Setting the Network Environment

Configure the network settings that is not included in the Setup Guide, such as the network connection method and the IP address settings.

User's Guide See "Setting up the Network Environment"

Installing the Drivers

Download the drivers from the Canon website (https://global.canon/en/support/).

Example: 719iZ download

For information on the compatibility between the latest drivers and operating systems, see the Canon website. https://global.canon/en/support/

Configuring E-Mail/I-Fax Communication Settings

Configure communication settings such as the mail server, authentication, and encryption settings in order to send scanned documents via e-mail and I-fax.

User's Guide See "Setting E-mail/I-Fax Communication"

The storage of the machine contains a shared space called the "Advanced Box." By using the Advanced Box, you can easily share files with computers and other Canon multifunction printers without the need for a server.

User's Guide

See "Setting the Advanced Box of the Machine"

Connecting with Other Devices

You can register a Windows server or the Advanced Box of another Canon multifunction printer as a connection destination. This enables you to use the machine to print data that is on the connection destination. You can also use the connection destination to obtain data from the Advanced Box of the machine.

User's Guide

See "Connecting to the Other Devices"

Using this Machine from a Mobile Device (Linking with Mobile Devices)

This machine can be used from mobile devices such as smartphones. This makes it easy to print documents or photos from a mobile device and to save data scanned on this machine on a mobile device.

User's Guide See "Linking with Mobile Devices"

Configuring Security Settings

The machine provides various security functions. You can configure the security settings according to your environment.

Security Information See "Security Settings Navigator"

10 Using Convenient Functions to Configure the Machine

This section describes useful functions for efficiently configuring the machine.

Managing the Machine from a Computer (Remote UI)

Remote UI allows this machine to be managed using the Web browser on a computer. You can use it to check the machine's operating status, change settings, and save items to the Address Book.

User's Guide

See "Managing the Machine from a Computer (Remote UI)"

Importing Settings Data from Another Device

You can save (export) the settings data of another Canon multifunction printer to a computer. You can then import that settings data to the machine to skip the configuration procedure.
