print according to how you want the work of art to look.

Canon provides ICC profiles that allow you to print properly even when using third party paper. See "[Printing Using ICC Profiles](#)" for details on printing using ICC profiles.

See "[Media Types](#)" for details on paper.

[Useful Information](#)

Digital Photo Printing Guide > Useful Information > RAW Images and JPEG Images

A533

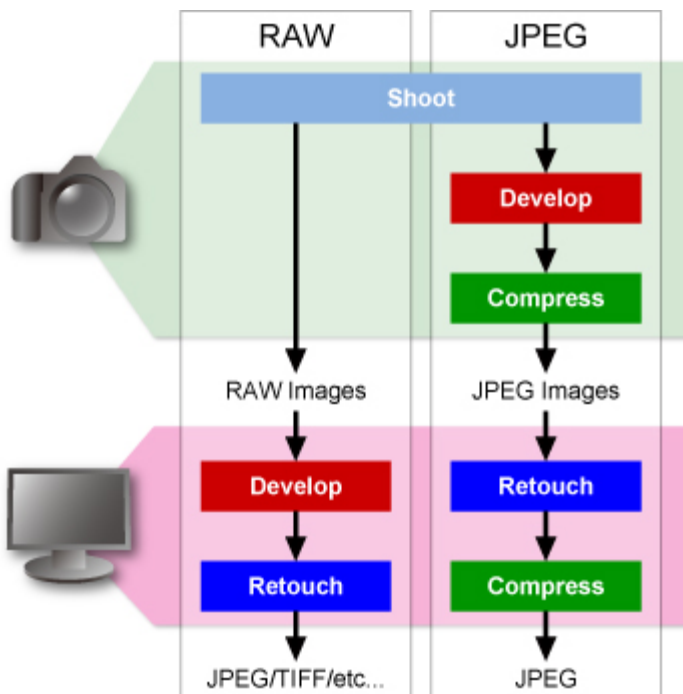

RAW Images and JPEG Images

The file formats used in digital cameras are RAW format and JPEG format.
Understand the differences between these file formats and use them accordingly.

What Is RAW Image?

Besides JPEG format which is widely used as a file format for photos, some digital cameras support shooting in RAW format.

The characteristics of RAW format are that it allows you to perform the development process after shooting and that its image quality does not degrade from development. However, as all the information captured by the image sensor will be stored, the file size becomes large. In addition, it cannot be handled in some applications.

Differences between RAW Images and JPEG Images

RAW images and JPEG images have the following advantages and disadvantages.

	RAW Images	JPEG Images
Advantage	<ul style="list-style-type: none"> Adjustable after shooting Image quality does not degrade from editing 	<ul style="list-style-type: none"> Small file size Supported by many applications Large number of images can be shot with continuous shooting
Disadvantage	<ul style="list-style-type: none"> Large file size Not supported by some applications 	<ul style="list-style-type: none"> Image quality degrades when saved

It is recommended that you select a format according to your requirements; for example, shoot snapshots in JPEG format and shoot in RAW format to edit after shooting.

Tip

What Is the Extension for RAW Images?

The extension for RAW format is unique to each camera manufacturer. The extension for RAW format shot with Canon digital cameras is ".CR2."

Appendix Useful Information

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

[Useful Information](#)

Digital Photo Printing Guide > Useful Information > Numbers of Pixels and Print Sizes

A534

Numbers of Pixels and Print Sizes

While a larger number of pixels makes it possible to depict finer details, the file size also becomes larger, meaning more time will be taken to save the image immediately after shooting. Note that if a large number of pixels is set, you may miss an opportunity to capture an important moment during sports photography or in other situations where continuous shooting is required.

Print Sizes and Corresponding Approximate Numbers of Pixels

The following numbers of pixels are approximate values for printing at the resolution of 300 dpi.

Number of Pixels (pixels)	Print Size
4961 x 3508 (approximately 17.4 million)	A3 size
3508 x 2480 (approximately 8.7 million)	A4 size
2480 x 1748 (approximately 4.3 million)	A5 size
1748 x 1181 (approximately 2.05 million)	Hagaki 4" x 6"
1500 x 1051 (approximately 1.6 million)	L 3.5" x 5"

High pixel photo

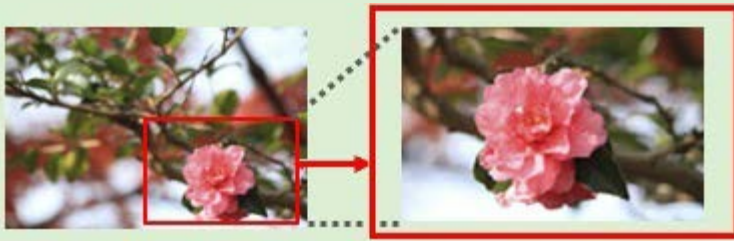

Low pixel photo

Tip

Shoot with Large Number of Pixels when Cropping

Even if the number of pixels is sufficient, it will decrease when the image is cropped. When cropping, measures such as shooting with a large number of pixels in the first place are required.

Original image (16 megapixels)

After cropping (4 megapixels)

Appendix Useful Information

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Useful Information > Media Types

A535

Media Types

Various types of paper can be selected for inkjet printers. Even when the same image is printed, its impression will differ greatly depending on the selected paper type.

Paper selection is an important factor for creating works of art as you wish.

Photo Paper

Photo paper is broadly classified into glossy paper, semi-gloss paper, matte paper, etc. depending on the surface finish. The difference in surface finish greatly affects the impression of the work of art in terms of the depth of black, purity of white, contrast, glossiness, etc.

Fine Art Paper

Fine art paper mainly uses art paper or the like as the base paper, and is mostly thick and varies in surface finish; it is thus recommended when you want to give a solid and heavy feel or rich texture to the work of art.

Genuine Canon Paper

Genuine Canon paper includes the following types of paper.

Photo Paper	
Photo Paper Pro Platinum	Glossy paper for professionals and experienced amateurs featuring uncompromising quality from texture to performance
Photo Paper Plus Glossy II	Glossy paper with quality thickness and firmness featuring deep black, rich colors and high color development from immediately after printing
Photo Paper Pro Luster	Quality "microporous" glossy paper that is relatively insensitive to lighting variation when displayed and is superior in instant drying characteristics
Photo Paper Plus Semi-gloss	Quality semi-gloss paper that exhibits an elegant texture
Matte Photo Paper	Matte paper with a soft appearance and low glare
Fine Art Paper	

Fine Art Paper "Museum Etching"

Thick fine art paper with natural white color tone
maintaining the roughness (texture) of
"unbleached" paper

Appendix Useful Information

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Useful Information > Types of Ink

A536

Types of Ink

There are two types of ink for inkjet printers: pigment ink and dye ink.

The type of ink that can be used vary by printer, and there are models that adopt pigment ink and those that adopt dye ink among Canon printers as well.

Pigment Ink and Dye Ink

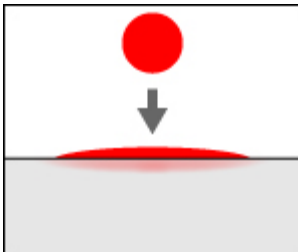

■ Pigment Ink

Pigment is a particulate water-insoluble coloring material; ink particles remain on the paper surface. Because of the water insolubility, blurring can be reduced even when wet. In addition, colors are stable from immediately after printing and relatively insensitive to environmental factors; storage stability of the printed material is excellent. However, when printed on glossy paper, careful handling is required since the ink may come off if scratched.

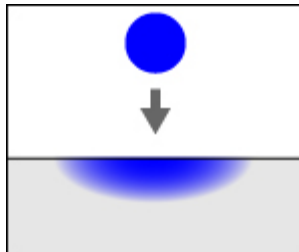

■ Dye Ink

Dye is a water-soluble coloring material; ink seeps into the paper together with the water contained in the ink. The ink leaves no roughness on the paper, and the print result will be more vivid than that of pigment ink. However, depending on the paper to be used, when the paper gets wet, the ink that has seeped into the paper may be mixed with the water, resulting in blurring.

Pigment Ink

Dye Ink

Characteristics of Pigment Ink and Dye Ink

	Pigment Ink	Dye Ink
Advantage	<ul style="list-style-type: none">Colors are stable from immediately after printingStorage stability of the printed material is good	<ul style="list-style-type: none">Produces vivid color tonesCompatible with many types of paper

Disadvantage

- The ink may come off
- More variation in glossiness when printed on glossy paper compared to dye ink
- May blur when wet
- Storage stability of the printed material may be lower compared to pigment ink

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Useful Information > Storage and Framing of Works of Art

A537

Storage and Framing of Works of Art

When you have successfully created a work of art as you wish, store or display it appropriately.

Notes on Storing Works of Art

Degradation of works of art is mainly caused by light and air. Try to minimize exposure to light and air.

- Increase airtightness by storing in albums, framing, etc.
- Avoid storing or displaying in places subject to strong light such as direct sunlight
- Control the humidity so that the works of art do not absorb moisture
- For important works of art, create multiple copies and use separate copies for display and storage

Although none of the above measures are perfect, appropriate storage is important for extending the lifetime of works of art.

Framing

Framing has the following advantages.

- **Makes the work of art more attractive**

The work of art will stand out more if a frame that matches its intent is applied. Apply a frame suitable for the place where the work of art is displayed or the atmosphere of the work of art.

- **Protects the work of art from degradation and damage**

It helps protect the work of art from damage caused by physical contact or water.

Notes on Framing

Be aware of the following when working on framing and during display.

- Dry the work of art for 24 hours or more before framing it
- Do not use acidic or adhesive laminate film
- When using a glass cover, avoid its direct contact with the photo
- White parts may turn yellowish when UV protection coating is sprayed

Techniques for Specific Objectives

[Useful Information](#)

Digital Photo Printing Guide > Useful Information > Development/Correction in Digital Photo Professional, Photoshop, Photoshop Elements and Lightroom

A538

Development/Correction in Digital Photo Professional, Photoshop, Photoshop Elements and Lightroom

You can develop/correct RAW images in Digital Photo Professional, Photoshop, Photoshop Elements and Lightroom.

The following briefly introduces the frequently used functions.

See the manual of each software for details on the setting procedure.

Exposure

Exposure refers to the amount of light captured by the image sensor during shooting. Overexposed images are light colored and lack gradations in highlights. Underexposed photos lack details in shadows and noise appears there. Exposures during shooting can be corrected by adjusting brightness.

■ Example of Exposure Correction

Before correction

After correction

The "highlight/shadow warning" function that warns of blown-out highlights and blocked-up shadows is useful for checking exposure failure and for avoiding excessive adjustment. However, if there is a blown-out highlight or blocked-up shadow in the shot image, it cannot be touched up even after correction.

■ Highlight Warning

Displays the blown-out highlights in red.

Off

On

■ Shadow Warning

Displays the blocked-up shadows in blue.

Off

On

In exposure adjustment during RAW development, the adjustment range is narrow and image quality degradation occurs. Be sure to make substantial adjustments upon shooting so that only the minimum correction is required during development.

White Balance

The color tone of the entire image is affected by the light source (sunlight, fluorescent lamp, incandescent lamp, etc.) for shooting. Even when the same "white" is shot, it may turn bluish white or reddish white depending on the light source. The function to correct such phenomenon so that the "white" will appear the same as the original "white" is called white balance.

■ Example of White Balance Correction

Before correction

After correction

You can make finer adjustments by using the white balance fine adjustment function, color temperature correction and color cast correction.

Picture Style (Digital Photo Professional)

Picture Style is a function that allows you to make images closer to what you want by simply selecting a matching style. Portrait, landscape, etc. are available.

Noise Reduction

Graininess and noise may appear in photos shot with high sensitivity or with other settings. Such graininess and noise can be reduced by the noise reduction function.

Appendix Useful Information

Digital Printing Workflow

Color Management Basics

Utilizing Print Studio Pro

Techniques for Specific Objectives

Useful Information

Digital Photo Printing Guide > Useful Information > Color Adjustment Performed on Digital Cameras

A539

Color Adjustment Performed on Digital Cameras

Advanced Function for Direct Printing from Your Camera

PictBridge-compatible Canon digital cameras have an advanced function that allows you to set print effects.

Note

Settings are available only when a Canon digital camera supporting the advanced function is connected to a Canon PRO series inkjet printer.

Color Mode Setting

There are five color modes for image optimization (PrintEffect): **Natural**, **Natural M**, **B/W**, **Cool tone** and **Warm tone**.

See the manual of your PictBridge-compatible Canon device for details on the setting procedure.

Natural

Prints in color tones close to those of the photos shot with a digital camera.

When a setting such as "Picture Style" is set, its effect will be reflected in the print results.

Natural M

Prints after adjusting the color tones (brightness, contrast, etc.) of photos shot with a digital camera.

B/W

Produces a black and white photo with a tone that looks like an achromatic color.

Cool tone

Produces a black and white photo with a cool bluish color tone.

Warm tone

Produces a black and white photo with a warm yellowish color tone.

Adjusting Colors before Printing

Select **Natural M** in image optimization (PrintEffect) to print in the specified color.

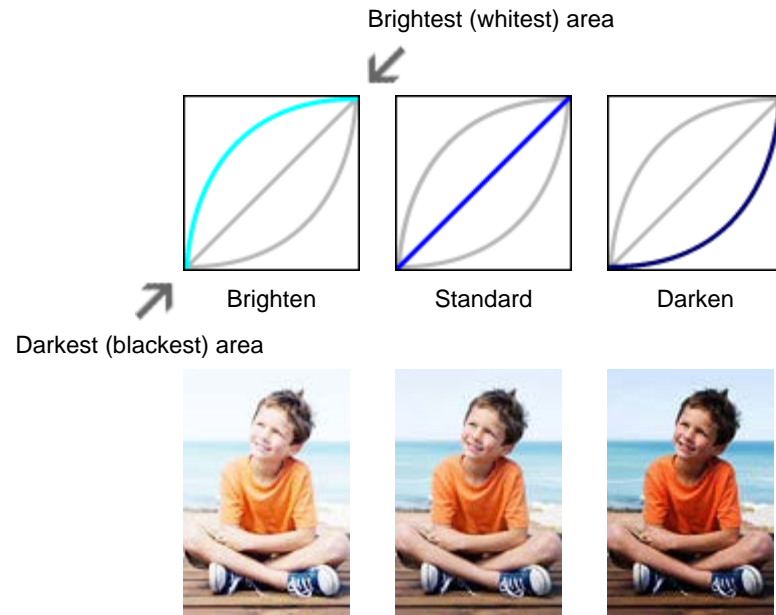

Setting "Brightness" and "Adjust levels"

You can set "Brightness," "Adjust levels" and "Red-eye corr. (Red-eye correction)" for printing.

Brightness Correction

You can adjust the overall image brightness by increasing or reducing the midtone brightness, without changing the colors of the darkest (blackest) and brightest (whitest) areas.

Even for a photo of "blue sky and shadows," you can make the shadowy areas clearer by "brightening" the photo.

Level Adjustment

By detecting the darkest (blackest) and brightest (whitest) areas automatically or by specifying them, you can print images suitable for the midtone brightness.

Exposure can be corrected even if set incorrectly when shooting an image.

Auto

Detects the darkest (blackest) and brightest (whitest) areas of an image by analyzing it, then adjusts to the appropriate level.

Manual

Specify the darkest (blackest) and brightest (whitest) areas and adjust to the desired level.

Red-eye Correction

Corrects red eyes caused by a camera flash.

Setting "Contrast," "Saturation," "Color tone" and "Color balance"

You can set "Contrast," "Saturation," "Color tone" and "Color balance" in **Detail set.** in **Natural M.**

Contrast Adjustment

You can adjust the overall image sharpness by increasing or reducing the contrast of the midtone brightness, without changing the colors of the darkest (blackest) and brightest (whitest) areas.

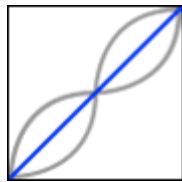

You can improve images lacking sharpness by "emphasizing" the contrast to turn them into sharp images.

Brightest (whitest) area

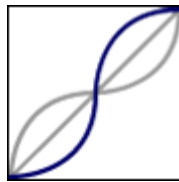

Reduce

Standard

Emphasize

Darkest (blackest) area

Saturation Adjustment

You can adjust the overall image vividness by increasing or reducing saturation, without changing the colors of the darkest (blackest) area, gray axis and brightest (whitest) area.

Emphasize

Makes colors of flowers, etc. more vivid.

Reduce

Reduces redness of skin, etc.

Color Tone Adjustment

You can adjust the overall image color tone by rotating the hue, without changing the colors of the darkest (blackest) area, gray axis and brightest (whitest) area.

+ (+ adjustment)

Makes skin tones yellower.

- (- adjustment)

Makes skin tones redder.

+

Standard

-

Color Balance Adjustment

You can adjust the overall image colors by shifting midtone colors, without changing the colors of the darkest (blackest) and brightest (whitest) areas.

You can reduce the blueness of bluish images, such as a shadowy area under blue sky, by adjusting the color to be yellower or redder.

When the colors of shot images are different from human memory colors (pure white of wedding dresses, red of tomatoes, etc.), you can adapt those colors to be closer to memory colors.

General Notes (My Image Garden)

My Image Garden is subject to the following restrictions. Keep these points in mind.

- See the Canon website for products supporting My Image Garden.
- Available functions and settings vary depending on your scanner or printer.
- The designs of PREMIUM Contents provided in this guide are subject to change without prior notice.

Item Recommendation Function Restriction

- To use the item recommendation function, you need to install Quick Menu. You can download Quick Menu from the Canon website.

Image Display Restriction

- To display images in the **Calendar** view, **Unregistered People** view or **People** view, or to use the item recommendation function, the folders in which the images are saved need to be subject to image analysis.

Restrictions on Printing

- Printing on disc labels, paper larger than A4, business card size paper or sticker sheets is available with supported models only.
- You cannot print your items if a printer driver that supports My Image Garden is not installed on your computer.

Restrictions on Scanning

- You cannot scan items if a driver of a scanner or printer that supports My Image Garden is not installed on your computer.
- You cannot scan items whose image size will be larger than 10208 pixels x 14032 pixels (equivalent to a platen-size item scanned at 1200 dpi resolution) when scanned.

See the corresponding page of *On-screen Manual* for restrictions on scanning using ScanGear (scanner driver).

What You Can Do with My Image Garden

My Image Garden is an application that allows you to utilize photos taken with digital cameras and other images saved on your computer, in many ways for various purposes.

You Can Do the Following

- Leave Item Creation to My Image Garden
- Organize Photos Easily
- Print Photos and Documents Easily
- Print Personalized Items
- Capture and Print Still Images from Videos
- Scan Photos and Documents Easily
- Correct/Enhance Photos

Leave Item Creation to My Image Garden

My Image Garden employs a technology called "Image Assorting Technology" that provides the following functions.

- The image analysis function that groups images by person by detecting face areas in photos, and also registers images and videos to a calendar automatically by detecting information such as the shooting date and time
- The item recommendation function that automatically recommends patterns of items in which analyzed images are suitably laid out

You can print various items such as collages and cards by utilizing this technology.

➡ Utilizing the Item Recommendation Function

Organize Photos Easily

Images analyzed in My Image Garden appear in the **Unregistered People** view or **People** view by person, and also appear in the **Calendar** view based on the shooting date and time. By registering people's profiles and event information, you can easily organize a vast number of images, or quickly search for images you want to see.

- ➡ Registering People
- ➡ Registering Events

Print Photos and Documents Easily

You can print your favorite photos easily after checking them in preview.

You can also print documents saved as PDF files.

➡ Printing Photos and Documents

Print Personalized Items

You can combine your favorite photos with preset themes to create and print personalized items such as collages and cards.

➡ Creating and Printing Items

Capture and Print Still Images from Videos

You can capture your favorite scenes from videos and print them as still images.

Scan Photos and Documents Easily

You can scan photos and documents easily by automatically detecting the item type.

➡ Easy Scanning with Auto Scan

Correct/Enhance Photos

You can correct red eyes or adjust the brightness and contrast of images.

➡ Correcting/Enhancing Photos

Note

- In My Image Garden, there are many screens for selecting images, PDF files and videos.
See "[Selecting Images, PDF Files and Videos](#)" for details.
- File formats available in My Image Garden vary by function.
See "[File Formats](#)" for details.

File Formats

File formats available for use or saving in each function of My Image Garden are as follows.

- ➡ File Formats Available for Printing
- ➡ File Formats Available for Use as Materials in Items
- ➡ File Formats Available for Use in **Video Frame Capture**
- ➡ File Formats Available for Saving Scans
- ➡ About Exif Print

File Formats Available for Printing

- JPEG (.jpg, .jpeg)
- TIFF (.tif, .tiff)
- PNG (.png)
- PDF (.pdf)

Important

- For PDF files, only those created in My Image Garden or IJ Scan Utility are supported. PDF files created or edited in other applications are not supported.

File Formats Available for Use as Materials in Items

- JPEG (.jpg, .jpeg)
- TIFF (.tif, .tiff)
- PNG (.png)

File Formats Available for Use in Video Frame Capture

- MOV (.mov)
- MP4 (.mp4)

Important

- Only video files recorded with Canon digital cameras or digital camcorders are supported. In addition, ImageBrowser Ver.6.5 or later or ImageBrowser EX Ver.1.0 or later supplied with the digital camera or digital camcorder needs to be installed.
Only MOV format video files are available when ImageBrowser is used.
MOV and MP4 format video files are available when ImageBrowser EX is used.

File Formats Available for Saving Scans

- JPEG/Exif (.jpg, .jpeg)
- TIFF (.tif, .tiff)

- PNG (.png)
- PDF (.pdf)

Note

- The following TIFF file formats are supported.
 - Uncompressed, black and white binary
 - Uncompressed, RGB (8 bits per channel)
 - Uncompressed, YCC (8 bits per component)
 - Uncompressed, RGB (16 bits per channel)
 - Uncompressed, YCC (16 bits per component)
 - Uncompressed, Grayscale
-

About Exif Print

My Image Garden supports "Exif Print."

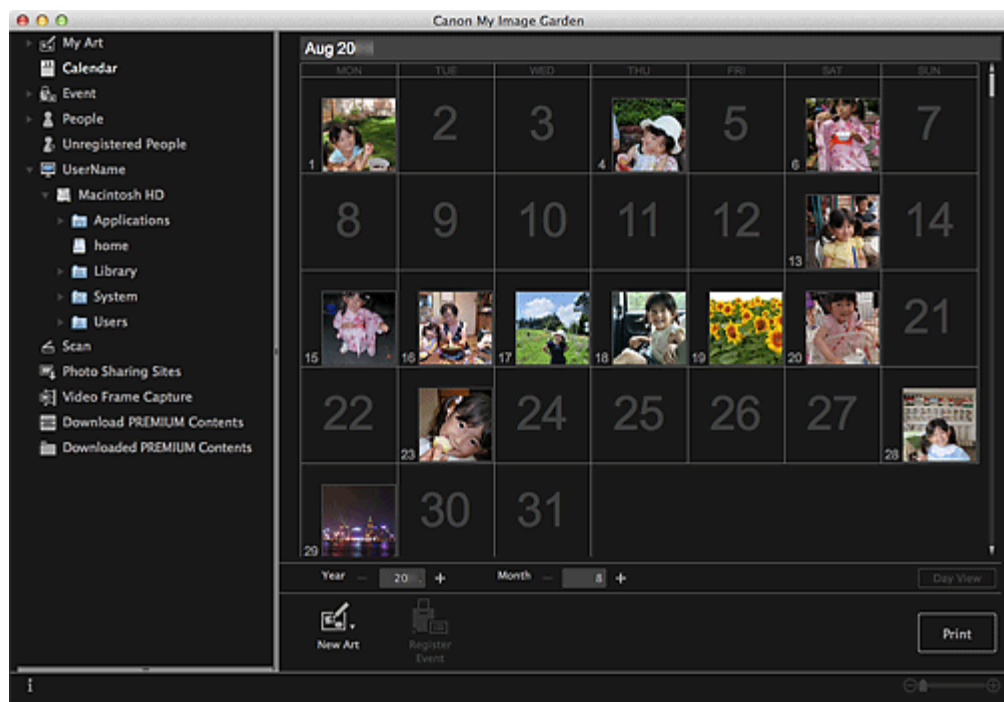

Exif Print is a standard for enhancing the communication between digital cameras and printers. By connecting to an Exif Print-compliant digital camera, print results suitable for the shooting conditions, shooting scenes, etc. can be obtained based on the camera information at the time of shooting.

A013

My Image Garden

Starting My Image Garden

Note

- There are the following two methods for starting My Image Garden.
 - From the **Go** menu of Finder select **Applications**, then double-click the **Canon Utilities** folder, **My Image Garden** folder, and then **My Image Garden** icon

- Click (Start My Image Garden) on Quick Menu

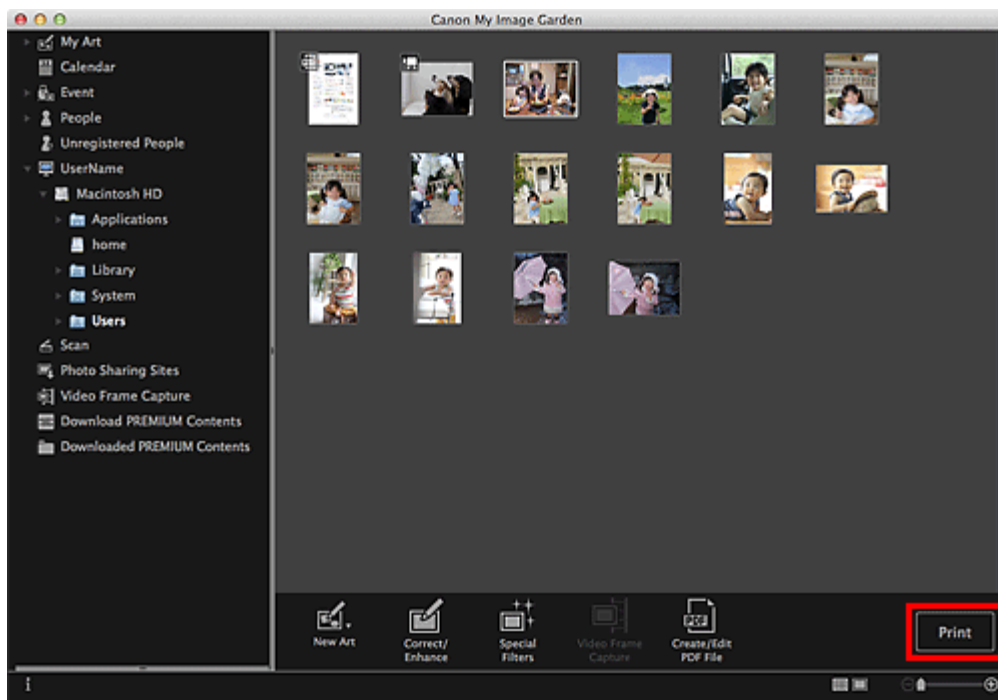

Printing Photos and Documents

You can print your favorite photos easily.

You can also print documents (PDF files) created in My Image Garden.

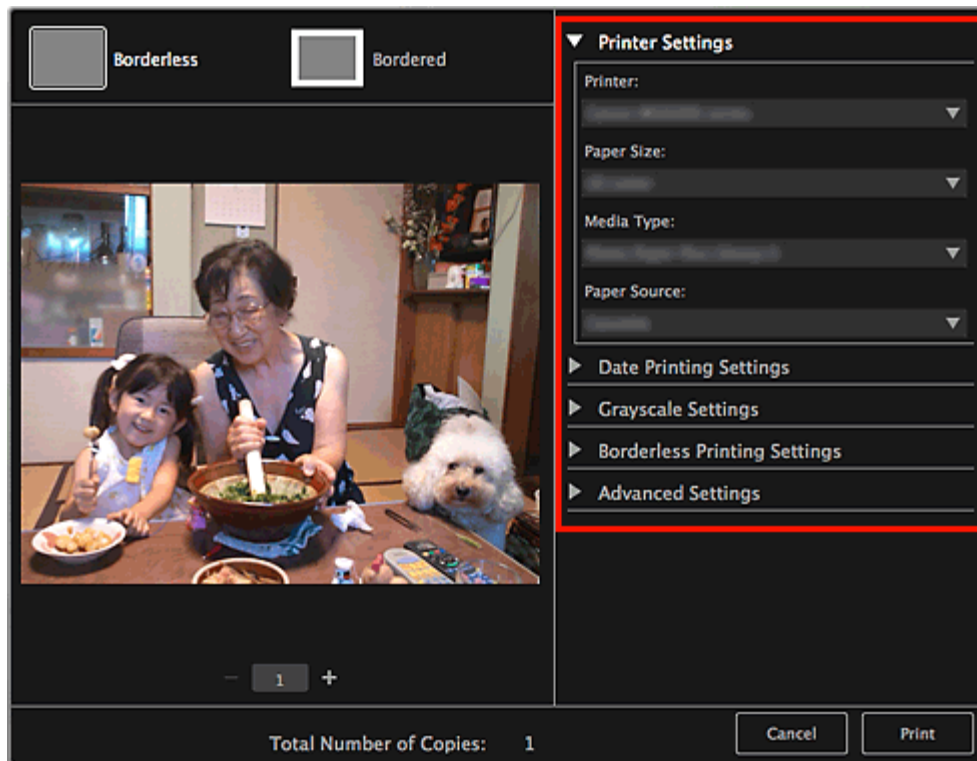

1. Make sure that your scanner or printer is turned on.
2. Start My Image Garden.
➡ Starting My Image Garden
3. Select the image(s) or PDF file(s) you want to print.
➡ Selecting Images, PDF Files and Videos
4. Click **Print**.

The print settings dialog appears.

5. Set the number of copies to print, the printer and paper to use, etc.

Note

- See "Print Settings Dialog" for details on the print settings dialog.

6. Load paper.

7. Click **Print**.

A message appears.

8. Click **OK**.

The Print dialog appears.

Important

- If you change the printer in the Print dialog, a message appears and printing will be canceled.

9. Click **Print**.

Important

- When you print a large number of high resolution images at one time, printing may stop halfway through.
- When you print on a bordered layout, the margins on the left and right or the top and bottom may become wider than the other.

Note

- You can correct or enhance images before printing.
 - ➡ [Correcting/Enhancing Photos](#)
 - ➡ [Enhancing Photos Using Special Filters](#)

Printing Recommended Items and Images Displayed in Slide Shows

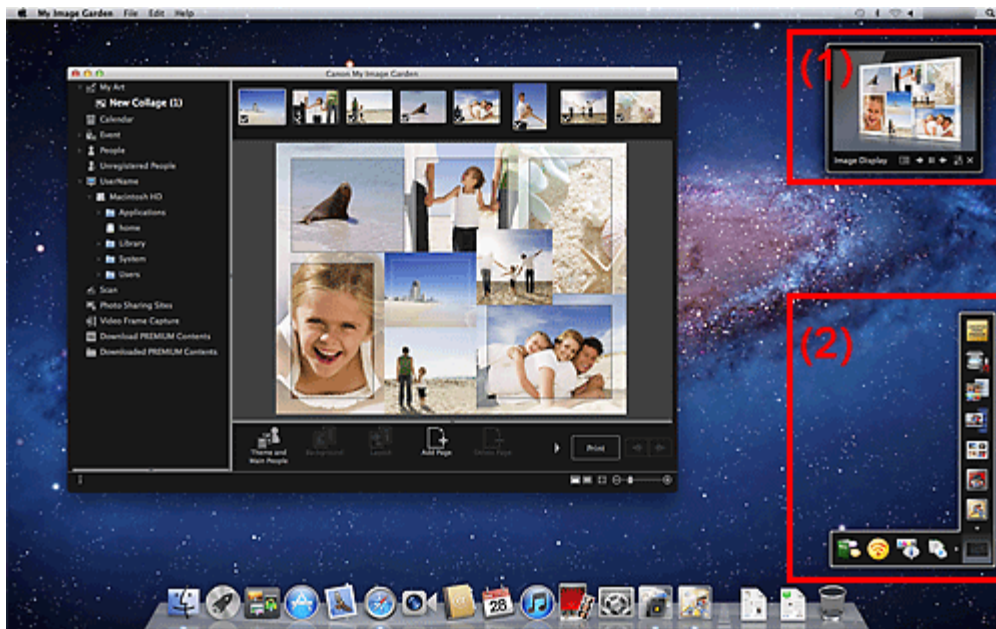

You can print recommended patterns and images displayed in Image Display with simple steps.

Important

- To use Image Display, you need to install Quick Menu. You can download Quick Menu from the Canon website.
Internet connection is required to download the software. Internet connection fees apply.

Note

- See "Utilizing the Item Recommendation Function" for how to display recommended items in slide shows.
- See Help of Quick Menu for how to operate Quick Menu and Image Display.

(1) Image Display

(2) Quick Menu

1. Click a pattern or image displayed in Image Display.

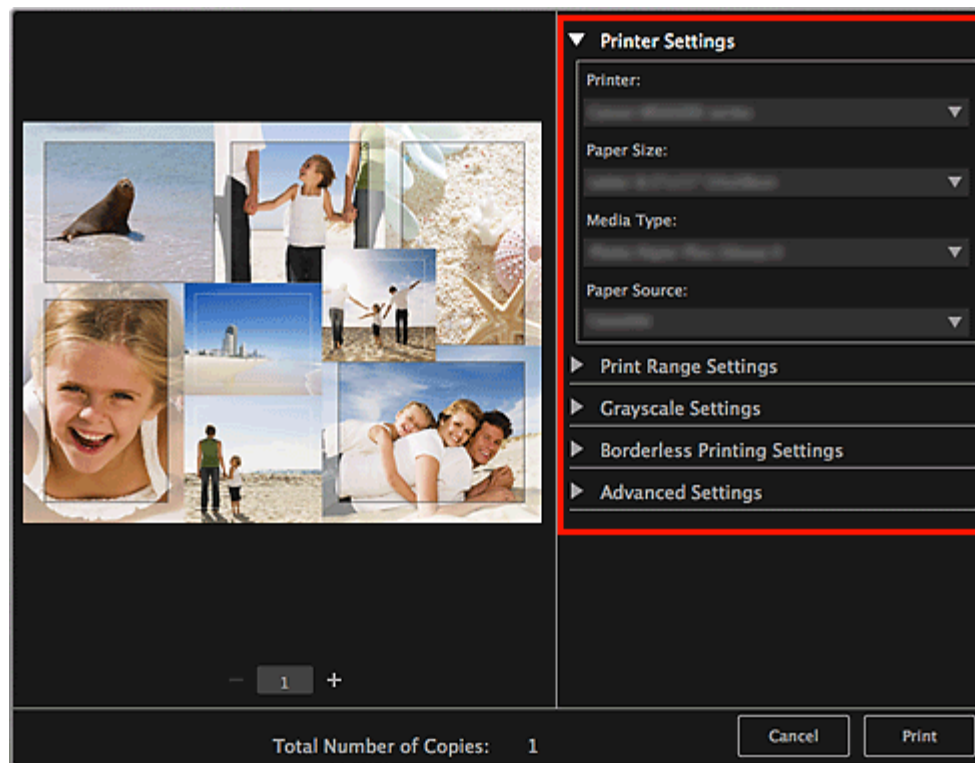

My Image Garden starts. When a pattern is clicked, the item appears in the **My Art** view. When an image is clicked, the **Calendar** view appears in Day View.

2. Click **Print**.

The print settings dialog appears.

3. Set the number of copies to print, the printer and paper to use, etc.

Note

- See "Print Settings Dialog" for details on the print settings dialog.

4. Click **Print.**

A message appears.

5. Click **OK.**

The Print dialog appears.

Important

- If you change the printer in the Print dialog, a message appears and printing will be canceled.

6. Click **Print.**

Note

- You can correct or enhance images before printing.
 - ➡ [Correcting/Enhancing Photos](#)
 - ➡ [Enhancing Photos Using Special Filters](#)
- You can swap images in patterns.
 - ➡ [Inserting/Adjusting Images](#)

Creating and Printing Items

You can easily create personalized items using your favorite photos and print them.

Select an image in the **Calendar** view, **Event** view, **People** view, **Unregistered People** view or folder view, then click **New Art** at the bottom of the screen to select the item you want to create.

You can create and print items such as the following.

Printing Photos in a Variety of Layouts

You can print your favorite photos with dates or in a variety of layouts.

➡ [Printing Photos in a Variety of Layouts](#)

Printing Collages

You can create and print collages using your favorite photos and print them.

➡ [Printing Collages](#)

Printing Cards

You can create cards for anniversaries and annual events using your favorite photos and print them.

➡ [Printing Cards](#)

Printing Calendars

You can create personalized calendars using your memorable photos and print them.

➡ Printing Calendars

Printing Stickers

You can create personalized stickers by printing your favorite photos on sticker sheets.

➡ Printing Stickers

Printing Disc Labels

You can create personalized disc labels using your favorite photos and print them.

➡ Printing Disc Labels

Printing in a Cinematic Layout

You can print your favorite photos in a layout that resembles a film or theater.

➡ Printing in a Cinematic Layout

Printing Paper Crafts

You can print downloaded PREMIUM Contents (paper crafts) and create three-dimensional art.

➡ Printing Paper Crafts

Printing Paper Crafts

You can print downloaded PREMIUM Contents (paper crafts) and create three-dimensional art.

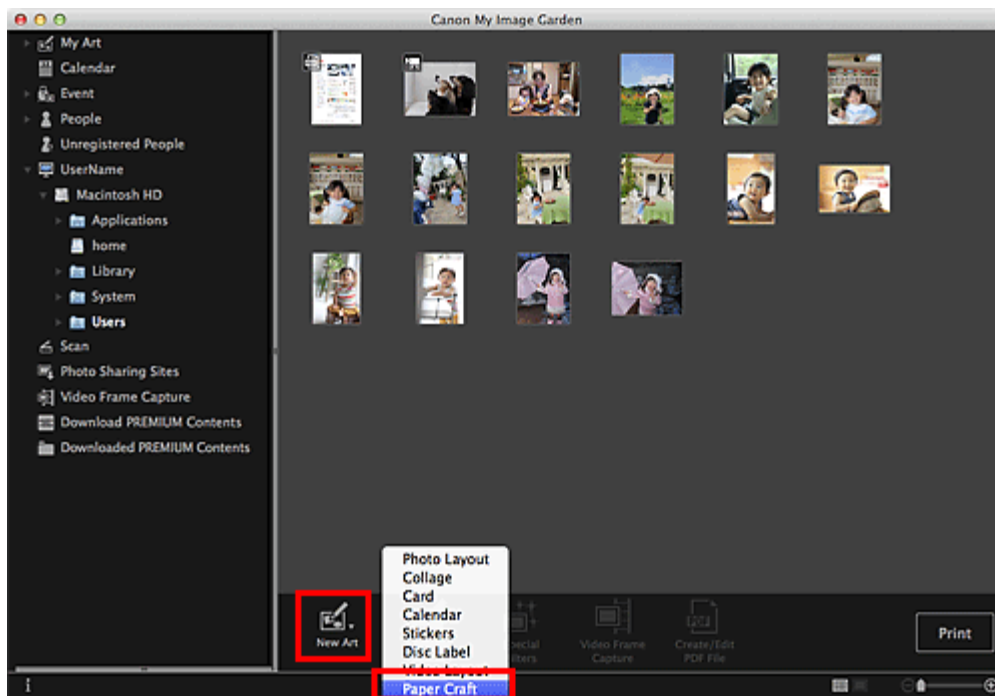

Important

- Keep these points in mind when printing paper crafts.
 - See "[Downloading PREMIUM Contents](#)" for how to download PREMIUM Contents.
 - You may only use downloaded or printed PREMIUM Contents for personal purposes. You may not use the content for commercial purposes.

1. Start My Image Garden.

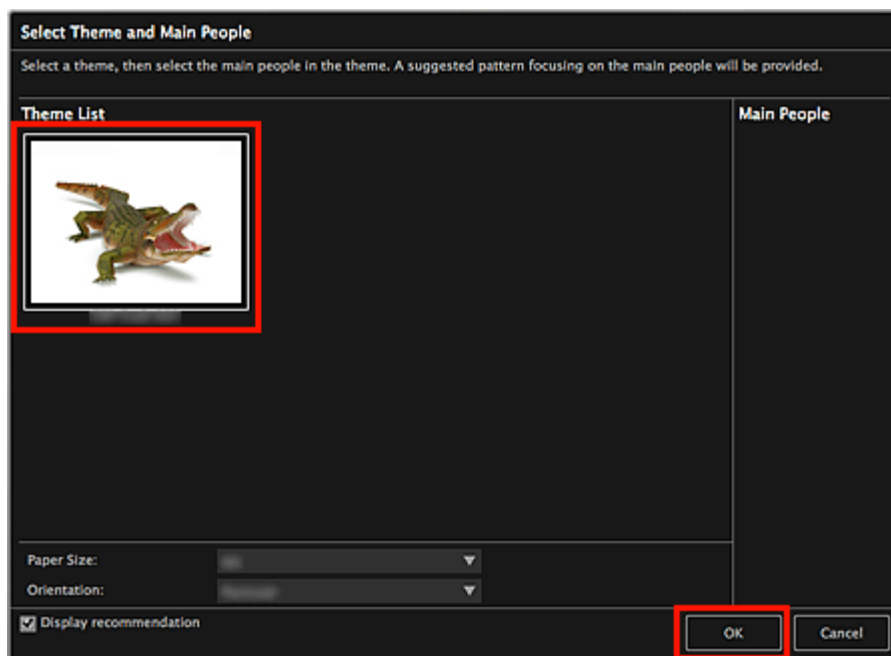

➡ Starting My Image Garden

2. Click **Paper Craft** from **New Art**.

The **Select Theme and Main People** dialog appears.

3. Select the theme, then click **OK**.

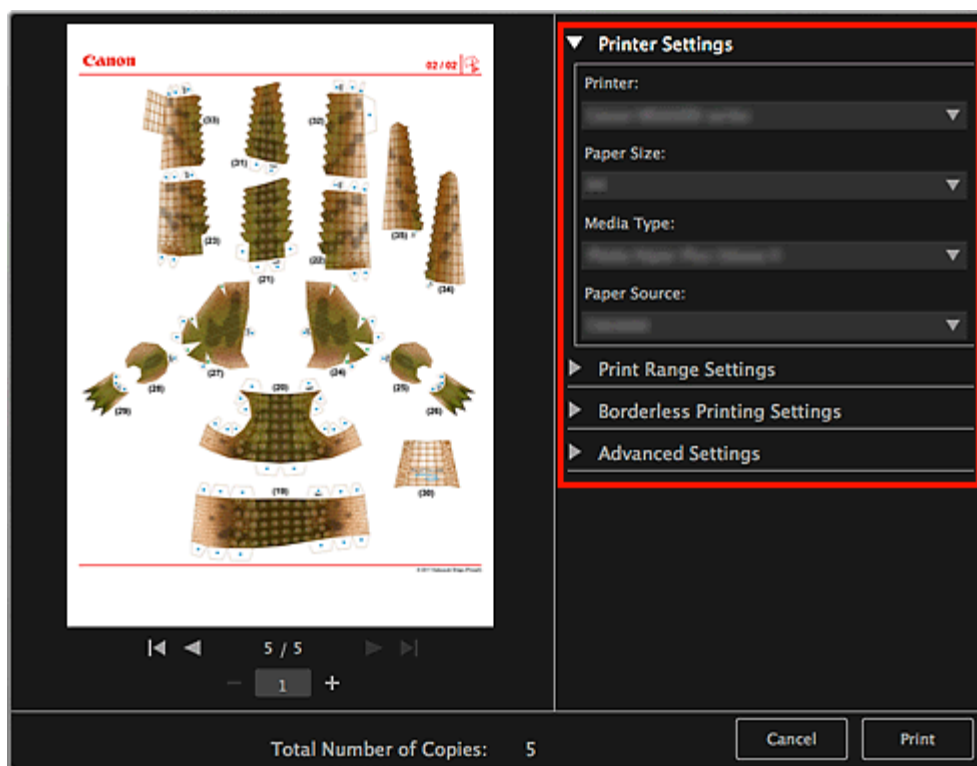

➡ Select Theme and Main People Dialog

The paper craft appears in the **My Art** view.

4. Click **Print** at the bottom right of the screen.

The print settings dialog appears.

5. Set the number of copies to print, the printer and paper to use, etc.

Note

- See "Print Settings Dialog" for details on the print settings dialog.

6. Click **Print**.

A message appears.

7. Click **OK.**

The Print dialog appears.

 **Important**

- If you change the printer in the Print dialog or click **PDF (PDF or **Preview**** when using Mac OS X 10.6/Mac OS X 10.5), a message appears and printing will be canceled.

8. Click **Print.**

Related Topic

Printing Photos in a Variety of Layouts

You can print your favorite photos with dates or in a variety of layouts.

1. Start My Image Garden.
➡ Starting My Image Garden
2. Select the image(s) you want to print.
➡ Selecting Images, PDF Files and Videos
3. Click **Photo Layout** from **New Art**.

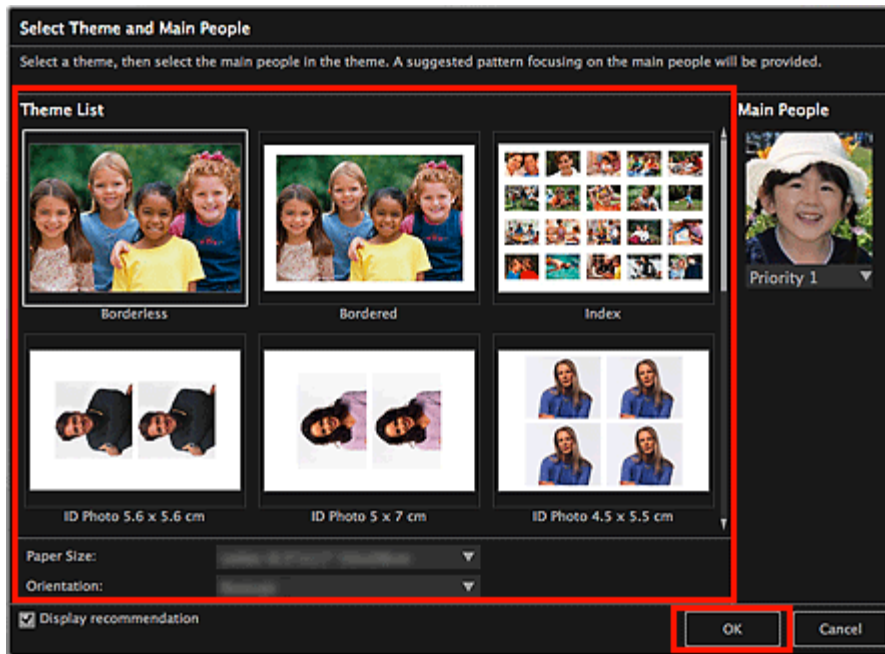

The **Select Theme and Main People** dialog appears.

4. Set the theme, **Paper Size**, etc., then click **OK**.

Setting the Theme and Main People

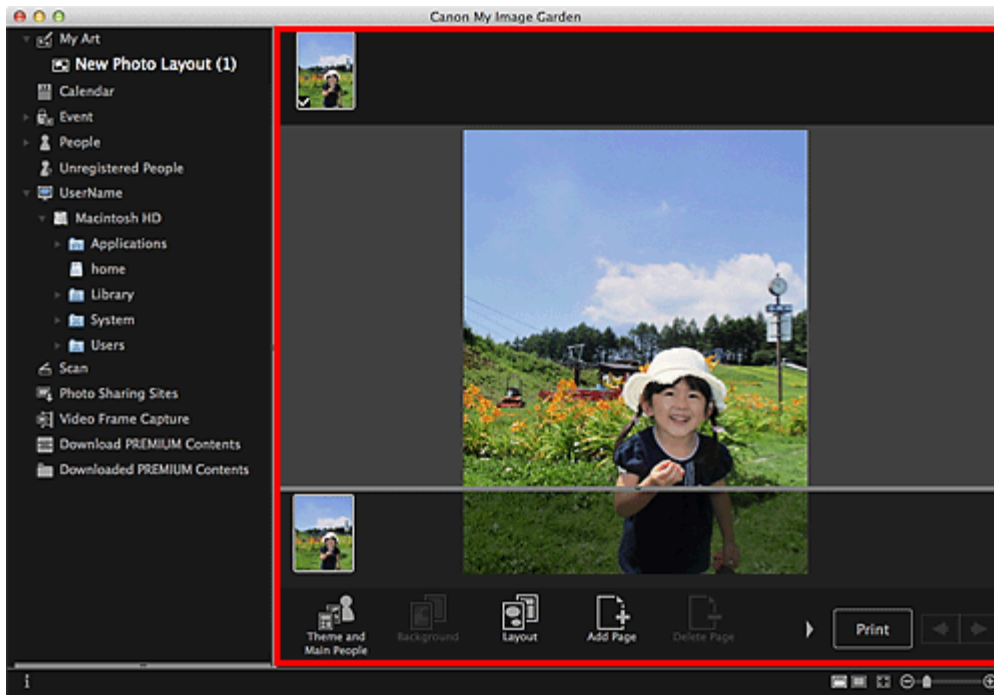

An item with the image(s) placed according to the selected layout appears in the **My Art** view.

Note

- Even if a high priority is set, the person may not be placed in the item depending on the selected theme.
- The layout may not be as expected depending on the photo information or analysis results of the selected images.

5. Edit the item according to your preference.

➡ Editing Items

Note

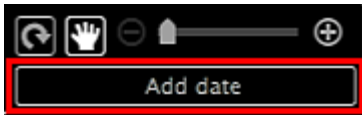

- When **Identifying people...** appears at **Unregistered People** in Global Menu, the result may not

be as expected since automatic placement does not apply to images for which analysis has not been completed.

- Refer to ["Inserting/Adjusting Images"](#) to swap automatically placed images.

6. Add the date according to your preference.

Select the image to which you want to add the date to display the image editing tool. Click **Add date** to place a checkmark; the date is added to the image.

Note

- In the **Advanced Settings** dialog displayed by clicking **Advanced...** at the bottom of the screen, you can set to print dates on all images. If **Advanced...** is not displayed, click  (Right Scroll).
➡ [Advanced Settings Dialog \(Photo Layout\)](#)

7. Click **Print** at the bottom right of the screen.

The print settings dialog appears.

8. Set the number of copies to print, the printer and paper to use, etc.

Note

- See ["Print Settings Dialog"](#) for details on the print settings dialog.

9. Click **Print**.

A message appears.

10. Click **OK**.

The Print dialog appears.

Important

- If you change the printer in the Print dialog, a message appears and printing will be canceled.

11. Click **Print**.

Note

- You can correct or enhance images before printing.

Downloading and Printing PREMIUM Contents

You can download works of renowned artists in the **Download PREMIUM Contents** view.

You can also print downloaded PREMIUM Contents, or create personalized items by adding your favorite photos and text to them.

Important

- Keep these points in mind when using PREMIUM Contents.
 - To print PREMIUM Contents, make sure that genuine Canon ink tanks/ink cartridges are installed for all colors on a supported printer.
 - You may only use downloaded or printed PREMIUM Contents for personal purposes. You may not use the content for commercial purposes.
- If your printer does not support PREMIUM Contents, an error message appears after clicking **Download PREMIUM Contents**.

Downloading PREMIUM Contents

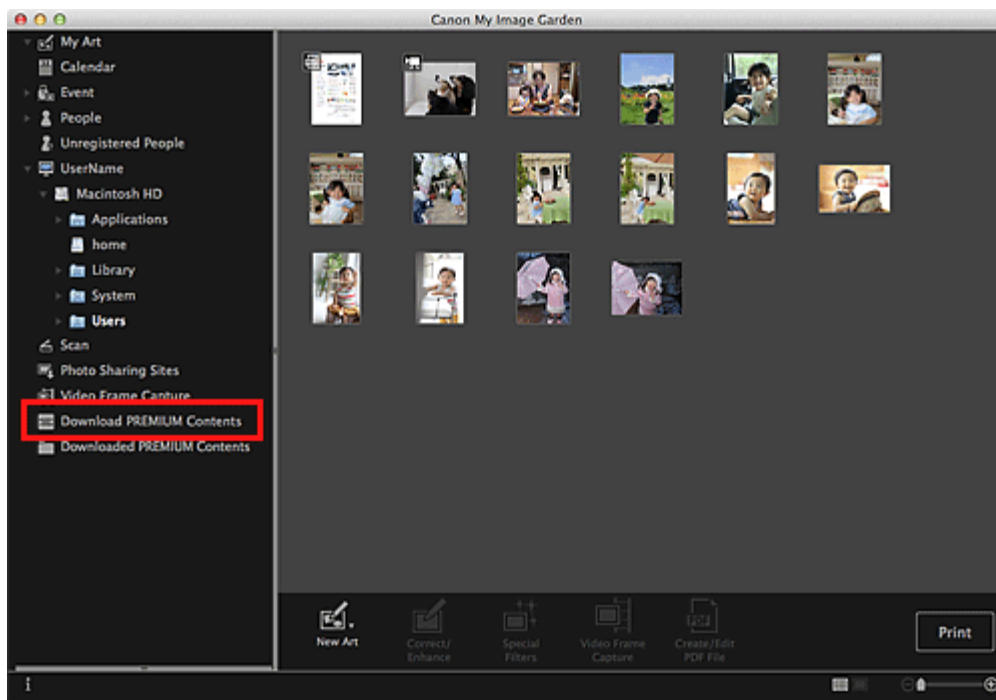

Downloadable PREMIUM Contents are as follows.

- Cards
- Calendars
- Collages
- Paper crafts

1. Start My Image Garden.

➡ Starting My Image Garden

2. Click **Download PREMIUM Contents**.

The view switches to **Download PREMIUM Contents**.

Important

- Internet connection is required to use this function. Internet connection fees apply.

Note

- When you click **Download PREMIUM Contents**, a message screen appears. Follow the on-screen prompts.

3. Select a category.
4. Select and download the PREMIUM Contents you want to print.

Printing PREMIUM Contents

You can edit and print downloaded PREMIUM Contents.

Downloaded PREMIUM Contents appear in the following screens.

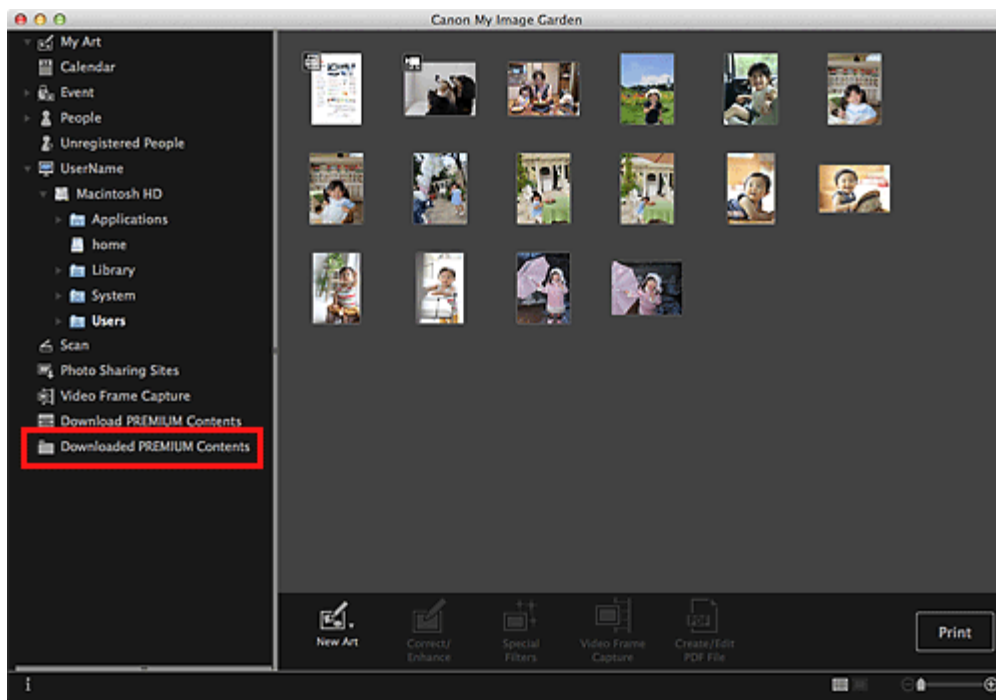

- **Select Theme and Main People** Dialog
- **Downloaded PREMIUM Contents** View

The following explains how to edit/print from the **Downloaded PREMIUM Contents** view.

Important

- The allowed number of print copies and the usage period are set for some PREMIUM Contents. PREMIUM Contents will be deleted when the set number of copies is exceeded or when the usage period has elapsed.

1. Start My Image Garden.
➡ Starting My Image Garden
2. Click **Downloaded PREMIUM Contents**.

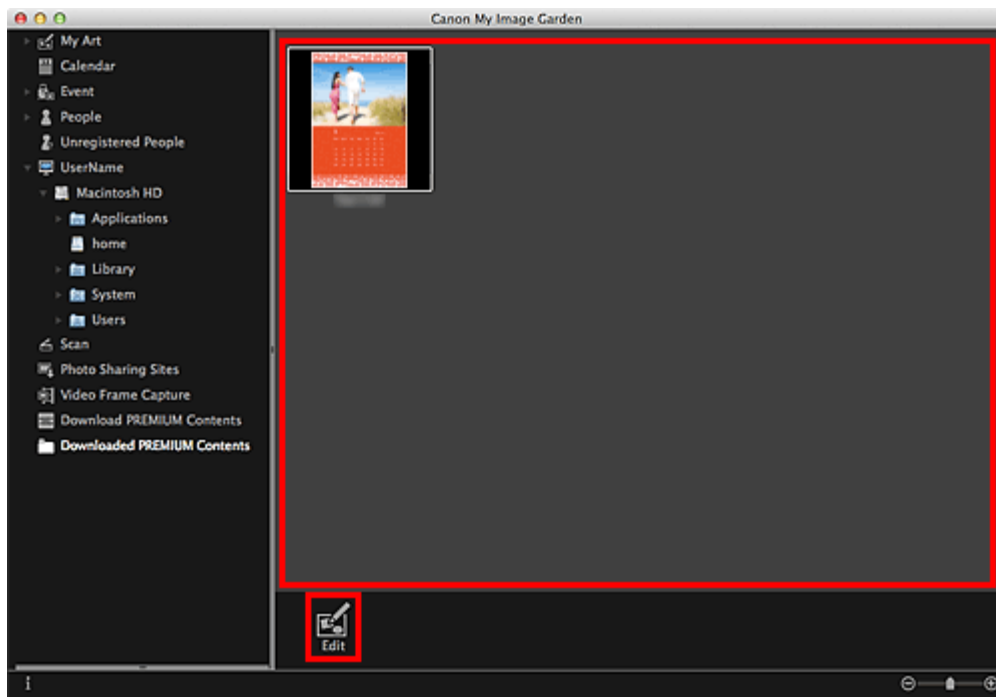

Downloaded PREMIUM Contents appear as thumbnails.

Note

- When you click **Downloaded PREMIUM Contents**, a message screen appears. Follow the on-screen prompts.

3. Select the PREMIUM Content you want to print, then click **Edit**.

The PREMIUM Content appears in the **My Art** view.

4. Click **Theme and Main People** to set **Paper Size** and **Orientation**.

Set **Paper Size** and **Orientation** in the **Select Theme and Main People** dialog, then click **OK**.

Note

- Move the cursor over a thumbnail of PREMIUM Content in the **Downloaded PREMIUM Contents** view to check supported paper sizes and other information.

5. Edit the item according to your preference.

➡ Editing Items

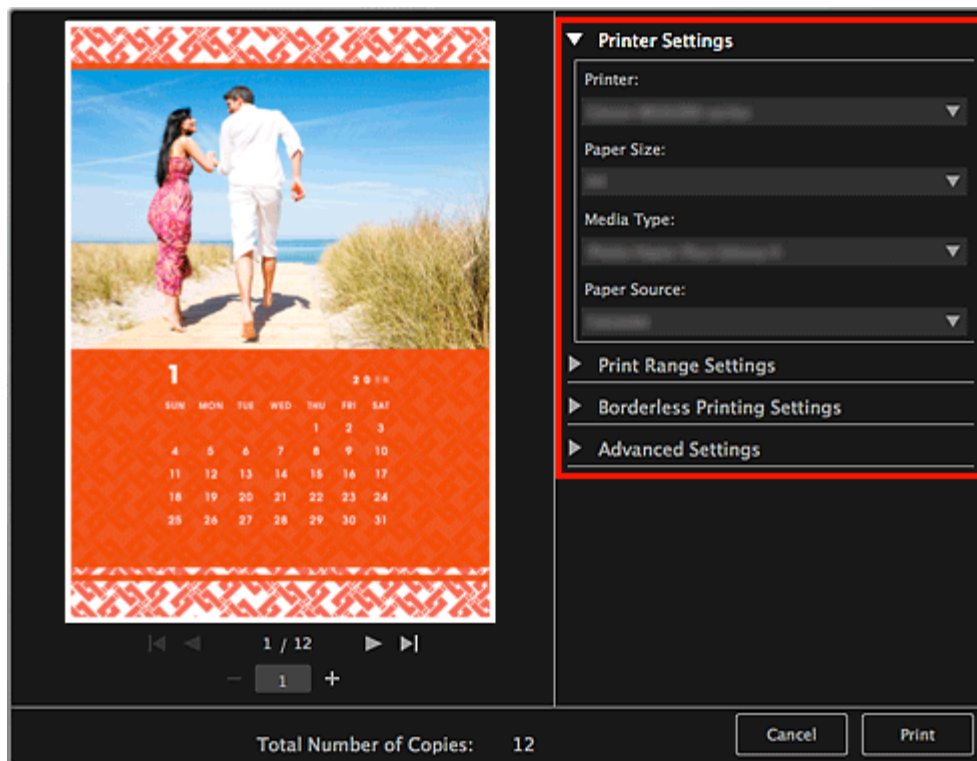

Note

- Available editing functions vary depending on the PREMIUM Content.

6. Click **Print** at the bottom right of the screen.

The print settings dialog appears.

7. Set the number of copies to print, the printer and paper to use, etc.

Note

- See "[Print Settings Dialog](#)" for details on the print settings dialog.

8. Click **Print**.

A message appears.

9. Click **OK**.

The Print dialog appears.

Important

- If you change the printer in the Print dialog or click **PDF** (**PDF** or **Preview** when using Mac OS X 10.6/Mac OS X 10.5), a message appears and printing will be canceled.

10. Click **Print**.

Note

- Depending on the PREMIUM Content, you can correct or enhance the inserted images before printing.
 - ➡ [Correcting/Enhancing Photos](#)
 - ➡ [Enhancing Photos Using Special Filters](#)
 - Depending on the PREMIUM Content, you can swap images in the item.

Capturing and Printing Still Images from Videos

You can capture video frames to create still images and print them.

Important

- If videos do not appear, check the system requirements and file formats. See "[File Formats](#)" for details.
- Videos may not play smoothly depending on your environment.
- Video color tones changed via the settings of the graphic driver (video card) or its utility are not reflected in captured still images. Therefore, color tones may differ between videos and captured still images.

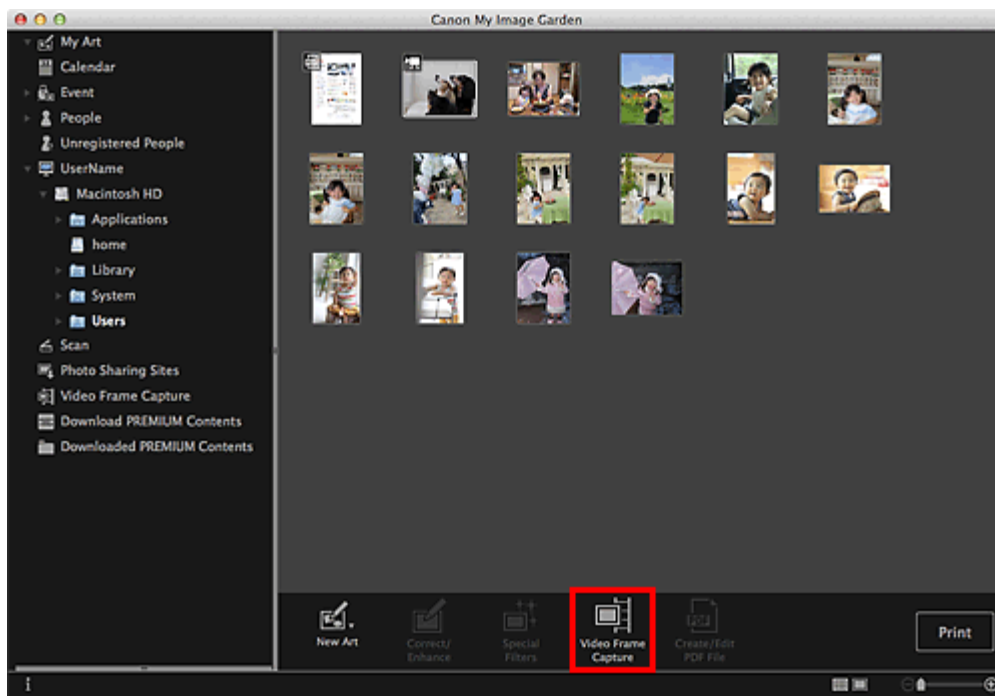

1. Start My Image Garden.

➡ [Starting My Image Garden](#)

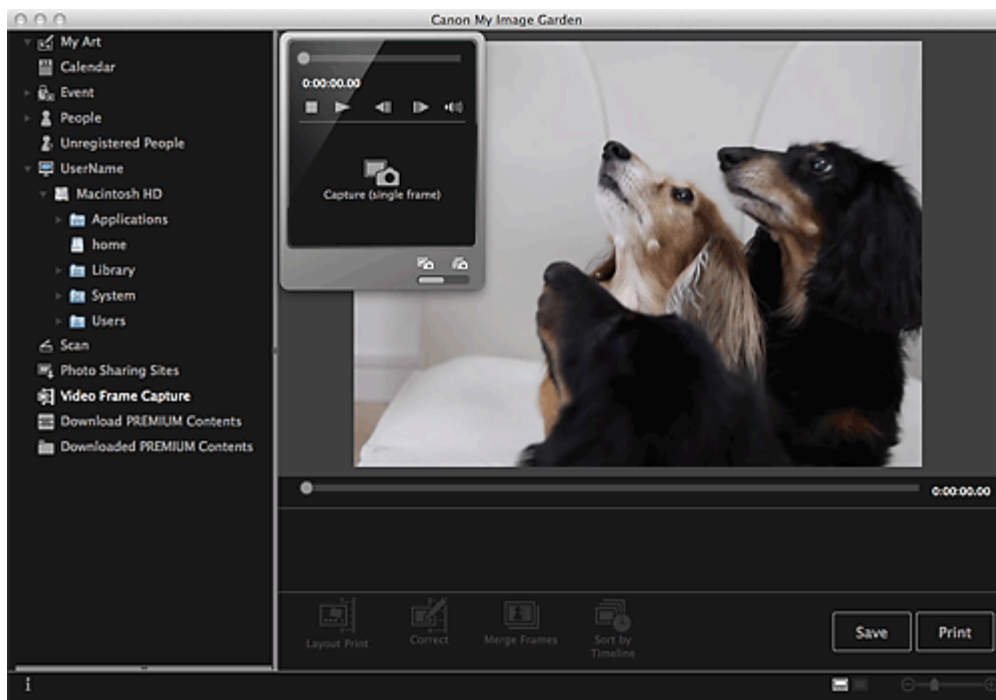

2. Select the video from which you want to capture still images.

➡ [Selecting Images, PDF Files and Videos](#)

3. Click **Video Frame Capture**.

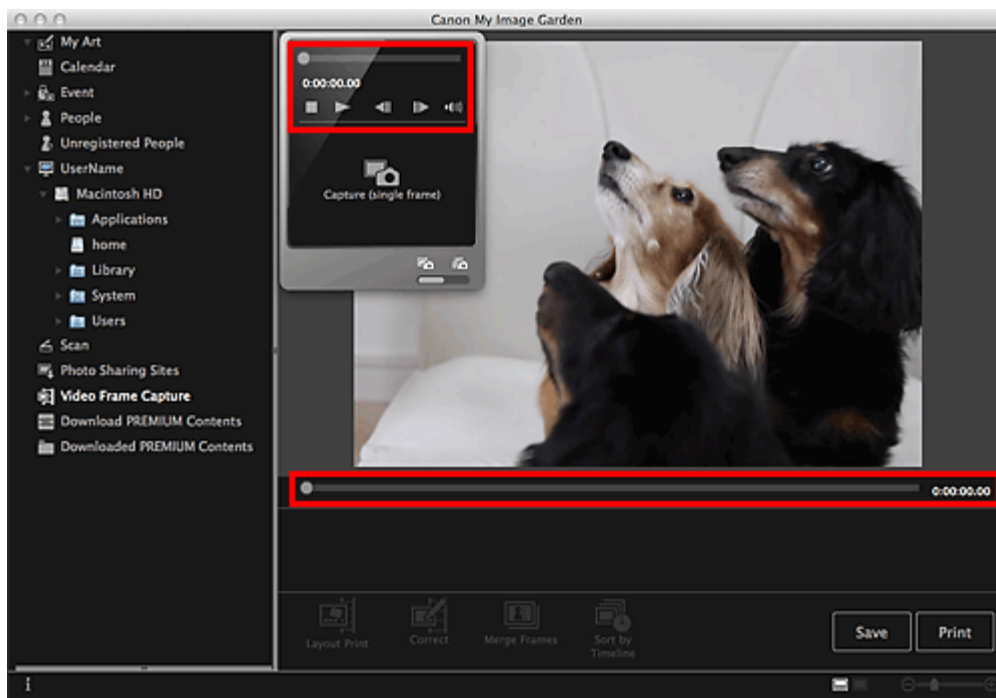

The view switches to **Video Frame Capture**, and the video appears with the still image capture panel.

4. Display the frame you want to capture as a still image.

Drag the slider in the **Video Frame Capture** view or use the still image capture panel to display the frame you want to capture.

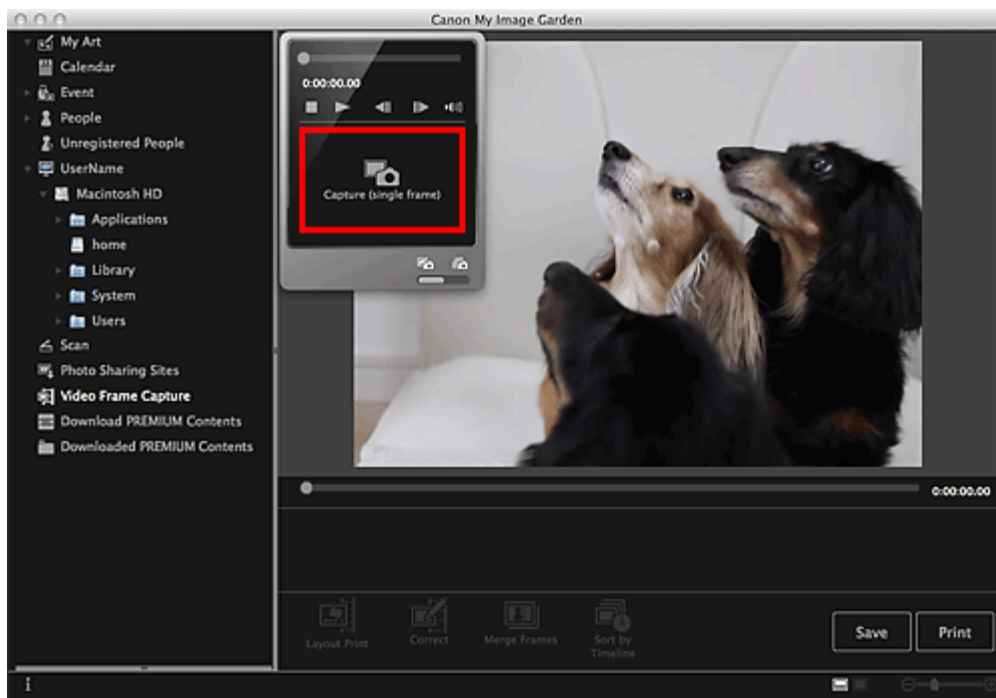

Note

- (Pause) or (Playback) appears on the still image capture panel while a video is playing or stopped, respectively.
- Using (Pause) and (Frame Backward)/(Frame Advance) on the still image capture panel makes it easier to display the frame you want to capture.

5. When the frame you want to capture as a still image appears, click **Capture (single frame)** on the still image capture panel.

Note

- See "Video Frame Capture View" for how to switch between **Capture (single frame)** and **Capture (multiple)**.
- In **Capture (multiple)**, you can capture multiple still images from a video at one time by specifying the number of captures, etc.
- Select the **Prefer clearer images** checkbox to automatically detect less blurry frames when capturing images. Capture may take time depending on your environment.

When image capture is completed, the captured image(s) appear(s) in the Captured Images area.

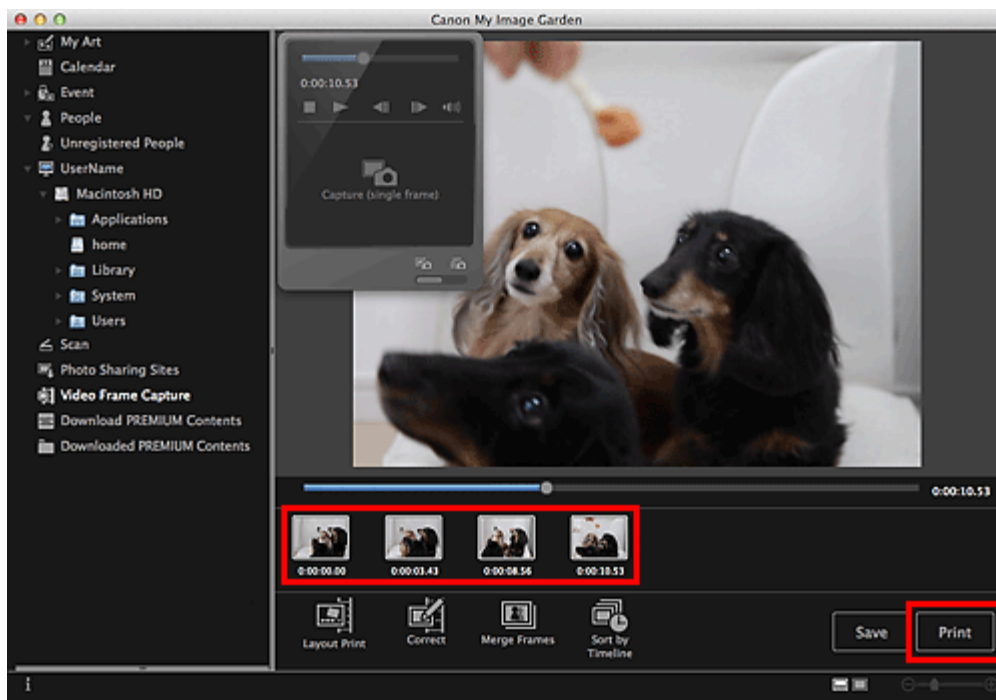

Important

- You can capture up to 150 still images from one video.

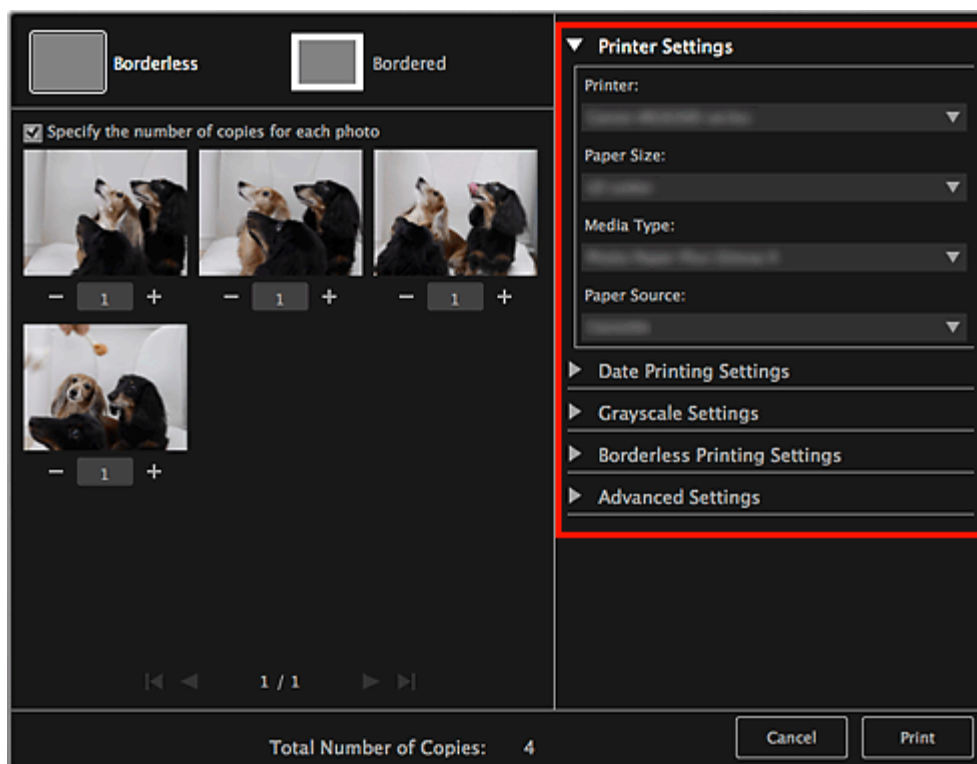

Note

- To sort still images in the Captured Images area by time of recording, click **Sort by Timeline** at the bottom of the screen.

6. Select the image(s) you want to print, then click **Print**.

7. Set the number of copies to print, the printer and paper to use, etc.

Note

- See "Print Settings Dialog" for details on the print settings dialog.

8. Click **Print**.

A message appears.

9. Click **OK**.

The Print dialog appears.

Important

- If you change the printer in the Print dialog, a message appears and printing will be canceled.

10. Click **Print**.

Note

- To save still images captured from videos, select the still image(s) you want to save in the Captured Images area, then click **Save**.
- Click **Layout Print** at the bottom of the screen to edit or print an item created from the captured still images in a cinematic layout.
 - ➡ [Printing in a Cinematic Layout](#)
- To correct a captured still image, select the still image you want to correct in the Captured Images area, then click **Correct** at the bottom of the screen.
 - ➡ [Correcting Still Images Captured from Videos](#)
- You can overlap and merge multiple captured still images in the order of the time code to create an image depicting the flow of a moving subject.
 - ➡ [Creating Images of Merged Video Frames](#)

Related Topic

Creating Images of Merged Video Frames

You can overlap and merge multiple still images captured from a video in the order of the time code to create an image depicting the flow of a moving subject.

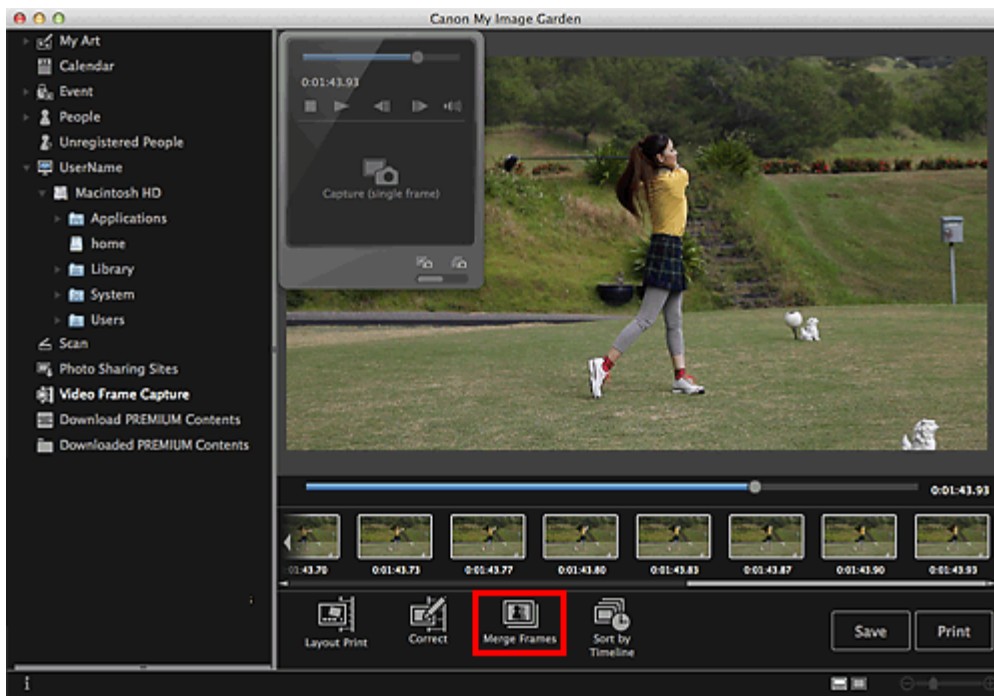

Important

- You can merge between 5 and 30 still images.
- Still images corrected in the **Correct** view cannot be used. The original uncorrected still images will be used.

Note

- It is recommended that you use still images captured from a video recorded with a steady camera (fixed to a tripod, etc.) without zooming or adjusting focus while recording.
- See "[Capturing and Printing Still Images from Videos](#)" for how to capture still images.

1. Select the still image(s) you want to merge in the Captured Images area of the **Video Frame Capture** view.
2. Click **Merge Frames**.

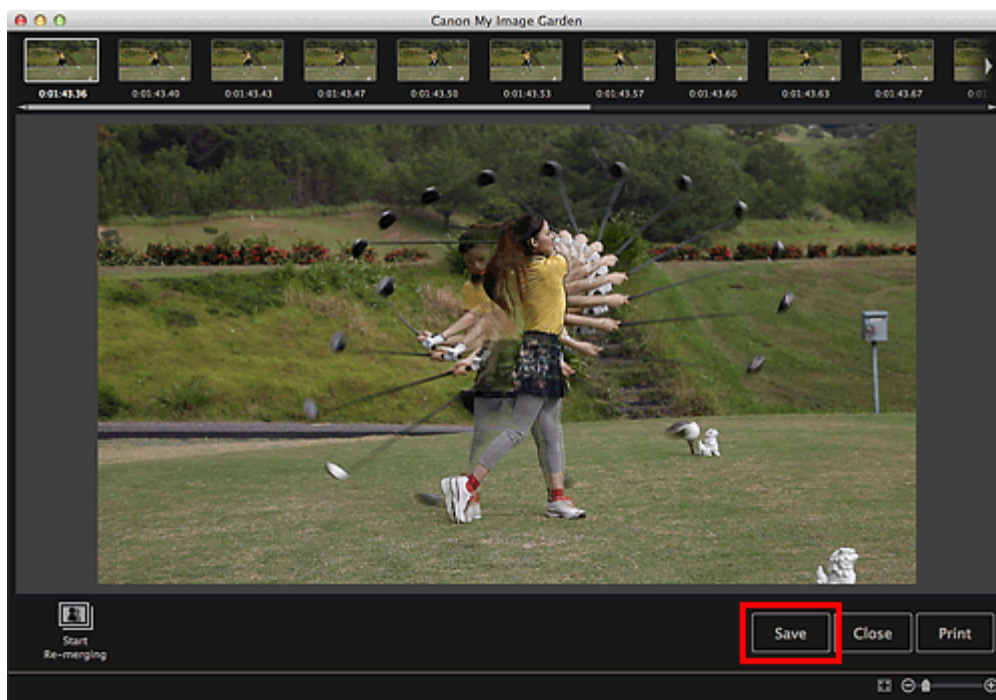

The view switches to **Merge Frames**, and the merged image appears in the Preview area.

Note

- When you click **Merge Frames**, a message screen appears. Follow the on-screen prompts.
- To change the images to merge, select images from the Selected Images area, then click **Start Re-merging**.

3. Click **Save**.

The **Save** dialog appears.

4. Specify the save settings.

➡ Save Dialog (Video Frame Capture View)

Note

- The created image can be saved in JPEG/Exif format only.

5. Click **Save**.

The created image is saved, and the **Merge Frames** view reappears.

6. Click **Close**.

The **Video Frame Capture** view reappears.

Important

- If the created image is not saved, the merged content will be deleted.

Related Topic

Correcting Still Images Captured from Videos

You can reduce noise or roughness in still images captured from videos.

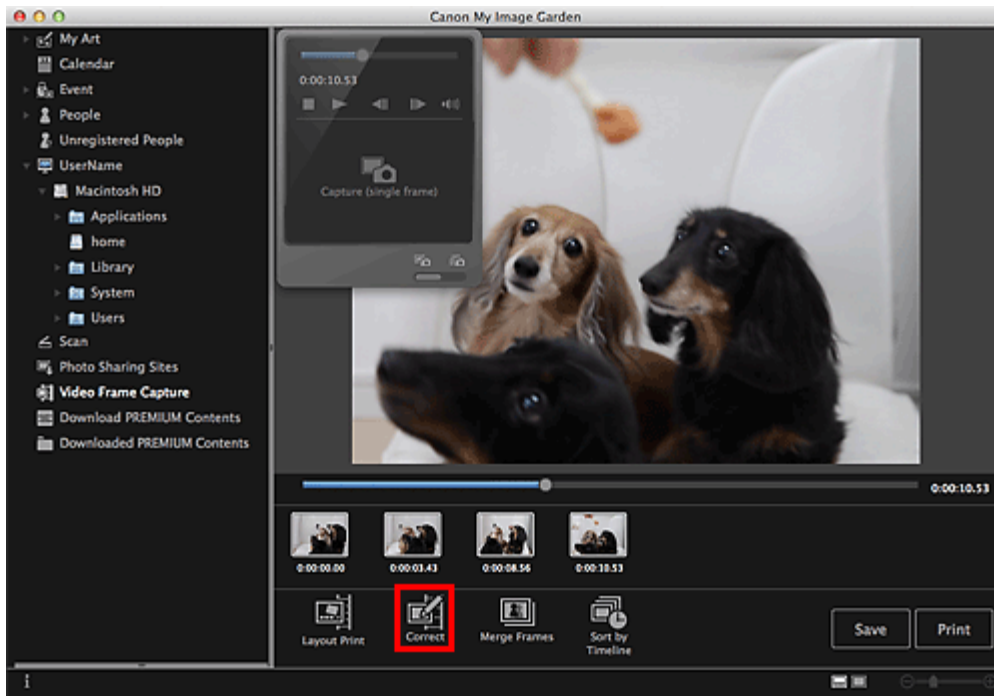

Important

- When a frame in which the subject or camera has moved significantly is captured, the still image may not be corrected properly.

Note

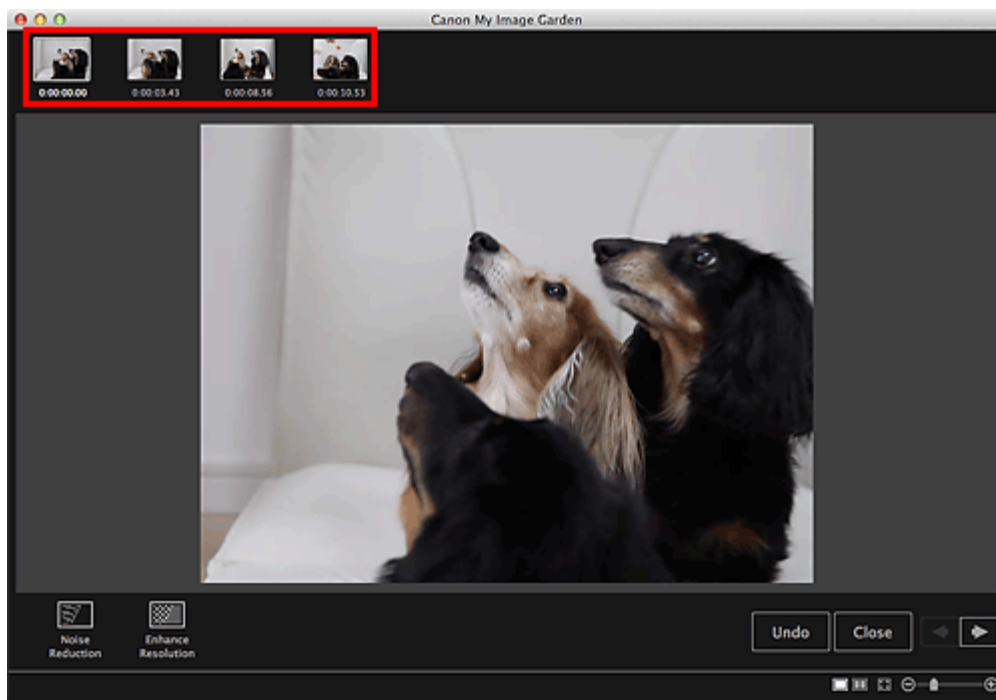

- See "[Capturing and Printing Still Images from Videos](#)" for how to capture still images.

1. Select the still image(s) you want to correct in the Captured Images area of the **Video Frame Capture** view.
2. Click **Correct**.

The view switches to **Correct**, and the image appears in the Preview area.

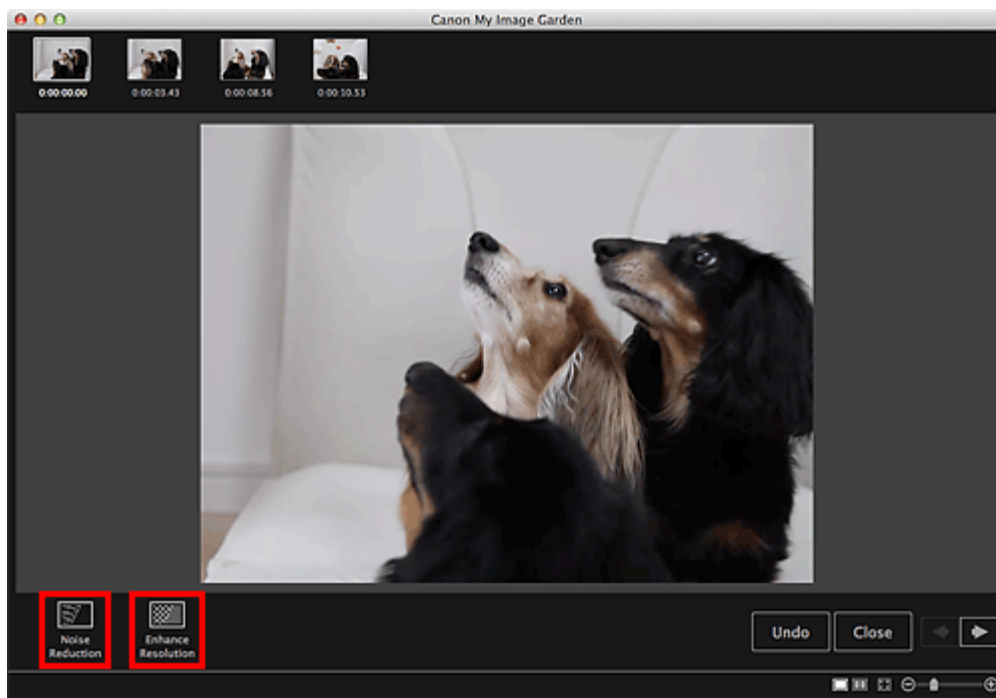

3. Select the image you want to correct from the Selected Images area.

Note

- You can also select and correct multiple images.

4. Click **Noise Reduction** or **Enhance Resolution** according to purpose.

The image is corrected, and the  (Correction) mark appears on the upper right of the image.

Note

- Click **Undo** to undo the correction.

5. Click **Close**.

The **Video Frame Capture** view reappears.

Registering People

Register the information of people to images so that you can browse the images by person.

➡ Registering People from the **Unregistered People** View

➡ Registering People from the Details View

Important

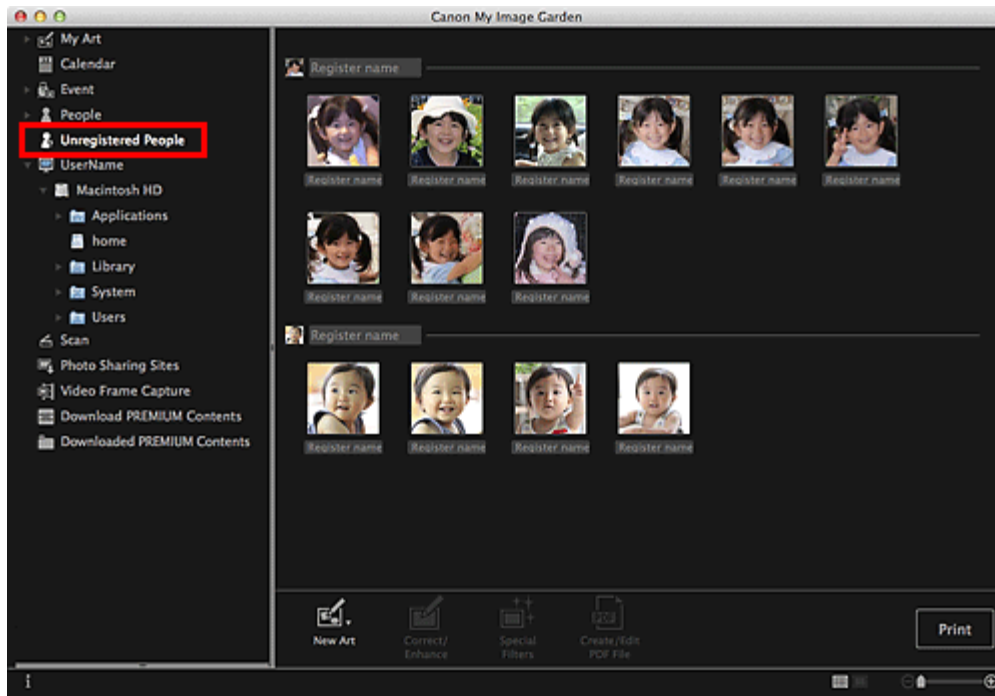

- The information of people can only be registered to images saved in folders under **Perform Image Analysis in the Following Folder(s)**. See "**Image Analysis Settings Tab**" for how to set **Perform Image Analysis in the Following Folder(s)**.

Registering People from the Unregistered People View

Photos containing people appear automatically in the **Unregistered People** view as a result of image analysis. You can register images that are identified as those of the same person, at once, or register images one by one.

1. Click **Unregistered People**.

The view switches to **Unregistered People**.

Important

- You cannot delete or hide the images displayed in the **Unregistered People** view.

Note

- **Identifying people...** appears during image analysis.
- Images may not be correctly identified as those of the same person depending on the face status

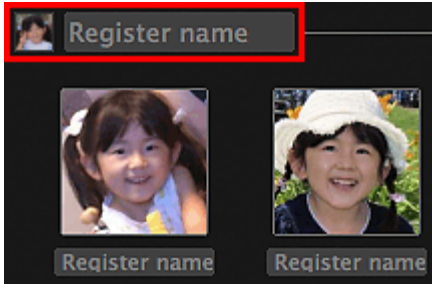

(expression, glasses, angle, etc.).

- Areas that are not of people in photos may be identified as people.
 - Image analysis only applies to images saved in folders under **Perform Image Analysis in the Following Folder(s)**. See "[Preferences Dialog](#)" for details on image analysis.
-

2. Click **Register name**, then enter the name.

When Registering All Images Identified as Those of the Same Person

Click **Register name** displayed next to the smaller thumbnail, then enter the name.

When Registering People in Images One by One

Select a larger thumbnail and click **Register name** displayed below it, then enter the name.

The image(s) is (are) registered to the **People** view.

Note

- When a registered name is entered, its image(s) and the name(s) appear in the pop-up menu. To register as the same person as the registered person, select the name in the pop-up menu. To register as a different person, click an area outside the white frame to complete the name entry.
- For registered people, you can also register by dragging and dropping the thumbnail to the name displayed below **People** on the left side of the screen.
- If a person is identified as a different person, register the name individually or drag and drop the thumbnail to the name displayed below **People** on the left side of the screen.
- To delete a registered person, control-click the person in the **People** view and select **Delete** from the displayed menu to display a deletion confirmation window. Click **Yes** to delete the name from the **People** view. Images whose names of people have been deleted appear as those of unregistered people in the **Unregistered People** view.
- You can also set the profiles of registered people, such as their relationships with you and their birthdays.

➡ [Registering People's Profiles](#)

Registering People from the Details View

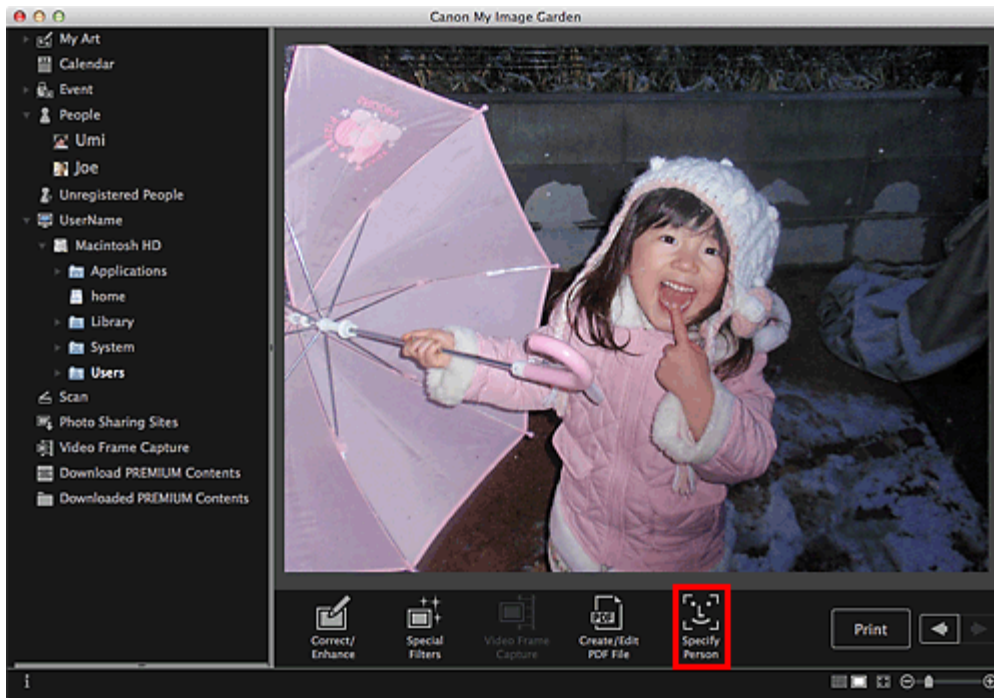

You can register people by specifying the face area in the image preview. People can be registered one by one even when there are multiple people in one photo.

1. Switch the image to the details view.

Select an image in any of the **Calendar** view set to **Day View**, **Event** view, the expanded display of

the **People** view, **Unregistered People** view and folder view, then click  (Details View) at the bottom right of the screen to switch to the details view.

2. Click **Specify Person**.

A white frame to specify the area to register appears on the image.

3. Specify the area of the person you want to register.

Drag the white frame on the image to specify the area to register. The area specified here appears as the thumbnail in the **People** view.

Note

- Click  (Close) to remove the white frame.

4. Click **Register name** below the white frame, then enter the name of the person to register.

5. Click an area outside the white frame.

The image(s) is (are) registered to the **People** view.

Note

- When a registered name is entered, its image(s) and the name(s) appear in the pop-up menu. To register as the same person as the registered person, select the name in the pop-up menu. To register as a different person, click an area outside the white frame to complete the name entry.
- To delete a registered person, control-click the person in the **People** view and select **Delete** from the displayed menu to display a deletion confirmation window. Click **Yes** to delete the name from the **People** view. Images whose names of people have been deleted appear as those of unregistered people in the **Unregistered People** view.
- You can also set the profiles of registered people, such as their relationships with you and their birthdays.

➡ [Registering People's Profiles](#)

Important

- When the file name of an image is changed or an image is moved, the registered information of people may be lost.
- Even if you copy images with information of people registered, the registered information of people will not be retained.

Registering Events

Register the event information to images so that you can browse the images by event.

1. Click **Calendar**.

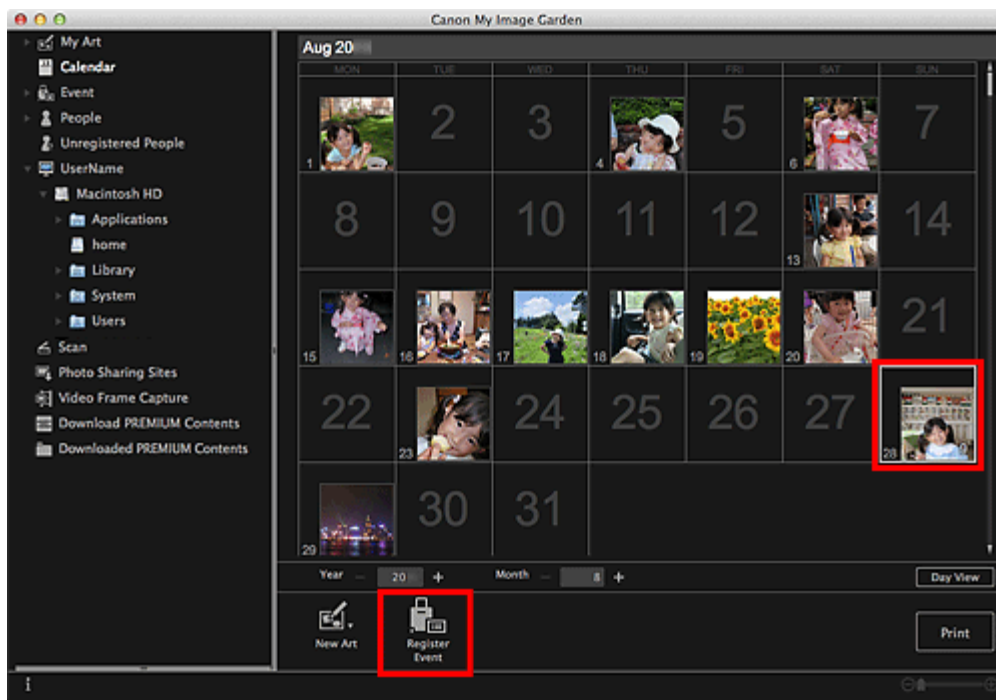

The view switches to **Calendar**.

Note

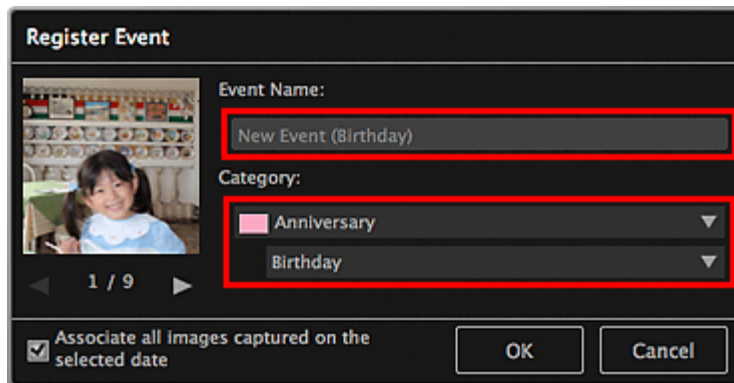

- Events can be registered only when the **Calendar** view is set to Month View. If set to Day View, click **Month View** at the bottom right of the screen to switch to Month View.

2. Select the date for which you want to register an event, then click **Register Event**.

The **Register Event** dialog appears.

3. Set **Event Name** and **Category**.

Note

- See "Register Event Dialog" for the **Register Event** dialog.

4. Click **OK**.

The event label appears in the **Calendar** view, and the registered event name appears below **Event** on the left side of the screen.

Note

- When you place the cursor over an event label, the shape of the cursor changes to  (Left Right Arrow). In that state, you can drag the label to extend or shorten the event period.
- To delete a registered event, control-click the event displayed below **Event** on the left side of the screen and select **Delete** from the displayed menu to display a deletion confirmation window. Click **Yes** to delete the event name from the **Event** view.

Important

- When the file name of an image is changed or an image is moved, the registered event information may be lost.
- Even if you copy images with event information registered, the registered event information will not be

retained.

Registering Favorite Levels

When you register favorite levels to images, those with higher favorite levels are more likely to be laid out automatically in recommended items.

Important

- Favorite levels can only be registered to images saved in folders under **Perform Image Analysis in the Following Folder(s)**. See "**Image Analysis Settings Tab**" for how to set **Perform Image Analysis in the Following Folder(s)**.
- Even if a favorite level is set, the image may not be placed with priority in the item depending on the image analysis result.

1. Control-click the thumbnail of the image to which you want to register a favorite level, then select **Favorite Level**.

Note

- Select multiple images and control-click to specify the same favorite level to them at once.
- When a person is selected in the **People** view or when a date is selected in the **Calendar** view set to **Month View**, you can specify the same favorite level to all images registered to the selected person or date.

2. Register the favorite level.

Specify the number of ★ (Stars) according to the favorite level of the image.

The favorite level can be specified in six levels. The more stars, the higher the favorite level becomes.

Note

- You can also register the favorite level by selecting an image then selecting **Favorite Level** from the **Image** menu.
-

Important

- When the file name of an image is changed or an image is moved, the registered favorite level may be lost.
- Even if you copy images with favorite levels set, the set favorite levels will not be retained.

Scanning Photos and Documents

- Easy Scanning with Auto Scan
- Scanning Photos
- Scanning Documents
- Scanning with Favorite Settings
- Cropping Scanned Images

Note

- By clicking **Stitch** in the **Scan** view, you can scan the left and right halves of an item larger than the platen and combine the scanned images back into one image. See the corresponding page of *On-screen Manual* for how to scan and combine images.
- By clicking **ScanGear** in the **Scan** view, you can start ScanGear (scanner driver) and scan by specifying the output size, image corrections and other settings. See the corresponding page of *On-screen Manual* for how to scan using ScanGear.

Easy Scanning with Auto Scan

You can scan easily by automatically detecting the item type.

1. Make sure that your scanner or printer is turned on.
2. Place the item on the platen of your scanner or printer.

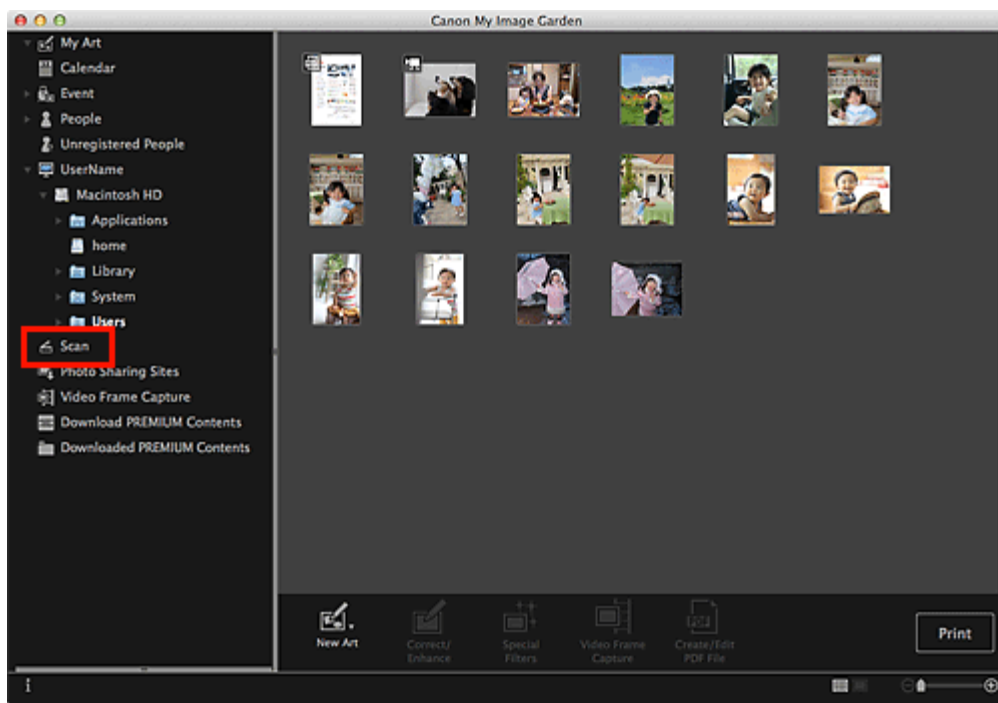

Note

- See the corresponding page of *On-screen Manual* for how to place items.

3. Start My Image Garden.

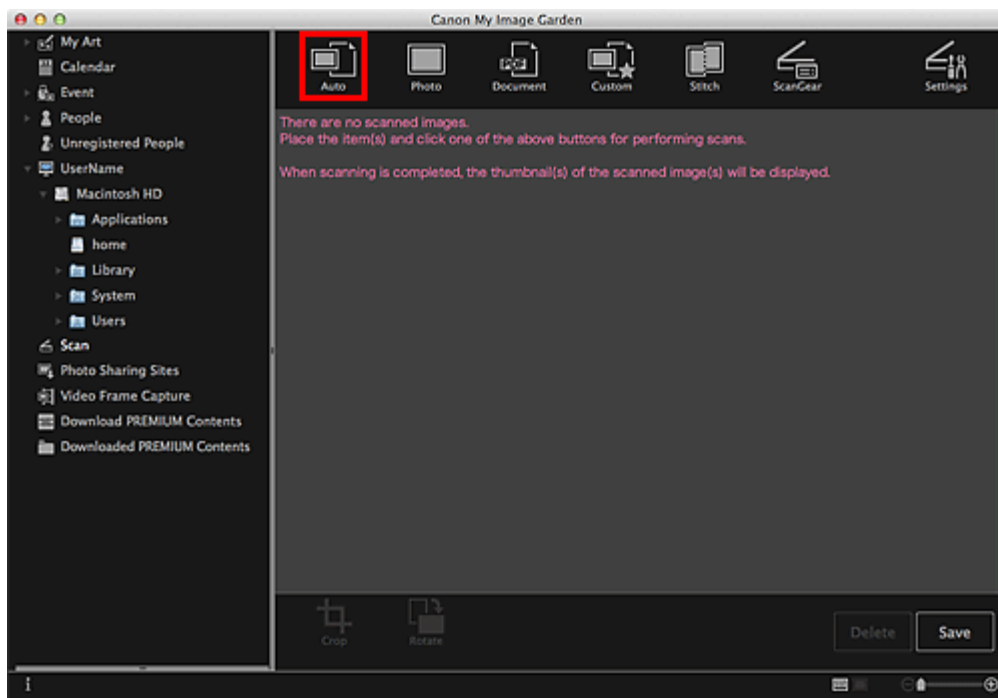

➡ Starting My Image Garden

4. Click **Scan**.

The view switches to **Scan**.

5. Click **Auto**.

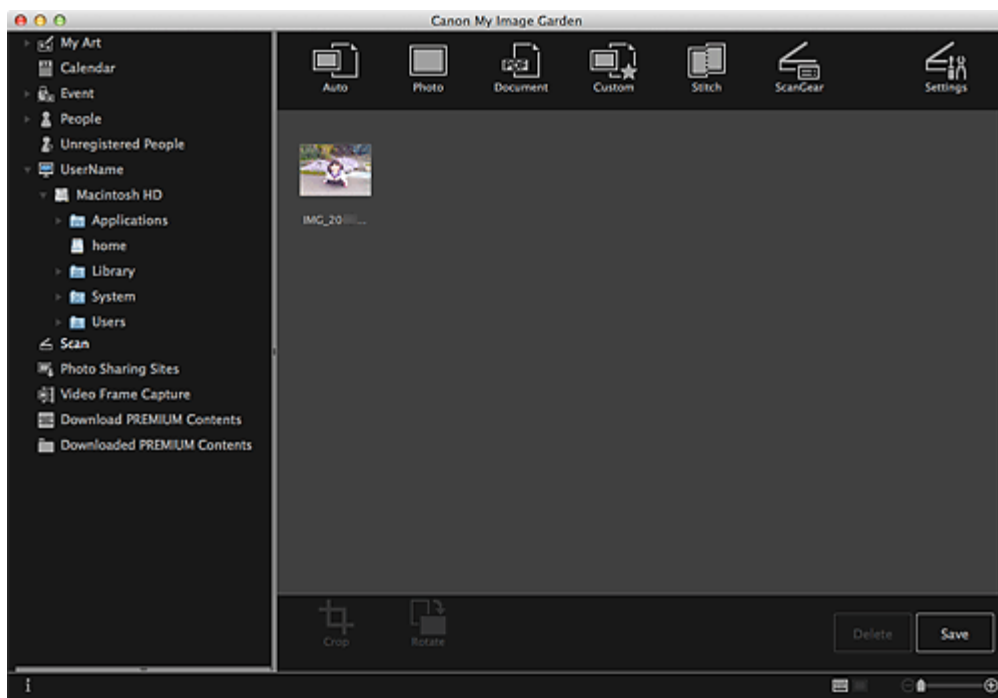

Scanning starts.

Note

- Refer to the corresponding page of *On-screen Manual* to specify the scan settings.
- Click **Cancel** to cancel the scan.

When scanning is completed, the image appears as a thumbnail.

Note

- You can rotate the selected image 90 degrees clockwise each time you click **Rotate**.
- You can crop images.
 - ➡ **Cropping Scanned Images**
- Click **Save** to save rotated or cropped scanned images.
 - ➡ **Save Dialog (Scan View)**
- You can set the save location for scanned images on the **Advanced Settings** tab of the

Preferences dialog displayed by selecting **Preferences...** from the **My Image Garden** menu.
See "[Preferences Dialog](#)" for details on the setting procedure.

Page top ▲

Setting the Theme and Main People

In the **My Art** view, you can set the theme and main people of your items.

Note

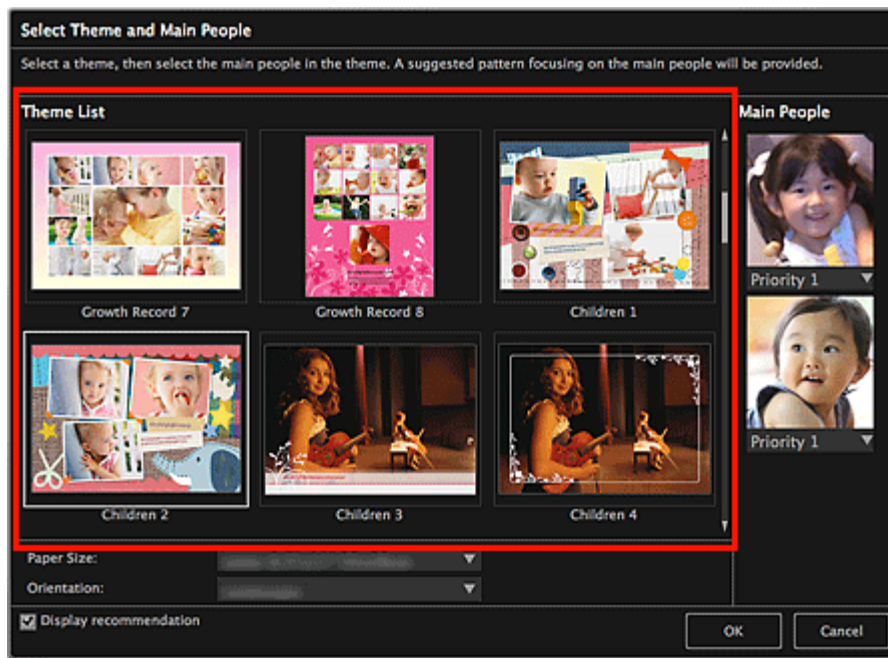

- See "My Art View" for how to switch to the **My Art** view.
- Collage editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

1. Click **Theme and Main People** in the **My Art** view.

The **Select Theme and Main People** dialog appears.

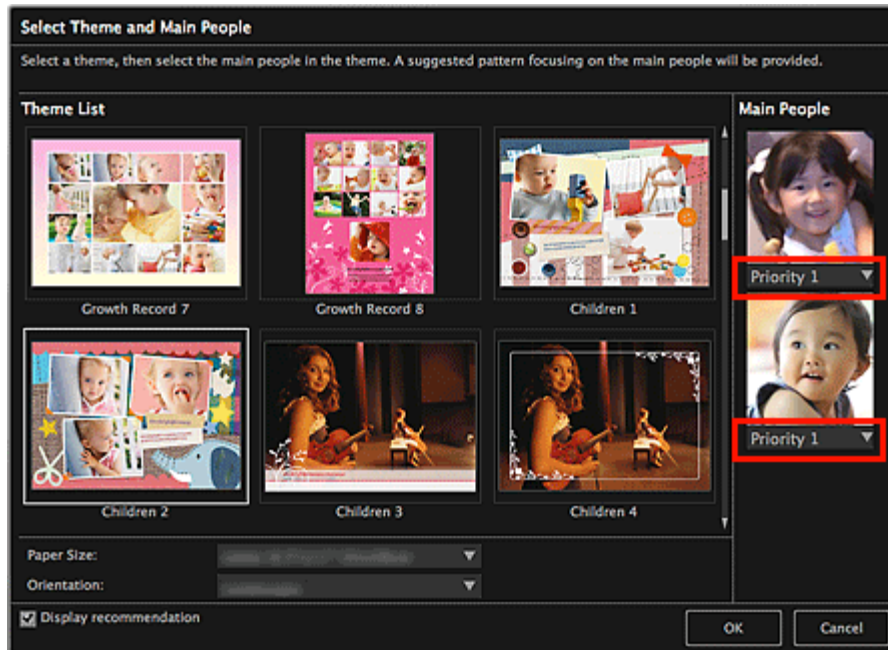

2. Select the theme you want to use.

3. Set the priority of people.

You can select **Priority 1** or **Priority 2**.

Leave the field blank if not setting the priority.

4. Select **Paper Size** and **Orientation**.

Note

- Selectable **Paper Size** and **Orientation** vary depending on the theme.

5. Make sure that the **Display recommendation** checkbox is selected.

Images will be automatically inserted to the item's layout frames based on the information registered to the images.

See "[Registering Various Information to Photos](#)" for how to register information to images.

Note

- Images with higher favorite levels and frequently browsed images are used with priority.
 - Deselect the checkbox if you want to specify the images that are to be inserted into your item. See "[Inserting/Adjusting Images](#)" for how to insert images.
 - When **Identifying people...** appears at **Unregistered People** in Global Menu, the result may not be as expected since automatic placement does not apply to images for which analysis has not been completed.
 - People different from those set as the main people may be placed depending on the image analysis results.
-

6. Click **OK**.

The theme and main people are set, and the item appears.

[Page top ▲](#)

Changing Background

In the **My Art** view, you can change the background of your items by page.

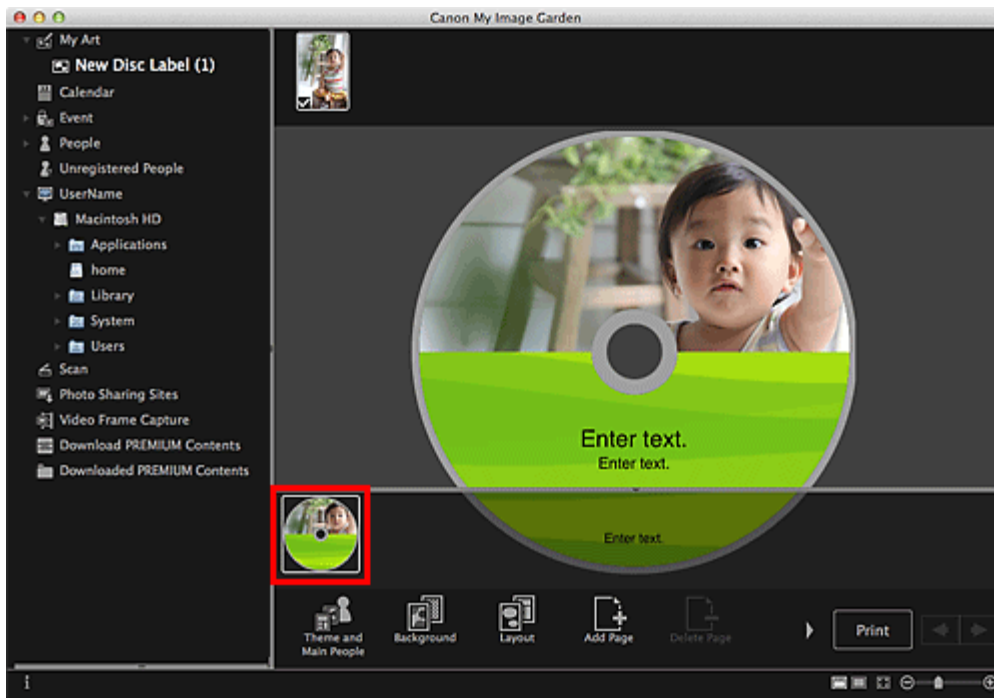

Important

- This function is not available when PREMIUM Contents are used.
- This function may not be available depending on the type and theme of your item.

Note

- See "My Art View" for how to switch to the **My Art** view.
- Disc label editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

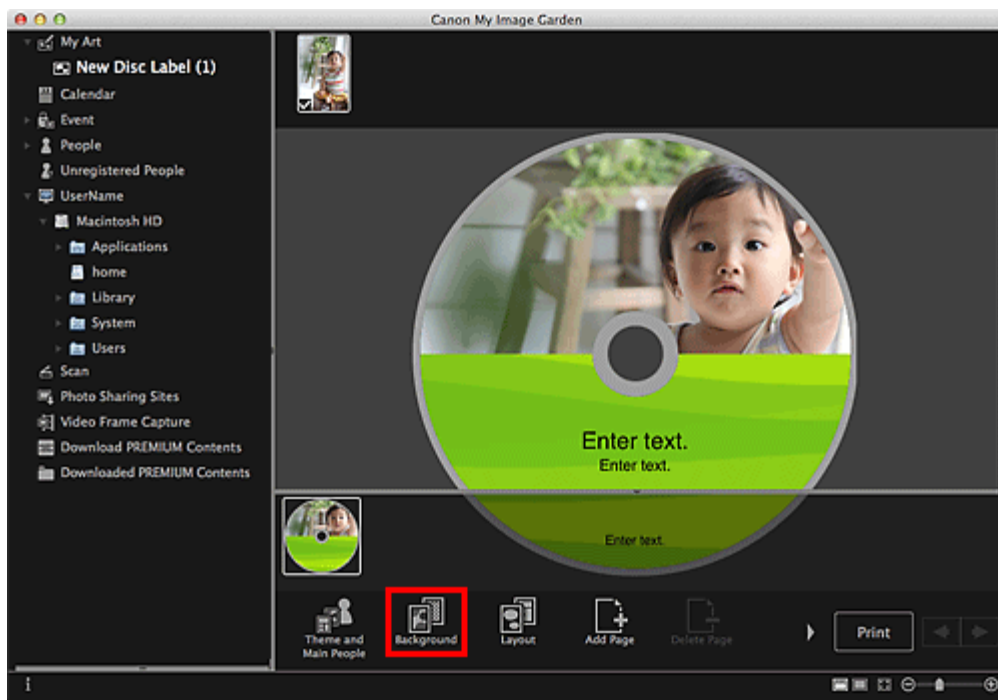

1. In the Page Thumbnails area, select the page of which you want to change the background.

Note

- If the Page Thumbnails area is not displayed, click the bar above the operation buttons.

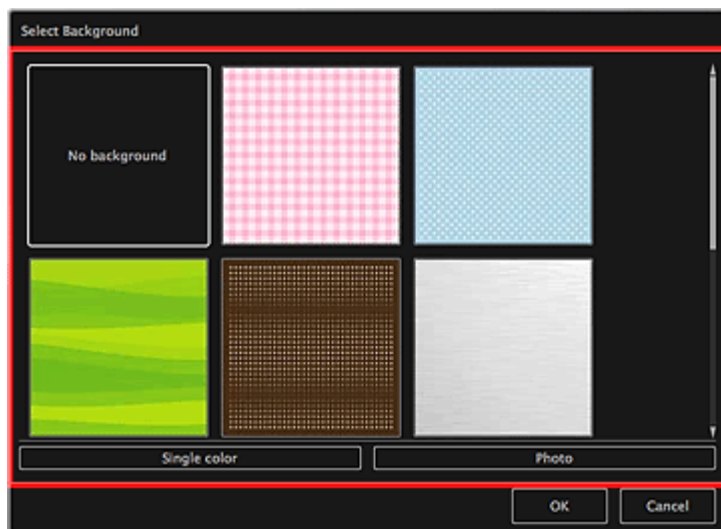

2. Click **Background**.

The **Select Background** dialog appears.

3. Select a background.

Select the type of background you want to use in the **Select Background** dialog.

When **No background** is selected

The background will be blank (white).

When a sample image is selected

The selected image is set as the background.

When **Single color** is selected

The **Colors** dialog appears. Select a color.

When **Photo** is selected

You can insert a photo of your choice into the background.

Note

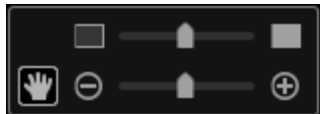

- **Single color** and **Photo** do not appear depending on the item type and selected theme.

4. Click **OK**.

The selected background is set for the selected page.

When **Photo** is selected, you can insert an image into the background by dragging and dropping it from the Materials area. You can also scan an item such as a photo and insert it into the background. Control-click the background of the page in the Edit area, then select **Use Scanned Image** from the displayed menu.

When you insert a background, the background editing toolbar with which you can adjust the position, transparency and size of the background image appears at the bottom right of the image.

(Adjust Position)

You can switch the cursor between  (Move) and the standard one. Switch to  (Move) and drag the image to change its position. Switch to the standard cursor to lock the image position.

(Adjust Transparency)

You can freely adjust the transparency of the image by dragging the slider. You can also change the transparency by clicking  (Transparency: 0%) or  (Transparency: 100%).

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size of the background image. You can also freely change the display size by dragging the slider.

Note

- Depending on the display size of preview, the background editing toolbar may be hidden behind the Page Thumbnails area and cannot be operated. In that case, click the bar at the top of the Page Thumbnails area to hide it.
- See "[Inserting/Adjusting Images](#)" for how to insert a scanned image into the background.

Changing Layout

In the **My Art** view, you can change the layout of your items by page.

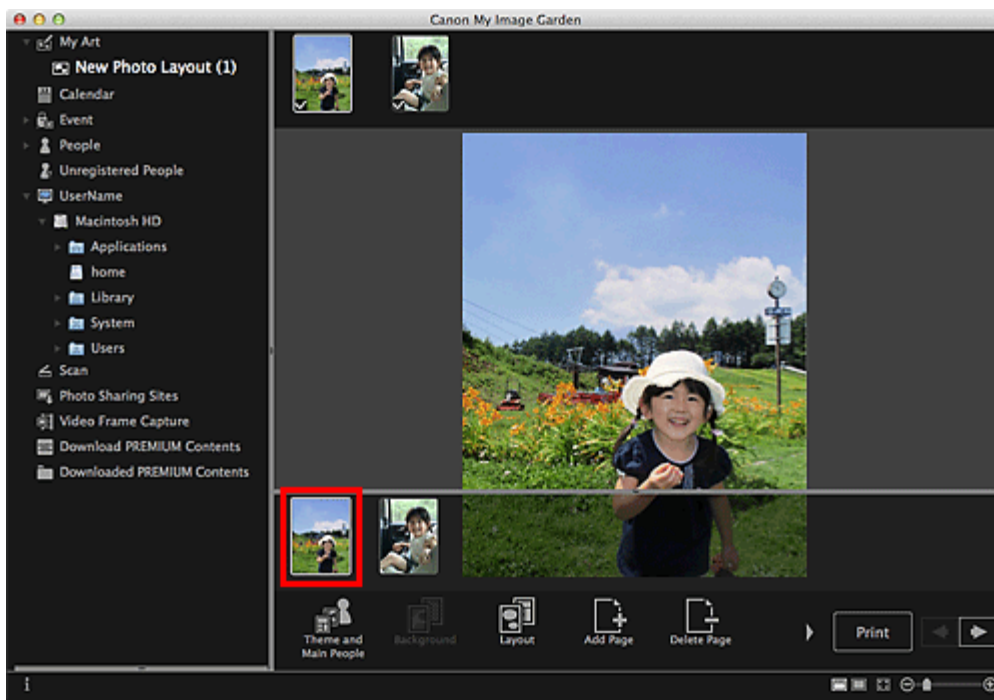

Important

- This function is not available when PREMIUM Contents are used.
- This function may not be available depending on the type and theme of your item.

Note

- See "My Art View" for how to switch to the **My Art** view.
- Photo layout editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

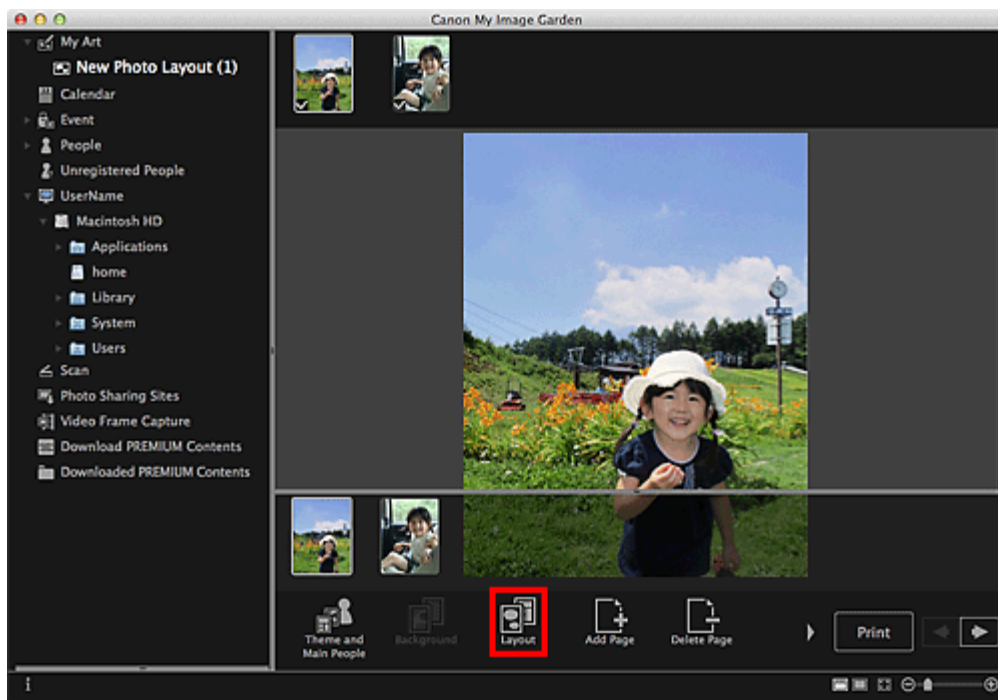

1. Select a page in the Page Thumbnails area.

Note

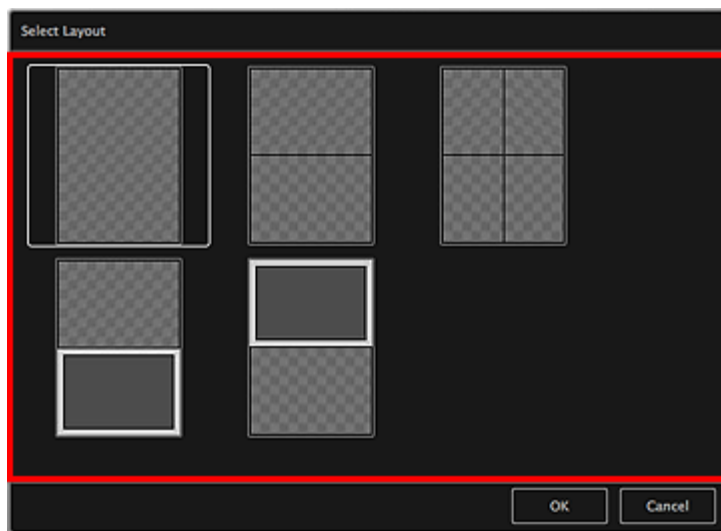

- If the Page Thumbnails area is not displayed, click the bar above the operation buttons.

2. Click **Layout**.

The **Select Layout** dialog appears.

3. Select the layout you want to use.

4. Click **OK**.

The layout of the selected page changes to the selected one.

Related Topic

- [Select Layout Dialog](#)

Arranging Photos Automatically

In the **My Art** view, you can automatically place images into the layout frames of your items.

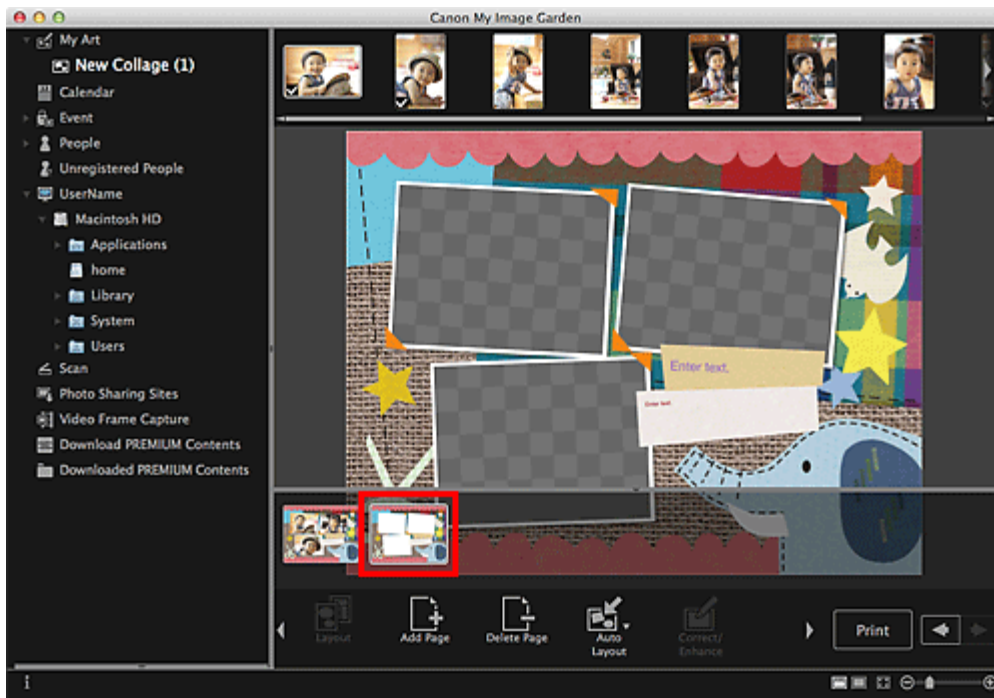

Important

- This function may not be available when PREMIUM Contents are used.

Note

- See "My Art View" for how to switch to the **My Art** view.
- Collage editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

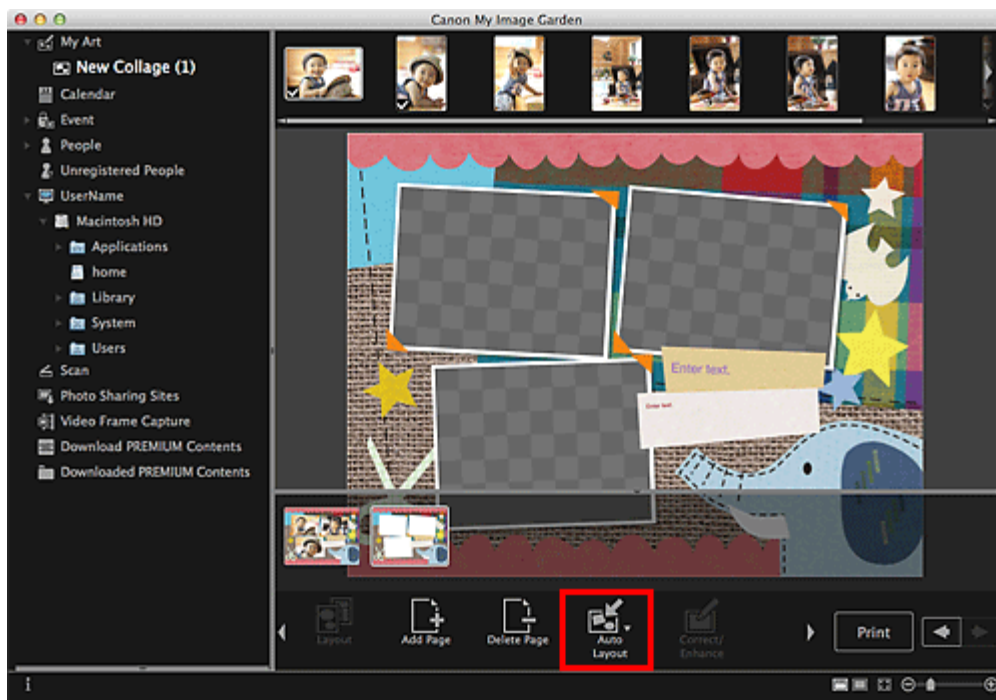

1. In the Page Thumbnails area, select the page in which you want to place images.

Note

- If the Page Thumbnails area is not displayed, click the bar above the operation buttons.

2. Click **Auto Layout**.

3. Select a layout type from the displayed menu.

Images in the Materials area are placed automatically according to the selected layout type.

When **Display recommendation** is selected

Based on the favorite level and information of people registered to images, suitable images are selected and placed into the layout frames. The image placement switches each time you click this option, displaying various patterns of the item.

Important

- The layout may not be as expected if there is an image for which image analysis is not completed in the Materials area. See "**Image Analysis Settings Tab**" for how to specify the image analysis settings.

When **Material order** is selected

Images are placed into the layout frames in the order they are displayed in the Materials area.

When **Date order** is selected

Images are placed into the layout frames in chronological order by date of shooting or creation.

Note

- You can also rearrange placed images by dragging and dropping them in the Edit area.

Adding, Deleting or Rearranging Pages

In the **My Art** view, you can add pages to or delete pages from your items. You can also rearrange pages.

➡ Adding Pages

➡ Deleting Pages

➡ Rearranging Pages

Important

- This function is not available for calendars or cards.
- This function is not available when PREMIUM Contents are used.

Note

- See "My Art View" for how to switch to the **My Art** view.
- Collage editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

Adding Pages

You can add pages of the same layout as that displayed in the Edit area.

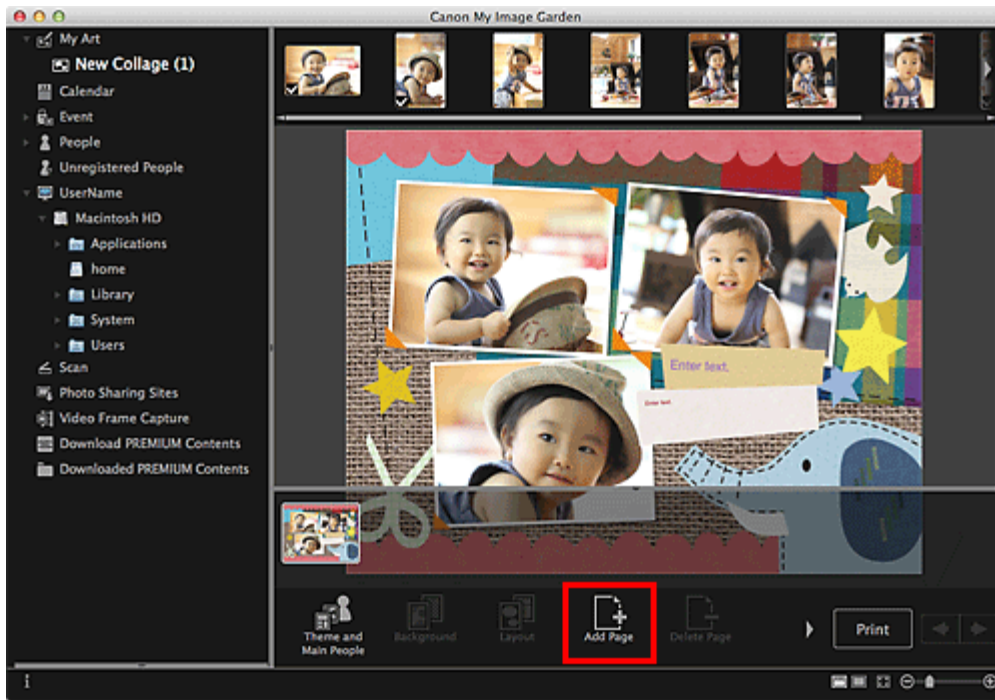

1. Select a page in the Page Thumbnails area.

Note

- If the Page Thumbnails area is not displayed, click the bar above the operation buttons.

2. Click Add Page.

A new page is added after the selected page.

Deleting Pages

You can delete unwanted pages.

Note

- Pages can be deleted only when there are multiple pages.

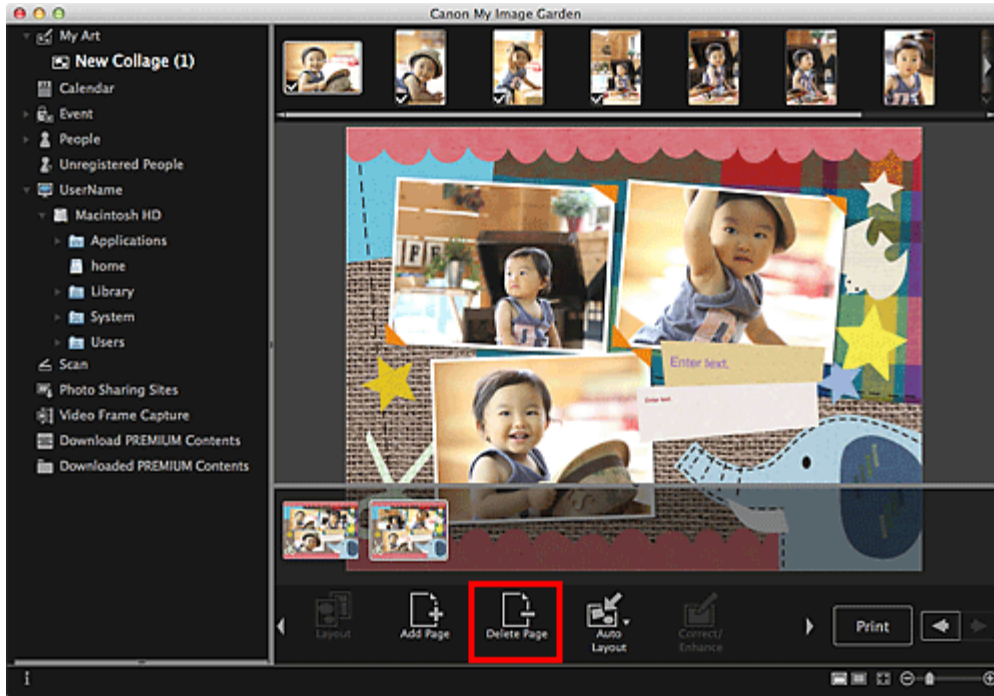

1. Select an unwanted page in the Page Thumbnails area.

Note

- If the Page Thumbnails area is not displayed, click the bar above the operation buttons.

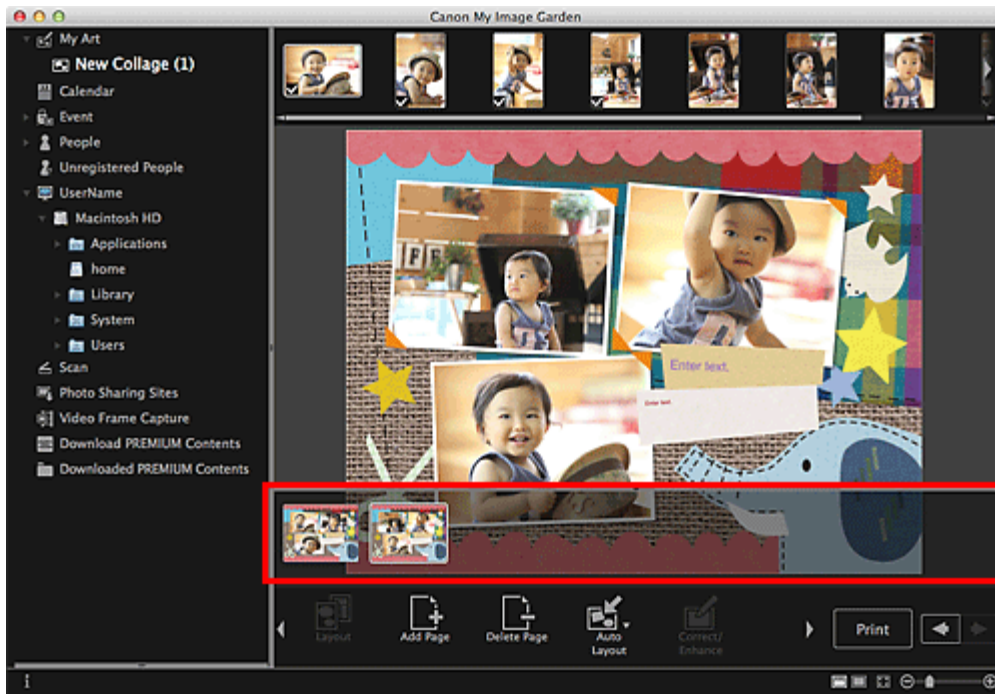

2. Click **Delete Page**.

The page is deleted.

Rearranging Pages

You can rearrange the order of pages by dragging and dropping them in the Page Thumbnails area.

Page top ▲

Inserting/Adjusting Images

In the **My Art** view, you can insert images into your items by dragging and dropping materials or by scanning items such as photos. You can also change the angle, position and size of images. You can also correct or enhance images.

➡ Inserting Images from the Materials Area

➡ Scanning and Inserting Images

➡ Adjusting Images

➡ Correcting/Enhancing Images

Important

- This function may not be available when PREMIUM Contents are used.

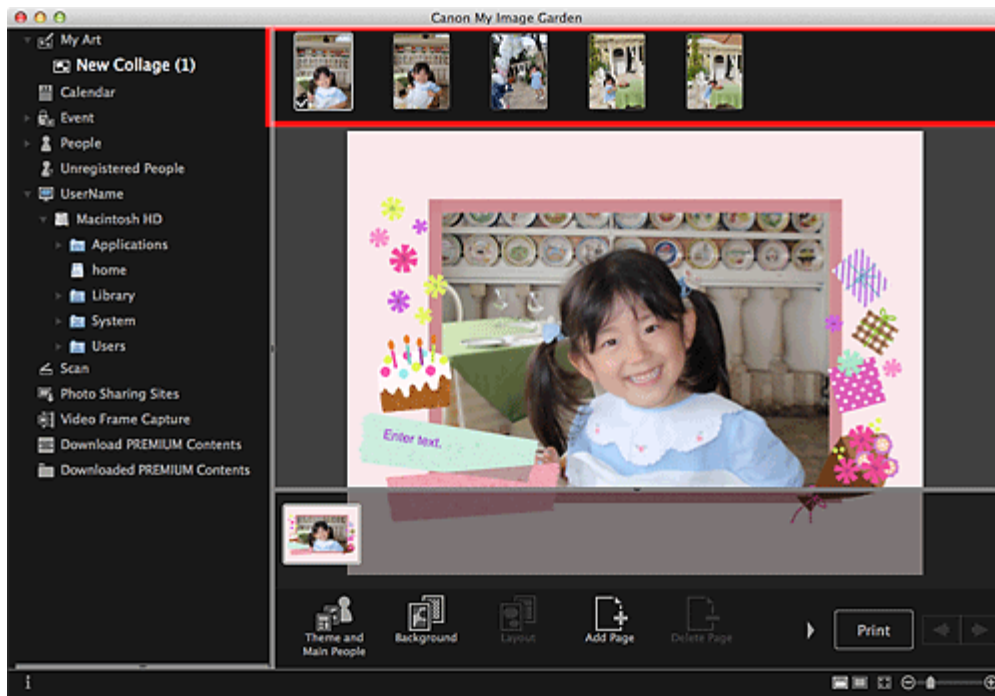

Note

- See "My Art View" for how to switch to the **My Art** view.
- Collage editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

Inserting Images from the Materials Area

You can insert images in the Materials area into the layout frames of your item or replace images.

1. In the **My Art** view, select an image in the Materials area.

2. Drag and drop it to a layout frame of your item.

When you move an image to a layout frame, a cross icon appears on the image.

Scanning and Inserting Images

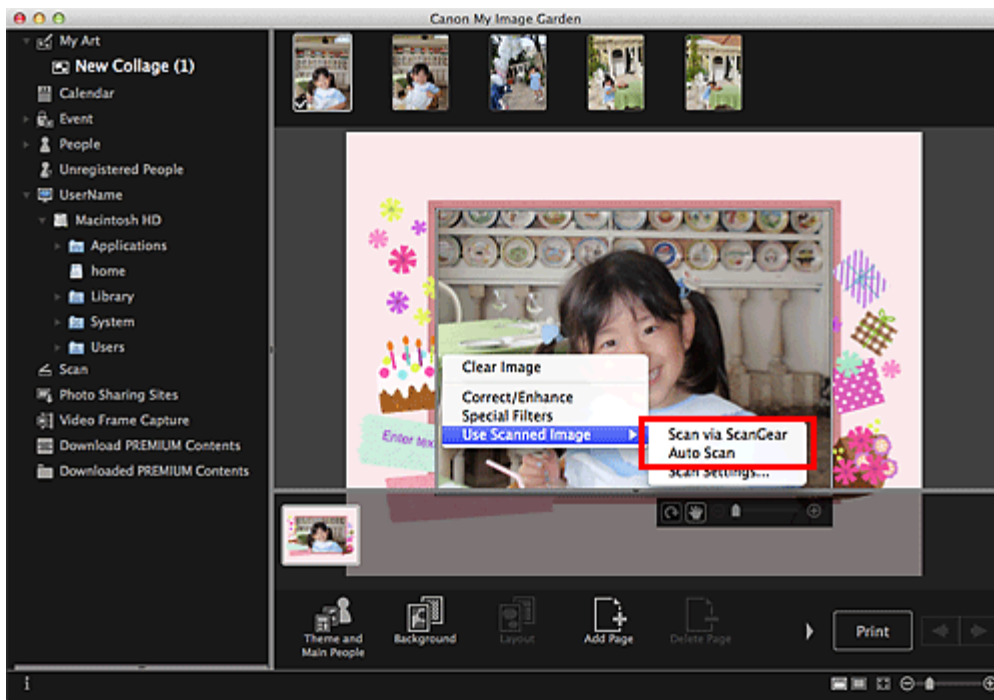

You can scan and insert your favorite photos, etc. into your items. You can scan with simple steps or by using ScanGear (scanner driver).

1. Place the item on the platen.
2. In the Edit area of the **My Art** view, control-click an image, a layout frame or the background, then select **Use Scanned Image** from the displayed menu.

Note

- To insert a scanned image into the background, place a checkmark beside **Photo** in the **Select Background** dialog.

3. From the **Use Scanned Image** menu, click **Scan via ScanGear** or **Auto Scan**.

When **Scan via ScanGear** is selected

The ScanGear screen appears. You can scan in the mode you want to use.

See the corresponding page of *On-screen Manual* for details on scanning.

When **Auto Scan** is selected

Scanning starts. Items are detected automatically.

Note

- To specify the scan/save settings, click **Scan Settings...** from the **Use Scanned Image** menu. See the corresponding page of *On-screen Manual* for setting procedure.

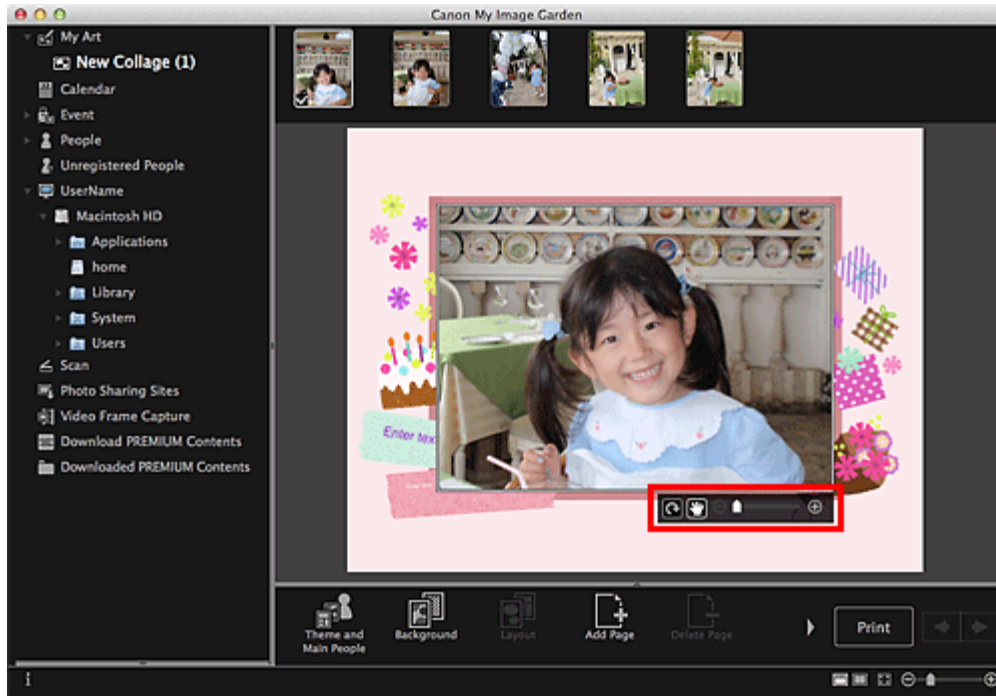

Adjusting Images

You can change the angle, position and size of the images inserted in your item. You can also enhance images by adjusting the image brightness and contrast or by using special filters.

Changing Angle, Position and Size of Images

1. Select an image in the Edit area of the **My Art** view.

The image editing tool appears below the selected image.

2. Change the angle, position and size using the editing toolbar.

(Rotate 90°)

You can rotate the image 90 degrees clockwise each time you click it.

(Adjust Position)

You can switch the cursor between  (Move) and the standard one. Switch to  (Move) and drag the image to change its position. Switch to the standard cursor to lock the image position.

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size of the image. You can also freely change the display size by dragging the slider.

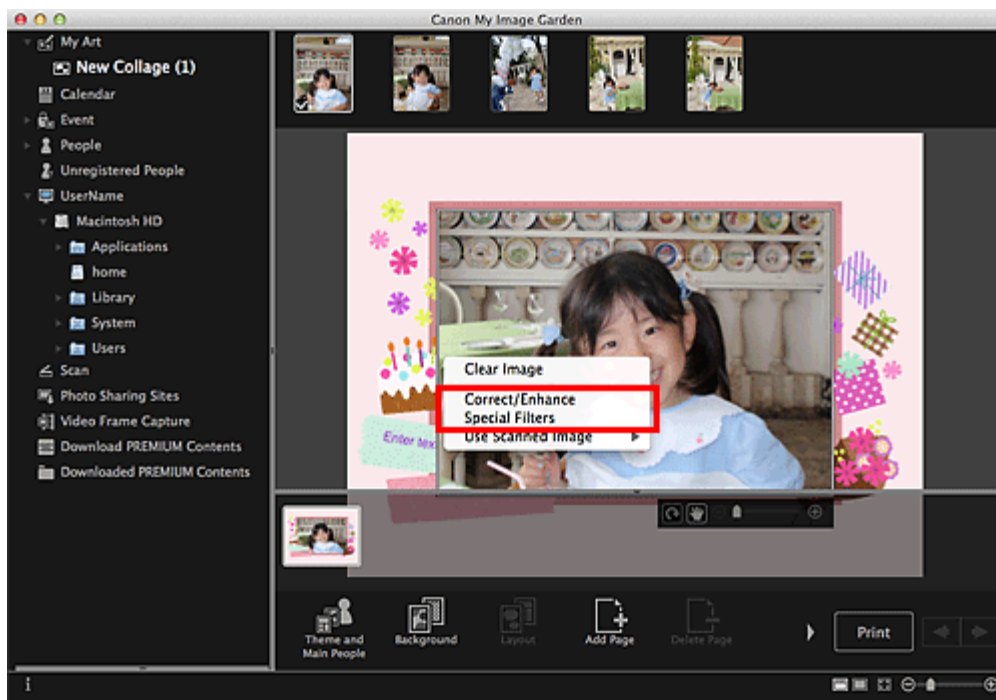

Note

- When the item is a photo layout, **Add date** appears. Click to add the date to the photo.

Correcting/Enhancing Images

1. In the Edit area, control-click the image, then select **Correct/Enhance** or **Special Filters** from the displayed menu.

When **Correct/Enhance** is selected

The **Correct/Enhance Images** window appears. You can correct red eyes or adjust the brightness and contrast of images.

➡ [Correcting/Enhancing Photos](#)

When **Special Filters** is selected

The **Special Image Filters** window appears. You can joyfully enhance photos using the filter you want to use.

➡ [Enhancing Photos Using Special Filters](#)

[Page top ▲](#)

Adding Text to Photos

In the **My Art** view, you can add text to cards, collages, disc labels and other items containing a text box.

Important

- This function may not be available depending on the type and theme of your item.

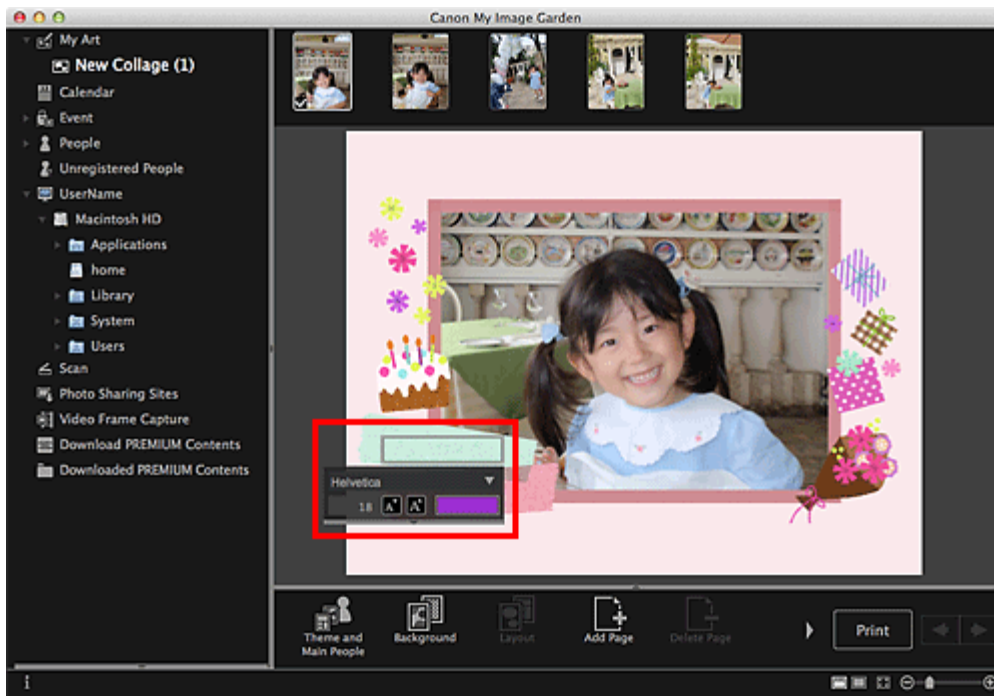

Note

- See "My Art View" for how to switch to the **My Art** view.
- Collage editing is used as an example in the following descriptions. The screen(s) may vary depending on what you create.

1. In the **My Art** view, click a text box in your item.

The text input palette appears below the text box.

2. Enter text in the text box.

3. Use the text input palette to change the font type, font size, font color and text position.

(1) Font

Select the font type.

(2) Size

You can set the font size within the range of 5 to 100 points.

(Decrease Size)

Decreases the font size by 1 point each time it is clicked.

(Increase Size)

Increases the font size by 1 point each time it is clicked.

(3) Color

You can select the font color.

(Color Setting)

Click to display the **Colors** dialog. Select the color you want to set.

(4) Text Alignment

You can set how you want to align text.

For text alignment, you can select align left, align center or align right.

(5) Font Style

You can set the font style.

For font style, you can select bold, italic, outline or shadow.

You can also set multiple font styles.

Note

- Click the bar at the bottom of the text input palette to show or hide Text Alignment and Font Style.
 - Available font styles vary depending on the selected font.
-

4. Click outside the text box.

The entered text is reflected in the item.

Correcting/Enhancing Photos

You can correct red eyes or adjust the brightness and contrast of images.

Select an image in the Edit area of the **My Art** view, **Calendar** view set to **Day View**, **Event** view, the expanded display of the **People** view, **Unregistered People** view or folder view, then click **Correct/Enhance** at the bottom of the screen to display the **Correct/Enhance Images** window. You can make the following corrections and enhancements in the **Correct/Enhance Images** window.

Important

- This function is not available when a PDF file is selected.
- Correction/enhancement may not be possible due to insufficient memory depending on the size of the selected image.

Auto Photo Fix

You can automatically apply corrections suitable for photos based on the analysis of the shot scene.

Downloading Images from Photo Sharing Sites

You can search for images on photo sharing sites on the Internet and download the images you want to print.

Important

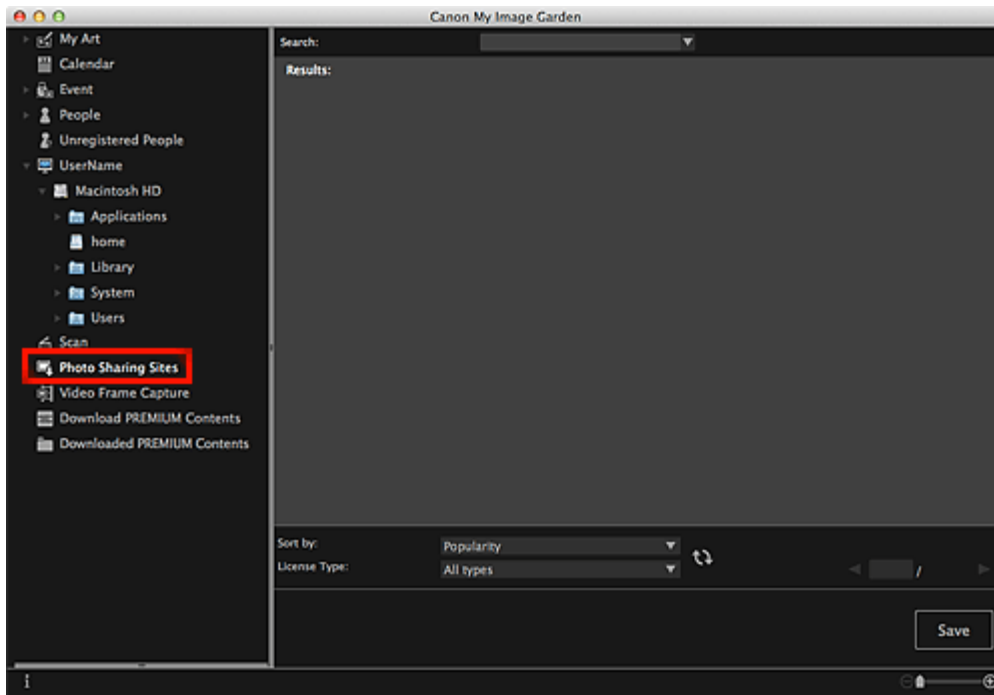

- Internet connection is required to use this function. Internet connection fees apply.
- This function may not be available in some regions.
- It is unlawful to reproduce or edit the copyrighted work of another person without permission from the copyright holder, except for personal use, use within the home, or other use within the limited scope as defined by the copyright.
Additionally, reproducing or editing photographs of people may infringe on portrait rights.
- You may be required permission of way to use the work from copyright holder when using the work of others except for personal use, use within the home, or other use within the limited scope as defined by the copyright. Please check the details carefully of the web page of work in the photo sharing site. Please also check terms of service in the photo sharing site before using the work of others. Canon is not responsible for any copyright issues arising from the use of this function.
- This application uses the Flickr API but is not endorsed or certified by Flickr.

1. Start My Image Garden.

➡ Starting My Image Garden

2. Click **Photo Sharing Sites**.

The view switches to **Photo Sharing Sites**

3. Enter the search text in **Search**, then press the return key.

Search starts, then the images that match the search text appear in the Search Results area.

Important

- Some images, such as images in formats other than JPEG, do not appear.

Note

- The number of images that match the search text may be small depending on the language of the search text. In that case, entering the search text in English may increase search results.

4. Select **Sort by** and **License Type** at the bottom of the screen as required, then click  (Refresh).

Results in the Search Results area are refreshed.

Note

- Click  (Previous Page) or  (Next Page) to display the previous/next page. Alternatively, enter a page number in the page number entry box, then press the return key to display the specified page.

5. Select the image(s) you want to download.

Important

- You can select up to 30 images at one time.

6. Click **Save** at the bottom right of the screen.

The **Save** dialog appears.

7. Specify the save settings.

➡ [Save Dialog \(Photo Sharing Sites View\)](#)

8. Click **Save**.

The selected image(s) is (are) saved to your computer, and the **Photo Sharing Sites** view reappears.

Note

- Downloaded images can be saved in JPEG format only.

Note

- You can print downloaded images or create calendars and collages and print them. See "[Creating and Printing Items](#)" for details.

Enjoying Items Recommended by My Image Garden

Creating collages, calendars, etc. using photos saved on a computer require a lot of time and effort to select your favorite photos among a huge number of images and to enlarge/reduce photos to fit the layout frames.

When you use the item recommendation function of My Image Garden, patterns of items such as collages and calendars with automatically selected/placed photos will appear as slide shows in Image Display of Quick Menu, allowing you to create the item you like with simple mouse clicks.

In addition, by registering people's profiles and event information, patterns suitable for the people and events will appear, allowing you to easily print items such as your children's growth record and calendars full of family memories.

Record Your Children's Growth Process (Growth Record)

When you register your child's birthday and relationship with you to the child's profile...

After the First Birthday

Collage in which photos shot every month up to the first birthday are automatically laid out

- The layout focuses on face areas.

After the Third Birthday

Collage in which photos shot every three months up to the third birthday are automatically laid out

- The layout focuses on face areas.

You can enjoy the growth record collages for up to the sixth birthday.

Various Themes Corresponding to Your Children's Growth

My Image Garden recommends delightful items corresponding to various scenes.

Celebrate the Birthday

When you register a birthday event in the **Calendar** view...

Collage/card in which photos shot on the birthday are automatically laid out

Preserve the Proud Moments

When you register a recital event in the **Calendar** view...

Collage/card/calendar in which photos shot on the day of the recital are automatically laid out

Record the Memories of Family Travel

When you register a travel event in the **Calendar** view...

Collage/card/calendar in which photos shot during the travel period are automatically laid out

- Photos of people and landscape photos are laid out in a good balance.
- The layout will be like a series of snapshots portraying the places visited.

Celebrate the Start of a New Chapter in Life

When you register a wedding event in the **Calendar** view...

Collage/card/calendar in which photos shot on the wedding day are automatically laid out

In addition to these, numerous items such as the following are provided. Enjoy the item recommendation function of My Image Garden by registering memorable events, ceremonies and various other occasions.

- Calendars with seasonal photos displayed once every month, every six months and every year
- Items with photos of your hobbies
- Items with photos of the family's memories of one month, three months, six months or one year

And more!

Note

- See "[Registering Various Information to Photos](#)" for how to utilize the item recommendation function.
- See "[Printing Recommended Items and Images Displayed in Slide Shows](#)" for how to print patterns displayed in slide shows.

A093

My Image Garden

Registering Various Information to Photos

Images analyzed in My Image Garden appear in the **Unregistered People** view or **People** view by person, and also appear in the **Calendar** view based on the shooting date and time. Even this alone will display patterns of items such as collages and calendars with automatically selected/placed photos as slide shows in Image Display, allowing you to enjoy various items; however, by registering people's profiles and event information, you can also utilize the item recommendation function. The more information you register, the more patterns suitable for the people and events will appear.

In addition, registering information will make it easier to find the target photos when you search for them, or to create and print the items you like.

➡ Registering People and Profiles

➡ Registering Event Information

➡ Registering Favorite Levels

Registering People and Profiles

This will make it easier to organize or browse photos by person. You can register images that are automatically identified as those of the same person, at once, or register by specifying the face area in images one by one.

➡ Registering People

In addition, after registering a person in the **Unregistered People** view, you can register the person's profile (birthday, relationship with you, etc.) to the person.

When the birthday is registered, the person's growth record of the previous age (from the day after the birthday to the next birthday) will appear automatically.

In addition, when the relationship with you is registered, the person will be placed with priority in patterns. For example, when **Daughter** is set for the relationship, patterns with layouts focusing on **Daughter** will appear.

When the relationship is not registered

When the relationship is registered

The daughter may appear smaller, or the layout may focus on a friend.

The layout focuses on the daughter.

Moreover, if the parent-child relationship is registered, patterns that enrich family memories will also appear.

➡ Registering People's Profiles

Registering Event Information

This will make it easier to organize or browse photos displayed in the **Calendar** view by event. You can easily register events while checking the images displayed in a calendar. When event information is registered, various patterns in which images shot during the event period are used will appear according to the category.

➡ Registering Events

Patterns Displayed by Category

Category		Patterns Displayed
Kids	Growth record	Unisex collages, cards, calendars, etc. of growth records
	Entrance ceremony, Graduation, Recital, Sports day, Birthday, Others	Unisex collages, cards, calendars, etc. specific for each event
Anniversary	Wedding	Photo studio-like collages, marriage cards, calendars, etc. of weddings
	Birthday, Others	Collages, cards, calendars, etc. specific for each event
Leisure	Travel, Others	Collages, cards, calendars, etc. of memories with your family/grandparents/friends
Hobby	-	Favorite item collages, cards, calendars, etc.

Registering Favorite Levels

Images that will be automatically laid out in patterns are placed in the following order of priority.

- 1. In descending order of stars of images for which favorite levels are set
- 2. In descending order of print count
- 3. In descending order of access count
- 4. In descending order of shooting date

To make your favorite photos more likely to be placed, it is recommended that you register favorite levels to the images. You can register favorite levels on a photo-by-photo basis, or to multiple photos at once.

➡ Registering Favorite Levels

My Image Garden

My Art View

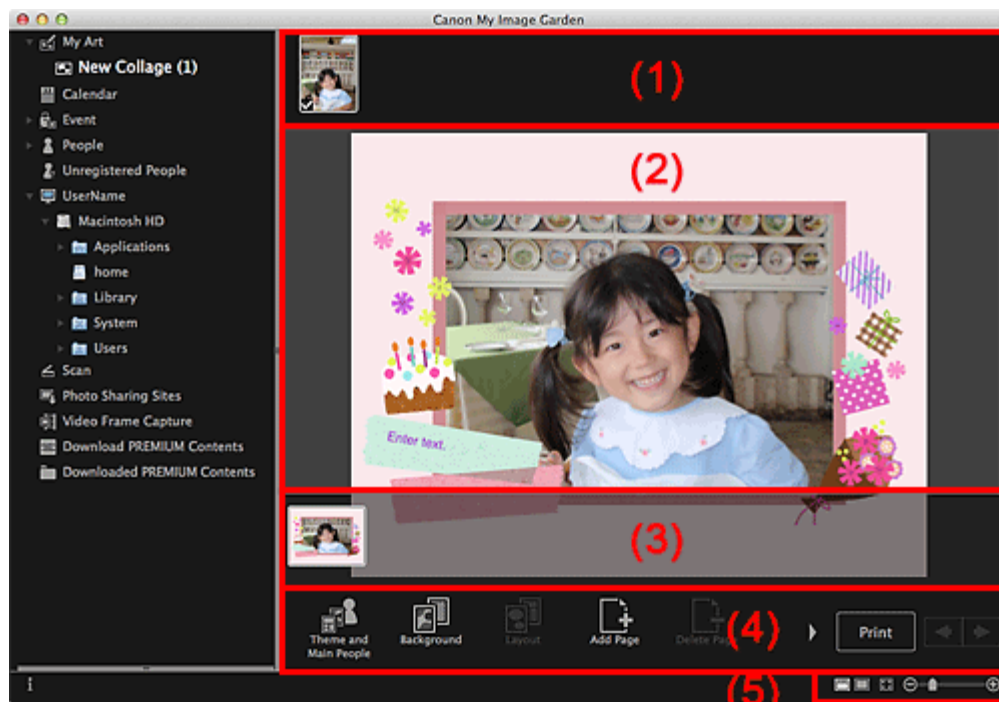

You can edit or print items such as collages and cards.

Important

- **Background** may not be clicked depending on the type and theme of your item.

Switch to the **My Art** view by one of the following operations

- Click a title displayed below **My Art** on the left side of the screen
- Click **OK** in the **Select Theme and Main People** dialog displayed by clicking **New Art** at the bottom left of each view
- Select a PREMIUM Content in the **Downloaded PREMIUM Contents** view, then click **Edit**
- Click a pattern displayed in Image Display of Quick Menu

- (1) Materials Area
- (2) Edit Area
- (3) Page Thumbnails Area
- (4) Operation Buttons
- (5) Display Size Setting Bar

(1) Materials Area

Displays the thumbnails of images that can be used for your item. A checkmark appears on the images in use.

Note

- You can drag and drop images to the layout frames in the Edit area to replace images.
 - You can also add images for use by dragging and dropping them to the title on the left side of the screen.
 - When you select **Delete** from the menu displayed by control-clicking a thumbnail, it will disappear from the Materials area.
-

(2) Edit Area

Displays your item's preview in which you can enter text or change the orientation, position and size of images. You can also correct/enhance or scan and insert images from the menu displayed by control-clicking an image or layout frame.

(3) Page Thumbnails Area

Displays the pages in your item as thumbnails. When you click a thumbnail, a preview of the page appears in the Edit area. Click the bar at the top of the Page Thumbnails area to show or hide the area.

(4) Operation Buttons

Note

- The buttons displayed vary depending on the item being edited.
 - **Background** can be clicked only when a page is selected in the Edit area.
 - **Delete Page** can be clicked only when there are multiple pages.
 - **Correct/Enhance** and **Special Filters** can be clicked only when an image is selected. When multiple images are selected, only the last selected image can be corrected, enhanced or adjusted.
 - Click  (Left Scroll) or  (Right Scroll) to display the hidden buttons.
-

Theme and Main People

Displays the **Select Theme and Main People** dialog in which you can set your item's theme and main people, paper size and paper orientation.

➡ [Select Theme and Main People Dialog](#)

Background

Displays the **Select Background** dialog in which you can change the background of the page being edited.

➡ [Select Background Dialog](#)

Layout

Displays the **Select Layout** dialog in which you can change the layout of the page being edited.

➡ [Select Layout Dialog](#)

Add Page

You can add new pages after the page displayed in the Edit area.

Delete Page

You can delete the page displayed in the Edit area.

Auto Layout

When you select a layout pattern, images will be automatically placed in the layout frames displayed in the Edit area.

You can select from the following three types of layout pattern.

- **Display recommendation**
- **Material order**
- **Date order**

Note

- When you select **Display recommendation**, a suitable image is selected for and placed in each layout frame of the item.

Correct/Enhance

Displays the **Correct/Enhance Images** window in which you can correct or enhance images.

➡ [Correct/Enhance Images Window](#)

Special Filters

Displays the **Special Image Filters** window in which you can enhance images with special filters.

➡ [Special Image Filters Window](#)

Advanced...

Displays the **Advanced Settings** dialog in which you can specify the settings for stickers, photo layouts, calendars and disc labels.

Photo Layout

You can set whether to print dates on all images or specify the position, size, color, etc. for dates.

➡ [Advanced Settings Dialog \(Photo Layout\)](#)

Calendar

You can set holidays and the display format for the calendar.

➡ [Advanced Settings Dialog \(Calendar\)](#)

Stickers

You can set whether to use the same image in all layout frames within the page.

➡ [Advanced Settings Dialog \(Stickers\)](#)

Disc Label

You can set the area to print.

➡ [Advanced Settings Dialog \(Disc Label\)](#)

Undo

Undoes the last operation.

Each click restores the previous state.

Print

Displays the print settings dialog from which you can print items.

➡ [Print Settings Dialog](#)

(Previous File/Next File)

Switches the displayed image when there are multiple pages or images.

(5) Display Size Setting Bar

(Thumbnail View)

Switches to the thumbnail view in which you can edit items.

(Details View)

Switches the view to preview the image.

(Whole Image View)

Fits the preview to the area size.

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

Note

- See "[Editing Items](#)" for how to edit items.
 - To delete items, control-click the title below **My Art** on the left side of the screen, then select **Delete** from the displayed menu.

Select Theme and Main People Dialog

You can set your item's theme and main people, paper size, etc.

Display the **Select Theme and Main People** dialog by one of the following operations.

- Select images, then click the item you want to create from **New Art** at the bottom of the screen
- Click **Theme and Main People** at the bottom of the **My Art** view

- (1) Theme Setting Area
- (2) Main People Settings Area
- (3) Paper Settings Area
- (4) Display recommendation

(1) Theme Setting Area

Theme List

Displays a list of themes. You can select the theme you want to use.

Note

- The themes displayed vary depending on the item.

(2) Main People Settings Area

Main People

Displays the thumbnails of the detected face areas when images of people for whom image analysis has been performed are selected.

Click ▾ (Down Arrow) below a thumbnail, then select **Priority 1** or **Priority 2** to set the priority of the photo. Leave the field blank if not setting the priority.

An item is automatically created by placing photos with higher priority in the center.

(3) Paper Settings Area

Paper Size

You can select the paper size.

Orientation

You can select the paper orientation.

(4) Display recommendation

Select this checkbox to place images selected for the item in a state suitable for the layout frames of the item.

When your item is a photo layout or sticker and the number of images selected for the item or displayed in the Materials area is larger than the number of layout frames in a page, one or more pages will be automatically added.

Note

- When **Identifying people...** appears at **Unregistered People** in Global Menu, the result may not be as expected since automatic placement does not apply to images for which analysis has not been completed.
- See "[Creating and Printing Items](#)" for how to create new items.

Photo Sharing Sites View

You can search for images on photo sharing sites on the Internet and download the images you want to print.

Click **Photo Sharing Sites** on the left side of the screen to switch to the **Photo Sharing Sites** view.

Important

- Internet connection is required to use this function. Internet connection fees apply.
- This product uses the Flickr API but is not endorsed or certified by Flickr.

- (1) Keyword Input Area
- (2) Search Results Area
- (3) Search Criteria/Page Designation Area
- (4) Operation Buttons
- (5) Display Size Setting Bar

(1) Keyword Input Area

Search

Enter the search text, then press the return key; search results appear in the Search Results area.

Note

- Alternatively, click  (Down Arrow) to display up to 20 search history records and select among them.
- When you want to enter multiple keywords, insert a space between the keywords.
- When search history exists, you can delete the records of previously entered keywords by selecting **Clear History** displayed at the bottom of the list.

(2) Search Results Area

Displays the thumbnails of search results. The title appears under each thumbnail.

 Important

- Due to limitations of photo sharing sites, if the search results exceed 4,000 images, the same images as those displayed in the page containing the 4,001st image will be displayed in all the subsequent pages.

 Note

- Place the cursor over an image to display its title, license type and other information.

(3) Search Criteria/Page Designation Area

Sort by

Select an option for sorting the search results in the Thumbnail window, from **Popularity** and **Date**.

If you have changed the setting after searching, click  (Refresh) to perform the search again.

License Type

Select the license type of images to search for.

You can select from **All types**, **CC license (Non-Commercial)** and **CC license (Others)**.

Select **All types** to display all images regardless of license type.

Select **CC license (Non-Commercial)** to display images that can be used for non-commercial purposes only among CC licensed images, and select **CC license (Others)** to display other images.

If you have changed the setting after searching, click  (Refresh) to perform the search again.

 Note

- License type varies by image. Place the cursor over an image to display a tooltip in which you can check the license type.

License Type	License Type	General Notes (My Image Garden)/Conditions (Comply with the following conditions when using CC licensed images except for personal use or use within the home.)

Video Frame Capture View

- You can capture video frames to create still images. You can also print the captured still images.
- Switch to the **Video Frame Capture** view by one of the following operations.
- Select a video in **Day View** of the **Calendar** view, the **Event** view or folder view, then click **Video Frame Capture** at the bottom of the screen
 - Click **Video Frame Capture** on the left side of the screen when video frame capture is in progress

 **Important**

- If videos do not appear, check the system requirements and file formats. See "[File Formats](#)" for details.
- Video color tones changed via the settings of the graphic driver (video card) or its utility are not reflected in captured still images. Therefore, color tones may differ between videos and captured still images.

- (1) Preview Area
- (2) Captured Images Area
- (3) Operation Buttons
- (4) Display Size Setting Bar
- (5) Still Image Capture Panel

(1) Preview Area

Displays the preview of a video.

(Playback Slider)

Displays the video playback progress. The current playback time appears to the right of the slider. You can drag the slider to move the video forward or backward.

You can set the start and end positions to automatically capture multiple images by moving the  (Start Time of Capture Range) or  (End Time of Capture Range) mark below the slider. Place the cursor over the mark to display the time code.

(2) Captured Images Area

Displays the thumbnails of still images captured from the video. The  (Correction) mark appears on the thumbnails of corrected still images.

(Left Scroll)/(Right Scroll)

Scrolls the Captured Images area left or right to display the hidden thumbnails.

(3) Operation Buttons

Layout Print

You can print multiple still images by placing them in a layout that resembles a film or theater.

Select an image and click this to display the **Select Theme and Main People** dialog in which you can set a theme for the video layout.

➡ **Select Theme and Main People Dialog**

The view switches to **My Art** when selection of the theme is completed.

➡ **My Art View**

Correct

Displays the **Correct** view in which you can correct still images.

➡ **Correct View**

Merge Frames

Displays the **Merge Frames** view in which you can merge multiple still images into one image.

➡ **Merge Frames View**

Sort by Timeline

You can rearrange captured still images in the order of the time code.

Save

Displays the **Save** dialog from which you can save captured still images.

➡ **Save Dialog (Video Frame Capture View)**

Displays the print settings dialog from which you can print captured still images.

➡ **Print Settings Dialog**

(4) Display Size Setting Bar

(Captured Images View)

Switches the view to the thumbnails of images.

(Details View)

Switches the view to preview the image.

(Whole Image View)

While in the details view, fits the preview to the window size.

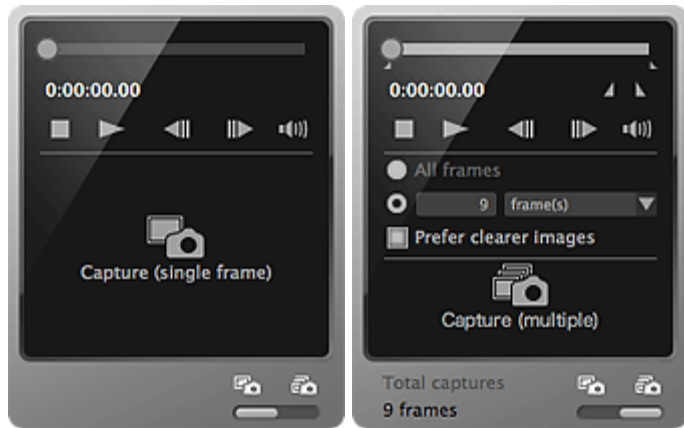

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

(5) Still Image Capture Panel

Capture (single frame) Panel Capture (multiple) Panel

(Playback Slider)

Displays the video playback progress. The current playback time appears below the slider. You can drag the slider to move the video forward or backward.

(Start Time of Capture Range)/(End Time of Capture Range)

You can specify the range from which to automatically capture multiple images. When you click it at the playback position you want to set as the start/end time, the mark (of the button) below the playback slider moves to the clicked position. You can also specify the start/end time by moving this mark. Place the cursor over the mark to display the start/end time.

(Frame Backward)/(Frame Advance)

Reverses/advances a video one frame at a time with each click. If clicked during playback, the video pauses. Click and hold to reverse/advance frames consecutively.

(Playback)/(Pause)

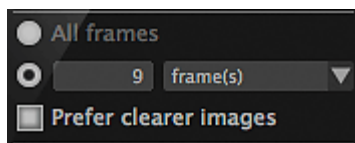

Plays or pauses the video.  (Pause) or  (Playback) appears while a video is playing or stopped, respectively.

(Stop)

Stops the video.

(Mute)/(Unmute)

Switches audio OFF/ON.

(Capture Settings)

You can set the number of still images to be captured. You can select **All frames**, **frame(s)**, **sec. int.** or **frame int.**. When **frame(s)**, **sec. int.** or **frame int.** is selected, you can also enter the number of total frames, second interval or frame interval, respectively. Select the **Prefer clearer images** checkbox to automatically capture less blurry images.

Capture (single frame)

Captures the frame displayed in preview as a still image. Captured still images appear in the Captured Images area. You can also capture from a playing video.

Capture (multiple)

You can capture multiple still images between the start and end time specified as the capture range, according to the capture conditions. Captured still images appear in the Captured Images area. You can also capture from a playing video.

(Switch Single/Multiple Capture)

Switches the view between the **Capture (single frame)** panel and **Capture (multiple)** panel.

Note

- See "[Capturing and Printing Still Images from Videos](#)" for how to capture still images from a video.
-

Page top ▲

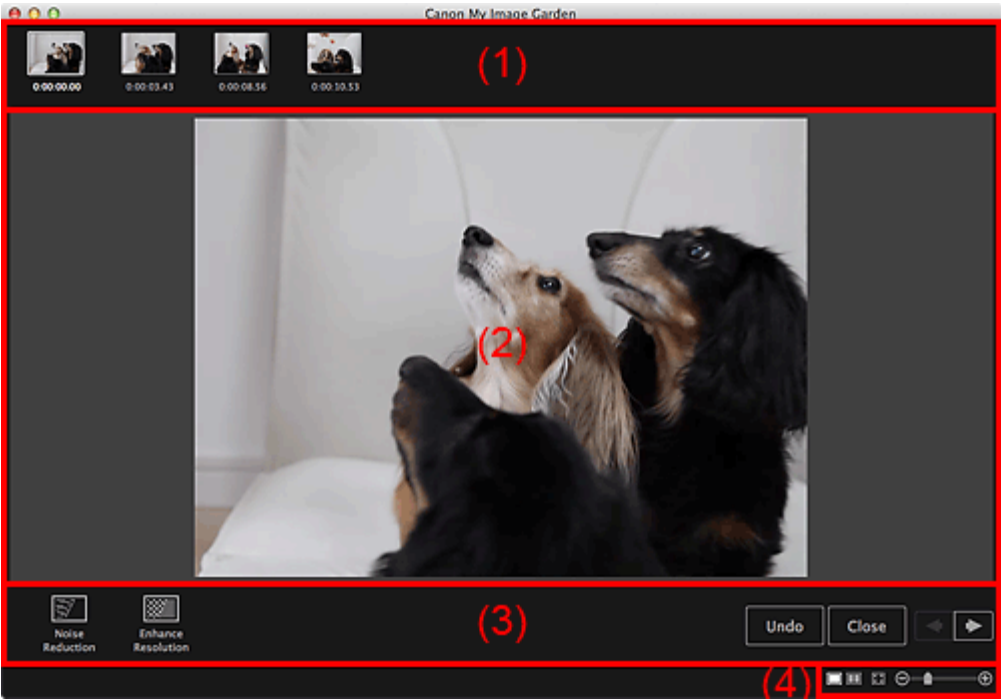

Correct View

You can correct still images captured from a video.

Select the still image(s) you want to correct in the Captured Images area of the **Video Frame Capture** view, then click **Correct** at the bottom of the screen to switch to the **Correct** view.

Note

- When a frame in which the subject or camera has moved significantly is captured, the still image may not be corrected properly.

- (1) Selected Images Area
- (2) Preview Area
- (3) Operation Buttons

(1) Selected Images Area

Displays the thumbnails of the still image(s) selected in the **Video Frame Capture** view.

The  (Correction) mark appears on the thumbnails of corrected still images.

 (Left Scroll)/(Right Scroll)

Scrolls the Selected Images area left or right to display the hidden thumbnails.

(2) Preview Area

Displays the previews of the still images selected in the Selected Images area.

(3) Operation Buttons

Noise Reduction

Reduces noise (tonal variation that may appear in images taken in dark locations such as night scenes using a digital camera).

Enhance Resolution

Reduces jaggies (roughness in images).

Undo

Restores the original uncorrected state.

Close

Switches to the **Video Frame Capture** view.

(Previous Image/Next Image)

Switches the preview display when there are multiple images in the Selected Images area.

(4) Display Size Setting Bar

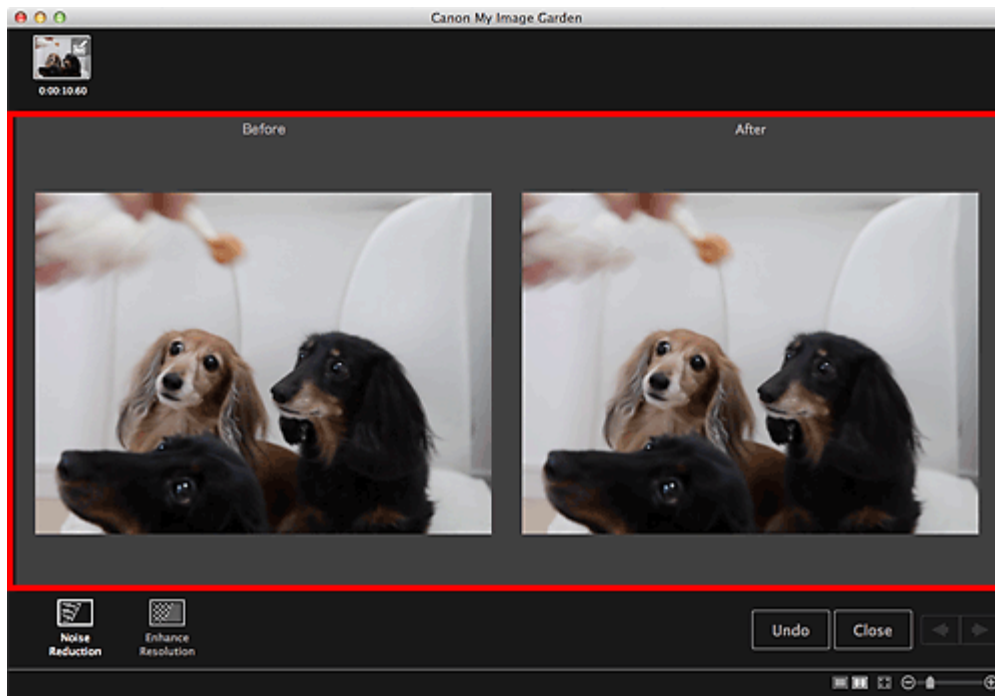

(Display Correction Screen)

Switches to the preview (correction screen).

(Display Comparison Screen)

Displays the images before and after the correction side by side in preview so that you can compare them.

Before

Displays the image before correction.

After

Displays the image after correction.

(Whole Image View)

Fits the preview to the area size.

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

Note

- See "[Correcting Still Images Captured from Videos](#)" for how to correct still images captured from a video.
-

Page top ▲

Merge Frames View

You can merge still images captured from a video in the order of the time code to create an image depicting the flow of a moving subject.

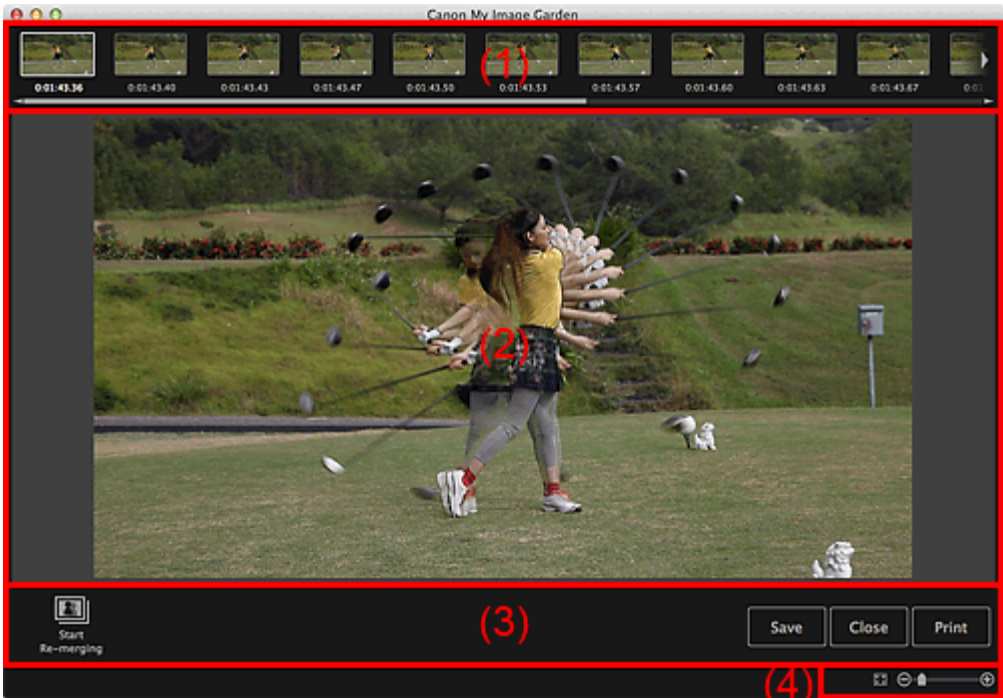

Select the images you want to merge in the **Video Frame Capture** view, then click **Merge Frames** to switch to the **Merge Frames** view.

Important

- You can merge between 5 and 30 still images.
- Still images corrected in the **Correct** view cannot be used. The original uncorrected still images will be used.

Note

- It is recommended that you use still images captured from a video recorded with a steady camera (fixed to a tripod, etc.) without zooming or adjusting focus while recording.
- Some portions of subjects may appear transparent if frames in which moving subjects overlap are selected.
- Frames may not merge properly in the following cases.
 - When using a video recorded in a place where the background is moving
 - When frames in which moving subjects/shadows overlap are selected
 - When using a video recorded in a place where moving subjects and the background have similar colors and shapes
 - When using a video in which the brightness or lighting changed while recording
 - When using a video recorded using special functions such as miniature effect

(2) Preview Area

Displays the preview of the merged image.

(3) Operation Buttons

Start Re-merging

Re-merges using the images re-selected in the Selected Images area.

Save

Displays the **Save** dialog from which you can save the created image of merged frames.

➡ [Save Dialog \(Video Frame Capture View\)](#)

Close

Switches to the **Video Frame Capture** view.

Print

Displays the print settings dialog from which you can print the created image of merged frames.

➡ [Print Settings Dialog](#)

(4) Display Size Setting Bar

(Whole Image View)

Fits the preview to the area size.

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

Note

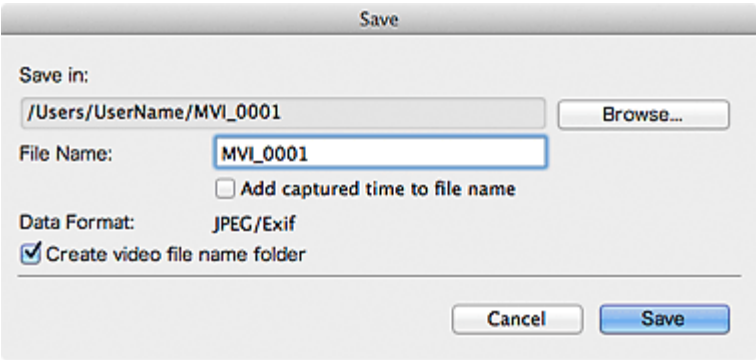

- See "[Creating Images of Merged Video Frames](#)" for how to merge still images.

Save Dialog (Video Frame Capture View)

You can make advanced settings for saving still images captured from a video or images of merged frames to a computer.

Display the **Save** dialog by one of the following operations.

- Select the still image(s) you want to save in the **Video Frame Capture** view, then click **Save**
- Click **Save** in the **Merge Frames** view

Save in

You can set the folder in which to save the images. To change the folder, click **Browse...**, then specify the destination folder.

The default save folder is the one in which the video from which the still image(s) was (were) captured is saved.

File Name

You can enter the file name of the image to be saved. When saving multiple files at the same time, 4 digits are automatically appended to each file name.

Add captured time to file name

Select this checkbox to append the captured time (8 digits) to the name of the file to be saved.

Note

- **Add captured time to file name** appears only when saving still images captured in the **Video Frame Capture** view.

Data Format

The save format is **JPEG/Exif**.

Create video file name folder

Select this checkbox to create a folder with the video file name in the folder specified in **Save in** and save still images in it.

If this checkbox is not selected, images are saved directly in the folder specified in **Save in**.

PDF Settings Dialog

You can make advanced settings such as the PDF compression type to the PDF file to be saved.

Select PDF for **Data Format** in the **Save** dialog of the **Scan** view, then click **Settings...** to display the **PDF Settings** dialog.

Enable keyword search

Select this checkbox to convert text in images into text data and create PDF files that support keyword search.

Document Language

Select the language for detecting text in images.

Detect the orientation of text documents and rotate images

Select this checkbox to detect the page orientation based on the text in images and automatically rotate the images for creating PDF files.

Important

- This function is available only for images (text documents) containing languages that can be selected from **Document Language**. This function is not available depending on the language in the image.
- The page orientation may not be detected for the following types of images since the text cannot be detected correctly.
 - Images with small amount of text
 - Images containing text with font size outside the range of 8 points to 48 points
 - Images containing special fonts, effects, italics, or hand-written text
 - Images with patterned backgrounds

Correct slanted text document

Select this checkbox to detect the document orientation based on the text in images and correct the angle (within the range of -0.1 to -10 degrees or +0.1 to +10 degrees) for creating PDF files.

Important

- The following types of images may not be corrected properly since the text cannot be detected correctly.
 - Images in which the text lines are inclined more than 10 degrees or the angles vary by line
 - Images containing both vertical and horizontal text
 - Images with extremely large or small fonts

- Images with small amount of text
- Images containing figures/images
- Hand-written image

PDF Compression

Select a compression type for saving.

Standard

It is recommended that you normally select this setting.

High

Compresses the file size when saving. You can reduce the load on your network/server.

Important

- PDF images may degrade if you repeatedly save them with high compression.

Page top 

Correct/Enhance Images Window

You can correct or enhance images.

Display the **Correct/Enhance Images** window by one of the following operations.

- Select the image(s) in use in the Edit area of the **My Art** view, then click **Correct/Enhance** at the bottom of the screen
- Select an image or images in **Day View** of the **Calendar** view, the **Event** view, the expanded display of the **People** view, the **Unregistered People** view or folder view, then click **Correct/Enhance** at the bottom of the screen

(1) Image Adjustment/Correction/Enhancement Area

(2) Preview Operation Buttons

(3) Preview Area

(4) Selected Images Area

(5) Operation Buttons

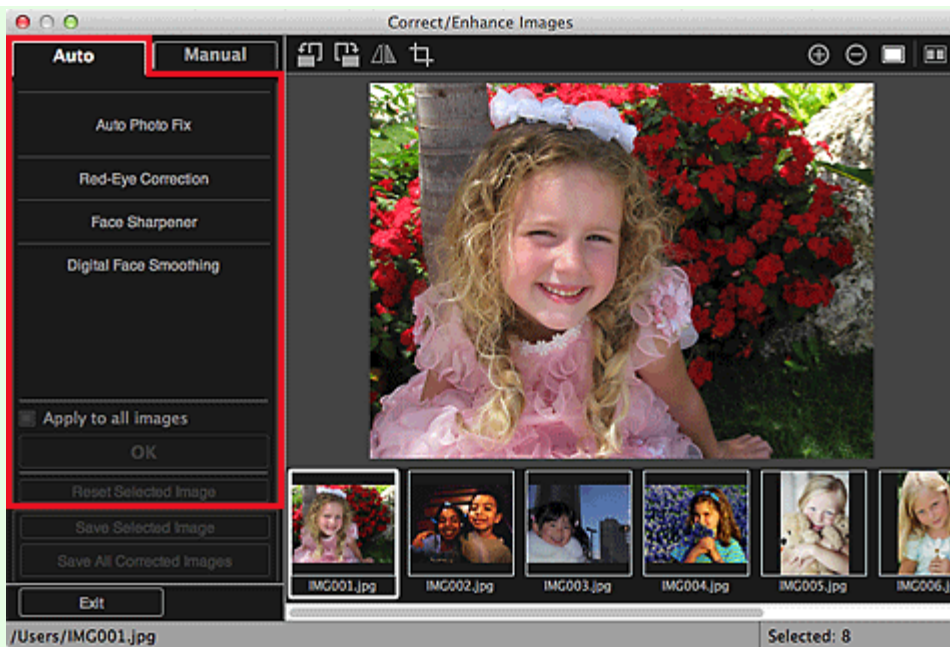

(1) Image Adjustment/Correction/Enhancement Area

Available settings and procedures vary between the **Auto** tab and **Manual** tab.

Click the **Auto** tab or **Manual** tab to switch between tabs.

Auto Tab

You can correct or enhance the entire image in the **Auto** tab.

Auto Photo Fix

Applies corrections suitable for photos automatically.

Note

- You can automatically correct photos when printing. See "[Print Settings Dialog](#)" for the setting procedure.

Prioritize Exif info

Select this checkbox to apply corrections primarily based on the settings made at the time of shooting.

Deselect this checkbox to apply corrections based on the image analysis results. It is recommended that you normally select this setting.

Note

- Exif is a standard format for embedding various shooting data in digital camera images (JPEG).
- You can automatically apply suitable corrections based on Exif information when printing. See "[Print Settings Dialog](#)" for the setting procedure.

Red-Eye Correction

Corrects red eyes.

Note

- You can automatically correct red eyes when printing. See "[Print Settings Dialog](#)" for the setting procedure.

Face Sharpener

Sharpens out-of-focus faces in a photo.

You can adjust the correction level using the slider.

Digital Face Smoothing

Enhances skin beautifully by reducing blemishes and wrinkles.

You can adjust the enhancement level using the slider.

Apply to all images

Select this checkbox to correct or enhance all images in the Selected Images area automatically.

OK

Applies the specified correction/enhancement to the image(s).

Reset Selected Image

Restores the corrected, adjusted or enhanced image to the original uncorrected, unenhanced or unadjusted state.

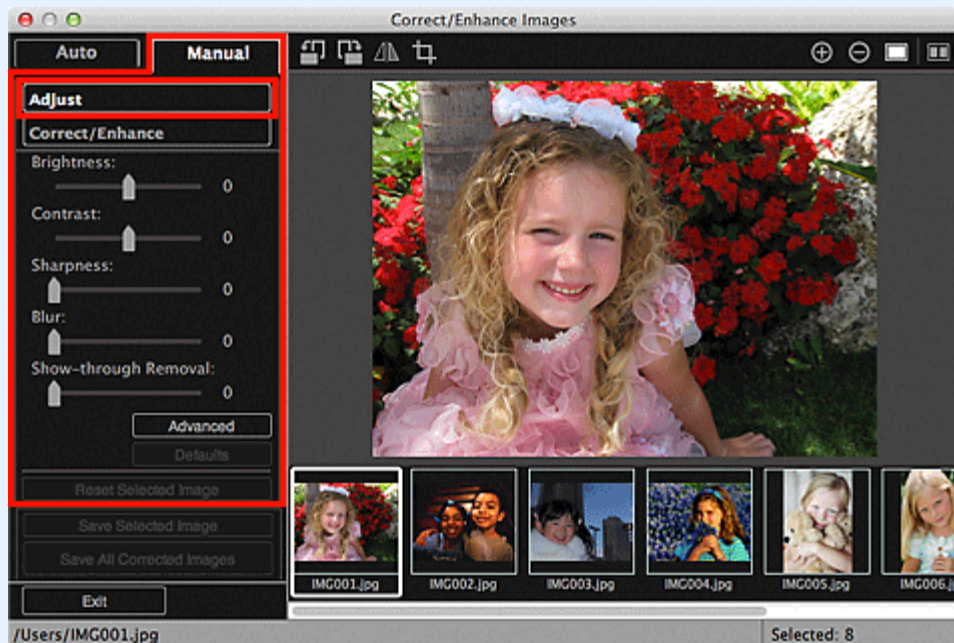

Manual Tab

There are two menus on the **Manual** tab: **Adjust** and **Correct/Enhance**.

Use **Adjust** to adjust brightness and contrast, or to sharpen the entire image.

Use **Correct/Enhance** to correct/enhance specific areas.

Adjust

Brightness

Adjusts the overall image brightness.

Move the slider to the left to darken and right to brighten the image.

Contrast

Adjusts the contrast of the image. Adjust the contrast when the image is flat due to lack of contrast.

Move the slider to the left to decrease and right to increase the contrast of the image.

Sharpness

Emphasizes the outline of the subjects to sharpen the image. Adjust the sharpness when the photo is out of focus or text is blurred.

Move the slider to the right to sharpen the image.

Blur

Blurs the outline of the subjects to soften the image.

Move the slider to the right to soften the image.

Show-through Removal

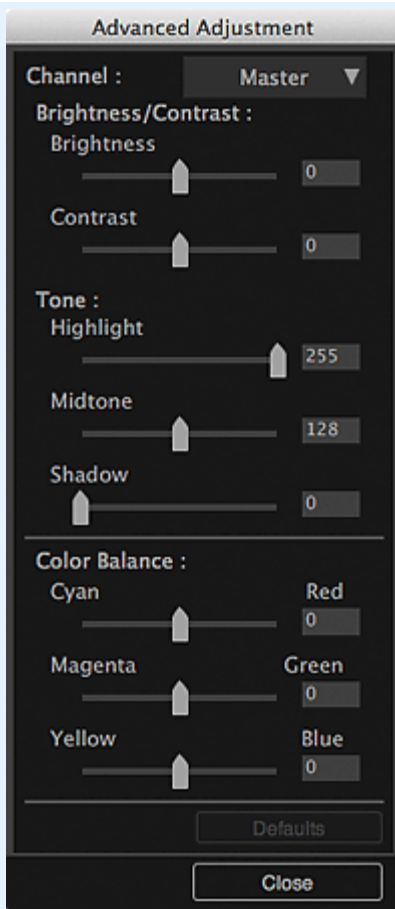

Removes show-through of text from the reverse side or removes the base color. Adjust the show-through level to prevent text on the reverse side of thin document or the base color of the document from appearing on the image.

Move the slider to the right to increase the show-through removal effect.

Advanced

Displays the **Advanced Adjustment** dialog in which you can make fine adjustments to the image brightness and color tone.

For **Brightness/Contrast** and **Tone**, select a color in **Channel** to adjust either **Red**, **Green**, or **Blue**, or select **Master** to adjust three colors together.

Brightness/Contrast

Adjusts the brightness and contrast of the image.

Move the **Brightness** slider to the left to darken and right to brighten the image.

Move the **Contrast** slider to the left to decrease and right to increase the contrast of the image.

Tone

Adjusts the brightness balance by specifying **Highlight** (the brightest level), **Shadow** (the darkest level) and **Midtone** (the color in the middle of **Highlight** and **Shadow**).

Move the **Highlight** slider to the left to brighten the image.

Move the **Midtone** slider to the left to brighten and right to darken the image.

Move the **Shadow** slider to the right to darken the image.

Color Balance

Adjusts the vividness and color tone of the image.

Move the **Color Balance** slider to the left or right to emphasize the corresponding color.

Defaults

Resets all adjustments.

Close

Closes the **Advanced Adjustment** dialog.

Note

- The **Brightness** and **Contrast** values set in **Adjust** do not change even if the brightness and color tone are adjusted in the **Advanced Adjustment** dialog.

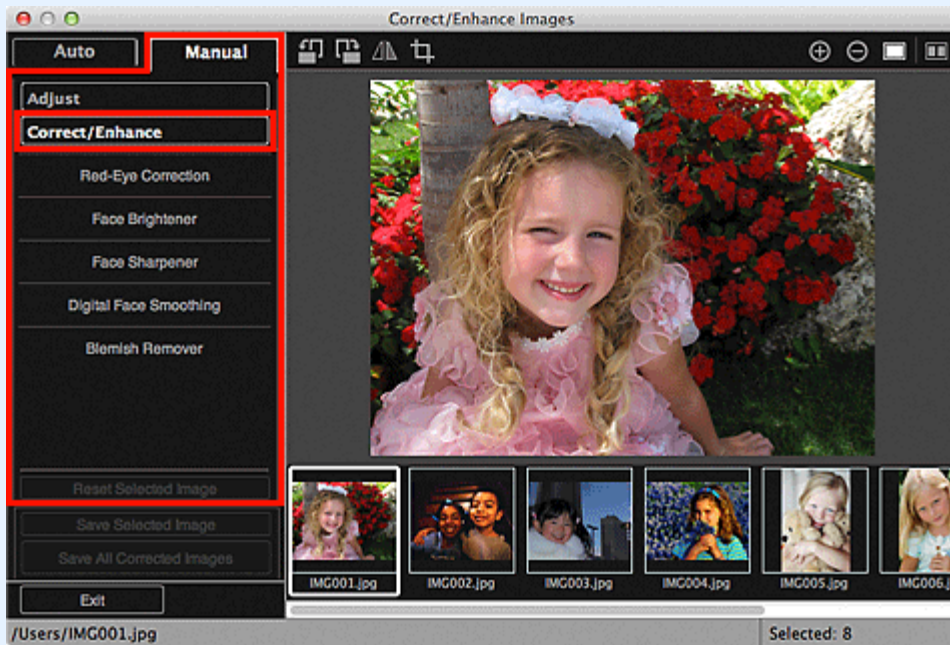

Defaults

Resets each adjustment (brightness, contrast, sharpness, blur, and show-through removal).

Reset Selected Image

Restores the corrected, adjusted or enhanced image to the original uncorrected, unenhanced or unadjusted state.

Correct/Enhance

Red-Eye Correction

Corrects red eyes in the selected area.
You can adjust the correction level using the slider.

Face Brightener

Corrects the entire image to brighten the face area in and around the selected area.
You can adjust the correction level using the slider.

Face Sharpener

Corrects the entire image to sharpen the face area in and around the selected area.
You can adjust the correction level using the slider.

Digital Face Smoothing

Enhances skin beautifully by reducing blemishes and wrinkles in the selected area.
You can adjust the enhancement level using the slider.

Blemish Remover

Reduces moles in the selected area.

OK

Applies the selected correction/enhancement to the specified area.

Undo

Cancels the last applied correction/enhancement.

Reset Selected Image

Restores the corrected, adjusted or enhanced image to the original uncorrected, unenhanced or unadjusted state.

(2) Preview Operation Buttons

Note

- When the **Correct/Enhance Images** window is displayed from the **My Art** view,  (Rotate Left 90°),  (Rotate Right 90°),  (Invert Horizontally) and  (Crop) do not appear.

(Rotate Left 90°)/(Rotate Right 90°)

Rotates the image 90 degrees counter-clockwise or clockwise with each click.

 **(Invert Horizontally)**

Inverts the image horizontally.

 **(Crop)**

Displays the **Crop** window in which you can crop the image.

➡ **Crop Window**

 **(Enlarge)/(Reduce)**

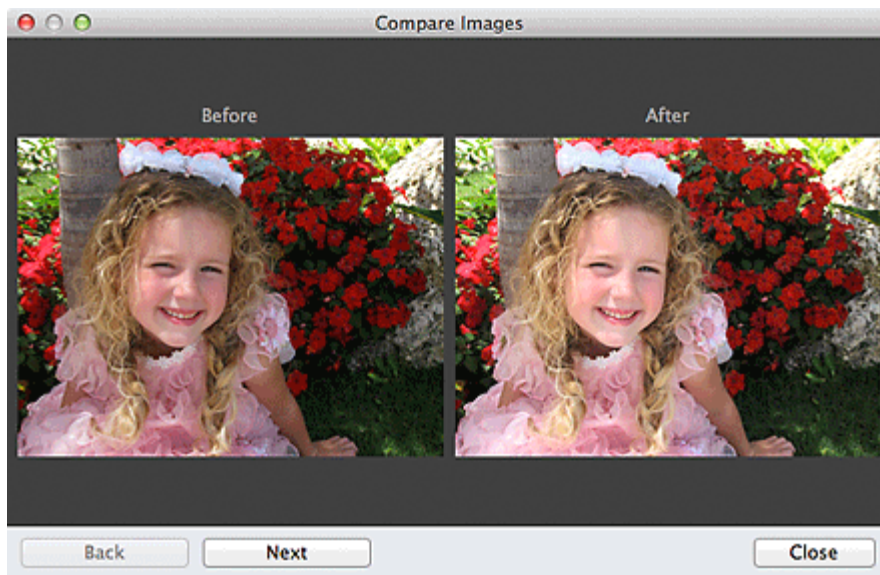

Enlarges or reduces the preview with each click.

 **(Whole Image View)**

Fits the preview to the area size.

 **(Display Comparison Screen)**

Displays the **Compare Images** window in which you can compare the images before and after the correction, enhancement or adjustment.

Before

The image before correction, enhancement or adjustment appears.

After

The image after correction, enhancement or adjustment appears.

Back/Next

Switches to the previous/next image.

Not available when one image is selected.

Close

Closes the **Compare Images** window.

(3) Preview Area

Displays the preview of the image being corrected or enhanced.

The  (Correction/Enhancement) mark appears on corrected or enhanced images.

(4) Selected Images Area

Displays the thumbnails of the images when multiple images were selected upon displaying the **Correct/Enhance Images** window.

This area does not appear when one image was selected upon displaying the **Correct/Enhance Images**

window.

The  (Correction/Enhancement) mark appears on corrected or enhanced images.

Note

- This area does not appear when multiple images were selected in the **My Art** view upon displaying the **Correct/Enhance Images** window; only the preview of the last selected image appears.
-

(5) Operation Buttons

Save Selected Image

Displays the **Save** dialog from which you can save the corrected, enhanced or adjusted image displayed in the Preview area.

➡ [Save Dialog \(Correct/Enhance Images or Special Image Filters Window\)](#)

Save All Corrected Images

Displays the **Save** dialog from which you can save all corrected, enhanced or adjusted images in the Selected Images area.

➡ [Save Dialog \(Correct/Enhance Images or Special Image Filters Window\)](#)

Exit

Closes the **Correct/Enhance Images** window.

Special Image Filters Window

You can enhance images using special filters.

Display the **Special Image Filters** window by one of the following operations.

- Select the image(s) in use in the Edit area of the **My Art** view, then click **Special Filters** at the bottom of the screen
- Select an image or images in **Day View** of the **Calendar** view, the **Event** view, the expanded display of the **People** view, the **Unregistered People** view or folder view, then click **Special Filters** at the bottom of the screen

- (1) Image Effects Area
- (2) Preview Operation Buttons
- (3) Preview Area
- (4) Selected Images Area
- (5) Operation Buttons

(1) Image Effects Area

Note

- **OK** and **Cancel** appear only when **Fish-eye Effect**, **Miniature Effect** or **Blur Background** is selected.

Fish-eye Effect

You can enhance an image to resemble a photo taken with a fish-eye lens, focusing on the selected point.

You can adjust the enhancement level using the slider.

Miniature Effect

You can enhance an image to resemble a photo of a miniature model (diorama).
You can adjust the size of the white frame (area that will not be blurred) using the slider.

Toy Camera Effect

You can enhance an image to resemble a retro photo taken with a toy camera.
The enhancement is applied as you move the slider to adjust the effect level.

Soft Focus

You can enhance an entire image to soften the focus.
The enhancement is applied as you move the slider to adjust the effect level.

Blur Background

You can blur the area outside the selection.
You can adjust the enhancement level using the slider.

OK

Applies the specified enhancement to the selected image.

Cancel

Cancels the last applied enhancement.

Reset Selected Image

Restores the enhanced image to the original unenhanced state.

(2) Preview Operation Buttons

Note

-  (Detect the Outline and Select the Area) and  (Cancel the Selected Area) appear only when **Blur Background** is selected.

(Detect the Outline and Select the Area)

You can specify the area that will not be blurred. The outline is automatically detected.

(Cancel the Selected Area)

Deletes the selected area.

(Help)

Opens this guide.

(Enlarge)/(Reduce)

Enlarges or reduces the preview with each click.

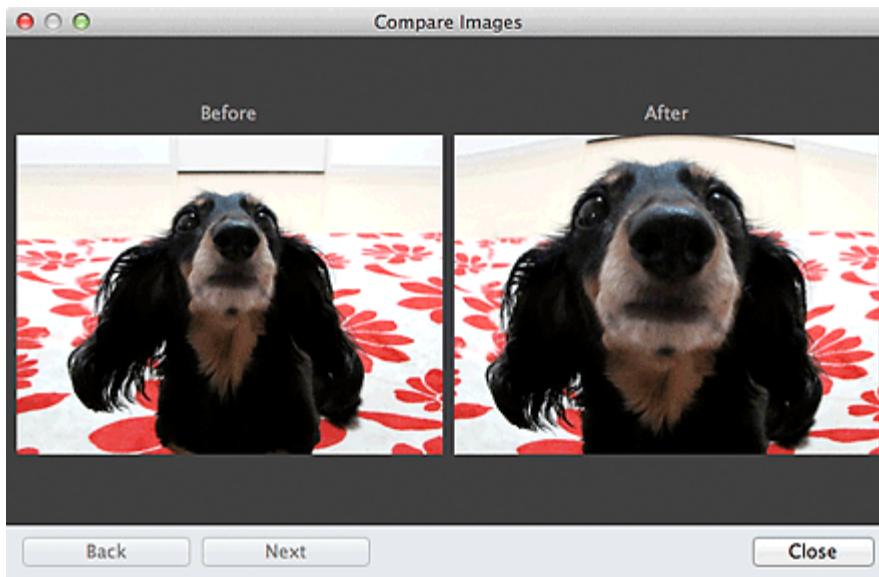

(Whole Image View)

Fits the preview to the area size.

(Display Comparison Screen)

Displays the **Compare Images** window in which you can compare the images before and after the enhancement.

Before

The image before enhancement appears.

After

The image after enhancement appears.

Back/Next

Switches to the previous/next image.

Not available when one image is selected.

Close

Closes the **Compare Images** window.

(3) Preview Area

Displays the preview of the image being enhanced.

The  (Enhancement) mark appears on enhanced images.

(4) Selected Images Area

Displays the thumbnails of the images when multiple images were selected upon displaying the **Special Image Filters** window.

This area does not appear when one image was selected upon displaying the **Special Filters** window.

The  (Enhancement) mark appears on enhanced images.

Note

- This area does not appear when multiple images were selected in the **My Art** view upon displaying the **Special Image Filters** window; only the preview of the last selected image appears.

(5) Operation Buttons

Save Selected Image

Displays the **Save** dialog from which you can save the enhanced image displayed in the Preview area.

➡ **Save Dialog (Correct/Enhance Images or Special Image Filters Window)**

Save All Filtered Images

Displays the **Save** dialog from which you can save all enhanced images in the Selected Images area.

➡ **Save Dialog (Correct/Enhance Images or Special Image Filters Window)**

Exit

Closes the **Special Image Filters** window.

Save Dialog (Correct/Enhance Images or Special Image Filters Window)

You can make advanced settings for saving corrected, enhanced or adjusted images to a computer.

Display the **Save** dialog by one of the following operations.

- Click **Save Selected Image** or **Save All Corrected Images** in the **Correct/Enhance Images** window
- Click **Save Selected Image** or **Save All Filtered Images** in the **Special Image Filters** window

Save in

You can set the folder in which to save the images. To change the folder, click **Browse...**, then specify the destination folder.

Note

- This is disabled when the **Save to original folder** checkbox is selected.

File Name

You can enter the file name of the image to be saved. You cannot enter the file name when saving multiple files at the same time. "_NEW" is automatically appended to the original file names.

Save as type

Displays the file type in which to save the corrected, enhanced or adjusted image(s). You can save in **JPEG/Exif** only.

Save to a subfolder with current date

Select this checkbox to create a current date folder in the folder specified in **Save in** and save corrected, enhanced or adjusted images in it. The current date folder will be created with a name such as "20XX_01_01" (Year_Month_Date).

Save to original folder

Select this checkbox to save the corrected, enhanced or adjusted images to the folders in which the original uncorrected, unenhanced or unadjusted images are saved.

Note

- **Save to original folder** appears only when **Save All Corrected Images** or **Save All Filtered Images** was clicked.

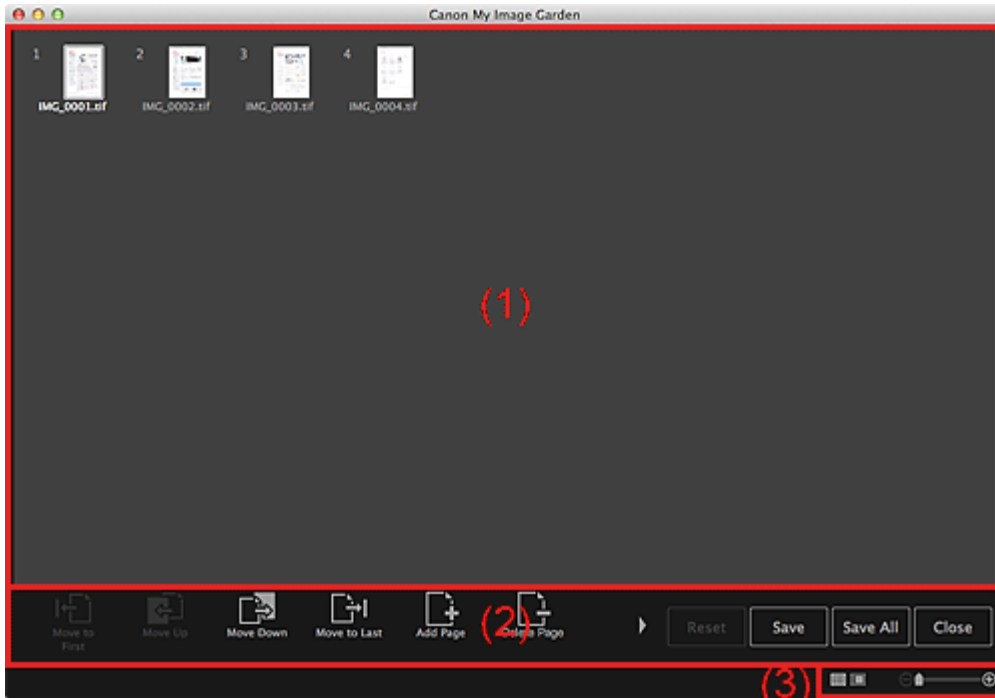

A305

My Image Garden

Create/Edit PDF File View

You can create PDF files from images saved on a computer. You can also add pages to or delete pages from the created PDF files and rearrange pages.

Select an image (or images) or a PDF file (or PDF files) in **Day View** of the **Calendar** view, the **Event** view or folder view, then click **Create/Edit PDF File** at the bottom of the screen to switch to the **Create/Edit PDF File** view.

(1) Thumbnails Area

(2) Operation Buttons

(3) Display Size Setting Bar

(1) Thumbnails Area

Displays the thumbnails of images as pages that compose a PDF file.

You can change the page order via drag-and-drop.

Double-click a page to switch the view to preview the image.

(a) Pages Area

Displays the thumbnails of images as pages that compose a PDF file.
You can change the page order via drag-and-drop.

▲ ▼ (Up Scroll)/(Down Scroll)
Scrolls up/down the Pages area.

(b) Preview Area

Displays the preview of an image.

(c) Page Operations Toolbar

▲ ▼ (Previous Page)/(Next Page)
Switches the displayed page.

▲ ▼ (First Page)/(Last Page)
Displays the first page or last page.

(2) Operation Buttons

Move to First

Moves the selected pages to the top.

Move Up

Moves the selected pages up one page.

Move Down

Moves the selected pages down one page.

Move to Last

Moves the selected pages to the end.

Add Page

Displays the **Open** dialog; select the image or PDF file you want to add, then click **Open** to add a page to the end.

Delete Page

Deletes the selected page(s).

Rotate

Rotates the image 90 degrees clockwise with each click.

Undo

Undoes the last operation.

Each click restores the previous state.

Reset

Undoes all operations performed in the **Create/Edit PDF File** view.

Click to restore the initial state.

Save

Displays the **Save** dialog from which you can save each of the page displayed in the Preview area as a separate PDF file.

➡ [Save Dialog \(Create/Edit PDF File View\)](#)

Save All

Displays the **Save** dialog from which you can save all the pages in one PDF file in the page order in the Thumbnails area or Pages area.

➡ [Save Dialog \(Create/Edit PDF File View\)](#)

Close

Switches to the view before the **Create/Edit PDF File** view was displayed.

(3) Display Size Setting Bar

Note

-  (Whole Image View) appears only in preview.

(Thumbnail View)

Switches the view to the thumbnails of pages.

(Preview)

Switches the view to preview pages.

(Whole Image View)

While in preview, fits the preview to the area size.

(Reduce/Enlarge)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

My Image Garden

Save Dialog (Create/Edit PDF File View)

You can make advanced settings for saving created or edited PDF files to a computer.

Click **Save** or **Save All** at the bottom right of the **Create/Edit PDF File** view to display the **Save** dialog.

Save in

You can set the folder in which to save the PDF files. To change the folder, click **Browse...**, then specify the destination folder.

File Name

You can enter the file name of the image to be saved. When saving each of the images as a separate file, a sequential number is appended to the names of the second and subsequent files.

Data Format

You can select the data format in which to save the PDF files.

PDF

You can save each page as a separate PDF file.

A separate PDF file is also created for each page when multiple pages are selected or when **Save All** is clicked.

PDF (Multiple Pages)

You can save multiple pages in one PDF file.

Note

- **PDF (Multiple Pages)** appears when multiple images are selected.

Settings...

The **File Settings** dialog appears and you can make advanced settings for creating PDF files. See "[File Settings Dialog](#)" for the setting procedure.

Save to a subfolder with current date

Select this checkbox to create a current date folder in the folder specified in **Save in** and save scanned images in it. The folder will be created with a name such as "20XX_01_01" (Year_Month_Date).

If this checkbox is not selected, files are saved directly in the folder specified in **Save in**.

File Settings Dialog

You can make advanced settings such as the PDF compression type to the PDF file to be saved.

Click **Settings...** in the **Create/Edit PDF File** view of the **Save** dialog to display the **File Settings** dialog.

Enable keyword search

Select this checkbox to convert text in images into text data and create PDF files that support keyword search.

Document Language

Select the language for detecting text in images.

Detect the orientation of text documents and rotate images

Select this checkbox to detect the page orientation based on the text in images and automatically rotate the images for creating PDF files.

Important

- This function is available only for images (text documents) containing languages that can be selected from **Document Language**. This function is not available depending on the language in the image.
- The page orientation may not be detected for the following types of images since the text cannot be detected correctly.
 - Images with small amount of text
 - Images containing text with font size outside the range of 8 points to 48 points
 - Images containing special fonts, effects, italics, or hand-written text
 - Images with patterned backgrounds

Correct slanted text document

Select this checkbox to detect the document orientation based on the text in images and correct the angle (within the range of -0.1 to -10 degrees or +0.1 to +10 degrees) for creating PDF files.

Important

- The following types of images may not be corrected properly since the text cannot be detected correctly.
 - Images in which the text lines are inclined more than 10 degrees or the angles vary by line
 - Images containing both vertical and horizontal text
 - Images with extremely large or small fonts
 - Images with small amount of text

- Images containing figures/images
- Hand-written image

PDF Compression

Select a compression type for saving.

Standard

It is recommended that you normally select this setting.

High

Compresses the file size when saving. You can reduce the load on your network/server.

Important

- PDF images may degrade if you repeatedly save them with high compression.

Print Settings Dialog

You can specify the print settings and start printing.

Click **Print** at the bottom right of each view to display the print settings window.

Note

- The displayed items vary by the data to be printed.

- (1) Print Preview Area
- (2) Advanced Print Settings Area

(1) Print Preview Area

You can check the print preview or set the number of copies to be printed.

You can print borderless photos.

Note

- You can specify the amount of extension in **Borderless Printing Settings** of the advanced print settings area.

You can print bordered photos.

Specify the number of copies for each photo

Select this checkbox to set the number of copies to be printed image by image when printing multiple images at the same time.

 **(First Page)/(Last Page)**

Displays the first page or last page in print preview.

 **(Previous Page)/(Next Page)**

Switches pages in print preview.

 **(Reduce 1 Copy)/(Increase 1 Copy)**

You can set the number of copies to be printed. Set 1 to 99 as the number of copies.

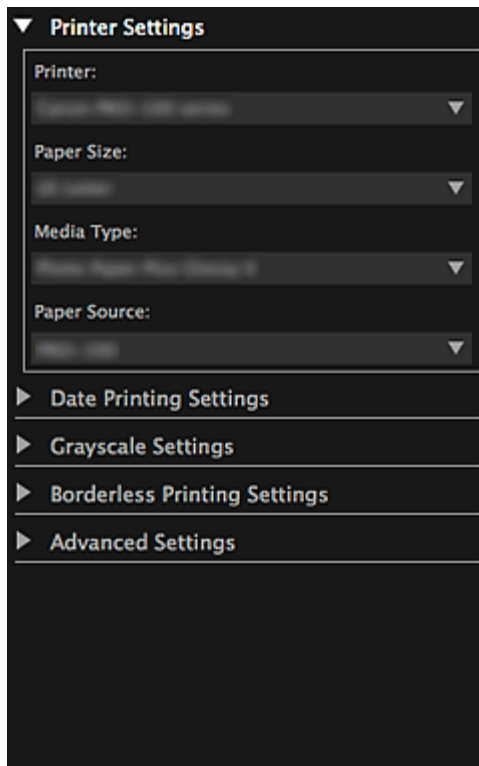

(2) Advanced Print Settings Area

You can set the printer to be used or printing method. Click  (Right Arrow) for each item to display advanced setting items.

Note

- The displayed items vary by data and item to be printed.
-

Printer Settings

The screenshot shows a dark-themed settings menu. At the top is a section titled 'Printer Settings' with a downward arrow. Below this are four dropdown menus: 'Printer:', 'Paper Size:', 'Media Type:', and 'Paper Source:'. Each dropdown has a right-pointing arrow. Below these are four expandable sections, each with a right-pointing arrow: 'Date Printing Settings', 'Grayscale Settings', 'Borderless Printing Settings', and 'Advanced Settings'.

Printer

You can select the printer to be used.

Note

- Only Canon printers appear.
-

Paper Size

You can select the size of the paper to be used.

Note

- When printing from the **My Art** view, the paper size suitable for your item appears

automatically. The size cannot be changed.

- See "[Paper Size List](#)" for sizes of paper.

Media Type

Select the type of paper to be used.

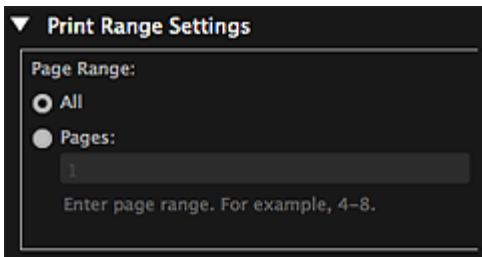

Paper Source

You can select how to feed paper.

Note

- Available paper sizes, media types, paper sources vary depending on the printer to be used.

Print Range Settings

Page Range

You can specify the page range for printing.

All

You can print all pages.

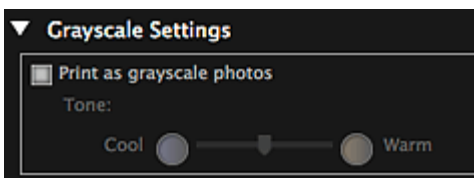

Pages

You can print only the specified page by entering the page number of the page you want to print. To specify multiple pages, enter a hyphen between the page numbers; the pages in the specified range will be printed.

Note

- **Print Range Settings** appears only when printing the items in **My Art** or PDF files.

Grayscale Settings

Print as grayscale photos

Select this checkbox to print images in grayscale.

Tone

You can adjust the color tone using the slider. Move the slider to the right for warm color tones (warm black) and left for cool color tones (cool black).

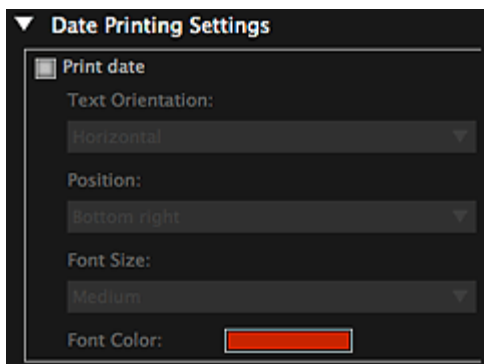

Important

- **Cool** and **Warm** may not be available depending on the selected **Media Type**.

Note

- This appears only when a printer that supports grayscale printing is selected in **Printer Settings**.

Date Printing Settings

Print date

Select this checkbox to add dates to the images before printing.

Text Orientation

You can select the orientation of the date.

Position

You can select the position to print the date.

The print position of the date does not change even if images are rotated.

Font Size

You can select the size of the date.

Font Color

You can set the color of the date.

(Color Setting)

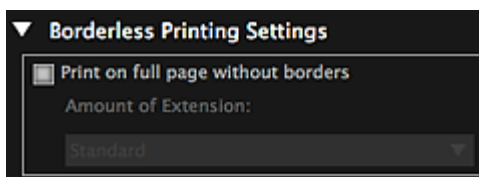

The **Colors** dialog appears. Select a color.

Note

- The date is the image shooting date recorded as Exif data. If there is no Exif data, the date and time of last update to the image file will be printed.

Borderless Printing Settings

Print on full page without borders

Select this checkbox to print the image on an entire sheet of paper without borders.

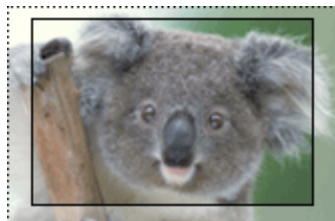

Note

- You can also set in **Borderless** of the print preview area.

Amount of Extension

Select the amount of extension from **None**, **Small**, **Medium**, **Large** and **Standard**.

Large

Medium

Small

The solid lines represent the paper size, and the translucent areas represent the amount of

extension.

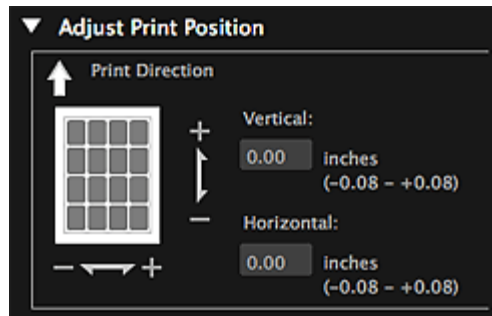

Important

- When **Amount of Extension** is set to **Large**, the back of paper may become stained.
- When **Amount of Extension** is set to **Small** or **None**, margins may appear depending on the size of the paper.

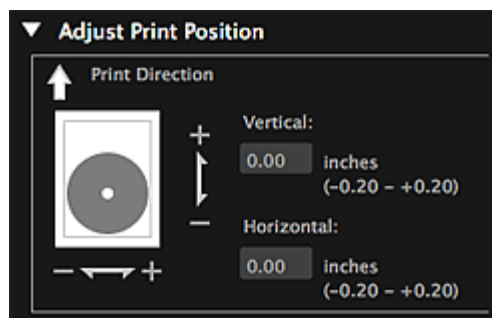

Adjust Print Position

If the image on the printed sticker or disc label is out of position, you can adjust the print position. You can adjust the print position in 0.01 inch or 0.1 mm increments within the following ranges.

Stickers: -0.08 inch (-2.0 mm) to +0.08 inch (+2.0 mm)

Disc Label: -0.2 inch (-5.0 mm) to +0.2 inch (+5.0 mm)

Vertical

You can adjust the print position in the vertical direction.

Set a positive value to move upward or set a negative value to move downward.

Horizontal

You can adjust the print position in the horizontal direction.

Set a positive value to move left or set a negative value to move right.

Advanced Settings

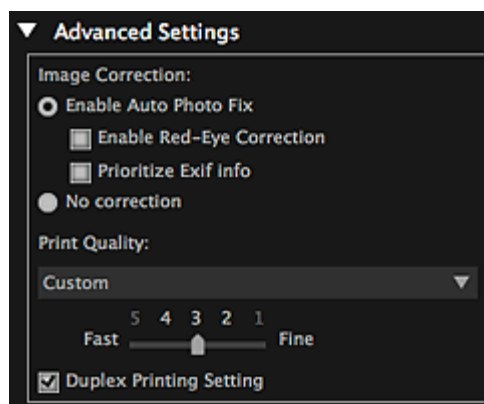

Image Correction

Select **Enable Auto Photo Fix** to apply corrections automatically; select **No correction** if you do not want to do so. Select **Enable Auto Photo Fix** to set the following.

Enable Red-Eye Correction

Select this checkbox to correct red eyes caused by a camera flash.

Prioritize Exif info

Select this checkbox to apply corrections primarily based on the settings made at the time of shooting.

Important

- The color tone may change when you print a document image with **Enable Auto Photo Fix** selected. In that case, select **No correction**.

Print Quality

You can select the print quality suitable for the data to be printed.

You can select **High**, **Standard**, **Fast** or **Custom**. Select **Custom** to display a slider with which you can set the print quality in five levels. Move the slider to the right to improve the quality and left to increase the print speed.

Duplex Printing Setting

This appears when you select a printer and media type that support duplex printing. Select this checkbox to print on both sides of the paper.

Print

Starts printing with the specified settings.

A3 (Art Paper Margin 30)	11.69 x 16.54 inches (29.7 x 42.0 cm)
A3+ (Art Paper Margin 30)	12.95 x 19.02 inches (32.9 x 48.3 cm)

Preferences Dialog

You can specify the environment of My Image Garden, image analysis function settings, folders in which to save files, applications to use, etc.

Select **Preferences...** in the **My Image Garden** menu of My Image Garden to display the **Preferences** dialog.

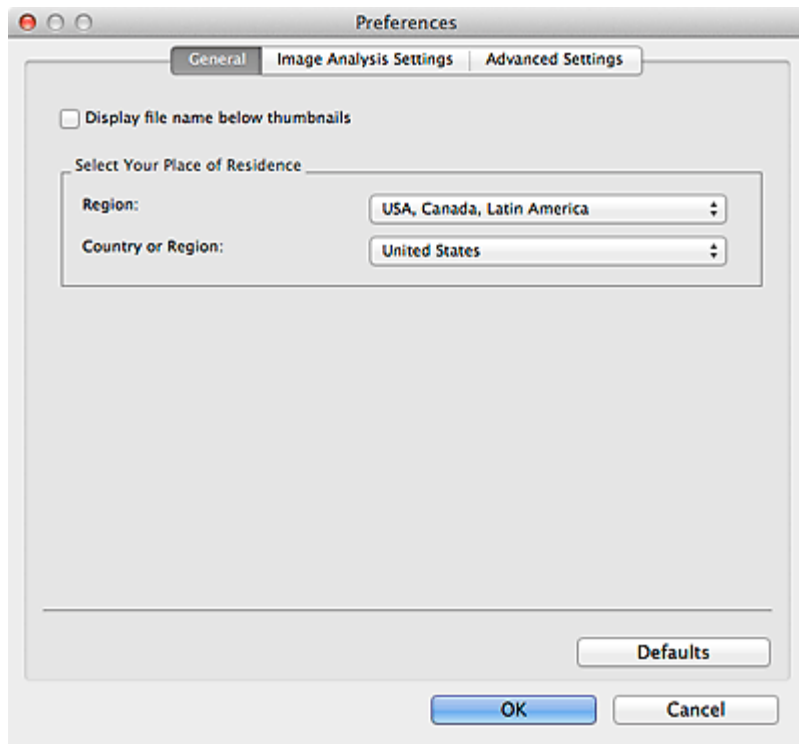

➡ **General Tab**

➡ **Image Analysis Settings Tab**

➡ **Advanced Settings Tab**

General Tab

You can specify settings regarding the view and region.

Display file name below thumbnails

Select this checkbox to display the file names below the thumbnails in the thumbnail view of **Day View** in the **Calendar** view, the **Event** view or folder view.

Select Your Place of Residence

Region

You can select your region.

Country or Region

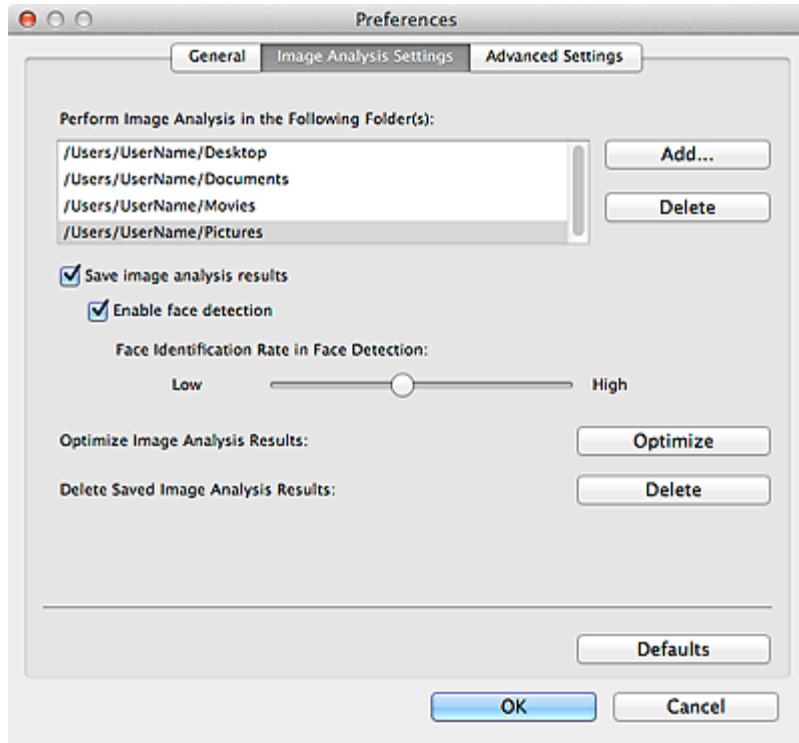

You can select your country or region. Items that can be selected vary by the **Region** setting.

Defaults

Restores all items to the default settings.

Image Analysis Settings Tab

You can set the folders to be subject to image analysis, face detection rate for image analysis, etc.

Perform Image Analysis in the Following Folder(s)

Displays the folders to be subject to image analysis. Only the images in the folders registered here appear in the **Calendar** view, **Unregistered People** view or **People** view, and are used in recommended items displayed in Image Display.

To add a folder as the target of image analysis, click **Add...** and specify the folder. To remove a folder from the targets of image analysis, select the folder and click **Delete**.

Important

- When a folder is removed from the targets of image analysis, the favorite levels set to or information of people/events registered to the images saved in the folder may be lost.

Note

- Image analysis is performed upon starting My Image Garden when the **Save image analysis results** and **Enable face detection** checkboxes are selected and there is an image with no information of person registered in the folder to be subject to image analysis.
- Images for which image analysis has been completed can be automatically placed at suitable positions in your items. See "[Arranging Photos Automatically](#)" for details on the setting procedure.

Save image analysis results

Select this checkbox to save the results of image analysis.

Enable face detection

Select this checkbox to detect face areas in images. Images that are automatically identified as those of the same person according to the **Face Identification Rate in Face Detection** setting will be grouped in the **Unregistered People** view.

Face Identification Rate in Face Detection

You can set the rate to identify as the same person by moving the slider.

When the slider is moved to the left, the range of images to be identified as the same person widens; the identification rate decreases to the contrary. When the slider is moved to the right, the range of images to be identified as the same person narrows; the identification rate increases to the contrary.

Optimize Image Analysis Results

Click **Optimize** to refresh the saved image analysis results.

Delete Saved Image Analysis Results

Click **Delete** to delete the image analysis results.

After the image analysis results are deleted, no image appears in the **Unregistered People** view until the next image analysis is performed.

Important

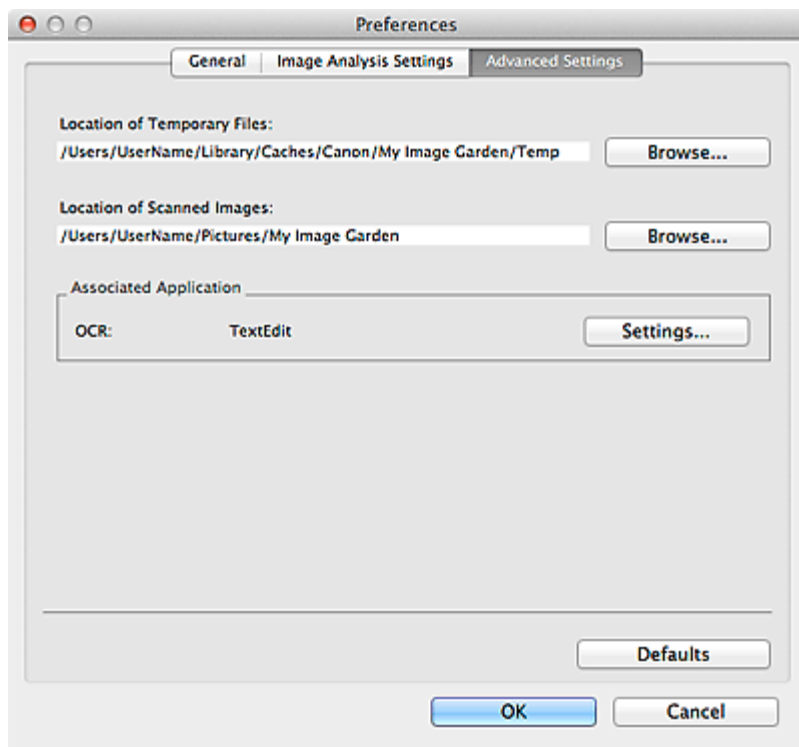

- When the image analysis results are deleted, all information of the people registered to the **People** view is also deleted.

Defaults

Restores all items to the default settings.

Advanced Settings Tab

You can specify the folders in which to save files and settings for extracting text from images.

Location of Temporary Files

You can set the folder in which to save the images temporarily. To change the folder, click **Browse...**, then specify the destination folder.

Location of Scanned Images

You can set the folder in which to save the scanned images. To change the folder, click **Browse...**, then specify the destination folder.

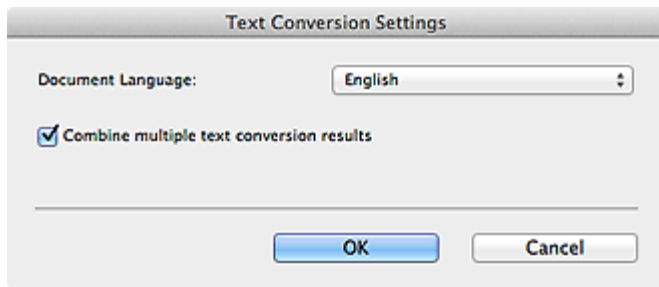

The default save folder is the **My Image Garden** folder in the **Pictures** folder.

Associated Application

OCR

TextEdit (included with Mac OS) is displayed.

Click **Settings...** to display the **Text Conversion Settings** dialog in which you can specify the settings for extracting text from images.

Document Language

Select the language for detecting text in images.

Combine multiple text conversion results

Select this checkbox to save the results of extraction in one file collectively upon extracting text from multiple images.

Important

- Be sure to select this checkbox when extracting text from 11 or more images collectively.

Defaults

Restores all items to the default settings.

Note

- See "[Extracting Text from Images \(OCR Function\)](#)" for how to extract text from images.

Page top ▲

Cannot Use PREMIUM Contents

Cannot Print PREMIUM Contents on CREATIVE PARK PREMIUM

Check 1: Is My Image Garden installed?

You cannot print PREMIUM Contents if My Image Garden is not installed. Install My Image Garden, then try printing the PREMIUM Contents.

Check 2: Did you download PREMIUM Contents?

Download PREMIUM Contents, then try printing again. PREMIUM Contents do not appear if the usage periods of the PREMIUM Contents have elapsed.

See "[Downloaded PREMIUM Contents View](#)" to check the usage periods of the downloaded PREMIUM Contents.

Check 3: Are you trying to print PREMIUM Contents made for paper sizes that are not supported by your printer?

If you try to print PREMIUM Contents made for paper sizes that are not supported by your printer, an error message appears in the computer screen. Follow the prompts in the error message, then check the paper sizes that match the PREMIUM Contents.

Check 4: Are the ink tanks/ink cartridges installed properly?

If genuine Canon ink tanks/ink cartridges are not installed for any colors of a supported printer, an error message is displayed on the computer screen. Follow the instructions on the computer screen, make sure that genuine Canon ink tanks/ink cartridges are installed properly for all colors, then print the PREMIUM Contents again.

Check 5: Is your printer processing an operation?

If your printer is processing an operation, an error message appears in the computer screen. Follow the prompts in the error message, then wait until the operation is completed. When the operation is completed, try printing the PREMIUM Contents again.

Check 6: Is the printer driver for your printer installed?

If the printer driver for your printer is not installed, you cannot print PREMIUM Contents. Install the printer driver for your printer, then try printing the PREMIUM Contents again.

Check 7: Is your printer selected in Quick Menu?

If your printer is not selected in Quick Menu upon displaying PREMIUM Contents from Quick Menu, the menu of CREATIVE PARK PREMIUM does not appear in Quick Menu. Click the  (Preferences) button in Quick Menu, select your printer in **Select Model** in the Preferences screen, then try printing the PREMIUM Contents again.

Check 8: Is your printer connected to the computer via Bluetooth?

If your printer is connected to the computer via Bluetooth, an error message appears in the computer screen. Change the connection to USB connection or network connection, then try printing the PREMIUM Contents again.

Check 9: Is your printer connected to AirMac using a USB cable and being used as a shared printer?

If your printer is connected to **AirMac** using a USB cable and being used as a shared printer, an error message is displayed on the computer screen. Change the connection to USB connection or network connection, then try printing the PREMIUM Contents again.

Page top ▲

Troubleshooting

How Can I Change the Settings of My Image Garden?

You can change the settings of My Image Garden in the **Preferences** dialog.

➡ [Preferences Dialog](#)

Images Do Not Appear

Image analysis is performed immediately after installation. Therefore, images may not appear in the **Calendar** view or **Unregistered People** view until the image analysis is completed.

Note

- **Identifying people...** appears at **Unregistered People** in Global Menu during image analysis.

To display images in the **Calendar** view, **Unregistered People** view or **People** view, or to use the item recommendation function, the folders in which the images are saved need to be subject to image analysis. Make sure that the folders in which the images are saved are subject to image analysis on the **Image Analysis Settings** tab of the **Preferences** dialog.

➡ [Image Analysis Settings Tab](#)

Image Analysis (Face Identification) Fails

Adjust the face identification rate and other settings on the **Image Analysis Settings** tab of the **Preferences** dialog.

➡ [Image Analysis Settings Tab](#)

Cannot Scan Properly

See the corresponding page of *On-screen Manual* for problems with scanning.

Cannot Use PREMIUM Contents

See "[Cannot Use PREMIUM Contents](#)" for details.

Selecting Images, PDF Files and Videos

In My Image Garden, there are many screens for selecting images, PDF files and videos. You can select images, PDF files or videos by clicking the thumbnails displayed in the screens. The selected files are outlined in white.

- ➡ Searching by date of shooting or creation (**Calendar** view)
- ➡ Selecting files by registered event (**Event** view)
- ➡ Selecting files by registered person (**People** view)
- ➡ Searching for photos containing people (**Unregistered People** view)
- ➡ Selecting files saved in specific folders (folder view)

Important

- For PDF files, only those created in My Image Garden or IJ Scan Utility are supported. PDF files created or edited in other applications are not supported.
- You cannot print images and PDF files at the same time. Print images and PDF files separately.
- To select multiple files in the same folder at the same time, click the thumbnails of images, PDF files or videos while pressing the command key or shift key. You cannot select images in different folders or views at the same time.

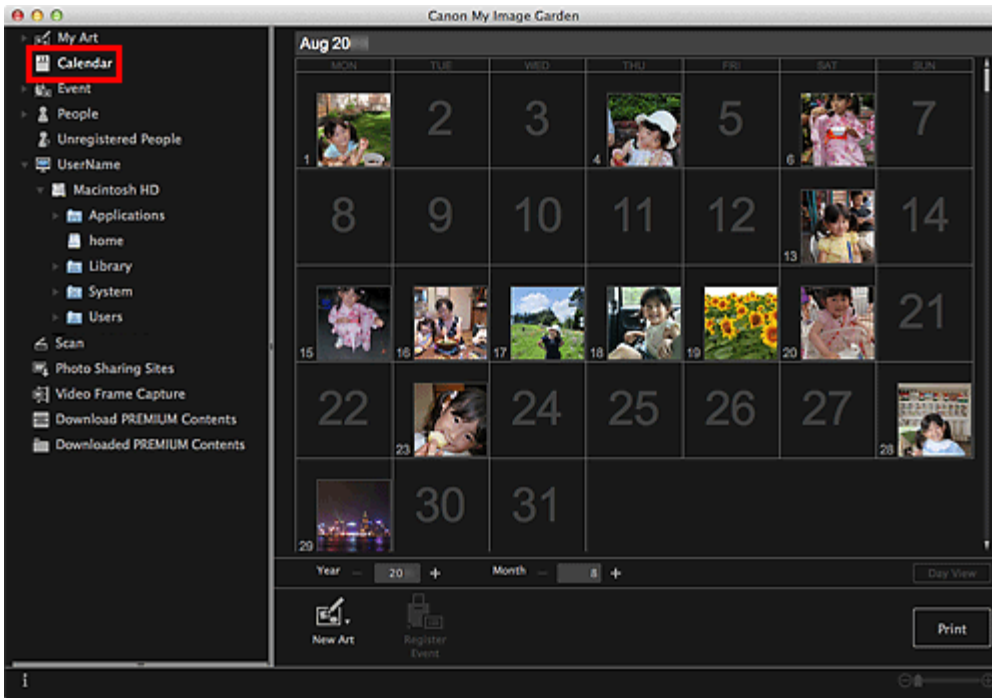

Note

- You can also select still images by capturing them from videos.
 - ➡ [Capturing and Printing Still Images from Videos](#)
- You can also select images downloaded from photo sharing sites on the Internet.
 - ➡ [Downloading Images from Photo Sharing Sites](#)
- For videos, only MOV or MP4 format videos recorded with Canon digital cameras or digital camcorders appear.

Calendar View (Images, PDF Files and Videos)

In Month View

When you click **Calendar**, the view switches to **Calendar** set to Month View and a thumbnail of one of the images or PDF files registered to the date appears for each date. When you click a thumbnail, all images, PDF files and videos contained in the date will be selected.

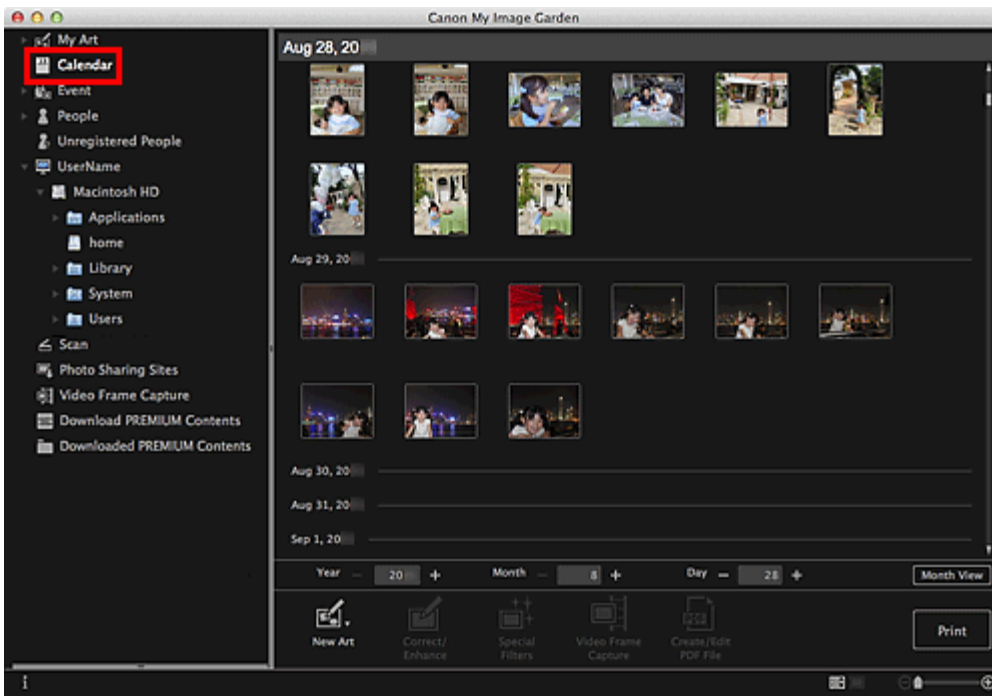

Note

- Click a date and select **Select All** from the **Edit** menu to select all dates of the month.

In Day View

When you click **Day View** in the **Calendar** view set to Month View, the view switches to **Calendar** set to Day View, and images, PDF files and videos appear as thumbnails by date.

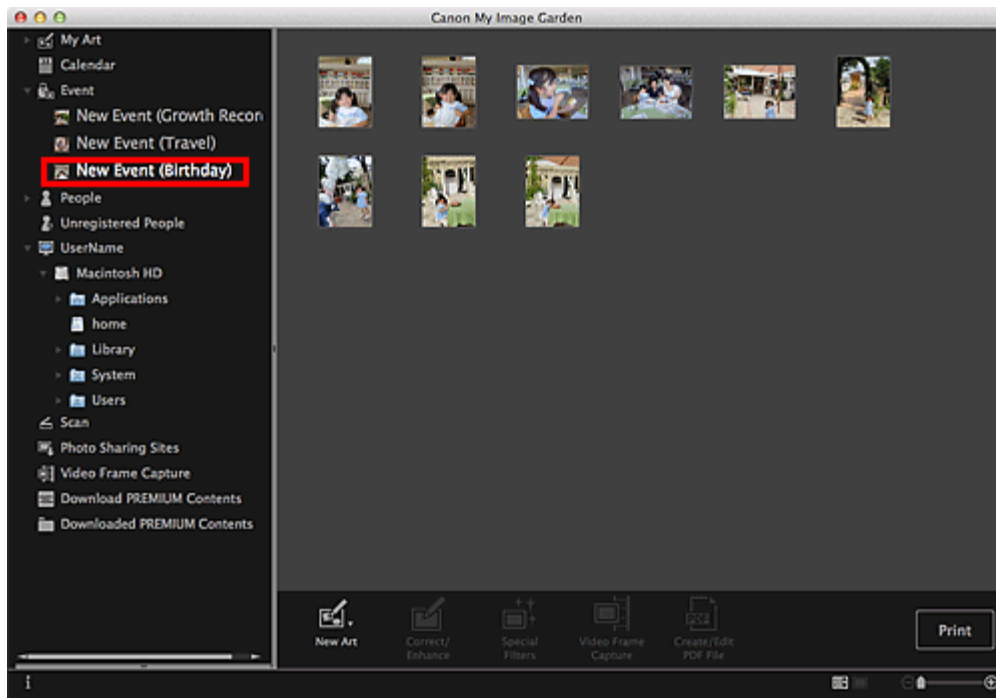

Note

- Click a thumbnail of an image or PDF file and select **Select All** from the **Edit** menu to select all images, PDF files and videos of the date.

Event View (Images, PDF Files and Videos)

When you click an event name displayed below **Event**, images, PDF files and videos contained in the

event appear as thumbnails.

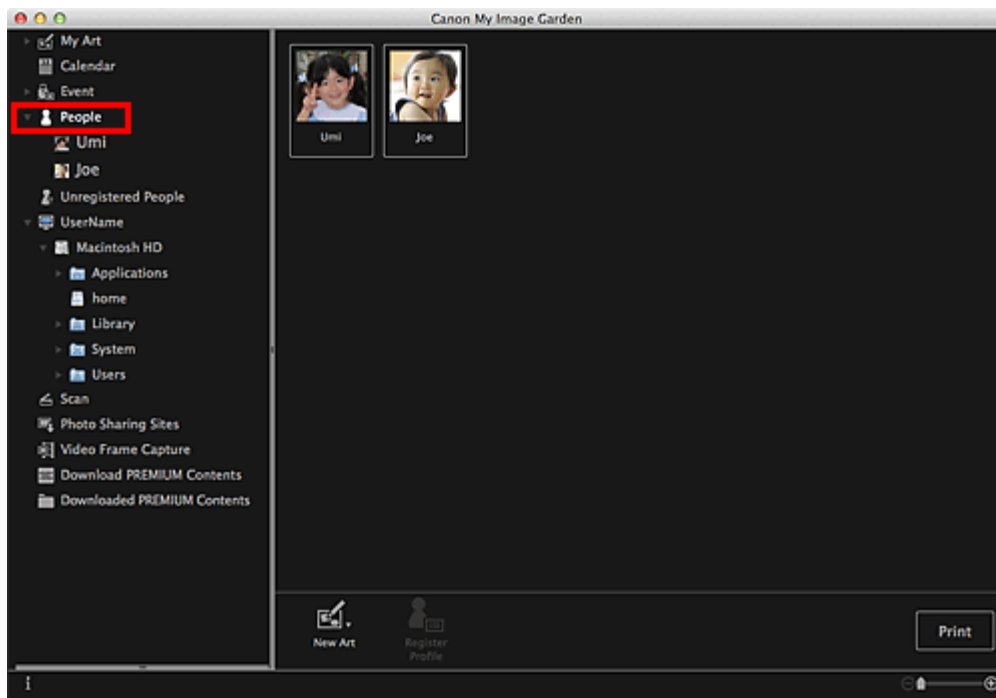

Note

- Select **Select All** from the **Edit** menu to select all images, PDF files and videos.

People View (Images)

When you click **People**, the view switches to **People** and the images of registered people appear as thumbnails. When you click a thumbnail, all images contained in the person will be selected.

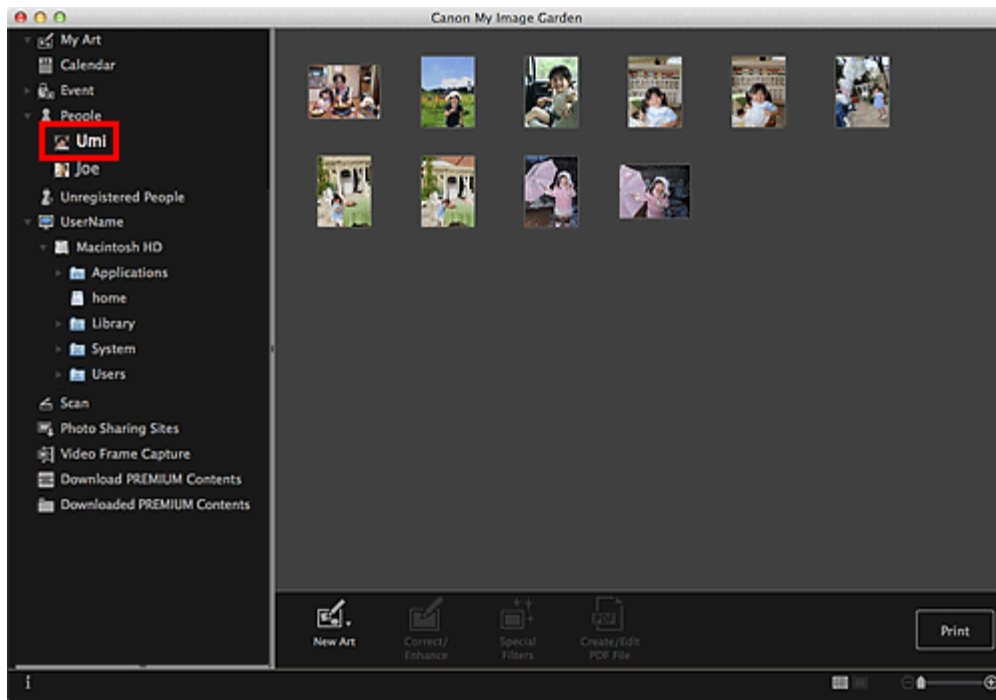

Note

- Select **Select All** from the **Edit** menu to select all people.

In Expanded display

When you click a name displayed below **People**, the view switches to the expanded display of **People**

and the images registered to the person appear as thumbnails.

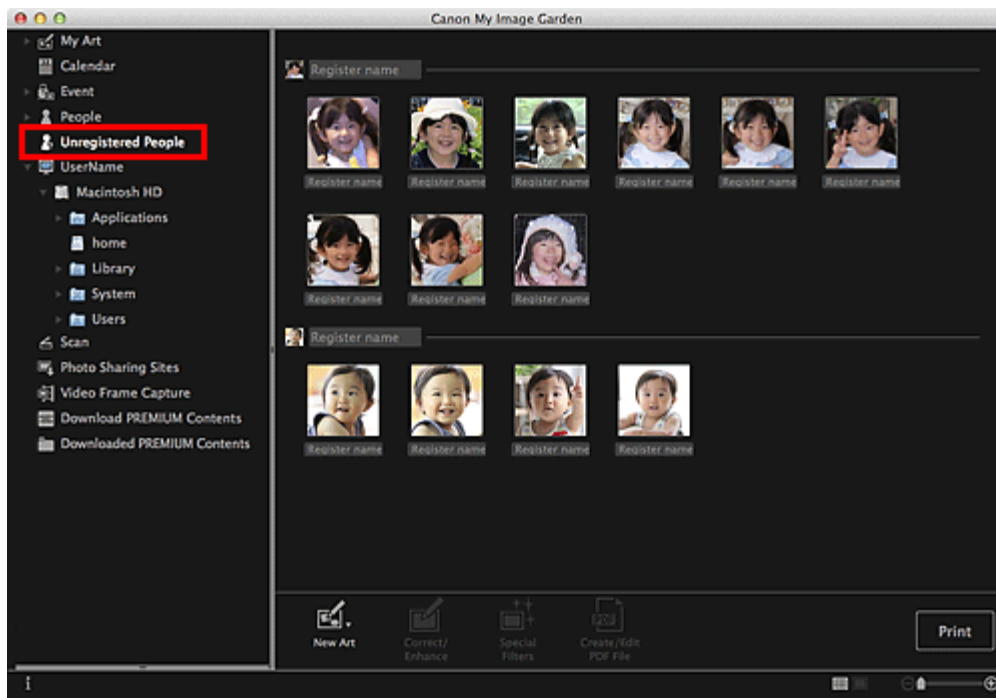

Note

- Select **Select All** from the **Edit** menu to select all images.

Unregistered People View (Images)

When you click **Unregistered People**, the view switches to **Unregistered People** and images detected as a result of image analysis appear as thumbnails.

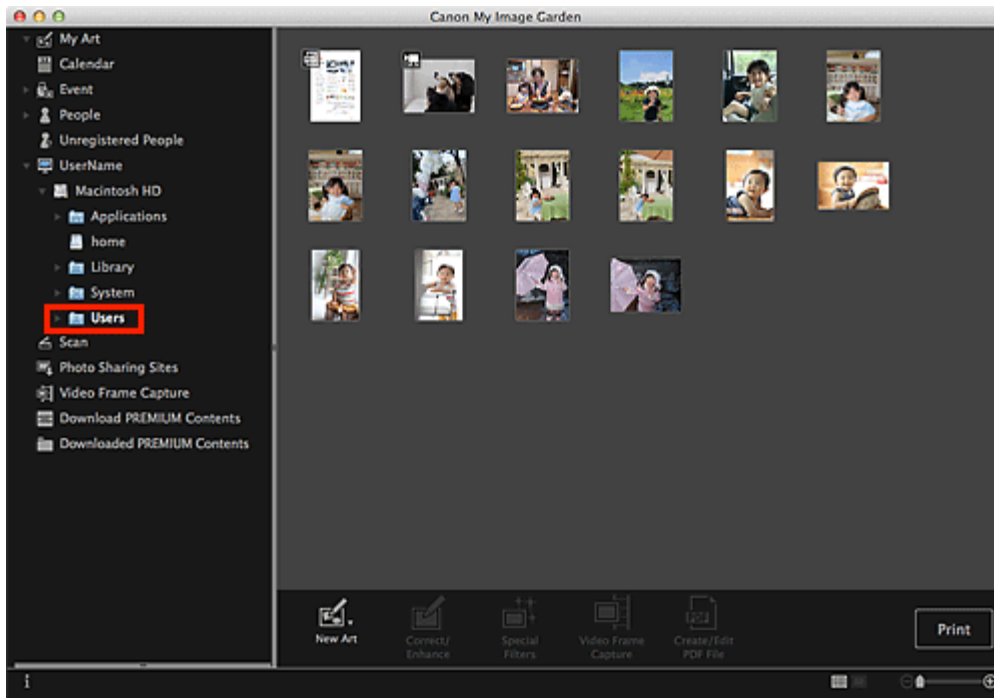

Note

- Click a smaller thumbnail to select all images that are automatically organized as those of the same person.
- Select **Select All** from the **Edit** menu to select all images that are automatically organized as those of the same person.

- **Identifying people...** appears at **Unregistered People** in Global Menu during image analysis.

Folder View (Images, PDF Files and Videos)

When you select a folder in the folder tree, images, PDF files and videos in the folder appear as thumbnails.

N002

Restrictions

If you use a printer over the wireless LAN, the printer may recognize nearby wireless systems, you should set a network key (WEP, WPA, or WPA2) to the access point to encrypt wireless transmission. Wireless communication with a product that does not comply with the Wi-Fi standard cannot be guaranteed.

Connecting with too many computers may affect the printer performance, such as printing speed.

[Page top ▲](#)

N003

Initial Values Set at Factory (Network)

Item	Initial Values
Change wireless/wired LAN	Enable Wireless LAN
SSID	BJNPSETUP
Communication mode	Infrastructure
Wireless LAN security	Disable
IPv4 IP address	Auto setup
IPv6 IP address	Auto setup
Set printer name*	XXXXXXXXXXXX
TCP/IP settings	IPv4 & IPv6
Enable/disable WSD (WSD settings)	Enable
Timeout setting (WSD settings)	1 minute
Enable/disable Bonjour (Bonjour settings)	Enable
Service name (Bonjour settings)	Canon PRO-10 series
LPR protocol setting	Enable
Wireless LAN DRX	Enable
Wired LAN DRX	Enable

* The initial value in this item varies by the printer.

N106

Connecting to Other Computer with LAN/Changing the Connection Method from USB to LAN

To add the computer connecting the printer with LAN or to change the connection method between the printer and the computer from USB to LAN, setup with the Setup CD-ROM.

Connecting to Other Computer with LAN

To add the computer connecting the printer with LAN, insert the Setup CD-ROM into the computer to connect with LAN and setup the network setting.

Changing the Connection Method from USB to LAN

To change the connection method between the printer and the computer from USB to LAN, setup with the Setup CD-ROM.

To change the connection method, insert the Setup CD-ROM into the computer to connect with LAN and select **Change Connection Method** to setup.

[Page top ▲](#)

About Technical Terms

In this section, technical terms used in the manual are explained.

➡ A
➡ B
➡ C
➡ D
➡ F
➡ I
➡ K
➡ L
➡ M
➡ N
➡ P
➡ R
➡ S
➡ T
➡ U
➡ W

A

- **Access Point**

A wireless transceiver or base station that receives information from wireless clients/the printer and rebroadcasts it. Required in an infrastructure network.

- **Admin Password**

Administration password in IJ Network Tool to restrict access to network users. It must be entered to access the printer and change printer settings.

When the printer's network settings are factory default, the admin password does not have to be entered.

- **AES**

An encryption method. It is optional for WPA. Strong cryptographic algorithm adopted within U.S. government organizations for information processing.

- **AirPort Network (Infra)**

Client computer and printer setup where all wireless communications pass through an access point.

- **Authentication Method**

The method that an access point uses to authenticate a printer through a wireless LAN. The methods are agreeable each other.

When using WEP as an encryption method, the authentication method is able to fix to **Open System** or **Shared Key**.

For WPA/WPA2, authentication method is PSK.

- **Auto**
The printer automatically changes its authentication method to match the access point.
- **Open System**
In this authentication method, the communication partner is authenticated without using WEP key even if **Use Password (WEP)** is selected.
- **Shared Key**
In this authentication method, the communication partner is authenticated using the WEP key that was set for encryption.

B

- **Bonjour**
A service built into Mac OS X operating system to detect the connectable devices on a network automatically.

C

- **Channel**
Frequency channel for wireless communication. In the infrastructure mode, the channel is automatically adjusted to match that set to the access point. This printer supports channels 1 to 13. Note that the number of channels that can be used for your wireless LAN varies depending on the region or country.
- **Computer to Computer**
Client computer and printer setting where wireless communication occurs on a peer-to-peer basis, i.e., all clients in with the same SSID/network name communicate directly with each other. No access point is required. This printer does not support ad-hoc communication.

D

- **DHCP server functionality**
The router or the access point assigns an IP address automatically whenever the printer or the personal computer on a network starts up.

F

- **Firewall**
It is a system that prevents an unlawful computer access in the network. To prevent, you can use the firewall function of a broadband router, the security software installed in the computer, or operation system for computer.

I

- **IEEE 802.11b**
International standard for wireless LAN using the 2.4 GHz frequency range with a throughput of up to 11 Mbps.
- **IEEE 802.11g**
International standard for wireless LAN using the 2.4 GHz frequency range with a throughput of up to 54 Mbps. Compatible with 802.11b.
- **IEEE 802.11n**
International standard for wireless LAN using the 2.4 GHz and 5 GHz frequency ranges. Even

when using two or more antennas simultaneously or obtaining a bigger transfer rate than before by using multiple communication channels at the same time, the transmission speed may be influenced by the connected apparatus.

At the maximum transfer rate of 600 Mbps, it is possible to communicate with multiple computer terminals within a dozen or so metre radius.

Compatible with 802.11b and 802.11g.

- **IP Address**

A unique number with four parts separated by dots. Every network device that is connected to the Internet has an IP address. Example: 192.168.0.1

An IP address is usually assigned by an access point or a DHCP server of the router automatically.

For the procedure to check the IP address of the printer, see [Checking the IP Address or the MAC Address of the Printer](#).

- **IPv4/IPv6**

They are internetwork-layer protocol used on the internet. IPv4 uses 32-bit addresses and IPv6 uses 128-bit addresses.

K

- **Key Format**

Select either **ASCII** or **Hex** as the Password (WEP) key format. The character that can be used for the WEP key differs depending on the selected key formats.

- **ASCII**
Specify with a 5 or 13-character string that can include alphanumeric and underscore "_" characters. It is case-sensitive.
- **Hex**
Specify a 10-digit or 26-digit string that can contain hexadecimal (0 to 9, A to F, and a to f).

- **Key Length**

Length of the WEP key. Select either 64 bits or 128 bits. Longer key length allows you to set a more complex WEP key.

L

- **Link Quality**

The status of connection between the access point and the printer excluding noise (interference) is indicated with a value from 0 to 100%.

- **LPR**

A platform-independent printing protocol used in TCP/IP networks. It is not supported bidirectional communication.

M

- **MAC Address (AirPort ID)**

Also known as the physical address. A unique and permanent hardware identifier that is assigned to network devices by its manufacturer. MAC addresses are 48 bits long and are written as a hexadecimal number separated by colons, i.e., 11:22:33:44:55:66. To check the MAC address of this printer, see [Checking the IP Address or the MAC Address of the Printer](#).

N

- **Network (SSID)**

Unique label for wireless LAN. It is often represented such as a network name or a access point name.

SSID distinguishes one wireless LAN from another to prevent interference.

The printer and all clients on a wireless LAN must use the same SSID in order to communicate with each other. The SSID can be up to 32 characters long, and is made up of alphanumeric characters. The SSID may also be referred to by its network name.

P

- **Password (WEP)/Password (WEP Key)**

An encryption method employed by IEEE 802.11. Shared security key used to encrypt and decrypt data sent over wireless networks. This printer supports key length of 64 bits or 128 bits, key format of ASCII code or Hexadecimal, and key number of 1 to 4.

- **Performance**

Indicates the status on whether the printer can be used.

- **PSK**

An encryption method employed by WPA/WPA2.

R

- **Router**

A relay device to connect to another network.

S

- **Signal Level**

The strength of the signal received by the printer from the access point is indicated with a value from 0 to 100%.

- **SSID**

Unique label for wireless LAN. It is often represented such as a network name or an access point name.

SSID distinguishes one wireless LAN from another to prevent interference.

The printer and all clients on a wireless LAN must use the same SSID in order to communicate with each other. The SSID can be up to 32 characters long, and is made up of alphanumeric characters. The SSID may also be referred to by its network name.

- **Stealth**

In the stealth mode, an access point hides itself by not broadcasting its SSID. The client must specify the SSID set to the access point to detect it.

The stealth mode is called a "closed network".

- **Subnet Mask Address**

IP address has two components, the network address and the host address. Subnet Mask used to calculate the Subnet Mask address from the IP address. A Subnet Mask is usually assigned by an access point or a DHCP server of the router automatically.

Example:

IP Address: 192.168.127.123

Subnet Mask: 255.255.255.0

Subnet Mask Address: 192.168.127.0

T

- **TCP/IP**

Suite of communications protocols used to connect hosts on the Internet or the LAN. This protocol allows different terminals to communicate with each other.

- **TKIP**

An encryption protocol employed by WPA/WPA2.

U

- **USB**

Serial interface designed to enable you to "hot-swap" devices, i.e., by plugging and unplugging them without turning off the power.

W

- **WEP/WEP Key**

An encryption method employed by IEEE 802.11. Shared security key used to encrypt and decrypt data sent over wireless networks. This printer supports key length of 64 bits or 128 bits, key format of ASCII code or Hexadecimal, and key number of 1 to 4.

- **Wi-Fi**

International association that certifies interoperability of wireless LAN products based on the IEEE 802.11 specification.

This printer is a Wi-Fi authorized product.

- **Wireless LAN**

A network that, instead of being connected by physical wires, is connected by a wireless technology, such as Wi-Fi.

- **WPA**

Security framework announced by the Wi-Fi Alliance in October 2002. The security has been strengthened more than WEP.

- **Authentication:**

WPA defines the following authentication methods: WPA Personal that can be used without an authentication server, plus WPA Enterprise that do require an authentication server.

This printer supports WPA Personal.

- **Passphrase:**

This encrypted key is used to perform WPA Personal authentication.

The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

- **WPA2**

Security framework released by the Wi-Fi Alliance in September 2004 as a later version of WPA. Provides a stronger encryption mechanism through Advanced Encryption Standard (AES).

- **Authentication:**

WPA2 defines the following authentication methods: WPA2 Personal that can be used without an authentication server, plus WPA2 Enterprise that do require an authentication server.

This printer supports WPA2 Personal.

- **Passphrase:**

This encrypted key is used to perform WPA2 Personal authentication.

The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

- **WPS (Wi-Fi Protected Setup)**

WPS is a standard for easy and secure establishment of a wireless network.

There are 2 primary methods used in the Wi-Fi Protected Setup:

PIN entry: a mandatory method of setup for all WPS certified devices

Push button configuration (PBC): an actual push button on the hardware or through a simulated push button in the software.

N102

Cannot Detect the Printer When Setting up Network Communication

If the printer could not be detected on the network when setting up the network communication, confirm the network settings before redetecting the printer.

➡ [Cannot Detect the Printer with the Wireless LAN: Check 1](#)

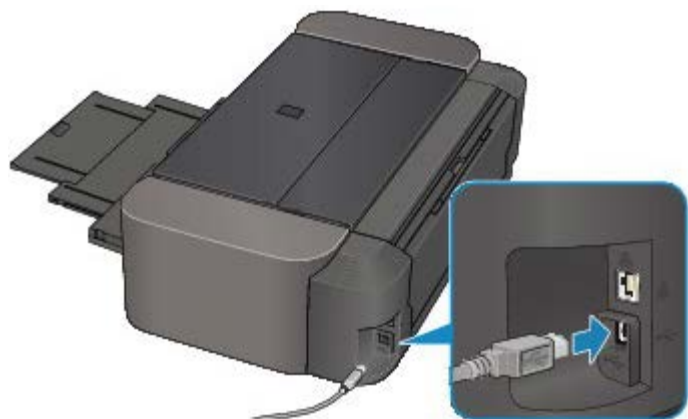

➡ [Cannot Detect the Printer with the Wired LAN: Check 1](#)

[Page top](#) ▲

U088

Connecting the Printer to the Computer Using a USB Cable

Connect the printer and the computer using a USB cable as the illustration below. The USB port is located on the rear of the printer.

[Page top ▲](#)

N105

When Detecting the Printers Have the Same Name

When the printer is detected, you may see multiple printers of the same name on the detection result screen. The MAC address or the printer name specified by Bonjour is displayed at the end of the printer name on the detection result screen.

Select a printer with checking the MAC address or the printer name specified by Bonjour set to the printer against the printer name on detection result screen.

To check the MAC address of the printer, print out the network setting information.

➡ [Printing Out Network Setting Information](#)

[Page top ▲](#)

N010

IJ Network Tool

IJ Network Tool is a utility that enables you to display and modify the printer network settings. It is installed when the printer is set up.

Important

- To use the printer over LAN, make sure you have the equipment necessary for the connection type, such as an access point or a LAN cable.
- Do not start up IJ Network Tool while printing.
- Do not print when IJ Network Tool is running.
- If the firewall function of your security software is turned on, a message may appear warning that Canon software is attempting to access the network. If the warning message appears, set the security software to always allow access.

Starting up IJ Network Tool

1. Select Applications from the Go menu of Finder, double-click Canon Utilities > IJ Network Tool, and double-click the Canon IJ Network Tool icon.

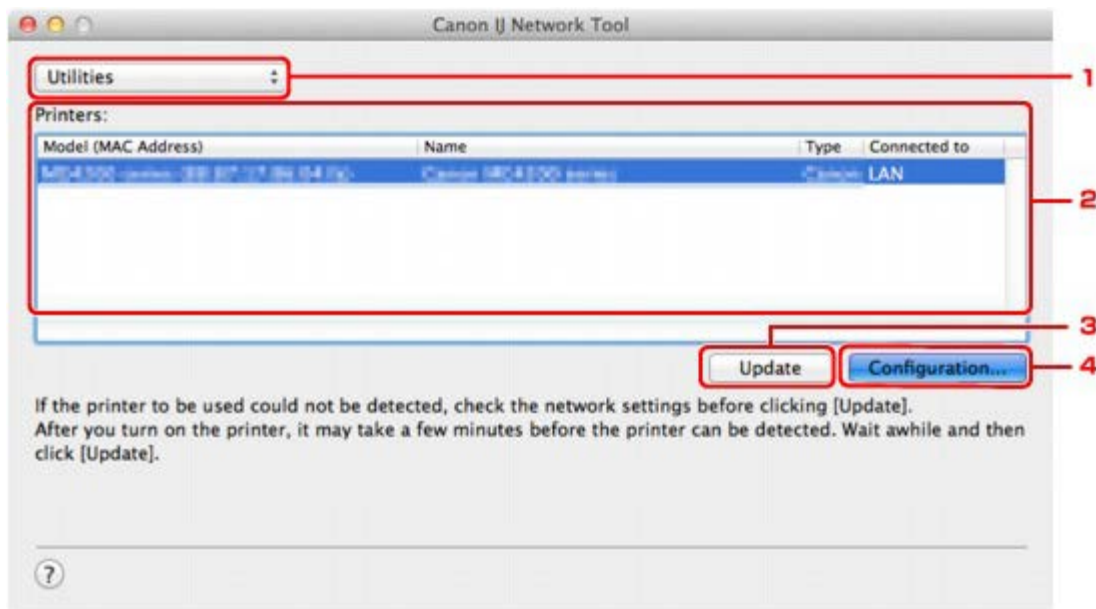

Note

- You can also start up IJ Network Tool by clicking  **Network Settings** from **Device Settings & Maintenance** on Quick Menu.

N011

Canon IJ Network Tool Screen

This section describes the items displayed on the **Canon IJ Network Tool** screen.

1. Utilities

Modifies the settings of the printer.

Select to change the network name (SSID) settings.

Setup

Sets up the printer.

If you setup the printer from scratch, connect your computer and the printer with a USB cable.

2. Printers:

Printer name, type, and connection destination are displayed.

The selected printer can be set up or be modified.

3. Update

Performs printer detection again. Click this button if the target printer is not displayed.

Important

- To change the printer's network settings using IJ Network Tool, it must be connected via a LAN.
- If the printer on a network is not detected, make sure that the printer is turned on, then click **Update**. It may take several minutes to detect printers. If the printer is not yet detected, connect the printer and the computer with a USB cable, then click **Update**.
- If the printer is being used from another computer, a screen is displayed informing you of this condition.

Note

- This item has the same function as **Refresh** in the **View** menu.

4. Configuration

Enabled when **Utilities** is selected. Click to display the **Configuration** screen to configure settings of the selected printer.

Note

- This item has the same function as **Configuration** in the **Settings:** menu.
-

[Page top ▲](#)

N012

Canon IJ Network Tool Menus

This section describes the menus in **Canon IJ Network Tool**.

1. Canon IJ Network Tool menu

About Canon IJ Network Tool

Displays the version of this application.

Quit Canon IJ Network Tool

Exits IJ Network Tool.

2. View menu

Status

Displays the **Status** screen to confirm the printer connection status and wireless communication status.

Refresh

Updates and displays the contents of **Printers:** to the latest information.

Important

- To change the printer's network settings using IJ Network Tool, it must be connected via a LAN.
- If the printer on a network is not detected, make sure that the printer is turned on, then select **Refresh**. It may take several minutes to detect printers. If the printer is not yet detected, connect the printer and the computer with a USB cable, then select **Refresh**.
- If the printer is being used from another computer, a screen is displayed informing you of this condition.

Note

- This item has the same function as **Update** in the **Canon IJ Network Tool** screen.

Network Information

Displays the **Network Information** screen to confirm the network settings of the printer.

3. Settings: menu

Configuration

Displays the **Configuration** screen to configure settings of the selected printer.

Note

- This item has the same function as **Configuration** in the **Canon IJ Network Tool** screen.

Maintenance

Displays the **Maintenance** screen to revert the network settings of the printer to factory default.

4. Help menu

Canon IJ Network Tool Help

Displays the application's online help.

N015

Changing the Settings in the Wireless LAN Sheet

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the printer after modifying the settings.

1. Make sure that the **Wi-Fi** lamp is lit on the front side of the printer.

If the **Wi-Fi** lamp is off, Wireless LAN is inactive.

Follow the procedure below to activate Wireless LAN.

1. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 10 times.
2. Release the **RESUME/CANCEL** button.

The **Wi-Fi** lamp is lit.

Note

- To deactivate Wireless LAN, press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 12 times and release the button, then the **Wi-Fi** lamp goes off.

2. Start up IJ Network Tool.

➡ Starting up IJ Network Tool

3. Select the printer in **Printers**:

When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.

4. Click the **Configuration** button.

5. Click the **Wireless LAN** button.

6. Change the settings or confirm.

Click **OK** after changing configuration. A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

1. Network Type:

AirPort Network (Infra)

Connects the printer to the wireless LAN with an access point.

2. Network (SSID):

The network name (SSID) of the wireless LAN is displayed.

Note

- Enter the same SSID that the access point is configured to use. The SSID is case-sensitive.

3. Search...

The **Access Points** screen is displayed to select an access point to connect to.

➡ **Access Points** Screen

Note

- When IJ Network Tool runs over a LAN, the button is grayed out and cannot be selected. Connect the printer and the computer with a USB cable temporarily to change the settings.

4. Encryption Method:

Select the encryption method used over the wireless LAN.

Important

- If all encryption types of the access point, printer, or computer do not match, the printer cannot communicate with the computer. If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point matches that set to the printer.
➡ **How to Set a WEP/WPA/WPA2 Key**
- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

Do Not Use

Select to disable encryption.

Use Password (WEP)

Transmission is encrypted using a WEP key you specified.

If a network password (WEP) has not been set, the **WEP Details** screen is displayed automatically. To change WEP settings set before, click **Configuration** to display the screen.

➡ **Changing the WEP Detailed Settings**

Use WPA/Use WPA2

Transmission is encrypted using a network key you specified.

The security has been strengthened more than WEP.

If a network key has not been set, the **Authentication Type Confirmation** screen is displayed automatically. To change network key settings before, click **Configuration** to display the **WPA Details** screen or **WPA2 Details** screen.

➡ Changing the WPA or WPA2 Detailed Settings

5. Configuration

The detailed settings screen is displayed. The network password (WEP) or the WPA/WPA2 key selected in **Encryption Method**: can be confirmed and changed.

For details on WEP setting:

➡ Changing the WEP Detailed Settings

For details on WPA or WPA2 setting:

➡ Changing the WPA or WPA2 Detailed Settings

6. TCP/IP Setting:

Sets the IP address of the printer to be used over the LAN. Set a value appropriate for your network environment.

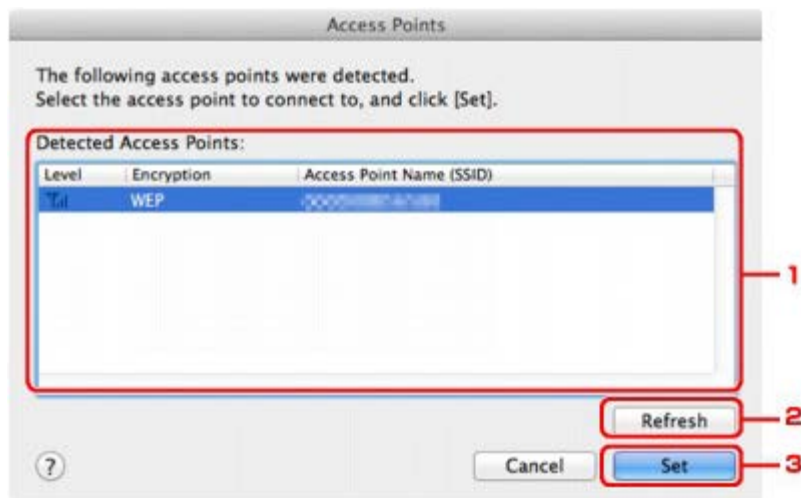

Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your wireless LAN router or access point.

Use following IP address

If no DHCP server functionality is available in your setup where you use the printer or you want to use a particular IP address, select this option to use a fixed IP address.

• Access Points Screen

1. Detected Access Points:

The signal strength from the access point, encryption type, name of access point, and the radio channel can be confirmed.

Important

- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

Note

- Signal strength is displayed as follows.

 : Good

 : Fair

: Poor

- Type of encryption is displayed as follows.
Blank: No encryption
WEP: WEP is set
WPA: WPA is set
WPA2: WPA2 is set
-

2. Refresh

Click to update the list of access points when your target access point is not detected.

If the target access point is set to a closed network (the stealth mode), click **Cancel** to return to the previous screen and enter the network name (SSID) in Network (SSID).

Note

- Make sure that the access point is turned on.
-

3. Set

Click to set the network name (SSID) in **Network (SSID)**: on the **Wireless LAN** sheet.

Note

- The **WEP Details** screen, the **WPA Details** screen, or the **WPA2 Details** screen appears if the selected access point is encrypted. In this case, configure the details to use the same encryption settings set to the access point.
 - Access points that cannot be used by this printer (including those configured to use different encryption methods) are displayed grayed out and cannot be configured.
-

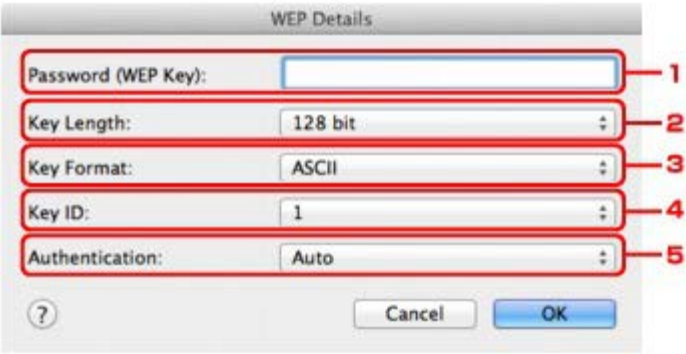

Page top ▲

N014

Changing the WEP Detailed Settings

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the printer after modifying the settings.

1. Start up IJ Network Tool.
➡ Starting up IJ Network Tool
2. Select the printer in **Printers:**.
When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.
3. Click the **Configuration** button.
4. Click the **Wireless LAN** button.
5. Select **Use Password (WEP)** in **Encryption Method:** and click **Configuration**.
The **WEP Details** screen is displayed.
6. Change the settings or confirm.
When changing the password (WEP key), the same change must be made to the password (WEP key) of the access point.

1. **Password (WEP Key):**
Enter the same key as the one set to the access point.
The number of characters and character type that can be entered differ depending on the key length and key format.

		Key Length:	
		64 bit	128 bit
Key Format:	ASCII	5 characters	13 characters
	Hexadecimal (Hex)	10 digits	26 digits

2. **Key Length:**

Select either **64 bit** or **128 bit**.

3. **Key Format:**

Select either **ASCII** or **Hex**.

4. **Key ID:**

Select the Key ID (index) set to the access point.

Note

- When the printer is connected to an AirPort Base Station via a LAN:
When the printer is connected to an AirPort Base Station via a LAN, confirm the settings in **Wireless Security of AirPort Utility**.
 - Select **64 bit** if **WEP 40 bit** is selected for the key length in the AirPort Base Station.
 - Select **1** for **Key ID**:. Otherwise your computer will not be able to communicate with the printer via the access point.

5. **Authentication:**

Select the authentication method to authenticate the printer's access to the access point.

Normally, select **Auto**. If you want to specify the method manually, select **Open System** or **Shared Key** according to the setting of the access point.

7. Click **OK**.

Important

- If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point matches that set to the printer.
[➡ How to Set a WEP/WPA/WPA2 Key](#)

N107

Changing the WPA or WPA2 Detailed Settings

To change the wireless network settings of the printer, connect the printer and the computer with a USB cable temporarily. If you modify the wireless network settings of the computer over wireless connection without USB connection, your computer may not be able to communicate with the printer after modifying the settings.

The example screenshots in this section refer to the WPA detailed settings.

1. Start up IJ Network Tool.

➡ Starting up IJ Network Tool

2. Select the printer in **Printers:**.

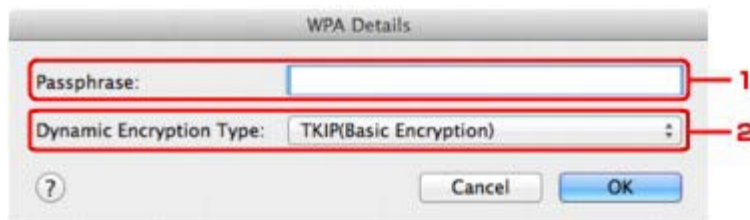

When the printer is connected to the computer with a USB cable temporarily, select the printer with **USB** appearing in the **Connected to** column.

3. Click the **Configuration** button.

4. Click the **Wireless LAN** button.

5. Select **Use WPA** or **Use WPA2** in **Encryption Method:** and click **Configuration**.

6. Enter the passphrase, confirm the type of dynamic encryption and click **OK**.

1. **Passphrase:**

Enter the passphrase set to the access point. The passphrase should be a string of 8 to 63 alphanumeric characters or a 64-digit hexadecimal value.

If you do not know the access point passphrase, refer to the instruction manual provided with the access point or contact its manufacturer.

2. **Dynamic Encryption Type:**

Select the dynamic encryption method from either **TKIP (Basic Encryption)**, or **AES (Secure Encryption)**.

Important

- If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point matches that set to the printer.

➡ How to Set a WEP/WPA/WPA2 Key

Note

- This printer supports WPA-PSK (WPA-Personal) and WPA2-PSK (WPA2-Personal).

N016

Changing the Settings in the Wired LAN Sheet

Note

- To change the settings in the **Wired LAN** sheet, follow the procedure below to activate wired LAN.
 1. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 11 times.
 2. Release the **RESUME/CANCEL** button.

1. Start up IJ Network Tool.

➡ Starting up IJ Network Tool

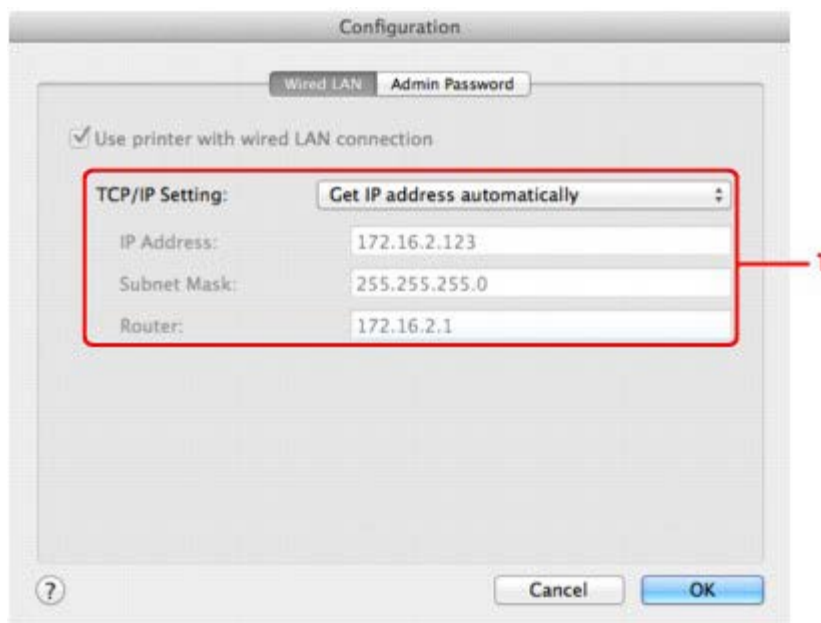

2. Select the printer in **Printers**..

3. Click the **Configuration** button.

4. Click the **Wired LAN** button.

5. Change the settings or confirm.

Click **OK** after changing configuration. A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

1. **TCP/IP Setting:**

Sets the IP address of the printer to be used over the LAN. Set a value appropriate for your network environment.

Get IP address automatically

Select this option to use an IP address automatically assigned by a DHCP server. DHCP server functionality must be enabled on your router.

Use following IP address

If no DHCP server functionality is available in your setup where you use the printer or you want to use a particular IP address, select this option to use a fixed IP address.

[Page top ▲](#)

N017

Changing the Settings in the Admin Password Sheet

1. Start up IJ Network Tool.
➡ Starting up IJ Network Tool
2. Select the printer in **Printers:**.
3. Click the **Configuration** button.
4. Click the **Admin Password** button.
The **Admin Password** sheet is displayed.
5. Change the settings or confirm.

1. Use admin password

Set a password for the administrator with privileges to set up and change detailed options. To use this feature, select this check box and enter a password.

Important

- The password should consist of alphanumeric characters and be no longer than 32 characters. The password is case-sensitive. Do not forget the password you set.

2. Password:

Enter the password to set.

3. Password Confirmation:

Enter the password again for confirmation.

6. Click **OK**.

A screen is displayed asking you for confirmation before the settings are sent to the printer. If you click **OK**, the settings are sent to the printer and the **Transmitted Settings** screen is displayed.

[Page top ▲](#)

N018

Monitoring Wireless Network Status

Note

- When using the printer over the Wired LAN, you cannot monitor network status.

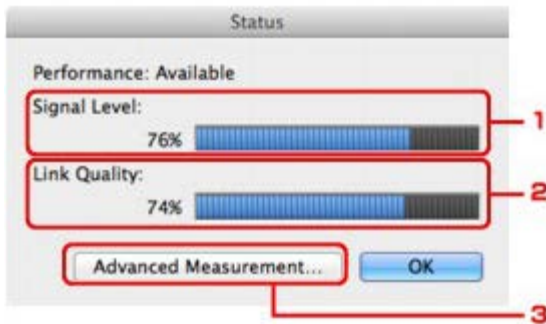

1. Start up IJ Network Tool.

➡ Starting up IJ Network Tool

2. Select the printer in **Printers:**.

3. Select **Status** from the **View** menu.

The **Status** screen is displayed and you can check the printer status and connection performance.

1. **Signal Level:**

Indicates the strength of the signal received by the printer, ranging from 0% to 100%.

2. **Link Quality:**

Indicates the signal quality excluding the noise while communicating, ranging from 0% to 100%.

Important

- If the indicated value is low, move your printer closer to the wireless network device.

3. **Advanced Measurement...**

Click to examine the connection performance between the printer and the access point. Follow the instructions on the screen to start measuring and display the status. Measurement takes a few minutes.

When  is displayed in **Connection Performance between the Printer and the Access Point**, the printer can communicate with the access point. Otherwise, refer to displayed comments and Help for improving the status of communication link, and click **Remeasurement**.

- Check that the printer and the access point are located within the wireless connectivity range with no obstacles between them.
- Check if the distance between the printer and the access point is not too far.
If they are too far, move them closer together.
- Check that there is no barrier or obstacle between the printer and the access point.
In general, connection performance decreases for communications through walls or between different floors. Adjust the locations to avoid such situations.
- Check that there are no sources of radio interference near the printer and the access point.
The wireless connection may use the same frequency band as microwave ovens and other

sources of radio interference. Try to keep the printer and the access point away from such sources.

- Check if the radio channel of the access point is close to that of other access points nearby. If the radio channel of the access point is close to that of other access points nearby, the connection performance may become unstable. Be sure to use a radio channel that does not interfere with other access points.
- Check that the printer and the access point face each other. Connection performance may depend on the orientations of the wireless devices. Replace the access point and the printer in another direction to achieve the best performance.
- Check whether other computers are not accessing the printer.

If  appears in the result of the measurement, check whether other computers are not accessing the printer.

If  still appears even if you have tried the above, finish the measurement, then restart the IJ Network Tool to start over the measurement.

Note

- If any messages appear on **Overall Network Performance:**, move the printer and access point as instructed to improve the performance.

N019

Initializing the Network Settings of the Printer

Important

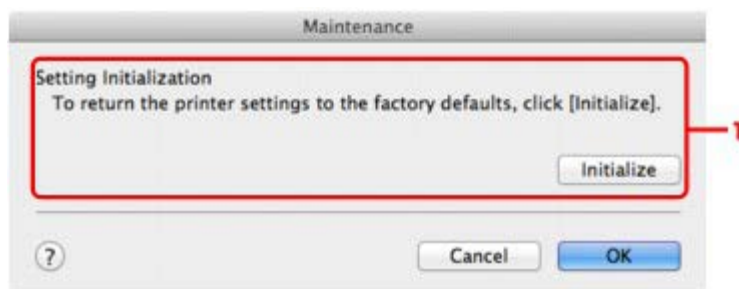

- Note that initialization erases all network settings on the printer, and printing operation from a computer over network may become impossible. To use the printer over network, setup with the Setup CD-ROM.

1. Start up IJ Network Tool.

➡ Starting up IJ Network Tool

2. Select the printer in **Printers:**.

3. Select **Maintenance** from the **Settings:** menu.

1. Setting Initialization

Initialize

Reverts all the network settings of the printer to factory default.

4. Click **Initialize**.

The **Setting Initialization** screen is displayed.

Click **OK** to initialize the network settings of the printer. Do not turn off the printer during initialization.

Click **OK** when initialization is complete.

Performing initialization when connected over wireless LAN will break the connection, so setup with the Setup CD-ROM.

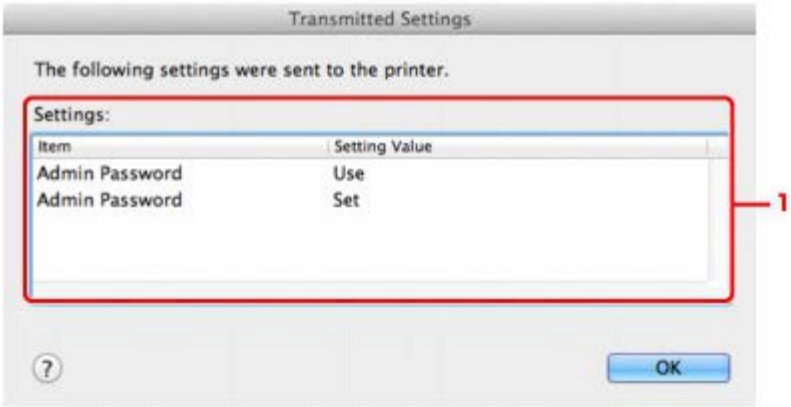

Note

- You can change the network settings of the printer using IJ Network Tool with USB connection after initializing the LAN settings. To change the network settings using IJ Network Tool, activate Wireless LAN in advance.
Follow the procedure below to activate Wireless LAN:
 - To activate wireless LAN:
 - Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 10 times.
 - Release the **RESUME/CANCEL** button.
The **Wi-Fi** lamp is lit.
 - To activate wired LAN:
 - Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 11 times.
 - Release the **RESUME/CANCEL** button.

N020

Viewing the Modified Settings

The **Confirmation** screen is displayed when you modified the printer settings on the **Configuration** screen. When you click **OK** on the **Confirmation** screen, the following screen is displayed for confirming the modified settings.

1. Settings:

A list of changes made in the **Configuration** screen is displayed.

Printing Out Network Setting Information

You can print out the network settings of the printer such as its IP address and SSID.

 **Important**

- This print out contains valuable information about your computer. Handle it with care.

1. Make sure that the printer is turned on.
➡ Confirming that the Power Is On
2. Load a sheet of A4 or Letter-sized plain paper.
➡ Loading Paper
3. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 6 times.
4. Release the **RESUME/CANCEL** button.

The printer starts printing the network setting information.
The following information on the printer's network setting is printed out.

Item	Explanations of the item	Setting
Wireless LAN	Wireless LAN	Enable/Disable
Connection	Status of the Wireless LAN	Active/Inactive
MAC Address	MAC Address	XX:XX:XX:XX:XX:XX
SSID	SSID	SSID of the wireless LAN
Communication Mode	Communication Mode	Infrastructure
Channel	Channel	XX (1 to 13)
Encryption	Method of the Encryption	none/WEP/TKIP/AES
WEP Key Length	WEP Key Length	Inactive/128/64
Authentication	Method of the Authentication	none/auto/open/shared/WPA-PSK/WPA2-PSK
Signal Strength	Signal Strength	0 to 100 [%]
TCP/IP Version	TCP/IP Version	IPv4 & IPv6/IPv4
IPv4 IP Address	Selected IP Address (IPv4)	XXX.XXX.XXX.XXX
IPv4 Default Gateway	Default Gateway (IPv4)	XXX.XXX.XXX.XXX
Subnet Mask	Subnet Mask	XXX.XXX.XXX.XXX
IPv6 IP Address *1	Selected IP Address (IPv6)	XXXX:XXXX:XXXX:XXXX XXXX:XXXX:XXXX:XXXX
IPv6 Default Gateway *1	Default Gateway (IPv6)	XXXX:XXXX:XXXX:XXXX XXXX:XXXX:XXXX:XXXX
Subnet Prefix	Subnet Prefix Length	XXX

Length*1		
IPsec*2	IPsec setting	Active
Security Protocol*2	Method of the Security Protocol	ESP/ESP & AH/AH
WPS PIN CODE	WPS PIN code	XXXXXXXX
Wireless LAN DRX	Discontinuous reception (wireless LAN)	Enable/Disable
Wired LAN	Wired LAN	Enable/Disable
Connection	Status of the Wired LAN	Active/Inactive
MAC Address	MAC Address	XX:XX:XX:XX:XX:XX
TCP/IP Version	TCP/IP Version	IPv4 & IPv6/IPv4
IPv4 IP Address	Selected IP Address (IPv4)	XXX.XXX.XXX.XXX
IPv4 Default Gateway	Default Gateway (IPv4)	XXX.XXX.XXX.XXX
Subnet Mask	Subnet Mask	XXX.XXX.XXX.XXX
IPv6 IP Address *1	Selected IP Address (IPv6)	XXXX:XXXX:XXXX:XXXX XXXX:XXXX:XXXX:XXXX
IPv6 Default Gateway *1	Default Gateway (IPv6)	XXXX:XXXX:XXXX:XXXX XXXX:XXXX:XXXX:XXXX
Subnet Prefix Length*1	Subnet Prefix Length	XXX
IPsec*2	IPsec setting	Active
Security Protocol*2	Method of the Security Protocol	ESP/ESP & AH/AH
Wired LAN DRX	Discontinuous reception (wired LAN)	Enable/Disable
Other Settings	Other settings	-
Printer Name	Printer name	Printer name (Up to 15 characters)
WSD	WSD setting	Enable/Disable
WSD Timeout	Timeout	1/5/10/15/20 [min]
LPR Protocol	LPR protocol setting	Enable/Disable
Bonjour	Bonjour setting	Enable/Disable
Bonjour Service Name	Bonjour service name	Bonjour service name (Up to 52 characters)
IP Address Filtering	IP Address Filtering	Enable/Disable

("XX" represents alphanumeric characters.)

*1 Only when IPv6 is activated, the status of the network is printed.

*2 Only IPv6 and the IP sec setting are activated, the status of the network is printed.

N041

Forgot an Access Point Name, SSID, or a Network Key

➡ Cannot Connect with an Access Point to Which a WEP/WPA/WPA2 Key Is Set (You Forgot the WEP/WPA/WPA2 Key)

➡ How to Set a WEP/WPA/WPA2 Key

Cannot Connect with an Access Point to Which a WEP/WPA/WPA2 Key Is Set (You Forgot the WEP/WPA/WPA2 Key)

For information on how to set up the access point, refer to the instruction manual provided with the access point or contact its manufacturer. Make sure that the computer and the access point can communicate with each other, then set up the printer to match the settings of the access point.

How to Set a WEP/WPA/WPA2 Key

Refer to the instruction manual provided with the access point or contact its manufacturer and check the access point settings. Make sure that the computer and the access point can communicate with each other, then set up the printer to match the settings of the access point.

- **When using WEP**

The key length, key format, the key to use (one of 1 to 4), and the authentication method must match among the access point, the printer, and the computer.

In order to communicate with an access point that uses automatically generated WEP keys, you must configure the printer to use the key generated by the access point by entering it in hexadecimal format.

Normally, select **Auto** for the authentication method. Otherwise, select **Open System** or **Shared Key** according to the setting of the access point.

When the **WEP Details** screen appears after clicking **Set** on the **Access Points** screen, follow the on-screen instructions and set the key length, the key format, the key number, and the authentication to enter a WEP key.

For details, see [Changing the WEP Detailed Settings](#).

Note

- When the printer is connected to an AirPort Base Station via a LAN:
When the printer is connected to an AirPort Base Station via a LAN, confirm the settings in **Wireless Security of AirPort Utility**.
 - Select **64 bit** if **WEP 40 bit** is selected for the key length in the AirPort Base Station.
 - Select **1** for **Key ID**:. Otherwise your computer will not be able to communicate with the printer via the access point.

- **When using WPA or WPA2**

The authentication method, passphrase, and dynamic encryption type must match on the access point, the printer, and the computer.

Enter the passphrase configured on the access point (a sequence of between 8 and 63 alphanumeric characters, or a 64-character hexadecimal number).

Select either **TKIP (Basic Encryption)** or **AES (Secure Encryption)** for the dynamic encryption method.

For details, see [Changing the WPA or WPA2 Detailed Settings](#).

Note

- This printer supports WPA-PSK (WPA-Personal) and WPA2-PSK (WPA2-Personal).
-

[Page top ▲](#)

N042

The Printer Stopped Working Suddenly

- ➡ Cannot Communicate with the Printer over the Wireless LAN
- ➡ Cannot Communicate with the Printer over the Wired LAN
- ➡ Cannot Print from a Computer Connected to the Network

Cannot Communicate with the Printer over the Wireless LAN

- **Check 1: Make sure that the printer is turned on.**
- **Check 2: Make sure that the network settings in the printer are identical with those of the access point.**

Refer to the instruction manual provided with the access point or contact its manufacturer to check the access point settings, and then modify the printer settings.

➡ [How to Set a WEP/WPA/WPA2 Key](#)

- **Check 3: Make sure that the printer is not place as far away from the access point.**

The access point is located indoors within the effective range for wireless communication. Locate the printer within 164 ft. / 50 m from the access point.

- **Check 4: Make sure that there is no obstruction.**

Wireless communication between different rooms or floors is generally poor. Adjust the location of the devices.

- **Check 5: Make sure that there is no source of radio wave interference in your vicinity.**

There may be a device such as a microwave oven using the same frequency bandwidth as the wireless station. Place the wireless devices as far away from the interference source as possible.

- **Check 6: Make sure that the network settings of the computer are correct.**

For the procedures to connect a network device to the computer and set them up, refer to the instruction manual of your network device or contact its manufacturer.

- **Check 7: Make sure that the radio status is good and adjust the installation positions while monitoring the radio status with IJ Network Tool.**

➡ [Monitoring Wireless Network Status](#)

- **Check 8: Make sure that the valid wireless channel is used.**

The wireless channel to be used may be limited depending on wireless network devices installed in the computer. Refer to the instruction manual provided with your computer or your wireless network device to specify the valid wireless channel.

- **Check 9: Make sure that the channel set to the access point is valid to communicate with the computer, confirmed in Check 8.**

If not, change the channel set to the access point.

- **Check 10: Make sure that the firewall of the security software is disabled.**

If the firewall function of your security software is turned on, a message may appear warning

that Canon software is attempting to access the network. If the warning message appears, set the security software to always allow access.

If using any programs that switch the network environment, check their settings. Some programs will enable a firewall by default.

- **Check 11: When using a router, connect the printer and computer to the LAN side (same network segment).**
- **Check 12: When the printer is connected to an AirPort Base Station via a LAN, use alphanumeric characters for the name of the network (SSID).**

If the problem is not resolved, insert the CD-ROM in the DVD/CD-ROM drive on your computer to start setting up again, or access our web site through the Internet and download the latest MiniMasterSetup for your model.

- **For placement:**

Make sure that there is no barrier or obstacle between the access point and the printer.

Cannot Communicate with the Printer over the Wired LAN

- **Check 1: Make sure that the printer is turned on.**
- **Check 2: Make sure that the LAN cable is connected properly.**

Make sure that the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

If the LAN cable is connected to the WAN side of the router, the cable is connected to the LAN side of the router.

If the problem is not resolved, insert the CD-ROM in the DVD/CD-ROM drive on your computer to start setting up again, or access our web site through the Internet and download the latest MiniMasterSetup for your model.

Cannot Print from a Computer Connected to the Network

- **Check 1: Make sure that the network settings of the computer are correct.**

For the procedures to set up the computer, refer to the instruction manual of your computer or contact its manufacturer.

- **Check 2: If the printer driver is not installed, install the printer driver.**

Install the printer driver with the Setup CD-ROM.

- **Check 3: Make sure that access control is not set to the access point.**

For the procedures to connect an access point and set it up, refer to the instruction manual of your access point or contact its manufacturer.

Note

- To check the MAC address or the IP address of the computer, see [Checking the IP Address or the MAC Address of the Computer](#).

N043

The Message Is Displayed on the Computer Screen During Setup

- ➡ The **Enter Password** Screen Is Displayed During Setup
- ➡ The Screen for Setting the Encryption Is Displayed After Selecting the Access Point in the **Access Points** Screen
- ➡ "You are connecting the printer to the non encrypted wireless network" Is Displayed

The Enter Password Screen Is Displayed During Setup

The following screen is displayed if an administrator password is set to the printer which has already been set up.

Enter the administrator password you have set.

- ➡ [Changing the Settings in the Admin Password Sheet](#)

The Screen for Setting the Encryption Is Displayed After Selecting the Access Point in the Access Points Screen

This screen is displayed automatically if the selected access point is encrypted. In this case, configure the details to use the same encryption settings set to the access point.

For information on the encryption settings, see [Changing the Settings in the Wireless LAN Sheet](#).

"You are connecting the printer to the non encrypted wireless network" Is Displayed

Security is not configured on the access point. The printer can still be used, so continue the setup procedure to complete it.

Important

- If you connect to a network that is not protected with security measures, there is a risk of disclosing data such as your personal information to a third party.

N046

Printing Speed Is Slow

- **Check 1: The printer may be printing out a large job issued from another computer.**
- **Check 2: Make sure that the radio status is good and adjust the installation positions while monitoring the radio status with IJ Network Tool.**

➡ Monitoring Wireless Network Status

Make sure that there is no barrier or obstacle between the access point and the printer. Wireless communication between different rooms or floors is generally poor. The metal, concrete, or timber including the metallic material, mud wall, or insulator may interrupt a wireless communication. If the printer cannot communicate with the computer over a Wireless LAN for the wall material, place the printer and the computer in the same room or floor.

- **Check 3: When using wireless LAN, make sure that there is no source of interference in your vicinity.**

Since a device such as a microwave oven uses the same frequency bandwidth, it may cause interference. Place the wireless devices as far away from the source of interference as possible.

Checking Information about the Network

- ➡ Checking the IP Address or the MAC Address of the Printer
- ➡ Checking the IP Address or the MAC Address of the Computer
- ➡ Checking If the Computer and the Printer, or Computer and the Access Point Can Communicate
- ➡ Checking the Network Setting Information

Checking the IP Address or the MAC Address of the Printer

To check the IP address or the MAC address of the printer, print out the network setting information.

➡ Printing Out Network Setting Information

To display the network setting information using IJ Network Tool, select **Network Information** on the **View** menu.

➡ Canon IJ Network Tool Menus

Checking the IP Address or the MAC Address of the Computer

To check the IP address or MAC address assigned to the computer, follow the procedure below.

- 1. Select System Preferences from the Apple menu, then click Network.**
- 2. Make sure that the network interface you are using on your computer is selected, then click Advanced.**
 - In Mac OS X v.10.7.x:
When you are using wireless LAN on your computer, make sure that **Wi-Fi** is selected as the network interface. When you are using wired LAN, make sure that **Ethernet** is selected.
 - In Mac OS X v.10.6.x or Mac OS X v.10.5.8:
When you are using wireless LAN on your computer, make sure that **AirMac** is selected as the network interface. When you are using wired LAN, make sure that **Ethernet** is selected.
- 3. Confirm the IP address or MAC address.**
 - In Mac OS X v.10.7.x:
Click **TCP/IP** to confirm the IP address.
Click **Hardware** to confirm the MAC address.
 - In Mac OS X v.10.6.x or Mac OS X v.10.5.8:
Click **TCP/IP** to confirm the IP address.
Click **Ethernet**, then see **Ethernet ID** to confirm the MAC address.

Checking If the Computer and the Printer, or Computer and the Access Point Can Communicate

To check that communication is available, perform the ping test.

- 1. Open the Utilities folder in the Applications folder.**

2. Start Network Utility.

3. Click the Ping button.

4. Make sure that Send only XX pings (XX are numbers) is selected.

5. Enter the IP address of the target printer or the target access point in Enter the network address to ping..

When using the OS other than Mac OS X v.10.6.x, enter the IP address of the target printer or the target access point in **Please enter the network address to ping.**

6. Click Ping.

"XXX.XXX.XXX.XXX" is the IP address of the target device.

A message such as the following is displayed.

64 bytes from XXX.XXX.XXX.XXX: icmp_seq=0 ttl=64 time=3.394 ms

64 bytes from XXX.XXX.XXX.XXX: icmp_seq=1 ttl=64 time=1.786 ms

64 bytes from XXX.XXX.XXX.XXX: icmp_seq=2 ttl=64 time=1.739 ms

--- XXX.XXX.XXX.XXX ping statistics ---

3 packets transmitted, 3 packets received, 0% packet loss

If the packet loss is 100%, the communication is not available. Otherwise, the computer is communicating with the target device.

Checking the Network Setting Information

To check the IP address or the MAC address of the printer, print out the network setting information.

➡ **Printing Out Network Setting Information**

How to Restore the Printer's Network Settings to Factory Default

Important

- Note that initialization erases all network settings on the printer, and printing operation from a computer over network may become impossible. To use the printer over network, setup with the Setup CD-ROM.
- Before initializing the network settings, connect your computer and the printer with a USB cable.

Follow the procedure below to initialize the network settings.

1. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 9 times.
2. Release the **RESUME/CANCEL** button.

The network settings are initialized.

[Page top](#) ▲

N053

Uninstalling IJ Network Tool

Follow the procedure below to uninstall IJ Network Tool from your computer.

Important

- Even if IJ Network Tool is uninstalled, you can print over network. However, you cannot change the network settings over network.

1. Select **Applications** from the **Go** menu of Finder, double-click **Canon Utilities > IJ Network Tool**, drag the **Canon IJ Network Tool** icon into the **Trash**.

2. Restart the computer.

Empty the **Trash**. and restart your computer.

Note

- To reinstall IJ Network Tool, uninstall IJ Network Tool, then install it again with the Setup CD-ROM.

U046

Cannot Use the Printer on Replacing an Access Point or Changing Its settings

When you replace an access point, perform network setup of the printer again.

To perform network setup again, access our web site through the Internet and download the latest MiniMasterSetup for your model.

If the problem is not resolved, see below.

➡ Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering a WEP/WPA/WPA2 Key to the Access Point

➡ When Encryption Is Enabled, Cannot Communicate With the Printer After the Encryption Type Was Switched on the Access Point

Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering a WEP/WPA/WPA2 Key to the Access Point

- **Check 1: Confirm the access point setting.**

Refer to the instruction manual provided with the access point or contact its manufacturer to confirm the access point setting. Make sure that the computer and the access point can communicate with each other under this setting.

- **Check 2: If you are performing MAC address filtering or IP address filtering at the access point, confirm that the MAC address or IP address for both the computer or the network device and the printer are registered.**

- **Check 3: If you are using a WEP/WPA/WPA2 key, make sure that the key for the computer or the network device and the printer matches that set to the access point.**

Besides the WEP key itself, the key length, key format, the key ID to use, and the authentication method must match among the printer, the access point, and the computer.

Normally, select **Auto** for the authentication method. If you want to specify the method manually, select **Open System** or **Shared Key** according to the setting of the access point.

➡ How to Set a WEP/WPA/WPA2 Key

When Encryption Is Enabled, Cannot Communicate With the Printer After the Encryption Type Was Switched on the Access Point

If the printer cannot communicate with the computer after the encryption type of the printer was switched, make sure that encryption types for the computer and the access point matches that set to the printer.

➡ Cannot Communicate with the Printer After Applying MAC/IP Address Filtering or Entering a WEP/WPA/WPA2 Key to the Access Point

N021

Cannot Detect the Printer with the Wireless LAN: Check 1

Are the computer and network device (router, access point, etc.) configured and can the computer connect to the network?

Make sure that you can view any web pages on your computer.

If you cannot view any web pages:

Configure the computer and network device.

For the procedures, refer to the instruction manuals supplied with the computer and network device, or contact their manufacturers.

If you can view any web page after configuring the computer and network device, try to set up the network communication from the beginning.

If you can view any web page:

Go to check 2.

➡ [Cannot Detect the Printer with the Wireless LAN: Check 2](#)

Page top ▲

N040

Cannot Detect the Printer with the Wireless LAN: Check 2

Does the firewall function of your security software or operation system for computer interfere with setting up the network communication?

The firewall function of your security software or operation system for computer may limit communications between the printer and your computer. Confirm the setting of firewall function of your security software or operation system or the message appearing on your computer.

If the firewall function interferes with setting up:

- **When the message appears on your computer:**

If the message warning that Canon software is attempting to access the network appears on the computer, set the security software to allow access.

- **When the message does not appear on your computer:**

Cancel to set up, then set the security software to allow Canon software* to access the network.

* Set the security software to allow **Setup.app**, **Canon IJ Network Tool.app**, **canonijnetwork.bundle**, **CIJScannerRegister.app**, and **CNNSelectorAgent.app** to access the network.

After setting the security software, try to set up the network communication from the beginning.

Note

- For the operation system firewall settings or the security software firewall settings, refer to the instruction manual of the computer or software, or contact its manufacturer.

If there is no problem with the firewall settings:

Go to check 3.

➡ [Cannot Detect the Printer with the Wireless LAN: Check 3](#)

N052

Cannot Detect the Printer with the Wireless LAN: Check 3

Check the settings of the access point.

Check the settings of the access point for the network connection such as IP address filtering, MAC address filtering, or DHCP function.

For details on how to check the settings of the access point, refer to the instruction manual supplied with the access point or contact its manufacturer.

U029

Cannot Detect the Printer with the Wired LAN: Check 1

Is the LAN cable connected, and are the printer and the router turned on?

Make sure that the LAN cable is connected.

Make sure that the printer is turned on.

➡ Confirming that the Power Is On

Make sure that the router is turned on.

If the LAN cable is connected and the printer or the network device is turned off:

Turn on the printer or the network device.

After turning on the printer or the network device, it may take some time until ready for use. After a while just turning on the printer or the network device, click **Redetect** on the **Set Up New Printer** screen.

When the printer is detected, follow the instructions on the screen to continue to set up the network communication.

If the LAN cable is connected and the printer and the network device are turned on:

If the printer and the network device are turned on or if the printer could not be detected after clicking **Redetect**, go to check 2.

➡ Cannot Detect the Printer with the Wired LAN: Check 2

U034

Cannot Detect the Printer with the Wired LAN: Check 2

Are the computer and the router configured and can the computer connect to the network?

Make sure that you can view any web pages on your computer.

If you cannot view any web pages:

Click **Cancel** on the **Set Up New Printer** screen to cancel to set up the network communication.
After that, configure the computer and network device.

For the procedures, refer to the instruction manuals supplied with the computer and network device, or contact their manufacturers.

If you can view any web page after configuring the computer and network device, try to set up the network communication from the beginning.

If you can view any web page:

Go to check 3.

U037

Cannot Detect the Printer with the Wired LAN: Check 3

Activate the wired LAN setting of the printer.

Follow the procedure below to activate the wired LAN.

1. Press and hold the RESUME/CANCEL button until the POWER lamp flashes 11 times.
2. Release the RESUME/CANCEL button.

Note

- To check whether the wired LAN is activated, print out the network setting information.
➡ [Printing Out Network Setting Information](#)

U102

Cannot Communicate with the Printer with USB Connection

- **Check 1: Make sure that the printer is turned on.**
- **Check 2: Make sure that the USB cable is connected properly.**
See [Connecting the Printer to the Computer Using a USB Cable](#) to connect the USB cable properly.
- **Check 3: Do not start up IJ Network Tool while printing.**
- **Check 4: Do not print while IJ Network Tool is running.**

[Page top](#) ▲

U057

The Printer Cannot Be Detected in the Wireless LAN

- **Check 1: Make sure that the printer is turned on.**
- **Check 2: Make sure that the Wi-Fi lamp is lit on the front side of the printer.**

If **Wi-Fi** lamp is off, Wireless LAN is inactive. Follow the procedure below to activate Wireless LAN.

1. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 10 times.
2. Release the **RESUME/CANCEL** button.

The **Wi-Fi** lamp is lit.

- **Check 3: Make sure that the USB cable is connected properly.**

When the printer is connected to the computer temporarily using a USB cable to change the wireless LAN settings, connect the printer and the computer securely seeing [Connecting the Printer to the Computer Using a USB Cable](#).

- **Check 4: Make sure that the printer setup is completed.**

If not, setup with the Setup CD-ROM.

- **Check 5: When using IJ Network Tool, click Update to search for the printer again.**

➡ [Canon IJ Network Tool Screen](#)

- **Check 6: Make sure that the network settings in the printer are identical with those of the access point.**

Refer to the instruction manual provided with the access point or contact its manufacturer to check the access point settings, and then modify the printer settings.

➡ [How to Set a WEP/WPA/WPA2 Key](#)

- **Check 7: Make sure that there is no obstruction.**

Wireless communication between different rooms or floors is generally poor. Adjust the location of the devices.

- **Check 8: Make sure that the printer is not place as far away from the access point.**

The access point is located indoors within the effective range for wireless communication. Locate the printer within 164 ft. / 50 m from the access point.

- **Check 9: Make sure that there is no source of radio wave interference in your vicinity.**

There may be a device such as a microwave oven using the same frequency bandwidth as the wireless station. Place the wireless devices as far away from the interference source as possible.

- **Check 10: Make sure that the network settings of the computer are correct.**

Make sure that the computer can communicate with the printer and the access point over the wireless LAN.

- **Check 11: Make sure that the firewall of the security software is disabled.**

If the firewall function of your security software is turned on, a message may appear warning that Canon software is attempting to access the network. If the warning message appears, set the security software to always allow access.

If using any programs that switch the network environment, check their settings. Some programs will enable a firewall by default.

- **Check 12: When using a router, connect the printer and computer to the LAN side (same network segment).**
- **Check 13: When the printer is connected to an AirPort Base Station via a LAN, use alphanumeric characters for the name of the network (SSID).**

If the problem is not resolved, insert the CD-ROM in the DVD/CD-ROM drive on your computer to start setting up again, or access our web site through the Internet and download the latest MiniMasterSetup for your model.

U103

The Printer Cannot Be Detected in the Wired LAN

- **Check 1: Make sure that the printer is turned on.**
- **Check 2: Is the wired LAN setting of the printer activated?**

To check whether the wired LAN is activated, print out the network setting information.

➡ [Printing Out Network Setting Information](#)

If the wired LAN is inactive, follow the procedure below to activate the wired LAN.

1. Press and hold the **RESUME/CANCEL** button until the **POWER** lamp flashes 11 times.
2. Release the **RESUME/CANCEL** button.

- **Check 3: Make sure that the LAN cable is connected properly.**

Make sure that the printer is connected to the router with the LAN cable. If the LAN cable is loose, connect the cable properly.

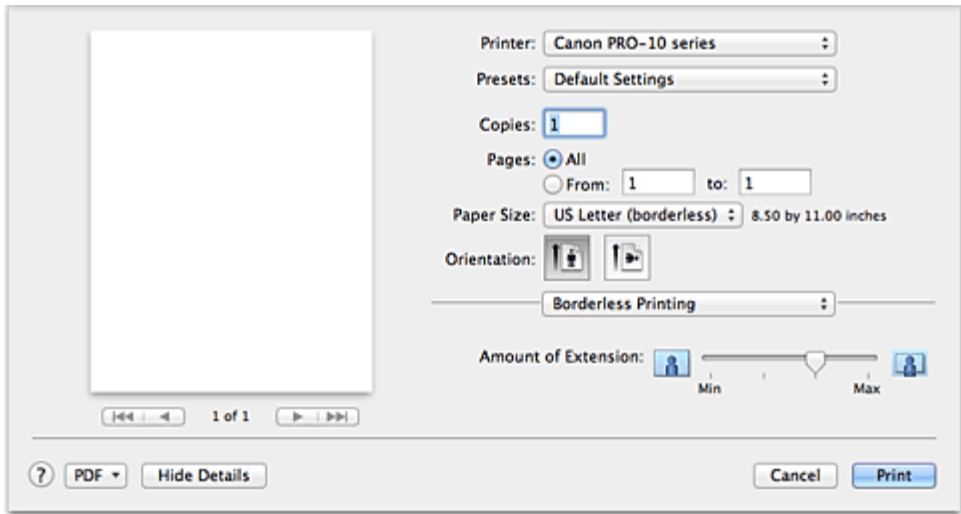

If the LAN cable is connected to the WAN side of the router, the cable is connected to the LAN side of the router.

P705

Borderless Printing

This dialog allows you to adjust the amount of the document that extends off the paper when borderless printing is performed.

Amount of Extension

Use the **Amount of Extension** slider to adjust the amount of the document that extends off the paper. Moving the slider to the right makes the amount larger and moving the slider to the left makes the amount smaller.

Related Feature

- Execute Borderless Printing

P028

Aligning the Print Head Position from Your Computer

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

This printer supports two head alignment methods: automatic head alignment and manual head alignment. Normally, the printer is set for automatic head alignment.

If the printing results of automatic print head alignment are not satisfactory, see "[Aligning the Print Head Position Manually from Your Computer](#)," and perform manual head alignment.

The procedure for performing automatic print head alignment is as follows:

Note

- If the inner cover is open, close it.
- The pattern is printed only in black and blue.

Print Head Alignment

1. Select **Test Print** from the pop-up menu on the [Canon IJ Printer Utility](#)
2. Click the **Print Head Alignment** icon

A message is displayed.

3. Load paper in the printer

Load two sheets of A4 size or Letter size plain paper into the rear tray.

Note

- Depending on the condition of the printer, you may need to use 3 sheets of A4 size or Letter size plain paper.
- The number of sheets to be used differs when you select the manual head alignment.

4. Execute head alignment

Make sure that the printer is on and click **Align Print Head**.
Print head alignment starts.

Important

- Do not open the top cover while printing is in progress.

Note

- Wait until printing ends before performing other operations. Printing takes about 5 to 6 minutes to complete.
- After head alignment is completed, you can print and check the current setting. To do so, click the **Print Head Alignment** icon and when the message is displayed, click **Print Alignment Value**.

P103

Aligning the Print Head Position Manually from Your Computer

Print head alignment corrects the installation positions of the print head and improves deviated colors and lines.

This printer supports two head alignment methods: automatic head alignment and manual head alignment. Normally, the printer is set for automatic head alignment.

If the printing results of automatic print head alignment are not satisfactory, perform manual head alignment.

The procedure for performing manual print head alignment is as follows:

Note

- If the inner cover is open, close it.
- The pattern is printed only in black and blue.

Print Head Alignment

1. Select **Custom Settings** from the pop-up menu on the [Canon IJ Printer Utility](#)
2. Switch head alignment to manual
Check the **Align heads manually** check box.
3. Apply the settings
Click **Apply** and when the confirmation message appears, click **OK**.
4. Select **Test Print** from the pop-up menu on the Canon IJ Printer Utility
5. Click the **Print Head Alignment** icon
A message is displayed.
6. Load paper in the printer
Load three sheets of A4 size or Letter size plain paper into the rear tray.

Note

- Depending on the condition of the printer, you may need to use 4 sheets of A4 size or Letter size plain paper.

7. Execute head alignment

Make sure that the printer is on and click **Align Print Head**.
The first pattern is printed.

Important

- Do not open the top cover while printing is in progress.

8. Check the printed pattern

Enter the numbers of the patterns with the least amount of streaks in the associated boxes, and click **OK**.

Note

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical white streaks.

(A)

(B)

(A) Least noticeable vertical white streaks

(B) Most noticeable vertical white streaks

9. Confirm the displayed message and click **OK**

The second pattern is printed.

Important

- Do not open the top cover while printing is in progress.

10. Check the printed pattern

Enter the numbers of the patterns with the least amount of streaks in the associated boxes, and click **OK**.

Note

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical white streaks.

(A)

(B)

(A) Least noticeable vertical white streaks

(B) Most noticeable vertical white streaks

11. Confirm the displayed message and click **OK**

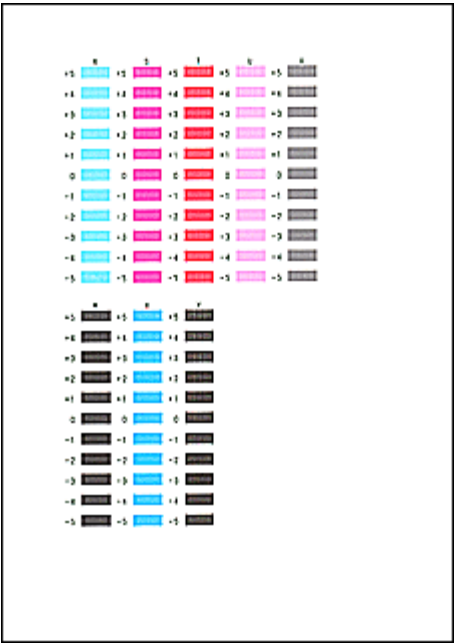

The third pattern is printed.

Important

- Do not open the top cover while printing is in progress.

12. Check the printed pattern

Enter the numbers of the patterns with the least amount of streaks in the associated boxes, and click **OK**.

 **Note**

- If it is difficult to pick the best pattern, pick the setting that produces the least noticeable vertical white streaks.

(A)

(B)

- (A) Least noticeable vertical white streaks
- (B) Most noticeable vertical white streaks

13. To execute remaining adjustments

If a confirmation message is displayed, click **OK**.

 **Note**

- After head alignment is completed, you can print and check the current setting. To do so, click the **Print Head Alignment** icon and when the message is displayed, click **Print Alignment Value**.

Instructions for Use (Printer Driver)

This printer driver is subject to the following restrictions. Keep the following points in mind when using the printer driver.

Restrictions on the Printer Driver

- When you set up the Page Setup dialog, be sure to begin by selecting the model you are using from the **Format For** list. If you select another printer, printing may not be performed properly.
- If the Canon IJ Printer Utility does not display the remaining ink level in the **Ink Level Information**, check whether the print head and the ink tank are properly installed.
- When the Canon IJ Printer Utility displays the **Ink Level Information**, close the cover of the printer.
- The following functions cannot be used in Mac OS, though they can be used in Windows computers.
 - Duplex Printing
 - Booklet Printing
 - Tiling/Poster Printing
- Depending on the application software that you are using, a preview may not be displayed on the left side of the Print dialog.
- Do not start up the Canon IJ Network Tool while printing.
- Do not print when the Canon IJ Network Tool is running.
- If you connect this printer and AirPort with a USB cable and print, you must install the latest AirPort firmware.

Notes on Adding a Printer

- If you will be installing the Canon printer driver on Mac OS X and using the printer through a network connection, you can select **Bonjour** or **Canon IJ Network** in the **Add Printer** dialog. Canon recommends you to use **Canon IJ Network** for printing. If **Bonjour** is selected, remaining ink level messages may differ from those indicated by **Canon IJ Network**.

Points to Note About Applications with Restrictions

- When you create a new document with Microsoft Word 2004 for Mac, a paper size other than A4 size or Letter size may be set. Check the **Paper Size** on the Print dialog.

P000

Printing with Easy Setup

The simple setup procedure for carrying out appropriate printing on this printer, is as follows:

1. Check that the printer is turned on

➡ Confirming that the Power Is On

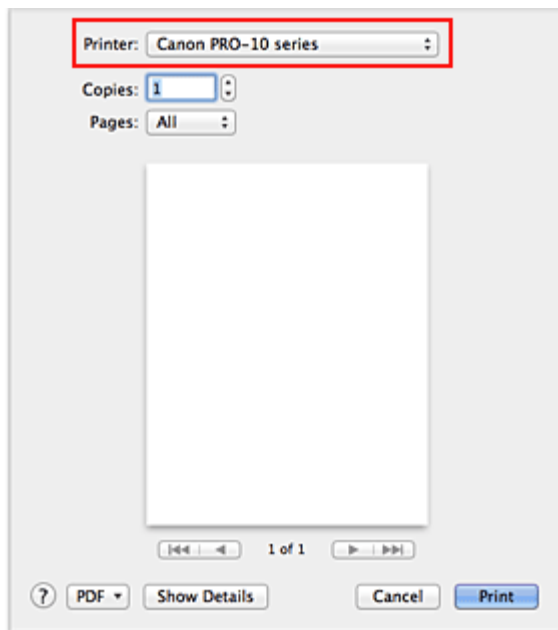

2. Load paper on the printer

➡ Loading Paper

3. Select the printer

Select your model from the **Printer** list in the Print Dialog.

➡ Print Dialog

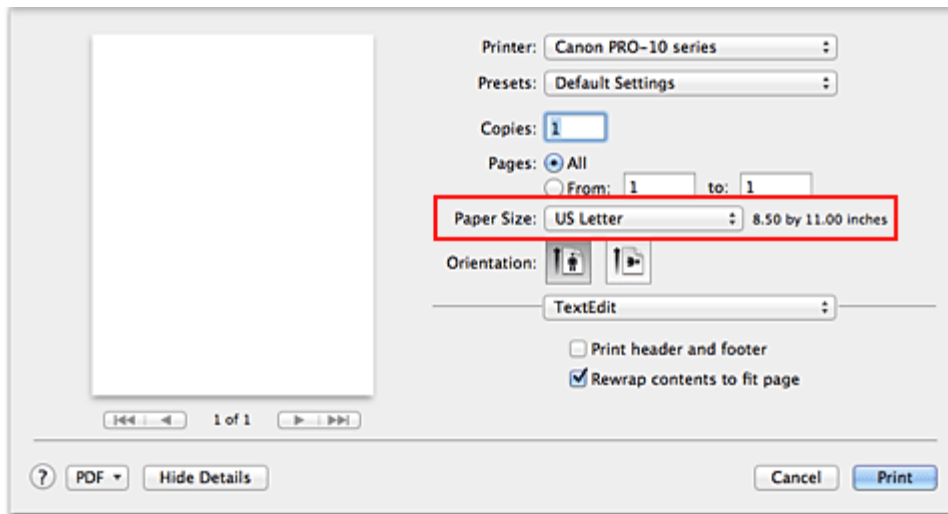

Note

- Click **Show Details** (the disclosure triangle) to switch the Setup window to the detailed display.

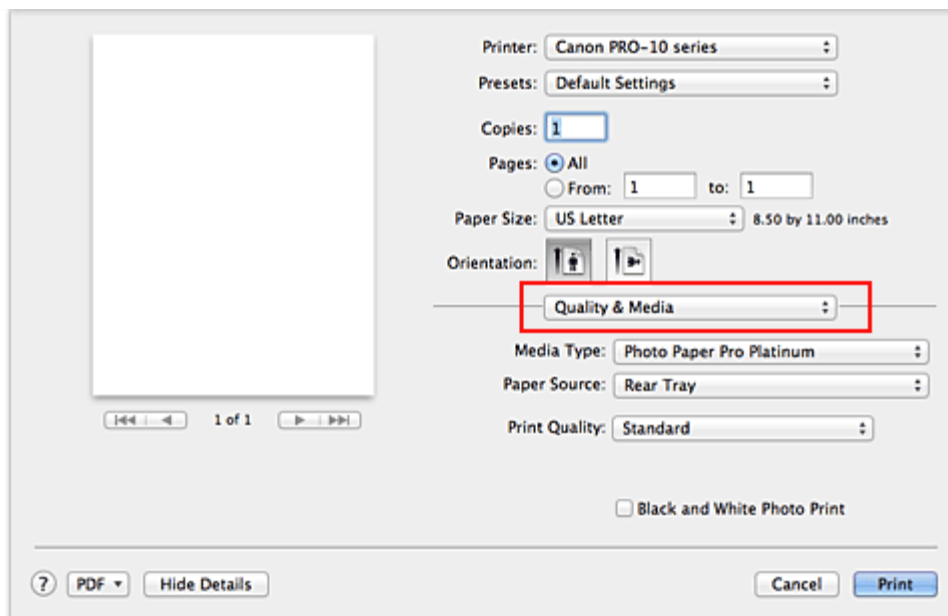

4. Select the paper size

For **Paper Size**, select the paper size to be used.

If necessary, set the number of copies, the pages to be printed, and the orientation.

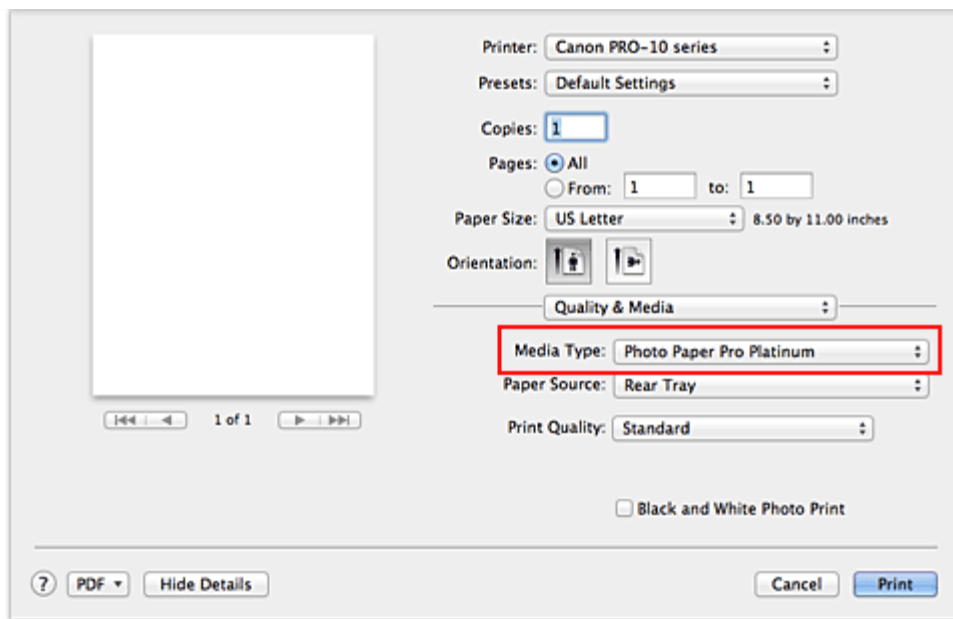

5. Select **Quality & Media** from the pop-up menu

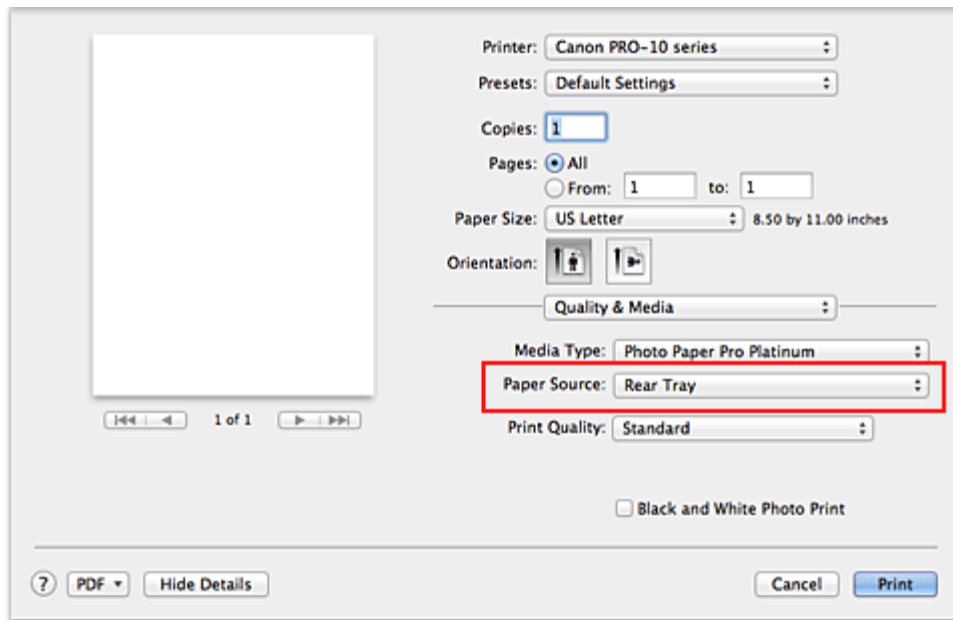

6. Select the media type

For **Media Type**, select the same paper type loaded in the printer.

7. Select the paper source

Select **Manual Feed** or **Rear Tray** that matches your purpose for **Paper Source**.

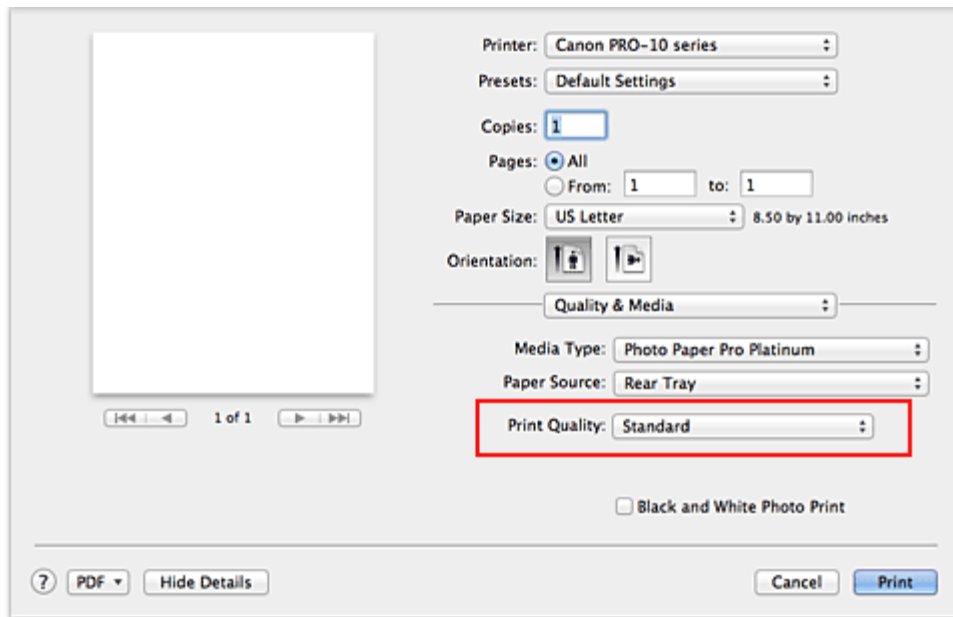

Important

- The paper source settings that can be selected may differ depending on the paper type and size.

8. Select the print quality

For **Print Quality**, select **High**, **Standard**, or **Fast**, according to your purpose.

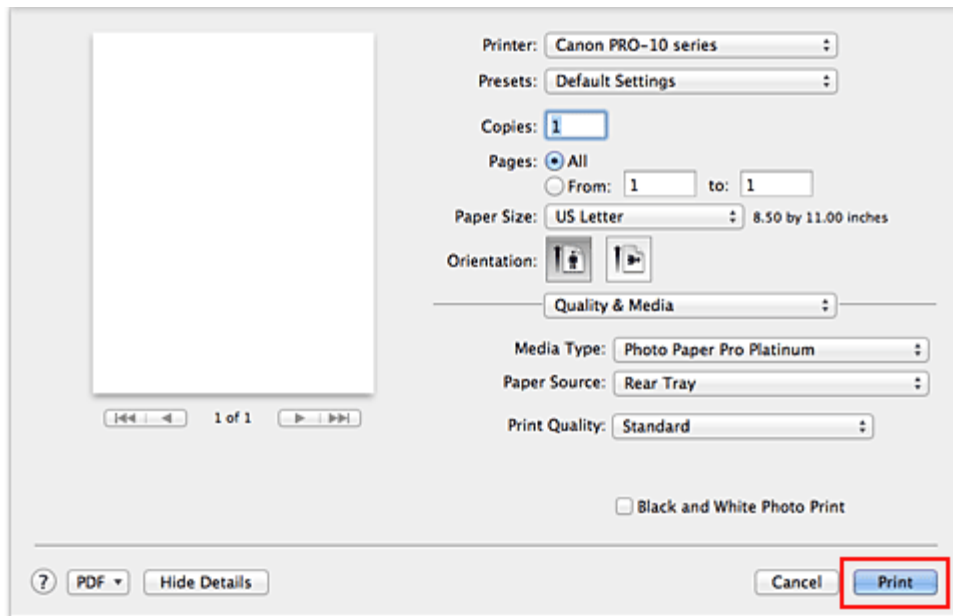

Important

- Certain print quality levels cannot be selected depending on the settings of **Media Type**.

9. Complete the setup

Click **Print**.

When you execute print, the document will be printed in accordance with the type and size of the media.

Important

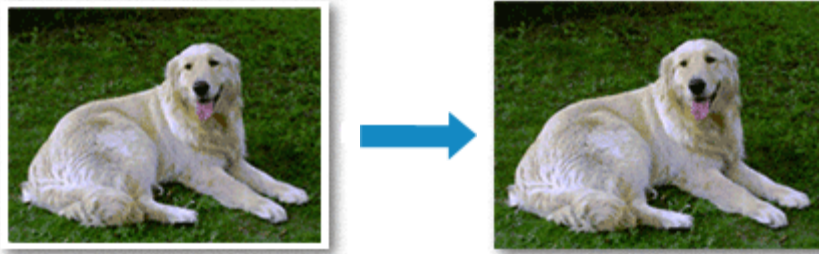

- In the **Presets** section, click **Save Current Settings as Preset... (Save As...)** to register the specified settings.
 - ➡ **Registering a Changed Printing Profile**
- To print on canvas paper, follow the instructions displayed on the screen.

P003

Execute Borderless Printing

The borderless printing function allows you to print data without any margin by enlarging the data so that it extends slightly off the paper. In standard printing, margins are created around the document area. However, in borderless printing function, these margins are not created. When you want to print data such as a photo without providing any margin around it, set borderless printing.

The procedure for performing borderless printing is as follows:

Setting Borderless Printing

1. Click **Show Details** (▾ (the disclosure triangle)) in the **Print Dialog**

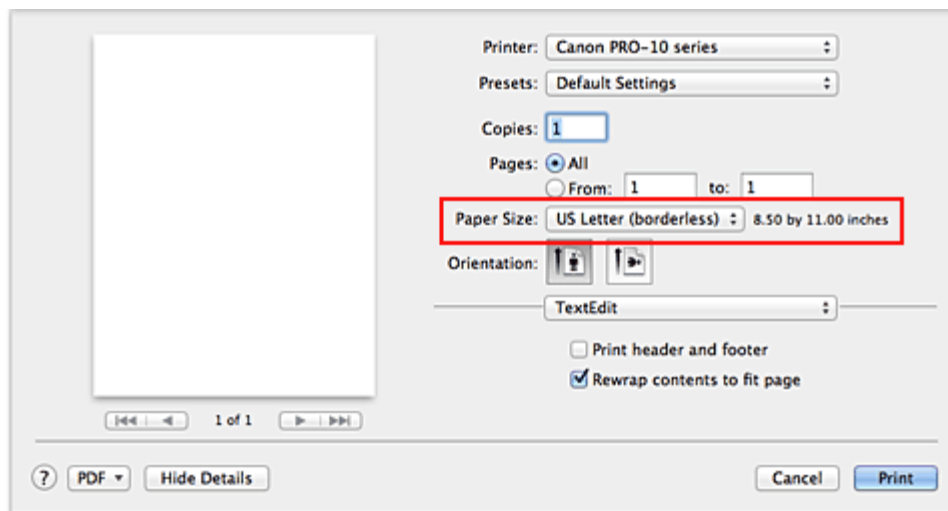

The setup window switches to the detailed display.

2. Select the printer

Select your model name from the **Printer** menu.

3. Select the size of the paper for borderless printing

Select "XXX (borderless)" from the **Paper Size** menu.

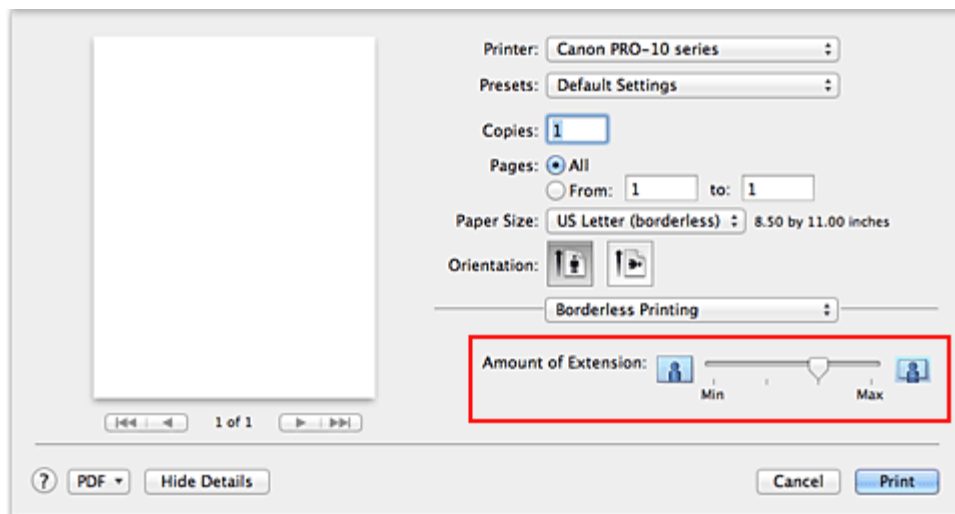

4. Select **Borderless Printing** from the pop-up menu

5. Adjust the amount of extension from the paper

If necessary, adjust the amount of extension using the **Amount of Extension** slider.

Moving the slider to the right increases the amount extending off the paper, and moving the slider to the left decreases the amount.

It is recommended to set the slider at the second position from the right for most cases.

Important

- When the **Amount of Extension** slider is set to the rightmost position, the back side of the paper may become smudged.

6. Complete the setup

Click **Print**.

When you execute print, the data is printed without any margins on the paper.

Important

- Borderless printing only supports specific paper sizes. Make sure to select a paper size with the wording "(borderless)" from the **Paper Size**.
- If borderless printing is enabled, only the following selections are available from the Print dialog when you display the pop-up menu and click **Quality & Media** and then **Media Type: Photo Paper Plus Glossy II, Photo Paper Pro Platinum, Photo Paper Pro Luster, Photo Paper Plus Semi-gloss, Matte Photo Paper, and Other Glossy Paper**.
- Print quality may deteriorate or the sheet may be stained at the top and bottom depending on the type of paper used.
- When the ratio of the height to the width differs from the image data, a portion of the image may not be printed depending on the size of the media used.
In this case, crop the image data with an application software according to the paper size.
- When scaled printing or page layout printing is enabled, you cannot perform borderless printing.

Expanding the Range of the Document to Print

Setting a large amount of extension allows you to perform borderless printing with no problems. However, the portion of the document extending off the paper range will not be printed and for this reason, the subjects around the perimeter of a photo may not be printed.

Try borderless printing once. When you are not satisfied with the result of borderless printing, reduce the amount of extension. The extension amount decreases as the **Amount of Extension** slider is moved to the left.

Important

- When the amount of extension is decreased, an unexpected margin may be produced on the print,

depending on the size of the paper.

Note

- When the **Amount of Extension** slider is set to the leftmost position, image data will be printed in the full size.
-

[Page top](#) ▲

P030

Cleaning Inside the Printer

To prevent smudges on the back side of the paper, perform bottom plate cleaning.

Also perform bottom plate cleaning if ink smudges caused by something other than print data appear on the printed page.

The procedure for performing bottom plate cleaning is as follows:

Bottom Plate Cleaning

1. Select **Cleaning** from the pop-up menu on the [Canon IJ Printer Utility](#)

2. Click the **Bottom Plate Cleaning** icon

The dialog opens.

3. Load paper in the printer

As instructed in the dialog, fold the A4 size or Letter size plain paper in half lengthwise, and then unfold the sheet.

Load the paper into the rear tray in the landscape orientation with the crest of the crease facing down.

4. Perform the bottom plate cleaning

Make sure that the printer is on and then click **OK**.

Bottom plate cleaning starts.

P018

Adjusting Brightness

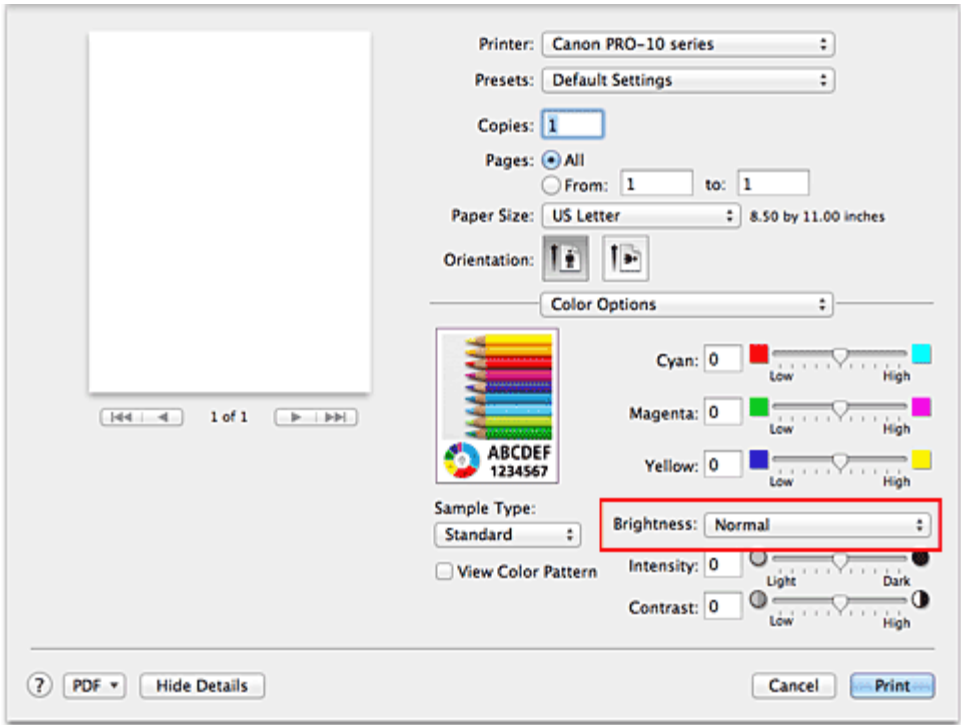

You can change the brightness of the overall image data during printing.
This function does not change pure white or pure black but it changes the brightness of the intermediate colors.
The following sample shows the print result when the brightness setting is changed.

The procedure for adjusting brightness is as follows:

- 1. Select **Color Options** from the pop-up menu of the **Print Dialog**
- 2. Specify the brightness

Select **Light**, **Normal**, or **Dark** for **Brightness**. The current settings are displayed in the settings preview on the left side of the printer driver.

- 3. Complete the setup

Click **Print**.
When you execute print, the data is printed at the specified brightness.

Important

- If you select **ColorSync** for **Color Matching**, then the **Brightness** appear grayed out and is unavailable.

Related Topics

-  [Setting the Print Quality Level \(Custom\)](#)

Page top 

P026

Cleaning the Print Heads from Your Computer

The print head cleaning function allows you to clear up clogged print head nozzle. Perform print head cleaning if printing is faint or a specific color fails to print, even though there is enough ink.

The procedure for cleaning the print head is as follows:

Cleaning

1. Select **Cleaning** from the pop-up menu on the [Canon IJ Printer Utility](#)

2. Click the **Cleaning** icon

When the dialog opens, select the ink group for which cleaning is to be performed.

Click **Initial Check Items** to display the items you need to check before performing cleaning.

3. Execute cleaning

Make sure that the printer is on and then click **OK**.

Print head cleaning starts.

4. Complete cleaning

The **Nozzle Check** dialog opens after the confirmation message.

5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

If cleaning the head once does not resolve the print head problem, clean it once more.

Important

- **Cleaning** consumes a small amount of ink.
Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

Deep Cleaning

Deep Cleaning is more thorough than cleaning. Perform deep cleaning when two **Cleaning** attempts do not resolve the print head problem.

1. Select **Cleaning** from the pop-up menu on the [Canon IJ Printer Utility](#)

2. Click the **Deep Cleaning** icon

When the dialog opens, select the ink group for which deep cleaning is to be performed.

Click **Initial Check Items** to display the items you need to check before performing deep cleaning.

3. Execute deep cleaning

Make sure that the printer is on and then click **OK**.

Click **OK** when the confirmation message appears.

Print head deep cleaning starts.

4. Complete deep cleaning

The **Nozzle Check** dialog opens after the confirmation message.

5. Check the results

To check whether the print quality has improved, click **Print Check Pattern**. To cancel the check process, click **Cancel**.

Important

- **Deep Cleaning** consumes a larger amount of ink than **Cleaning**.
Cleaning the print head frequently will rapidly deplete your printer's ink supply. Consequently, perform cleaning only when necessary.

Note

- If there is no sign of improvement after **Deep Cleaning**, switch off the printer, wait 24 hours, and then perform **Deep Cleaning** again. If there is still no sign of improvement, the ink may have run out or the print head may be worn. For details on the remedial action to be taken, see "[Ink Is Not Ejected](#)."

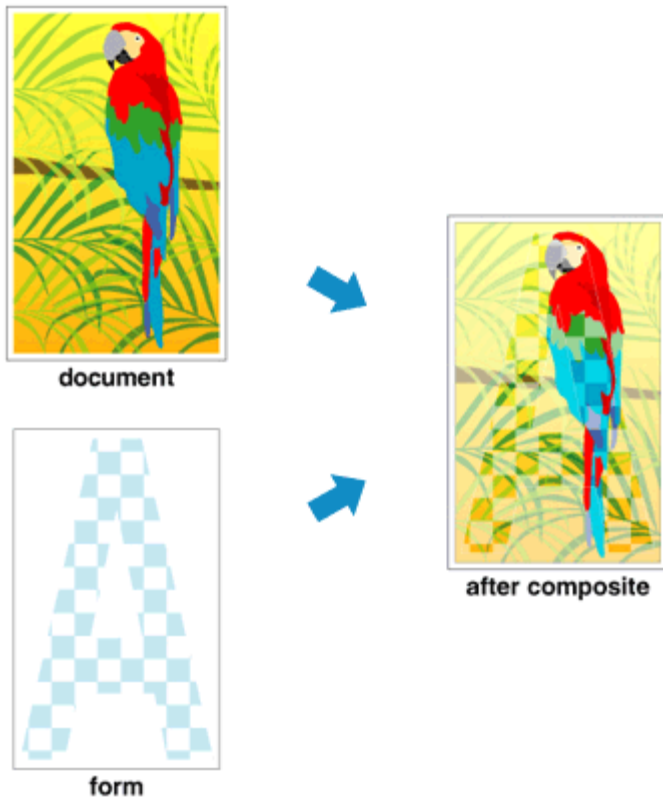

Related Topic

-  [Use Your Computer to Print a Nozzle Check Pattern](#)

Changing the Clear Coating Settings

When you execute clear coating, the printer applies chroma optimizer (CO) ink onto the printing surface and allows you to adjust the glossiness.

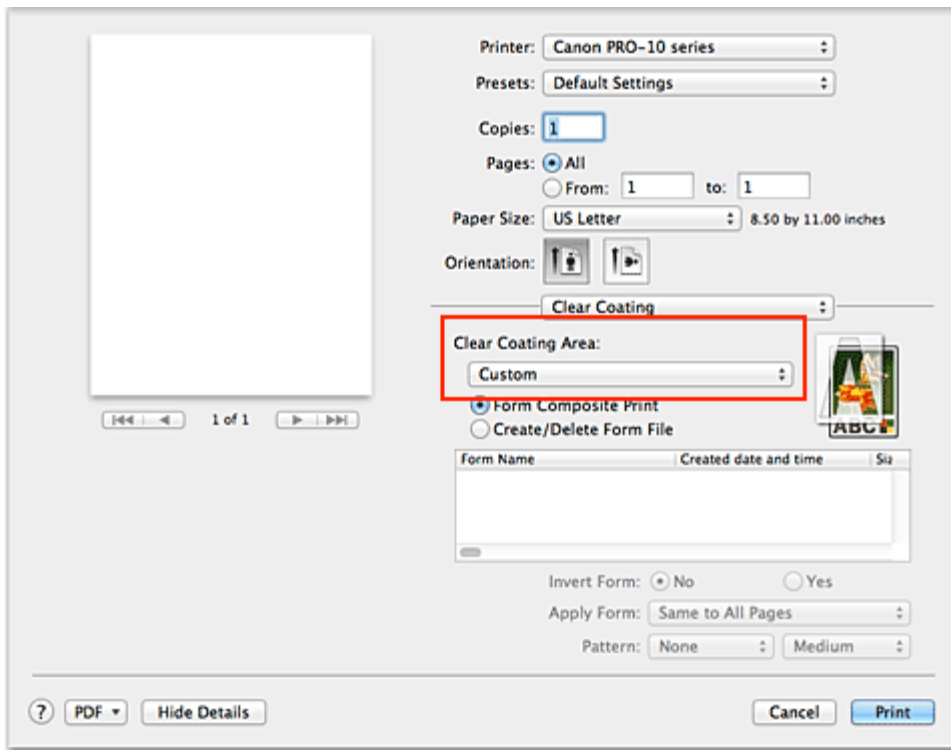

You can also create the areas to be clear-coated and save the area information as a form. When you use a form to perform clear coating, you can achieve decorative effects that cause certain characters and patterns to pop out.

This section explains procedures for changing the clear coating settings.

1. From the **Print Dialog**, display the pop-up menu, and select **Clear Coating**
2. Setting the clear coating area

Select **Auto**, **Overall**, or **Custom** that matches your purpose for **Clear Coating Area**.

Auto

The printer automatically sets the areas to be clear-coated and whether clear coating is to be executed.

It may be possible to reduce the ink consumption of the chroma optimizer (CO) or to accelerate the print speed.

Overall

The printer clear-coats the entire print area.

If selecting **Auto** produced unsatisfactory clear coating effects, selecting **Overall** may improve the results.

Custom

Use a form to specify the clear coating areas.

Select this option also when you are creating or deleting a form.

If you select **Auto** or **Overall**, go to step 5.

If you select **Custom**, perform the subsequent steps.

Important

- On the **Quality & Media**, look at **Media Type**. If a media type other than **Photo Paper Plus Glossy II**, **Photo Paper Pro Platinum**, **Photo Paper Pro Luster**, **Photo Paper Plus Semi-gloss**, **Other Glossy Paper (Wide Margins)**, or **Other Glossy Paper** is selected, you cannot select **Overall** or **Custom**.
- Depending on which print quality is set on the **Quality & Media**, you may not be able to select **Custom**.
- If **Overall** is selected and the media type is changed to one that cannot use **Overall**, the clear coating area setting is changed to **Auto**.
- If **Custom** is selected and the media type or the print quality is changed to one that does not support form composite print or form file creation, the clear coating area setting is changed to **Auto**.

3. Selecting a form file

Click **Form Composite Print**, and then from form files, select the form file to be used.

The white areas of the selected form become the clear coating areas. Clear coating is not applied to

the non-white areas.

Note

- To display form files in a list, you must first create form files.
For instructions on creating form files, see "[Create a Form File](#)."
 - You can rearrange the displayed form files by clicking the list heading.
-

4. Set the form details

If necessary, specify the following settings.

Invert Form

You can reverse the clear coating areas.

Apply Form

Set the method for applying the form to the document pages.

To apply the first page of the selected form to the entire document, select **Same to All Pages**.

To make the document and the form correspond in sequence from the first page, select **Individual Page**.

Pattern

Select the pattern type and size from the list.

The pattern is applied to areas that are not clear coated.

5. Complete the setup

Click **Print**.

When printing is executed, the clear coating effect that was set is added when the document is printed.

Important

- The decorative effects of clear coating may diminish depending on the document to be clear coated.
- Selecting **Black and White Photo Print** on the **Quality & Media** may diminish the decorative effects of clear coating.

Adjusting Color Balance

You can adjust the color tints when printing.

Since this function adjusts color balance of the output by changing the ink ratios of each color, it changes the total color balance of the document. Use the application software when you want to change the color balance significantly. Use the printer driver only when you want to adjust the color balance slightly.

The following sample shows the case when color balance is used to intensify cyan and to diminish yellow so that the overall colors are more uniform.

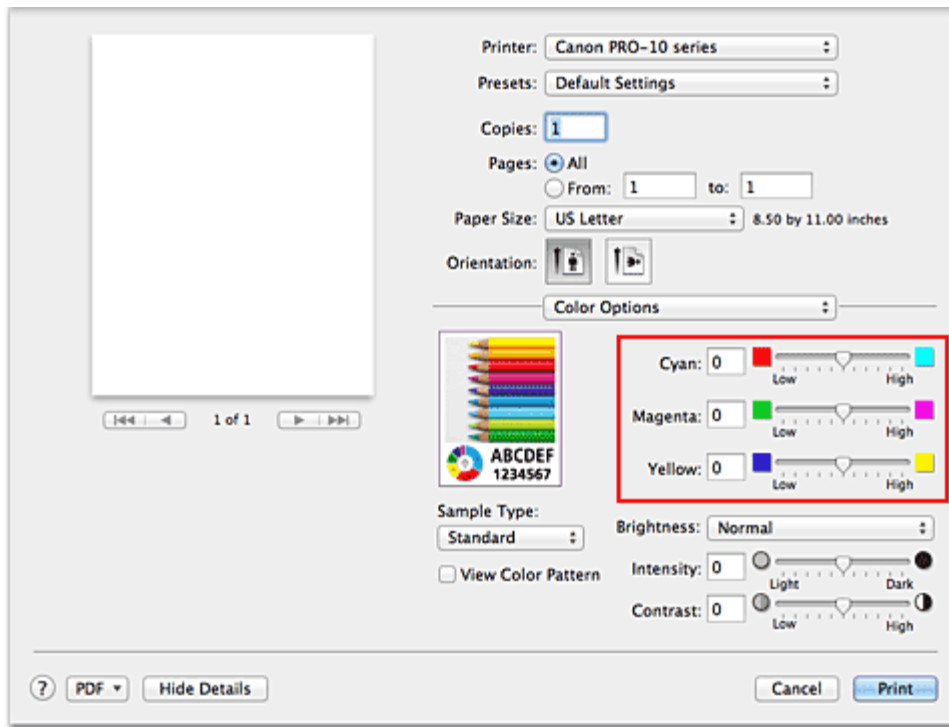

No adjustment Adjust color balance

The procedure for adjusting color balance is as follows:

1. Select **Color Options** from the pop-up menu of the **Print Dialog**
2. Adjust color balance

There are individual sliders for **Cyan**, **Magenta**, and **Yellow**. Each color becomes stronger when the corresponding slider is moved to the right, and becomes weaker when the corresponding slider is moved to the left. For example, when cyan becomes weaker, the color red becomes stronger.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

Important

- Adjust the slider gradually.

3. Complete the setup

Click **Print**.

When you execute print, the document is printed with the adjusted color balance.

Important

- When the **Black and White Photo Print** check box is checked for **Quality & Media**, the color balance (**Cyan, Magenta, Yellow**) are unavailable.
- If you select **ColorSync** for **Color Matching**, then the color balance (**Cyan, Magenta, Yellow**) appear grayed out and is unavailable.

P013

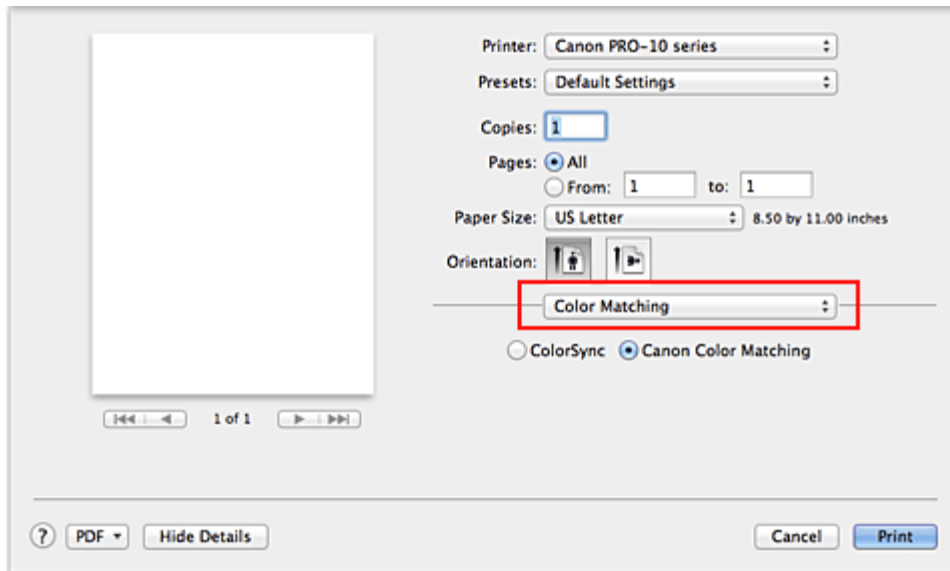

Specifying Color Correction

You can specify the color correction method suited to the type of document to be printed. Normally, when data is printed, the printer driver automatically adjusts the colors.

When you want to print by using the color space (Adobe RGB or sRGB) of the image data effectively or by specifying a printing ICC profile from your application software, select **ColorSync**. When you want to print by having the printer driver correct the colors, select **Canon Color Matching (Vendor Matching)**.

The procedure for specifying color correction is as follows:

1. Select **Color Matching** from the pop-up menu of the **Print Dialog**

2. Select color correction

Select the item below that matches your purpose.

ColorSync

Perform color correction using ColorSync.

Canon Color Matching (Vendor Matching)

Print in PRO mode.

For information about PRO mode, see "[Adjusting Colors with the Printer Driver.](#)"

3. Complete the setup

Click **Print**.

When you execute print, the document data is printed with the specified color correction.

Important

- Depending on the application software, when a printing ICC profile is specified from that application software, **Canon Color Matching (Vendor Matching)** cannot be selected because **ColorSync** is selected automatically.
- The **Quality & Media** setting is necessary even when **ColorSync** or **Canon Color Matching (Vendor Matching)** is selected.

Matching) is selected.

Optimal Photo Printing of Image Data

When people print images taken with digital cameras, they sometimes feel that the printed color tones differ from those of actual image or those displayed on the monitor.

To get the print results as close as possible to the desired color tones, you must select a printing method that is best suited to the application software used or to your purpose.

Color Management

Devices such as digital cameras, scanners, monitors, and printers handle color differently. Color management (color matching) is a method that manages device-dependent "colors" as a common color space. For Mac OS, a color management system called "ColorSync" is built into the operating system. Adobe RGB and sRGB are popularly used as common color spaces. Adobe RGB has a wider color space than sRGB.

ICC profiles convert device-dependent "colors" into a common color space. By using an ICC profile and carrying out color management, you can draw out the color space of the image data within the color reproduction area that the printer can express.

Note

- Normally, image files are saved in JPEG format. Some digital cameras allow you to save images in a format called RAW. RAW data refers to an image saving format that requires a computer to develop the image. You can embed an input ICC profile tag into a RAW file by using special application software.

Selecting a Printing Method Suited to the Image Data

The recommended printing method depends on the color space (Adobe RGB or sRGB) of the image data or the application software to be used. There are two typical printing methods. Check the color space (Adobe RGB or sRGB) of the image data and the application software to be used, and then select the printing method suited to your purpose.

Adjusting Colors with the Printer Driver

This section describes the procedure for printing data by using the color correction function of the printer driver.

Print in PRO mode.

Select this function when you want to print impressions that are close to those displayed on the monitor, for example, if you corrected the colors while checking the print image on the monitor.

Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

Describes the procedure for printing by using the color space of Adobe RGB or sRGB effectively.

You can print with a common color space by setting up the application software and the printer driver so that the color management matches the input ICC profile of the image data.

The method for setting up the printer driver differs depending on the application software to be used.

P015

Adjusting Colors with the Printer Driver

To print in PRO mode, specify the color correction function of the printer driver. PRO mode accurately applies the characteristics of data displayed on the monitor and allows you to obtain print results of impressions that are close to those displayed on the monitor.

Important

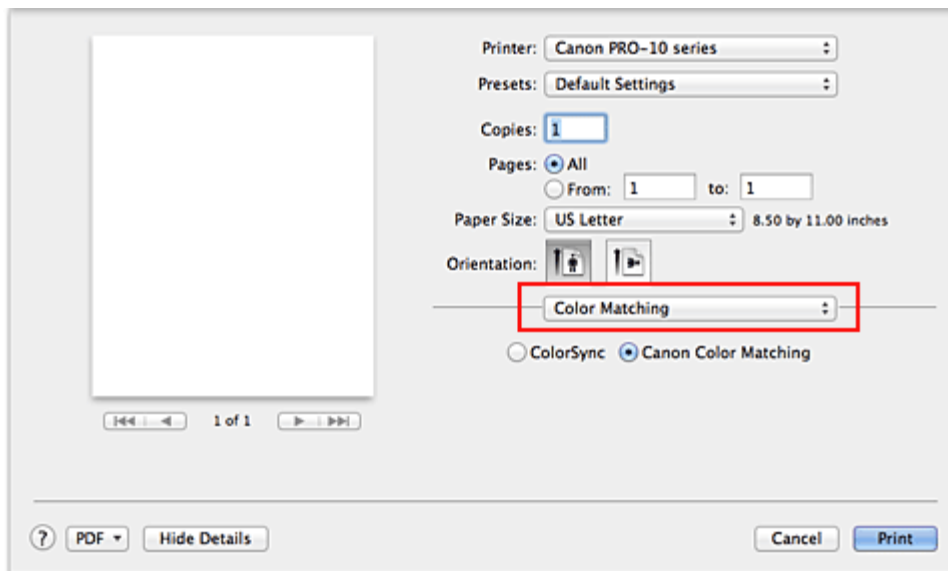

- When you print in PRO mode, Canon recommends that you set the monitor and the environment light as follows:
 - Monitor
Color temperature: D50 (5000K)
Brightness: 120 cd/m²
Gamma: 2.2
 - Environment light
Fluorescent light for D50 color evaluation (color temperature 5000K, high color rendering properties)
Brightness when looking at printed materials: 500 lx ± 125 lx

Note

- When printing from an application software that allows you to identify and specify ICC profiles, use an ICC profile for printing with that application software and select setting items that manage colors.

The procedure for adjusting colors with the printer driver is as follows:

1. Select **Color Matching** from the pop-up menu of the **Print Dialog**

2. Select color correction

Select **Canon Color Matching (Vendor Matching)**.

3. Set the other items

From the pop-up menu, select **Color Options**. If necessary, adjust the color balance (**Cyan**, **Magenta**, **Yellow**) and adjust **Brightness**, **Intensity**, and **Contrast** settings.

4. Complete the setup

Click **Print**.

When you execute print, the printer driver adjusts the colors when printing the data.

P720

Printing with ICC Profiles (Specifying an ICC Profile from the Application Software)

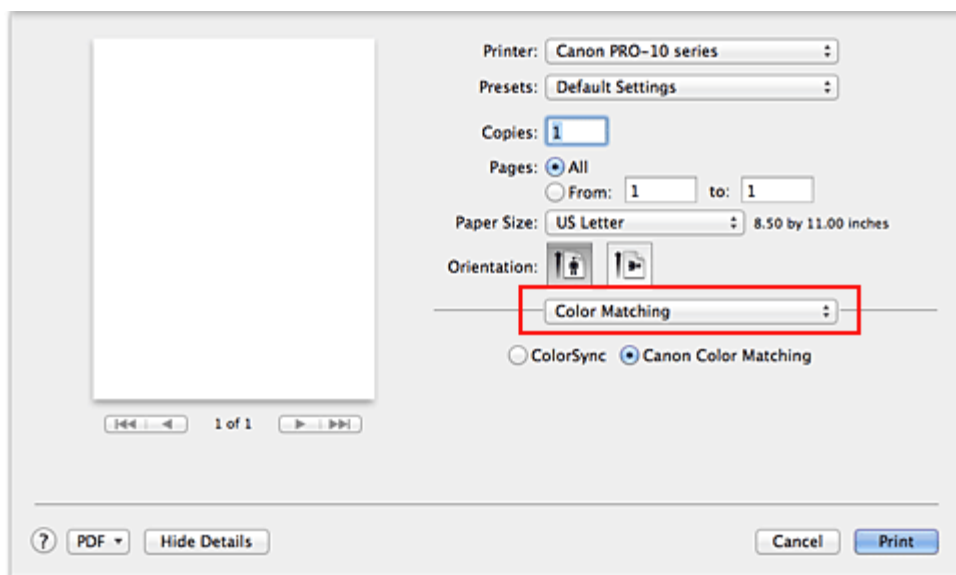

When you print from Adobe Photoshop, Canon Digital Photo Professional, or any application software that can identify input ICC profiles and allows you to specify such profiles, printer uses the color management system (ColorSync) built-into Mac OS when printing. The printer prints the editing and touch-up results of the application software and effectively uses the color space of the input ICC profile specified in the image data.

To use this printing method, use your application software to select color management items and specify an input ICC profile and a printing ICC profile in the image data.

Even if you print using a printing ICC profile that you created yourself or one for special Canon paper, be sure to select color management items from your application software.

For instructions on specifying an ICC profile with an application software program, refer to the user's manual of your application software.

1. Select **Color Matching** from the pop-up menu of the **Print Dialog**

2. Select color correction

Select **ColorSync**.

You can leave **Profile** set to **Automatic**.

Important

- Depending on the application software you use, you may not be able to select setting items other than **ColorSync**.
- If you choose a **Profile** setting other than **Automatic** or "Printing Paper ICC Profile", the printer will not be able to print with the correct colors.

3. Complete the setup

Click **Print**.

When you execute print, the printer uses the color space of the image data.

P721

Printing with ICC Profiles (Specifying an ICC Profile from the Printer Driver)

Print from an application software that cannot identify or specify input ICC profiles by using the color space of the input ICC profile (sRGB) found in the data.

1. Select **Color Matching** from the pop-up menu of the **Print Dialog**

2. Select color correction

Select **ColorSync**.

You can leave **Profile** set to **Automatic**.

Important

- If you choose a **Profile** setting other than **Automatic** or "Printing Paper ICC Profile", the printer will not be able to print with the correct colors.

3. Complete the setup

Click **Print**.

When you execute print, the printer uses the color space of the image data.

Important

- You cannot specify an input ICC profile from the printer driver.

P020

Adjusting Contrast

You can adjust the image contrast during printing.
To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

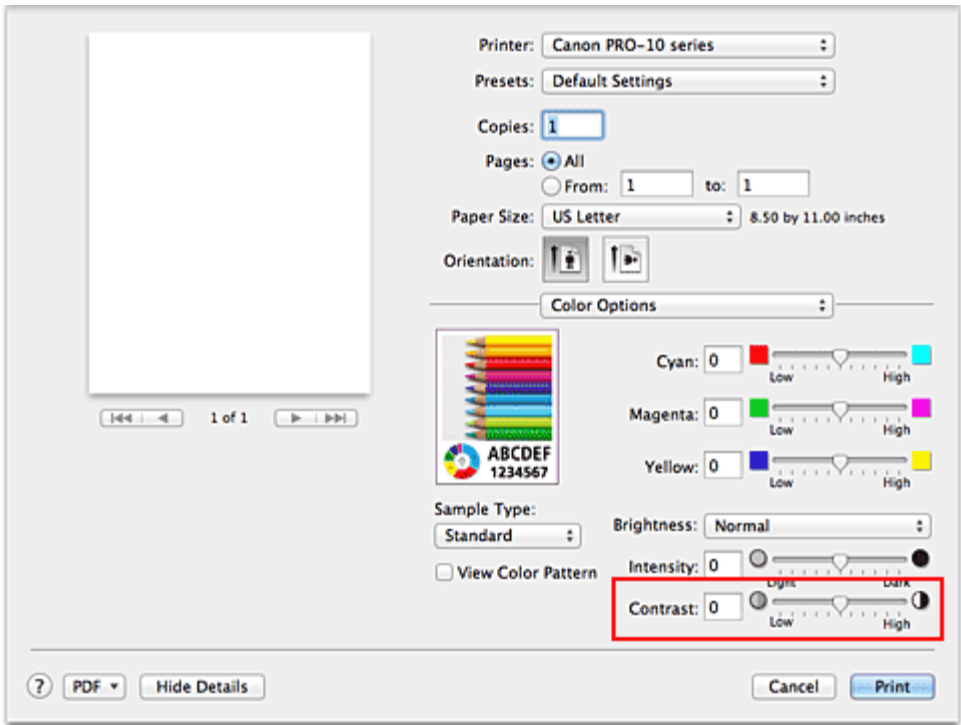

No adjustment

Adjust the contrast

The procedure for adjusting contrast is as follows:

1. Select **Color Options** from the pop-up menu of the **Print Dialog**
2. Adjust the contrast

Moving the **Contrast** slider to the right increases the contrast, and moving the slider to the left decreases the contrast.
You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

Important

- Adjust the slider gradually.

3. Complete the setup

Click **Print**.

When you execute print, the image is printed with the adjusted contrast.

Important

- If you select **ColorSync** for **Color Matching**, then the **Contrast** appear grayed out and is unavailable.

P001

Setting the Number of Copies and Printing Order

Collate pages + Reverse Collate pages + Normal

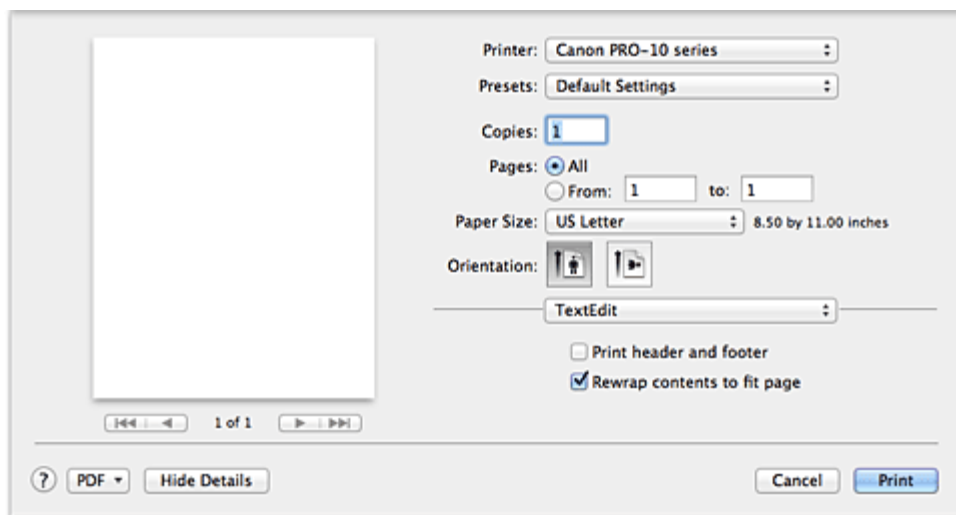

Reverse

The procedure for specifying the number of copies and printing order is as follows:

1. Click **Show Details** (▾ (the disclosure triangle)) in the **Print Dialog**

The setup window switches to the detailed display.

2. Specify the number of copies to be printed

Specify the number of copies to print in the **Copies** box.

3. Select **Paper Handling** from the pop-up menu

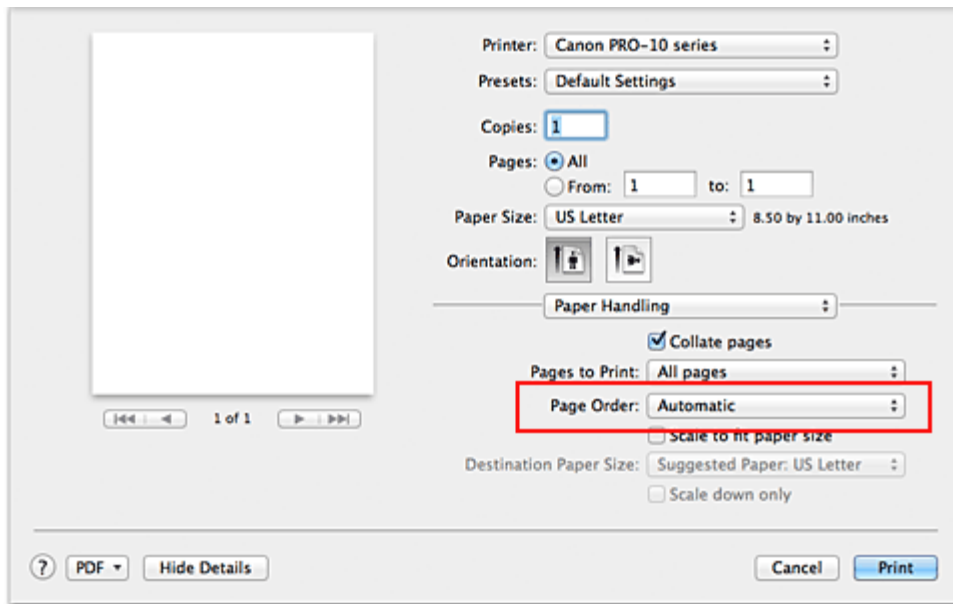

4. Check the **Collate pages** check box when you are specifying multiple copies in the **Copies** box

Check the **Collate pages** check box to print all the pages of a single copy together.
Uncheck this check box to print all pages with the same page number together.

5. Specify the print order

Check **Page Order**.

No setting is necessary because **Automatic** is selected as default. Even if **Reverse** is selected, the print order remains the same.

6. Complete the setup

Click **Print**.

When you execute print, the specified number of copies will be printed with the specified printing order.

Important

- When the application software that you used to create the document has the same function, specify the settings on the printer driver. However, if the print results are not acceptable, specify the function settings on the application software. When you specify the number of copies and the printing order with both the application software and this printer driver, the number of copies may be multiplied numbers of the two settings or the specified printing order may not be enabled.

P709

Display the Printing Status Screen

Check the print progress according to the following procedure:

1. Launch the printing status screen

- If the print data has been sent to the printer

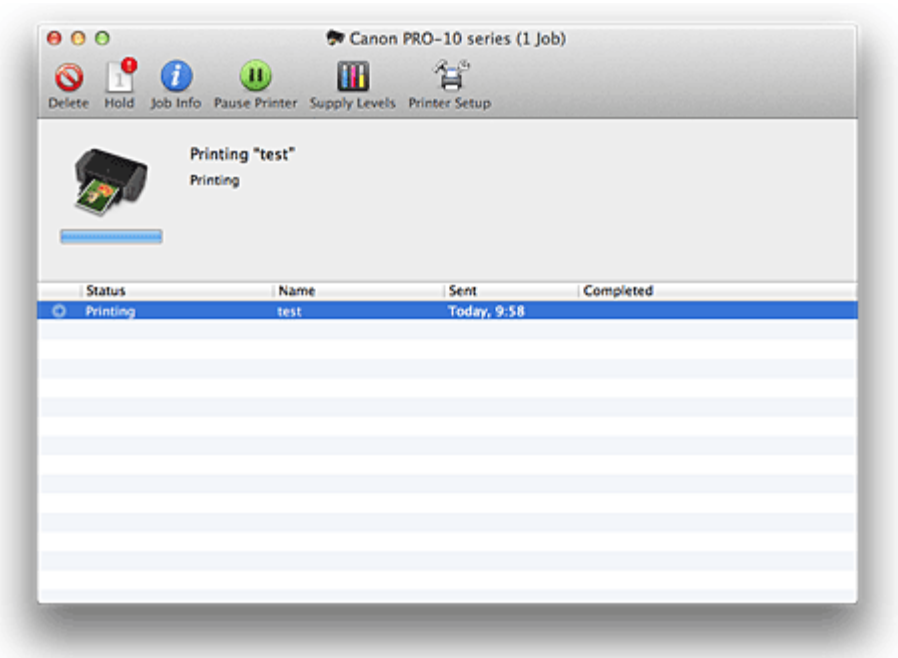

The printing status screen opens automatically. To display the printing status screen, click the  (the printer icon) displayed on the Dock.

- If the print data has not been sent to the printer

Open **System Preferences**, and select **Print & Scan (Print & Fax)**.
To display the printing status screen, select the name of your printer model from the printer list, and then click **Open Print Queue....**

2. Checking the printing status

You can check the name of the file being printed or ready for being printed.

Deletes the specified print job.

Stops printing the specified document.

Resumes printing the specified document.

Displays the print job information.

Stops printing all documents.

Displayed only when printing of all documents is being stopped, and resumes printing all

documents.

Canon IJ Printer Driver

The Canon IJ printer driver (called printer driver below) is a software that is installed on your computer for printing data with this printer.

The printer driver converts the print data created by your application software into data that your printer can understand, and sends the converted data to the printer.

Because different models support different print data formats, you need a printer driver for the specific model you are using.

Using Help of the Printer Driver

You can display Help function from the [Print Dialog](#).

Select a setup item from the pop-up menu in the Print dialog. Then click  at the bottom left of the screen to display an explanation of the item.

Help for the print driver is displayed when the following pop-up menu item is selected:

- **Quality & Media**
- **Color Options**
- **Clear Coating**
- **Borderless Printing**
- **Margin**

P040

Before Installing the Printer Driver

This section describes the items that you should check before installing the printer driver. You should also refer to this section if the printer driver cannot be installed.

Checking the Personal Computer Settings

- Terminate all running applications.
- Log on as the computer administrator. The installer will prompt you to enter the name and password of the administrative user. When multiple users are using Mac OS X, log on with the account of the administrator who registered first.

Important

- When you upgrade from Mac OS X 10.6 to Mac OS X 10.7, or Mac OS X 10.5.8 to Mac OS X 10.6, all printer drivers that were installed will be deleted.
If you plan to continue using this printer, re-install the latest printer driver.

Related Topics

-  [Obtaining the Latest Printer Driver](#)
-  [Installing the Printer Driver](#)

U308

Cannot Install the Printer Driver

Reinstall the printer driver.

If you reinstall the printer driver, install the printer driver on the Setup CD-ROM.

Note

- If the CD-ROM icon is not displayed, try the following:
 - Remove the CD-ROM from your computer, then insert it again.
 - Restart your computer.

If the CD-ROM icon is not yet displayed, try different discs and see if they are displayed. If other discs are displayed, there is a problem with the Setup CD-ROM. In this case, contact the service center.

P039

Delete the Unnecessary Canon IJ Printer from the Printer List

A Canon IJ Printer that you no longer use can be deleted from the printer list.

Before deleting the Canon IJ Printer, disconnect the cable that connects the printer to the computer.

The procedure to delete the unnecessary Canon IJ Printer from the printer list is as follows:

You cannot delete the Canon IJ Printer unless you are logged in as a user with the administrative right. For information about an administrative user, refer to the user's manual for the Mac OS.

1. Open **System Preferences**, and select **Print & Scan (Print & Fax)**

2. Delete the Canon IJ Printer from the printer list

From the printer list, select the Canon IJ Printer to be deleted, and then click -.

Note

- Even if a Canon IJ Printer is deleted from the printer list, you can re-register it automatically by connecting the printer to your computer.

P041

Installing the Printer Driver

You can access our web site through the Internet and download the latest printer driver for your model.

The procedure for installing the downloaded printer driver is as follows:

1. Mount the disk

Double-click the disk image file you have downloaded.
The file is unpacked, and then the disk is mounted.

2. Start the installer

Double-click [PrinterDriver_XXX_YYY.pkg] (where "XXX" is your model name, and "YYY" is version) contained in the disk.
The installer starts.

3. Start the installation

Install the printer driver according to the messages on the screen.

When the Software License Agreement is displayed, check the contents, and click **Continue**. If you do not agree to the terms of the Software License Agreement, you cannot install this software.

4. Selecting the volume of the install destination

If necessary, click **Change Install Location...**, select the volume where you want to install the printer driver, and then click **Continue**.

5. Executing the installation

Click **Install**.

When the authentication screen is displayed, enter the name and password of the administrator, and then click **Install Software**.

6. Complete the installation

When the completion message appears, click **Close**.

The printer driver is installed successfully.

Important

- If the Installer does not operate properly, select **Quit Installer** from the **Installer** menu of the Finder to quit the Installer. Then start the Installer again.
- You can download the printer driver for free, but you are responsible for paying any connection fees to the Internet.

P004

Scaling the Printing to Fit the Paper Size

The procedure for printing a document that is automatically enlarged or reduced to fit the page size to be used is as follows:

1. Click **Show Details** (▾ (the disclosure triangle)) in the **Print Dialog**

The setup window switches to the detailed display.

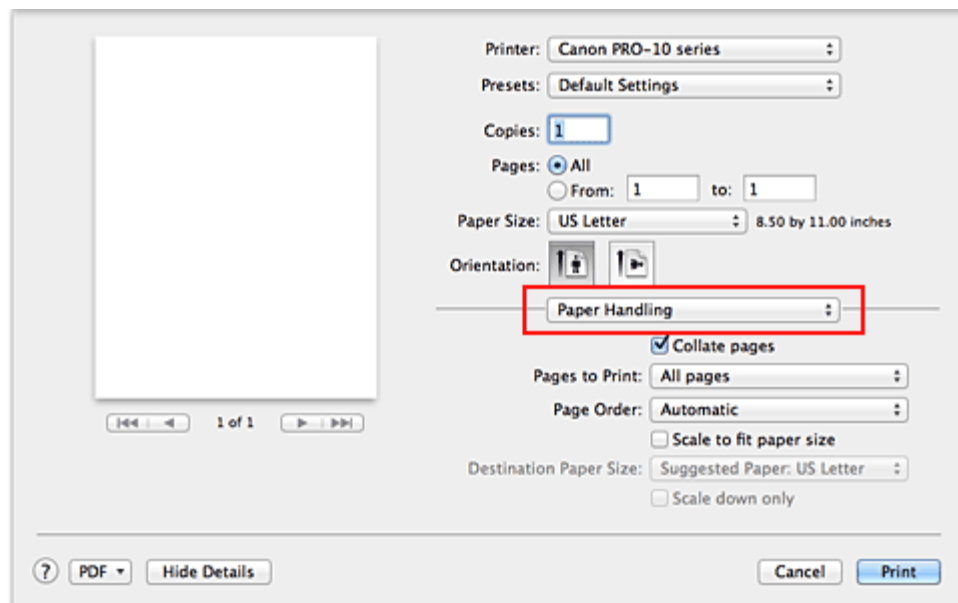

2. Select the printer

Select your model from the **Printer** list.

3. Check the paper size

Check that the **Paper Size** setting is the same as the paper size that you set in the application software.

4. Select **Paper Handling** from the pop-up menu

5. Set the print paper size

Check the **Scale to fit paper size** check box. Then from the **Destination Paper Size** pop-up menu, select the paper size that is actually loaded in the printer.

6. If necessary, check the **Scale down only** check box

When you check this check box, the document will be reduced to fit to the paper size when the document size is larger than the page size. The document will be printed in the original size when the document size is smaller than the page size.

7. Complete the setup

Click **Print**.

When you execute print, the document will be enlarged or reduced to fit to the page size.

Page top ▲

Create a Form File

You can create clear coating areas by using the application software of your choice, and save those areas as a form. An unnecessary form file can be deleted.

This section describes the procedure for creating a form file.

Create a Form File

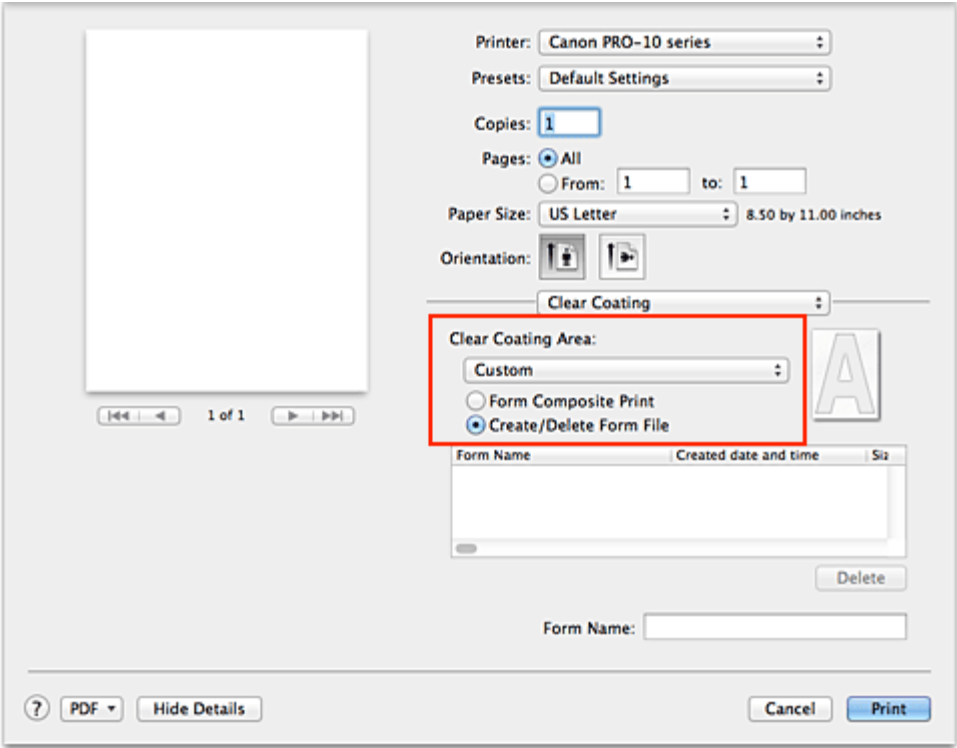

1. Creating data for use as a form file

Using the application software of your choice, create data that contains the characters and patterns to be used as the form file.
The white areas of the created data become the clear coating areas. Clear coating is not applied to the non-white areas.

2. From the Print Dialog, display the pop-up menu, and select Clear Coating

3. Selecting Create/Delete Form File

Select **Custom** from the **Clear Coating Area** menu, and then select **Create/Delete Form File**.

4. Setting the form name

In **Form Name**, enter the name of the form to be created.

- Spaces, tabs, and returns cannot be entered at the beginning or end of a form name.
 - You cannot set a form name that is the same as the name of an existing form file.
 - You cannot change the name of the created form.
-

5. Complete the setup

Click **Print**.

When you execute printing, the data that you created using the application software is saved as a form file.

Important

- To create a form file, you must connect this printer to your computer and turn on the printer.
- When **Create/Delete Form File** is selected, printing is not actually performed from the printer even if printing is executed.
- **Form Composite Print** and **Create/Delete Form File** can be executed only from the Print Dialog. Some applications do not support these functions.

Note

- To display the created form files on the list, you must display the pop-up menu and select **Clear Coating** again.
 - When creating a form file, use the same settings (such as **Paper Size** and **Borderless Printing**) that were used for form composite print.
 - You can register up to 30 form files.
-

Deleting Unnecessary Form File

1. From the **Print Dialog**, display the pop-up menu, and select **Clear Coating**

2. Selecting **Create/Delete Form File**

Select **Custom** from the **Clear Coating Area** menu, and then select **Create/Delete Form File**.

3. Select the form file to be deleted

From form files, select the form file to be deleted.

4. Delete the form file

Click **Delete**. When the confirmation message appears, click **OK**.

The selected form file is deleted from the form files.

Important

- To delete a form file, you must connect this printer to your computer and turn on the printer.

Interpreting the ICC Profile

When you need to specify an ICC profile for this printer, specify the ICC profile of the print output media.

The ICC profiles installed for this printer are as follows.

Canon XXXXX <GL><PP> 1/2 Photo Paper Plus Glossy&Gold
(1) (2) (3)

- (1) is the model name of the printer.
- (2) is the print quality.
The print quality is divided into 5 levels, ranging from high speed to high quality. As the number decreases, the print quality becomes higher. This value corresponds to the **Quality** slide bar that is displayed when you select **Quality & Media** from the pop-up menu of the Print dialog and then select **Custom** for **Print Quality**.
- (3) is the media type. This media name corresponds to the following media type:

Photo Paper Plus Glossy&Gold: Photo Paper Plus Glossy II

Photo Paper Pro Platinum: Photo Paper Pro Platinum

Photo Paper Pro Luster: Photo Paper Pro Luster

Photo Paper Plus Semi-Gloss: Photo Paper Plus Semi-gloss

Matte Photo Paper: Matte Photo Paper

Other Glossy Paper: Other Glossy Paper (Wide Margins) and Other Glossy Paper

Fine Art Museum Etching: Fine Art Paper "Museum Etching"

Other Fine Art Paper 1: Other Fine Art Paper 1

Other Fine Art Paper 2: Other Fine Art Paper 2 and Canvas

P716

Checking the Ink Status from Your Computer

You can check the detailed information such as the remaining ink level and the ink tank types of your model.

1. Select **Ink Level Information** from the pop-up menu on the **Canon IJ Printer Utility**

An illustration of the ink types and their status are displayed.

If a warning or error related to the remaining ink level occurs, the print driver displays an icon to let you know.

In such cases, take the appropriate action as described on the screen.

2. If necessary, click **Ink Details**

You can check the ink-related information.

Note

- Click  to check which ink tank your model uses.
- Click **Update** to display the current remaining ink level.
- When you receive a notice about the remaining ink level, a mark appears above the ink icon.
for example: 
Ink tank is running low. Prepare a new ink tank.
- When you print on A3 paper or larger paper sizes, the ink may run out before printing is finished or the printing may become faint or streaky (with white lines).

P021

Maintaining the Ink Quality

This printer automatically mixes the ink at fixed intervals to keep the ink density even.

You can also disable this function by unchecking the **Execute ink quality maintenance automatically** check box in **Custom Settings** of the Canon IJ Printer Utility pop-up menu. You should check this check box when using the printer.

Note that the ink density may become uneven when this setting is disabled. Therefore, when you disable this setting, be sure to execute the following operation about once a week.

The procedure for executing ink quality maintenance manually is as follows:

Ink Quality Maintenance

1. Select **Test Print** from the pop-up menu on the [Canon IJ Printer Utility](#)
2. Click **Ink Quality Maintenance**

Click **OK** when a message appears.

P019

Adjusting Intensity

You can dilute (brighten) or intensify (darken) the colors of the overall image data during printing. The following sample shows the case when the intensity is increased so that all colors become more intense when the image data is printed.

No adjustment

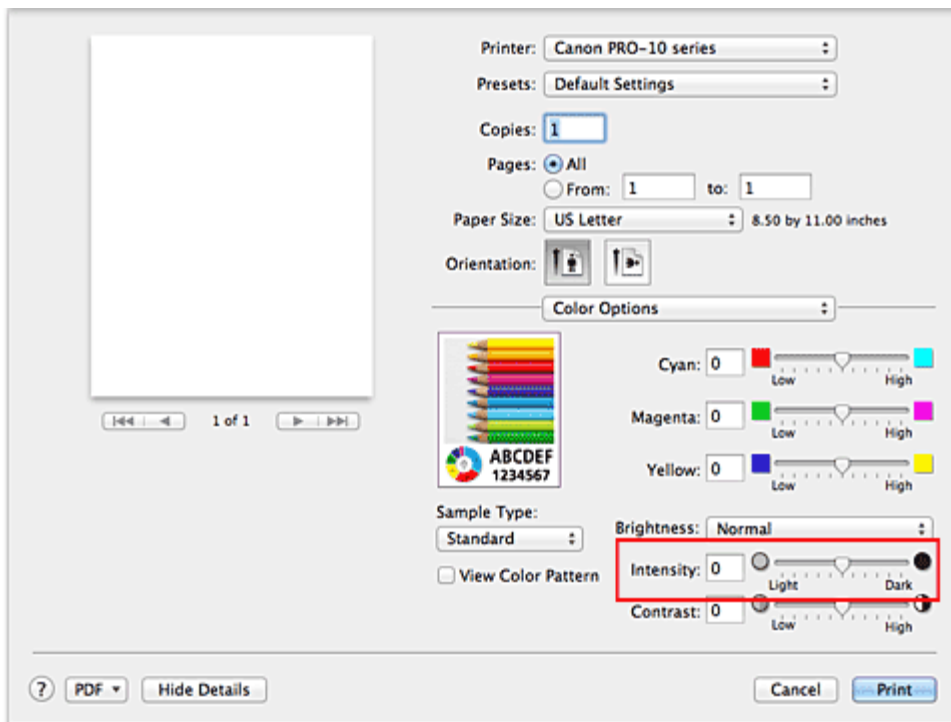

Higher intensity

The procedure for adjusting intensity is as follows:

1. Select **Color Options** from the pop-up menu of the **Print Dialog**
2. Adjust intensity

Moving the **Intensity** slider to the right intensifies (darkens) the colors, and moving the slider to the left dilutes (brightens) the colors.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50. The current settings are displayed in the settings preview on the left side of the printer driver.

Important

- Adjust the slider gradually.

3. Complete the setup

Click **Print**.

When you execute print, the image data is printed with the adjusted intensity.

Important

- If you select **ColorSync** for **Color Matching**, then the **Intensity** appear grayed out and is unavailable.

P037

Deleting the Undesired Print Job

If the printer does not start printing, canceled or failed print job data may be remaining.
Delete unnecessary print jobs from the print status check screen.

1. Open **System Preferences, and select **Print & Scan (Print & Fax)****

2. Select your model, and then click **Open Print Queue...**

The print status check screen appears.

3. Select the unnecessary print job and click  **Delete**

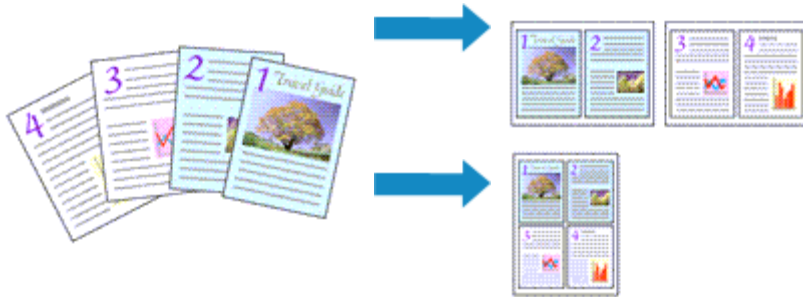

The selected print jobs will be deleted.

Page top ▲

P006

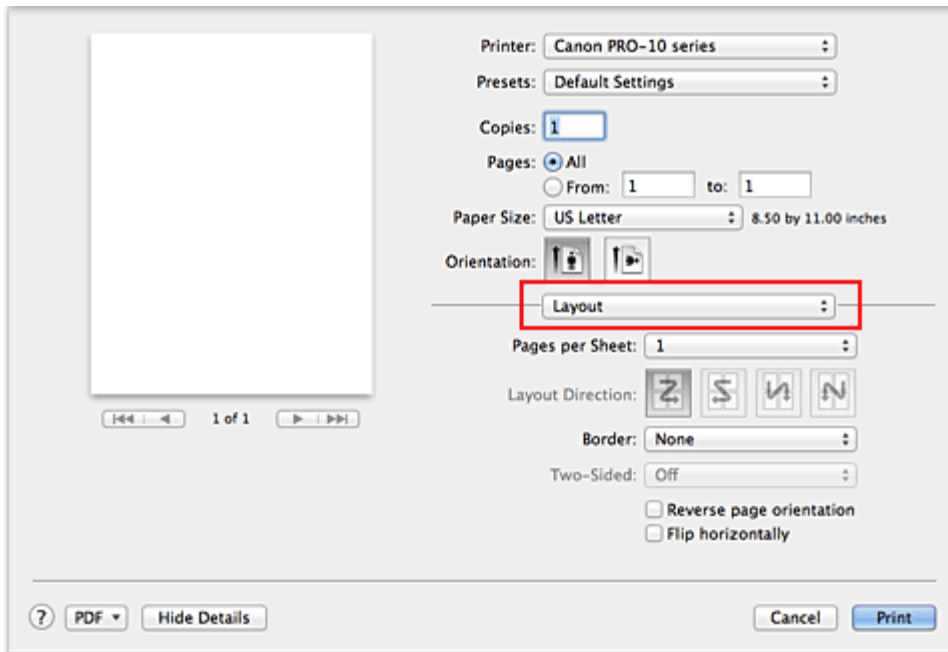

Page Layout Printing

The page layout printing function allows you to print more than one page image on a single sheet of paper.

The procedure for performing page layout printing is as follows:

1. Click **Show Details** (▾ (the disclosure triangle)) in the **Print Dialog**
The setup window switches to the detailed display.
2. Select **Layout** from the pop-up menu

3. Set the number of original you print on one page
In **Pages per Sheet**, specify the number of page you print on one page.
4. If necessary, set the following items

Layout Direction

To change the page placement order, select an icon from the list.

Border

To print a page border around each document page, select a type of page border.

Reverse page orientation

Select this check box to change the paper orientation.

Flip horizontally

Select this check box to reverse left and right of the document.

**Important**

- With Mac OS X 10.5.8, you cannot use **Flip horizontally**.

5. Complete the setup

Click **Print**.

When you execute print, the specified number of pages will be arranged on each sheet of paper in the specified order.

Page top ▲

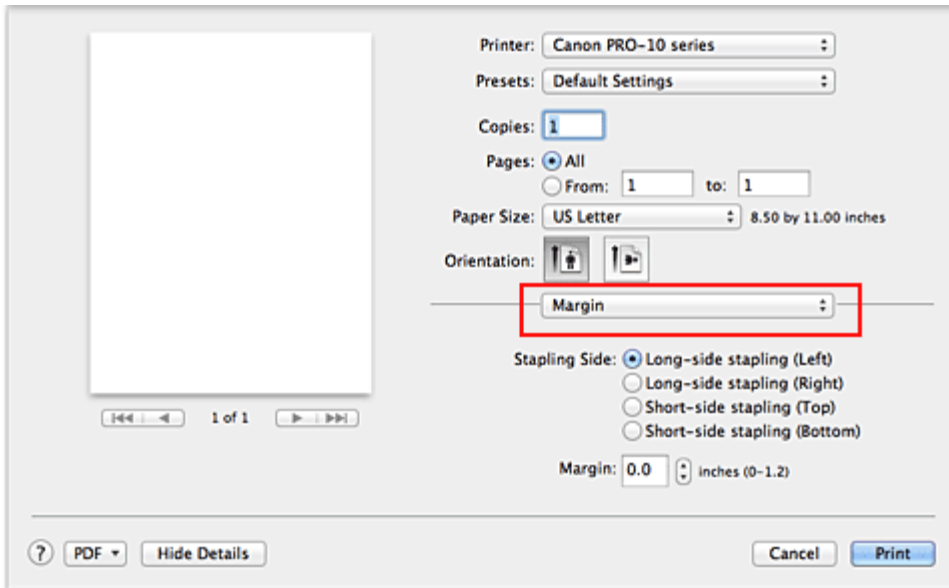

P002

Setting the Stapling Margin

The procedure for setting the staple side and the margin width is as follows:

1. Select **Margin** from the pop-up menu on the **Print Dialog**

2. Set the staple side and the margin width

Select a stapling position from the **Stapling Side** list, and if necessary, set the **Margin** width.

Note

- The printer automatically reduces the print area depending on the staple position margin.

3. Complete the setup

Click **Print**.

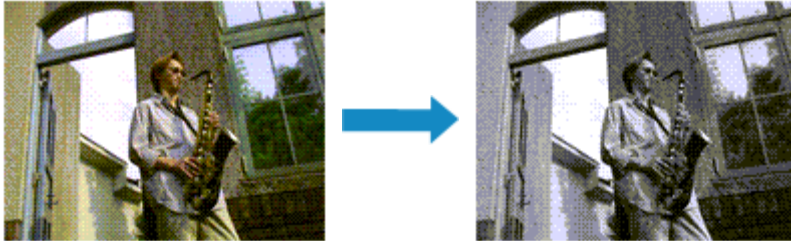

When you execute print, the data is printed with the specified staple side and margin width.

Important

- When borderless printing is enabled, **Stapling Side** and **Margin** appear grayed out and are

P012

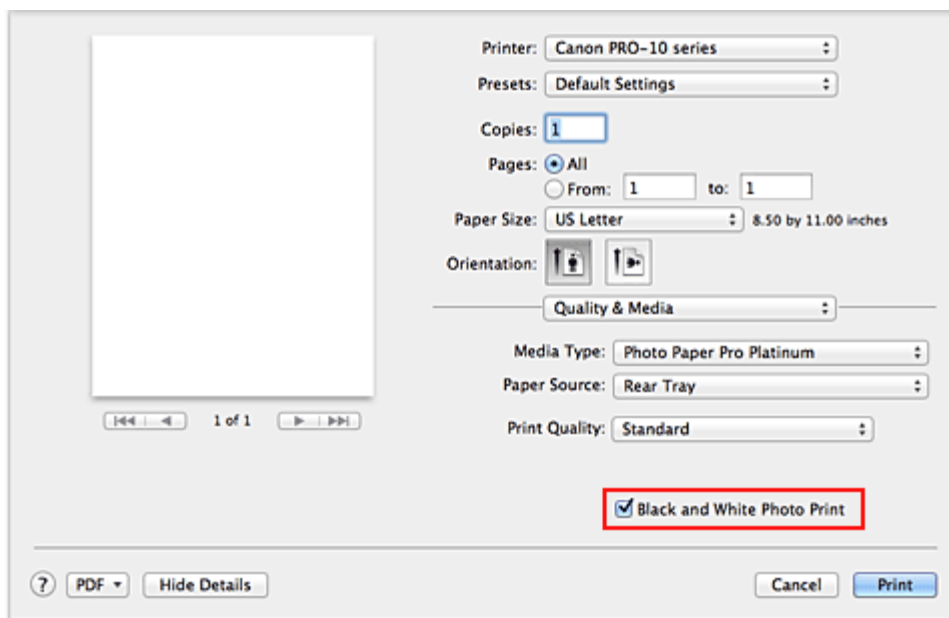

Printing a Color Document in Monochrome

The procedure for printing a color document in monochrome is as follows:

1. Select **Quality & Media** from the pop-up menu on the **Print Dialog**
2. Set black and white photo printing

Check the **Black and White Photo Print** check box.

3. Complete the setup

Click **Print**.

When you execute print, the document is converted to grayscale data. It allows you to print the color document in monochrome.

Note

- During **Black and White Photo Print**, gray ink or color inks may be used as well as black ink.

Related Topic

P029

Use Your Computer to Print a Nozzle Check Pattern

The nozzle check function allows you to check whether the print head is working properly by printing a nozzle check pattern. Print the pattern if printing becomes faint, or if a specific color fails to print.

The procedure for printing a nozzle check pattern is as follows:

Nozzle Check

1. Select **Test Print** from the pop-up menu on the [Canon IJ Printer Utility](#)

2. Click the **Nozzle Check** icon

The confirmation message appears.

To display a list of items that you should check before printing the nozzle check pattern, click **Initial Check Items**.

3. Load paper in the printer

Load one sheet of A4 size or Letter size plain paper into the rear tray.

4. Print a nozzle check pattern

Make sure that the printer is on and click **Print Check Pattern**.

Printing of the nozzle check pattern begins.

5. Check the print result

When the dialog opens, check the print result. If the print result is normal, click **Quit**.

If the print result is smudged or if there are any unprinted sections, click **Cleaning** to clean the print head.

Related Topic

- [Cleaning the Print Heads from Your Computer](#)

Opening the Canon IJ Printer Utility

To open the Canon IJ Printer Utility, follow the steps below.

1. Open **System Preferences, and select **Print & Scan (Print & Fax)****

2. Start the Canon IJ Printer Utility

- **If you are using Mac OS X 10.7 or Mac OS X 10.6**

Select your model from the printer list, and click **Options & Supplies....**

Click **Open Printer Utility** in **Utility** tab.

- **If you are using Mac OS X 10.5.8**

Select your model from the printer list, and click **Open Print Queue....**

Click **Utility** when a list of print jobs is displayed.

Canon IJ Printer Utility is launched.

How to Open the Printer Driver Setup Window

You can display the printer driver setup window from the application software you are using.

Opening the Page Setup Dialog

Use this procedure to set the page (paper) settings before printing.

1. Select **Page Setup...** from the **File** menu of the application software

The **Page Setup Dialog** opens.

Opening the Print Dialog

Use this procedure to set the print settings before printing.

1. Select **Print...** from the **File** menu of the application software

The **Print Dialog** opens.

P035

Changing the Printer Operation Mode

If necessary, switch between various modes of printer operation.

The procedure for configuring **Custom Settings** is as follows:

1. Make sure that the printer is on, and then select **Custom Settings** from the pop-up menu on the [Canon IJ Printer Utility](#)

Note

- If the computer is unable to communicate with the printer, a message appears because the computer cannot access the function information that was set on the printer. If this happens, click **Cancel** to display the most recent settings specified on your computer.

2. Complete the following settings, if necessary

Ink Drying Wait Time

You can set the length of the printer rest time until printing of the next page begins. Moving the slider to the right increases the pause time, and moving the slider to the left decreases the time.

If the paper gets stained because the next page is ejected before the ink on the printed page dries, increase the ink drying wait time.

Reducing the ink drying wait time speeds up printing.

Detects a printable disc in the disc tray

Detects whether a printable disc is loaded on the disc tray during disc label printing and displays a message if a disc is not loaded.

Check this check box to print with detecting whether a printable disc is loaded.

Uncheck this check box to print without detecting whether a printable disc is loaded.

Important

- If you leave this check box unchecked, the printer may print to the disc tray even if a printable disc is not loaded on the disc tray. Therefore, you should check this check box under normal circumstances.
- If you load a printable disc that has already been printed onto the disc tray, the printer may detect that no printable disc is loaded on the disc tray. In this case, uncheck this check box.

Prevent paper abrasion

The printer can increase the gap between the print head and the paper during high-density printing to prevent paper abrasion.

Check this check box to prevent paper abrasion.

Detect paper width

Detects the width of paper loaded in the printer when printing.

When the paper width detected by the printer is narrower than the width of the paper specified in

Paper Size on the Print dialog, a message is displayed and printing is stopped.

Check this check box to detect the paper width.

Important

- When you use a custom page size, correctly set the size of the paper loaded in the printer in the

Custom Paper Sizes (Custom Page Sizes) dialog.

If an error message is displayed even though paper of the same size that was specified is loaded, uncheck the **Detect paper width** check box.

Align heads manually

Usually, the **Print Head Alignment** function of **Test Print** on the pop-up menu in the Canon IJ Printer Utility is set to automatic head alignment, but you can change it to manual head alignment.

If the printing results of automatic print head alignment are not satisfactory, see "[Aligning the Print Head Position Manually from Your Computer](#)," and perform manual head alignment.

Check this check box to perform the manual head alignment. Uncheck this check box to perform the automatic head alignment.

Execute ink quality maintenance automatically

This function mixes the ink at fixed intervals to keep the ink density even.

To execute ink quality maintenance automatically, check this check box.

Important

- You should normally check this check box when using the printer.
When you disable this function, select **Test Print** from the pop-up menu of the Canon IJ Printer Utility and execute **Ink Quality Maintenance** at regular intervals.

3. Apply the settings

Click **Apply** and when the confirmation message appears, click **OK**.

The printer operates with the modified settings hereafter.

P008

Switching the Paper Source to Match the Purpose

In this printer, there are two paper sources, a manual feed tray and a rear tray.
You can facilitate printing by selecting a paper source setting that matches your media type or purpose.

The procedure for setting paper source is as follows:

1. Select **Quality & Media** from the pop-up menu of the **Print Dialog**

2. Select the media type

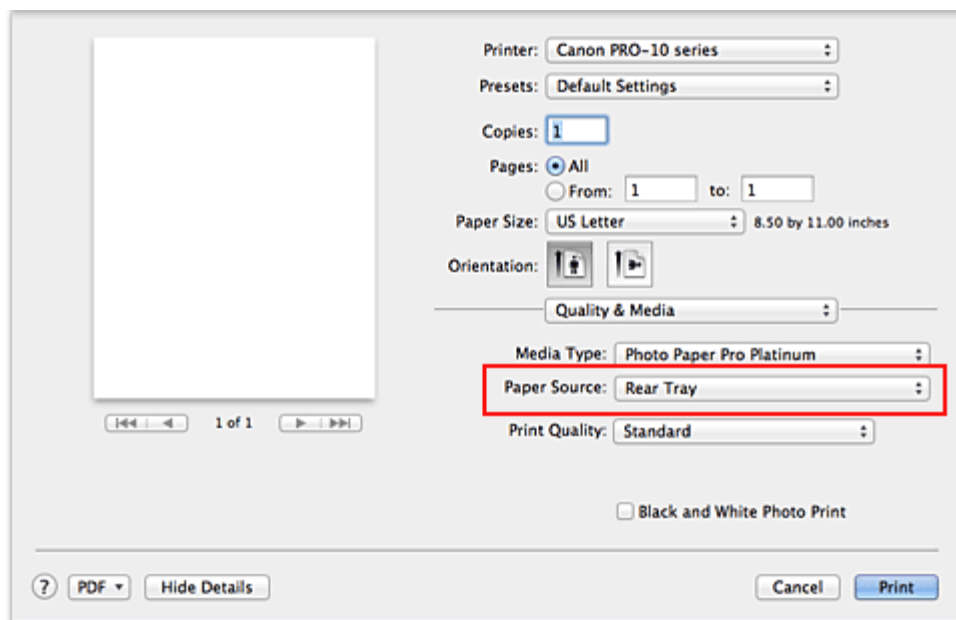

For **Media Type**, select the same paper type loaded in the printer.

Note

- When **Other Glossy Paper (Wide Margins)**, **Fine Art "Museum Etching"**, **Other Fine Art Paper 1**, **Other Fine Art Paper 2**, or **Canvas** is selected for **Media Type** in the Print Dialog, select "XXX (Art Paper Margin 30)" for **Paper Size**.

3. Select the paper source

For **Paper Source**, select the item below that matches your purpose.

Manual Feed

Paper is supplied from the manual feed tray in the back.

Important

- When **4 x 6**, **5 x 7**, **A5**, **JIS B5 (B5 JIS, JB5)**, or **L** is selected for **Paper Size** on the Print Dialog, paper cannot be supplied from the manual feed tray in the back.
- When **Plain Paper** is selected from the **Media Type** menu of the **Quality & Media** on the pop-up menu in the Print dialog, paper cannot be supplied from the manual feed tray in the back.

Rear Tray

Paper is fed from the rear tray.

Important

- When **14"x17" 36x43cm** is selected for **Paper Size** on the Print Dialog, paper cannot be supplied from the rear tray.
- When **Fine Art "Museum Etching"** or **Canvas** is selected from the **Media Type** menu of the **Quality & Media** on the pop-up menu in the Print dialog, paper cannot be supplied from the rear tray.

4. Complete the setup

Click **Print**.

When you execute print, the printer uses the specified paper source to print the data.

Page top ▲

P047

Setting the Media Type with the Printer Driver

When you use this printer, selecting a media type that matches the print purpose will help you achieve the best print results.

You can use the following media types on this printer.

Commercially available papers

Media name	Media Type in the printer driver
Plain Paper (including recycled paper)	Plain Paper

Canon genuine papers (Photo Printing)

Media name <Model No.>	Media Type in the printer driver
Photo Paper Pro Platinum <PT-101>	Photo Paper Pro Platinum
Photo Paper Plus Glossy II <PP-201>	Photo Paper Plus Glossy II
Photo Paper Pro Luster <LU-101>	Photo Paper Pro Luster
Photo Paper Plus Semi-gloss <SG-201>	Photo Paper Plus Semi-gloss
Matte Photo Paper <MP-101>	Matte Photo Paper
Fine Art Paper "Museum Etching" <FA-ME1>	Fine Art "Museum Etching"

Canon genuine papers (Original Products)

Media name <Model No.>	Media Type in the printer driver
Photo Stickers <PS-101>	Photo Paper Plus Glossy II

Special paper (other than genuine Canon paper)

Media Features	Media Type in the printer driver
Media Types with Art Material Textures	Other Fine Art Paper 1 / Other Fine Art Paper 2
Media Types with Glossy Surfaces	Other Glossy Paper (Wide Margins) / Other Glossy Paper
Fabric that has the look of canvas	Canvas

Important

- When **Media Type** on the printer driver is set to **Other Glossy Paper (Wide Margins)**, **Fine Art "Museum Etching"**, **Other Fine Art Paper 1**, **Other Fine Art Paper 2**, or **Canvas**, no data is printed in the top and bottom 30 mm edges (printing direction) of the paper. For **Paper Size** on the printer driver, select "XXX (Art Paper Margin 30)".
For information about the printable area, see "[Printing Area](#)."

P414

Managing the Printer Power

This function allows you to manage the printer power from the printer driver.

The procedure for managing the printer power is as follows:

Power Off

The **Power Off** function turns off the printer. When you use this function, you will not be able to turn the printer on from the printer driver.

1. Select **Power Settings** from the pop-up menu on the [Canon IJ Printer Utility](#)
2. Execute power off

Click **Power Off**, and when the confirmation message appears, click **OK**.
The printer power switches off.

Auto Power

Auto Power allows you to set **Auto Power Off**.

The **Auto Power Off** function automatically turns off the printer when there are no operations from the printer driver or the printer for a specified period of time.

1. Select **Power Settings** from the pop-up menu on the [Canon IJ Printer Utility](#)
2. Check that the printer is on, and then click **Auto Power**

A dialog appears.

Note

- If the printer is off or if communication between the printer and the computer is disabled, an error message may appear because the computer cannot collect the printer status.

3. If necessary, complete the following setting:

Auto Power Off

Specify the time from the list. When this time lapses without any operations from the printer driver or the printer, the printer is turned off automatically.

4. Apply the settings

The auto power off function is enabled hereafter. When you want to disable this function, select **Disable** from the list according to the same procedure.

Important

- If you connect this printer to a network and use it, you can set **Auto Power Off** but the power will not switch off automatically.

[Page top](#) 

P009

Displaying the Print Results before Printing

If you are using Mac OS X 10.6 or Mac OS X 10.5.8, you can display and check the print result before printing.

To display the print result before printing, click **Preview** on the [Print Dialog](#).

Note

- When you click  (the disclosure triangle) in the Print dialog and switch to the detailed display, **Preview** is not displayed.
For detailed display, a preview is displayed on the left side of the Print dialog.

P010

Setting Paper Dimensions (Custom Size)

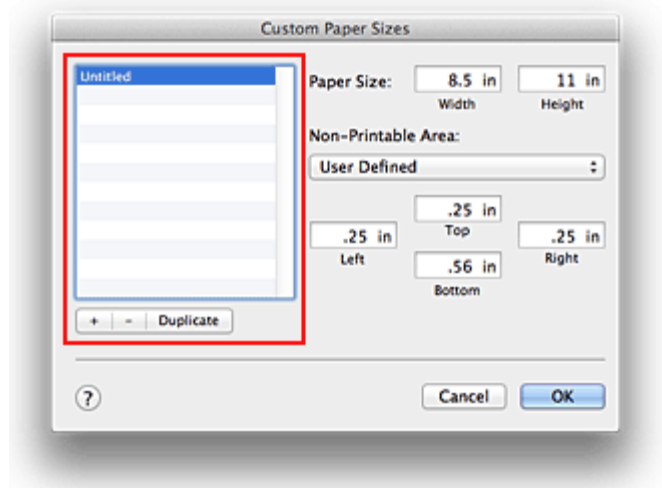

You can specify the height and width of paper when its size cannot be selected from the **Paper Size** menu. Such a paper size is called "custom size."

The procedure for specifying a custom size is as follows:

1. Creating a new custom paper size

In the **Print Dialog**, select **Manage Custom Sizes...** from **Paper Size**.

In the **Custom Paper Sizes (Custom Page Sizes)** dialog, click **+**.

Untitled will be added to the list.

2. Setting details about the custom paper size

Double-click **Untitled**, enter the name of the paper size you want to register, and specify the **Width** and **Height** of the paper for **Paper Size (Page Size)**.

Select **User Defined** or your model for **Non-Printable Area (Printer Margins)**, and enter the margins.

3. Registering the custom paper size

Click **OK**.

The custom size is registered.

Important

- If the application software that created the document has a function for specifying height and width values, use the application software to set the values. If the application software does not have such a function or if the document does not print correctly, perform the above procedure from the printer driver to set the values.
- When you use a custom page size, correctly set the size of the paper loaded in the printer in the **Custom Paper Sizes (Custom Page Sizes)** dialog.
If an error message is displayed even though paper of the same size that was specified is loaded, select **Custom Settings** from the pop-up menu of Canon IJ Printer Utility, and uncheck the **Detect paper width** check box.

Note

- To duplicate the registered paper size, select the paper size you want to duplicate from the list and click **Duplicate**.
 - To delete a registered paper size, select the paper size you want to delete from the list, and click -.
-

P011

Setting the Print Quality Level (Custom)

The print quality level can be set in the **Custom**.

The procedure for setting the print quality level is as follows:

- 1. Select **Quality & Media** from the pop-up menu on the **Print Dialog**
- 2. Select the print quality
Select **Custom** for **Print Quality**.

- 3. Setting the print quality level
Move the **Quality** slider to select the print quality level.
- 4. Complete the setup
Click **Print**.
When you execute print, the image data is printed with the selected print quality level.

Important

- Certain print quality levels cannot be selected depending on the settings of **Media Type**.

P031

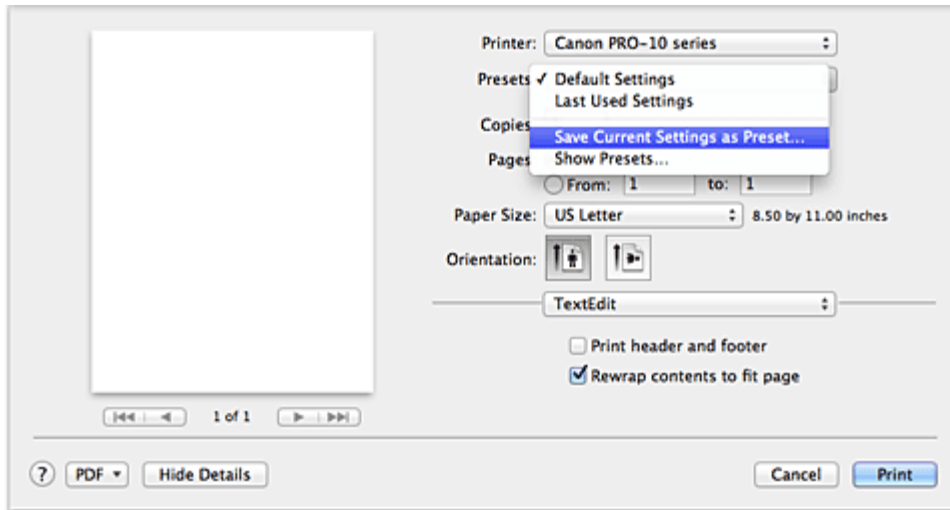

Registering a Changed Printing Profile

You can name and register the printing profile you made in the [Print Dialog](#). The registered printing profile can be called up from **Presets** to be used. You can also delete the unnecessary printing profile.

The procedure for registering a printing profile is as follows:

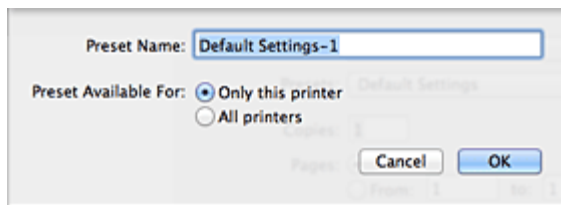

Registering a Printing Profile

1. In the Print dialog, set the necessary items
2. Select **Save Current Settings as Preset... (Save As...)** from the **Presets**

3. Save the settings

In the displayed dialog, enter a name in **Preset Name (Save Preset As)**, and if necessary, set **Preset Available For**. Then click **OK**.

Important

- With Mac OS X 10.5.8, you cannot use **Preset Available For**.

Using Registered Printing Profile

1. On **Presets** in the Print dialog, select the name of printing profile you want to use

Printing profile in the Print dialog will be updated to the called profile.

Deleting Unnecessary Printing Profile

1. Select the printing profile to be deleted

- **If you are using Mac OS X 10.7**

In the print dialog, select **Show Presets...** in the **Presets** section. Then in the dialog that appears, select the name of the printing profile to be deleted.

- **If you are using Mac OS X 10.6 or Mac OS X 10.5.8**

On **Presets** in the Print dialog, select the name of printing profile you want to delete.

2. Delete the printing profile

Click **Delete**. The selected printing profiles will be deleted from **Presets**.

Page top ▲

P027

Cleaning the Paper Feed Rollers from Your Computer

Cleans the paper feed rollers. Perform feed roller cleaning when there are paper particles sticking to the paper feed rollers and paper is not fed properly.

The procedure for performing the feed roller cleaning is as follows:

Roller Cleaning

1. Prepare the printer

Remove all sheets of paper from the paper source from which paper could not be properly fed.

2. Select **Cleaning** from the pop-up menu on the [Canon IJ Printer Utility](#)

3. Click the **Roller Cleaning** icon

A message appears.

4. Select **Rear Tray** or **Manual Feed Tray**, and then click **OK**

The confirmation message appears.

5. Execute paper feed roller cleaning

Make sure that the printer is on and then click **OK**.
Paper feed roller cleaning starts.

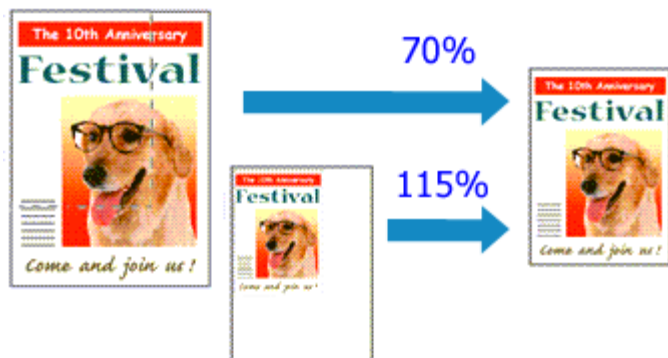

6. Complete paper feed roller cleaning

Follow the instructions in the message, load plain paper into the selected paper source, and then click **OK**.

Paper will be ejected and feed roller cleaning will be completed.

P005

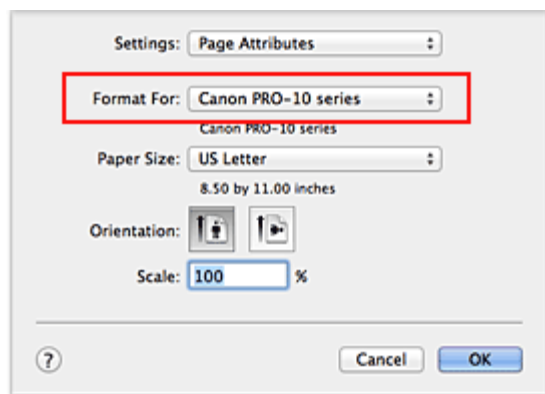

Scaled Printing

The procedure for printing a document with pages enlarged or reduced is as follows:

1. Select the printer

In the **Page Setup Dialog**, select your model name from the **Format For** list.

2. Set scaled printing

Specify the scaling factor in the **Scale** box, and click **OK**.

Note

- If you are using Mac OS X 10.7, you can set the **Scale** rate to a value in the range from 1 to 999%.
If you are using Mac OS X 10.6 or Mac OS X 10.5.8, set a value in the range from 1 to 10000%.
If you enter any other value, an error message will be displayed.

3. Complete the setup

On the **Print Dialog**, click **Print**.

When you execute print, the document will be printed with the specified scale.

Important

- When the application software which you used to create the original has the scaled printing function, configure the settings on your application software. You do not need to configure the same setting in

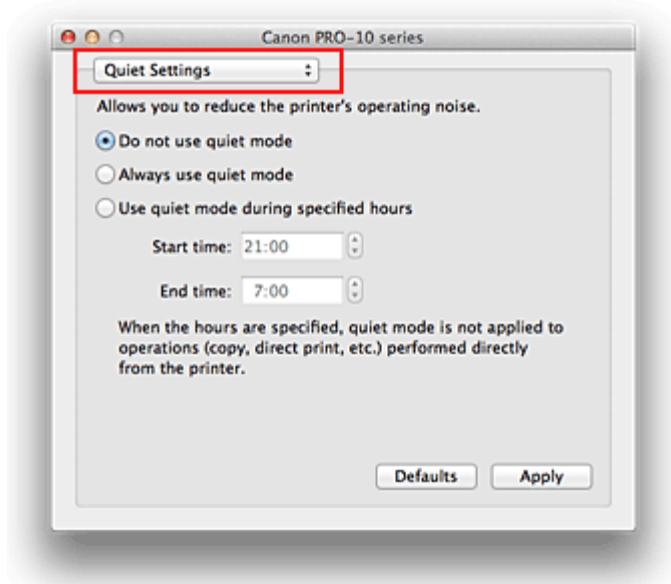

P034

Reducing the Printer Noise

The silent function allows you to reduce the operating noise of this printer. Select when you wish to reduce the operating noise of the printer at night, etc.
Using this function may lower the print speed.

The procedure for using the quiet mode is as follows:

1. Select **Quiet Settings** from the pop-up menu on the [Canon IJ Printer Utility](#)

Note

- If the computer is unable to communicate with the printer, a message appears because the computer cannot access the function information that was set on the printer.
If this happens, click **Cancel** to display the most recent settings specified on your computer.

2. Set the quiet mode

If necessary, specify one of the following items:

Do not use quiet mode

Select this option when you wish to use the printer with volume of normal operating noise.

Always use quiet mode

Select this option when you wish to reduce the operating noise of the printer.

Use quiet mode during specified hours

Select this option when you wish to reduce the operating noise of the printer during a specified period of time.

Set the **Start time** and the **End time** of the quiet mode you wish to be activated. If both are set to the same time, the quiet mode will not function.

3. Apply the settings

Make sure that the printer is on and click **Apply**.
Click **OK** when the confirmation message appears.
The settings are enabled hereafter.

Note

- The effects of the quiet mode may be less depending on the paper source and the print quality settings.
-

[Page top](#) ▲

P045

Adjusting Tone

When printing black and white photos, you can produce the cooling effects of cool colors and the warming effects of warm colors.

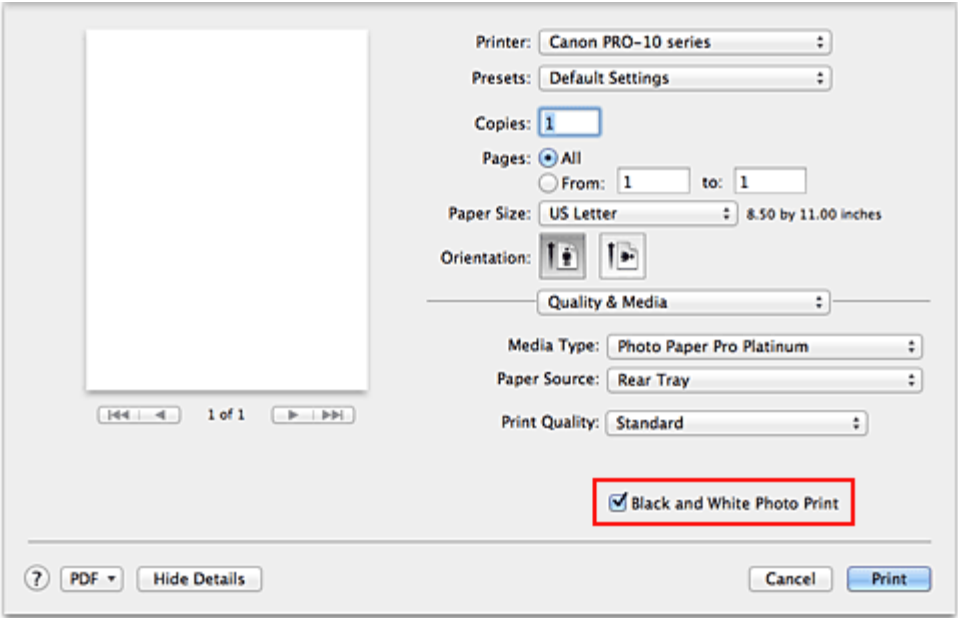

Cool Tone is selected Black and White is selected Warm Tone is selected

The procedure for adjusting tone is as follows:

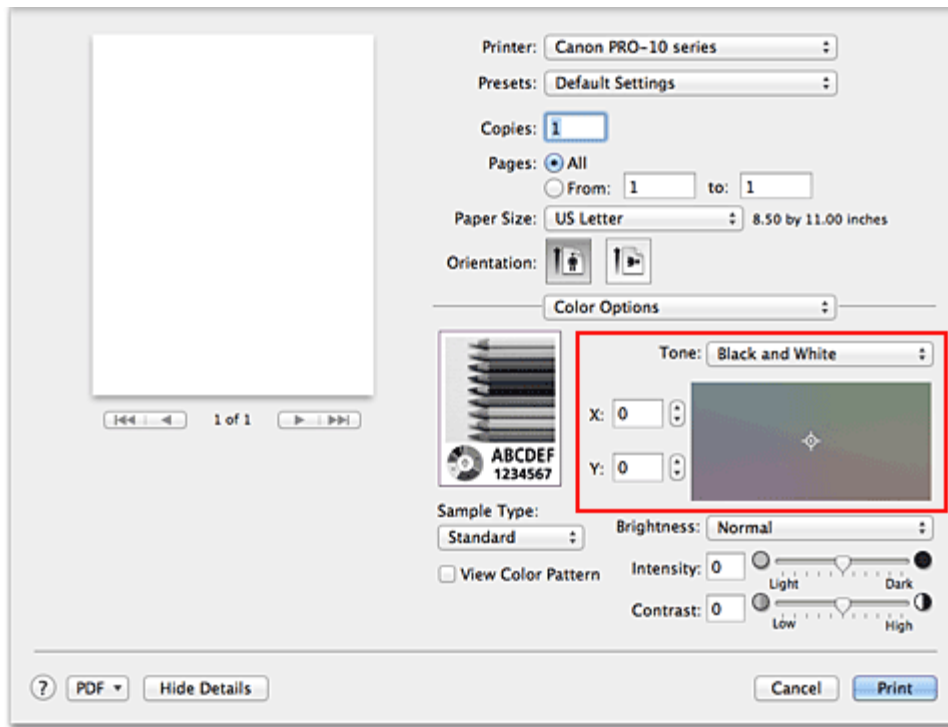

- 1. Select **Quality & Media** from the pop-up menu of the **Print Dialog**
- 2. Select the media type
For **Media Type**, select the same media type loaded in the printer.
- 3. Set black and white photo printing

Check the **Black and White Photo Print** check box.

- 4. Select **Color Options** from the pop-up menu
- 5. Adjusting monochrome tones

Specify one of the following items from **Tone**. The selected value will be shown in the preview on the left side.

Cool Tone

This item adjusts color tones to cool shades (cool black). When you select **Cool Tone**, a value of -30 is entered for **X**, and a value of 0 for **Y**.

Black and White

This item adjusts color tones to neutral shades. When you select **Black and White**, a value of 0 is entered for **X**, and a value of 0 for **Y**.

Warm Tone

This item adjusts color tones to warm shades (warm black). When you select **Warm Tone**, a value of 30 is entered for **X**, and a value of 0 for **Y**.

Custom

You can adjust the color tones while checking the colors in the adjustment area.

To adjust the color tones, either enter values directly or click the up/down arrows. When you enter values, set values in the range of -100 to 100 for **X**, and -50 to 50 for **Y**.

You can also adjust the color tones by clicking or dragging the adjustment area with the mouse.

If you select another color tone and then select **Custom** again, the values that were preset in **Custom** are restored.

Important

- **Tone** and **X, Y** (Monochromatic adjustment value) are displayed when **Black and White Photo Print** check box is selected for **Quality & Media**.

6. If necessary, adjust monochromatic colors manually

To adjust the color tones, either enter values directly to **X** or **Y** (Monochromatic adjustment value) or click the up/down arrows.

You can also adjust the color tones by clicking or dragging the adjustment area with the mouse.

7. Complete the setup

Click **Print**.

When you execute print, the color document is converted to grayscale data with adjusted tones. It allows you to print the color document in monochrome.

Important

- If you select **ColorSync** for **Color Matching**, then **Tone**, **X**, and **Y** appear grayed out and are unavailable.

Page top 

Clear Coating

This dialog allows you to set the various Clear Coating functions.

Clear Coating Area

Set the clear coating area.

Auto

The printer automatically sets the areas to be clear-coated and whether clear coating is to be executed.

It may be possible to reduce the ink consumption of the chroma optimizer (CO) or to accelerate the print speed.

Overall

The printer clear-coats the entire print area.

If selecting **Auto** produced unsatisfactory clear coating effects, selecting **Overall** may improve the results.

Custom

Use a form to specify the clear coating areas.

Select this option also when you are creating or deleting a form.

Form Composite Print

Select this item to combine forms and patterns that specify clear coating areas and to print the document by adding decorative effects.

Note that you must first create a form file to execute form composite print.

Create/Delete Form File

Select this item to create or delete a form file to be used in form composite print.

Important

- On the **Quality & Media**, look at **Media Type**. If a media type other than **Photo Paper Plus Glossy II**, **Photo Paper Pro Platinum**, **Photo Paper Plus Semi-gloss**, **Other Glossy Paper (Margin 35)**, or **Other Glossy Paper** is selected, you cannot select **Overall** or **Custom**.
- Depending on which print quality is set on the **Quality & Media**, you may not be able to select **Custom**.
- If **Overall** is selected and the media type is changed to one that cannot use **Overall**, the clear coating area setting is changed to **Auto**.
- If **Custom** is selected and the media type or the print quality is changed to one that does not support form composite print or form file creation, the clear coating area setting is changed to **Auto**.

Form Files

This function displays a list of the saved form files.

Form Name

Displays the form name.

Created date and time

Displays the form file creation date and time.

Size

Displays the paper size of the form.

Pages

Display the number of pages in the form.

Borderless (Extension)

Displays the borderless print setting of the form. When the borderless print setting is enabled, the extension amount is also displayed.

Invert Form

Selecting **Form Composite Print** allows you to reverse the clear coating areas specified in the form.

No

The printer prints the data without reversing the clear coating areas.

Yes

The printer reverses the clear coating areas and prints the data.

Apply Form

Select the method for applying the form to the document pages, when **Form Composite Print** is selected.

Same to All Pages

The first page of the selected form is applied to all pages of the document.

Individual Page

If the page count of the form file is 2 or more, the printer matches the document and form pages in sequence from the first page during printing.

If the document page count is larger than the form page count, the printer applies the **Overall** function of **Clear Coating Area** to the remaining pages.

When multiple copies are printed, the number of copies that was set for the document must also be set for the applicable form during form file creation.

Pattern

Select the pattern type and size, when **Form Composite Print** is selected.

The pattern is applied to areas that are not clear coated.

Delete

Deletes the form file that you selected in form files.

If the print queue contains a form composite print job, do not delete the form specified by that job.

Form Name

Enter the name of the form to be created.

Related Features

- Changing the Clear Coating Settings
- Create a Form File

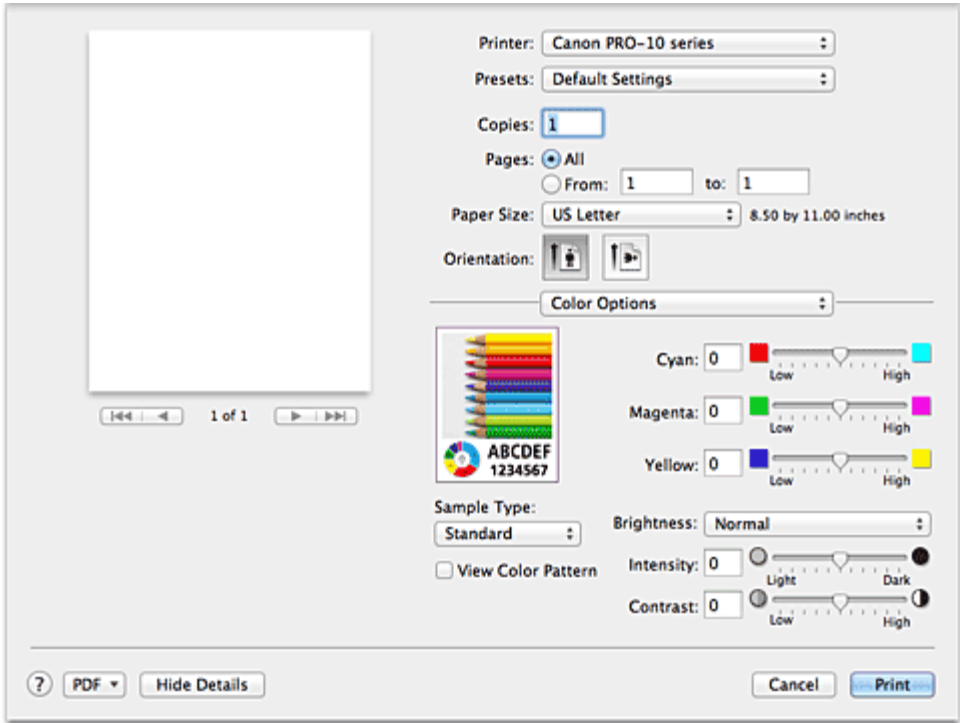

Page top ▲

Color Options

This dialog allows you to adjust the print color as you like. If the color of the printed image is not as expected, adjust the properties in the dialog and retry printing.

The adjustments made here do not affect the colors of the original print data unlike application software dedicated to image processing. Use this dialog just to make fine adjustments.

Preview

Shows the effect of color adjustment.

As you adjust each item, the effects are reflected in the color and brightness. You can check the color adjustment status easily.

Sample Type

Select an image that you want to display as a sample.

If necessary, select one from **Standard**, **Portrait**, **Landscape**, or **Graphics**, whichever is most similar to the print results.

View Color Pattern

Displays a pattern for checking color changes produced by color adjustment.

When you want to display the sample image with a color pattern, check this check box.

When you want to display the sample image with one that you selected with **Sample Type**, uncheck this check box.

Note

- When the **Black and White Photo Print** check box is checked in the **Quality & Media**, the graphic is displayed in monochrome.

Color balance (Cyan, Magenta, Yellow)

If necessary, adjust the strength of each color. To strengthen a color, drag the slider to the right. To weaken a color, drag the slider to the left.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Adjusting the color balance will result in variations in the balance among the volumes of the individual color inks and hence in the hues of the document as a whole.

Use the printer driver only when adjusting the color balance slightly. To change the color balance significantly, use the application software.

Tone

Sets the color adjustment for monochrome printing.

You can select **Cool Tone**, **Black and White**, **Warm Tone** or **Custom**.

You can also enter **X** and **Y** values while checking the color tone, click the adjustment area with the mouse, or adjust the tone by dragging the slider.

Important

- **Tone** and **X, Y** (Monochromatic adjustment value) are displayed when **Black and White Photo Print** check box is selected for **Quality & Media**.

Brightness

Select the brightness of printed images.

You cannot change the levels of pure white and black. You can change the contrast of the colors between white and black.

Intensity

Select this method to adjust the overall density of your print.

To increase the overall intensity, drag the slider to the right. To decrease the overall intensity, drag the slider to the left.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Contrast

The Contrast function changes the differences between light and dark in images during printing.

To make the differences between the light and dark portions of images greater and more distinct, increase the contrast. On the other hand, to make the differences between the light and dark portions of images smaller and less distinct, reduce the contrast.

You can also directly enter a value linked to the slider. Enter a value in the range from -50 to 50.

Important

- When the **Black and White Photo Print** check box is checked for **Quality & Media**, the color balance (**Cyan, Magenta, Yellow**) are unavailable.
- If you select **ColorSync** for **Color Matching**, then the color balance (**Cyan, Magenta, Yellow**), **Tone**, **X, Y**, **Brightness**, **Intensity**, and **Contrast** appear grayed out and are unavailable.

Page Setup Dialog

In the Page Setup dialog, you configure the basic print settings such as the size of paper loaded in the printer or the scaling ratio.

To open the Page Setup dialog, you typically select **Page Setup...** from the **File** menu of your application software.

Settings

Click the pop-up menu, and then select the following items:

Page Attributes

Set the paper size or scaled printing.

Save as Default

You can save the attributes of the displayed page as the default settings.

Format For

Select the model to be used for printing.

Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select **Manage Custom Sizes...**

Orientation

Select the print orientation.

Scale

Set the scaling percentage.

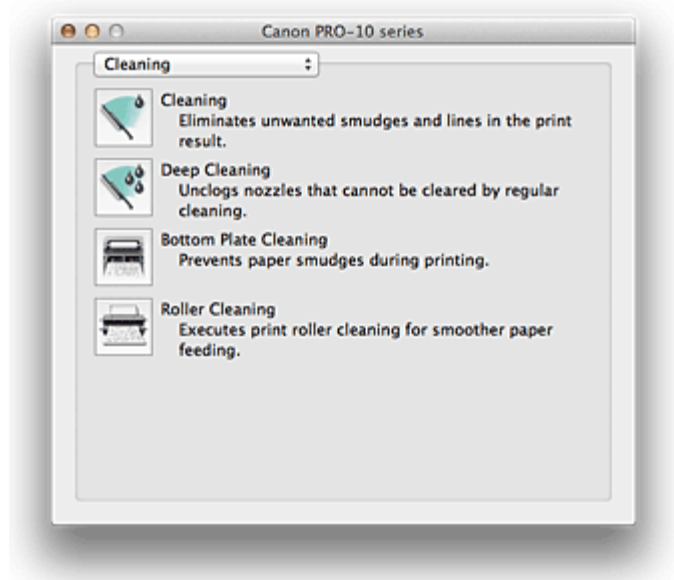

You can expand or reduce the size of the document when printing.

P707

Canon IJ Printer Utility

The Canon IJ Printer Utility allows you to perform printer maintenance or change the settings of the printer.

What You Can Do with the Canon IJ Printer Utility

You can switch between pages in Canon IJ Printer Utility by the pop-up menu. You can choose one of the following items from the pop-up menu.

Cleaning

Clean the printer to prevent print smudges and clear up clogged print head nozzle.

Test Print

Execute a test print to check the condition of the print head nozzle and to adjust the print head position.

Power Settings

Operate the power of this printer from the printer driver.

Ink Level Information

Check the remaining ink levels.

Quiet Settings

You can reduce the operating noise of the printer.

Custom Settings

Change the settings of this printer.

Note

- To operate the Canon IJ Printer Utility, you must first turn on the printer.
- Depending on the items selected, the computer communicates with the printer to obtain information. If the computer is unable to communicate with the printer, an error message appears. If this happens, click **Cancel** to display the most recent settings specified on your computer.

Print Dialog

In the Print dialog, you can set paper type, paper source and print quality to start printing.

To open the Print dialog, you typically select **Print...** from the **File** menu of your application software.

Printer

Select the model to be used for printing.

When you click **Add Printer...**, a dialog for specifying the printer opens.

Presets

You can save or delete the settings of the Print dialog.

Note

- With Mac OS X 10.7, you can select **Show Presets...** to check the print settings that are set in the Print dialog.

Copies

You can set the number of copies to be printed.

Note

- If you are using Mac OS X 10.6 or Mac OS X 10.5.8, you can also set collate printing.
- If you are using Mac OS X 10.7, you can set collated printing by choosing **Paper Handling** from the pop-up menu.

Pages

You can set the range of pages to be printed.

Paper Size

Select the size of the paper to be used for printing.

To set a non-standard size, select **Manage Custom Sizes...**

Orientation

Select the print orientation.

Pop-up Menu

You can switch between pages in the Print dialog by the pop-up menu. The first menu to appear differs depending on the application software that opened the Print dialog.

You can choose one of the following items from the pop-up menu.

Layout

You can set page layout printing.

Use **Reverse page orientation** to change the paper orientation, and use **Flip horizontally** to print a mirror image of the document.

Important

- With Mac OS X 10.5.8, you cannot use **Flip horizontally**.

Color Matching

Select the color correction method.

Paper Handling

You can set the pages to be printed on paper and the print order.

Cover Page

You can output cover pages both before and after a document.

Scheduler

You can set the print start time and print priorities.

Quality & Media

You can set basic print settings that match the printer.

Color Options

You can adjust the print colors as you desire.

Clear Coating

You can set the various Clear Coating functions.

Borderless Printing

You can adjust the amount of document that extends off the paper when performing borderless printing.

Margin

You can set the stapling side and the stapling margin.

Supply Levels

A rough indication of the remaining ink level is displayed.

Summary

The selected items in the Print dialog are displayed.

Important

- With Mac OS X 10.7, you cannot use **Scheduler** and **Summary**.
- With Mac OS X 10.5.8, you cannot use **Supply Levels**.

PDF

You can save a document in PDF (Portable Document Format) format.

Preview

If you are using Mac OS X 10.6 or Mac OS X 10.5.8, when you click  (the disclosure triangle) on the side of **Printer** and switch to the simple display, **Preview** is displayed.

This button allows you to check the print results on the screen before printing.

Various Printing Methods

- [Setting the Number of Copies and Printing Order](#)

P702

Quality & Media

This dialog allows you to create a basic print setup in accordance with the paper type. Unless special printing is required, normal printing can be performed just by setting the items in this dialog.

Media Type

Select the type of media to be used.

You must select the type of media actually loaded in the printer. This selection enables the printer to carry out printing properly for the material of the media used.

Paper Source

Select the source from which paper is supplied.

Manual Feed

Paper is supplied from the manual feed tray in the back.

Rear Tray

Paper is fed from the rear tray.

Print Quality

Select the one that is closest to the original document type and the purpose.

When one of the radio buttons is selected, the appropriate quality will be set automatically.

High

Gives priority to print quality over printing speed.

Standard

Prints with average speed and quality.

Fast

Gives priority to printing speed over print quality.

Custom

Select this radio button to specify a quality.

Quality

Selecting **Custom** in the **Print Quality** allows you to adjust the print quality level.

Dragging the slider to the right enhances the print quality while dragging the slider to the left increases the printing speed.

Black and White Photo Print

Set black and white photo printing. Black and white photo printing refers to the function of converting your document to grayscale data in the printer to print it in monochrome.

When you check the check box, both monochrome and color documents will be printed in monochrome.

When printing a color document, be sure to uncheck the check box.

What Is Print Studio Pro?

- What You Can Do with Print Studio Pro
- Starting Print Studio Pro

What You Can Do with Print Studio Pro

Print Studio Pro is a plug-in that makes professional photo printing easier and more convenient. See "[General Notes \(Print Studio Pro\)](#)" for supported applications.

In addition to printing bordered photos and borderless photos, you can perform various printing tasks such as index printing, black and white printing and printing using ICC profiles. You can also adjust the margins or add text.

You Can Do the Following

- Print Photos Easily
- Print after Color Management
- Print Black and White Photos
- Print after Correcting the Tone
- Adjust Margins
- Insert Text
- Register Settings

Print Photos Easily

You can print images developed/corrected in image editing software easily and in high quality.

➡ Printing Photos

Print after Color Management

You can print in the color tone closer to what you want by specifying a color mode according to the objective.

➡ Printing after Color Management

Print Black and White Photos

You can easily print color photos in black and white.

➡ [Printing Black and White Photos](#)

Print after Correcting the Tone

You can print in the color tone you want to use by adjusting the color balance, brightness and contrast.

➡ [Adjusting the Tones of Black and White Photos](#)

➡ [Adjusting the Color Balance, Brightness and Contrast](#)

Adjust Margins

You can adjust the margin width and set the image position. You can also print the margins in black.

➡ [Adjusting Margins](#)

Insert Text

You can insert and print text, page numbers, copyright information and photo information.

➡ [Entering Text into Photos](#)

Register Settings

You can register the settings that you made upon printing. This eliminates the need to make the same

settings repeatedly.

➡ Registering Settings

Page top ▲

Starting Print Studio Pro

Print Studio Pro can be started from Digital Photo Professional, Adobe Photoshop, Adobe Photoshop Elements or Adobe Photoshop Lightroom.

Starting from Photoshop, Photoshop Elements or Lightroom

1. Open the image you want to print in Photoshop, Photoshop Elements or Lightroom.
2. From the **File** menu, navigate as follows:
 - Photoshop
Click **Automate** > **Canon Print Studio Pro....**
 - Photoshop Elements
Click **Automation Tools** > **Canon Print Studio Pro....**
 - Lightroom
Click **Plug-in Extras** > **Canon Print Studio Pro....**

Print Studio Pro starts.

Important

- Print Studio Pro cannot be started when no image is displayed in Photoshop, Photoshop Elements or Lightroom.
- If Print Studio Pro does not appear in the menu of Photoshop, Photoshop Elements or Lightroom even after installing Print Studio Pro, follow these steps to install the Photoshop Plug-In.
 1. Exit Photoshop, Photoshop Elements or Lightroom.
 2. From the **Go** menu of **Finder**, select **Applications**, then double-click the **Canon Utilities** folder,

Print Studio Pro folder, then **Plug-In Install** icon.

3. Follow the on-screen instructions to install.

- The Photoshop Plug-In may not be installed if Photoshop, Photoshop Elements or Lightroom has never been started.
- If using Lightroom, the Photoshop Plug-In needs to be installed on a user-by-user basis. If you have multiple user accounts on the computer, install it on a user-by-user basis.
- If you create or edit an image in Photoshop or Photoshop Elements using the layer function, the image may not be displayed in Print Studio Pro. In this case, combine the image and the layer in Photoshop or Photoshop Elements.

Starting from Digital Photo Professional

1. Select the folder that contains the image you want to print in a Digital Photo Professional.
2. Select the image you want to print.
3. From the **File** menu of Digital Photo Professional, select **Plug-in printing > Print with Print Studio Pro**.

Print Studio Pro starts.

Important

- Print Studio Pro cannot be started when no image is selected in Digital Photo Professional

Page top ▲

Printing

- [Printing Photos](#)
- [Printing after Color Management](#)
- [Printing Borderless Photos](#)
- [Printing an Index](#)

Page top ▲

Printing Photos

1. Start Print Studio Pro.

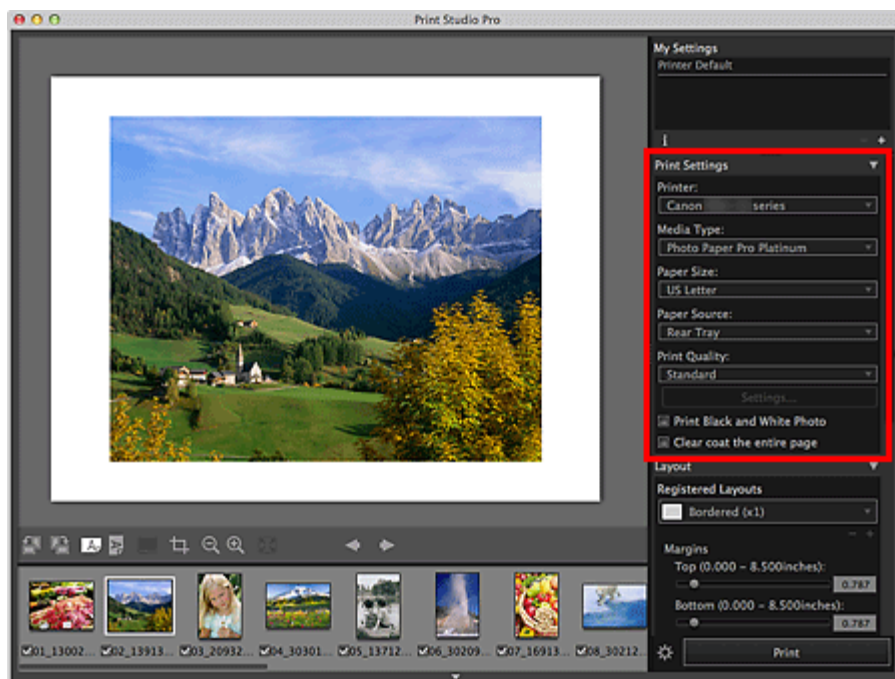

➡ Starting Print Studio Pro

2. Make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.

Note

- Images with the checkboxes selected will be printed. Deselect the checkboxes of the images you do not want to print.
- Drag to change the order to print.
- You can also change the order to print by selecting an order from the **Sort By** menu.

3. In **Print Settings**, set **Media Type**, **Paper Source**, **Print Quality**, etc. according to the printer and paper to be used.

Important

- When Fine Art is selected for **Media Type**, a 30 mm (1.18 inches) margin is automatically left at the top and bottom of the paper. It is recommended that you check the print area with the image shown in print preview before printing.
- When **Plain Paper** is selected for **Media Type**, the print result may become faint. In that case, change the **Media Type** and print.

Note

- The paper sizes and media types displayed vary depending on the selected printer.
- Refer to "Art Paper Printing Guide" for the supported types of third party paper. "Art Paper

Printing Guide" can be downloaded by accessing our website.

- Available paper sources and print quality vary depending on the selected printer and media type.
 - See "[Settings Area \(Print Settings\)](#)" for details on the Settings area (**Print Settings**).
-

4. Select the layout you want to use from **Layout**.

Note

- The layouts displayed vary depending on the selected printer, paper size and media type.
 - When a bordered layout is selected for **Layout**, you can adjust the margin width and image size.
➡ [Adjusting Margins](#)
 - See "[Settings Area \(Layout\)](#)" for details on the Settings area (**Layout**).
-

5. Load paper.

6. Click **Print**.

A message appears.

7. Click **OK**.

The Print dialog appears.

8. Click **Print**.

Note

- You can also print images in black and white or correct the tones.
➡ [Correcting the Tones of Photos](#)
 - You can also enter text or crop images. In addition, you can register settings.
➡ [Using Convenient Functions](#)
 - See "[Main Screen](#)" for details on the main screen.
-

Printing after Color Management

In Print Studio Pro, you can print by correctly reflecting the characteristics of the data displayed on the monitor, or print according to the characteristics of the paper by using ICC profiles. You can print photos in high quality by changing the print mode according to the objective.

Want to print by correctly reflecting the characteristics of the data displayed on the monitor

➡ Printing with an Impression Close to That on the Monitor

Want to print according to the characteristics of the paper to be used

➡ Printing Using ICC Profiles

Page top ▲

Printing with an Impression Close to That on the Monitor

You can print with an impression close to that on the monitor by correctly reflecting the characteristics of the data displayed on the monitor.

Important

- When you want to print with an impression close to that on the monitor, it is recommended that you set the monitor and ambient light as follows.
 - Monitor
 - Color temperature: D50 (5000 K)
 - Luminance: 120 cd/m2
 - Gamma: 2.2
 - Ambient light
 - D50 fluorescent lamps designed for color evaluation (color temperature: 5000 K, high color rendering properties)
 - Brightness when viewing printed materials: 500 lx ± 125 lx

1. Start Print Studio Pro, then make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.

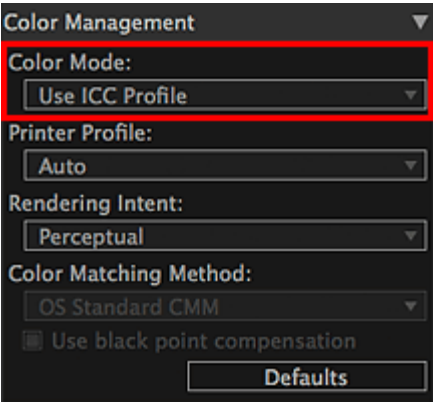

Note

- Refer to "Starting Print Studio Pro" for how to start Print Studio Pro.

2. Select **Use ICC Profile** or **PRO Mode** for **Color Mode** in **Color Management**.

Select a color mode according to the color space of the image to be printed. Canon recommends the following combinations.

Color Space	Color Mode
Adobe RGB	Use ICC Profile (Rendering Intent: Perceptual)
sRGB	PRO Mode

Important

When **Use ICC Profile** is selected, select **Perceptual** for **Rendering Intent**.

3. Click **Print.**

A message appears.

4. Click **OK.**

The Print dialog appears.

5. Click **Print.**

 **Note**

- You can also change the color balance, brightness and contrast of the images.
 - ➡ [Adjusting the Color Balance, Brightness and Contrast](#)
- See "[Settings Area \(Color Management\)](#)" for details on the Settings area (**Color Management**).

Page top ▲

Printing Using ICC Profiles

By specifying an ICC profile, you can print according to the paper to be used or print by utilizing the color space of the image developed/corrected in Adobe RGB or sRGB.

Important

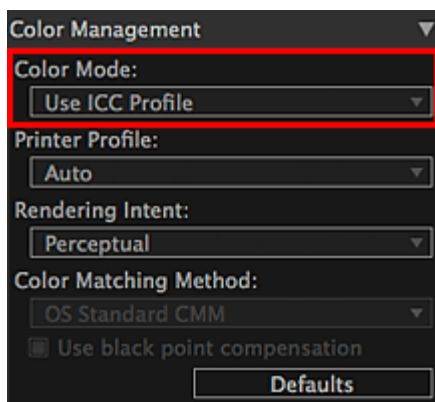

- Only Ver.2.x of the printer ICC profiles supports Print Studio Pro. Other versions of ICC profiles cannot be used.

1. Start Print Studio Pro, then make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.

Note

- Refer to "[Starting Print Studio Pro](#)" for how to start Print Studio Pro.

2. Select **Use ICC Profile** from **Color Mode** in **Color Management**.

3. Select **Auto** from **Printer Profile**.

Note

- For **Auto**, the profile suitable for the selected printer, paper and print quality is automatically selected.
- You can also manually select the ICC profile you want to use.

4. Select **Perceptual** or **Relative Colorimetric** from **Rendering Intent**.

Note

- Perceptual:** Prints by utilizing the color space that can be reproduced on the printer. Select this when you want to print with an impression close to that on the monitor since the characteristics of the data displayed on the monitor will be reflected correctly.
See "[Printing with an Impression Close to That on the Monitor](#)" for details.
- Relative Colorimetric:** Converts the image to the printer's color space in a way that the image's colors that are within the color gamut of the printer are reproduced to the nearest level. Select this when you want to print in colors that are close to the original image.

5. Click **Print.**

A message appears.

6. Click **OK.**

The Print dialog appears.

7. Click **Print.**

Note

- You can also change the color balance, brightness and contrast of the images.
 - ➡ [Adjusting the Color Balance, Brightness and Contrast](#)
 - See "[Settings Area \(Color Management\)](#)" for details on the Settings area (**Color Management**).
-

Page top ▲

Printing Borderless Photos

You can print borderless photos by selecting a borderless layout in **Layout**.
Select the layout in which you want to print, then select the paper orientation.

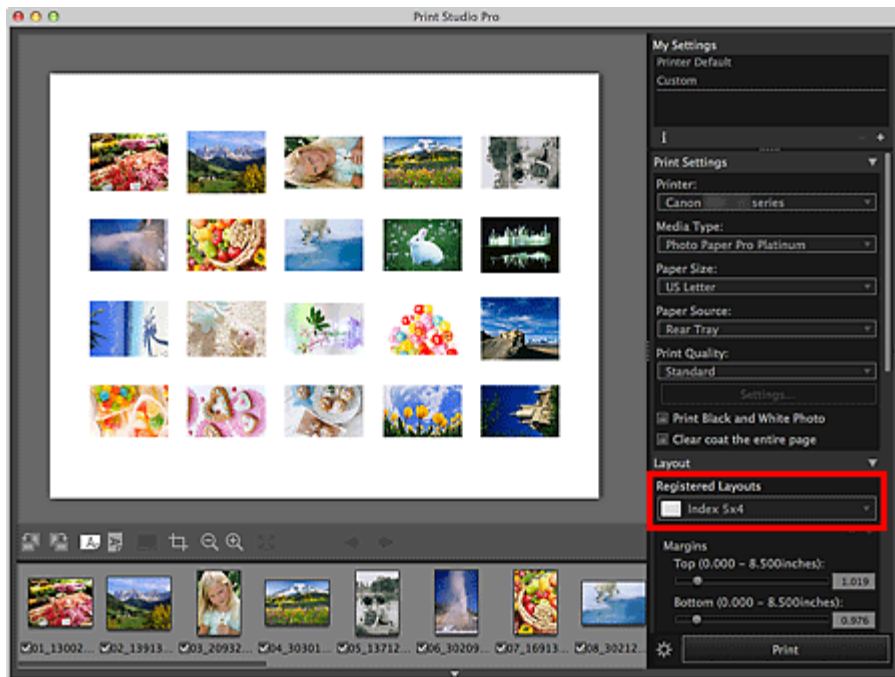

Note

- Click  (Advanced Print Settings) to set the amount of extension. See "[Advanced Print Settings Dialog](#)" for details.

Printing an Index

You can print an index of selected images. Index print is very useful for organizing images since it allows you to view images in a list.

Select **Index 5x4** from **Registered Layouts** in **Layout** and print.

Important

- You can print up to 100 (10 x 10) images on a sheet of paper.

Note

- You can set the margin width and the number of images to be placed (the number of rows and columns).
 - ➡ [Adjusting Margins](#)
- You can also enter text and print.
 - ➡ [Entering Text into Photos](#)
- See "[Settings Area \(Layout\)](#)" for details on the Settings area (**Layout**).

Correcting the Tones of Photos

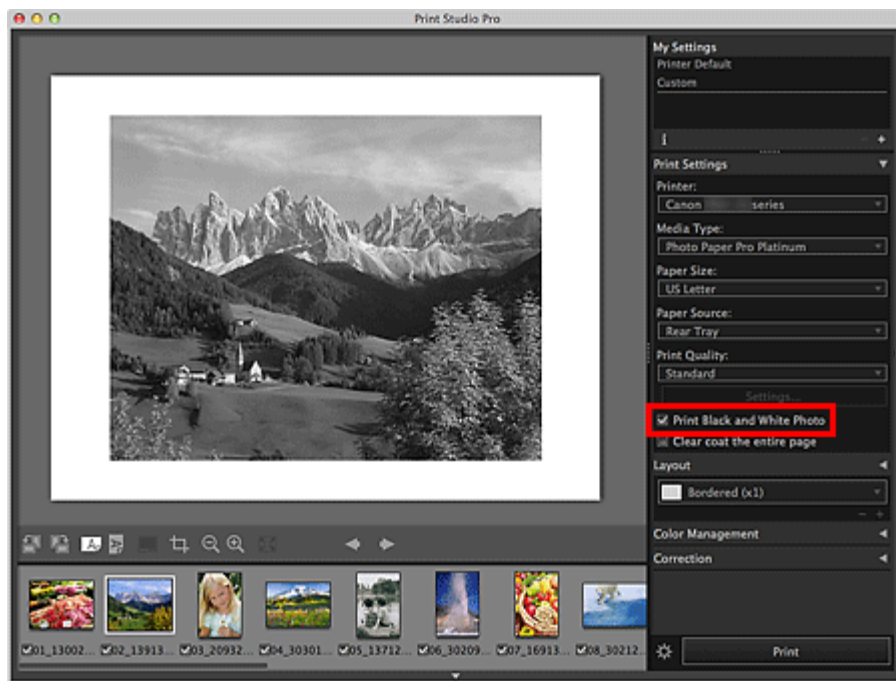

- [Printing Black and White Photos](#)
- [Adjusting the Tones of Black and White Photos](#)
- [Adjusting the Color Balance, Brightness and Contrast](#)

[Page top ▲](#)

Printing Black and White Photos

Print color images in black and white. You can also print photos shot in black and white or data converted to black and white in image editing software.

1. Make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.
2. Select the **Print Black and White Photo** checkbox in **Print Settings**.

Important

- When the **Print Black and White Photo** checkbox is selected, all the images to be printed will be printed in black and white.

3. Click **Print**.
A message appears.
4. Click **OK**.
The Print dialog appears.
5. Click **Print**.

Note

- You can adjust the black and white tone. See "[Adjusting the Tones of Black and White Photos](#)" for details.

Adjusting the Tones of Black and White Photos

When printing a black and white image, you can specify a tone to adjust its color tone. You can also make a fine adjustment to the color tone.

(1)

(2)

(3)

(1) Cool Tone: A cool bluish tone

(2) Black and White: A tone that looks like an achromatic color

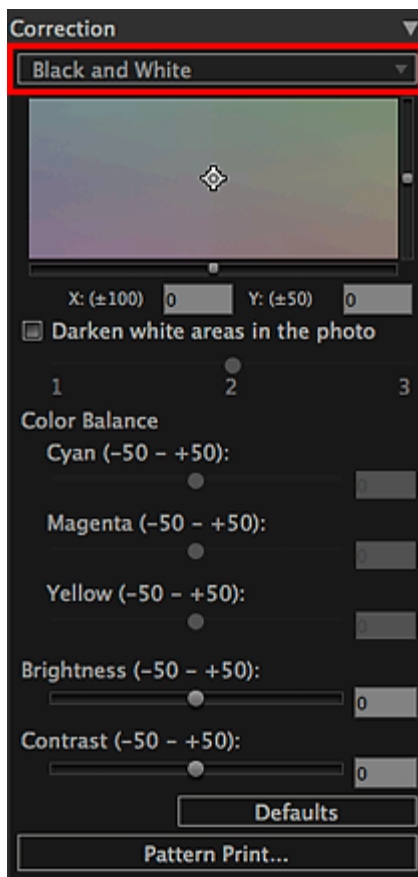

(3) Warm Tone: A warm yellowish tone

Important

- The results of adjustments in Print Studio Pro will only be reflected in the printed materials and not in the image data.

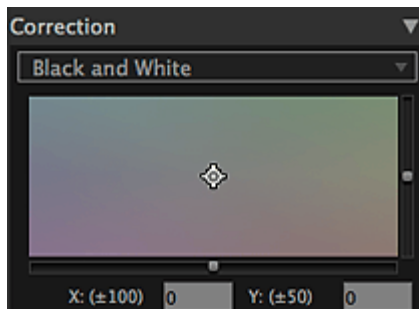

1. Make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.
2. Select the **Print Black and White Photo** checkbox in **Print Settings**.
3. Select a black and white tone in **Correction**.

Select a tone from **Cool Tone**, **Black and White** and **Warm Tone**.

Note

- In the black and white color tone adjustment space, you can make a fine adjustment to the color tone of the image. Click on the color close to what you want.
The black and white tone switches to **Custom** when you make a fine adjustment in the black and white color tone adjustment space.

Important

- If the result of printing after adjusting the color tone is different from what is displayed in print preview, perform Pattern Print and adjust the color again, using the pattern as a reference.
➡ [Adjusting the Color Tones of Black and White Photos by Looking at Patterns \(Print Studio Pro\)](#)

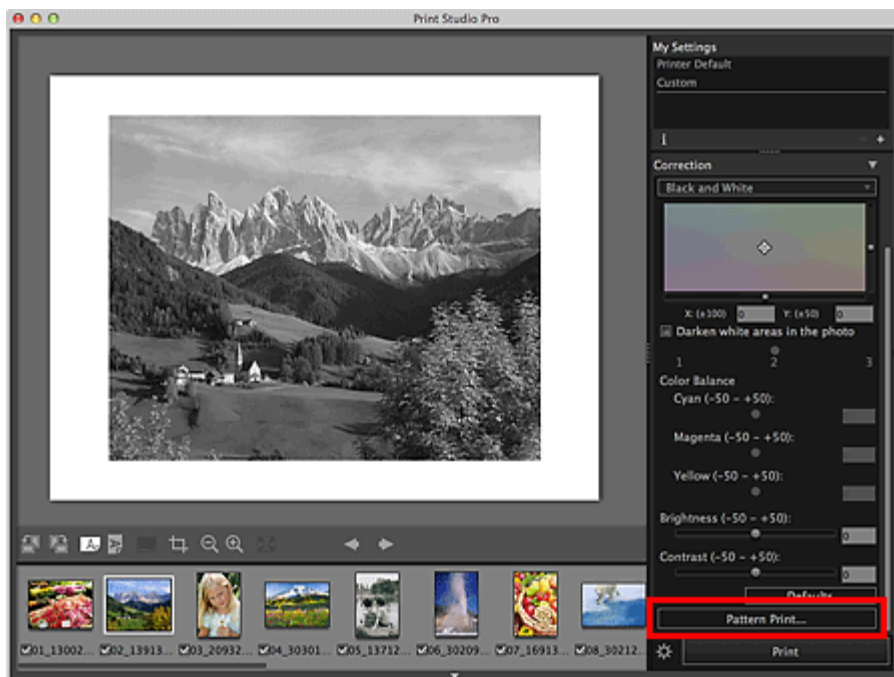

Note

- When the **Darken white areas in the photo** checkbox is selected, the highlights in the image will be darkened to make it easier to distinguish the boundary between the image and the paper.
- Refer to "[Adjusting the Color Balance, Brightness and Contrast](#)" to change the brightness/contrast.
- See "[Settings Area \(Correction\)](#)" for details on the Settings area (**Correction**).

Adjusting the Color Tones of Black and White Photos by Looking at Patterns (Print Studio Pro)

Adjust the color tone of a black and white photo by printing and viewing a pattern with which you can check the color tones of the black and white photo.

1. Select the image of which you want to print a pattern.
2. Click **Pattern Print...** in **Correction**.

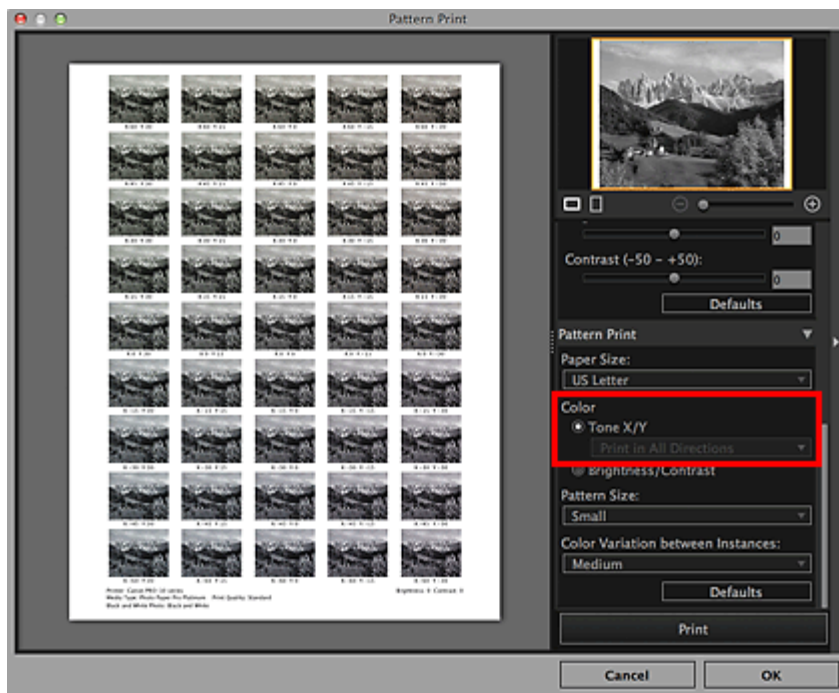

The **Pattern Print** window appears.

3. Finely adjust the color tone in **Correction** as needed.

Note

- Refer to "[Adjusting the Tones of Black and White Photos](#)" for how to adjust the color tone.

4. Select **Paper Size** according to the paper to be used for Pattern Print.
5. Select **Tone X/Y** in **Pattern Print**.

6. Select **Pattern Size** and **Color Variation between Instances**.

7. Click **Print**.

A message appears.

8. Click **OK**.

The Print dialog appears.

9. Click **Print**.

The pattern is printed.

10. From the printed pattern, enter the values described under the image with the color tone you want into the X-coordinate and Y-coordinate.

11. Click **OK** in the **Pattern Print** window.

The **Pattern Print** window closes; the values are reflected in the black and white color tone adjustment space in the main screen.

Note

- You can also change the print area used for Pattern Print. See "Pattern Print Window" for details.

S744

Print Studio Pro

Adjusting the Color Balance, Brightness and Contrast

Adjust the color tones of images by specifying the color balance, brightness and contrast.

Important

- The color balance, brightness and contrast adjustments apply to all the images to be printed. To adjust each image individually, it is recommended that you use image editing software.
- The results of adjustments in Print Studio Pro will only be reflected in the printed materials and not in the image data.

1. Make sure that the images you want to print are displayed in the Thumbnails area at the bottom left of the screen.
2. Adjust **Color Balance** in **Correction**.

Important

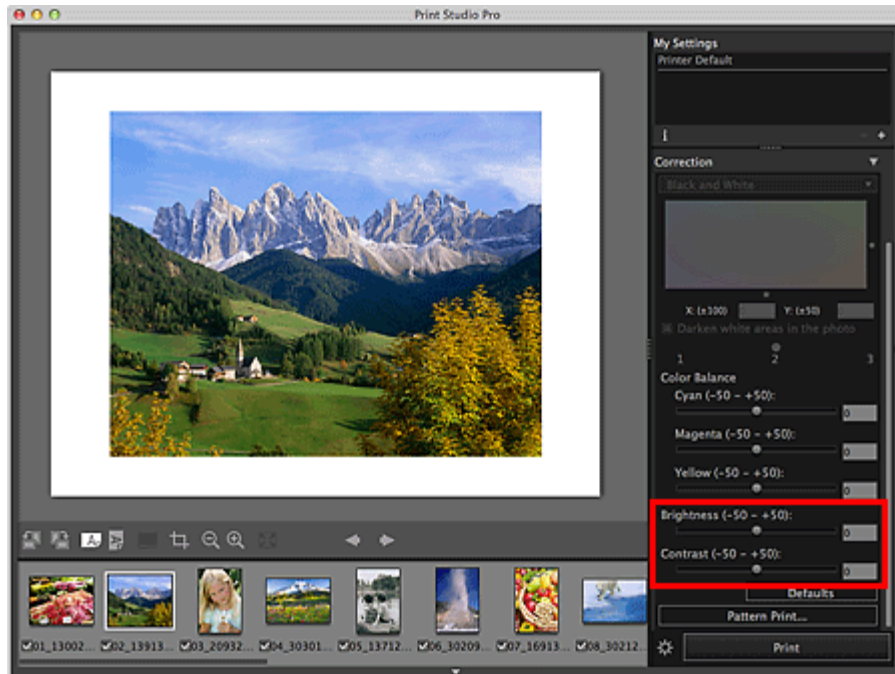

- The color balance cannot be set when the **Print Black and White Photo** checkbox is selected in **Print Settings**. If the **Print Black and White Photo** checkbox is selected after changing the color balance, the changed color balance will be discarded.
- If the result of printing after adjusting the color balance is different from what is displayed in print preview, perform Pattern Print and adjust the color again, using the pattern as a reference.

Note

- Move the slider to the right to emphasize and left to weaken the color tone.
- You can also set by entering a value directly into the text input box.

3. Adjust **Brightness** and **Contrast**.

Important

- If the result of printing after adjusting the brightness/contrast is different from what is displayed in print preview, perform Pattern Print and adjust the color again, using the pattern as a reference.
➡ [Adjusting the Brightness/Contrast by Looking at Patterns \(Print Studio Pro\)](#)

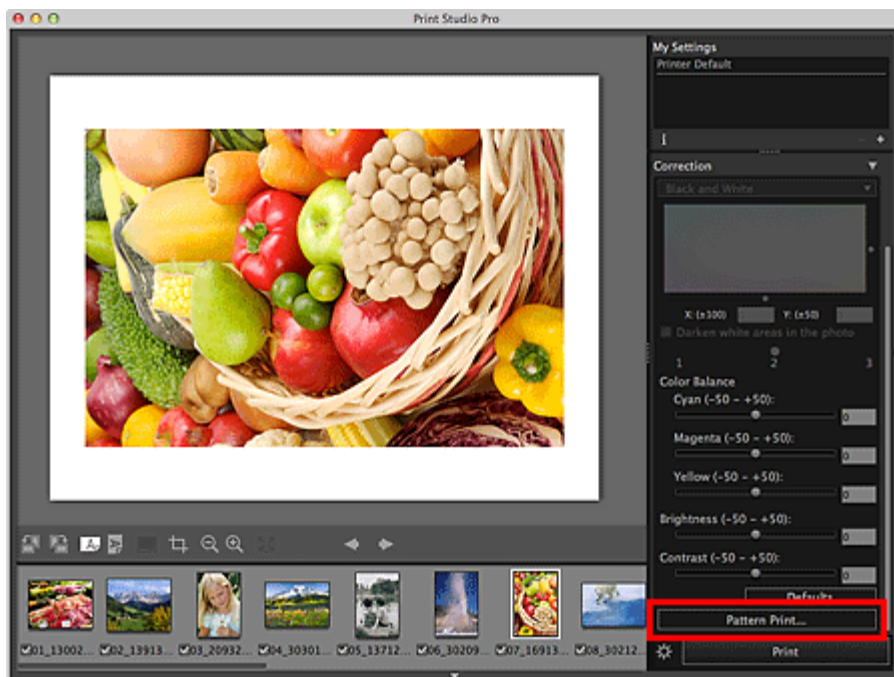

Note

- For **Brightness**, move the slider to the right to brighten and left to darken.
- For **Contrast**, move the slider to the right to increase and left to decrease the contrast.
- You can also set by entering a value directly into the text input box.

Adjusting the Color Balance by Looking at Patterns (Print Studio Pro)

Adjust the color balance by printing and viewing a pattern with which you can check the color balance of the image.

1. Select the image of which you want to print a pattern.
2. Click **Pattern Print...** in **Correction**.

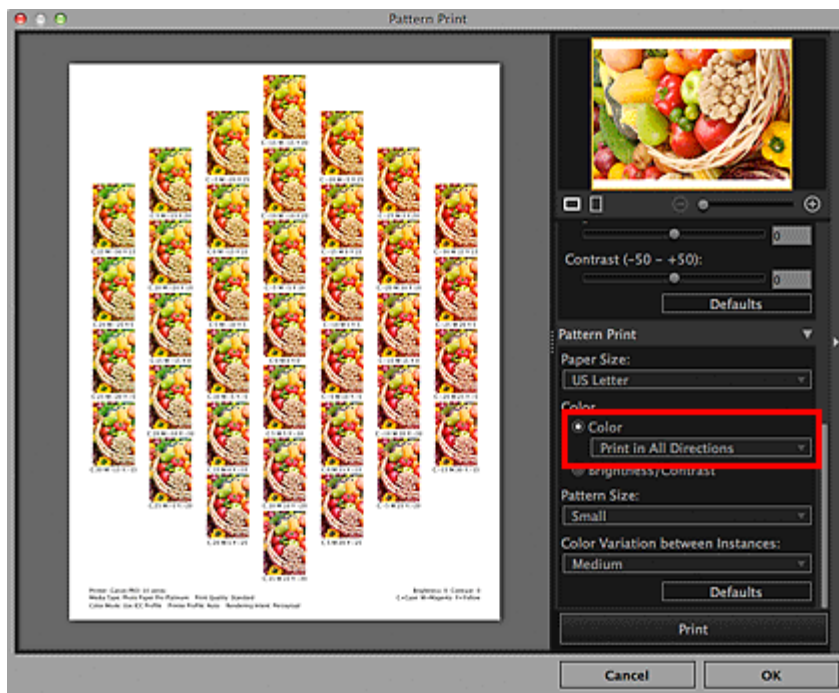

The **Pattern Print** window appears.

3. Finely adjust the color tone in **Correction** as needed.

Note

- The black and white tone can be set when the **Print Black and White Photo** checkbox is selected in **Print Settings** in the main screen.
- Refer to "[Adjusting the Color Balance, Brightness and Contrast](#)" for how to adjust the color tone.

4. Select **Paper Size** according to the paper to be used for Pattern Print.
5. Select **Color** in **Pattern Print**.

6. Select the color direction in which you want to adjust.

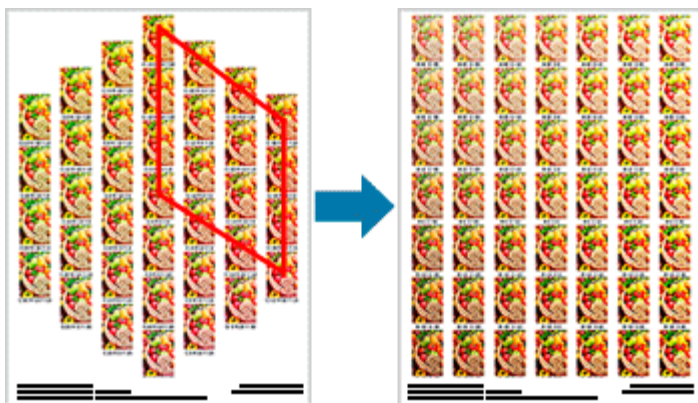

Note

- Select **Print in All Directions** to print a pattern adjusted in the following six color directions, with the currently entered color balance values in the center. You can check the color direction in which you want to adjust the color balance.

Print in Direction R (upper right): Red
Print in Direction Y (up): Yellow
Print in Direction G (upper left): Green
Print in Direction C (lower left): Cyan
Print in Direction B (down): Blue
Print in Direction M (lower right): Magenta

- Select a specific color direction to print a pattern adjusted in the selected color direction, with the currently entered color balance values at the bottom left. For example, select **Print in Direction R** to print a more detailed pattern of the area in the R direction (framed area) of the pattern for all directions; this allows you to check more variations than in all directions.

7. Select **Pattern Size** and **Color Variation between Instances**.

8. Click **Print**.

A message appears.

9. Click **OK**.

The Print dialog appears.

10. Click **Print**.

The pattern is printed.

11. From the printed pattern, enter the values described under the image with the color balance you want into **Color Balance**.

12. Click **OK** in the **Pattern Print** window.

The **Pattern Print** window closes; the values are reflected in **Color Balance** in the main screen.

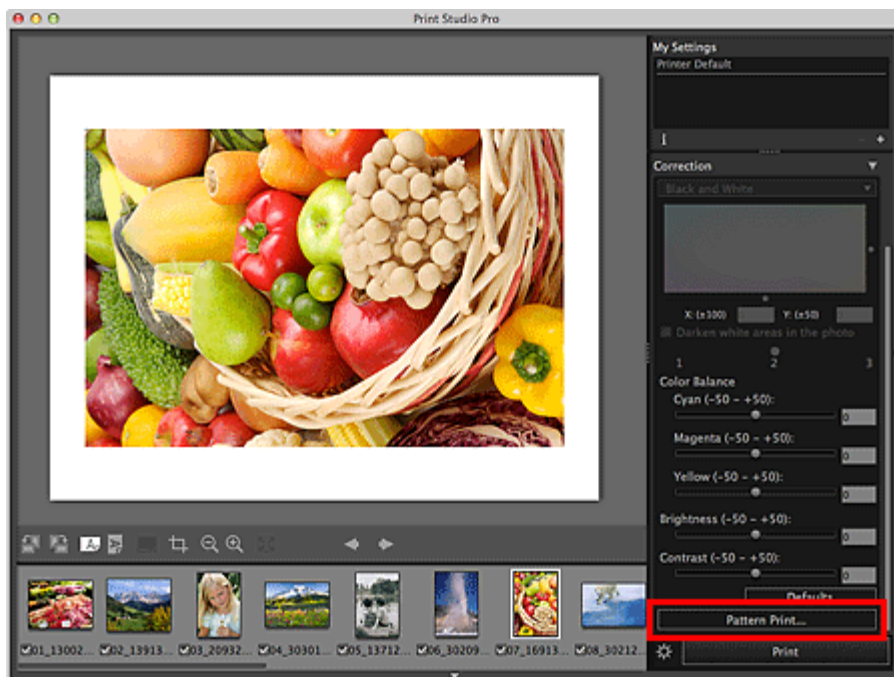

Note

- You can also change the print area used for Pattern Print. See "[Pattern Print Window](#)" for details.

Adjusting the Brightness/Contrast by Looking at Patterns (Print Studio Pro)

Adjust the brightness and contrast by printing and viewing a pattern with which you can check the brightness and contrast of the image.

1. Select the image of which you want to print a pattern.
2. Click **Pattern Print...** in **Correction**.

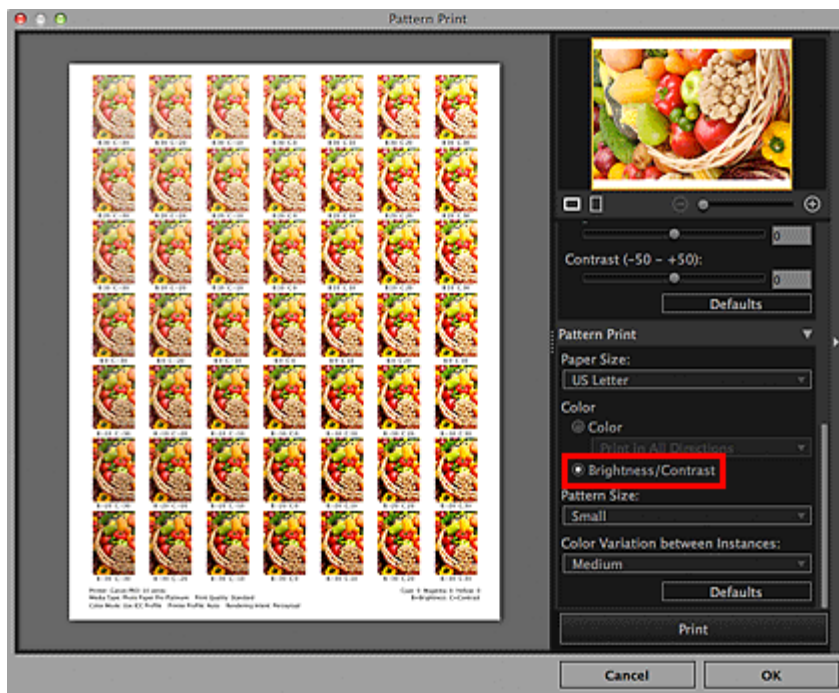

The **Pattern Print** window appears.

3. Finely adjust the color tone in **Correction** as needed.

Note

- Refer to "Adjusting the Color Balance, Brightness and Contrast" for how to adjust the color tone.

4. Select **Paper Size** according to the paper to be used for Pattern Print.
5. Select **Brightness/Contrast** in **Pattern Print**.

6. Select **Pattern Size** and **Color Variation between Instances**.

7. Click **Print**.

A message appears.

8. Click **OK**.

The Print dialog appears.

9. Click **Print**.

The pattern is printed.

10. From the printed pattern, enter the values described under the image with the brightness and contrast you want into **Brightness** and **Contrast**.

11. Click **OK** in the **Pattern Print** window.

The **Pattern Print** window closes; the values are reflected in **Brightness** and **Contrast** in the main screen.

Note

- You can also change the print area used for Pattern Print. See "[Pattern Print Window](#)" for details.

Using Convenient Functions

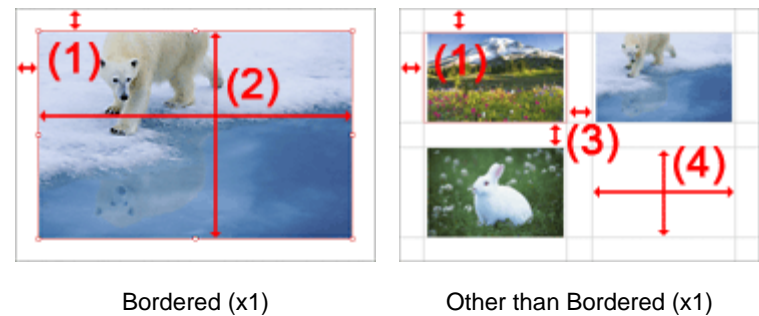

- [Adjusting Margins](#)
- [Entering Text into Photos](#)
- [Cropping Photos](#)
- [Registering Settings](#)

Adjusting Margins

You can adjust margins when printing in a bordered layout or when printing an index.

Items that can be adjusted for margins vary by layout.

- (1) Margins (Top, Bottom, Left and Right)
- (2) Image Size (Height and Width)
- (3) Cell Spacing (Vertical and Horizontal)
- (4) Cell Size (Height and Width)

- Setting Margin Values
- Setting According to the Paper
- Changing Image Size
- Changing Cell Spacing and Cell Size
- Making Margins and Cell Spacing Black

Important

- When changing **Image Size** and **Margins**, set **Print Settings** and the layout beforehand. When you change **Print Settings** or layout, **Margins** and **Image Size** return to the original settings.

Note

- When the **Bordered (x1)** layout is selected, you can set margins by page. When a layout other than **Bordered (x1)** is selected, the settings apply to all pages.

Setting Margin Values

Set margin values. The image size changes according to the margin values.

1. Set the top, bottom, left and right margins in **Margins**.

Set the margin values by moving the sliders for top, bottom, left and right.

The image size is enlarged or reduced according to the margin values.

Important

- When a cropping frame is set for the image, the image will be cropped according to the margin values instead of being enlarged or reduced.

Note

- You can also set by entering a value directly into the text input box.
- For **Bordered (x1)**, you can change the margin values by dragging the image in preview directly. For layouts other than **Bordered (x1)**, you can change the margin values by dragging the gray lines.
- The available range of margin values varies depending on the selected paper size.

Setting According to the Paper

You can place an image in the center of the paper or place it with even margins on the left and right.

1. Select an image alignment from **Alignment** or click **Align with Page Margins**.

When an image alignment is selected from **Alignment**, the image will be aligned accordingly at the current image size.

When you click **Align with Page Margins**, the image will be placed after being enlarged to the maximum size at which it can be printed in a bordered layout.

Note

- **Align with Page Margins** can be set only when **Alignment** is **None**.

Changing Image Size

For **Bordered (x1)**, change the image size. The margin values change according to the image size.

1. Set the height and width in **Image Size**.

Set the image size by moving the sliders for height and width. The image is enlarged or reduced to the specified image size.

Important

- When a cropping frame is set for the image, the image will be cropped to the specified image size instead of being enlarged or reduced.

Note

- You can also change the image size by dragging the red frame in preview.
- You can also set by entering a value directly into the text input box.

Changing Cell Spacing and Cell Size

For layouts other than **Bordered (x1)**, change the cell spacing and cell size.

1. Set **Cell Spacing** or **Cell Size**.

For **Cell Spacing**, set by moving the sliders for vertical and horizontal. All cells are enlarged or reduced according to the cell spacing.

For **Cell Size**, set the cell size by moving the sliders for height and width. The spacing between all cells is enlarged or reduced according to the cell size.

Important

- When a cropping frame is set for the image, the image will be cropped to the specified image size instead of being enlarged or reduced.

Note

- You can also change the cell size by dragging the red frame or gray lines in preview.
- You can also set by entering a value directly into the text input box.

Making Margins and Cell Spacing Black

You can make margins and cell spacing black.

1. Set the margin values and cell spacing.

2. Select the **Print the margins in black** checkbox.

The margins and cell spacing turn black.

Important

- When text is entered and the font color is set to black, selecting the **Print the margins in black** checkbox automatically changes the font color for the header, footer, page numbers and photo information to white.
- Margins may not be printed black up to the edges of the paper depending on the selected media type.

Note

- Click  (Add Layout) in the Settings area (**Layout**) to register the changed margin settings.
 - See "[Settings Area \(Layout\)](#)" for details on the Settings area (**Layout**).
-

Page top 

Entering Text into Photos

You can superimpose and print copyright information on the image; when printing in a bordered layout or when printing an index, you can print text, the page numbers, the print information and the photo information in the margins.

Select a layout in **Layout**, then, in **Text Settings**, select the checkboxes of the text items you want to print, and enter text.

- (1) Header
- (2) Footer
- (3) Page Number
- (4) Copyright Information
- (5) Photo Information

Note

- **Print header, Print footer, Print page number** and **Print photo information** can be set only when a bordered layout or index is selected.
- When you want to print the print information, select the **Print footer** checkbox and **Print the print settings info.** checkbox.
- You can set text input details such as font and font size. See "[Text Settings Dialog](#)" for details.

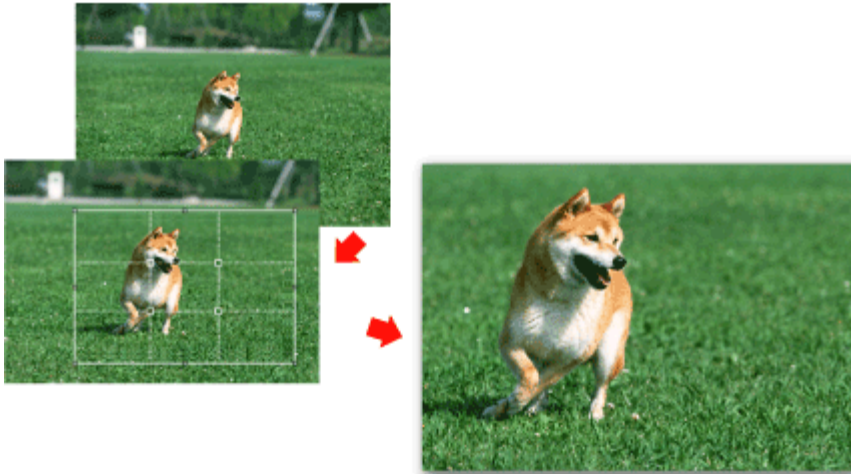

Cropping Photos

Cropping is the act of selecting the area you want to keep in an image and discarding the rest.

Select the image you want to crop, then click  (Crop) in the Tools area to display the **Crop** window. Drag the white squares on the image to adjust the area to be cropped, then click **OK**.

Note

- For bordered layouts, a white frame appears when you drag the area you want to crop.
- To move the cropping area, place the cursor within the white frame and drag it. You can enlarge or reduce the cropping area by dragging the white frame.
- Select the **Display lines for the rule of thirds** checkbox to display the guideline. Place an intersection of the guideline over the main subject such as a person or building to create a balanced image.

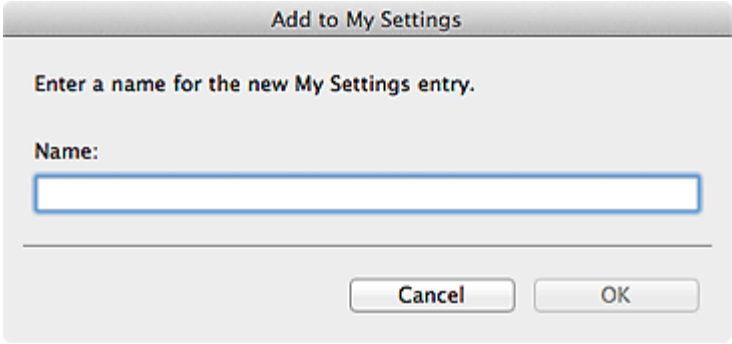

- When cropping is performed, it applies only to the print result; the original image will not be affected. The original image will not be cut off.
- For cropped images, the  (Crop) mark appears on the upper left of the thumbnails.
- See "Crop Window" for details on the **Crop** window.

Registering Settings

You can register print settings and settings of layout, color management and correction made in the Settings area. Once added, the group of settings can be loaded from a list, allowing you to print images easily with the same settings.

Set each item in the Settings area. Enter the name into the **Add to My Settings** dialog displayed by clicking  (Add) in **My Settings**, then click **OK**.

The dialog box is titled "Add to My Settings". It contains the instruction "Enter a name for the new My Settings entry." followed by a label "Name:" and a text input field. At the bottom, there are two buttons: "Cancel" and "OK".

Note

- Click  (Delete) to delete the selected My Settings entry from the list.
- Click  (Display Information) to check the details of the selected My Settings entry.
- You can enter up to 64 characters for the name.
- You cannot set "Printer Default" or "Custom" for the name.
- You can register up to 100 entries.
- You can also register the layout settings individually in **Layout** in the Settings area.

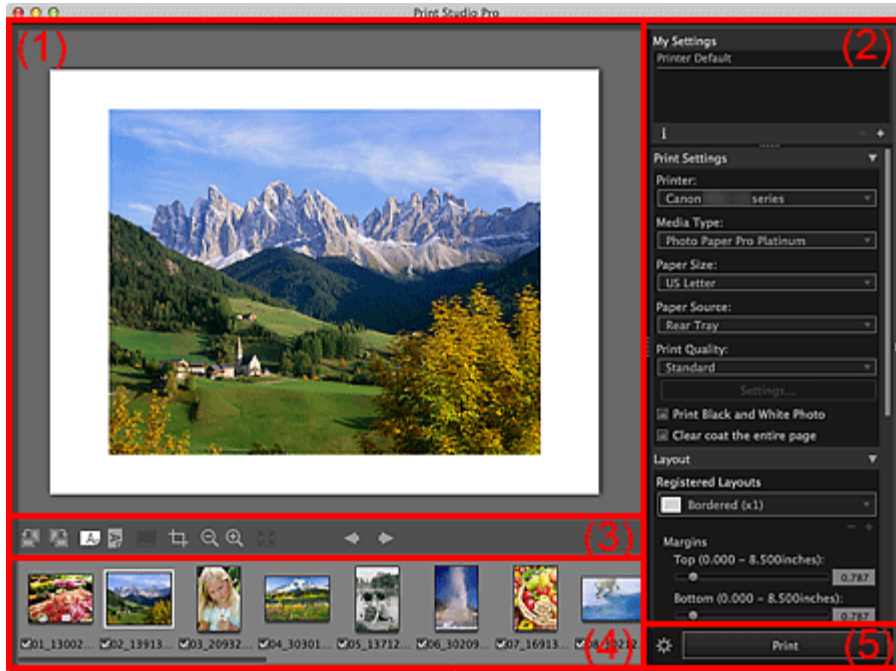

Print Studio Pro Screens

- Main Screen
- Advanced Print Settings Dialog
- Text Settings Dialog
- Pattern Print Window
- Crop Window
- Other Settings Dialog

Page top ▲

Main Screen

This is the screen in which you handle various functions of Print Studio Pro. You can correct color tones of images, perform printing, etc. by operating in the corresponding area.

- (1) Preview
- (2) Settings Area
- (3) Tools Area
- (4) Thumbnails Area
- (5) Print Button Area

Note

- You can show or hide the Thumbnails area with  (Triangle) at the bottom of the screen. You can show or hide the Settings area with  (Triangle) at the rightmost of the screen.

(1) Preview

Displays the previews of the selected images. You can make edits or adjust margins while viewing the result since the settings are reflected as you make them.

When multiple images are laid out on one page, you can rearrange the images, change the image size, etc. by dragging them in preview.

(2) Settings Area

You can register settings or make settings for printing.

The Settings area consists of the following categories. See the corresponding page for details.

My Settings

➡ Settings Area (My Settings)

Print Settings

➡ Settings Area (Print Settings)

Layout

➡ Settings Area (Layout)

Color Management

➡ Settings Area (Color Management)

Correction

➡ Settings Area (Correction)

Note

- Click  (Triangle) to display the corresponding category in the Settings area.

(3) Tools Area

Change the orientation of the page or image displayed in preview, or change the display size.

(Rotate Left)

Rotates the image 90 degrees counterclockwise.

(Rotate Right)

Rotates the image 90 degrees clockwise.

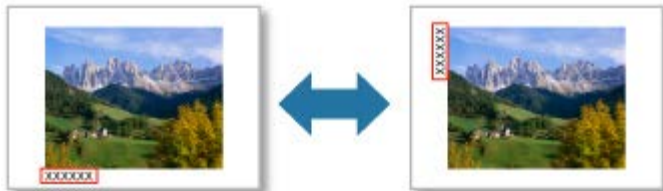

(Display the Page Horizontally/Display the Page Vertically)

Displays the page in horizontal or vertical orientation.

(Photo Information)

Switches the position to display the photo information between the bottom and left sides of the image.

(Crop)

Displays the **Crop** window in which you can crop the image.

➡ Crop Window

(Reduce/Enlarge)

Reduces or enlarges the display size of preview.

Display ranges are 25%, 50%, 75%, 100%, 200%, 300% and 400%.

(Whole Image View)

Displays the preview at the size at which the whole page can be displayed.

(Display the Previous Page/Next Page)

Switches the displayed page when there are multiple pages.

Note

Images whose checkboxes are not selected in the Thumbnails area do not appear.

(4) Thumbnails Area

Displays the thumbnails of images.

Images with the checkboxes selected will be printed.

You can change the order of images by selecting and dragging them.

Note

- You can select multiple images by clicking them while pressing the control key.
-

(5) Print Button Area

Print

You can print images.

Note

- Printing will be performed in the order displayed in the Thumbnails area.
-

(Advanced Print Settings)

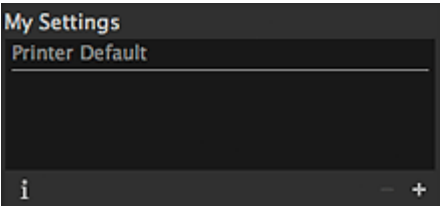

Displays the **Advanced Print Settings** dialog in which you can make settings for printing.

➡ [Advanced Print Settings Dialog](#)

Page top ▲

Settings Area (My Settings)

Register or load the settings (Print Settings, Layout, Color Management and Correction) made in the Settings area.

My Settings List

Displays a list of the names of registered My Settings entries.
You can register up to 100 entries to My Settings.

Note

- When you select **Printer Default**, the settings made in the Settings area return to the default settings of the printer to be used.
- You can drag to change the display order.

(Display Information)

Displays the **My Settings Information** window in which you can check the details of the selected My Settings entry.

(Delete)

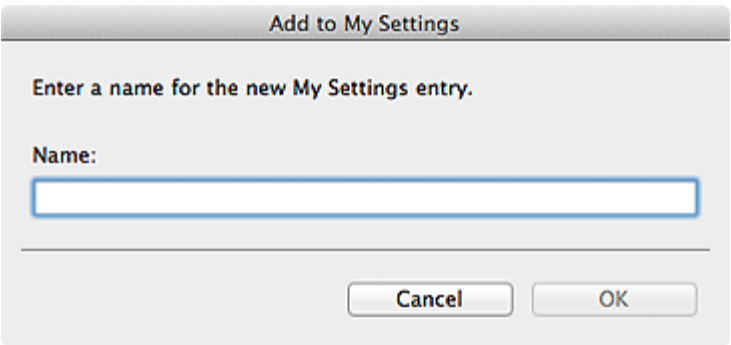

Deletes the selected My Settings entry.

Note

- You cannot delete **Printer Default** or **Custom**.

(Add)

Displays the **Add to My Settings** dialog from which you can register the current settings to My Settings.

Name

Enter the name of the settings to be registered.

Note

- You can enter up to 64 characters.

- You cannot use a name, "Printer Default" and "Custom" that are already registered.
-

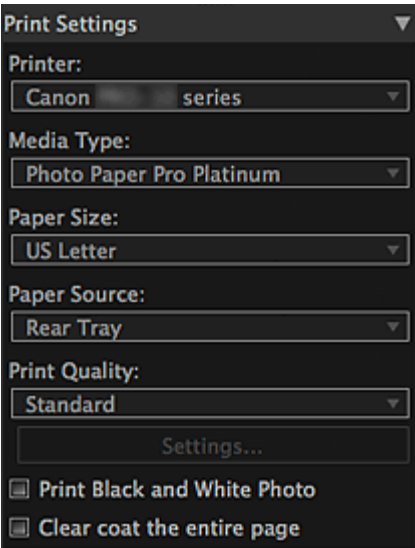

[Page top ▲](#)

Settings Area (Print Settings)

You can set the printer, paper, print quality, etc. to be used for printing.

Note

- The displayed items vary by the printer to be used.
- Available media types, paper sizes and paper sources vary depending on the printer to be used.

Printer

Select the printer to be used.
Among the printers installed on your computer, only printers supporting Print Studio Pro appear in the list.

Media Type

Select the type of paper to be used.

Paper Size

Select the size of the paper to be used.

Paper Source

Select the paper source.

Print Quality

Select the print quality from **High**, **Standard**, **Fast** and **Custom** according to the data to be printed.

Settings...

Select **Custom** and click this to display the **Print Quality Settings** dialog in which you can set the print quality level in more detail.
Move the slider to the right to improve the quality and left to increase the print speed.

Note

- The print quality levels that can be set vary depending on the selected printer and media type.

Important

This setting is not available when the **Always print in the finest quality setting** checkbox is selected in the **Advanced Print Settings** dialog.

Print Black and White Photo

Select this checkbox to print images in black and white. The preview will also appear in black and white.

Clear coat the entire page

When this checkbox is selected, the Chroma Optimizer (CO) ink will be applied to the entire printable area.

When this checkbox is not selected, it will be applied to the printed areas (except white areas) only.

Examples of Areas for Application

Original image

When the **Clear coat the entire page** checkbox is selected

When the **Clear coat the entire page** checkbox is not selected

Shaded area: The area to which the Chroma Optimizer (CO) ink is applied

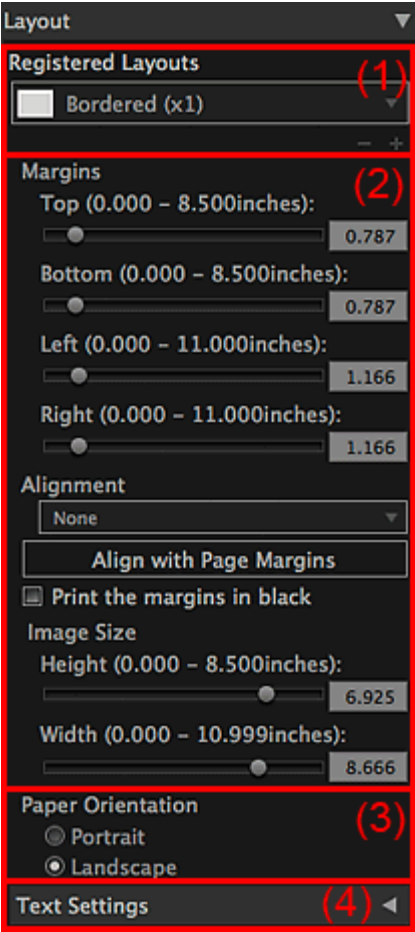

Important

- This function may not be available depending on the selected printer and media type.

Page top ▲

Settings Area (Layout)

Set the layout.

Note

- When setting the layout, set the printer and paper in the Settings area (**Print Settings**) beforehand.

(1) Layout Selection Area

(2) Margin Settings Area

(3) Paper Orientation Selection Area

(4) Text Settings Area

(1) Layout Selection Area

Registered Layouts

Select a layout.

Note

- The layouts displayed vary depending on the selected media type and paper size.
- When layouts are registered, the registered names appear.

(Delete Layout)

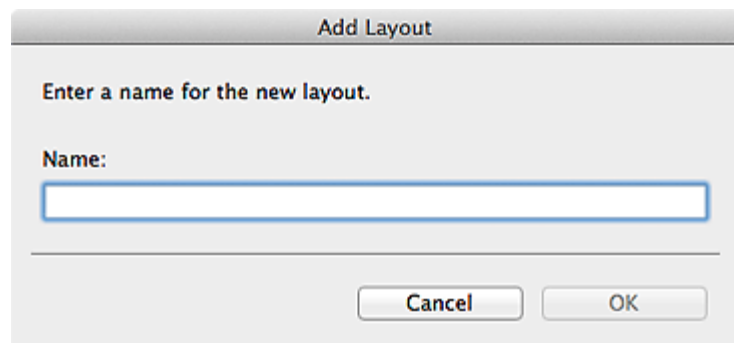

Deletes the selected layout.

Note

- You can delete only the layouts you registered.

(Add Layout)

Displays the **Add Layout** dialog from which you can register the settings made in the Settings area (**Layout**).

The image shows a dialog box titled "Add Layout". Inside, there is a prompt "Enter a name for the new layout." followed by a label "Name:" and a text input field. At the bottom, there are two buttons: "Cancel" and "OK".

Name

Enter the name of the settings to be registered.

Note

- You can enter up to 64 characters.
- You cannot use a name and "Custom" that are already registered.

(2) Margin Settings Area

Note

- Appears only when a bordered layout or an index is selected.
- **Page Grid**, **Cell Spacing** and **Cell Size** appear only when **Bordered (x2)**, **Bordered (x4)** or **Index 5x4** is selected.

Margins

Set the margin values by moving the sliders for top, bottom, left and right or by entering the values directly into the text input box.

Note

- The range of margin values varies depending on the media type and paper size.
- Values to be entered into the text input box must be single-byte and with up to six decimal places.

Alignment

Places the image in the selected position with the image size retained. When text is entered, it will also be moved.

You can select from **None**, **Center**, **Center Horizontally** and **Center Vertically**.

Align with Page Margins

Places the image after enlarging it to the maximum size at which it can be printed in a bordered layout.

Note

- **Align with Page Margins** can be set only when **Alignment** is **None**.

Print the margins in black

Select this checkbox to print the margins and cell spacing in black.

Important

- When text is entered and the font color is set to black, selecting the **Print the margins in black** checkbox automatically changes the font color for the header, footer, page numbers and photo information to white.
- Margins may not be printed black up to the edges of the paper depending on the selected media type.

Image Size

Specify the height and width of the image by moving the sliders for height and width.
You can also set by entering the values.

Note

- Appears only for **Bordered (x1)**.
- The range of image sizes varies depending on the media type and paper size.

Page Grid

Set the number of rows and columns on the page by moving the sliders for rows and columns.
You can also set by entering the values.

Note

- You can set up to 10 rows and 10 columns.

Cell Spacing

Set the cell spacing by moving the sliders for the vertical and horizontal.
You can also set by entering the values.

Cell Size

Set the cell size by moving the sliders for height and width.
You can also set by entering the values.

(3) Paper Orientation Selection Area

Paper Orientation

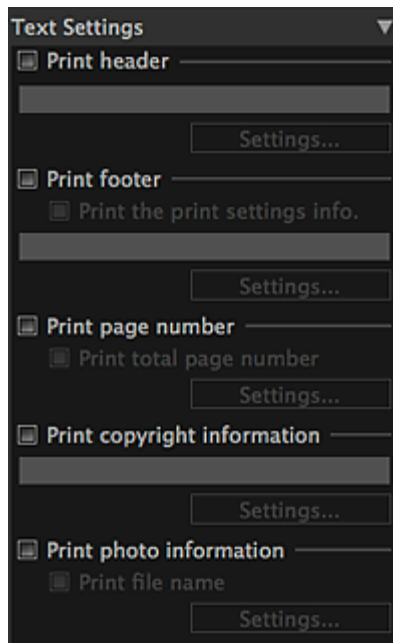

Select vertical or horizontal.

(4) Text Settings Area

Click  to display **Text Settings**.

Note

- **Print header**, **Print footer**, **Print page number** and **Print photo information** can be set only when a bordered layout or index is selected.

Print header

Select this checkbox and enter the text you want to print; the text will be printed at the top of the image.

Print footer

Select this checkbox and enter the text you want to print; the text will be printed at the bottom of the image.

Print the print settings info.

Select this checkbox to print the settings in the Settings area (**Print Settings**).

Print page number

Select this checkbox to print page numbers.

Print total page number

Select this checkbox to print the total number of pages.

Print copyright information

Select this checkbox and enter the text you want to print; the text will be superimposed and printed on the image.

Print photo information

Select this checkbox to print the photo information.

Print file name

Select this checkbox to print the file name of the image.

Note

- Select the checkbox and click **Settings...** to display the **Text Settings** dialog in which you can set text input details such as font and font size.

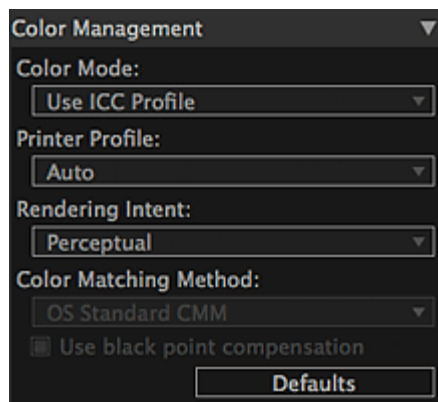

➡ [Text Settings Dialog](#)

Settings Area (Color Management)

Set the color mode, printer profile, etc.

Note

- This function is not available when the **Print Black and White Photo** checkbox is selected in **Print Settings**.

Color Mode

Select a color mode.

You can select from **Use ICC Profile** and **PRO Mode**.

- **Use ICC Profile**
You can print according to the paper to be used or print by utilizing the color space of the image developed/corrected in Adobe RGB or sRGB.
- **PRO Mode**
You can print with an impression close to that on the monitor by correctly reflecting the characteristics of the data displayed on the monitor.

Note

- Items that can be selected vary depending on your printer and media type.

Printer Profile

Select the printer profile to be used.

You can select from **Auto** and other ICC profiles.

Note

- You can set only when **Use ICC Profile** is selected for **Color Mode**.
- For **Auto**, the profile suitable for the current settings is automatically selected. You can check the name of the selected profile by placing the cursor over **Auto**.

Rendering Intent

Select **Perceptual** or **Relative Colorimetric**.

- **Perceptual**
Prints by utilizing the color space that can be reproduced on the printer.
Select this when you want to print with an impression close to that on the monitor since the characteristics of the data displayed on the monitor will be reflected correctly.

- **Relative Colorimetric**

Converts the image to the printer's color space in a way that the image's colors that are within the common color gamut are reproduced to the nearest level. Select this when you want to print in colors that are close to the original image.

Note

- You can set only when **Use ICC Profile** is selected for **Color Mode**.
-

Color Matching Method

Select the color management module to be used for image data conversion from **OS Standard CMM** and **Adobe CMM**.

Note

- To use **Adobe CMM**, you need to install "Adobe Color Management Module (CMM)." Download from the Adobe Systems Incorporated website. There are some restrictions on the usage environment; see the Adobe Systems Incorporated website for details.
 - **Adobe CMM** can be selected only when using 32-bit OS.
-

Use black point compensation

You can achieve an effect similar to Photoshop's black point compensation by selecting this checkbox. Select this checkbox when you want to match the setting with that of Photoshop or other applications.

Important

- If you have changed the setting, restart Print Studio Pro. The change will be reflected by restarting Print Studio Pro.

Note

- This can be selected only when **Adobe CMM** is selected for **Color Matching Method**.
-

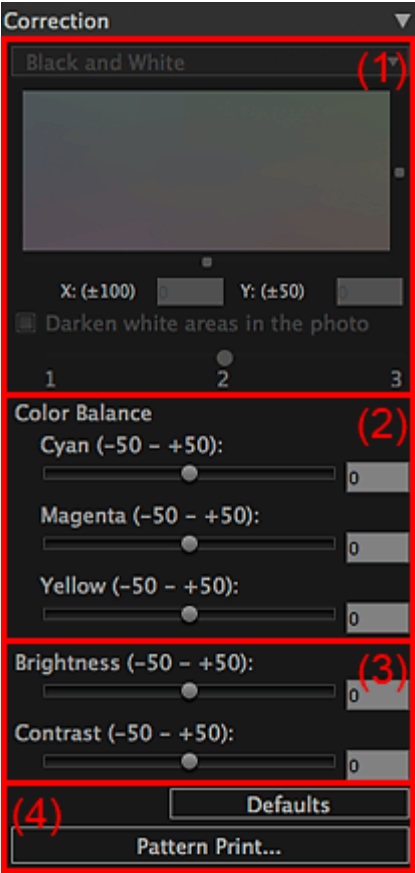

Defaults

Restores the settings made in **Color Management** to the default state.

Page top ▲

Settings Area (Correction)

Correct color tones of images.

- (1) Black and White Tone Adjustment Area
- (2) Color Balance Area
- (3) Brightness/Contrast Area
- (4) Buttons Area

(1) Black and White Tone Adjustment Area

Note

- You can set only when the **Print Black and White Photo** checkbox is selected in the Settings area (**Print Settings**).

Black and White Tone Selection

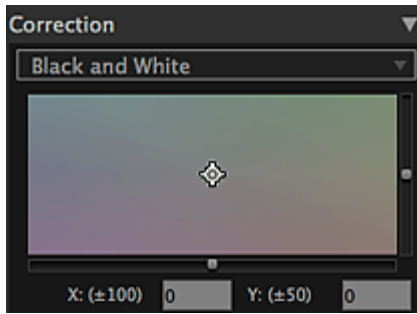

Select a tone for the black and white image from **Cool Tone**, **Black and White** and **Warm Tone**.

Note

- The selection changes to **Custom** when you set the color in the black and white color tone adjustment space.

Black and White Color Tone Adjustment Space

You can adjust the color tone of the black and white image by clicking the color field.
You can also adjust by moving the sliders or by entering the X-coordinate and Y-coordinate values.

Darken white areas in the photo

Select this checkbox to darken the highlights in the image; it will be easier to distinguish the boundary between the image and the paper.
Move the slider to the right to darken and left to lighten the color.

(2) Color Balance Area

Note

- You cannot set when the **Print Black and White Photo** checkbox is selected in the Settings area (**Print Settings**).

Move the sliders for **Cyan**, **Magenta** and **Yellow** to adjust the color balance.
You can set within the range of -50 to 50; move the slider to the right to increase and left to decrease.
You can also set by entering the values.

(3) Brightness/Contrast Area

Brightness

Move the slider for brightness to adjust the overall image brightness.
You can set within the range of -50 to 50; move the slider to the right to brighten and left to darken.
You can also set by entering the values.

Contrast

Move the slider for contrast to adjust the overall image contrast.
You can set within the range of -50 to 50; move the slider to the right to increase and left to decrease the contrast.
You can also set by entering the values.

(4) Buttons Area

Defaults

Restores the settings made in **Correction** to the default state.

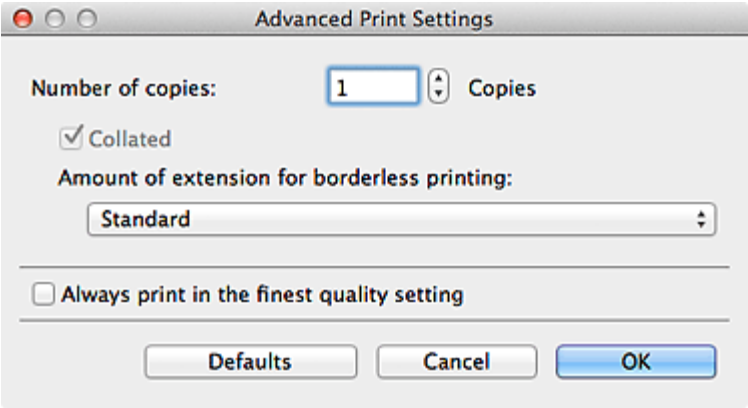

Pattern Print...

Displays the **Pattern Print** window from which you can print a pattern.

➡ [Pattern Print Window](#)

Advanced Print Settings Dialog

Set the number of copies to print and the amount of extension for borderless printing.

Number of copies

Set the number of copies to print.

Collated

Select this checkbox to print multiple copies on a copy-by-copy basis.

Amount of extension for borderless printing

Select the amount of extension from **Standard**, **Large**, **Medium**, **Small** and **None** when a borderless layout is selected in **Layout** in the Settings area.

Example:

The solid lines represent the paper size, and the translucent areas represent the amount of extension.

Note

- The image may be cropped depending on the amount of extension set.

Always print in the finest quality setting

Select this checkbox to always print in the finest quality.

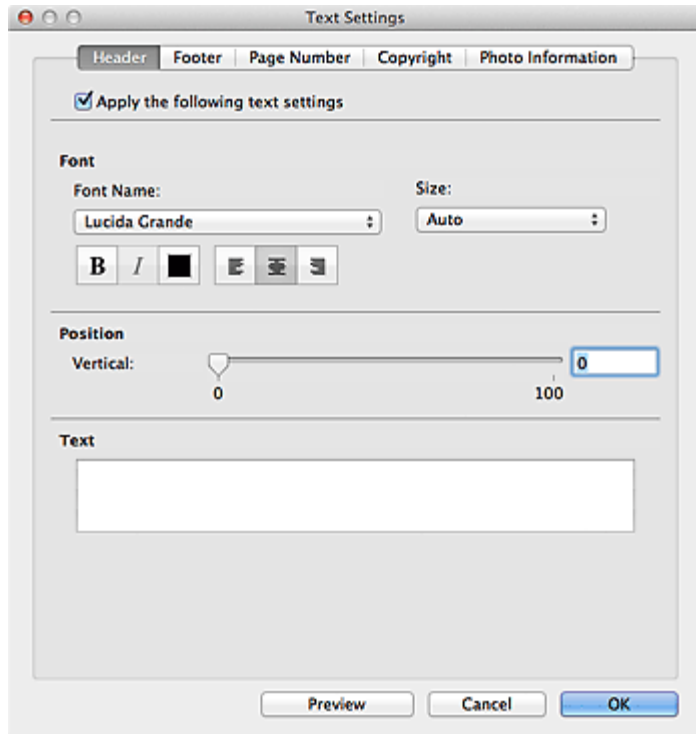

Defaults

Restores the default state.

Text Settings Dialog

Set the font, font size, etc. for the header, footer, page numbers, copyright information and photo information.

Text can be set on each tab.

Apply the following text settings

Select this checkbox to print with the settings made on the corresponding tab.

Font Name

Select the font type.

Size

Select the font size.

Note

- Select **Auto** to set the font size automatically according to the image width.

(Bold/Italic)

Changes the font style to bold or italic.

(Color Setting)

The **Colors** dialog appears; select the font color.

Note

- When the font color is set to black on the **Header**, **Footer**, **Page Number** or **Photo Information** tab, selecting the **Print the margins in black** checkbox changes the font color to white.

(Align Left/Center/Align Right)

You can set how you want to align text.

Note

- Not displayed on the **Copyright** tab.
-

Position

Set the position to print text by moving the slider or by entering the value (0 to 100) in the text input box.

Note

- For the **Copyright** tab, print positions appear in a list; select the position where you want to print text.
 - For the **Photo Information** tab, **Correspond to image orientation** appears. Select this checkbox to set the position automatically according to the image orientation.
-

Text

Enter the text you want to print.

Note

- Not displayed on the **Page Number** or **Photo Information** tab.
-

Print the print settings info.

Select this checkbox to print the print settings information on the footer.

Note

- Displayed on the **Footer** tab only.
-

Print total page number

Select this checkbox to print the total number of pages with the page number.

Note

- Displayed on the **Page Number** tab only.
-

Photo Information to Print

Select the following checkbox(es) to print the corresponding photo information.

- **File Name**
- **Shooting Date/Time**
- **Camera Model Name**
- **Lens**
- **Shooting Mode**
- **Shutter Speed**
- **Aperture Value**
- **Exposure Compensation**
- **ISO Speed**
- **White Balance**
- **Picture Style**

Note

- You can change the order by dragging the item name.
-

Defaults

Restores the default state.

Select All

Selects all checkboxes.

Clear All

Deselects all checkboxes.

Note

- Displayed on the **Photo Information** tab only.
-

Preview

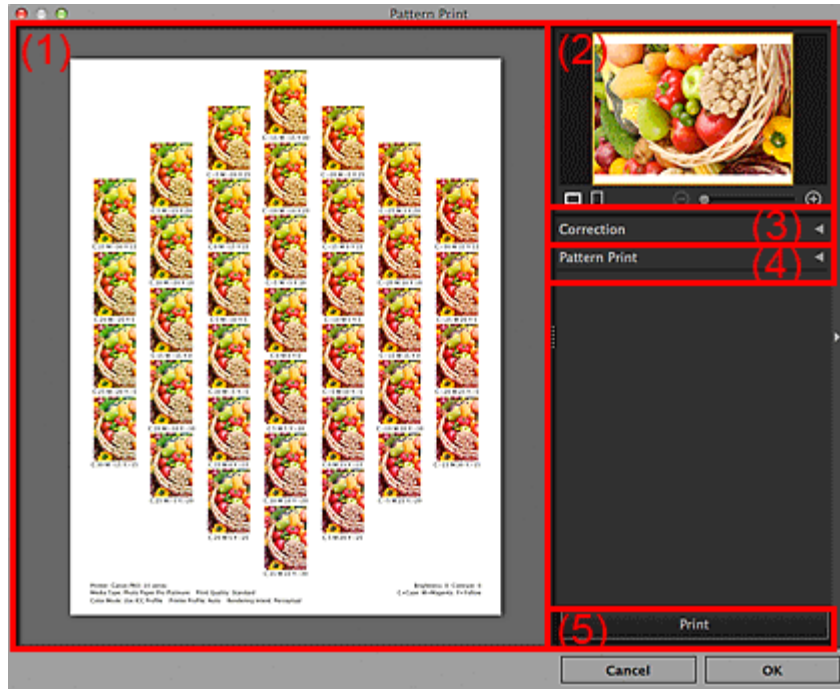

Allows you to check the preview with the settings applied.

Page top ▲

Pattern Print Window

Print a pattern with which you can check the color balance, brightness and contrast of the image.

To display the **Pattern Print** window, click **Pattern Print...** in the Settings area (**Correction**).

- (1) Pattern Print Preview
- (2) Image Preview Area
- (3) Pattern Print Settings Area (Correction)
- (4) Pattern Print Settings Area (Pattern Print)
- (5) Print Button

(1) Pattern Print Preview

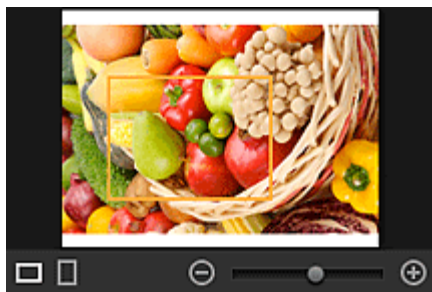

Displays the preview with the settings applied.

(2) Image Preview Area

Displays the image whose pattern is to be printed.

Displays the print area when printing a pattern of a part of the image.

You can change the print area by dragging the yellow frame; you can move the area by dragging within the frame.

(Horizontal/Vertical)

Displays the image horizontally or vertically.

(Enlarge/Reduce)

Click  (Reduce) or  (Enlarge) to reduce or enlarge the display size. You can also freely change the display size by dragging the slider.

(3) Pattern Print Settings Area (Correction)

Displays the settings made in the Settings area (**Correction**) in the main screen. When you change the settings in this window and click **OK**, the changes will be applied to the Settings area in the main screen.

➡ Settings area (Correction)

(4) Pattern Print Settings Area (Pattern Print)

Paper Size

Select the paper size to be used for Pattern Print.

Color

Select whether to print the color pattern or the brightness/contrast pattern.

For **Color**, you can select from **Print in All Directions**, **Print in Direction R**, **Print in Direction Y**, **Print in Direction G**, **Print in Direction C**, **Print in Direction B** and **Print in Direction M**.

Note

- When the **Print Black and White Photo** checkbox is selected, select whether to print the black and white tone pattern or the brightness/contrast pattern.

Pattern Size

Select the size of the pattern to be printed.

You can select from **Large**, **Medium** and **Small**.

The number of instances that are printed when each pattern size is selected is as follows.

Pattern Size	Color Direction of Pattern Print		
	Print in All Directions	Other than Print in All Directions	Black and White Tone
Large	7 instances	9 instances	9 instances
Medium	19 instances	25 instances	25 instances
Small	37 instances	48 instances	45 instances

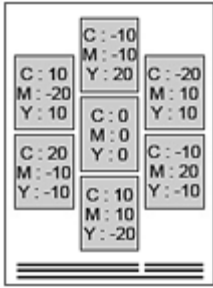

Color Variation between Instances

Set the color range width (color differences from the standard instance) of the pattern to be printed.

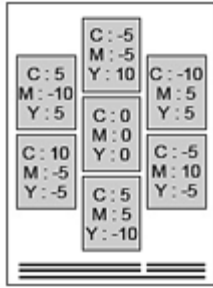

You can select from **Large**, **Medium** and **Small**.

Select **Large** to widen and **Small** to narrow the color range width of the pattern to be printed.

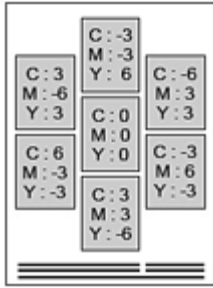

Example:

Large

Medium

Small

Defaults

Restores the default state.

(5) Print Button

Print

Starts Pattern Print.

Crop Window

Cut out a portion of an image.

To display the **Crop** window, select the image you want to crop in preview, then click  (Crop) in the Tools area.

Solid White Lines (Cropping Area)

Represent the cropping area.

To move the cropping area, place the cursor within the cropping area and drag it.

Drag the white squares of the cropping area to adjust the size of the cropping area.

Broken White Lines (The Rule of Thirds)

Represent the rule of thirds.

Place the main subject such as a person or building along the broken lines or at an intersection to create a balanced image.

Solid Red Lines

Represent the print area when a borderless layout is selected.

Display lines for the rule of thirds

Shows or hides the rule of thirds. Serves as a guide for cutting out the image.

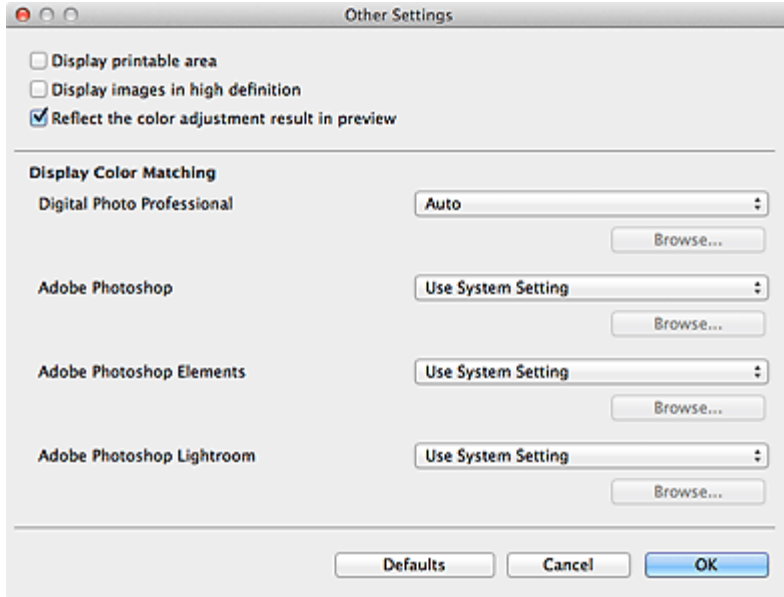

Clear

Cancels cropping.

Other Settings Dialog

Specify the settings related to preview and set the monitor's color matching.

To display the **Other Settings** dialog, select **Other Settings...** from the **File** menu.

Display printable area

Select this checkbox to display the printable area in the preview area.

Display images in high definition

Select this checkbox to display images in high quality at higher resolutions when started from Digital Photo Professional.

Note

- When this checkbox is selected, it may take time for the preview to appear depending on your environment.

Reflect the color adjustment result in preview

Select this checkbox to reflect the result of the color tone adjustment in the preview area.

Deselect the checkbox if you want the color tone before adjustment to be displayed in preview instead of reflecting the adjustment result.

Display Color Matching

Allows you to set the monitor profile for each application.

Select one of the following profiles according to your monitor.

- Use System Setting
- AdobeRGB
- sRGB
- Monitor Profile
- Auto

Note

-
- **Auto** can be selected for **Digital Photo Professional** only. Select **Auto** to set the profile automatically according to the settings of Digital Photo Professional.
 - Select **Monitor Profile** and click **Browse...** to display the **Open** window. Select the profile to be used.
-

Defaults

Restores the settings to the default state.

[Page top ▲](#)

General Notes (Print Studio Pro)

Print Studio Pro is subject to the following restrictions. Keep these points in mind.

- See the Canon website for products supporting Print Studio Pro.
- Available functions and settings vary depending on your printer.

Supported Applications

Print Studio Pro supports the following applications.

- Adobe Photoshop CS4/CS5/CS5.1
- Adobe Photoshop Elements 8/9/10
- Adobe Photoshop Lightroom 2.7/3
- Digital Photo Professional Ver.3.12 or later

Supported Profiles

Print Studio Pro supports the following profiles.

- Printer Profile: Ver.2.x
- Monitor Profile: Ver.4.x

General Notes

- Print Studio Pro cannot be started if a printer that supports Print Studio Pro is not installed on your computer.
- Print Studio Pro cannot be used on another user account activated by using Fast User Switching.
- If Print Studio Pro does not appear in the menu of Photoshop, Photoshop Elements or Lightroom even after installing Print Studio Pro, follow these steps to install the Photoshop Plug-In.
 1. Exit Photoshop, Photoshop Elements or Lightroom.
 2. From the **Go** menu of **Finder**, select **Applications**, then double-click the **Canon Utilities** folder, **Print Studio Pro** folder, then **Plug-In Install** icon.
 3. Follow the on-screen instructions to install.
 - The Photoshop Plug-In may not be installed if Photoshop, Photoshop Elements or Lightroom has never been started.
 - If using Lightroom, the Photoshop Plug-In needs to be installed on a user-by-user basis. If you have multiple user accounts on the computer, install it on a user-by-user basis.
- There are differences between the color tones of images displayed on the monitor and those of the print results.

Available Data Formats

- One color (8 bits or 16 bits) per pixel RGB data formats supported by Photoshop, Photoshop Elements or Lightroom
- One color (8 bits or 16 bits) per pixel RGB data formats supported by Digital Photo Professional

Print Studio Pro Guide

See the following for photo printing and the techniques utilizing Print Studio Pro.

Printing Photographs Directly from a PictBridge Compliant Device

You can connect a PictBridge compliant device such as a digital camera, camcorder, or mobile phone to the printer using a USB cable recommended by the device's manufacturer, and print recorded images directly without using a computer.

Connectable devices:

Any PictBridge compliant device can be connected to the printer regardless of the manufacturer or model as long as it is compliant with the PictBridge Standard.

Printable image data format:

The printer accepts images* taken with a camera compliant with the Design rule for Camera File system.

* Exif 2.2/2.21/2.3 compliant

Important

- Do not use the USB cable longer than around 10 ft. / 3 m to connect any PictBridge compliant device to the printer since it may affect the operation of other peripheral devices.

Note

- PictBridge is the Standard to print your photos directly without using a computer, connecting a device such as a digital still camera, digital camcorder, or camera-equipped mobile phone.

(PictBridge): A PictBridge compliant device has this mark.

- When printing photos with the PictBridge compliant device connected to the printer, we recommend the use of the AC adapter supplied with the device. If you are using the device battery, be sure to charge it fully.
- Depending on the model or brand of your device, you may have to select a print mode compliant with PictBridge before connecting the device. You may also have to turn on the device or select Play mode manually after connecting the device to the printer.
Perform necessary operations on the PictBridge compliant device before connecting it to this printer according to instructions given in the device's instruction manual.

1. Make sure that the printer is turned on.

➡ Confirming that the Power Is On

2. Load paper.

➡ Loading Paper

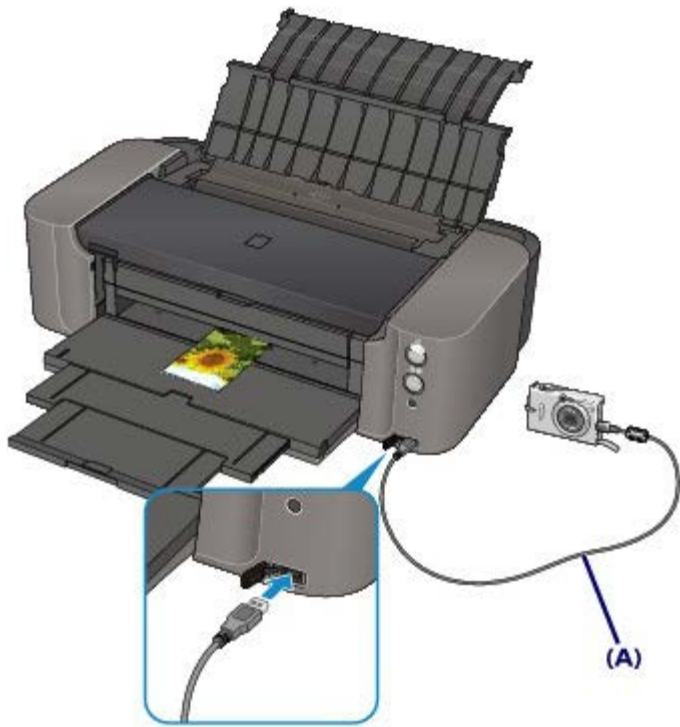

3. Make sure that the PictBridge compliant device is turned off.

4. Connect the PictBridge compliant device to the printer using a USB cable (A) recommended by the device's manufacturer.

The PictBridge compliant device turns on automatically.

If your device does not turn on automatically, turn it on manually.

When printer is correctly connected to the device, the message that the printer is connected will be displayed on the LCD of the device. Refer to the device's instruction manual.

5. Specify the print settings such as the paper type and layout.

You can perform settings using the menu on the LCD of your PictBridge compliant device. Select the size and type of paper that you loaded in the printer.

➡ [Settings on a PictBridge Compliant Device](#)

6. Start printing from your PictBridge compliant device.

Important

- Never disconnect the USB cable during printing unless when explicitly allowed to by the PictBridge compliant device. When disconnecting the USB cable between the PictBridge compliant device and printer, follow the instructions given in the device's instruction manual.

U053

About PictBridge Print Settings

Settings on a PictBridge Compliant Device

This section describes the PictBridge function of the printer. For the print settings on a PictBridge compliant device, refer to the instructions given in the device's instruction manual.

Note

- In the following description, names of setting items are given according to those used in Canon-brand PictBridge compliant devices. Setting item names may be different depending on the brand or model of your device.
- Some setting items explained below may not be available on some devices. When you cannot change print settings on a device, the printer prints images as follows:
Paper size: 4" x 6"/ 10 x 15 cm
Paper type: Fast Photo
Layout: 1-up, Borderless
Date/File No. Print: Not printed
Image Optimize: The Auto photo fix function will be used for optimized printing.

The following settings can be used when printing from a PictBridge compliant device.

Paper size	4" x 6"/ 10 x 15 cm, 5" x 7"*, 8" x 10"/ 20 x 25 cm, A4, 8.5" x 11"(Letter), 10" x 12"/ 25 x 30 cm, A3, A3+/ 13" x 19", 14" x 17"/ 36 x 43 cm * Can be selected only on certain Canon-brand PictBridge compliant devices. (May not be selected depending on the device.)
Paper type	<ul style="list-style-type: none">● Default: Photo Paper Pro Platinum PT-101● Photo: Photo Paper Plus Glossy II PP-201● Semi-gloss*: Photo Paper Plus Semi-gloss SG-201/Photo Paper Pro Luster LU-101● Fast Photo: Photo Paper Pro Platinum PT-101● Plain: A3, A4/Letter When Paper type is set to Plain , borderless printing will be disabled even when Layout is set to Borderless . * Available only with a Canon-brand PictBridge compliant device. (May not be available with some Canon-brand PictBridge compliant devices.)
Layout	Default (Borderless), Index, Borderless, Bordered, 20-up*1, 35-up*2 *1 With a Canon brand PictBridge compliant device, selecting items with "i" mark allows you to print shooting info (Exif Data) in list format (20-up) or on the margins of the specified data (1-up). (May not be available with some Canon-brand PictBridge compliant devices.) *2 Printed in 35 mm Film Style Layout (Contact Printing Layout). Available only with a Canon-brand PictBridge compliant device. (May not be available with some Canon-brand PictBridge compliant devices.)
Print date & file no.	Default (Off: No printing), Date, File No., Both, Off
Image optimize	Default (Auto photo fix)*1, On (Auto photo fix)*1, Off, Red-Eye*2 *1 The scene or person's face of a shot photo is recognized and the most suitable correction for each photo is made automatically. It makes a darkened face by backlight

brighter to print. It also analyzes a scene such as scenery, night scene, person, etc. and corrects each scene with the most suitable color, brightness, or contrasts automatically to print.

*2 Can be selected only on certain Canon-brand PictBridge compliant devices. (May not be selected depending on the device.)

- With some types of Canon PictBridge compliant cameras, you can make finer color adjustments by selecting the color mode that is most suitable for what you want to achieve. Refer to the *Digital Photo Printing Guide* on-screen manual or the instruction manual provided with your Canon PictBridge compliant device. You can select the following color modes:

Natural, Natural M, B/W, Cool tone, Warm tone

Trimming	Default (Off: No trimming), On (follow the camera's setting), Off
----------	---

No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks

❖ No Printing Results

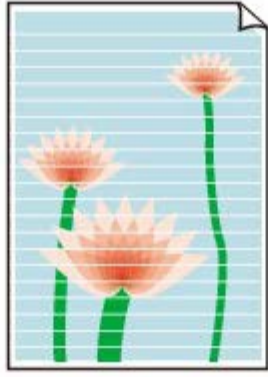

❖ Printing Is Blurred

❖ Colors Are Wrong

❖ White Streaks

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: Check the status of ink tanks. Replace the ink tank if the ink has run out.**

➡ [Replacing an Ink Tank](#)

- **Check 3: Print the Nozzle Check Pattern and perform any necessary maintenance operations such as Print Head Cleaning.**

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [When Printing Becomes Faint or Colors Are Incorrect](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
Check to see if a particular color's ink tank is not empty.
If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged.
Contact the service center.

- **Check 4: When using paper with one printable surface, make sure that the paper is loaded with the printable side facing up/down.**

Load paper with the printable side facing up.

Refer to the instruction manual supplied with the paper for detailed information on the printable side.

- **Check 5: Is automatic ink quality maintenance enabled?**

If automatic ink quality maintenance is disabled, ink in one or more ink tanks may separate, resulting in uneven density. Enable automatic ink quality maintenance by using the printer driver.

1. Make sure that the printer is turned on.

2. Open the Canon IJ Printer Utility.

➡ [Opening the Canon IJ Printer Utility](#)

3. Select **Custom Settings** in the pop-up menu.
4. Select the **Execute ink quality maintenance automatically** check box, then click **Apply**.
5. Confirm the message and click **OK**.

Important

- Enabling automatic ink quality maintenance is recommended. Failure to perform the ink quality maintenance about once a week may affect print quality.
- If automatic ink quality maintenance has been disabled, perform the ink quality maintenance manually about once a week.

➡ [Maintaining the Ink Quality](#)

Paper Does Not Feed Properly/"No Paper" Error Occurs

- **Check 1: Make sure that paper is loaded.**

➡ [Loading Paper](#)

- **Check 2: Make sure of the following when you load paper.**

In the rear tray:

- When loading two or more sheets of paper, flip through the paper before loading.

- When loading two or more sheets of paper, align the edges of the sheets before loading.
- When loading two or more sheets of paper, make sure that the paper stack does not exceed the paper load limit.
However, proper feeding of paper may not be possible at this maximum capacity depending on the type of paper or environmental conditions (either very high or low temperature and humidity). In such cases, reduce the sheets of paper you load at a time to less than half of the paper load limit.
- Always load the paper in portrait orientation, regardless of the printing orientation.

In the manual feed tray:

When you load the paper, load one sheet at a time. When you print continuously, set the next paper after the last one is finished printing.

- **Check 3: Check to see if the paper you are printing on is not too thick or curled.**

➡ [Media Types You Cannot Use](#)

- **Check 4: Make sure of the following when you load envelopes.**

When printing on envelopes, refer to [Loading Paper](#), and prepare the envelopes before printing.

Once you have prepared the envelopes, load them in portrait orientation. If the envelopes are placed in landscape orientation, they will not feed properly.

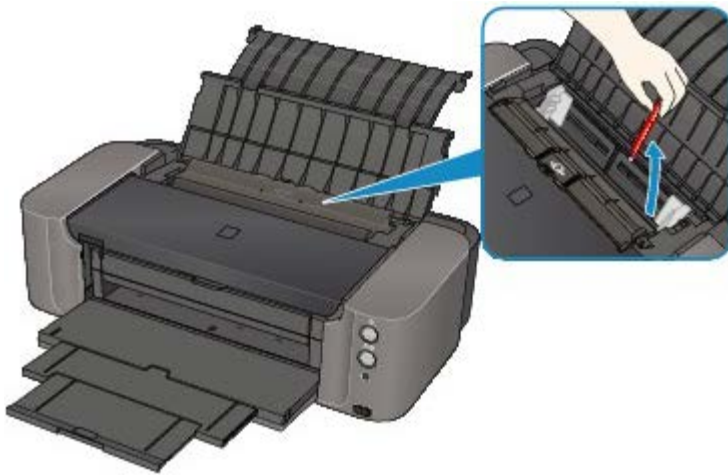

- **Check 5: Confirm that the media type and the paper size settings correspond with the loaded paper.**

- **Check 6: Make sure that there are not any foreign objects in the rear tray or manual feed tray.**

If the paper tears in the rear tray or the manual feed tray, see [Paper Jams](#) to remove it.

If there are any foreign objects in the rear tray or manual feed tray, be sure to turn off the printer, unplug it from the power supply, then remove the foreign object.

Note

- If the feed slot cover is opened, close it slowly.

• Check 7: Make sure that the inner cover (the cover of the disc tray) is closed completely.

Paper does not feed properly if the inner cover is even slightly open.

➡ [Placing a Printable Disc](#)

• Check 8: Clean the paper feed roller.

➡ [Cleaning the Paper Feed Roller](#)

Note

- Cleaning the paper feed roller will wear the roller, so perform this procedure only when necessary.

U326

Paper Does Not Feed Properly/"No Paper" Error Occurs

- **Check 1: Make sure that paper is loaded.**

➡ [Loading Paper](#)

- **Check 2: Make sure of the following when you load paper.**

In the rear tray:

- When loading two or more sheets of paper, flip through the paper before loading.

U350

Paper Is Jammed in the Paper Output Slot/Rear Tray/Manual Feed Tray

Remove the paper following the procedure below.

1. Press the paper jam clearing button if the paper is jammed in the manual feed tray.

Press the paper jam clearing button on the side of the manual feed tray, to set the manual feed tray to the paper jam clearing position.

2. Pull the jammed paper out slowly to remove it.

- Paper is jammed in the paper output slot or the rear tray:
Pull the jammed paper out slowly, either from the paper output slot or the rear tray, whichever is easier.
When you pull the jammed paper from the rear tray, remove the other seats of paper loaded in the rear tray before pulling the jammed paper.

Paper is jammed in the manual feed tray:

Note

- If you cannot pull the paper out, turn the printer off and turn it back on. The paper may be ejected automatically.
- If the paper tears and you cannot remove the jammed paper from the paper output slot, remove the paper from inside the printer.

➡ Paper Is Jammed inside the Printer

3. When you pull out the paper jammed in the manual feed tray, return the tray to the original position.

4. Reload the paper, and press the **RESUME/CANCEL** button on the printer.

If you turned off the printer in step 2, all print jobs in the queue are canceled. Reprint if necessary.

Note

- When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly.
➡ Loading Paper
- We recommend you use paper other than A5 sized one to print documents with photos or graphics; otherwise, the printout may curl and cause paper exit jams.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

U328

Paper Jams

Note

- If you need to turn off the printer to remove jammed paper during printing, press the **RESUME/CANCEL** button to cancel print jobs before turning off the printer.

If the paper is jammed, remove it following the procedure appropriate for each case.

- If you can see the jammed paper at the paper output slot, the rear tray, or the manual feed tray:
 - ➡ [Paper Is Jammed in the Paper Output Slot/Rear Tray/Manual Feed Tray](#)
- If the paper tears and you cannot remove it from the paper output slot or from the rear tray:
 - ➡ [Paper Is Jammed inside the Printer](#)
- Cases other than above:
 - ➡ [In Other Cases](#)

If You Cannot Resolve the Problem

If you cannot resolve the problem with any of the workarounds in this chapter, please contact the seller of the printer or the service center.

Canon support staff are trained to be able to provide technical support to satisfy customers.

Caution

- If the printer emits any unusual sound, smoke, or odor, turn it off immediately. Unplug the power cord from the outlet and contact the seller or the service center. Never attempt to repair or disassemble the printer yourself.
 - Attempts by customers to repair or take apart the printer will invalidate any warranty regardless of whether the warranty has expired.
-

Before contacting the service center, confirm the following:

- Product name:
 - * Your printer's name is located on the front cover of the setup manual.
- Serial number: please refer to the setup manual
- Details of the problem
- What you tried to solve the problem, and what happened

Alarm Lamp Flashes Orange

Alarm Lamp Flashes Orange

When a printer error occurs, the **Alarm** lamp flashes orange as shown below. The number of flashes indicates the type of error that has occurred. Count the flashes and take the appropriate action to correct the error.

(A) Note the number of flashes

(B) Flashes repeatedly

Note

- "Support Code" on the table below means the error number. It appears on the computer screen with a message when an error occurs.

Support Code	Number of flashes/Cause	Action
1000 1001 1002 1006	Two flashes: Printer is out of paper./The disc tray is not attached./Paper does not feed.	Reload paper in the cassette or the manual feed tray and press the RESUME/CANCEL button on the printer. When printing on printable discs (BD/DVD/CD, etc.), use the disc tray supplied with this printer ("K" is on the upper side). Place a printable disc on the disc tray, attach the disc tray to the printer, then press the RESUME/CANCEL button. ➡ Placing a Printable Disc
1250 1261 1270 1300 1308	Three flashes: Paper output tray is closed./Feed slot cover is opened./Manual feed tray is in the paper jam clearing position./Cannot print on a printable disc./Paper jams.	<ul style="list-style-type: none">• If the paper output tray is closed, open it. The printer resumes printing.• If the feed slot cover is opened, close the cover slowly and press the RESUME/CANCEL button on the printer. The printer resumes printing.• If the rear tray is open before you load paper on the manual feed tray, close the rear tray slowly, press the RESUME/CANCEL button on the printer, then load paper.• When you start printing on a printable disc, make sure that the paper is removed from

		<p>the manual feed tray, then press the RESUME/CANCEL button on the printer.</p> <p>If the error still remains, paper may be jammed. Remove the jammed paper, reload paper in the printer, and then press the RESUME/CANCEL button on the printer.</p> <p>➡ Paper Jams</p>
1600 1660	<p>Four flashes: The ink tank is not installed./Ink tank is not installed properly./Ink may have run out.</p>	<ul style="list-style-type: none"> • The ink tank is not installed. Install the ink tank. • If the lamp on the ink tank is not lit, the ink tank may not be installed properly. Install an appropriate ink tank. • Ink may have run out (The lamp on the ink tank flashes). If printing is in progress, you are recommended to stop printing, replace the ink tank, and then print again. <p>If printing is in progress and you want to continue printing, press the printer's RESUME/CANCEL button with the ink tank installed. Then printing can continue under the ink out condition. Replace the empty ink tank immediately after the printing. The printer may be damaged if printing is continued under the ink out condition.</p> <p>➡ Replacing an Ink Tank</p> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, refer to Checking the Ink Status and confirm the status of each ink tank.
1401 1403 1405	<p>Five flashes: Print head is not installed./Print head is defective.</p>	<p>Install the print head.</p> <p>If the print head is already installed, remove the print head once and then reinstall it.</p> <p>If the error is still not resolved, the print head may be damaged. Contact the service center.</p>
1850 1851 1855 1856 1859 185A	<p>Six flashes: The inner cover (the cover of the disc tray) is opened or closed.</p>	<ul style="list-style-type: none"> • If the inner cover (the cover of the disc tray) is open while printing other than disc label printing is in progress, close the inner cover, then press the RESUME/CANCEL button. • Before you start printing on canvas paper, it is necessary to open the inner cover once. Open the inner cover, then press the RESUME/CANCEL button on the printer. When you start printing, close the inner cover, then press the RESUME/CANCEL button on the printer. • If the inner cover is closed when starting disc label printing, open the inner cover, place the disc tray, then press the RESUME/CANCEL button on the printer. When you start printing on paper, close the inner cover, then press the RESUME/CANCEL button on the printer. Do not open or close the inner cover while printing is in progress, as this can damage the printer.

1680 1681	Seven flashes: Ink tank is not installed in the correct position.	<ul style="list-style-type: none"> Some ink tanks are not installed in the correct position. (The lamps on the ink tanks flash.) More than one ink tanks of the same color are installed. (The lamps on the ink tanks flash.) <p>Confirm that the ink tanks are installed in the appropriate positions.</p> <p>➡ Replacing an Ink Tank</p>
1700	Eight flashes: Ink absorber is almost full.	<p>The ink absorber is almost full.</p> <p>The printer has a built-in ink absorber to hold the ink used during Print Head Cleaning.</p> <p>Press the printer's RESUME/CANCEL button to continue printing. Contact the service center.</p>
2001	Nine flashes: The digital camera or digital video camcorder connected is not compatible with this printer.	<p>Check the device connected to the printer.</p> <p>Printing photos directly is possible only with a PictBridge compliant device.</p>
-	Nine flashes: The printer has not received a response from the digital camera.	<p>A communication time out occurs if an operation takes too long or if it takes too much time to send data. This may cancel printing. In such cases, disconnect and reconnect the USB cable.</p> <p>When printing from a PictBridge compliant device, depending on the model or brand of your device, you may have to select a PictBridge compliant print mode on the device before connecting it to the printer. You may also have to turn on your device or select Play mode manually after connecting the device to the printer. Perform necessary operations before connecting your device referring to its instruction manual.</p> <p>If the error is not yet resolved, check if you can print another photograph.</p>
1062 2500	Eleven flashes: The Page Size setting does not match the size of the paper loaded in the printer./Automatic Print Head Alignment failed.	<p>When performing an ordinary print job:</p> <ul style="list-style-type: none"> Press the RESUME/CANCEL button on the printer to clear the error. Then check the Paper Size setting in the Page Setup dialog and load paper that is the same size as the setting and try printing again. Set the printer not to detect the width of the paper using the Canon IJ Printer Utility. To set the printer not to detect the width of the paper, open the Canon IJ Printer Utility, select Custom Settings in the pop-up menu, clear the Detect paper width check box, and then click Apply. To open the Canon IJ Printer Utility, see Opening the Canon IJ Printer Utility. * Select the Detect paper width check box again once printing is complete, and then click Apply. <p>When performing Automatic Print Head Alignment:</p> <ul style="list-style-type: none"> Print head nozzles are clogged. Press the RESUME/CANCEL button to dismiss the error, and print the nozzle check

		<p>pattern to check the status of the print head.</p> <p>➡ Printing the Nozzle Check Pattern</p> <ul style="list-style-type: none"> Paper of size other than A4 or Letter is loaded in the rear tray. Press the RESUME/CANCEL button to dismiss the error, then load two sheets of A4/Letter-sized plain paper on the rear tray with the printing side (whiter side) facing UP. For Automatic Print Head Alignment, always load paper in the rear tray. The paper output slot is exposed to strong light. Press the RESUME/CANCEL button to dismiss the error, and then adjust your operating environment and/or the position of the printer so that the paper output slot is not exposed directly to strong light. <p>After carrying out the above measures, if the problem continues after aligning the print head again, press the RESUME/CANCEL button to dismiss the error, and then perform Manual Print Head Alignment.</p> <p>➡ Aligning the Print Head Position Manually from Your Computer</p> <p>When printing the nozzle check pattern or performing Manual Print Head Alignment: Other than A4/Letter-sized paper is loaded. Press the RESUME/CANCEL button on the printer to clear the error, and load A4/Letter-sized paper in the rear tray. Then try performing again. When printing the nozzle check pattern or performing Manual Print Head Alignment, be sure to set the paper in the rear tray.</p>
1350 4100	<p>Twelve flashes: The ink tank has been replaced during printing./Cannot print the contents on CREATIVE PARK PREMIUM.</p>	<p>If the ink tank has been replaced during printing: Press the RESUME/CANCEL button on the printer to clear the error, then resume printing.</p> <p>If you are printing the contents on CREATIVE PARK PREMIUM: You cannot print the contents on CREATIVE PARK PREMIUM. When you print the contents on CREATIVE PARK PREMIUM, confirm the message on the computer screen, make sure that genuine Canon ink tanks are installed properly for all colors, then start printing again.</p>
1684 1750	<p>Fourteen flashes: Ink tank cannot be recognized.</p>	<p>The ink tank cannot be recognized. Printing cannot be executed because the ink tank may not be installed properly or may not be compatible with this printer. Install the appropriate ink tank.</p> <p>➡ Replacing an Ink Tank If you want to cancel printing, press the printer's RESUME/CANCEL button.</p>
1410 1411 1412	<p>Fifteen flashes: Ink tank cannot be recognized.</p>	<p>The ink tank cannot be recognized. (The lamp on the ink tank is off.) Replace the ink tank.</p> <p>➡</p>

1413 1414 1415 1416 1417 1418 1419		Replacing an Ink Tank
1698	Seventeen flashes: Printer detected ink out condition.	<p>Printer detected ink out condition (The lamp on the ink tank flashes).</p> <p>If printing is in progress, stop printing, replace the ink tank, and then print again.</p> <p>To avoid printing troubles such as the mixing of inks, this printer is designed to stop printing by flashing the Alarm lamp orange seventeen times when the remaining ink level in an ink tank goes under the amount of ink required to maintain both printer and print quality.</p> <hr/> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, check how fast they flash. Fast flashing (at about one second interval) indicates the ink is empty. Slow flashing (at about three second interval) indicates ink is low. For details on different flashing speeds, refer to Checking the Ink Status. <hr/>
1699	Eighteen flashes: Printer detected ink out condition.	<p>Printer detected ink out condition (The lamp on the ink tank flashes).</p> <p>Stop printing, replace the ink tank, and then print again. Be sure to replace the empty ink tank before resuming printing.</p> <p>An ink tank that was once empty is installed. Printing under the ink out condition may cause the printing trouble such as the mixing of inks, or a printer malfunction.</p> <p>If you want to continue printing, you need to release the function for detecting the remaining ink level. To release this function, press and hold the printer's RESUME/CANCEL button for at least 5 seconds, and then release it.*</p> <p>* With this operation, releasing the function for detecting the remaining ink level is memorized. Please be advised that Canon shall not be liable for any malfunction or trouble which may be caused by continuation of printing or refilling of ink.</p> <hr/> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, check how fast they flash. Fast flashing (at about one second interval) indicates the ink is empty. Slow flashing (at about three second interval) indicates ink is low. For details on different flashing speeds, refer to Checking the Ink Status. ■ If the function for detecting the remaining

		ink level is disabled, the remaining ink level is not displayed correctly on Canon IJ Printer Utility. ➡ Checking the Ink Status
2002	Nineteen flashes: An unsupported USB hub is connected.	If a PictBridge compliant device is connected via a USB hub, remove the hub and connect it directly to the printer.
2103	21 flashes: The printer cannot detect the paper size.	Press the printer's RESUME/CANCEL button to dismiss the error, then try to print again. If this error occurs even you load paper of the same size as the setting, set the printer not to detect the width of the paper using the printer driver.

POWER Lamp Flashes and Alarm Lamp Flashes Orange Alternately

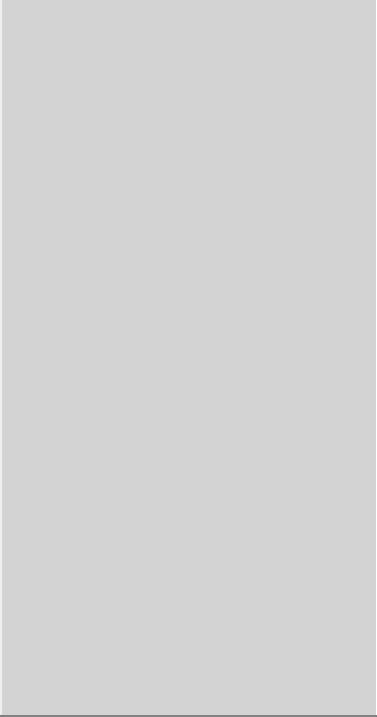

If the **POWER** lamp flashes and the **Alarm** lamp flashes orange alternately, it may be possible that an error requiring you to contact the service center has occurred.

Take an appropriate action referring to the table below.

Support Code	Number of flashes	Action
5100	Two flashes:	Cancel printing, and turn off the printer. Then clear the jammed paper or protective material that is preventing the print head holder from moving, and turn on the printer again. <div>  Important <ul style="list-style-type: none"> ■ Be careful not to touch the components inside the printer. The printer may not print out properly if you touch it. ■ If the problem is not resolved, contact the service center. </div>
B200	Ten flashes:	Turn off the printer, and unplug the power cord of the printer from the power supply. Contact the service center.

Place a printable disc on the disc tray, attach the disc tray to the printer, then press the RESUME/CANCEL button. ➡ Placing a Printable Disc
1250 1261 1270 1300 1308	Three flashes: Paper output tray is closed./Feed slot cover is opened./Manual feed tray is in the paper jam clearing position./Cannot print on a printable disc./Paper jams.	<ul style="list-style-type: none">• If the paper output tray is closed, open it. The printer resumes printing.• If the feed slot cover is opened, close the cover slowly and press the RESUME/CANCEL button on the printer. The printer resumes printing.• If the rear tray is open before you load paper on the manual feed tray, close the rear tray slowly, press the RESUME/CANCEL button on the printer, then load paper.• When you start printing on a printable disc, make sure that the paper is removed from

		<p>the manual feed tray, then press the RESUME/CANCEL button on the printer.</p> <p>If the error still remains, paper may be jammed. Remove the jammed paper, reload paper in the printer, and then press the RESUME/CANCEL button on the printer.</p> <p>➡ Paper Jams</p>
1600 1660	<p>Four flashes: The ink tank is not installed./Ink tank is not installed properly./Ink may have run out.</p>	<ul style="list-style-type: none"> • The ink tank is not installed. Install the ink tank. • If the lamp on the ink tank is not lit, the ink tank may not be installed properly. Install an appropriate ink tank. • Ink may have run out (The lamp on the ink tank flashes). If printing is in progress, you are recommended to stop printing, replace the ink tank, and then print again. <p>If printing is in progress and you want to continue printing, press the printer's RESUME/CANCEL button with the ink tank installed. Then printing can continue under the ink out condition. Replace the empty ink tank immediately after the printing. The printer may be damaged if printing is continued under the ink out condition.</p> <p>➡ Replacing an Ink Tank</p> <hr/> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, refer to Checking the Ink Status and confirm the status of each ink tank.
1401 1403 1405	<p>Five flashes: Print head is not installed./Print head is defective.</p>	<p>Install the print head.</p> <p>If the print head is already installed, remove the print head once and then reinstall it.</p> <p>If the error is still not resolved, the print head may be damaged. Contact the service center.</p>
1850 1851 1855 1856 1859 185A	<p>Six flashes: The inner cover (the cover of the disc tray) is opened or closed.</p>	<ul style="list-style-type: none"> • If the inner cover (the cover of the disc tray) is open while printing other than disc label printing is in progress, close the inner cover, then press the RESUME/CANCEL button. • Before you start printing on canvas paper, it is necessary to open the inner cover once. Open the inner cover, then press the RESUME/CANCEL button on the printer. When you start printing, close the inner cover, then press the RESUME/CANCEL button on the printer. • If the inner cover is closed when starting disc label printing, open the inner cover, place the disc tray, then press the RESUME/CANCEL button on the printer. When you start printing on paper, close the inner cover, then press the RESUME/CANCEL button on the printer. Do not open or close the inner cover while printing is in progress, as this can damage the printer.

1680 1681	Seven flashes: Ink tank is not installed in the correct position.	<ul style="list-style-type: none"> Some ink tanks are not installed in the correct position. (The lamps on the ink tanks flash.) More than one ink tanks of the same color are installed. (The lamps on the ink tanks flash.) <p>Confirm that the ink tanks are installed in the appropriate positions.</p> <p>➡ Replacing an Ink Tank</p>
1700	Eight flashes: Ink absorber is almost full.	<p>The ink absorber is almost full.</p> <p>The printer has a built-in ink absorber to hold the ink used during Print Head Cleaning.</p> <p>Press the printer's RESUME/CANCEL button to continue printing. Contact the service center.</p>
2001	Nine flashes: The digital camera or digital video camcorder connected is not compatible with this printer.	<p>Check the device connected to the printer.</p> <p>Printing photos directly is possible only with a PictBridge compliant device.</p>
-	Nine flashes: The printer has not received a response from the digital camera.	<p>A communication time out occurs if an operation takes too long or if it takes too much time to send data. This may cancel printing. In such cases, disconnect and reconnect the USB cable.</p> <p>When printing from a PictBridge compliant device, depending on the model or brand of your device, you may have to select a PictBridge compliant print mode on the device before connecting it to the printer. You may also have to turn on your device or select Play mode manually after connecting the device to the printer. Perform necessary operations before connecting your device referring to its instruction manual.</p> <p>If the error is not yet resolved, check if you can print another photograph.</p>
1062 2500	Eleven flashes: The Page Size setting does not match the size of the paper loaded in the printer./Automatic Print Head Alignment failed.	<p>When performing an ordinary print job:</p> <ul style="list-style-type: none"> Press the RESUME/CANCEL button on the printer to clear the error. Then check the Paper Size setting in the Page Setup dialog and load paper that is the same size as the setting and try printing again. Set the printer not to detect the width of the paper using the Canon IJ Printer Utility. To set the printer not to detect the width of the paper, open the Canon IJ Printer Utility, select Custom Settings in the pop-up menu, clear the Detect paper width check box, and then click Apply. To open the Canon IJ Printer Utility, see Opening the Canon IJ Printer Utility. * Select the Detect paper width check box again once printing is complete, and then click Apply. <p>When performing Automatic Print Head Alignment:</p> <ul style="list-style-type: none"> Print head nozzles are clogged. Press the RESUME/CANCEL button to dismiss the error, and print the nozzle check

		<p>pattern to check the status of the print head.</p> <p>➡ Printing the Nozzle Check Pattern</p> <ul style="list-style-type: none"> Paper of size other than A4 or Letter is loaded in the rear tray. Press the RESUME/CANCEL button to dismiss the error, then load two sheets of A4/Letter-sized plain paper on the rear tray with the printing side (whiter side) facing UP. For Automatic Print Head Alignment, always load paper in the rear tray. The paper output slot is exposed to strong light. Press the RESUME/CANCEL button to dismiss the error, and then adjust your operating environment and/or the position of the printer so that the paper output slot is not exposed directly to strong light. <p>After carrying out the above measures, if the problem continues after aligning the print head again, press the RESUME/CANCEL button to dismiss the error, and then perform Manual Print Head Alignment.</p> <p>➡ Aligning the Print Head Position Manually from Your Computer</p> <p>When printing the nozzle check pattern or performing Manual Print Head Alignment: Other than A4/Letter-sized paper is loaded. Press the RESUME/CANCEL button on the printer to clear the error, and load A4/Letter-sized paper in the rear tray. Then try performing again. When printing the nozzle check pattern or performing Manual Print Head Alignment, be sure to set the paper in the rear tray.</p>
1350 4100	<p>Twelve flashes: The ink tank has been replaced during printing./Cannot print the contents on CREATIVE PARK PREMIUM.</p>	<p>If the ink tank has been replaced during printing: Press the RESUME/CANCEL button on the printer to clear the error, then resume printing.</p> <p>If you are printing the contents on CREATIVE PARK PREMIUM: You cannot print the contents on CREATIVE PARK PREMIUM. When you print the contents on CREATIVE PARK PREMIUM, confirm the message on the computer screen, make sure that genuine Canon ink tanks are installed properly for all colors, then start printing again.</p>
1684 1750	<p>Fourteen flashes: Ink tank cannot be recognized.</p>	<p>The ink tank cannot be recognized. Printing cannot be executed because the ink tank may not be installed properly or may not be compatible with this printer. Install the appropriate ink tank.</p> <p>➡ Replacing an Ink Tank If you want to cancel printing, press the printer's RESUME/CANCEL button.</p>
1410 1411 1412	<p>Fifteen flashes: Ink tank cannot be recognized.</p>	<p>The ink tank cannot be recognized. (The lamp on the ink tank is off.) Replace the ink tank.</p> <p>➡</p>

1413 1414 1415 1416 1417 1418 1419		Replacing an Ink Tank
1698	Seventeen flashes: Printer detected ink out condition.	<p>Printer detected ink out condition (The lamp on the ink tank flashes).</p> <p>If printing is in progress, stop printing, replace the ink tank, and then print again.</p> <p>To avoid printing troubles such as the mixing of inks, this printer is designed to stop printing by flashing the Alarm lamp orange seventeen times when the remaining ink level in an ink tank goes under the amount of ink required to maintain both printer and print quality.</p> <hr/> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, check how fast they flash. Fast flashing (at about one second interval) indicates the ink is empty. Slow flashing (at about three second interval) indicates ink is low. For details on different flashing speeds, refer to Checking the Ink Status. <hr/>
1699	Eighteen flashes: Printer detected ink out condition.	<p>Printer detected ink out condition (The lamp on the ink tank flashes).</p> <p>Stop printing, replace the ink tank, and then print again. Be sure to replace the empty ink tank before resuming printing.</p> <p>An ink tank that was once empty is installed. Printing under the ink out condition may cause the printing trouble such as the mixing of inks, or a printer malfunction.</p> <p>If you want to continue printing, you need to release the function for detecting the remaining ink level. To release this function, press and hold the printer's RESUME/CANCEL button for at least 5 seconds, and then release it.*</p> <p>* With this operation, releasing the function for detecting the remaining ink level is memorized. Please be advised that Canon shall not be liable for any malfunction or trouble which may be caused by continuation of printing or refilling of ink.</p> <hr/> <p> Note</p> <ul style="list-style-type: none"> ■ If multiple ink lamps are flashing, check how fast they flash. Fast flashing (at about one second interval) indicates the ink is empty. Slow flashing (at about three second interval) indicates ink is low. For details on different flashing speeds, refer to Checking the Ink Status. ■ If the function for detecting the remaining

		ink level is disabled, the remaining ink level is not displayed correctly on Canon IJ Printer Utility. ➡ Checking the Ink Status
2002	Nineteen flashes: An unsupported USB hub is connected.	If a PictBridge compliant device is connected via a USB hub, remove the hub and connect it directly to the printer.
2103	21 flashes: The printer cannot detect the paper size.	Press the printer's RESUME/CANCEL button to dismiss the error, then try to print again. If this error occurs even you load paper of the same size as the setting, set the printer not to detect the width of the paper using the printer driver.

POWER Lamp Flashes and Alarm Lamp Flashes Orange Alternately

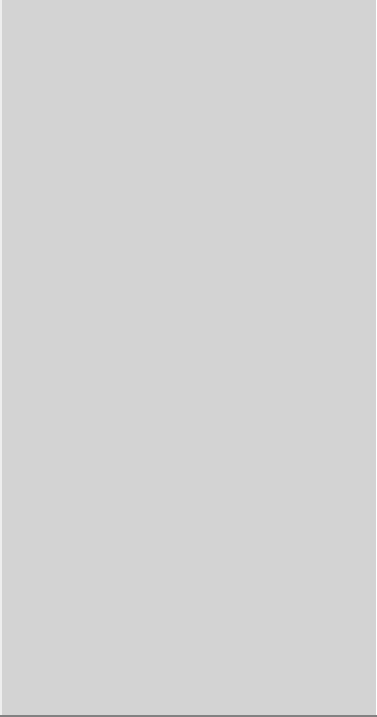

If the **POWER** lamp flashes and the **Alarm** lamp flashes orange alternately, it may be possible that an error requiring you to contact the service center has occurred.

Take an appropriate action referring to the table below.

Support Code	Number of flashes	Action
5100	Two flashes:	Cancel printing, and turn off the printer. Then clear the jammed paper or protective material that is preventing the print head holder from moving, and turn on the printer again. <div>  Important <ul style="list-style-type: none"> ■ Be careful not to touch the components inside the printer. The printer may not print out properly if you touch it. ■ If the problem is not resolved, contact the service center. </div>
B200	Ten flashes:	Turn off the printer, and unplug the power cord of the printer from the power supply. Contact the service center.
5110 5200 5250 5400 5700 5B00 5C00 5C20 6000 6010 6500 6502 6700 6800 6801 6900	Other cases than above:	Turn off the printer, and unplug the power cord of the printer from the power supply. Plug the printer back in and turn the printer back on. If the problem is not resolved, contact the service center.

Cannot Connect to Computer with a USB Cable Properly

Printing Speed Is Slow/Hi-Speed USB Connection Does Not Work

If your system environment is not fully compatible with Hi-Speed USB, the printer will operate at a lower speed provided under USB 1.1. In this case, the printer operates properly but printing speed may slow down due to communication speed.

- **Check: Check the following to make sure that your system environment supports Hi-Speed USB connection.**
 - Does the USB port on your computer support Hi-Speed USB connection?
 - Does the USB cable or the USB hub support Hi-Speed USB connection?
Be sure to use a certified Hi-Speed USB cable. We recommend that the cable is no longer than around 10 feet / 3 meters.
 - Does the operating system of your computer support Hi-Speed USB connection?
Obtain and install the latest update for your computer.
 - Does the Hi-Speed USB driver operate properly?
Obtain the latest version of the Hi-Speed USB driver compatible with your hardware and reinstall it on your computer.

Important

- For details on Hi-Speed USB of your system environment, contact the manufacturer of your computer, USB cable, or USB hub.

U099

The Printer Is Vibrating/The Printer Makes the Operation Noise Even When the Printer Is Not in Use

• Check: Wait until the printer stops vibrating.

When the **POWER** lamp flashes and the printer vibrates, the printer is shaking the ink tanks.

To equalize the density of ink, the printer is set to automatic ink quality maintenance for stirring ink automatically on a regular basis. While the ink is stirred, the printer vibrates and makes noise. This is not a malfunction, so wait until the **POWER** lamp stops flashing and stays lit, and the printer stops vibrating.

Do not open the top cover while the printer is operating (the **POWER** lamp is flashing).

If this vibration and noise is bothersome, such as when using the printer late at night, automatic ink quality maintenance can be disabled by using the printer driver.

If automatic ink quality maintenance has been disabled, be sure to follow the procedure below to enable automatic ink quality maintenance again.

Important

- Enabling automatic ink quality maintenance is recommended. Failure to perform the ink quality maintenance about once a week may affect print quality.

1. Make sure that the printer is turned on.
2. Open the Canon IJ Printer Utility.
 [Opening the Canon IJ Printer Utility](#)
3. Select **Custom Settings** in the pop-up menu.
4. Select the **Execute ink quality maintenance automatically** check box, then click **Apply**.
5. Confirm the message and click **OK**.

U092

The Printer Turns Off Unintendedly

- **Check: Deactivate the setting to turn the unit off automatically.**

The printer turns off automatically according to the elapsed time you specified if you activate the setting to turn the unit off automatically.

If you do not want the printer to turn off automatically, open Canon IJ Printer Utility, select **Power Settings** in the pop-up menu, then select **Disable** for **Auto Power Off** on **Auto Power**.

[Page top ▲](#)

Print Results Not Satisfactory

If the print result is not satisfactory due to white streaks, misaligned lines, or uneven colors, confirm the paper and print quality settings first.

- Check 1: Do the page size and media type settings match the size and type of the loaded paper?**

When these settings are incorrect, you cannot obtain a proper print result.

If you are printing a photograph or an illustration, incorrect paper type settings may reduce the quality of the printout color.

Also, if you print with an incorrect paper type setting, the printed surface may be scratched.

In borderless printing, uneven coloring may occur depending on the combination of the paper type setting and the loaded paper.

To print from a PictBridge compliant device	Confirm by using your PictBridge compliant device. ➡ Printing Photographs Directly from a PictBridge Compliant Device
To print from a computer	Confirm by using the printer driver. ➡ Printing with Easy Setup

- Check 2: Make sure that the appropriate print quality is selected using the printer driver.**

Select a print quality option suitable for the paper and image for printing. If you notice blurs or uneven colors, increase the print quality setting and try printing again.

You can confirm the print quality setting using the printer driver.

➡ [Changing the Print Quality and Correcting Image Data](#)

 **Note**

- You cannot change the print quality setting from a PictBridge compliant device.

- Check 3: When using wireless LAN, make sure that the radio status is good.**

➡ [Monitoring Wireless Network Status](#)

If the radio status is poor, it may be possible that print results are not satisfactory or the printing speed is slow. Try printing again after the radio status improves.

If the problem is not resolved even after the radio status improves, use the printer via USB or a wired LAN.

- Check 4: If the problem is not resolved, there may be other causes.**

- See also the sections below:
- ➡ [Cannot Print to End of Job](#)
 - ➡ [No Printing Results/Printing Is Blurred/Colors Are Wrong/White Streaks](#)

U311

Cannot Print to End of Job

- **Check: Is the space of your computer's hard disk sufficient?**

Delete unnecessary files to free disk space.

[Page top ▲](#)

U315

Lines Are Misaligned

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: Perform Print Head Alignment.**

If printed lines are misaligned or print results are otherwise unsatisfactory, adjust the print head position.

➡ [Aligning the Print Head](#)

Note

- If the problem is not resolved after performing the Print Head Alignment, perform Print Head Alignment manually referring to [Aligning the Print Head Position Manually from Your Computer](#).

- **Check 3: Increase the print quality and try printing again.**

Increasing the print quality in the printer driver may improve the print result.

Page top ▲

U316

Printed Paper Curls or Has Ink Blots

Printed Paper Has Ink Blots

Printed Paper Curls

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: If the intensity is set high, reduce the intensity setting in the printer driver and try printing again.**

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

You can confirm the intensity using the printer driver.

➡ [Adjusting Intensity](#)

- **Check 3: Is Photo Paper used for printing photographs?**

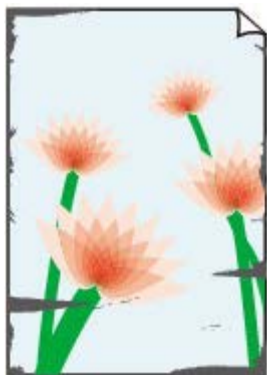

When printing data with high color saturation such as photographs or images in deep color, we recommend using Photo Paper Plus Glossy II or other Canon speciality paper.

➡ [Media Types You Can Use](#)

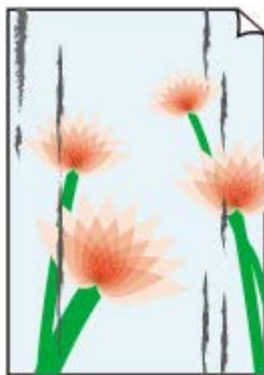

U317

Paper Is Smudged/Printed Surface Is Scratched

✦ Paper Is Smudged

The Edges of Paper Are Smudged

Printed Surface Is Smudged

✦ Printed Surface Is Scratched

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: Is the appropriate type of paper used? Check the followings:**

- Check to see if the paper you are printing on is suitable for your printing purpose.
➡ [Media Types You Can Use](#)
- When performing Borderless Printing, make sure that the paper you are using is suitable for Borderless Printing.
If the paper you are using is not suitable for Borderless Printing, the print quality may be reduced at the top and bottom edges of the paper.
➡ [Printing Area](#)

- **Check 3: Load the paper after correcting its curl.**

When using Photo Paper Plus Semi-gloss, even if the sheet is curled, load one sheet at a time as it is. If you roll up this paper to flatten, this may cause cracks on the surface of the paper and reduce the print quality.

We recommend putting unused paper back into the package and keeping it on a level surface.

- **For Plain Paper**

Turn the paper over and reload it to print on the other side.

Leaving the paper loaded on the rear tray for a long time may cause the paper to curl. In this case, load the paper with the other side facing up. It may resolve the problem.

- **For Other Paper**

If the curl on the four corners of the paper is more than 0.1 inch / 3 mm (A) in height, the paper

may be smudged or may not be fed properly. In such cases, follow the procedure described below to correct the paper curl.

1. Roll up the paper in the opposite direction to the paper curl as shown below.

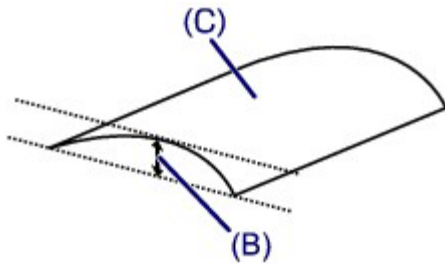

2. Check that the paper is now flat.

We recommend printing curl-corrected paper one sheet at a time.

Note

- Depending on the media type, the paper may be smudged or may not be fed properly even if it is not curled inward. In such cases, follow the procedure described below to curl the paper outward within 0.1 inch / 3 mm (B) in height before printing. This may improve the print result.

(C) Printing side

We recommend printing paper that has been curled outward one sheet at a time.

• Check 4: Adjust the setting to prevent paper abrasion.

Adjusting the setting to prevent paper abrasion will widen the clearance between the print head and the loaded paper. If you notice abrasion even with the media type set correctly to match the loaded paper, set the printer to prevent paper abrasion on the computer.

* Readjust the setting not to prevent paper abrasion once printing is complete. If not, this setting remains enabled for all subsequent print jobs.

In the Canon IJ Printer Utility, select **Custom Settings** in the pop-up menu, select the **Prevent paper abrasion** check box, and then click **Apply**.

To open the Canon IJ Printer Utility, see [Opening the Canon IJ Printer Utility](#).

• Check 5: If the intensity is set high, reduce the intensity setting in the printer driver and try printing again.

If you are using plain paper to print images with high intensity, the paper may absorb too much ink and become wavy, causing paper abrasion.

Reduce the intensity setting in the printer driver and try printing again.

1. Open the Print dialog.

➡ [How to Open the Printer Driver Setup Window](#)

2. Select **Color Options** in the pop-up menu.

3. Drag the **Intensity** slide bar to set the intensity.

- **Check 6: Is printing performed beyond the recommended printing area?**

If you are printing beyond the recommended printing area of your printing paper, the lower edge of the paper may become stained with ink.

Resize your original document in your application software.

➡ [Printing Area](#)

- **Check 7: Is the paper feed roller dirty?**

Clean the paper feed roller.

➡ [Cleaning the Paper Feed Roller](#)

 **Note**

- Cleaning the paper feed roller will wear the roller, so perform this procedure only when necessary.

- **Check 8: Is the inside of the printer dirty?**

When performing duplex printing, the inside of the printer may become stained with ink, causing the printout to become smudged.

Perform the Bottom Plate Cleaning to clean the inside of the printer.

➡ [Cleaning Inside the Printer](#)

 **Note**

- To prevent the inside of the printer from stains, set the paper size correctly.

- **Check 9: Set the time to dry the printed surface longer.**

Doing so gives the printed surface enough time to dry so that paper smudged and scratched are prevented.

1. Make sure that the printer is turned on.

2. Open the Canon IJ Printer Utility.

➡ [Opening the Canon IJ Printer Utility](#)

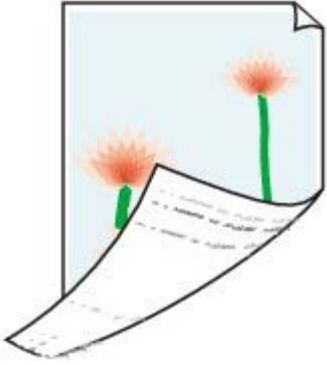

3. Select **Custom Settings** in the pop-up menu.

4. Drag the **Ink Drying Wait Time:** slide bar to set the wait time, and then click **Apply**.

5. Confirm the message and click **OK**.

U318

Back of the Paper Is Smudged

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: Perform the Bottom Plate Cleaning to clean the inside of the printer.**

➡ [Cleaning Inside the Printer](#)

Note

- When performing borderless printing, duplex printing, or too much printing, the inside may become stained with ink.

U319

Vertical Lines Are Printed on the Sides of the Printout

- **Check: Is the size of the loaded paper correct?**

The vertical lines may be printed in the margin if the size of the loaded paper is larger than that you have specified.

Set the paper size correctly according to the paper you loaded.

➡ [Print Results Not Satisfactory](#)

Note

- The direction of the vertical line pattern may vary depending on the image data or the print setting.
- This printer performs automatic cleaning when necessary to keep printouts clean. A small amount of ink is ejected for cleaning.
Although ink is usually ejected on the ink absorber, it may be ejected on the paper if you load paper larger than that you have specified.

U320

Colors Are Uneven or Streaked

❖ Colors Are Uneven

❖ Colors Are Streaked

- **Check 1: Did you confirm the paper and print quality settings?**

➡ [Print Results Not Satisfactory](#)

- **Check 2: Print the Nozzle Check Pattern and perform any necessary maintenance operations such as Print Head Cleaning.**

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [When Printing Becomes Faint or Colors Are Incorrect](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
 - Check to see if a particular color's ink tank is not empty.
 - If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.
- If the problem is not resolved after performing the Print Head Cleaning twice:
 - Perform the Print Head Deep Cleaning.

If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.

- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged.
Contact the service center.

• Check 3: Perform Print Head Alignment.

➡ [Aligning the Print Head](#)

Note

- If the problem is not resolved after performing the Print Head Alignment, perform Print Head Alignment manually referring to [Aligning the Print Head Position Manually from Your Computer](#).

• Check 4: Is automatic ink quality maintenance enabled?

If automatic ink quality maintenance is disabled, ink in one or more ink tanks may separate, resulting in uneven density. Enable automatic ink quality maintenance by using the printer driver.

1. Make sure that the printer is turned on.
2. Open the Canon IJ Printer Utility.
➡ [Opening the Canon IJ Printer Utility](#)
3. Select **Custom Settings** in the pop-up menu.
4. Select the **Execute ink quality maintenance automatically** check box, then click **Apply**.
5. Confirm the message and click **OK**.

Important

- Enabling automatic ink quality maintenance is recommended. Failure to perform the ink quality maintenance about once a week may affect print quality.
- If automatic ink quality maintenance has been disabled, perform the ink quality maintenance manually about once a week.
➡ [Maintaining the Ink Quality](#)

Printing Does Not Start

- **Check 1: Make sure that the power plug is securely plugged in, then turn the printer on.**

While the **POWER** lamp is flashing, the printer is initializing. Wait until the **POWER** lamp stops flashing and remains lit.

Note

- When printing large data such as a photo or graphics, it may take longer to start printing. While the **POWER** lamp is flashing, the computer is processing data and sending it to the printer. Wait until printing starts.

- **Check 2: Make sure that the printer is connected to your computer properly.**

When the printer is connected to your computer with a USB cable, make sure that the USB cable is securely plugged in to the printer and the computer, then check the followings:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
- There could also be a problem with the USB cable. Replace the USB cable and try printing again.

When you use the printer over LAN, make sure that the printer is connected to the network with a LAN cable or is set up correctly.

- **Check 3: Does an error occur?**

Resolve the error according to the number of flashes of the **Alarm** lamp and the **POWER** lamp.

➡ Alarm Lamp Flashes Orange

- **Check 4: If you are printing from the computer and there are any unnecessary print jobs, delete them.**

➡ Deleting the Undesired Print Job

- **Check 5: Make sure that the inner cover (the cover of the disc tray) is closed.**

If the inner cover is opened, close the inner cover and press the **RESUME/CANCEL** button on the printer.

- **Check 6: Is the manual feed tray in the paper feed position?**

If the manual feed tray is in the paper jam clearing position, return the tray to the paper feed position and press the **RESUME/CANCEL** button on the printer.

- **Check 7: Is the feed slot cover closed?**

If the feed slot cover is opened, close it slowly and press the **RESUME/CANCEL** button.

- **Check 8: Does the page size setting match the size of the paper loaded in the printer?**

Press the **RESUME/CANCEL** button on the printer to clear the error. Then check the **Paper Size** setting in the Page Setup dialog and load paper that is the same size as the setting and try printing again.

Set the printer not to detect the width of the paper using the Canon IJ Printer Utility.

To set the printer not to detect the width of the paper, open the Canon IJ Printer Utility, select **Custom Settings** in the pop-up menu, clear the **Detect paper width** check box, and then click **Apply**.

To open the Canon IJ Printer Utility, see [Opening the Canon IJ Printer Utility](#).

* Select the **Detect paper width** check box again once printing is complete, and then click **Apply**.

- **Check 9: Are the media type and the page size settings of the printer driver correct?**

When using non Canon genuine specialty paper, be sure to select the proper media type or page size correctly in the printer driver.

Confirm the settings following the procedure below, and try printing again.

1. Ensure that either **A3+ (Art Paper Margin 30)**, **A3 (Art Paper Margin 30)**, **A4 (Art Paper Margin 30)**, or **US Letter (Art Paper Margin 30)** is selected in the application.

If the page size you want to use is not displayed, open the **File** menu of the application and select **Print**. Then make sure that the name of your printer is selected.

2. Make sure that the paper selected for **Media Type** in the Print dialog in the printer driver matches the paper loaded in the printer.

3. Make sure that the **Paper Size** setting in the Page Setup dialog in the printer driver is the same as the size set in step 1.

- **Check 10: Make sure that your printer's name is selected in the Print dialog.**

The printer will not print properly if you are using a printer driver for a different printer.

Make sure that your printer's name is selected in **Printer** in the Print dialog.

Note

- To make the printer the one selected by default, select the printer for **Default printer**.

- **Check 11: Restart your computer if you are printing from the computer.**

[Page top ▲](#)

Printing Does Not Start

- **Check 1: Make sure that the power plug is securely plugged in, then turn the printer on.**

While the **POWER** lamp is flashing, the printer is initializing. Wait until the **POWER** lamp stops flashing and remains lit.

Note

- When printing large data such as a photo or graphics, it may take longer to start printing. While the **POWER** lamp is flashing, the computer is processing data and sending it to the printer. Wait until printing starts.

- **Check 2: Make sure that the printer is connected to your computer properly.**

When the printer is connected to your computer with a USB cable, make sure that the USB cable is securely plugged in to the printer and the computer, then check the followings:

- If you are using a relay device such as a USB hub, disconnect it, connect the printer directly to the computer, and try printing again. If printing starts normally, there is a problem with the relay device. Consult the reseller of the relay device for details.
- There could also be a problem with the USB cable. Replace the USB cable and try printing again.

When you use the printer over LAN, make sure that the printer is connected to the network with a LAN cable or is set up correctly.

- **Check 3: Does an error occur?**

Resolve the error according to the number of flashes of the **Alarm** lamp and the **POWER** lamp.

➡ Alarm Lamp Flashes Orange

- **Check 4: If you are printing from the computer and there are any unnecessary print jobs, delete them.**

➡ Deleting the Undesired Print Job

- **Check 5: Make sure that the inner cover (the cover of the disc tray) is closed.**

If the inner cover is opened, close the inner cover and press the **RESUME/CANCEL** button on the printer.

- **Check 6: Is the manual feed tray in the paper feed position?**

If the manual feed tray is in the paper jam clearing position, return the tray to the paper feed position and press the **RESUME/CANCEL** button on the printer.

- **Check 7: Is the feed slot cover closed?**

If the feed slot cover is opened, close it slowly and press the **RESUME/CANCEL** button.

- **Check 8: Does the page size setting match the size of the paper loaded in the printer?**

Press the **RESUME/CANCEL** button on the printer to clear the error. Then check the **Paper Size** setting in the Page Setup dialog and load paper that is the same size as the setting and try printing again.

Set the printer not to detect the width of the paper using the Canon IJ Printer Utility.

To set the printer not to detect the width of the paper, open the Canon IJ Printer Utility, select **Custom Settings** in the pop-up menu, clear the **Detect paper width** check box, and then click **Apply**.

To open the Canon IJ Printer Utility, see [Opening the Canon IJ Printer Utility](#).

* Select the **Detect paper width** check box again once printing is complete, and then click **Apply**.

- **Check 9: Are the media type and the page size settings of the printer driver correct?**

When using non Canon genuine specialty paper, be sure to select the proper media type or page size correctly in the printer driver.

Confirm the settings following the procedure below, and try printing again.

1. Ensure that either **A3+ (Art Paper Margin 30)**, **A3 (Art Paper Margin 30)**, **A4 (Art Paper Margin 30)**, or **US Letter (Art Paper Margin 30)** is selected in the application.

If the page size you want to use is not displayed, open the **File** menu of the application and select **Print**. Then make sure that the name of your printer is selected.

2. Make sure that the paper selected for **Media Type** in the Print dialog in the printer driver matches the paper loaded in the printer.

3. Make sure that the **Paper Size** setting in the Page Setup dialog in the printer driver is the same as the size set in step 1.

- **Check 10: Make sure that your printer's name is selected in the Print dialog.**

The printer will not print properly if you are using a printer driver for a different printer.

Make sure that your printer's name is selected in **Printer** in the Print dialog.

Note

- To make the printer the one selected by default, select the printer for **Default printer**.

- **Check 11: Restart your computer if you are printing from the computer.**

U322

Printing Stops Before It Is Completed

- **Check 1: Is the inner cover (the cover of the disc tray) opened while printing on paper?**

Close the inner cover and press the **RESUME/CANCEL** button on the printer.

- **Check 2: Is the paper loaded?**

Make sure that paper is loaded.

If the printer has run out of paper, load paper.

- **Check 3: Do the printing documents have lots of photographs or illustrations?**

As printing large data such as photos or graphics takes time for the printer and the computer to process, the printer may appear to have stopped operating.

In addition, when printing data that uses a large amount of ink continuously on plain paper, the printer may pause temporarily. In either case, wait until the process is complete.

Note

- If you are printing a document with a large printing area or printing multiple copies of a document, printing may pause to allow the ink to dry.

- **Check 4: Has the printer been printing continuously for a long period?**

If the printer has been printing continuously for a long time, the print head or other parts around it may overheat. The printer may stop printing at a line break for a period of time and then resume printing.

In this case, wait for a while without operation. If the printing still does not resume, interrupt your print session at a convenient time and turn the printer off for at least 15 minutes.

Caution

- The print head and the surrounding area can become extremely hot inside the printer. Never touch the print head or nearby components.

Ink Is Not Ejected

- **Check 1: Has the ink run out?**

Open the top cover, then check the status of ink lamp.

➡ [Checking the Ink Status](#)

- **Check 2: Are the print head nozzles clogged?**

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [When Printing Becomes Faint or Colors Are Incorrect](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
Check to see if a particular color's ink tank is not empty.
If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged.
Contact the service center.

Ink Is Not Ejected

- **Check 1: Has the ink run out?**

Open the top cover, then check the status of ink lamp.

➡ [Checking the Ink Status](#)

- **Check 2: Are the print head nozzles clogged?**

Print the Nozzle Check Pattern to determine whether the ink ejects properly from the print head nozzles.

Refer to [When Printing Becomes Faint or Colors Are Incorrect](#) for the Nozzle Check Pattern printing, Print Head Cleaning, and Print Head Deep Cleaning.

- If the Nozzle Check Pattern is not printed correctly:
Check to see if a particular color's ink tank is not empty.
If the Nozzle Check Pattern is not printed correctly though ink is sufficient, perform the Print Head Cleaning and try printing the Nozzle Check Pattern again.
- If the problem is not resolved after performing the Print Head Cleaning twice:
Perform the Print Head Deep Cleaning.
If the problem is not resolved after performing the Print Head Deep Cleaning, turn off the printer and perform another Print Head Deep Cleaning after 24 hours.
- If the problem is not resolved after performing the Print Head Deep Cleaning twice:
If Print Head Deep Cleaning does not resolve the problem, the print head may be damaged.
Contact the service center.

U325

Print Head Holder Does Not Move to the Position for Replacing

- **Check 1: Is the POWER lamp off?**

Check if the **POWER** lamp is lit.

The print head holder will not move unless the power is on. If the **POWER** lamp is off, close the top cover and turn the printer on.

While the **POWER** lamp is flashing, the printer is initializing. Wait until the **POWER** lamp stops flashing and remains lit, open the top cover again, then press the **RESUME/CANCEL** button.

- **Check 2: Is the Alarm lamp flashing?**

Close the top cover to confirm the number of times the **Alarm** lamp is flashing. After that, take the appropriate action to resolve the error, reopen the top cover, then press the **RESUME/CANCEL** button. For details on how to resolve the error, see [Alarm Lamp Flashes Orange](#).

- **Check 3: Has the top cover been left open for 10 minutes or longer?**

If the top cover is left open for more than 10 minutes, the print head holder moves to the right to prevent the print head from drying out. Close and reopen the top cover, then press the **RESUME/CANCEL** button to return the print head holder to the position for replacing.

- **Check 4: Has the printer been printing continuously for a long period?**

Close the top cover, reopen it after a while, then press the **RESUME/CANCEL** button.

If the printer has been printing continuously for a long time, the print head holder may not move to the position for replacing since the print head may overheat.

Note

- Opening the top cover while printing moves the print head holder to the right. After printing finishes, close the top cover, reopen it, then press the **RESUME/CANCEL** button.

D010

Cannot Print on the Disc Label

- ➡ Disc Label Printing Does Not Start
- ➡ Disc Tray Does Not Feed Properly
- ➡ Disc Tray Jammed

Disc Label Printing Does Not Start

- **Check 1: Is the disc tray placed properly?**

Open the inner cover (the cover of the disc tray), properly place the disc tray again, then press the **RESUME/CANCEL** button on the printer.

Use the disc tray supplied with this printer ("K" is on the upper side).

For details on how to place the disc tray, refer to [Placing a Printable Disc](#).

- **Check 2: Is the printable disc placed on the disc tray?**

Place the printable disc on the disc tray properly, then press the **RESUME/CANCEL** button.

Use the disc tray supplied with this printer ("K" is on the upper side).

For details on how to place the disc tray, refer to [Placing a Printable Disc](#).

- **Check 3: If disc label printing stops before it is complete, try the operation again.**

If a certain period of time has elapsed while disc label printing is in progress, the printer stops initializing.

The printer resumes initializing by pressing the **RESUME/CANCEL** button.

Try the operation again following the on-screen instructions.

Disc Tray Does Not Feed Properly

- **Check 1: Is the disc tray placed properly?**

Properly place the disc tray again, then press the **RESUME/CANCEL** button.

Make sure that you are using the disc tray supplied with the printer ("K" is on the upper side).

For details on how to place the disc tray, refer to [Placing a Printable Disc](#).

- **Check 2: Unrecognizable printable disc may be placed.**

Canon recommends that you use printable discs specially processed to be printed on by an inkjet printer.

Disc Tray Jammed

Pull out the disc tray gently.

If the disc tray cannot be pulled out, turn the printer off, then turn the printer back on again. The disc tray will automatically be ejected.

When the disc tray is pulled out, place the disc tray ("K" is on the upper side) again, then retry printing. Place the printable disc properly referring to [Placing a Printable Disc](#).

If the disc tray is still jammed, check if there is a problem with the printable disc.

- ➡ Disc Tray Does Not Feed Properly

D010

Disc Tray Does Not Feed Properly

- **Check 1: Is the disc tray placed properly?**

Properly place the disc tray again, then press the **RESUME/CANCEL** button.

Make sure that you are using the disc tray supplied with the printer ("K" is on the upper side).

For details on how to place the disc tray, refer to [Placing a Printable Disc](#).

- **Check 2: Unrecognizable printable disc may be placed.**

Canon recommends that you use printable discs specially processed to be printed on by an inkjet printer.

Disc Tray Jammed

Pull out the disc tray gently.

If the disc tray cannot be pulled out, turn the printer off, then turn the printer back on again. The disc tray will automatically be ejected.

When the disc tray is pulled out, place the disc tray ("K" is on the upper side) again, then retry printing. Place the printable disc properly referring to [Placing a Printable Disc](#).

If the disc tray is still jammed, check if there is a problem with the printable disc.

- ➡ Disc Tray Does Not Feed Properly

U353

In Other Cases

Make sure of the following:

- **Check 1: Are there any foreign objects around the paper output slot?**
- **Check 2: Are there any foreign objects in the rear tray or the manual feed tray?**

If there are any foreign objects in the rear tray or the manual feed tray, be sure to turn off the printer, unplug it from the power supply, then remove the foreign object.

Note

- If the feed slot cover is opened, close it slowly.

- **Check 3: Is the paper curled?**

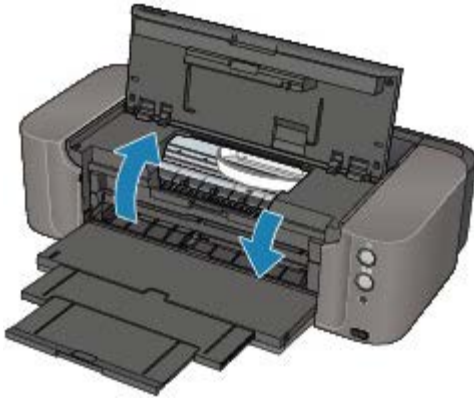

➡ Check 3: Load the paper after correcting its curl.

U156

Paper Is Jammed inside the Printer

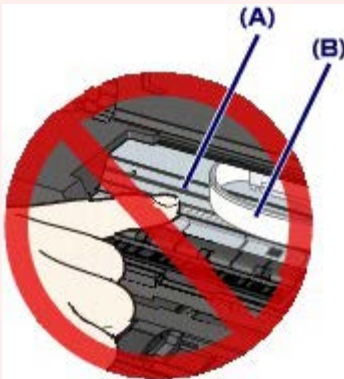

Remove the paper following the procedure below.

1. Turn off the printer, and unplug the power cord of the printer from the power supply.
2. Open the top cover and the inner cover (the cover of the disc tray).

Important

- Do not touch the clear film (A) or the white belt (B).

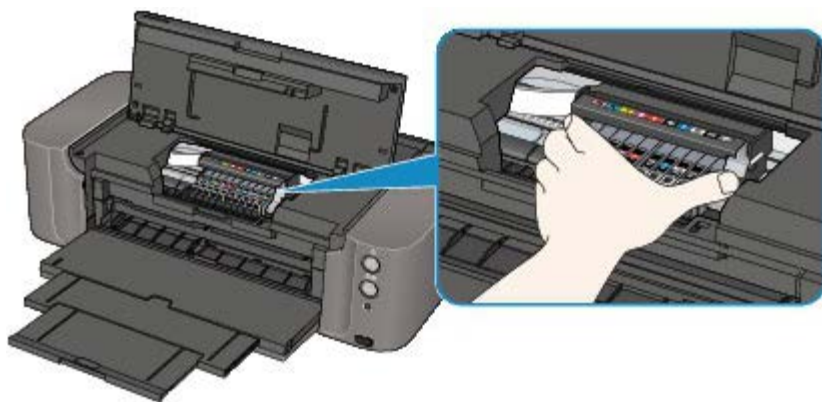

If the paper or your hands touch these parts and blot or scratch them, the printer can be damaged.

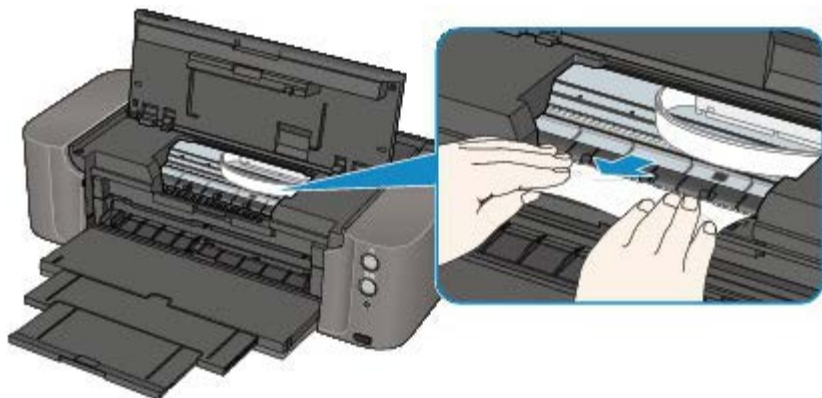

3. Make sure that the jammed paper is not under the print head holder.

If the jammed paper is under the print head holder, move the print head holder to the right edge or the left edge whichever is easier to remove the paper.

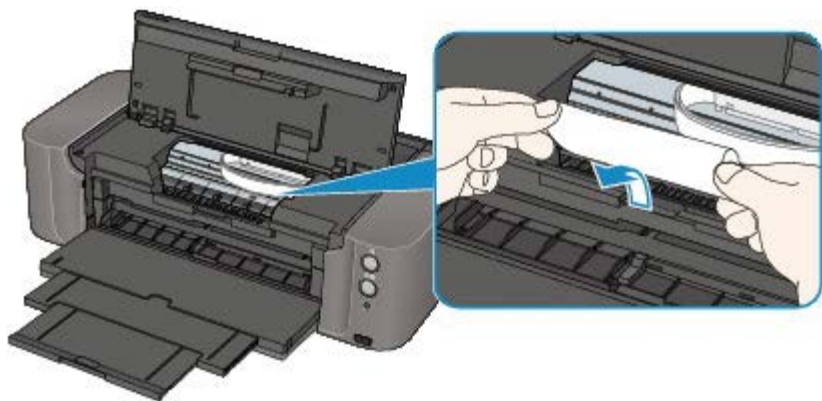

When you move the print head holder, hold the top of the print head holder and slide it slowly to the right edge or the left edge.

4. Hold the jammed paper with your hands.

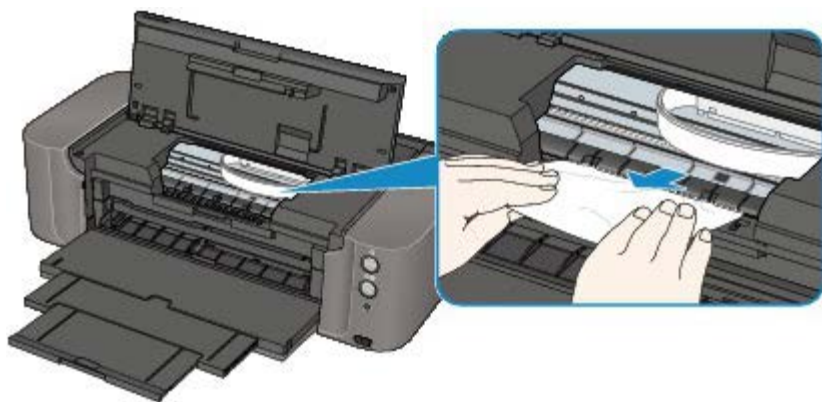

If the paper is rolled up, pull it out.

5. Pull the paper slowly not to tear it, then pull the paper out diagonally forward in front at aslant.

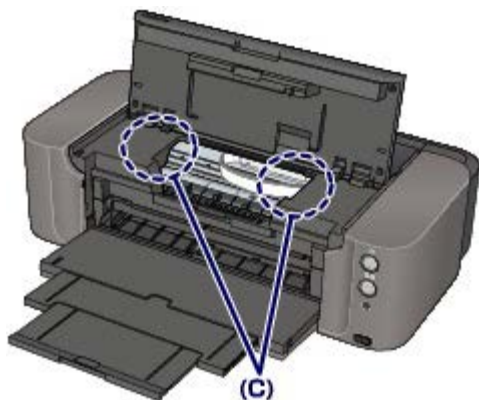

Keep an angle of the paper about 45 degrees and pull it slowly.

6. Make sure that all the jammed paper is removed.

If the paper is torn, a piece of paper may remain inside the printer. Check the following and remove the piece of paper if it remains.

- Does the piece of paper remain under the print head holder?
- Does the little piece of paper remain inside the printer?
- Does the piece of paper remain in the right side or the left side space (C) inside the printer?

7. Close the top cover and the inner cover, then reload the paper.

All print jobs in the queue are canceled. Reprint if necessary.

Note

- When reloading the paper, confirm that you are using the paper suited for printing and are loading it correctly. If the message about paper jam is displayed on the computer screen when you resume printing after removing all the jammed paper, a piece of paper may remain inside the printer. In this case, confirm that no piece of paper remains inside the printer.

If you cannot remove the paper or the paper tears inside the printer, or if the paper jam error continues after removing the paper, contact the service center.

The Inkjet Printer/Scanner/Fax Extended Survey Program Icon Appears

If the Inkjet Printer/Scanner/Fax Extended Survey Program is installed, the printer and application software usage information is scheduled to be sent every month for about ten years. The **Inkjet Printer/Scanner/Fax Extended Survey Program** icon appears in the Dock when it is time to send the printer usage information.

Read the instructions on the screen after clicking the icon, then follow the procedure below.

- **If you agree to participate in the survey program:**

Click **Agree**, then follow the on-screen instructions. The printer usage information will be sent via the Internet. If you have followed the on-screen instructions, the information will be sent automatically from the second time onward and the confirmation screen will not be displayed again.

Note

- If you deselect the **Send automatically from the next time** check box, the information will not be sent automatically from the second time onward and the **Inkjet Printer/Scanner/Fax Extended Survey Program** icon will appear in the Dock at the time of the next survey.

- **If you do not agree to participate in the survey program:**

Click **Do not agree**. The confirmation screen will be closed, and the survey at that time is skipped. The confirmation screen will be displayed again one month later.

- **To stop sending the information:**

Click **Turn off**. The Inkjet Printer/Scanner/Fax Extended Survey Program is stopped, and the information will not be sent. To resume the survey, see [Changing the setting](#).

- **To uninstall the Inkjet Printer/Scanner/Fax Extended Survey Program:**

1. Stop the Inkjet Printer/Scanner/Fax Extended Survey Program.

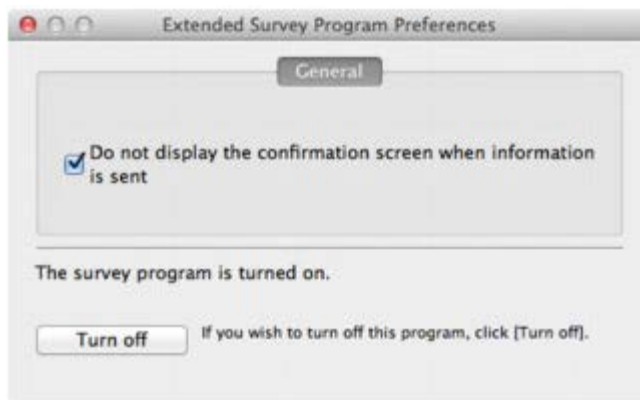

➡ Changing the setting:

2. Select **Applications** from the **Go** menu of Finder, and double-click the **Canon Utilities** folder, then the **Inkjet Extended Survey Program** folder.
3. Place the **Canon Inkjet Printer/Scanner/Fax Extended Survey Program.app** file into the **Trash**.
4. Restart the computer.
Empty the **Trash** and restart your computer.

- **Changing the setting:**

To display the confirmation screen every time the printer usage information is sent or to resume surveying, follow the procedure below.

1. Select **Applications** from the **Go** menu of Finder, and double-click the **Canon Utilities** folder, then the **Inkjet Extended Survey Program** folder.
2. Double-click the **Canon Inkjet Printer/Scanner/Fax Extended Survey Program** icon.

- **Do not display the confirmation screen when information is sent:**
If the check box is selected, the information will be sent automatically.
If the check box is not selected, the **Inkjet Printer/Scanner/Fax Extended Survey Program** icon will appear in the Dock at the time of the next survey. Click the icon, then follow the on-screen instructions.
- **Turn off/Turn on button:**
Click the **Turn off** button to stop the Inkjet Printer/Scanner/Fax Extended Survey Program.
Click the **Turn on** button to restart the Inkjet Printer/Scanner/Fax Extended Survey Program.

Error Message Appears on a PictBridge Compliant Device

The following are the possible errors that may occur when printing directly from a PictBridge compliant device and the countermeasures to clear them.

 **Note**

- This section describes errors that are indicated on Canon-brand PictBridge compliant devices. The error messages and operations may vary depending on the device you are using. For errors on non-Canon PictBridge compliant devices, check the status of the **Alarm** lamp and take the appropriate action to clear the error. For details, see [Alarm Lamp Flashes Orange](#).
- For the errors indicated on the PictBridge compliant device and their solution, also refer to the instruction manual of the device. For other troubles on the device, contact the manufacturer.

Error Message on the PictBridge Compliant Device	Action
"Printer in use"	<ul style="list-style-type: none">● If the printer is printing from the computer or warming up, wait until the job ends. When it is ready, the printer starts printing automatically.● If you replace an ink tank while printing from a PictBridge compliant device, press the RESUME/CANCEL button on the printer to clear the error, then resume printing.
