For EOS C200 / EOS C200B (Firmware ver. 1.0.6.1.00) Users

Support for the Optional LM-V2 LCD Monitor

After updating the camera's firmware to ver. 1.0.6.1.00, you will be able to use the optional LM-V2 LCD Monitor. Using the optional LA-V2 LCD Attachment Unit, you will be able to attach the LM-V2 to the handle unit or to the camera's body in a similar way as when using the LM-V1. For details about attaching and adjusting the LCD monitor, refer to the C200 / C200B Instruction Manual.

The following settings/options will be added to the menus or changed after the firmware version update.

Assignable Functions

Function name	Description	CAMERA	MEDIA
[LCD LM-V2 Setup]	Opens the [🖵 Monitoring Setup] menu.	●	●

[🖵 Monitoring Setup] menu

These settings are added as menu page ②.

	Menu item	Setting options and additional information
②		
	[LCD LM-V2 Brightness]	–99 to +99 **(±0)**
	[LCD LM-V2 Contrast]	–99 to +99 **(±0)**
	[LCD LM-V2 Color]	–20 to +20 **(±0)**
	[LCD LM-V2 Sharpness]	1 to 4 **(2)**
	[LCD LM-V2 Luminance]	[+2], [+1], **[Normal]**
		[LCD LM-V2] settings are used to adjust, respectively, the brightness, contrast, color saturation, sharpness and luminance of an optional LM-V2 LCD Monitor.

[☞ Assignable Buttons] menu

The settings on page ④ change as follows.

	Menu item	Setting options and additional information
④		
	[LCD LM-V1/V2: 1] and [LCD LM-V1/V2: 2]	1: **[FUNC]**, 2: **[Display]**
		These settings apply equally to the assignable buttons on either model. A new assignable function [LCD LM-V2 Setup] is also available.

[🔧 System Setup] menu

	Menu item	Setting options and additional information
⑤		
	[Touch Screen Response]	**[Normal]**, [Low]
		This setting is available only when an LM-V1 or LM-V2 LCD Monitor is connected to the camera and applies equally to either model.
